LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

A challenging year has passed, and we have entered an opportunity filled 2010. The worldwide semiconductor industry grew above expectations in the first half of 2010 with sales increasing more than 50% year-on-year. SMIC was able to ride on this opportunity and increased its revenue for the first half of 2010 to more than 77% compared to the same period last year. The Company's gross margin has turned positive since the fourth quarter of 2009 and maintained double-digits with continued growth for two consecutive quarters. Utilization has climbed from 35% in the first quarter of 2009 to 94.3% in the second quarter of 2010. Also in the first half of 2010, the book-to-bill ratio was above 1.0 for six consecutive months.

Since our new management came on board they have implemented various initiatives, which produced positive results. We are gradually narrowing the technology gap on advanced nodes with industry leaders. Our 45 and 40 nanometer technology development is ahead of schedule and will be qualified by the end of this year and enter volume production next year. We are also working to speed up our 32 nanometer process development. Internally, we are strengthening our professionalism and accountability, and at the same time, we are simplifying internal processes, improving departmental operating efficiency. In the recent placing of new shares, we have successfully raised US\$100 million for our Beijing fab's advanced technology capacity expansion. We have also reorganized our sales force with an emphasis on key customers and those with high-potential. By strengthening existing key partnerships and selectively cultivating new customers and new products with high potential, we will improve our product mix and average selling price to achieve profitability. As Mainland China's most advanced semiconductor manufacturer, our 90-nanometer and below revenue contribution increased to 23.6% in the second quarter of this year, and total 65-nanometer shipments have already exceeded 10,000 wafers. Revenue from Mainland China contributed 28.7% to our total revenue in the second quarter of 2010, compared to 20.0% in 2009.

Since the beginning of this year, we have streamlined the organization to reduce costs and increase the efficiency and output of SMIC. Additionally, more than 100 key managers attended our first global management meeting. The meeting communicated the corporate message and strategies to bolster organizational effectiveness, employee cohesiveness, teamwork spirit and execution. The new management will continue to work together to build a solid foundation for leading SMIC to a successful future.

Looking back on the past six months, we have already taken solid steps to pave our way to sustainable profitability. We will continue to work step by step, to maximize the interests of our shareholders and customers.

Thank you again for your continuous support for SMIC.

FOREIGN EXCHANGE RATE FLUCTUATION RISK

The Company's revenues, expenses, and capital expenditure are primarily transacted in United States Dollars. However, since the Company has operations consisting of manufacturing, sales activities and capital purchasing conducted in currencies other than U.S. dollar, the Company is primarily exposed to changes in exchange rates for the EURO, Japanese Yen, and Chinese Renminbi.

To minimize these risks, the Company purchases foreign-currency forward exchange contracts with contract terms normally lasting less than twelve months to protect against the adverse effect that exchange rate fluctuations may have on foreign currency denominated activities. These forward exchange contracts are principally denominated in Chinese Renminbi, Japanese Yen or EURO and do not qualify for hedge accounting in accordance with ASC 815. As of June 30, 2010, the Company had outstanding foreign currency forward exchange contracts with a notional amount of US\$4.2 million all of which matured before April 2011. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.

As of June 30, 2010, the fair value of foreign currency forward exchange contracts was a loss of approximately US\$0.05 million. The Company does not enter into foreign currency exchange contracts for speculative purposes.

CROSS CURRENCY SWAP FLUCTUATION RISK

At June 30, 2010, the Company had a long-term loan facility agreement outstanding in the aggregate principal amount of EUR27.1 million. The company is primarily exposed to changes in exchange rate for the EURO.

To minimize the risk, the company entered into a cross currency swap contract with contract terms fully matching the repayment schedule of the long-term loan to protect against the adverse effect of exchange rate fluctuations arising from the foreign-currency denominated loan. The cross currency swap contract does not qualify for hedge accounting in accordance with ASC 815.

As of June 30, 2010, the Company had outstanding cross currency swap contracts with a notional amount of US\$15.7 million all of which will mature before May 2012. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.
