June/08 Gross Sales grow 18.7%

São Paulo, Brazil, July 10, 2008. Grupo Pão de Açúcar [NYSE: CBD; BOVESPA: PCAR4 (PN)] announces its June 2008 sales performance (unaudited preliminary figures). The information presented below was calculated based on consolidated figures and in Reais, in accordance with Brazilian Corporate Law.

In June, the Company registered gross sales of R\$ 1,591.9 million and net sales of R\$ 1,387.7 million, up 18.7% and 22.6% year on year, respectively.

Under the same-store concept and on a year-on-year basis, gross sales grew by 6.4% while net sales grew by 9.8% . Note that the calendar effect (one less Friday and Saturday and the Corpus Christi holiday occurring in May) had a negative impact on June sales performance of approximately 200 basis points. Same-store sales of non-food products grew by 11.7%, once again driven by sales of consumer electronics (Mundo Entretenimento) and general merchandise (Mundo Casa). Food items registered 4.7% same-store sales growth in the month. The calendar effect on food products was around 240 basis points.

Note that the behavior of the Company's food prices is following the trend in the IPCA General Index, since its product mix is different from the mix of products that make up the IPCA Food Inflation index. If we consider the same mix of products that make up the IPCA Food Inflation Index in the Company, the variation in the prices is the same as the variation in the IPCA Food Inflation Index in the past 12 months.

Despite the rising inflation and interest rates, the Company has not observed significant changes in the consumption levels of its consumers.

In 2Q08, gross sales totaled R\$ 4,888.3 million, up 16.2%, while net sales were R\$ 4,239.6 million, 19.5% higher year on year. Under the same-store concept and on a year-on-year basis, gross sales in the quarter rose by 4.3% while net sales moved up 7.3% . This performance in the quarter was impacted by the calendar effect, with Easter occurring in the first quarter this year, but in the second quarter in 2007.

Data published recently by the competition shows a gain in market share by the Extra banner, whose growth rate outperformed the competition's rates in the quarter. Another highlight was the performance of Extra.com.br, which continues to post 3-digit growth rates, well above the period's estimate.

Same-store sales of non-food products in the quarter grew by 10.4% year on year, driven by the consumer electronics (Mundo Entretenimento) and general merchandise (Mundo Casa) subcategories. Meanwhile, same-store sales of food products grew by 2.4% year on year.

Note: Same-store sales figures include only those stores with at least 12 months of operations.

Since November 2007, the "total stores" concept has included Assai's sales.

Statements included in this report regarding the Company's business prospects, the outlook for operating and financial results, and referring to the Company's growth potential are merely projections and were based on Management's expectations regarding the Company's future. These projections are highly dependent on market changes and the performance of Brazil's economy, the industry and the international markets and are, therefore, subject to change.
