- **The proportional net financial result** was negative by R\$780 million, due to: i) financial expenses (excluding the exchange variation) of R\$857 million; ii) the negative exchange variation result of R\$74 million; and (iii) financial revenue of R\$151 million.

# **3Q16 EARNINGS RELEASE**

<sup>1</sup> The adjusted EBITDA margin is calculated as the ratio between Adjusted EBITDA and Adjusted Net Income, which considers stakes of 60% in Namisa, 33.27% in MRS and 50% in CBSI until November 2015 and stakes of 100% in Congonhas Minérios, 37.27% in MRS and 50% in CBSI as of December 2015.

## **Debt**

The adjusted amounts of EBITDA, Debt and Cash included the stakes of 60% in Namisa, 33.27% in MRS and 50% in CBSI until November 2015 and the stakes of 100% in Congonhas Minérios, 37.27% in MRS and 50% in CBSI, as of December 2015, as well as financial investments used as collateral for exchange operations on the BM&FBovespa. On June 30, 2016, consolidated net debt totaled R\$25,842 million, while the net debt/EBITDA ratio stood at 7.36x, based on LTM adjusted EBITDA.

## **Foreign Exchange Exposure**

The FX exposure of our consolidated balance sheet on September 30, 2016 was US\$1,826 million, as shown in the table below. It is important to mention that the net FX exposure includes a liability totaling US\$1.0 billion in the Loans and Financing line related to the Perpetual Bonds, which, due to its nature, will not require disbursements for the settlement of the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates projected export inflows in dollars with part of the scheduled debt payments in the same currency. Therefore, the exchange variation of the dollar-denominated debt is temporarily booked under shareholders' equity, being recorded in P&L when revenues in USD from exports are received.

- Investments in the new clinker kiln in Arcos-MG, allowing the cement segment to generate competitive margins and scale gains in the Southeast region due to self-sufficiency in clinker production.

Of this total, R\$102 million went to spare parts and R\$234 million to current investments.

<b>Total Rolled Products</b>	<b>989</b>	<b>668</b>	<b>835</b>	<b>25%</b>	<b>(16%)</b>

- **Total steel product sales** came to 1,172,000 tonnes in 3Q16, 6% down on 2Q16. Of this total, 62% went to the domestic market, 34% were sold by our subsidiaries abroad and 4% went to exports.

- Third-quarter **domestic steel sales** totaled 730,000 tonnes 9% up on 2Q16, 682,000 tonnes of which flat steel and 49,000 tonnes long steel.

- Third-quarter **foreign sales** amounted to 441,000 tonnes, 24% down on 2Q16. Of this total, the oversea subsidiaries sold 398,000 tonnes, 159,000 of which by LLC, 159,000 by SWT and 80,000 by Lusosider,

while direct exports came to 44,000 tonnes.

- In 3Q16, CSN maintained its high **share of coated products** as a percentage of total sales volume, in line with its strategy of adding more value to the product mix. Total sales of coated products such as galvanized items and tin plate accounted for 59% of flat steel sales, in line with 2Q16, considering all the markets in which the Company operates. In the **foreign market**, the share of coated products moved up from 85% to 88% in 3Q16.

- **Net revenue** totaled R\$2,867 million in 3Q16, in line with the previous three months, despite the decline in total sales volume, primarily due to the upturn in domestic sales volume and higher prices this quarter. Net average revenue per tonne stood at R\$2,382, 7% higher than 2Q16.

- **COGS** came to R\$2,300 million in 3Q16, 6% less than in 2Q16, primarily due to the decrease in foreign market sales.

- The parent company's **production cost** reached R\$1,446 million in 3Q16, 33% up on 2Q16, mainly due to increased output of slabs and rolled products, which moved up by 48% and 25%, respectively.

## 3Q16 EARNINGS RELEASE

- The **slab production cost** came to R\$1,114/t, 13% down on 2Q16. In the same period, the cost in U.S. dollars fell by 7% to US\$319/t.
- **Adjusted EBITDA** amounted to R\$552 million in 3Q16, 49% up on the R\$369 million recorded in 2Q16, accompanied by a 6p.p. increase in the adjusted EBITDA margin from 13% to 19%.

### Mining

In 3Q16, the seaborne iron ore market continued to be influenced by the healthy fundamentals of the Chinese steel segment. The policies to stimulate the economy introduced at the beginning of the year continued to fuel the real estate market and investments in infrastructure, which are the main drivers of the country's steel consumption. At the same time, the decommissioning of obsolete blast furnaces reduced the supply base, increasing the pricing power of the remaining plants. As a result, prices and margins remained healthy, encouraging steel production and the use of iron ore. Given this scenario, the commodity's price averaged US\$58.60/dmt (Platts, Fe62%, N. China) in 3Q16, 5.4% up on the previous quarter.

