**Petrobras announces site of Rio de Janeiro Petrochemical Complex**

---

(Rio de Janeiro, March 28, 2006). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, announces that the Executive Board has approved the location of the Rio de Janeiro Petrochemical Complex COMPERJ in the municipality of Itaboraí and São Gonçalo, state of Rio de Janeiro.

The selection of these municipalities as the site for the Complex was based on technical, economic and environmental criteria. The determining factors in choosing the location were the proximity of the site to Petrobras installations in Rio de Janeiro, the availability of labor for both the construction phase and also once the complex is operational, and its proximity to port installations. In addition the region can easily absorb the environmental impact of the new project.

The initial phase of the project involves the construction of a Basic Petrochemical Unit (UPB) in partnership with the National Economic and Social Development Bank (BNDES) and, eventually, other interested parties representing an investment of US\$ 3.5 billion.

The Petrochemical Complex is expected to produce annually about 1.3 million tons of ethane, 900,000 tons of propane, 360,000 tons of benzene and 700,000 tons of p-xylene, as well as oil products, principally coke, adding value to 150,000 barrels/day of heavy oil from the Campos Basin.

This unit will be the basis for the development of an industrial complex, including site-wide utility facilities and plants manufacturing polyethylene, styrene and polypropylene, paraxylene and glycol-ethylene.

The total investment in the Complex, including the second-generation units, will be about US\$ 6.5 billions. The Complex will also ensure the feasibility of the regional location of several third-generation plants in the consumer goods segments from plastic utensils to components for vehicles, aircraft and ships.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
