### **Same store sales up 14.3% in March and 8.5% on 1Q08**

**São Paulo, Brazil, April 15, 2008. Grupo Pão de Açúcar [NYSE: CBD; BOVESPA: PCAR4 (PN)]** has announced its sales performance for March 2008 (preliminary, unaudited results). The information presented below was calculated based on the consolidated figures in Brazilian Reais according to the Corporate Legislation.

Gross sales totaled R\$ 1,832.5 million in March 2008 and net sales totaled R\$ 1,558.7 million, up 26.6% and 27.2%, respectively. Note that March sales were positively affected by the calendar effect because of Easter. Last year, the Easter effect had also impacted sales, although this effect was distributed between the months of March and April.

Among the Group's formats, Extra Hipermercado registered sales growth above the average of the Group, driven by the good performance of non-food and food categories. Same store growth at Sendas Distribuidora was very close to the Group's average, reflecting good Easter sales performance and confirming the positive trend recorded in the recent months.

In the same store concept, monthly sales grew by 14.3% in gross terms and by 14.8% in net terms. We believe that the positive calendar effect is responsible for between 70 and 80 basis points of total sales growth. Note that this growth took place even when compared with the 7.6% rise reported in March of last year.

Food products posted good performance (Easter sales) in the same store concept, up 14.4%. Non-food products sales are still being fueled by the electronic and general merchandise sub-categories, following the trend from the first months of 2008, and hitting double digit growth (13.7%).

### **1Q08 Performance**

Company's gross sales grew by 19.7% in the quarter, reaching R\$ 4,991.0 million in the period. Net sales totaled R\$ 4,244.2 million, a 20.2% increase compared with the same period of 2007.

In the same store concept, gross sales grew by 8.5% in the quarter, while net sales climbed 8.9%, with food products up 7.6% and non-food products up 11.4%.

Among the formats, Pão de Açúcar, Comprebem and Sendas supermarkets were the highlights for the period. Extra Eletro also posted good sales performance, driven by the electronic sub-category (Mundo Entretenimento).

Note: "Same store" sales include stores In operation for at least 12 months. As of November 2007 the "total sales" concept includes by the Assai stores.

The representations contained in this communiqué in connection with the Company's business outlook, projections, and operating and financial results, and with regard to the Company's growth potential, are composed of mere estimates and were based on Management expectations concerning the Company's future. These expectations are highly dependent on market changes, on the Brazilian economy's performance in general, on business and on international markets, and therefore they are subject to change.
