PETROBRAS ANNOUNCES FIRST QUARTER 2006 RESULTS

(Rio de Janeiro May 12, 2006) **PETRÓLEO BRASILEIRO S.A.** Petrobras releases its consolidated results today, expressed in millions of *reais*, in accordance with Brazilian GAAP.

PETROBRAS reported consolidated net income of R\$6,675 million in the 1Q-2006, a 33% increase over the 1Q-2005.

In 1Q-2006, consolidated net operating income was R\$ 35,886 million, 20% higher than the same period in 2005 (R\$29,897 million). EBITDA in 1Q-2006 was R\$ 14,113 million, 35% higher than the R\$ 10,452 million reported in 1Q-2005. The market value of the Company at 3.31.2006 totaled R\$ 197,995 million, an increase of 62% when compared to the same period of last year.

- Consolidated net income for 1Q-2006 was R\$ 6,675 million, 33% higher than 1Q-2005, due to higher oil and oil product prices in both domestic (14%) and international markets, an increase in domestic oil and NGL (14%) production, and the higher quality and production of oil products (6%), all of which favorably impacted the Company's trade balance.
- Total production of oil, NGL and natural gas increased by 10% in 1Q-2006 compared with the same period of 2005, reaching an average of 2,279 thousand boe per day, due in part to the start-up of platform P-43 (Barracuda) in December 2004, and P-48 (Caratinga) in February 2005, but whose production at full capacity stabilized only during 2005-2Q.

Domestic oil and NGL production reached an average of 1,751 barrels per day, with 84% being produced in the Bacia de Campos (1,473 thousand barrels per day).
- The share of domestic oil in the throughput of PETROBRAS'S Brazilian refineries was 81% for the 1Q-2006 (1,438 thousand barrels per day) and 79% for the 1Q-2005 (1,347 thousand barrels per day).
- The consolidated net debt of PETROBRAS at 3.31.2006 was R\$ 21,516 million, 13% lower than the balance at 12.31.2005 (R\$ 24,825 million), primarily reflecting the appreciation of the *real* against the U.S. dollar during the quarter (7%) and debt amortization.
- In the 1Q-2006, PETROBRAS capital spending totaled R\$ 5,914 million (12% higher than the same period last year). Of this amount, R\$ 3,359 million was invested in developing oil and natural gas production in Brazil. These investments include those incurred by the Special Purposes Entities (SPEs), which totaled R\$ 494 million.
- The value added by the consolidated PETROBRAS for the 1Q-2006 reached R\$ 31,128 million, 12% above that of 1Q-2005, with R\$ 17,756 million allocated to the government through federal, state, and municipal taxes, R\$ 3,656 million in financial expenses, rentals and charter fees to financial institutions and suppliers, R\$ 7,179 million to the shareholders and R\$ 2,538 million to salaries, benefits and other charges.

PETROBRAS SYSTEM

Comments of the President, José Sérgio Gabrielli de Azevedo

The achievement of self-sufficiency and the continued growth of Petrobras in all of its various activities, both in Brazil and internationally, marked the first months of 2006.

To become self-sufficient at a time when worldwide oil resources are in tight supply signifies greater protection for the Brazilian consumer and strengthens the Brazilian economy, immunizing it from the international energy crises and creating flexibility to efficiently manage periods of excessive volatility in the world commodity markets.

It is worth noting that during this period of relative scarcity and high oil prices, Brazil has avoided the macroeconomic turmoil experienced during prior oil shocks. In fact the Brazilian currency has continued to appreciate, with economic expansion translating into higher incomes and more jobs, a surplus balance of payments, and Brazil's sovereign risk premium at its lowest levels on record. A key element to the improved risk perception is the strength of the trade balance, in which the surplus position in oil and oil products has been a major contributing factor.

The key operating, administrative and financial successes of the Company in the first quarter provides solid foundations for ensuring sustained growth throughout the fiscal year 2006, and for continued growth in profitability and shareholder returns.