Maritime freight costs on Route CI-C3 (Tubarão-Qingdao) averaged US\$10.02/t in 3Q16, 18.9% up on 2Q16. The combination of scrapped ships and increased seaborne volume of iron ore and coal resulted in higher fleet utilization and more chartering of capsize vessels. The route price was also influenced by the upturn in oil prices.

Results from CSN's Mining Operations

- In 3Q16, **iron ore production** totaled 8.6 million tonnes, in line with 2Q16.
- Third-quarter **iron ore purchases** came to 797,000 tonnes, 42% down on 2Q16.
- **Iron ore sales** came to 10.2 million tonnes in 3Q16, 10% up on 2Q16. Shipped iron ore volume totaled 8.7 million tonnes, 5% down on 2Q16. During 3Q16, 1.1 million tonnes from Congonhas Minérios were sold to CSN's Presidente Vargas Plant.

- Mining segment **COGS** came to R\$811 million in 3Q16, 9% up on 2Q16, due to the higher volume of iron ore sold in the quarter. In 3Q16, Congonhas Minérios recorded a Chinese delivery cost excluding depreciation of US\$32.4/wmt, 15% increase on the previous quarter, mainly due to higher seaborne freight charges, which register an average of US\$12.88/t during 3Q16, against US\$10,86 during 2Q16.
- **Adjusted EBITDA** stood at R\$599 million in 3Q16, 64% up on 2Q16, with an adjusted EBITDA margin of 46%, 10p.p. more than in 2Q16, chiefly due to the increase in FOB export prices and higher total sales volume.

## Restatement of the Financial Statements of December 31, 2015

The Company is voluntarily restating its consolidated financial statements for the fiscal year ended December 31, 2015 due to a change in the interpretation of the application of the Technical Pronouncement CPC 15/ IFRS 3 in the period after the publication of these financial statements, as required by the accounting pronouncement CPC23/IAS8.

The change in the interpretation of the CPC/IFRS was identified by reassessing the events triggered by the inquiries made by the *Securities Exchange Commission* (SEC) on the accounting procedure for the presentation of the non-controlling interests of the subsidiary Congonhas Minérios in the Company's consolidated financial statements.

As mentioned in Note 3, on November 30, 2015, Congonhas Minérios acquired the control of the joint venture Nacional Minérios ("Namisa") and applied the CPC 15/IFRS3 for the accounting of the business combination, using the acquisition method.

The legal implementation of the transaction took place on November 30, 2015 and was carried out through the primary issuance of shares by Congonhas Minérios with the payment, by the Consórcio Asiático, of 40% of its shares held in Namisa. Act subsequent to the payment, Congonhas and CSN signed a Shareholders' Agreement of Namisa granting the majority control of Namisa to Congonhas on the same date. On December 31, 2015, Namisa was merged into Congonhas, extinguishing the said Shareholders' Agreement.

The application of the acquisition method for the business combination resulted in net gains of R\$2.9 billion in the statement of income of Congonhas coming from the remeasurement to

fair value of the 60% interest in Namisa and from the elimination of the pre-existing relationships related to the operating agreements between Namisa and Congonhas. These gains were fully recorded in Congonhas, the acquirer for the purposes of this business combination. On the other hand, to implement the operation, CSN had recorded in its financial statements previously filed a gain of R\$1.9 billion directly in its net equity from the change in its equity interest in Congonhas, which is being adjusted to a gain of R\$1.6 billion. These amounts are detailed in Note 3.

The interpretative aspect of the CPC/IFRS application in this operation stems from the moment the gains are recorded and how these gains are allocated between the shareholders of Congonhas at the acquisition date. In the previous accounting procedure, even with the entire transaction being carried out on a single date, the corporate actions complied with a specific order in which the Company based its interpretation for the allocation of the gains to controlling and non-controlling shareholders. Within this context, Congonhas would have admitted the Consórcio Asiático in its shareholder base before the acquisition of control of Namisa, the reason why the gains with the business combination were allocated to the shareholders considering their respective equity interests in the capital of Congonhas, i.e., 87.52% to CSN and 12.48% to the Consórcio Asiático. Pursuant to the new interpretation of the events that took place on November 30, 2015, the gains from the business combination were recorded in Congonhas before the admission of the Consórcio Asiático in Congonhas' shareholder base and, for this reason, these gains are being exclusively allocated to the shareholder CSN.

The following table summarizes the change of the approach:
