FIRST TRUST MORTGAGE INCOME FUND

Form N-Q

September 22, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM N-Q

QUARTERLY SCHEDULE OF PORTFOLIO HOLDINGS OF REGISTERED MANAGEMENT
INVESTMENT COMPANY

Investment Company Act file number 811-21727

First Trust Mortgage Income Fund

(Exact name of registrant as specified in charter)

120 East Liberty Drive, Suite 400
Wheaton, IL 60187

(Address of principal executive offices) (Zip code)

W. Scott Jardine, Esq.
First Trust Portfolios L.P.
120 East Liberty Drive, Suite 400
Wheaton, IL 60187

(Name and address of agent for service)

Registrant's telephone number, including area code: 630-765-8000

Date of fiscal year end: October 31

Date of reporting period: July 31, 2011

Form N-Q is to be used by management investment companies, other than small business investment companies registered on Form N-5 (ss.ss. 239.24 and 274.5 of this chapter), to file reports with the Commission, not later than 60 days after the close of the first and third fiscal quarters, pursuant to rule 30b1-5 under the Investment Company Act of 1940 (17 CFR 270.30b1-5). The Commission may use the information provided on Form N-Q in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-Q, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-Q unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to the Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. SCHEDULE OF INVESTMENTS. The Schedule of Investments is attached herewith.

FIRST TRUST MORTGAGE INCOME FUND
 PORTFOLIO OF INVESTMENTS (a) - (Continued)
 JULY 31, 2011 (UNAUDITED)

- (c) This security, sold within the terms of a private placement memorandum, is exempt from registration upon resale under Rule 144A under the Securities Act of 1933, as amended and may be resold in transactions exempt from registration, normally to qualified institutional buyers. The Fund does not have the right to demand that this security be registered. This security is valued according to the valuation procedures as stated in the Portfolio Valuation footnote (Note A in the Notes to Quarterly Portfolio of Investments) and is not expressed as a discount to the carrying value of a comparable unrestricted security. This security was acquired on September 9, 2009, has a current carrying cost of \$2,904,927, a carrying value per share of \$1.02 and represents 3.88% of net assets.
- (d) Inverse floating rate instrument. The interest rate shown reflects the rate in effect at July 31, 2011.
- (e) This security or a portion of this security is segregated as collateral for reverse repurchase agreements.
- (f) Aggregate cost for financial reporting purposes, which approximates the aggregate cost for federal income tax purposes. As of July 31, 2011, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$9,139,821 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$4,183,775.
- IO Interest-Only Security - Principal amount shown represents par value on which interest payments are based.

NOTES TO QUARTERLY PORTFOLIO OF INVESTMENTS

FIRST TRUST MORTGAGE INCOME FUND
 JULY 31, 2011 (UNAUDITED)

VALUATION AND INVESTMENT PRACTICES

A. PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of First Trust Mortgage Income Fund (the "Fund") is determined daily, as of the close of regular trading on the

Edgar Filing: FIRST TRUST MORTGAGE INCOME FUND - Form N-Q

New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. If the NYSE closes early on a valuation day, the NAV is determined as of that time. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The NAV per Common Share is calculated by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses, dividends declared but unpaid and any borrowings of the Fund), by the total number of Common Shares outstanding.

The Fund's investments are valued daily in accordance with valuation procedures adopted by the Fund's Board of Trustees, and in accordance with provisions of the Investment Company Act of 1940, as amended (the "1940 Act"). Securities for which market quotations are readily available are valued using the last reported sale price on the business day as of which such value is being determined. If no sales are reported on such business day (as in the case of some securities traded over-the-counter), the last reported bid price is used, except that certain U.S. Government securities are valued at the mean between the last reported bid and asked prices. Mortgage-backed securities ("MBS") and other debt securities not traded in an organized market are valued on the basis of valuations provided by dealers who make markets in such securities or by an independent pricing service approved by the Fund's Board of Trustees, which may use the following valuation inputs when available:

- 1) benchmark yields;
- 2) reported trades;
- 3) broker/dealer quotes;
- 4) issuer spreads;
- 5) benchmark securities;
- 6) bids and offers; and
- 7) reference data including market research publications.

Debt securities having a remaining maturity of sixty days or less when purchased are valued at cost adjusted for amortization of premiums and accretion of discounts.

In the event that market quotations are not readily available, the pricing service or dealer does not provide a valuation, or the valuations received are deemed unreliable, the Fund's Board of Trustees has designated First Trust Advisors L.P. ("First Trust") to use a fair value method to value the Fund's securities. Additionally, if events occur after the close of the principal markets for certain securities (e.g., domestic debt and foreign securities) that could materially affect the Fund's NAV, First Trust may use a fair value method to value the Fund's securities. The use of fair value pricing is governed by valuation procedures adopted by the Fund's Board of Trustees, and in accordance with the provisions of the 1940 Act. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. Fair valuation of a security is based on the consideration of all available information, including, but not limited to, the following:

- 1) the fundamental business data relating to the issuer;

Edgar Filing: FIRST TRUST MORTGAGE INCOME FUND - Form N-Q

- 2) an evaluation of the forces which influence the market in which these securities are purchased and sold;
- 3) the type, size and cost of a security;
- 4) the financial statements of the issuer;
- 5) the credit quality and cash flow of the issuer, based on the Sub-Advisor's or external analysis;
- 6) the information as to any transactions in or offers for the security;
- 7) the price and extent of public trading in similar securities (or equity securities) of the issuer/borrower, or comparable companies;
- 8) the coupon payments;
- 9) the quality, value and salability of collateral, if any, securing the security;
- 10) the business prospects of the issuer, including any ability to obtain money or resources from a parent or affiliate and an assessment of the issuer's management;
- 11) the prospects for the issuer's industry, and multiples (of earnings and/or cash flows) being paid for similar businesses in that industry; and
- 12) other relevant factors.

The Fund is subject to fair value accounting standards that define fair value, establish the framework for measuring fair value and provide a three-level hierarchy for fair valuation based upon the inputs to the valuation as of the measurement date. The three levels of the fair value hierarchy are as follows:

Page 6

NOTES TO QUARTERLY PORTFOLIO OF INVESTMENTS - (Continued)

FIRST TRUST MORTGAGE INCOME FUND JULY 31, 2011 (UNAUDITED)

- o Level 1 - Level 1 inputs are quoted prices in active markets for identical securities. An active market is a market in which transactions for the security occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- o Level 2 - Level 2 inputs are observable inputs, either directly or indirectly, and include the following:
 - o Quoted prices for similar securities in active markets.
 - o Quoted prices for identical or similar securities in markets that are non-active. A non-active market is a market where there are few transactions for the security, the prices are

Edgar Filing: FIRST TRUST MORTGAGE INCOME FUND - Form N-Q

not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.

- o Inputs other than quoted prices that are observable for the security (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates).
- o Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- o Level 3 - Level 3 inputs are unobservable inputs. Unobservable inputs may reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the security.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the inputs used to value the Fund's investments as of July 31, 2011, is included with the Fund's Portfolio of Investments.

B. SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis.

Securities purchased or sold on a when-issued, delayed-delivery or forward purchase commitment basis may have extended settlement periods. The value of the security so purchased is subject to market fluctuations during this period. The Fund maintains liquid assets with a current value at least equal to the amount of its when-issued, delayed-delivery or forward purchase commitments until payment is made. At July 31, 2011, the Fund had no when-issued, delayed-delivery or forward purchase commitments.

C. REVERSE REPURCHASE AGREEMENTS:

Reverse repurchase agreements are utilized as leverage for the Fund. A reverse repurchase agreement, although structured as a sale and repurchase obligation, acts as a financing under which Fund assets are pledged as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the reverse repurchase agreement, the loan will be repaid and the collateral will correspondingly be received back to the Fund. While used as collateral, the assets continue to pay principal and interest which are for the benefit of the Fund.

Information for the period ended July 31, 2011:

Maximum amount outstanding during the period.....	\$24,495,000
Average amount outstanding during the period*.....	\$17,855,505
Average monthly Common Shares outstanding during the period...	4,060,219
Average debt per Common Share outstanding during the period...	\$4.40

* The average amount outstanding during the period was calculated by adding the

Edgar Filing: FIRST TRUST MORTGAGE INCOME FUND - Form N-Q

borrowings at the end of each day and dividing the sum by the number of days in the period ended July 31, 2011.

During the period ended July 31, 2011, interest rates ranged from 0.08% to 0.38%, with a weighted average interest rate of 0.26%, on borrowings by the Fund under reverse repurchase agreements, which had interest expense that aggregated \$35,322.

D. INVERSE FLOATING-RATE SECURITIES:

An inverse floating-rate security is one where the coupon is inversely indexed to a short-term floating interest rate multiplied by a specific factor. As the floating rate rises, the coupon is reduced. Conversely, as the floating rate declines, the coupon is increased. The price of these securities may be more volatile than the price of a comparable fixed-rate security. These instruments are typically used to enhance the yield of the portfolio. These securities, if held in the Fund, are identified on the Portfolio of Investments.

NOTES TO QUARTERLY PORTFOLIO OF INVESTMENTS - (Continued)

FIRST TRUST MORTGAGE INCOME FUND JULY 31, 2011 (UNAUDITED)

E. STRIPPED MORTGAGE-BACKED SECURITIES:

Stripped Mortgage-Backed Securities are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities, each with a specified percentage of the underlying security's principal or interest payments. Mortgage securities may be partially stripped so that each investor class receives some interest and some principal. When securities are completely stripped, however, all of the interest is distributed to holders of one type of security known as an interest-only or IO security and all of the principal is distributed to holders of another type of security known as a principal-only or PO security. These securities, if held in the Fund, are identified on the Portfolio of Investments.

F. INTEREST-ONLY SECURITIES:

An interest-only security ("IO Security") is the interest-only portion of a MBS that receives some or all of the interest portion of the underlying MBS and little or no principal. A reference principal value called a notional value is used to calculate the amount of interest due to the IO Security. IO securities are sold at a deep discount to their notional principal amount. Generally speaking, when interest rates are falling and prepayment rates are increasing, the value of an IO Security will fall. Conversely, when interest rates are rising and prepayment rates are decreasing, generally the value of an IO Security will rise. These securities, if held in the Fund, are identified on the Portfolio of Investments.