In the exploration and production segment, the master plan for the Development of Santos Basin Natural Gas and Oil Production was approved. Under this plan, Petrobras and its partners are to invest approximately US\$ 18 billion over the next 15 years. The plan calls for increased gas production of approximately 12 million cubic meters/day of gas to supply the southeast of Brazil, with initial deliveries projected for the second half of 2008.

Two important discoveries were made in the Espírito Santo Basin. One of these finds represents a new field of light oil with estimated volumes of 280 million barrels of oil equivalent (boe). The find lies 12 kilometers from the Golfinho field, where production recently started from the 100,000 barrels per day floating platform, FPSO Capixaba. The other find, also adjacent to the same Golfinho field, indicated presence of hydrocarbons with estimated volumes of between 60 and 80 million boe.

In line with our expansion strategy and to ensure the supply of natural gas to the Brazilian market, production began in the Peroá field, Espírito Santo Basin. Gas from the field will be processed at the Cacimbas Gas Treatment Plant (UTGC), and will supply more than one million cubic meters of natural gas daily to the state of Espírito Santo.

In April, Petrobras signed an EPC contract to build the Cabiúnas-Vitória gas pipeline at a cost of US\$ 239 million. The new pipeline represents the first section of the Gasene project, which will ultimately link the southeast and northeast gas markets with Petrobras's domestic and imported gas supply.

Petrobras's board approved the acquisition of a 50% stake in the Pasadena Refining System in Texas, for approximately US\$ 370 million. The acquisition is part of the Company's plan to expand markets and capture additional margins for its growing volumes of oil exports. With a current capacity of 100,000 barrels per day, the refinery will be upgraded to process additional volumes of heavy Brazilian crude oil and modernized to meet the latest environmental standards established by the U.S. Environmental Protection Agency (EPA).

Along these same principles of adding value to the production chain and expanding markets, the Petrobras board approved the building of the new Rio de Janeiro Petrochemical Complex - COMPERJ. The construction of a Basic

Petrochemical Unit (UPB) is expected to cost US\$ 3.5 billion.

Internationally, the Company concluded the acquisition of downstream commercialization and distribution businesses in Paraguay and Colombia involving fuel operations (both retail and commercial).

In April, the incorporation of the shares of Petroquisa by Petrobras was approved by the respective boards of the two companies, the primary purpose being to align the strategic interests of Petrobras and its subsidiary as well as rationalize and optimize their capital expenditure plans.

In line with the company's strategy of improving returns from the gas and energy segment, Petrobras concluded the acquisition of Macaé Merchant thermoelectric power plant and related assets.

The Company's excellence in corporate governance and social responsibility was recognized with a second place ranking in the areas of ethics and sustainability. The ranking was based on a worldwide survey of the world's 15 largest oil companies, conducted by the Management & Excellence (M&E) agency.

Following these same principals of ethics and responsibility, the Company presented a proposal to the employees to resolve the impasse surrounding their current pension plan (Plano Petros) and to implement a new plan.

In April, the Company obtained a listing on the Buenos Aires Stock Exchange, providing domestic Argentine investors the opportunity to invest directly in Petrobras's shares. This initiative allows the Company to further diversify its shareholder base over the long-term, and increases the visibility of the Petrobras brand in Argentina.

Consolidated net income for the quarter of R\$ 6.675 million was 33% higher than the same period for the previous fiscal year. On the operating side, we have also been able to report excellent results. Average daily oil and natural gas output in Brazil and overseas was 2,279 thousand boe, 10% greater than the first quarter of 2005. Capital expenditures amounted to R\$ 5.914 billion, 12% higher than for the same period in 2005.

Our main challenge in 2006 will be to promote greater integration in all the segments of the Petrobras System, both in Brazil and overseas. For this to be successful, the participation of the entire work force will be critical to aligning actions based on a strategy of solid growth that will continue to improve shareholder returns and provide a better quality of life for the communities that surround us.

Finally, I must comment on the recent events in Bolivia. Although our operations in that country are not significant compared with Petrobras's consolidated values, we will seek to safeguard the return of our investments appealing to all the legal instruments to guarantee the respect of the mechanisms established in the contracts settled between Petrobras, its partners and the regulatory agencies.

PETROBRAS SYSTEM Operating Performance
Net Income and Consolidated Economic Indicators

PETROBRAS, its subsidiaries and controlled companies reported a net income of R\$ 6,675 million in the 1Q-2006, 33% higher than the net income recorded in 1Q-2005.

		R\$ million		
		First Quarter		
4Q - 2005		2006	2005	Δ%
50,066	Gross Operating Revenue	46,768	39,798	18
38,638	Net Operating Revenue	35,886	29,897	20
10,940	Operating Profit ⁽¹⁾	12,010	8,779	37
(473)	Financial Result	(444)	(1,042)	(57)
8,142	Net Income for the Period	6,675	5,021	33

13,211	EBITDA	14,113	10,452
34	EBITDA Margin (%)	39	35

The increase in consolidated operating income for the 1Q-2006 was primarily a result of the increase in prices and volumes sold in the domestic and international markets, the increase in production of oil and NGL s in Brazil (14%), and the production and higher quality of oil products. These factors, as well as others, are detailed below:

- Gross profit increased R\$ 2,855 million:

Main Items	R\$ million		
	Changes		
	1Q-2006 X 1Q-2005		
	Net Revenues	Cost of Goods Sold	Gross Profit
. Domestic Market:			
- Effect of Volumes Sold	953	(592)	361
- Effect of Prices	2.765		2.765

. Increase (Decrease) in International Sales	409	(297)	112
. FX Effect on Controlled Companies' Revenues and Costs Abroad	(779)	502	(277)
. Others	336	(739)	(403)
	5.989	(3.134)	2.855

(*) Expenses Composition:	Value
- Oil, Gas and Oil Product Imports	(101)
- Third-Party Services	(137)
- Domestic Government Take	(523)
- Transportation: Maritime and Pipelines	52
- Salaries, Perquisites and Benefits	(39)
- Materials, Services and Depreciation	(82)
- Others	(30)
	(860)

Lower provision with contingencies related to legal procedures (R\$ 345 million).

Loss as a result of participation in investments of R\$627 million, primarily due to the appreciation of the *real* against the U.S. dollar (7.19%), that generated a foreign exchange currency loss on shareholder s equity of R\$ 433 million for companies located outside Brazil).

Positive effect from net financial gain of R\$ 598 million, influenced by the following:

A reduction in financial expenses from financings (R\$ 61 million);

Closing of *hedge* contracts from PESA invoices/sales, which in 1Q-2005 generated a loss of R\$ 148 million;

Net positive exchange variation (R\$ 183 million), from monetary assets and liabilities in U.S. dollars, which devalued 7.2% in the 1Q-2006 (0.4% appreciation in 1Q-2005).

Exploration and Production Thousand Barrels/Day

Domestic production per day of oil and NGLs increased 14% in 1Q-2006 compared to 1Q-2005, mainly due to production start-up at the P-43 platform (Barracuda) in the second half of December 2004, and P-48 (Caratinga) on February 28, 2005. Stable production at full capacity from these platforms was only achieved during the second quarter of 2005.

Domestic production of oil and NGLs in 1Q-2006 was kept relatively steady with an increase of 1% over the production levels for 4Q-2005.

International oil production declined 6% in 1Q-2006 compared with 1Q-2005 due to the natural decline in production in Angola and the temporary interruption in production from the main fields in the United States after hurricanes Rita and Katrina.

International oil production in 1Q-2006 was relatively stable, with a 1% increase when compared to 4Q-2005. Gas production increased 9% due to increased demand in Brazil and Argentina for Bolivian gas, following a strike in Argentina that reduced production in 4Q-2005.

Refining, Transportation, and Supply Thousand Barrels/Day

Feedstock processed by domestic refineries increased 4% in comparison to 1Q-2005, due to improved reliability at the RLAM and RECAP refineries following maintenance work, and lower throughput of oil at REDUC in 1Q-2005.

Feedstock processed by overseas refineries in the 1Q-2006 declined 4% in relation to 1Q-2005, mainly due to the maintenance stoppage in refineries in Argentina and Bolivia in January and February 2006.

In the 1Q-2006, feedstock processed by overseas refineries declined 7% when compared to 4Q-2005, primarily because of programmed stoppages for maintenance in Argentine and Bolivian refineries during the first two months of the quarter.

Costs

Lifting Cost (US\$/barrel)

1Q-2006 lifting costs in Brazil, excluding government take increased 6% compared to 1Q-2005. After discounting the effects of a 19% appreciation of the *real* against the U.S. dollar, which caused the local currency component of lifting costs to increase when expressed in US\$ s, the lifting costs declined 11% in comparison with 1Q-2005. The decline was mainly due to increased production of oil and gas, primarily at the Barracuda and Caratinga fields.

Excluding government take, lifting costs in Brazil in 1Q-2006 increased 4% in relation to 4Q-2005. After discounting the effects of a 3% appreciation of the Brazilian *real* against the U.S. dollar, lifting costs increased 1% in comparison with 4Q-2005.

Lifting costs including government take, increased 27% over 1Q-2005 due to the increase in the average reference price used to calculate government take for domestic oil, as a result of the increase in international oil prices.

Including government take, lifting costs in 1Q-2006 increased 8%, as compared to 4Q-2005, due to the higher reference price levels for domestic oil, as a result of higher international prices.

The international lifting cost increased 18% compared with 1Q-2005 due to greater third party expenses and materials for the Argentina operations, and materials consumption for maintenance in Colombia.

In 1Q-2006, international lifting cost declined 16% in relation to 4Q-2005 due to lower equipment maintenance costs for the Colombia operations and personnel in the Argentina operations.

Refining Cost (US\$/Barrel)

Domestic unit refining costs for 1Q-2006 increased 9% when compared to 1Q-2005. Discounting the effects of a 19% appreciation of the Brazilian *real*, which caused the local currency component of refining costs to increase when expressed in US\$ s, refining costs declined 9%, primarily due to a greater number of scheduled stoppages in the prior period.

In comparison with 4Q-2005, domestic unit refining costs for 1Q-2006 declined 6% due to a greater number of scheduled maintenance shutdowns in the prior quarter. Discounting the effects of a 3% average appreciation rate for the Brazilian *real*, the unit refining cost declined 8%.

For 1Q-2006, international average refining costs increased 39% in relation to 1Q-2005 due to greater material costs, equipment maintenance, and personnel in refineries in Bolivia and Argentina.

Compared to 4Q-2005, international average refining costs increased 16% due to greater third party expenses and materials in Argentina operations.

Corporate Overhead Parent Company (US\$ million)

Compared to 1Q-2005, corporate overhead for 1Q-2006 increased 36% due to higher expenses linked to contractual agreements, consulting, publicity and advertising. Increased personnel expenses in relation to salary readjustments and the increased workforce. Discounting the effects of the 19% appreciation of the Brazilian *real*, with all of the expenses for these activities in *reais*, corporate overhead increased 15% compared to 1Q-2005.

Compared to 4Q-2005, corporate overhead for 1Q-2006 declined 13% primarily due to fewer contracted sponsorships, safety health & environment and data-processing expenses. Discounting the effects of a 3% appreciation of the Brazilian *real*, over the totality of expenses in *reais*, there was a 16% reduction.

Sales Volume Thousand Barrels/day

Total domestic sales volume increased 4% in 1Q-2006 in relation to 1Q-2005. Of particular note was:

- i) Increased sales of gasoline (4%), due to a 5% reduction in the mix of pure alcohol with gasoline, as well as the reduced use of alcohol in non-traditional practices and in flex-fuel vehicles, in light of elevated prices for this product;
- ii) Increased sales of diesel oil (4%) resulting from a lower base of industrial and agricultural activity in 1Q-2005, as well as the recovery of public investment in road works; and
- iii) Higher sales natural gas (9%), resulting from greater industrial consumption and an increase in the number of vehicle converted to consume natural gas.

In the international market, sales revenue increased 28% as a result of increased exports of domestic oil production that could not be refined in Brazil.

(1) Financial statements by business area and their respective comments are presented starting on page 23.

(2) In the international business unit, the ability to make comparisons between the periods is influenced by changes in the exchange rate, since all international operations are executed in dollars or in other currencies of those countries where each firm is headquartered. As such there may be significant variations when converting financial results into reais, mainly arising from and reflecting changes in the exchange rate.

(3) In order to align the financial statement of each business segment with the best practices of companies in the Oil & Gas sector and to improve the understanding of Petrobras management, the Company will now allocate all financial results and items of a financial nature to the corporate level. As a result of this change in methodology, the income tax, employee profit sharing and minority interest line items have been adjusted accordingly.

To facilitate comparisons, we have presented segmented financial statements for prior periods in accordance with the new criteria.

Results by Business Area

PETROBRAS is a company that operates in an integrated manner, with the greatest part of oil and gas production in the Exploration & Production area being transferred to other areas of the Company.

The main criteria used to report results by business area are highlighted below:

- a) Net operating revenues: the revenues related to sales made to external clients were considered, plus the billing and transfers between business areas, using the internal transfer prices defined between the areas as a reference, with methodology based on market parameters.
- b) Included in the computation of operating income are: net operating revenues, the costs of goods and services sold, which are reported by each business areas considering the internal transfer price and the other operating costs of each area, as well as operating expenses in which the expenses effectively incurred in each area are considered.
- c) Financial results are allocated to the corporate group.
- d) Assets: includes the assets identified in each area.

E&P In 1Q-2006, operating profits for the Exploration and Production unit were R\$ 6,774 million, 53% higher than the operating income reported in the same period of last year (R\$ 4,396 million), due to the R\$ 3,128 million increase in gross profits from oil sales and transfers, reflecting the 14% increase in daily production of oil and NGL, and the 2% rise in natural gas production, as well as the increase in international oil price and the higher value of heavy oil in comparison to lighter oil. Operating income increased despite the 18% appreciation in the average exchange rate of the *real* against the U.S. dollar.

The spread between the average price of sold/transferred domestic oil and the average Brent price declined from US\$10.02/bbl in the 1Q-2005 to US\$8.07/bbl in the 1Q-2006.

In comparison with the previous quarter, operating income was 26% higher, due to the R\$1,728 million increase in gross profit, reflecting the increase in international oil prices, the 1% increase in oil and NGL production, and a higher value of heavy oil compared to lighter oil. Operating income increased despite the 3% appreciation in the average exchange rate of the *real* against the U.S. dollar.

The spread between the average price of oil sold/transferred and the average Brent price declined from US\$10.84/bbl in the 4Q-2005 to US\$8.07/bbl in 1Q-2006.

Also contributing to the increase in operating profit was the R\$1,010 million reduction in expenses for prospecting and drilling due to the impairment of dry wells and/or sub-commercial, aside from the updated of provisions for abandonment of the area, recognized in 4Q-2005.

SUPPLY In 1Q-2006, net income for the Supply segment was R\$ 2,000 million, a 25% increase in net income compared to the same period last year (R\$ 1,604 million), reflecting the increase of R\$ 345 million in gross profit, as highlighted by the following factors:

- An increase in average value of oil by- products sold in the domestic and international markets;
- An increase of 2% in domestic oil processed by refineries;

- An increase of 6% in the production of oil products, due to an improvement in the refineries configuration following upgrades ;
- A reduction in refining costs in *reais*

Another factor that contributed for the increase of the net income was the Lower provision with contingencies related to legal procedures (R\$ 278 million).

These effects were partially offset by an increase in the purchase and transfer price for oil and oil products, pressured by the increase in international prices and by the higher value of heavy oil compared with lighter oil. These gains occurred despite the 18% appreciation in the average exchange rate of the *real* against the U.S. dollar.

In 1Q-2006, net income accounted for by the Supply segment was R\$ 2,000 million, 51% higher than net income reported in the previous quarter (R\$ 1,326 million), due to the R\$ 753 million increase in gross profit, impacted by the following factors:

- Increased inventories from lower costs in the prior period;
- Increase in the average price of oil products sold in the international market.

These effects were partially offset by the following factors:

- A reduction of 3% in the sales volume of oil products in the domestic market;
- An increase of 19% in oil and oil product imports;
- An increase in the international price for oil;
- Higher value of heavy oil versus lighter.

GAS AND ENERGY In 1Q-2006, the Gas and Energy segment reported a loss of R\$ 78 million, similar to the results of the same period of last year (R\$ 71 million). The loss occurred despite the improvement of operating income, from R\$ 35 million in 1Q-2005 to R\$ 50 million in 1Q-2006, as a result of an 8% increase in volume of natural gas sold, only partially offset by an increase in the acquisition cost of imported gas. Greater minority shareholder interest was responsible for reducing the positive effect of higher operating income.

In 1Q-2006, the Gas and Energy segment reported a loss of R\$ 78 million, compared with a loss of R\$ 80 million in the prior quarter, due to the R\$ 339 million increase in operating income, following the extraordinary expenses registered in 4Q-2005, because of write-offs associated with contingent obligations under thermoelectric contacts and with the ballast re-composition of the thermoelectric plant in the Northeast.

The higher operating income was partially offset by an increase of R\$ 233 million in minority shareholder expenses.

DISTRIBUTION In 1Q-2006, the distribution area reported a net profit of R\$163 million, 16% less than the net profit for the same period of the prior year (R\$ 194 million), as a result of a R\$ 45 million increase in selling, general and administrative expenses, due to an increase in expenses related to commercialization and product distribution.

These effects were partially offset by a R\$13 million improvement in gross profit, primarily resulting from an increase in the average price of oil products, despite a decline in market share.

Participation in the distribution market for fuels in 1Q-2006 was 32.7% (528 thousand bpd), whereas in the same period last year it was 34.1% (529 thousand bpd).

In relation to the prior quarter, net income in 1Q-2006 was 21% lower, due to a R\$ 47 million reduction in gross revenue, reflecting the 8% decrease in oil product sales volumes as a consequence of the lower market share.

Participation in the fuels market was 32.7% in 1Q-2006 (528 thousand bpd) and was 33.8% in 4Q-2005 (561 thousand bpd).

- **INTERNATIONAL** -- In 1Q-2006, the International business area reported a net income of R\$ 236 million, 56% lower than the net income of R\$ 534 million reported in the same period of the prior year.

This decrease in net income was primarily due to the following:

- A decrease of R\$ 119 million in gross profit for as a result of the following reasons: i) a 19% appreciation of the *real* against the U.S. dollar used in the currency conversion process for the financial statements; ii) an increase in production costs in Bolivia due to an increase in the tax rate for hydrocarbons from 18% to 50% as of May 2005; and iii) production interruptions in the main U.S. fields caused by drainage and run-off following hurricanes Rita and Katrina. These reductions were partially offset by an increase in the international price of oil and by the increase in the volumes of Bolivian gas sold to Brazil and Argentina;
- An increase of R\$ 146 million in costs related to exploration and drilling as a result of a rise in exploration costs in the US and Bolivia, considering the decrease in dry wells and the ending of the concession period, respectively.

In relation to the prior quarter, net income declined by R\$ 169 million (42%), due partially to the effect of a 7% appreciation of the *real* against the U.S. dollar for the currency conversion of the financial statements in 1Q-2006, versus a depreciation of 5% in 4Q-2005.

CORPORATE The corporate activities of the PETROBRAS System loss R\$ 1,862 million in 1Q- 2006, 33% higher than the loss reported in the same period of the last year (R\$ 1,398 million), because of the increase of R\$ 526 million in minority interest expense caused by improved financial results reported from companies where Petrobras or its subsidiaries do not have a 100% stake.

In relation to the previous quarter, the loss reported by the corporate group was R\$ 175 million, versus a reported loss in 1Q-2006 of R\$ 1,862 million. The main reasons for the loss increase are as follows:

- A loss of R\$ 457 million in the currency conversion for equity investments abroad in the 1Q-2006, due to the 7% appreciation of *real* against the U.S. Dollar. In the 4Q-2005 there was a gain of R\$ 285 million, due to the devaluation of 5% at the final *real* against the U.S. Dollar.
- Reduction in income before income tax of R\$ 743 million, due to the fiscal benefit obtained in the 4Q-2005 as a consequence of the provisioning of Interest on Shareholding Equity in the amount of R\$ 3.290 million.

Consolidated Debt

	R\$ Million

Capital Structure			
(Third Parties Net / Total Liabilities Net)	48%	52%	(4)

(1) Includes debt contracted through leasing contracts of R\$ 2.974 million on March 30, 2005, and R\$ 3.300 million on December 31, 2005.

(2) Total debt - cash and cash equivalents

(3) Total liabilities net of cash/cash equivalents.

Net debt of the consolidated PETROBRAS group on 03.31.2005, was R\$ 21,516 million, a 13% reduction from December 31, 2005, mainly due to the appreciation of the *real* compared to the U.S. Dollar (most of Petrobras debt is denominated in U.S. Dollars) and debt amortization. We also note the improvement in the indebtedness level, measured by Net Debt/EBITDA, which fell from 0.52 as of 12.31.2005 to 0.38 as of 03.31.2006. The portion of the capital structure represented by third parties was 48% as of 03.31.2006, representing a reduction of 4 percentage points from December 31, 2005.

In line with its strategic objectives, PETROBRAS acts in joint ventures with other companies as a concessionaire of oil and natural gas exploration, development and production rights. The Company currently has partnerships in 157 blocks through 88 joint ventures. Total investment projected for these partnerships is US\$ 9,634 million.

In fulfillment of the goals outlined in its strategic plan, PETROBRAS continues to prioritize investments in developing its oil and natural gas production capabilities through its own investments and the structuring of undertakings with partners. In 1Q-2006, total investments were R\$ 5,914 million, which is a 12% increase over the amount invested in the same period of 2005.

- (1) In order to align the financial statement of each business segment with the best practices of companies in the Oil & Gas sector and to improve the understanding of Petrobras management, the Company switched to allocating all financial results and items of financial nature to the corporate level. As a result of this change, the income tax, employee profit share and minority interest line items were adjusted.

SETTLING OF ACCOUNTS WITH THE FEDERAL GOVERNMENT

In accordance with Law Number 10,742 of October 6, 2003, account reconciliation with the government should have occurred by June 30, 2004. PETROBRAS, after having furnished all the information required by the National Treasury Secretary - STN, is in discussion with the Ministry of Mines and Energy - MME, seeking to resolve the disparities that still exist between the parties in an effort to conclude the offset of accounts with the government, in accordance with Provisionary Measure Number 2,181-45, dated August 24, 2001.

The amount of the account may be paid through the issuance of National Treasury bonds in a value equal to the final amount of the account rectification or with other amounts that PETROBRAS may owe to the federal government, including tax amounts or a combination of the aforementioned options.

1,021	Economic Contribution - Foreign	843	1,007	(16)
12,853	Total	12,983	11,539	13

(1) CIDE CONTRIBUIÇÃO DE INTERVENÇÃO DO DOMÍNIO ECONÔMICO.

4. Payments to Governments

		R\$ million		
		First Quarter		
4Q-2005		2006	2005	Δ%
	Country			
1,712	<i>Royalties</i>	1,758	1,305	35
2,003	Special Participation	2,000	1,582	26
58	Surface Rental Fees	24	19	26
3,773	Subtotal	3,782	2,906	30
249	Foreign	216	134	61
4,022	Total	3,998	3,040	32

The government take in the country increased 32% in 1Q-2006 over the same period of 2005, reflecting the 46% increase in the reference price for domestic oil, which reached the average price of US\$ 50.93 (US\$ 34.95 in 1Q-2005, as well as an increase in the produced volumes and Special Participation of the Barracuda and Caratinga fields.

5. Consolidated Reconciliation of Shareholders' Equity and Net Income

	R\$ Million	
	Shareholders' Equity	Result
. According to PETROBRAS information as of March 31, 2006	88,113	6,914
. Profit in the sales of products in affiliated inventories	(555)	(555)
. Reversal of profits on inventory in previous years	-	489
. Capitalized interest	(572)	(14)
. Absorption of negative net worth in affiliated companies (*)	(225)	27
. Other eliminations	(574)	(186)
. According to consolidated information as of March 31, 2006	86,187	6,675

* In accordance with CVM Instruction Number 247/96, the losses that are considered to be of a non-permanent type (temporary) on investments evaluated by the equity in results of non-consolidated companies method, whose invested company does not show signs of paralysis or need for financial help from the investor company, should be limited to the value of the controlling company's investment. Therefore, the losses occasioned by unfunded liabilities (negative net shareholder's equity) of controlled companies did not affect the results and the net shareholder's equity of PETROBRAS in 2005, generating a conciliatory item between the Financial Statements of PETROBRAS and the Consolidated Financial Statements.

6. Performance of PETROBRAS shares and ADRs

	Nominal Change	
	First Quarter	
	2006	2005
4Q-2005		
2.61% Petrobras ON	12.83%	10.33%
4.38% Petrobras PN	15.94%	6.18%
-0.31% ADR- Level III - ON	21.61%	11.06%
0.97% ADR- Level III - PN	24.05%	6.24%

1.41% DOW JONES	3.66%	-2.59%
2.49% NASDAQ	6.10%	-8.10%

Book value of a PETROBRAS share on March 31, 2006 reached R\$ 20.09.

7. Dividends and Interest Paid on Capital

Dividends in the amount of R\$7,017.8 million were proposed and paid for the year 2005. On a per share basis, the dividend represents R\$ 1.60 per each ordinary or preferred share. Total dividends were declared and paid on three separate occasions:

1) Interest on Capital of R\$2,193.1 million, or R\$ 0.50 per each ordinary or preferred share (equivalent to R\$2.00 per share prior to the stock split that occurred in September 2005) was approved by the Board of Directors on June 17,

2005 and paid to shareholders on January 05, 2006 to holders of record on June 30, 2005. This amount was adjusted for inflation as of December 31, 2005, in accordance with the SELIC (Special System for Settlement and Custody) rate.

2) Dividends in the amount of R\$ 2,193 million, or R\$0.50 per each ordinary or preferred share were approved by the Board of Directors on December 16, 2005 and paid on March 22, 2006 to shareholders of record on December 31, 2005.

3) Dividends in the amount of \$1,096.5 million, or R\$ 0.25 per each ordinary and preferred share were approved at the General Ordinary Meeting on April 03, 2006 and payable on April 3, 2006 to shareholders of record on April 3, 2006. Additionally Interest on Capital in the amount of R\$ 1,535 million, or R\$0.35 per each ordinary and preferred share, was approved by the General Ordinary Meeting on April 03, 2006 and will be distributed as dividends, payable on April 03, 2006 and based on share holdings at April 03, 2006. The Interest on Capital is subject to withholding at a 15% rate, except for shareholders that are exempt; in accordance with the Law number 9.249/95.

8. Change in Accounting Policy

In the preparation of the earnings statements of the first quarter of 2006, there were no changes in the accounting procedures followed by the Company, in relation to those followed in the prior period, with the exception of those adopted for the scheduled maintenance shut-downs for industrial units and ships.

Until December 2005, the Company followed an accounting policy whereby each month a maintenance provision was registered for industrial units and ships for the prior period by estimating expenses for the programmed shut-down.

Beginning in January 2006, in accordance with Deliberation CVM No. 489/2005 and to Technical Interpretation No. 1/2006 of IBRACON, the Company reversed the reserve balance for programmed shut-downs and adopted the practice of registering the amounts related to the maintenance of industrial units and boats in Property, Plant & Equipment, which includes spare parts, assembly and disassembly services, amongst others.

Such shut-downs occur during scheduled periods, which vary from one to four years and the respective costs are depreciated as a cost of production until the initiation of the next shutdown.

Regarding the change in accounting policy, the reversal of amounts provisioned through of December 31, 2005 for depreciation of a portion of the relevant maintenance costs, capitalization of expenses incurred and accumulated depreciation on these expenses, through December 31, 2005, was made directly to the retained earnings, net of taxes, as a prior period adjustment in the amount of R\$ 529 million.

9. Currency Exposure

Currency exposure of the PETROBRAS System is measured as per the following table:

Assets	R\$ million	
	03.31.2006	12.31.2005

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
