Form 10-Q
November 07, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number: 001-35039

BankUnited, Inc.
(Exact name of registrant as specified in its charter)
Delaware 27-0162450
(State or other jurisdiction (I.R.S. Employer
of incorporation or organization) Identification No.)

14817 Oak Lane, Miami Lakes, FL 33016
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (305) 569-2000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	November 4, 2016
Common Stock, \$0.01 Par Value	104,140,995

GLOSSARY OF DEFINED TERMS

The following acronyms and terms may be used throughout this Form 10-Q, including the consolidated financial statements and related notes.

ACI	Loans acquired with evidence of deterioration in credit quality since origination (Acquired Credit Impaired)
ALCO	Asset/Liability Committee
ALLL	Allowance for loan and lease losses
AOCI	Accumulated other comprehensive income
ARM	Adjustable rate mortgage
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
BKU	BankUnited, Inc.
BankUnited	BankUnited, National Association
The Bank	BankUnited, National Association
Bridge	Bridge Funding Group, Inc.
CET1	Common Equity Tier 1 risk-based capital
CECL	Current expected credit losses
CMOs	Collateralized mortgage obligations
Commercial Shared-Loss Agreement	A commercial and other loans shared-loss agreement entered into with the FDIC in connection with the FSB Acquisition
Covered assets	Assets covered under the Loss Sharing Agreements
Covered loans	Loans covered under the Loss Sharing Agreements
EVE	Economic value of equity
FASB	Financial Accounting Standards Board
FDIA	Federal Deposit Insurance Act
FDIC	Federal Deposit Insurance Corporation
FHLB	Federal Home Loan Bank
FRB	Federal Reserve Bank
FSB Acquisition	Acquisition of substantially all of the assets and assumption of all of the non-brokered deposits and substantially all of the other liabilities of BankUnited, FSB from the FDIC on May 21, 2009
GAAP	U.S. generally accepted accounting principles
GDP	Gross Domestic Product
HAMP	Home Affordable Modification Program
IPO	Initial public offering
ISDA	International Swaps and Derivatives Association
LIBOR	London InterBank Offered Rate
Loss Sharing Agreements	Two loss sharing agreements entered into with the FDIC in connection with the FSB Acquisition
LTV	Loan-to-value
MBS	Mortgage-backed securities
MSA	Metropolitan Statistical Area
MSRs	Mortgage servicing rights
New Loans	Loans originated or purchased since the FSB Acquisition
Non-ACI	Loans acquired without evidence of deterioration in credit quality since origination
OCC	Office of the Comptroller of the Currency
OREO	Other real estate owned

OTTI	Other-than-temporary impairment
PSU	Performance Unit
Pinnacle	Pinnacle Public Finance, Inc.
Re-Remics	Resecuritized real estate mortgage investment conduits
RSU	Restricted Share Unit
SBA	Small Business Administration
SBF	Small Business Finance Unit
SEC	Securities and Exchange Commission
Single Family Shared-Loss Agreement	A single-family loan shared-loss agreement entered into with the FDIC in connection with the FSB Acquisition
TDR	Troubled-debt restructuring
UCBL	United Capital Business Lending, Inc.
UPB	Unpaid principal balance
VIEs	Variable interest entities
2010 Plan	2010 Omnibus Equity Incentive Plan
2014 Plan	2014 Omnibus Equity Incentive Plan

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Note 1 Basis of Presentation and Summary of Significant Accounting Policies

BankUnited, Inc. is a national bank holding company with one wholly-owned subsidiary, BankUnited, collectively, the Company. BankUnited, a national banking association headquartered in Miami Lakes, Florida, provides a full range of banking and related services to individual and corporate customers through 95 branches located in 15 Florida counties and 6 banking centers located in the New York metropolitan area at September 30, 2016. The Bank also offers certain commercial lending and deposit products through national platforms.

In connection with the FSB Acquisition, BankUnited entered into two loss sharing agreements with the FDIC. The Loss Sharing Agreements consist of the Single Family Shared-Loss Agreement and the Commercial Shared-Loss Agreement. Assets covered by the Loss Sharing Agreements are referred to as covered assets or, in certain cases, covered loans. The Single Family Shared-Loss Agreement provides for FDIC loss sharing and the Bank's reimbursement for recoveries to the FDIC through May 21, 2019 for single family residential loans and OREO. Loss sharing under the Commercial Shared-Loss Agreement terminated on May 21, 2014. The Commercial Shared-Loss Agreement continues to provide for the Bank's reimbursement of recoveries to the FDIC through May 21, 2017 for all other covered assets, including commercial real estate, commercial and industrial and consumer loans, certain investment securities and commercial OREO. Gains realized on the sale of formerly covered investment securities are included in recoveries subject to reimbursement. Pursuant to the terms of the Loss Sharing Agreements, the covered assets are subject to a stated loss threshold whereby the FDIC will reimburse BankUnited for 80% of losses related to the covered assets up to \$4.0 billion and 95% of losses in excess of this amount, beginning with the first dollar of loss incurred.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X of the SEC. Accordingly, they do not include all of the information and footnotes required for a fair presentation of financial position, results of operations and cash flows in conformity with GAAP and should be read in conjunction with the Company's consolidated financial statements and the notes thereto appearing in BKU's Annual Report on Form 10-K for the year ended December 31, 2015 filed with the SEC. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation have been included. Operating results for the three and nine months ended September 30, 2016 are not necessarily indicative of the results that may be expected in future periods.

Certain amounts presented for prior periods have been reclassified to conform to the current period presentation.

Accounting Estimates

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses and disclosures of contingent assets and liabilities. Actual results could differ significantly from these estimates.

Significant estimates include the ALLL, the amount and timing of expected cash flows from covered assets and the FDIC indemnification asset, and the fair values of investment securities and other financial instruments. Management has used information provided by third party valuation specialists to assist in the determination of the fair values of investment securities.

Loan Servicing Assets

Effective January 1, 2016, the Company made an irrevocable election to subsequently measure residential MSR's at fair value. Previously, residential MSR's were subsequently measured using the amortization method. This change had no impact on opening retained earnings at January 1, 2016.

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which will supersede the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific

revenue recognition guidance throughout the Accounting Standards Codification. The amendments in this update affect any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of non-financial assets unless those contracts, including leases and insurance contracts, are within the scope of other standards. The amendments establish a core principle requiring the recognition of revenue to depict the transfer of goods or services to customers in an

7

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

amount reflecting the consideration to which the entity expects to be entitled in exchange for such goods or services. The amendments also require expanded disclosures concerning the nature, amount, timing and uncertainty of revenues and cash flows arising from contracts with customers. Financial instruments and lease contracts are generally outside the scope of the ASU. The FASB has issued subsequent ASUs to clarify certain aspects of ASU 2014-09, without changing the core principle of the guidance and to defer the effective date of ASU 2014-09 to annual periods and interim periods within fiscal years beginning after December 15, 2017. While management does not currently expect adoption to have a material impact on the Company's consolidated financial position, results of operations or cash flows, management has not completed its evaluation of the impact of adoption of this ASU.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The amendments in the ASU that are expected to be most applicable to the Company 1) require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income, 2) eliminate the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, and 3) require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2017. Although management has not completed its evaluation of the impact of adoption of this ASU, adoption is not expected to have any impact on financial position or cash flows. Equity investments for which fair value changes will be recognized in earnings upon adoption totaled \$74 million at September 30, 2016 and had unrealized gains of \$7.5 million.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). The amendments in this ASU require a lessee to recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for lease terms longer than one year. Accounting for leases by a lessor will not be significantly impacted by this ASU. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2018. Management has not yet made an evaluation of the impact of adoption of this ASU.

In March 2016, the FASB issued ASU No. 2016-06, Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments. The amendments in this ASU clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. A company performing the assessment under these amendments is required to assess the embedded call (put) options solely in accordance with a four-step decision sequence, without consideration of whether the contingency is related to interest rates or credit risks. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2016 and will be applied on a modified retrospective basis. While management does not currently expect adoption to have a material impact on the Company's consolidated financial position, results of operations or cash flows, management has not completed its evaluation of the impact of adoption of this ASU.

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The amendments in this ASU simplify several aspects of the accounting for share-based payment transactions. The amendments provide, among other items, that a) excess tax benefits and deficiencies be recognized as income tax expense or benefit in the income statement, as opposed to additional paid-in-capital; b) excess tax benefits and deficiencies be classified with other income tax cash flows as an operating activity in the statement of cash flows; and c) an entity may make an entity-wide election to either estimate the number of awards that are expected to vest or account for forfeitures as they occur. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2016. Management is currently finalizing its evaluation of the impact of this ASU on the financial statements and related

disclosures, including the alternative methods of adoption. The adoption is not expected to materially impact the Company's consolidated financial position, results of operations, or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses (Topic 326). The ASU introduces new guidance for the accounting for credit losses on certain types of financial instruments. The ASU also modifies the impairment model for available for sale securities. The ASU introduces the CECL model which applies to financial assets subject to credit losses and measured at amortized cost, as well as certain off-balance sheet credit exposures. This includes loans, loan commitments and held-to-maturity debt securities. The CECL model requires an entity to estimate credit losses expected over the life of an exposure, considering historical, current and forecast information. The ASU amends the current OTTI model for debt securities and requires an estimate of expected credit losses only when the fair value of an available for sale debt security is below its amortized cost. Credit losses on available for sale debt securities will be limited to the difference

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

between the security's amortized cost basis and its fair value. The ASU also provides for a simplified accounting model for purchased financial assets with more than insignificant credit deterioration since their origination. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2019. Management has not yet made an evaluation of the impact of adoption of this ASU.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The amendments in this ASU provide guidance on eight specific cash flow classification issues where there has been diversity in practice. The guidance in the ASU that is expected to be most applicable to the Company requires: (1) cash payments for debt prepayment or extinguishment costs to be classified as cash outflows for financing activities, (2) proceeds from settlement of insurance claims to be classified on the basis of the nature of the loss and (3) cash proceeds from settlement of corporate-owned life insurance policies to be classified as cash flows from investing activities. The amendments in this ASU are effective for the Company for interim and annual periods in fiscal years beginning after December 15, 2017. The adoption is not expected to materially impact the Company's consolidated cash flows.

Note 2 Earnings Per Common Share

The computation of basic and diluted earnings per common share is presented below for the periods indicated (in thousands, except share and per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
c				
Basic earnings per common share:				
Numerator:				
Net income	\$50,848	\$ 102,303	\$ 162,447	\$ 195,397
Distributed and undistributed earnings allocated to participating securities	(2,031)	(4,016)	(6,522)	(7,578)
Income allocated to common stockholders for basic earnings per common share	\$48,817	\$ 98,287	\$ 155,925	\$ 187,819
Denominator:				
Weighted average common shares outstanding	104,153,011	103,503,425	104,077,932	103,064,484
Less average unvested stock awards	(1,150,268)	(1,176,288)	(1,165,509)	(1,121,973)
Weighted average shares for basic earnings per common share	103,002,750	102,327,137	102,912,423	101,942,511
Basic earnings per common share	\$0.47	\$ 0.96	\$ 1.52	\$ 1.84
Diluted earnings per common share:				
Numerator:				
Income allocated to common stockholders for basic earnings per common share	\$48,817	\$ 98,287	\$ 155,925	\$ 187,819
Adjustment for earnings reallocated from participating securities	(81)	25	(264)	30
Income used in calculating diluted earnings per common share	\$48,736	\$ 98,312	\$ 155,661	\$ 187,849

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Included in participating securities above are unvested shares and 3,023,314 dividend equivalent rights outstanding at September 30, 2016 that were issued in conjunction with the IPO of the Company's common stock. These dividend equivalent rights expire in 2021 and participate in dividends on a one-for-one basis.

The following potentially dilutive securities were outstanding at September 30, 2016 and 2015, but excluded from the calculation of diluted earnings per common share for the periods indicated because their inclusion would have been anti-dilutive:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Unvested shares	1,296,848	1,192,732	1,296,848	1,192,732

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

At September 30, 2016, contractual maturities of investment securities available for sale, adjusted for anticipated prepayments of mortgage-backed and other pass-through securities, were as follows (in thousands):

	Amortized Cost	Fair Value
Due in one year or less	\$509,907	\$525,258
Due after one year through five years	3,177,514	3,225,301
Due after five years through ten years	1,704,020	1,763,306
Due after ten years	343,801	360,465
Preferred stocks with no stated maturity	66,217	73,731
	\$5,801,459	\$5,948,061

Based on the Company's proprietary assumptions, the estimated weighted average life of the investment portfolio as of September 30, 2016 was 4.9 years. The effective duration of the investment portfolio as of September 30, 2016 was 1.5 years. The model results are based on assumptions that may differ from actual results.

The carrying value of securities pledged as collateral for FHLB advances, public deposits, interest rate swaps and to secure borrowing capacity at the FRB totaled \$2.1 billion and \$1.5 billion at September 30, 2016 and December 31, 2015, respectively.

The following table provides information about gains and losses on investment securities available for sale for the periods indicated (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Proceeds from sale of investment securities available for sale	\$259,571	\$324,536	\$753,756	\$799,450
Gross realized gains	\$3,471	\$2,343	\$10,528	\$5,968
Gross realized losses	—	—	—	(475)
Net realized gain	3,471	2,343	10,528	5,493
OTTI	(463)	—	(463)	—
Gain on investment securities available for sale, net	\$3,008	\$2,343	\$10,065	\$5,493

During the three and nine months ended September 30, 2016, OTTI was recognized on two positions in one private label commercial MBS. These positions were in unrealized loss positions at September 30, 2016 and the Company intended to sell the security before recovery of the amortized cost basis.

SBA securities	41,996	(543)	868	(17)	42,864	(560)
	\$ 2,055,996	\$ (17,389)	\$ 439,706	\$ (9,212)	\$ 2,495,702	\$ (26,601)

The Company monitors its investment securities available for sale for OTTI on an individual security basis. As discussed above, OTTI was recognized on two positions in one private label commercial MBS during the nine months ended September 30, 2016. No securities were determined to be other-than-temporarily impaired during the nine months ended September 30, 2015. Other than as noted above, the Company does not intend to sell securities that are in significant unrealized loss positions and it is not more likely than not that the Company will be required to sell these securities before recovery of the amortized cost

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

basis, which may be at maturity. At September 30, 2016, 34 securities were in unrealized loss positions. The amount of impairment related to 11 of these securities was considered insignificant, totaling approximately \$101 thousand and no further analysis with respect to these securities was considered necessary. The basis for concluding that impairment of the remaining securities was not other-than-temporary is further described below:

U.S. Government agency and sponsored enterprise residential MBS and commercial MBS

At September 30, 2016, four U.S. Government agency and sponsored enterprise residential MBS and one U.S. Government agency and sponsored enterprise commercial MBS were in unrealized loss positions. The substantial majority of the securities had been in unrealized loss positions for less than twelve months and the amount of impairment was less than 1% of amortized cost. The timely payment of principal and interest on these securities is explicitly or implicitly guaranteed by the U.S. Government. Given the generally limited severity and duration of impairment and the expectation of timely payment of principal and interest, the impairments were considered to be temporary.

Private label residential MBS and CMOs

At September 30, 2016, three private label residential MBS were in unrealized loss positions. The amount of impairment of each of the individual securities was less than 2% of amortized cost. These securities were assessed for OTTI using credit and prepayment behavioral models that incorporate CUSIP level constant default rates, voluntary prepayment rates and loss severity and delinquency assumptions. The results of these assessments were not indicative of credit losses that would result in the Company recovering less than its amortized cost basis related to any of these securities as of September 30, 2016. Given the limited severity of impairment and the expectation of timely recovery of outstanding principal, the impairments were considered to be temporary.

Private label commercial MBS:

At September 30, 2016, five private label commercial MBS were in unrealized loss positions. The amount of impairment of each of the individual securities was less than 1% of amortized cost. The unrealized losses were primarily attributable to widening credit spreads since the purchase of the securities. These securities were assessed for OTTI using credit and prepayment behavioral models incorporating assumptions consistent with the collateral characteristics of each security. The results of this analysis were not indicative of expected credit losses. Each of the securities has greater than 30% current credit enhancement. Given the expectation of timely recovery of outstanding principal, the impairments were considered to be temporary.

Single family rental real estate-backed securities:

At September 30, 2016, five single family rental real estate-backed securities were in unrealized loss positions. The unrealized losses were primarily due to widening credit spreads since the purchase of the securities, leading to increased extension risk. The amount of impairment of each of the individual securities was 1% or less of amortized cost. Management's analysis of the credit characteristics, including loan-to-value and debt service coverage ratios, and levels of subordination for each of the securities is not indicative of projected credit losses. Given the limited severity of impairment and the absence of projected credit losses, the impairments were considered to be temporary.

Collateralized loan obligations:

At September 30, 2016, three collateralized loan obligations were in unrealized loss positions, due to widening credit spreads subsequent to acquisition. The amount of impairment of each of the individual securities was less than 1% of amortized cost. Given the limited severity of impairment, levels of subordination and the results of independent analyses of the credit quality of loans underlying the securities, the impairments were considered to be temporary.

SBA securities:

At September 30, 2016, two SBA securities were in unrealized loss positions. The majority of impairment related to one security and was less than 3% of amortized cost. This security was purchased at a premium and the impairment was attributable primarily to increased prepayment speeds. The timely payment of principal and interest on these securities is guaranteed by this U.S. Government agency. Given the limited severity of impairment and the expectation

of timely payment of principal and interest, the impairments were considered to be temporary.

Note 4 Loans and Allowance for Loan and Lease Losses

The Company segregates its loan portfolio between covered and non-covered loans. Non-covered loans include those originated or purchased since the FSB Acquisition ("new loans") and loans acquired in the FSB Acquisition for which loss share coverage has terminated. Loans acquired in the FSB Acquisition are further segregated between ACI loans and non-ACI loans.

Loans consisted of the following at the dates indicated (dollars in thousands):

Through two subsidiaries, the Bank provides commercial and municipal equipment and franchise financing utilizing both loan and lease structures. At September 30, 2016 and December 31, 2015, the commercial lending subsidiaries portfolio included a net investment in direct financing leases of \$626 million and \$472 million, respectively.

During the three and nine months ended September 30, 2016 and 2015, the Company purchased 1-4 single family residential loans totaling \$355 million, \$937 million, \$243 million and \$678 million, respectively.

At September 30, 2016, the Company had pledged real estate loans with UPB of approximately \$9.2 billion and recorded investment of approximately \$8.4 billion as security for FHLB advances.

At September 30, 2016 and December 31, 2015, the UPB of ACI loans was \$1.6 billion and \$2.0 billion, respectively.

The accretable yield on ACI loans represents the amount by which undiscounted expected future cash flows exceed recorded investment. Changes in the accretable yield on ACI loans for the nine months ended September 30, 2016 and the year ended December 31, 2015 were as follows (in thousands):

Balance at December 31, 2014	\$1,005,312
Reclassifications from non-accretable difference	192,291
Accretion	(295,038)
Balance at December 31, 2015	902,565
Reclassifications from non-accretable difference	27,093
Accretion	(228,542)
Balance at September 30, 2016	\$701,116

Beginning in the first quarter of 2016, the methodology for calculation of the ALLL was changed to extend the loss experience period used to calculate historical average net charge-off rates from 12 quarters to 16 quarters for commercial and consumer loans. We believe this extension of the look back period is appropriate at this time to capture a sufficient range of observations reflecting the performance of our loans, most of which were originated in the current economic cycle, and to reflect recent indications that the U.S. economy continues to move through the credit cycle. Extending the look back period to 16 quarters resulted in an increase in the ALLL of approximately \$9 million as of March 31, 2016, as compared to using a 12-quarter look back period at the same date.

Credit quality information

New and non-ACI loans are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due, according to the contractual terms of the loan agreements. Commercial relationships on non-accrual status with committed balances greater than or equal to \$1.0 million that have internal risk ratings of substandard or doubtful, as well as loans that

have been modified in TDRs, are individually evaluated for impairment. The likelihood of loss related to loans assigned internal risk ratings of substandard or doubtful is considered elevated due to their identified credit weaknesses. Factors considered by management in evaluating impairment include payment status, financial condition of the borrower, collateral value, and other factors impacting the probability of collecting scheduled principal and interest payments when due.

	\$ 112,390	\$ 3,775	\$ 57,990	\$ 5,318

(1) Taxi medallion loans with a carrying value of \$54.5 million and \$2.6 million are included in new commercial and industrial loans in non-accrual status above at September 30, 2016 and December 31, 2015, respectively.

There were no new and non-ACI loans contractually delinquent by 90 days or more and still accruing at September 30, 2016 or December 31, 2015. The amount of additional interest income that would have been recognized on non-accrual loans had they performed in accordance with their contractual terms was approximately \$1.1 million and \$2.3 million for the three and nine months ended September 30, 2016, respectively.

Management considers delinquency status to be the most meaningful indicator of the credit quality of 1-4 single family residential, home equity and consumer loans. Delinquency statistics are updated at least monthly. See "Aging of loans" below for more information on the delinquency status of loans. Original LTV and original FICO score are also important indicators of credit quality for the new 1-4 single family residential portfolio.

Internal risk ratings are considered the most meaningful indicator of credit quality for commercial loans. Internal risk ratings are a key factor in identifying loans that are individually evaluated for impairment and impact management's estimates of loss factors used in determining the amount of the ALLL. Internal risk ratings are updated on a continuous basis. Generally, relationships with balances in excess of defined thresholds, ranging from \$1 million to \$3 million, are re-evaluated at least annually and more frequently if circumstances indicate that a change in risk rating may be warranted. Loans exhibiting potential credit weaknesses that deserve management's close attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. Loans with well-defined credit weaknesses, including payment defaults, declining collateral values, frequent overdrafts, operating losses, increasing balance sheet leverage, inadequate cash flow, project cost overruns, unreasonable construction delays, past due real estate taxes or exhausted interest reserves, are assigned an internal risk rating of substandard. A loan with a weakness so severe that collection in full is highly questionable or improbable, but because of certain reasonably specific pending factors has not been charged off, will be assigned an internal risk rating of doubtful.

Foreclosure of residential real estate:

The carrying amount of foreclosed residential real estate properties included in "Other assets" in the accompanying consolidated balance sheets, all of which are covered, totaled \$6 million and \$9 million at September 30, 2016 and December 31, 2015, respectively. The recorded investment in residential mortgage loans in the process of foreclosure totaled \$9 million and \$13 million at September 30, 2016 and December 31, 2015, respectively, substantially all of which were covered loans.

Troubled debt restructurings:

The following tables summarize loans that were modified in TDRs during the periods indicated, as well as loans modified during the twelve months preceding September 30, 2016 and 2015, that experienced payment defaults during the periods indicated (dollars in thousands):

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Modifications during the three and nine months ended September 30, 2016 and 2015 included interest rate reductions, restructuring of the amount and timing of required periodic payments, extensions of maturity and residential modifications under the U.S. Treasury Department's HAMP. Included in TDRs are residential loans to borrowers who have not reaffirmed their debt discharged in Chapter 7 bankruptcy. The total amount of such loans is not material. Modified ACI loans accounted for in pools are not considered TDRs, are not separated from the pools and are not classified as impaired loans.

Note 5 FDIC Indemnification Asset

When the Company recognizes gains or losses related to covered assets in its consolidated financial statements, changes in the estimated amount recoverable from the FDIC under the Loss Sharing Agreements with respect to those gains or losses are also reflected in the consolidated financial statements. Covered loans may be resolved through prepayment, short sale of the underlying collateral, foreclosure, sale of the loans or charge-off. For loans resolved through prepayment, short sale or foreclosure, the difference between consideration received in satisfaction of the loans and the carrying value of the loans is recognized in the consolidated statement of income line item "Income from resolution of covered assets, net." Losses from the resolution of covered loans increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the Loss Sharing Agreements. Similarly, differences in proceeds received on the sale of covered OREO and covered loans and their carrying amounts result in gains or losses and reduce or increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Increases in valuation allowances or impairment charges related to covered assets also increase the amount estimated to be recoverable from the FDIC. These additions to or reductions in amounts recoverable from the FDIC related to transactions in the covered assets are recorded in the consolidated statement of income line item "Net gain (loss) on FDIC indemnification" and reflected as corresponding increases or decreases in the FDIC indemnification asset.

In addition, recoveries of previously indemnified losses on commercial loans and gains on the sale of investment securities that were previously covered under the Commercial Shared-Loss Agreement result in reimbursements due to the FDIC. These transactions are included in the tables below. Amounts payable to the FDIC resulting from these transactions are recognized in other liabilities in the accompanying consolidated balance sheets.

The following tables summarize the components of the gains and losses associated with covered assets, along with the related additions to or reductions in the amounts recoverable from the FDIC under the Loss Sharing Agreements, as reflected in the consolidated statements of income for the periods indicated (in thousands):

	Three Months Ended September 30,					
	2016			2015

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Note 6 Income Taxes

A reconciliation of expected income tax expense at the statutory federal income tax rate of 35% to the Company's effective income tax rate for the three and nine months ended September 30, 2016 and 2015 follows:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Tax expense calculated at the statutory federal income tax rate	35.00 %	35.00 %	35.00 %	35.00 %
Increases (decreases) resulting from:				
Income not subject to tax	(8.10)%	(4.93)%	(6.91)%	(4.67)%
State income taxes, net of federal tax benefit	6.00 %	5.41 %	4.80 %	4.74 %
Uncertain tax positions - lapse of statute of limitations	— %	(8.40)%	— %	(2.92)%
Discrete tax benefit - increase in basis of certain assets	— %	(70.43)%	— %	(23.33)%
Other, net	(1.25)%	(2.72)%	0.35 %	(1.26)%
	31.65 %	(46.07)%	33.24 %	7.56 %

A discrete income tax benefit of \$49.3 million was recognized in the three months ended September 30, 2015. The tax benefit, predicated on clarifying guidance issued by the IRS in 2015, relates to the Company's ability to claim additional tax basis in certain assets acquired in the FSB Acquisition. The additional tax basis will result in increased taxable losses or reduced taxable income upon the final disposition of those assets.

The Company has a liability for unrecognized tax benefits relating to uncertain state income tax positions in several jurisdictions. The Company's liability for unrecognized tax benefits was reduced by \$5.9 million, net of federal income tax benefit, in the three months ended September 30, 2015, as a result of the lapse of the statute of limitations. The liability for unrecognized tax benefits was increased by \$16.7 million and \$8.1 million, net of federal income tax benefit, in the three months ended September 30, 2016 and 2015, respectively, related to uncertain income tax positions taken on certain amended and recently filed state income tax returns.

The Company has investments in affordable housing limited partnerships which generate federal Low Income Housing Tax Credits and other tax benefits. The balance of these investments, included in other assets in the accompanying consolidated balance sheet, was \$72 million and \$59 million at September 30, 2016 and December 31, 2015, respectively. Unfunded commitments for affordable housing investments, included in other liabilities in the accompanying consolidated balance sheet, were \$56 million and \$52 million at September 30, 2016 and December 31, 2015, respectively. The maximum exposure to loss as a result of the Company's involvement with these limited partnerships at September 30, 2016 was approximately \$74 million. While the Company believes the likelihood of potential losses from these investments is remote, the maximum exposure was determined by assuming a scenario where the projects completely fail and do not meet certain government compliance requirements resulting in recapture of the related tax credits. These investments did not have a significant impact on income tax expense for the three and nine months ended September 30, 2016 and 2015.

Note 7 Derivatives and Hedging Activities

The Company uses interest rate swaps to manage interest rate risk related to liabilities that expose the Company to variability in cash flows due to changes in interest rates. The Company enters into LIBOR-based interest rate swaps that are designated as cash flow hedges with the objective of limiting the variability of interest payment cash flows resulting from changes in the benchmark interest rate LIBOR. The effective portion of changes in the fair value of interest rate swaps designated as cash flow hedging instruments is reported in AOCI and subsequently reclassified into interest expense in the same period in which the related interest on the floating-rate debt obligations affects earnings. The Company also enters into interest rate derivative contracts with certain of its commercial borrowers to enable those borrowers to manage their exposure to interest rate fluctuations. To mitigate interest rate risk associated with

these derivative contracts, the Company enters into offsetting derivative contract positions with primary dealers. These interest rate derivative contracts are not designated as hedging instruments; therefore, changes in the fair value of these derivatives are recognized

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

immediately in earnings. The impact on earnings related to changes in fair value of these derivatives for the nine months ended September 30, 2016 and 2015 was not material.

The Company may be exposed to credit risk in the event of non-performance by the counterparties to its interest rate derivative agreements. The Company assesses the credit risk of its financial institution counterparties by monitoring publicly available credit rating and financial information. The Company manages dealer credit risk by entering into interest rate derivatives only with primary and highly rated counterparties, the use of ISDA master agreements and counterparty limits. The agreements contain bilateral collateral arrangements with the amount of collateral to be posted generally governed by the settlement value of outstanding swaps. The Company manages the risk of default by its borrower counterparties through its normal loan underwriting and credit monitoring policies and procedures. The Company does not currently anticipate any losses from failure of interest rate derivative counterparties to honor their obligations.

The following tables set forth certain information concerning the Company's interest rate contract derivative financial instruments and related hedged items at the dates indicated (dollars in thousands):

September 30, 2016

During the three and nine months ended September 30, 2016 and 2015, the amount of loss reclassified from AOCI into interest expense (effective portion) was \$3.7 million, \$13.1 million, \$7.0 million and \$20.1 million, respectively. During the nine months ended September 30, 2016 and 2015, no derivative positions designated as cash flow hedges were discontinued and none of the gains and losses reported in AOCI were reclassified into earnings as a result of the discontinuance of cash flow hedges or because of the early extinguishment of debt. As of September 30, 2016, the amount of loss expected to be reclassified from AOCI into earnings during the next twelve months was \$11.3 million.

Edgar Filing: BankUnited, Inc. - Form 10-Q

Some of the Company's ISDA master agreements with financial institution counterparties contain provisions that permit either counterparty to terminate the agreements and require settlement in the event that regulatory capital ratios fall below certain designated thresholds, upon the initiation of other defined regulatory actions or upon suspension or withdrawal of the Bank's credit rating. Currently, there are no circumstances that would trigger these provisions of the agreements.

The Company does not offset assets and liabilities under master netting agreements for financial reporting purposes. Information on interest rate swaps subject to these agreements is as follows at the dates indicated (in thousands):

September 30, 2016

	Gross Amounts Recognized	Gross Amounts Offset in Balance Sheet	Net Amounts Presented in Balance Sheet	Gross Amounts Not Offset in Balance Sheet	Derivative Instruments	Collateral Pledged	Net Amount
Derivative assets	\$363	\$	— \$ 363	\$ (363)	\$ —	\$	—

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

	December 31, 2015			Gross Amounts Not Offset in		
	Gross Amounts	Offset in Balance	Net Amounts	Gross Amounts	Collateral	Net Amount
	Recognized	Sheet	Presented in	Balance Sheet	Pledged	
			Balance Sheet	Derivative		
				Instruments		
Derivative assets	\$3,830	\$	— \$ 3,830	\$ (3,605)	\$ —	\$ 225
Derivative liabilities	(69,135)	—	(69,135)	3,605	65,530	—
	\$(65,305)	\$	— \$ (65,305)	\$ —	\$ 65,530	\$ 225

The difference between the amounts reported for interest rate swaps subject to master netting agreements and the total fair value of interest rate contract derivative financial instruments reported in the consolidated balance sheets is related to interest rate contracts entered into with borrowers not subject to master netting agreements.

At September 30, 2016, the Company had pledged investment securities available for sale with a carrying amount of \$80 million and cash on deposit of \$93 million as collateral for interest rate swaps in a liability position. No financial collateral was pledged by counterparties to the Company for interest rate swaps in an asset position. The amount of collateral required to be posted varies based on the settlement value of outstanding swaps and in some cases may include initial margin requirements.

Note 9 Equity Based and Other Compensation Plans

During the nine months ended September 30, 2016, the Company granted 644,888 unvested share awards under the 2014 Plan. All of the shares vest in equal annual installments over a period of three years from the date of grant. The shares granted were valued at the closing price of the Company's common stock on the date of grant, ranging from \$29.78 to \$33.76, and had an aggregate fair value of \$20.0 million. The total unrecognized compensation cost of \$23.6 million for all unvested share awards outstanding at September 30, 2016 will be recognized over a weighted average remaining period of 1.87 years.

During the nine months ended September 30, 2015, the Company granted 621,283 unvested share awards under the 2010 Plan and 41,645 unvested share awards under the 2014 Plan. All of the shares vest in equal annual installments over a period of three years from the date of grant. The shares granted were valued at the closing price of the Company's common stock on the date of grant, ranging from \$31.35 to \$36.50, and had an aggregate fair value of

\$21.2 million.

Executive share-based awards

Two of the Company's executives are eligible to receive annual awards of RSUs and PSUs (collectively, the "share units"). RSUs represent a fixed number of shares and vest in equal tranches over 3 years. PSUs are initially granted based on a target value. The number of PSUs that ultimately vest at the end of a three-year performance measurement period will be based on the

33

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

achievement of performance criteria pre-established by the Compensation Committee of the Board of Directors. Upon vesting, the share units will be converted to common stock on a one-for-one basis, or may be settled in cash at the Company's option. The share units will accumulate dividends declared on the Company's common stock from the date of grant to be paid subsequent to vesting. During the nine months ended September 30, 2016, 57,873 RSUs and 57,873 PSUs were granted. The RSUs were valued at the closing price of the Company's common stock on the date of grant of \$29.85. The performance criteria established for the PSUs granted in 2016 include both performance and market conditions. The grant-date value of the PSUs was determined based on the closing price of the Company's common stock on the date of grant and a discount related to the market condition, considering the probability of meeting the defined performance conditions.

Certain other of the Company's executives are eligible to receive unvested share awards at the end of one-year performance periods. The dollar value of share awards to be granted is based on the achievement of performance criteria pre-established annually by the Compensation Committee. The number of shares of common stock to be awarded is variable based on the closing price of the Company's stock on the date of grant; therefore, these awards are initially classified as liability instruments in the Company's consolidated balance sheets and compensation cost is recognized from the beginning of the performance period. The share awards vest in equal installments over a period of three years from the date of grant.

Compensation cost related to performance based executive share-based awards is recognized during the performance period based on the probable outcome of the respective performance conditions. The total unrecognized compensation cost of \$3.9 million for these executive share-based awards at September 30, 2016 will be recognized over a weighted average remaining period of 2.62 years.

Note 10 Fair Value Measurements

Assets and liabilities measured at fair value on a recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities measured at fair value on a recurring basis and the level within the fair value hierarchy in which those measurements are typically classified.

Investment securities available for sale—Fair value measurements are based on quoted prices in active markets when available; these measurements are classified within level 1 of the fair value hierarchy. These securities typically include U.S. Treasury securities and certain preferred stocks. If quoted prices in active markets are not available, fair values are estimated using quoted prices of securities with similar characteristics, quoted prices of identical securities in less active markets, discounted cash flow techniques, or matrix pricing models. These securities are generally classified within level 2 of the fair value hierarchy and include U.S. Government agency securities, U.S. Government agency and sponsored enterprise MBS, preferred stock investments for which level 1 valuations are not available, corporate debt securities, non-mortgage asset-backed securities, single family rental real estate-backed securities, certain private label residential MBS and CMOs, Re-Remics, private label commercial MBS, collateralized loan obligations and state and municipal obligations. Pricing of these securities is generally primarily spread driven. Observable inputs that may impact the valuation of these securities include benchmark yield curves, credit spreads, reported trades, dealer quotes, bids, issuer spreads, current rating, historical constant prepayment rates, historical voluntary prepayment rates, structural and waterfall features of individual securities, published collateral data, and for certain securities, historical constant default rates and default severities. Investment securities available for sale generally classified within level 3 of the fair value hierarchy include certain private label MBS and trust preferred securities. The Company typically values these securities using third-party proprietary pricing models, primarily discounted cash flow valuation techniques, which incorporate both observable and unobservable inputs. Unobservable inputs that may impact the valuation of these securities include risk adjusted discount rates, projected prepayment rates, projected default rates and projected loss severity.

The Company uses third-party pricing services in determining fair value measurements for investment securities. To obtain an understanding of the methodologies and assumptions used, management reviews written documentation provided by the pricing services, conducts interviews with valuation desk personnel and reviews model results and detailed assumptions used to value selected securities as considered necessary. Management has established a robust price challenge process that includes a review by the treasury front office of all prices provided on a monthly basis. Any price evidencing unexpected month over month fluctuations or deviations from expectations is challenged. If considered necessary to resolve any discrepancies, a price will be obtained from an additional independent valuation source. The Company does not typically adjust the prices provided, other than through this established challenge process. The results of price challenges are subject to review by executive management. The Company has also established a quarterly process whereby prices provided by its primary pricing service for

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

a sample of securities are validated. Any price discrepancies are resolved based on careful consideration of the assumptions and inputs employed by each of the pricing sources.

Servicing rights—Commercial servicing rights are valued using a discounted cash flow methodology incorporating contractually specified servicing fees and market based assumptions about prepayments, discount rates, default rates and costs of servicing. Prepayment and default assumptions are based on historical industry data for loans with similar characteristics. Assumptions about costs of servicing are based on market convention. Discount rates are based on rates of return implied by observed trades of underlying loans in the secondary market. Fair value of residential MSRs is estimated using a discounted cash flow technique that incorporates market based assumptions including estimated prepayment speeds, contractual servicing fees, cost to service, discount rates, escrow account earnings, ancillary income, and estimated defaults. Due to the nature of the valuation inputs and the limited availability of market pricing, servicing rights are classified as level 3.

Derivative financial instruments—Interest rate swaps are predominantly traded in over-the-counter markets and, as such, values are determined using widely accepted discounted cash flow modeling techniques. These discounted cash flow models use projections of future cash payments and receipts that are discounted at mid-market rates. Observable inputs that may impact the valuation of these instruments include LIBOR swap rates and LIBOR forward yield curves. These fair value measurements are generally classified within level 2 of the fair value hierarchy.

The following tables present assets and liabilities measured at fair value on a recurring basis at the dates indicated (in thousands):

	September 30, 2016

The balance of servicing rights at the beginning of 2016 includes \$8.5 million of residential MSR's, which the Company elected to measure at fair value effective January 1, 2016. Changes in the fair value of servicing rights are included in the consolidated statement of income line item "Other non-interest income." Changes in fair value include changes due to discount rates and valuation assumptions, as well as other changes such as runoff's and the passage of time. The amount of unrealized losses included in earnings for the nine months ended September 30, 2016 that were related to servicing assets held at September 30, 2016 totaled approximately \$1.7 million and were primarily due to changes in discount rates and valuation assumptions.

Securities for which fair value measurements are categorized in level 3 of the fair value hierarchy at September 30, 2016 consisted of pooled trust preferred securities with a fair value of \$4 million and private label residential MBS and CMO's with a fair value of \$127 million. The trust preferred securities are not material to the Company's financial statements. Private label residential MBS consisted of senior and mezzanine tranches collateralized by prime fixed rate and hybrid 1-4 single family residential mortgages originated before 2005, some of which contain option-arm features. Substantially all of these securities have variable rate coupons. Weighted average subordination levels at September 30, 2016 were 16.9%, 12.9% and 1.6% for investment grade, non-investment grade and option-arm securities, respectively. There were \$28 million of option-arm securities with a subordination level of zero at September 30, 2016.

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

The following table provides information about the valuation techniques and unobservable inputs used in the valuation of private label residential MBS and CMOs falling within level 3 of the fair value hierarchy as of September 30, 2016 (dollars in thousands):

	Fair Value at September 30, 2016	Valuation Technique	Unobservable Input	Range (Weighted Average)
Investment grade	\$ 57,012	Discounted cash flow	Voluntary prepayment rate	3.78% - 10.57% (8.44%)
			Probability of default	0.03% - 12.39% (2.54%)
			Loss severity	0.00% - 22.58% (1.91%)
			Discount rate	2.41% - 6.67% (3.44%)
Non-investment grade	\$ 40,824	Discounted cash flow	Voluntary prepayment rate	4.66% - 13.78% (8.00%)
			Probability of default	0.02% - 8.08% (2.19%)
			Loss severity	0.00% - 7.32% (1.29%)
			Discount rate	2.80% - 18.29% (5.13%)
Option-arm (non-investment grade)	\$ 29,467	Discounted cash flow	Voluntary prepayment rate	2.91% - 2.97% (2.92%)
			Probability of default	3.90% - 8.86% (7.62%)
			Loss severity	12.78% - 18.77% (14.28%)
			Discount rate	3.50% - 33.43% (8.97%)

The significant unobservable inputs impacting the fair value measurement of private label residential MBS and CMOs include voluntary prepayment rates, probability of default, loss severity given default and discount rates. Generally, increases in probability of default, loss severity or discount rates would result in a lower fair value measurement. Alternatively, decreases in probability of default, loss severity or discount rates would result in a higher fair value measurement. For securities with less favorable credit characteristics, decreases in voluntary prepayment speeds may be interpreted as a deterioration in the overall credit quality of the underlying collateral and as such, lead to lower fair value measurements. The fair value measurements of those securities with higher levels of subordination will be less sensitive to changes in these unobservable inputs other than discount rates, while securities with lower levels of subordination will show a higher degree of sensitivity to changes in these unobservable inputs other than discount rates. Generally, a change in the assumption used for probability of default is accompanied by a directionally similar change in the assumption used for loss severity given default and a directionally opposite change in the assumption used for voluntary prepayment rate.

The following table provides information about the valuation techniques and significant unobservable inputs used in the valuation of servicing rights as of September 30, 2016 (dollars in thousands):

	Fair Value at September 30, 2016	Valuation Technique	Unobservable Input	Range (Weighted Average)
Residential MSRs	\$ 13,122	Discounted cash flow	Prepayment rate	6.11% - 23.18% (13.15%)
			Discount rate	9.13% - 9.19% (9.14%)

Commercial servicing rights \$ 11,594 Discounted cash flow Prepayment rate 1.34% - 9.77% (7.39%)
Discount rate 8.99% - 13.58% (11.88%)

Increases in prepayment rates or discount rates would result in lower fair value measurements and decreases in prepayment rates or discount rates would result in higher fair value measurements. Although the prepayment rate and the discount rate are not directly interrelated, they generally move in opposite directions.

Assets and liabilities measured at fair value on a non-recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities that may be measured at fair value on a non-recurring basis, and the level within the fair value hierarchy in which those measurements are typically classified.

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Impaired loans, OREO and other repossessed assets - The carrying amount of collateral dependent impaired loans is typically based on the fair value of the underlying collateral, which may be real estate or other business assets, less estimated costs to sell. The carrying value of OREO is initially measured based on the fair value of the real estate acquired in foreclosure and subsequently adjusted to the lower of cost or estimated fair value, less estimated cost to sell. Fair values of real estate collateral are typically based on real estate appraisals which utilize market and income approaches to valuation incorporating both observable and unobservable inputs. When current appraisals are not available, the Company may use brokers' price opinions, home price indices or other available information about changes in real estate market conditions to adjust the latest appraised value available. These adjustments to appraised values may be subjective and involve significant management judgment. The fair value of repossessed assets or collateral consisting of other business assets is generally based on appraisals that use market approaches to valuation incorporating primarily unobservable inputs. Fair value measurements related to collateral dependent impaired loans, OREO and other repossessed assets are classified within level 3 of the fair value hierarchy.

The following tables present the carrying value of assets for which non-recurring changes in fair value have been recorded for the periods indicated (in thousands):

	September 30, 2016				Losses from Fair Value Changes	
	Level 1	Level 2	Level 3	Total	Three Months Ended September 30, 2016	Nine Months Ended September 30, 2016

Non-covered	3	18,221,636	18,486,371	15,706,103	15,925,405
FDIC Indemnification asset	3	582,931	293,196	739,880	361,364
Accrued interest receivable	2	63,986	63,986	47,654	47,654
Derivative assets	2	55,557	55,557	34,349	34,349
Liabilities:					
Demand, savings and money market deposits	2	\$12,981,902	\$12,981,902	\$12,330,410	\$12,330,410
Time deposits	2	5,854,407	5,870,497	4,608,091	4,630,572
FHLB advances	2	5,219,125	5,227,177	4,008,464	4,008,621
Notes and other borrowings	2	402,786	424,915	402,545	392,219
Accrued interest payable	2	11,680	11,680	5,638	5,638
Derivative liabilities	2	134,267	134,267	69,524	69,524

The following methods and assumptions were used to estimate the fair value of each class of financial instruments, other than those described above:

The carrying amounts of certain financial instruments approximate fair value due to their short-term nature and generally negligible credit risk. These financial instruments include cash and cash equivalents, accrued interest receivable and accrued interest payable.

Investment securities held to maturity

Investment securities held to maturity includes one bond issued by the State of Israel, with fair value obtained from a third party pricing service.

Non-marketable equity securities

Non-marketable equity securities include FHLB and FRB stock. There is no market for these securities, which can be liquidated only by redemption by the issuer. These securities are valued at par, which has historically represented the redemption price and is therefore considered to approximate fair value.

Loans held for sale

The fair value of the portion of small business loans guaranteed by U.S. Government agencies being held for sale is estimated using pricing on recent sales of similar loans by the Company in active markets.

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

ACI and non-ACI loans

Fair values are estimated based on a discounted cash flow analysis. Estimates of future cash flows incorporate various factors that may include the type of loan and related collateral, estimated collateral values, estimated default probability and loss severity given default, internal risk rating, whether the interest rate is fixed or variable, term of loan and whether or not the loan is amortizing. The fair values of loans accounted for in pools are estimated on a pool basis. Other loans may be grouped based on risk characteristics and fair value estimated in the aggregate when applying discounted cash flow valuation techniques. Discount rates for residential loans are based on observable fixed income market data for products with similar credit characteristics. Discount rates for commercial loans reflect indicative yields based on pricing obtained in the commercial loan sale in 2014, adjusted for changes in market rates subsequent to the sale.

New loans

Fair values of residential loans are estimated using a discounted cash flow analysis with discount rates based on yields at which similar loans are trading in the secondary market, which reflect assumptions about credit risk. Fair values of commercial and consumer loans are estimated using a discounted cash flow analysis with discount rates based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The ALLL related to commercial and consumer loans is considered a reasonable estimate of the required adjustment to fair value to reflect the impact of credit risk. This estimate may not represent an exit value as defined in ASC 820.

FDIC indemnification asset

The fair value of the FDIC indemnification asset has been estimated using a discounted cash flow technique incorporating assumptions about the timing and amount of future projected cash payments from the FDIC related to the resolution of covered assets. The factors that impact estimates of future cash flows are similar to those impacting estimated cash flows from covered loans. The discount rate is determined by adjusting the risk free rate to incorporate uncertainty in the estimate of the timing and amount of future cash flows and illiquidity.

Deposits

The fair value of demand deposits, savings accounts and money market deposits is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using a discounted cash flow technique based on rates currently offered for deposits of similar remaining maturities.

FHLB advances

Fair value is estimated by discounting contractual future cash flows using the current rate at which borrowings with similar terms and remaining maturities could be obtained by the Company.

Senior notes

Fair value is estimated based on quoted prices of identical securities in less active markets.

Note 11 Commitments and Contingencies

The Company issues off-balance sheet financial instruments to meet the financing needs of its customers. These financial instruments include commitments to fund loans, unfunded commitments under existing lines of credit, and commercial and standby letters of credit. These commitments expose the Company to varying degrees of credit and market risk which are essentially the same as those involved in extending loans to customers, and are subject to the same credit policies used in underwriting loans. Collateral may be obtained based on the Company's credit evaluation of the counterparty. The Company's maximum exposure to credit loss is represented by the contractual amount of these commitments. Unfunded commitments under lines of credit include \$13.5 million available under non-cancellable commitments in effect at the date of the FSB Acquisition, which are covered under the Single Family Shared-Loss Agreement if prescribed conditions are met.

Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

September 30, 2016

Commitments to fund loans

These are agreements to lend funds to customers as long as there is no violation of any condition established in the contract. Commitments to fund loans generally have fixed expiration dates or other termination clauses and may require payment of a fee. Many of these commitments are expected to expire without being funded and, therefore, the total commitment amounts do not necessarily represent future liquidity requirements.

Unfunded commitments under lines of credit

Unfunded commitments under lines of credit include commercial, commercial real estate, home equity and consumer lines of credit to existing customers. Some of these commitments may mature without being fully funded.

Commercial and standby letters of credit

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support trade transactions or guarantee arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Total lending related commitments outstanding at September 30, 2016 were as follows (in thousands):

Commitments to fund loans	\$461,169
Commitments to purchase loans	323,783
Unfunded commitments under lines of credit	1,859,367
Commercial and standby letters of credit	84,038
	\$2,728,357

Legal Proceedings

The Company has accrued approximately \$2.8 million related to a recent jury award in an action brought against Herald National Bank, which action was commenced prior to the Company's acquisition by Herald. Although management does not believe the findings of the jury amount to violations of the New York Labor Code, it is reasonably possible the judge may conclude otherwise, which would result in the jury award being doubled. In such event, the judge would also have the discretion to award plaintiff's their reasonable attorney's fees. The Company is strongly considering appealing the final judgment once entered.

The Company is involved as plaintiff or defendant in various other legal actions arising in the normal course of business. In the opinion of management, based upon advice of legal counsel, the likelihood is remote that the impact of these proceedings, either individually or in the aggregate, would be material to the Company's consolidated financial position, results of operations or cash flows.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to focus on significant changes in the financial condition and results of operations of the Company during the three and nine months ended September 30, 2016 and should be read in conjunction with the consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q and BKU's 2015 Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 Annual Report on Form 10-K").

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that reflect the Company's current views with respect to, among other things, future events and financial performance. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates" similar expressions identify forward-looking statements. These forward-looking statements are based on the historical performance of the Company or on the Company's current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by the Company that the future plans, estimates or expectations so contemplated will be achieved. Such forward-looking statements are subject to various risks and uncertainties and assumptions relating to the Company's operations, financial results, financial condition, business prospects, growth strategy and liquidity. If one or more of these or other risks or uncertainties materialize, or if the Company's underlying assumptions prove to be incorrect, the Company's actual results may vary materially from those indicated in these statements. A number of important factors could cause actual results to differ materially from those indicated by the forward-looking statements, including, but not limited to, the risk factors described in Part I, Item 1A of the 2015 Annual Report on Form 10-K. The Company does not undertake any obligation to publicly update or review any forward looking statement, whether as a result of new information, future developments or otherwise.

Overview

Quarterly Highlights

In evaluating our financial performance, we consider the level of and trends in net interest income, the net interest margin, levels and composition of non-interest income and non-interest expense, performance ratios such as the return on average assets and return on average equity and asset quality ratios, particularly for the non-covered portfolio, including the ratio of non-performing loans to total loans, non-performing assets to total assets, and portfolio delinquency and charge-off trends. We consider growth in the loan and deposit portfolios by region and product type, trends in funding mix and cost of funds. We analyze these ratios and trends against our own historical performance, our budgeted performance and the financial condition and performance of comparable financial institutions.

Performance highlights include:

Net income for the quarter ended September 30, 2016 was \$50.8 million, or \$0.47 per diluted share, compared to \$102.3 million, or \$0.95 per diluted share for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, net income was \$162.4 million, or \$1.50 per diluted share compared to \$195.4 million, or \$1.83 per diluted share for the nine months ended September 30, 2015. Earnings for the nine months ended September 30, 2016 generated a return on average stockholders' equity of 9.36% and a return on average assets of 0.85%.

Earnings for the quarter and nine months ended September 30, 2015 benefited from a discrete income tax benefit of \$49.3 million. Non-interest expense for these periods included \$1.3 million in professional fees related to this tax benefit. Excluding the impact of this discrete income tax benefit and related professional fees, net income for the quarter and nine months ended September 30, 2015 was \$53.8 million and \$146.9 million, respectively, or \$0.50 and \$1.37 per diluted share.

Net interest income increased by \$32.8 million to \$221.7 million for the quarter ended September 30, 2016 from \$189.0 million for the quarter ended September 30, 2015. The net interest margin, calculated on a tax-equivalent basis, decreased to 3.69% for the three months ended September 30, 2016 from 3.88% for the three months ended September 30, 2015 and 3.75% for the immediately preceding quarter ended June 30, 2016. The origination of new loans at current market yields lower than those on loans acquired in the FSB Acquisition and the cost of the senior

notes issued in November 2015 were the most significant contributors to the decline in the net interest margin. The provision for loan losses increased to \$24.4 million for the quarter ended September 30, 2016 from \$17.8 million for the quarter ended September 30, 2015. The most significant factors contributing to this increase were an increase in qualitative reserves and an increase in reserves related to the taxi medallion portfolio.

Table of Contents

Total interest earning assets increased by \$1.0 billion during the third quarter of 2016. New loans and leases, including equipment under operating lease, grew by \$0.9 billion during the quarter. For the nine months ended September 30, 2016, new loans and leases increased by \$2.6 billion.

At September 30, 2016, 97.4% of the new commercial loan portfolio was rated "pass" and substantially all of the new residential portfolio was current. The ratio of non-performing, non-covered loans to total non-covered loans was 0.61% and the ratio of non-covered non-performing assets to total assets was 0.43% at September 30, 2016.

Non-performing taxi medallion loans comprised 0.30% of total non-covered loans at September 30, 2016.

Total deposits grew by \$604 million for the third quarter of 2016 to \$18.8 billion. The average cost of total deposits increased to 0.67% for the three months ended September 30, 2016 from 0.61% for the three months ended September 30, 2015. For the nine months ended September 30, 2016, total deposits increased by \$1.9 billion.

The Company's capital ratios exceeded all regulatory "well capitalized" guidelines, with a Tier 1 leverage ratio of 8.5%, CET1 and Tier 1 risk-based capital ratios of 11.6% and a Total risk-based capital ratio of 12.4% at September 30, 2016.

Book value and tangible book value per common share grew to \$22.79 and \$22.04, respectively, at September 30, 2016.

Results of Operations

Net Interest Income

Net interest income is the difference between interest earned on interest earning assets and interest incurred on interest bearing liabilities and is the primary driver of core earnings. Net interest income is impacted by the relative mix of interest earning assets and interest bearing liabilities, the ratio of interest earning assets to total assets and of interest bearing liabilities to total funding sources, movements in market interest rates, levels of non-performing assets and pricing pressure from competitors.

The mix of interest earning assets is influenced by loan demand, market and competitive conditions in our primary lending markets and by management's continual assessment of the rate of return and relative risk associated with various classes of earning assets. The mix of interest bearing liabilities is influenced by management's assessment of the desire for lower cost funding sources weighed against relationships with customers and growth requirements and is impacted by competition for deposits in the Company's markets and the availability and pricing of other sources of funds.

Net interest income is also impacted by the accounting for ACI loans acquired in conjunction with the FSB Acquisition. ACI loans were initially recorded at fair value, measured based on the present value of expected cash flows. The excess of expected cash flows over carrying value, known as accretable yield, is recognized as interest income over the lives of the underlying loans. The positive impact of accretion related to ACI loans on the net interest margin and the interest rate spread is expected to continue to decline as ACI loans comprise a declining percentage of total loans. The proportion of total loans represented by ACI loans is declining as the ACI loans are resolved and new loans are added to the portfolio. ACI loans represented 3.3% and 5.3% of total loans, including premiums, discounts and deferred fees and costs, at September 30, 2016 and 2015, respectively. As this trend continues, we expect our net interest margin and interest rate spread to continue to decrease, although at a declining rate.

The impact of ACI loan accounting on net interest income makes it difficult to compare our net interest margin and interest rate spread to those reported by other financial institutions.

Table of Contents

The following tables present, for the periods indicated, information about (i) average balances, the total dollar amount of taxable equivalent interest income from earning assets and the resultant average yields; (ii) average balances, the total dollar amount of interest expense on interest bearing liabilities and the resultant average rates; (iii) net interest income; (iv) the interest rate spread; and (v) the net interest margin. Non-accrual and restructured loans are included in the average balances presented in this table; however, interest income foregone on non-accrual loans is not included. Interest income, yields, spread and margin have been calculated on a tax-equivalent basis for loans and investment securities that are exempt from federal income taxes, at a federal tax rate of 35.0% (dollars in thousands):

Interest rate spread			3.60 %			3.81 %
Net interest margin			3.75 %			3.95 %

On a tax-equivalent basis. The tax-equivalent adjustment for tax-exempt loans was \$16.7 million and \$11.2 million, and the tax-equivalent adjustment for tax-exempt investment securities was \$7.5 million and \$2.7 million, for the nine months ended September 30, 2016 and 2015, respectively.

(2) Annualized.

(3) At fair value except for securities held to maturity.

Three months ended September 30, 2016 compared to three months ended September 30, 2015

Net interest income, calculated on a tax-equivalent basis, was \$230.5 million for the three months ended September 30, 2016 compared to \$194.0 million for the three months ended September 30, 2015, an increase of \$36.5 million. The increase in net interest income was comprised of an increase in tax-equivalent interest income of \$49.8 million, offset by an increase in interest expense of \$13.3 million.

The increase in tax-equivalent interest income was comprised primarily of a \$39.2 million increase in interest income from loans and a \$10.3 million increase in interest income from investment securities.

Increased interest income from loans was attributable to a \$3.8 billion increase in the average balance outstanding partially offset by a 0.24% decrease in the tax-equivalent yield to 5.03% for the three months ended September 30, 2016 from 5.27% for the three months ended September 30, 2015. Offsetting factors contributing to the overall

decline in the yield on loans included:

New loans originated at lower market rates of interest comprised a greater percentage of the portfolio for the three months ended September 30, 2016 than for 2015. New loans represented 96.0% of the average balance of loans outstanding for the three months ended September 30, 2016 compared to 93.4% for the three months ended September

46

Table of Contents

30, 2015. We expect the impact of growth of the new loan portfolio to lead to further declines in the overall yield on loans.

The tax-equivalent yield on new loans increased to 3.53% for the three months ended September 30, 2016, compared to 3.48% for the three months ended September 30, 2015.

Tax-equivalent interest income on loans acquired in the FSB Acquisition totaled \$76.2 million and \$74.2 million for the three months ended September 30, 2016 and 2015, respectively. The tax-equivalent yield on those loans increased to 40.69% for the three months ended September 30, 2016 from 30.75% for the three months ended September 30, 2015. The increase in the yield on loans acquired in the FSB Acquisition resulted primarily from improvements in expected cash flows for ACI loans.

The average balance of investment securities increased by \$1.1 billion for the three months ended September 30, 2016 from the comparable period in 2015 while the tax-equivalent yield increased to 2.87% for the three months ended September 30, 2016 from 2.65% for three months ended September 30, 2015. The increase in tax-equivalent yield reflects (i) changes in portfolio composition, including growth in the municipal portfolio, (ii) resetting of rates on floating-rate securities following the FRB's interest rate increase in the fourth quarter of 2015 and (iii) net purchases of securities with wider spreads.

The components of the increase in interest expense for the three months ended September 30, 2016 as compared to the three months ended September 30, 2015 were a \$7.0 million increase in interest expense on deposits, a \$1.3 million increase in interest expense on FHLB advances and a \$5.0 million increase in interest expense on notes and other borrowings.

The most significant factor contributing to the increase in interest expense on deposits was an increase of \$2.5 billion in average interest bearing deposits. The average cost of interest bearing deposits increased to 0.80% for the three months ended September 30, 2016 from 0.74% for the three months ended September 30, 2015. This increase reflected increases in the cost of interest bearing demand deposits and in savings and money market deposits of 0.17% and 0.06%, respectively. These increases were generally driven by growth of deposits in competitive markets.

The increase in interest expense on FHLB advances was driven by an increase in the average balance of \$1.3 billion, partially offset by a decrease in the average rate paid on these borrowings. The average rate paid on FHLB advances decreased to 0.92% for the three months ended September 30, 2016 from 1.09% for the three months ended September 30, 2015. The increase in interest expense on notes and other borrowings was the result of the issuance of \$400 million in senior notes in November 2015.

The net interest margin, calculated on a tax-equivalent basis, for the three months ended September 30, 2016 was 3.69% as compared to 3.88% for the three months ended September 30, 2015. The interest rate spread decreased to 3.53% for the three months ended September 30, 2016 from 3.74% for the three months ended September 30, 2015. The declines in net interest margin and interest rate spread resulted primarily from lower yields on loans and the cost of the senior notes, as discussed above. We expect the net interest margin and interest rate spread to continue to decline, although at a decreasing rate, as new loans originated at lower current market rates of interest continue to grow and higher yielding loans acquired in the FSB Acquisition are collected or resolved.

Nine months ended September 30, 2016 compared to nine months ended September 30, 2015

Net interest income, calculated on a tax-equivalent basis, was \$667.1 million for the nine months ended September 30, 2016 compared to \$556.6 million for the nine months ended September 30, 2015, an increase of \$110.6 million. The increase in net interest income was comprised of an increase in tax-equivalent interest income of \$153.2 million, offset by an increase in interest expense of \$42.6 million.

The increase in tax-equivalent interest income was comprised primarily of a \$122.3 million increase in interest income from loans and a \$29.4 million increase in interest income from investment securities.

Increased interest income from loans was attributable to a \$3.9 billion increase in the average balance outstanding partially offset by a 0.28% decrease in the tax-equivalent yield to 5.14% for the nine months ended September 30, 2016 from 5.42% for the nine months ended September 30, 2015.

The average balance of investment securities increased by \$920 million for the nine months ended September 30, 2016 from the comparable period in 2015 while the tax-equivalent yield increased to 2.82% for the nine months ended

September 30, 2016 from 2.54% for nine months ended September 30, 2015.

The components of the increase in interest expense for the nine months ended September 30, 2016 as compared to the nine months ended September 30, 2015 were a \$20.6 million increase in interest expense on deposits, a \$7.0 million increase in

Table of Contents

interest expense on FHLB advances and a \$15.0 million increase in interest expense on notes and other borrowings, reflecting the senior notes issued in November 2015.

The most significant factor contributing to the increase in interest expense on deposits was an increase of \$2.8 billion in average interest bearing deposits. The average cost of interest bearing deposits increased by 0.04% to 0.78% for the nine months ended September 30, 2016 from 0.74% for the nine months ended September 30, 2015. This increase reflected increases in the cost of interest bearing demand deposits and in savings and money market deposits of 0.15% and 0.07%, respectively.

The increase in interest expense on FHLB advances was driven by an increase in the average balance of \$1.1 billion, partially offset by a decrease in the average rate paid on these borrowings. The average rate paid on FHLB advances decreased by 0.05% to 1.02% for the nine months ended September 30, 2016 from 1.07% for the nine months ended September 30, 2015.

The net interest margin, calculated on a tax-equivalent basis, for the nine months ended September 30, 2016 was 3.75% as compared to 3.95% for the nine months ended September 30, 2015. The interest rate spread decreased to 3.60% for the nine months ended September 30, 2016 from 3.81% for the nine months ended September 30, 2015. Factors contributing to these changes in yields, costs, the net interest margin and the interest rate spread were consistent with those for the three month periods discussed above.

Provision for Loan Losses

The provision for loan losses is the amount of expense that, based on our judgment, is required to maintain the ALLL at an adequate level to absorb probable losses inherent in the loan portfolio at the balance sheet date and that, in management's judgment, is appropriate under GAAP. The determination of the amount of the ALLL is complex and involves a high degree of judgment and subjectivity. Our determination of the amount of the allowance and corresponding provision for loan losses considers ongoing evaluations of the credit quality of and level of credit risk inherent in various segments of the loan portfolio and of individually significant credits, levels of non-performing loans and charge-offs, historical and statistical trends and economic and other relevant factors. See "Analysis of the Allowance for Loan and Lease Losses" below for more information about how we determine the appropriate level of the allowance.

For the three months ended September 30, 2016 and 2015, we recorded provisions for loan losses of \$24.9 million and \$16.7 million, respectively, related to new loans. For the nine months ended September 30, 2016 and 2015, we recorded provisions for loan losses of \$43.6 million and \$33.7 million, respectively, related to new loans. The amount of the provision is impacted by loan growth, portfolio mix, historical loss rates, the level of charge-offs and specific reserves for impaired loans, and management's evaluation of qualitative factors in the determination of general reserves.

The most significant factors contributing to the increase in the provision for loan losses for the quarter ended September 30, 2016 compared to the quarter ended September 30, 2015 were an increase in qualitative reserves and an increase in reserves related to the taxi medallion portfolio. The increase in the provision for loan losses for the nine months ended September 30, 2016 as compared to the nine months ended September 30, 2015 was driven primarily by an increase in reserves related to the taxi medallion portfolio. See the section entitled "Analysis of the Allowance for Loan and Lease Losses" below for further discussion.

An ALLL is established related to ACI loans when quarterly evaluations of expected cash flows indicate it is probable that the Company will be unable to collect all of the cash flows expected at acquisition plus any additional cash flows expected to be collected arising from changes in estimate after acquisition. An allowance for non-ACI loans is established if factors considered relevant by management indicate that additional losses have arisen on non-ACI loans subsequent to the FSB Acquisition.

As discussed below in the section entitled "Non-interest income," the impact on our results of operations of any provision for (recovery of) loan losses on covered loans is significantly mitigated by the corresponding impact on the FDIC indemnification asset, recorded in non-interest income.

Non-Interest Income

The Company reported non-interest income of \$25.1 million and \$31.2 million for the three months ended September 30, 2016 and 2015, respectively. Non-interest income was \$77.1 million and \$73.0 million for the nine months ended

September 30, 2016 and 2015, respectively. Although the amounts have declined in amount and as a percent of total non-interest income, a significant portion of our non-interest income has historically related to transactions in the covered assets. We have broken out the significant categories of non-interest income that relate to covered assets in the table below, to assist in the comparison of the amount and composition of our non-interest income with that of other financial institutions.

48

Table of Contents

The following table presents a comparison of the categories of non-interest income for the periods indicated (in thousands):

	Three Months		Nine Months	
	Ended September 30,		Ended September 30,	
	2016	2015	2016	2015
Income from resolution of covered assets, net	\$8,883	\$12,364	\$26,426	\$41,261
Net gain (loss) on FDIC indemnification	993	(15,988)	(9,410)	(53,024)
Gain (loss) on sale of covered loans, net	(10,033)	9,288	(14,895)	26,711
Mortgage insurance income, modification incentives and expenses reimbursed, net	371	592	623	3,152
Non-interest income related to the covered assets	214	6,256	2,744	18,100
Service charges and fees	5,171	4,637	14,529	13,580
Gain on sale of non-covered loans	2,086	2,013	7,535	2,979
Gain on investment securities available for sale, net	3,008	2,343	10,065	5,493
Lease financing	11,188	12,673	32,762	25,954
Other non-interest income	3,408	3,251	9,495	6,866
	\$25,075	\$31,173	\$77,130	\$72,972

Non-interest income related to transactions in the covered assets

The consolidated financial statements reflect the impact of gains or losses arising from transactions in the covered assets. The balance of the FDIC indemnification asset is reduced or increased as a result of decreases or increases in cash flows expected to be received from the FDIC related to these gains or losses. When these transaction gains or losses are recorded, we also record an offsetting amount in the consolidated statement of income line item "Net gain (loss) on FDIC indemnification." This line item includes the significantly mitigating impact of FDIC indemnification related to the following types of transactions in covered assets:

- gains or losses from the resolution of covered assets;
- provisions for (recoveries of) losses on covered loans;
- gains or losses on the sale of covered loans; and
- gains or losses on covered OREO.

Each of these types of transactions is discussed further below.

Covered loans may be resolved through prepayment, short sale of the underlying collateral, foreclosure, sale of the loans or charge-off. For loans resolved through prepayment, short sale or foreclosure, the difference between consideration received in resolution of the loans and the carrying value of the loans is recorded in the consolidated statement of income line item "Income from resolution of covered assets, net." Both gains and losses on individual resolutions are included in this line item. Losses from the resolution of covered loans increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the Loss Sharing Agreements. These additions to or reductions in amounts recoverable from the FDIC related to the resolution of covered loans are recorded in non-interest income in the line item "Net gain (loss) on FDIC indemnification" and reflected as corresponding increases or decreases in the FDIC indemnification asset. The amount of income or loss recorded in any period will be impacted by the amount of covered loans resolved, the amount of consideration received, and our ability to accurately project cash flows from ACI loans in future periods.

Table of Contents

The following table provides further detail of the components of income from resolution of covered assets, net, for the periods indicated (in thousands):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Payments in full	\$9,371	\$12,052	\$26,790	\$37,636
Foreclosures	(5)	205	169	466
Short sales	(406)	39	(540)	241
Charge-offs	(134)	(47)	(208)	(488)
Recoveries	57	115	215	3,406
Income from resolution of covered assets, net	\$8,883	\$12,364	\$26,426	\$41,261

The decrease in income for the three and nine months ended September 30, 2016 compared to the same periods in 2015 resulted primarily from decreases in income from residential paid in full resolutions. In addition, there was a decrease in recoveries on commercial loans for the nine months ended September 30, 2016 compared to the same period in 2015.

The decreases in income from payments in full for the three and nine months ended September 30, 2016 compared to the three and nine months ended September 30, 2015 reflected decreases in the number of resolutions and in average income per resolution. Average income per resolution declined in part due to updated cash flow forecasts, reflecting additional history with the performance of covered loans driving continued decreases in non-accretable difference. Under the terms of the Purchase and Assumption Agreement with the FDIC, the Bank may sell up to 2.5% of the covered loans based on UPB at the date of the FSB Acquisition, or approximately \$280 million, on an annual basis without prior consent of the FDIC. Any losses incurred from such loan sales are covered under the Single Family Shared-Loss Agreement. Any loan sale in excess of this stipulated annual threshold requires approval from the FDIC to be eligible for loss share coverage. However, if the Bank seeks to sell covered loans in excess of the 2.5% threshold in the nine months prior to the stated termination date of loss share coverage (May 21, 2019 for covered residential loans) and the FDIC refuses to consent, the Single Family Shared-Loss Agreement will be extended for two additional years with respect to the loans requested to be included in such sales. The Bank will then have the right to sell all or any portion of such loans without FDIC consent at any time within the nine months prior to the extended termination date, and any losses incurred will be covered under the Single Family Shared-Loss Agreement. This final sale mechanism, if exercised, ensures no residual credit risk in our covered loan portfolio that would otherwise arise from credit losses occurring after the termination date of the Single Family Shared-Loss Agreement.

The following table summarizes the impact of the sale of covered loans for the periods indicated (in thousands):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Gain (loss) on sale of covered loans	\$(10,033)	\$9,288	\$(14,895)	\$26,711
Net gain (loss) on FDIC indemnification	8,026	(7,430)	11,958	(21,476)
Net impact on pre-tax earnings	\$(2,007)	\$1,858	\$(2,937)	\$5,235

Pricing received on the sale of covered loans may vary based on (i) market conditions, including the interest rate environment, the amount of capital seeking investment and the secondary supply of loans with a particular performance history or collateral type, (ii) the type and quality of collateral, (iii) the performance history of loans included in the sale and (iv) whether or not the loans have been modified. The decline in results of these sales for the three and nine months ended September 30, 2016 from the comparable periods in 2015 related primarily to the characteristics of the loans sold and the dynamics of secondary market demand for these assets. We anticipate that we will continue to exercise our right to sell covered loans on a quarterly basis in the future.

Additional impairment arising since the FSB Acquisition related to covered loans is recorded in earnings through the provision for losses on covered loans. Under the terms of the Loss Sharing Agreements, the Company is entitled to

recover from the FDIC a portion of losses on these loans; therefore, the discounted amount of additional expected cash flows from the FDIC related to these losses is recorded in non-interest income in the line item “Net gain (loss) on FDIC indemnification” and reflected as a corresponding increase in the FDIC indemnification asset. Alternatively, a recovery of the provision for loan losses related to covered loans results in a reduction in the amounts the Company expects to recover from the FDIC and a

Table of Contents

corresponding reduction in the FDIC indemnification asset and in non-interest income, reflected in the line item "Net gain (loss) on FDIC indemnification."

The Company records impairment charges related to declines in the net realizable value of OREO properties subject to the Loss Sharing Agreements and recognizes additional gains or losses upon the eventual sale of such OREO properties. These amounts are included in other non-interest expense in the consolidated financial statements. The estimated increase or reduction in amounts recoverable from the FDIC with respect to these gains and losses is reflected as an increase or decrease in the FDIC indemnification asset and in non-interest income in the line item "Net gain (loss) on FDIC indemnification."

The following tables summarize the components of the gains and losses associated with covered assets, along with the related additions to or reductions in the amounts recoverable from the FDIC under the Loss Sharing Agreements, as reflected in the consolidated statements of income for the periods indicated (in thousands):

	Three Months Ended September 30,					
	2016			2015		
	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings
Recovery of (provision for) losses on covered loans ⁽¹⁾	\$460	\$ (368)	\$ 92	\$(1,108)	\$ 886	\$ (222)
Income from resolution of covered assets, net	8,883	(7,106)	1,777	12,364	(9,839)	2,525
Gain (loss) on sale of covered loans	(10,033)	8,026	(2,007)	9,288	(7,430)	1,858
Loss on covered OREO	(552)	441	(111)	(493)	395	(98)
	\$(1,242)	\$ 993	\$ (249)	\$20,051	\$ (15,988)	\$ 4,063
	Nine Months Ended September 30,					
	2016			2015		
	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings	Transaction Income (Loss)	Net Loss on FDIC Indemnification	Net Impact on Pre-tax Earnings
Recovery of (provision for) losses on covered loans ⁽¹⁾	\$1,261	\$ (1,007)	\$ 254	\$(601)	\$ 506	\$ (95)
Income from resolution of covered assets, net	26,426	(21,140)	5,286	41,261	(32,870)	8,391
Gain (loss) on sale of covered loans	(14,895)	11,958	(2,937)	26,711	(21,476)	5,235
Loss on covered OREO	(957)	779	(178)	(1,186)	816	(370)
	\$11,835	\$ (9,410)	\$ 2,425	\$66,185	\$ (53,024)	\$ 13,161

Transaction income (loss) includes recoveries of \$15 thousand, \$143 thousand and \$66 thousand, respectively, for the three and nine months ended September 30, 2016 and the nine months ended September 30, 2015 and a provision of \$35 thousand for the three months ended September 30, 2015 related to unfunded loan commitments included in other non-interest expense in the accompanying consolidated statements of income.

Other components of non-interest income

The increase in gain on sale of non-covered loans for the nine months ended September 30, 2016 compared to the corresponding period in 2015 related primarily to increased gains of \$5.0 million on sales of loans by SBF. SBF was acquired by the Company in May 2015.

Gains on investment securities available for sale for the three and nine months ended September 30, 2016 and 2015 related to sales of securities in the normal course of managing liquidity, portfolio duration and yield.

Income from lease financing amounted to \$11.2 million and \$32.8 million for the three and nine months ended September 30, 2016, respectively, compared to \$12.7 million and \$26.0 million for the three and nine months ended September 30, 2015, respectively. The quarter and nine month periods ended September 30, 2015 included \$3.9 million in gains on sale of leased equipment; such gains were not significant for the quarter and nine month period

ended September 30, 2016. Increased rental

51

Table of Contents

revenue corresponding to growth in the operating lease portfolio for the nine months ended September 30, 2016 more than offset the decrease in gains on sale of equipment.

Non-Interest Expense

The following table presents the components of non-interest expense for the periods indicated (in thousands):

	Three Months		Nine Months Ended	
	Ended September 30,		September 30,	
	2016	2015	2016	2015
Employee compensation and benefits	\$55,162	\$55,316	\$166,374	\$156,640
Occupancy and equipment	18,488	19,103	56,263	56,207
Amortization of FDIC indemnification asset	38,957	28,409	116,711	76,874
Deposit insurance expense	4,943	3,615	12,866	9,696
Professional fees	3,884	4,095	10,119	10,073
Telecommunications and data processing	3,746	3,451	10,800	10,267
Depreciation of equipment under operating lease	6,855	5,012	20,004	12,522
Other non-interest expense	15,969	13,268	41,087	37,582
	\$148,004	\$132,269	\$434,224	\$369,861

Annualized non-interest expense as a percentage of average assets was 2.2% and 2.4% for the three months ended September 30, 2016 and 2015, respectively, and 2.3% and 2.4% for the nine months ended September 30, 2016 and 2015, respectively. Excluding amortization of the FDIC indemnification asset, annualized non-interest expense as a percentage of average assets was 1.6% and 1.9% for the three months ended September 30, 2016 and 2015, respectively, and 1.7% and 1.9% for the nine months ended September 30, 2016 and 2015, respectively. The more significant changes in the components of non-interest expense are discussed below.

Employee compensation and benefits

As is typical for financial institutions, employee compensation and benefits represents the single largest component of recurring non-interest expense. Employee compensation and benefits for the three and nine months ended September 30, 2016 decreased by \$0.2 million and increased by \$9.7 million, respectively, as compared to the corresponding periods in 2015. The increase for the nine months ended September 30, 2016 primarily reflected general increases in compensation, including the impact of annual pay raises.

Amortization of FDIC indemnification asset

Amortization of FDIC indemnification asset totaled \$39.0 million and \$116.7 million, respectively, for the three and nine months ended September 30, 2016 compared to \$28.4 million and \$76.9 million, respectively, for the three and nine months ended September 30, 2015.

The FDIC indemnification asset was initially recorded at its estimated fair value of \$3.4 billion, representing the present value of estimated future cash payments from the FDIC for probable losses on covered assets. As projected cash flows from the ACI loans have increased, the yield on the loans has increased accordingly and the estimated future cash payments from the FDIC have decreased. This change in estimated cash flows is recognized prospectively, consistent with the recognition of the increased cash flows from the ACI loans. As a result, the FDIC indemnification asset is being amortized to the amount of the estimated future cash flows. For the three and nine months ended September 30, 2016, the average rate at which the FDIC indemnification asset was amortized was 25.36% and 23.48%, respectively, compared to 13.49% and 11.52%, respectively, during the comparable periods in 2015.

The rate of amortization will increase if estimated future cash payments from the FDIC decrease. The amount of amortization is impacted by both the change in the amortization rate and the decrease in the average balance of the indemnification asset. As we continue to submit claims under the Loss Sharing Agreements and recognize periodic amortization, the balance of the indemnification asset will continue to decline.

See Note 5 to the consolidated financial statements for a rollforward of the FDIC indemnification asset for the nine months ended September 30, 2016 and the year ended December 31, 2015. Subsequent to the termination of loss sharing under the Commercial Shared-Loss Agreement in 2014, the entire balance of the FDIC indemnification asset relates to residential loans

Table of Contents

and OREO covered under the Single Family Shared-Loss Agreement. The following table presents the carrying value of the FDIC indemnification asset and the estimated future cash flows at the dates indicated (in thousands):

	September 30, December	
	2016	31, 2015
FDIC indemnification asset	\$ 582,931	\$ 739,880
Less expected amortization	(267,703)	(342,317)
Amount expected to be collected from the FDIC	\$ 315,228	\$ 397,563

The amount of expected amortization reflects the impact of improvements in cash flows expected to be collected from the covered loans, as well as the impact of time value resulting from the discounting of the asset when it was initially established. This amount will be amortized to non-interest expense using the effective interest method over the period during which cash flows from the FDIC are expected to be collected, which is limited to the lesser of the contractual term of the Single Family Shared-Loss Agreement and the expected remaining life of the indemnified assets.

Deposit insurance expense

Deposit insurance expense increased by \$1.3 million and \$3.2 million for the three and nine months ended September 30, 2016 as compared to the corresponding periods in 2015. These increases primarily reflect the growth of the balance sheet and, beginning in the third quarter of 2016, the large bank surcharge imposed by the FDIC.

Depreciation of equipment under operating lease

Depreciation of equipment under operating lease increased by \$1.8 million and \$7.5 million for the three and nine months ended September 30, 2016 as compared to the corresponding periods in 2015. These increases are consistent with the growth of the portfolio of equipment under operating lease.

Other non-interest expense

The most significant components of other non-interest expense are advertising and promotion, costs related to lending activities and deposit generation, insurance, travel and general office expense. Non-interest expense for the quarter and nine months ended September 30, 2016 was impacted by an increase in litigation accruals of \$2.1 million and a \$1.1 million settlement related to a payroll tax audit.

Income Taxes

The Company's effective tax rate was 31.7% and 33.2% for the three and nine months ended September 30, 2016, respectively, compared to (46.1)% and 7.6% for the three and nine months ended September 30, 2015, respectively. Components included in the reconciliation of the Company's effective income tax rate to the statutory federal tax rate of 35.0% included the effect of state income taxes and the impact of income not subject to federal tax for each of the periods presented. The effective income tax rate for the three and nine months ended September 30, 2015 also reflects a discrete income tax benefit of \$49.3 million. The tax benefit, predicated on guidance issued by the IRS in 2015, relates to the Company's ability to claim additional tax basis in certain assets acquired in the FSB Acquisition. In addition, \$5.9 million of reserves for uncertain tax liabilities were released in the three months ended September 30, 2015, due to the lapse of the statute of limitations related thereto.

Analysis of Financial Condition

Average interest-earning assets increased \$4.9 billion to \$23.7 billion for the nine months ended September 30, 2016 from \$18.8 billion for the nine months ended September 30, 2015. This increase was driven by a \$3.9 billion increase in the average balance of outstanding loans and a \$920 million increase in the average balance of investment securities. The increase in average loans reflected growth of \$4.1 billion in average new loans outstanding, partially offset by a \$234 million decrease in the average balance of loans acquired in the FSB Acquisition. Average non-interest earning assets remained relatively consistent period over period, reflecting a decrease in the FDIC indemnification asset and offsetting increases in equipment under operating lease, net and other assets. Growth of the new loan and lease portfolio, resolution of covered loans and declines in the amount of the FDIC indemnification asset are trends that are expected to continue.

Average interest bearing liabilities increased \$4.3 billion to \$19.8 billion for the nine months ended September 30, 2016 from \$15.6 billion for the nine months ended September 30, 2015, due to an increase of \$2.8 billion in average interest bearing

Table of Contents

deposits, a \$1.1 billion increase in average FHLB advances and a \$392 million increase in average notes and other borrowings. Average non-interest bearing deposits increased by \$246 million.

Average stockholders' equity increased by \$180 million, due primarily to the retention of earnings.

Investment Securities Available for Sale

The following table shows the amortized cost and fair value of investment securities available for sale as of the dates indicated (in thousands):

	September 30, 2016		December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
U.S. Treasury securities	\$4,999	\$5,011	\$4,997	\$4,997
U.S. Government agency and sponsored enterprise residential MBS	1,374,414	1,392,471	1,167,197	1,178,318
U.S. Government agency and sponsored enterprise commercial MBS	147,141	151,077	95,997	96,814
Re-Remics	49,130	49,742	88,658	89,691
Private label residential MBS and CMOs	426,784	475,835	502,723	544,612
Private label commercial MBS	1,279,911	1,297,436	1,219,355	1,218,740
Single family rental real estate-backed securities	778,878	786,701	646,156	636,705
Collateralized loan obligations	487,664	486,572	309,615	306,877
Non-mortgage asset-backed securities	190,020	193,082	54,981	56,500
Preferred stocks	66,217	73,731	75,742	83,209
State and municipal obligations	494,607	525,269	351,456	361,753
SBA securities	497,731	503,350	270,553	273,336
Other debt securities	3,963	7,784	3,854	7,987
	\$5,801,459	\$5,948,061	\$4,791,284	\$4,859,539

Our investment strategy has focused on providing liquidity necessary for day-to-day operations, adding a suitable balance of high credit quality, diversifying assets to the consolidated balance sheet, managing interest rate risk, and generating acceptable returns given our established risk parameters. We have sought to maintain liquidity by investing a significant portion of the portfolio in high quality liquid securities including U.S. Treasury securities, SBA securities and U.S. Government agency MBS. Investment grade municipal securities provide liquidity along with higher tax-equivalent yields at longer durations than the portfolio in general. We have also invested in highly rated structured products that, while somewhat less liquid, provide us with attractive yields. Relatively short effective portfolio duration helps mitigate interest rate risk arising from the currently low level of market interest rates. The weighted average expected life of the investment portfolio as of September 30, 2016 was 4.9 years and the effective duration was 1.5 years.

Regulations implementing the Volcker Rule were approved in December 2013. Among other provisions, the regulations generally serve to prohibit us from holding an ownership interest in a covered fund, as such terms are defined in the regulations. There are Re-Remic securities in our portfolio that we believe are likely to be deemed impermissible investments under the regulations. At September 30, 2016, we held Re-Remics with a carrying value of \$50 million, the substantial majority of which were in unrealized gain positions. The Re-Remics are an amortizing portfolio and we estimate that their carrying value will be significantly reduced through normal amortization and prepayments prior to the required compliance date. We must be in compliance with the regulations implementing the Volcker Rule by July 2017 as it pertains to legacy covered funds, as defined.

Table of Contents

The following table shows the scheduled maturities, carrying values and current yields for investment securities available for sale as of September 30, 2016. Scheduled maturities have been adjusted for anticipated prepayments of MBS and other pass through securities. Yields on tax-exempt securities have been calculated on a tax-equivalent basis (dollars in thousands):

	Within One Year		After One Year Through Five Years		After Five Years Through Ten Years		After Ten Years		Total	
	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield
U.S. Treasury securities	\$—	— %	\$5,011	0.92 %	\$—	— %	\$—	— %	\$5,011	0.92 %

sale

\$5,948,061 2.96 %

The available for sale investment securities portfolio was in a net unrealized gain position of \$147 million at September 30, 2016 with aggregate fair value equal to 102.5% of amortized cost. Net unrealized gains included \$152 million of gross unrealized gains and \$5 million of gross unrealized losses. Investment securities available for sale in an unrealized loss position at September 30, 2016 had an aggregate fair value of \$906 million. At September 30, 2016, 91.1% of investment securities available for sale were backed by the U.S. Government, U.S. Government agencies or sponsored enterprises or were rated AAA or AA, based on the most recent third-party ratings. Investment securities available for sale totaling \$78 million were rated below investment grade or not rated at September 30, 2016, all of which were acquired in the FSB Acquisition and in unrealized gain positions at September 30, 2016.

We evaluate the credit quality of individual securities in the portfolio quarterly to determine whether any of the investments in unrealized loss positions are other-than-temporarily impaired. This evaluation considers, but is not necessarily limited to, the following factors, the relative significance of which varies depending on the circumstances pertinent to each individual security:

- our intent to hold the security until maturity or for a period of time sufficient for a recovery in value;
- whether it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis;
- the length of time and extent to which fair value has been less than amortized cost;
- adverse changes in expected cash flows;
- collateral values and performance;
- the payment structure of the security, including levels of subordination or over-collateralization;
- changes in the economic or regulatory environment;
- the general market condition of the geographic area or industry of the issuer;
- the issuer's financial condition, performance and business prospects; and

Table of Contents

changes in credit ratings.

The Company recognized OTTI in the amount of \$463 thousand on two positions in one private label commercial MBS security, which was determined to be other-than-temporarily impaired during the three and nine months ended September 30, 2016. This security was in an unrealized loss position at September 30, 2016 and the Company intended to sell the security before recovery of the amortized cost basis. No securities were determined to be other-than-temporarily impaired at September 30, 2015, or during the three and nine months then ended.

We do not intend to sell any other securities in significant unrealized loss positions at September 30, 2016. Based on an assessment of our liquidity position and internal and regulatory guidelines for permissible investments and concentrations, it is not more likely than not that we will be required to sell securities in significant unrealized loss positions prior to recovery of amortized cost basis. The severity of impairment of individual securities in the portfolio is generally not material. Unrealized losses in the portfolio at September 30, 2016 were primarily attributable to widening credit spreads and, for certain securities, increased extension risk.

The timely repayment of principal and interest on U.S. Government agency and sponsored enterprise securities in unrealized loss positions is explicitly or implicitly guaranteed by the full faith and credit of the U.S. Government. Management performed projected cash flow analyses of the private label residential MBS and CMOs and private label commercial MBS in unrealized loss positions, incorporating CUSIP level assumptions consistent with the collateral characteristics of each security including collateral default rate, voluntary prepayment rate, severity and delinquency assumptions. Based on the results of this analysis, no credit losses were projected. Management's analysis of the credit characteristics of individual securities and the underlying collateral and levels of subordination for each of the single family rental real estate-backed securities and collateralized loan obligations in unrealized loss positions is not indicative of projected credit losses.

For further discussion of our analysis of investment securities for OTTI, see Note 3 to the consolidated financial statements.

We use third-party pricing services to assist us in estimating the fair value of investment securities. We perform a variety of procedures to ensure that we have a thorough understanding of the methodologies and assumptions used by the pricing services including obtaining and reviewing written documentation of the methods and assumptions employed, conducting interviews with valuation desk personnel and reviewing model results and detailed assumptions used to value selected securities as considered necessary. Our classification of prices within the fair value hierarchy is based on an evaluation of the nature of the significant assumptions impacting the valuation of each type of security in the portfolio. We have established a robust price challenge process that includes a review by our treasury front office of all prices provided on a monthly basis. Any price evidencing unexpected month over month fluctuations or deviations from our expectations based on recent observed trading activity and other information available in the marketplace that would impact the value of the security is challenged. Responses to the price challenges, which generally include specific information about inputs and assumptions incorporated in the valuation and their sources, are reviewed in detail. If considered necessary to resolve any discrepancies, a price will be obtained from an additional independent valuation specialist. We do not typically adjust the prices provided, other than through this established challenge process. Our primary pricing services utilize observable inputs when available, and employ unobservable inputs and proprietary models only when observable inputs are not available. As a matter of course, the services validate prices by comparison to recent trading activity whenever such activity exists. Quotes obtained from the pricing services are typically non-binding.

We have also established a quarterly price validation process to assess the propriety of the pricing methodologies utilized by our primary pricing services by independently verifying the prices of a sample of securities in the portfolio. Sample sizes vary based on the type of security being priced, with higher sample sizes applied to more difficult to value security types. Verification procedures may consist of obtaining prices from an additional outside source or internal modeling, generally based on Intex. We have established acceptable percentage deviations from the price provided by the initial pricing source. If deviations fall outside the established parameters, we will obtain and evaluate more detailed information about the assumptions and inputs used by each pricing source or, if considered necessary, employ an additional valuation specialist to price the security in question. Pricing issues identified through this evaluation are addressed with the applicable pricing service and methodologies or inputs are revised as determined

necessary, Depending on the results of the validation process, sample sizes may be extended for particular classes of securities. Results of the validation process are reviewed by the treasury front office and by senior management. The majority of our investment securities are classified within level 2 of the fair value hierarchy. U.S. Treasury securities and certain preferred stocks are classified within level 1 of the hierarchy. At September 30, 2016 and December 31, 2015, 2.2% and 3.0%, respectively, of our investment securities were classified within level 3 of the fair value hierarchy. Securities classified within level 3 of the hierarchy at September 30, 2016 included certain private label residential MBS and trust preferred securities. These securities were classified within level 3 of the hierarchy because proprietary assumptions related to

Table of Contents

voluntary prepayment rates, default probabilities, loss severities and discount rates were considered significant to the valuation. There were no transfers of investment securities between levels of the fair value hierarchy during the nine months ended September 30, 2016 and 2015.

For additional discussion of the fair values of investment securities, see Note 10 to the consolidated financial statements.

Loans Held for Sale

Loans held for sale at September 30, 2016 included \$42.4 million of commercial loans originated by SBF with the intent to sell in the secondary market. Commercial loans held for sale are comprised of the portion of loans guaranteed by U.S. government agencies. Loans are generally sold with servicing retained. Servicing activity did not have a material impact on the results of operations for the three and nine months ended September 30, 2016 and 2015. We anticipate growth in loan sales and servicing and related revenue from SBF in the future.

Total loans, including premiums, discounts and deferred fees and costs, increased by \$2.4 billion to \$19.0 billion at September 30, 2016, from \$16.6 billion at December 31, 2015. New loans grew by \$2.6 billion while loans acquired in the FSB Acquisition declined by \$160 million from December 31, 2015 to September 30, 2016. New residential loans grew by \$428 million and new commercial loans grew by \$2.1 billion during the nine months ended September 30, 2016.

Growth in new loans, including premiums, discounts and deferred fees and costs, for the nine months ended September 30, 2016 included \$809 million for the Florida franchise, \$772 million for the New York franchise and \$985 million for the national platforms.

Residential Mortgages

Residential mortgages totaled \$4.0 billion, or 21.0% of total loans and \$3.7 billion, or 22.3% of total loans at September 30, 2016 and December 31, 2015, respectively.

The new residential loan portfolio is primarily comprised of loans purchased on a national basis through established correspondent channels. The portfolio also includes loans originated through retail channels in our Florida and New York geographic footprint. In January 2016, we terminated our retail residential mortgage origination business. New residential mortgage loans are primarily closed-end, first lien jumbo mortgages for the purchase or re-finance of owner occupied property. The loans have terms ranging from 10 to 30 years, with either fixed or adjustable interest rates. At September 30, 2016, 32.8% of the new residential loan portfolio were fixed rate loans. The ARM portfolio included 5/1, 7/1 and 10/1 ARMs. At September 30, 2016, \$148 million or 4.4% of new residential mortgage loans were interest-only loans, substantially all of which begin amortizing 10 years after origination.

Home equity loans and lines of credit are not significant to the new loan portfolio.

We do not originate or acquire option ARMs, “no-doc” or “reduced-doc” mortgages and do not utilize wholesale mortgage origination channels although the covered loan portfolio contains loans with these characteristics. The Company’s exposure to future losses on these mortgage loans is mitigated by the Single Family Shared-Loss Agreement.

Table of Contents

The geographic concentration of the new 1-4 single family residential portfolio is summarized as follows at the dates indicated (dollar in thousands):

	September 30, 2016		December 31, 2015	
California	\$896,481	26.7 %	\$948,301	32.4 %
New York	726,600	21.7 %	548,181	18.7 %
Florida	478,756	14.3 %	422,638	14.5 %
Virginia	135,724	4.0 %	84,709	3.0 %
Others ⁽¹⁾	1,114,266	33.3 %	920,792	31.4 %
	\$3,351,827	100.0 %	\$2,924,621	100.0 %

(1) No other state represented borrowers with more than 4.0% of 1-4 single family residential loans outstanding at September 30, 2016 or December 31, 2015.

Commercial loans

The commercial portfolio segment includes loans secured by multi-family properties, loans secured by both owner-occupied and non-owner occupied commercial real estate, construction loans, land loans, commercial and industrial loans and direct financing leases.

Management's loan origination strategy is heavily focused on the commercial portfolio segment, which comprised 81.7% and 81.4% of new loans as of September 30, 2016 and December 31, 2015, respectively.

Commercial real estate loans include term loans secured by owner and non-owner occupied income producing properties including rental apartments, mixed-use properties, industrial properties, retail shopping centers, free-standing single-tenant buildings, office buildings, warehouse facilities and hotels as well as real estate secured lines of credit. Loans secured by commercial real estate typically have shorter repayment periods and re-price more frequently than 1-4 single family residential loans but may have longer terms and re-price less frequently than commercial and industrial loans. The Company's underwriting standards generally provide for loan terms of five to ten years, with amortization schedules of no more than thirty years. LTV ratios are typically limited to no more than 80%. In addition, the Company usually obtains personal guarantees or carve-out guarantees of the principals as an additional enhancement for commercial real estate loans. Owner-occupied commercial real estate loans typically have risk profiles more closely aligned with that of commercial and industrial loans than with other types of commercial real estate loans. Construction and land loans represented only 1.5% of the total loan portfolio at September 30, 2016. Construction and land loans are generally made for projects expected to stabilize within eighteen months of completion in submarkets with strong fundamentals and, to a lesser extent, for-sale residential projects to experienced developers with a strong cushion between market prices and loan basis. At September 30, 2016, the recorded investment in construction loans with available interest reserves totaled \$89 million; the amount of available interest reserves totaled \$1 million. All of these loans were rated "pass" at September 30, 2016.

Commercial and industrial loans are typically made to small and middle market businesses and include equipment loans and leases, secured and unsecured working capital facilities, formula-based loans, mortgage warehouse lines, taxi medallion loans, lease financing, SBA product offerings and business acquisition finance credit facilities. These loans may be structured as term loans, typically with maturities of three to seven years, or revolving lines of credit which may have multi-year maturities. Commercial loans include shared national credits totaling \$1.1 billion at September 30, 2016, typically relationship based loans to borrowers in our geographic footprint.

Through its commercial lending subsidiaries, Pinnacle and Bridge, the Bank provides equipment and franchise financing on a national basis using both loan and lease structures. Pinnacle primarily offers essential use equipment financing to municipalities through loans and leases, as well as bond re-funding structures; Bridge offers franchise equipment and acquisition financing as well as transportation equipment finance. The Bank's SBF unit primarily originates SBA guaranteed commercial and commercial real estate loans, generally selling the guaranteed portion in the secondary market and retaining the unguaranteed portion in portfolio. The Bank engages in mortgage warehouse lending on a national basis.

Table of Contents

The following table presents the recorded investment in loans and direct finance leases held for investment for each of our national commercial lending platforms at the dates indicated (in thousands):

	September 30, December 31,	
	2016	2015
Pinnacle	\$ 1,311,775	\$ 1,085,981

Virginia	158,557	5.6 %	113,486	5.0 %
Texas	132,943	4.7 %	90,989	4.0 %
Nevada	113,986	4.0 %	101,370	4.4 %
Others (1)	1,325,921	46.5 %	1,101,796	48.1 %
	\$2,847,727	100.0 %	\$2,292,232	100.0 %

(1) No other state represented borrowers with more than 4.0% of loans outstanding at September 30, 2016 or December 31, 2015.

Consumer Loans

Consumer loans are comprised primarily of consumer installment financing, loans secured by certificates of deposit, unsecured personal lines of credit and demand deposit account overdrafts.

Asset Quality

In discussing asset quality, we distinguish between new loans and loans acquired in the FSB Acquisition. Although the risk profile of loans acquired in the FSB Acquisition is higher than that of new loans, our exposure to loss related to the loans acquired in the FSB Acquisition is significantly mitigated by the fair value basis recorded in these loans resulting from the application of acquisition accounting and, for the residential loans, by the Single Family Shared-Loss Agreement. Loss sharing under the Commercial Shared-Loss Agreement was terminated on May 21, 2014. At September 30, 2016, loans covered under the Single Family Shared-Loss Agreement totaled \$669 million. We have established a robust credit risk management framework, put in place an experienced team to lead the workout and recovery process for the commercial and commercial real estate portfolios and implemented a dedicated internal credit review function that reports directly to our Audit and Risk Committee. We have an experienced resolution team in place for covered residential mortgage loans, and have implemented outsourcing arrangements with industry leading firms in certain areas such as OREO resolution.

Loan performance is monitored by our credit administration and workout and recovery departments. Generally, commercial relationships with balances in excess of defined thresholds are re-evaluated at least annually and more frequently if circumstances indicate that a change in risk rating may be warranted. The defined thresholds range from \$1 million to \$3 million. Additionally, commercial loans are regularly reviewed by our internal credit review department. The Company utilizes a 13 grade internal asset risk classification system as part of its efforts to monitor and maintain commercial asset quality. Loans exhibiting potential credit weaknesses that deserve management's close attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. These borrowers may exhibit negative financial trends or erratic financial performance, strained liquidity, marginal collateral coverage, declining industry trends or weak management. Loans with well-defined credit weaknesses that may result in a loss if the deficiencies are not

Table of Contents

corrected are assigned a risk rating of substandard. These borrowers may exhibit payment defaults, inadequate cash flows, operating losses, increasing balance sheet leverage, project cost overruns, unreasonable construction delays, exhausted interest reserves, declining collateral values, frequent overdrafts or past due real estate taxes. Loans with weaknesses so severe that collection in full is highly questionable or improbable, but because of certain reasonably specific pending factors have not been charged off, are assigned an internal risk rating of doubtful.

Residential mortgage loans and consumer loans are not individually risk rated. Delinquency status is the primary measure we use to monitor the credit quality of these loans. We also consider original LTV and FICO score to be significant indicators of credit quality for the new 1-4 single family residential portfolio.

New Loans

Commercial

The ongoing asset quality of significant commercial loans is monitored on an individual basis through our regular credit review and risk rating process. We believe internal risk rating is the best indicator of the credit quality of commercial loans. Homogenous groups of smaller balance commercial loans may be monitored collectively.

At September 30, 2016, new commercial loans with aggregate balances of \$66 million, \$310 million and \$14 million were rated special mention, substandard and doubtful, respectively. At December 31, 2015, new commercial loans aggregating \$32 million, \$198 million and \$6 million were rated special mention, substandard and doubtful, respectively. The balance of substandard loans at September 30, 2016 and December 31, 2015 included \$141.6 million and \$80.5 million, respectively, of taxi medallion finance loans. Criticized and classified assets represented 2.6% of the new commercial portfolio at September 30, 2016. See Note 4 to the consolidated financial statements for more detailed information about risk rating of new commercial loans.

The commercial and industrial loan portfolio includes exposure to taxi medallion finance of approximately \$192 million at September 30, 2016. The estimated value of underlying taxi medallion collateral and liquidity in the market for sales of medallions, a potential secondary source of repayment, have declined in recent periods due to competitive developments in the transportation-for-hire industry. We update our analysis of the cash flow generating capacity of the operation of medallions on a regular basis using current available taxi industry data from which prospective debt service capacity is estimated. This analysis is based on an extensive data set typically made available by the New York Taxi and Limousine Commission semi-annually and assumptions that we believe to be generally conservative regarding fleet utilization and borrower expenses. Actual debt service coverage of our medallion loans may in some cases be more favorable than these cash flow capacity estimates. We also consider, if less favorable than our analysis of cash flow generating capacity, available borrower specific financial information. We update our analysis of estimated medallion valuations on a quarterly basis, based on the cash flow capacity estimates and recent medallion transfer activity. The taxi medallion portfolio had the following characteristics at September 30, 2016:

- Approximately 94.5% of the portfolio was concentrated in New York City.

- Loans delinquent by 30 days or more totaled \$13.6 million or 7.1% of the portfolio, compared to \$7.9 million or 3.7% of the portfolio at December 31, 2015. Loans delinquent by 90 days or more totaled \$8.2 million or 4.2% of the portfolio, compared to \$1.9 million or 0.9% of the portfolio at December 31, 2015. Loans on non-accrual status totaled \$54.5 million at September 30, 2016.

- At September 30, 2016, \$50 million, \$141.6 million and \$1.1 million of loans were rated pass, substandard and doubtful, respectively.

- Based on our updated analysis of medallion values, the weighted average estimated current LTV for loans directly secured by medallions was approximately 90% and approximately 58.7% of those loans had current LTV in excess of 100%.

- Approximately 15.9% of the portfolio consisted of interest only loans.

- Based on our updated analysis of the estimated cash flow generating capacity of medallions, as discussed above, approximately 52.9% of loans secured directly by taxi medallions had estimated prospective debt service coverage ratios of less than 1.00, the majority of which were current with respect to payment of principal and interest.

- The portfolio included 60 loans modified in TDRs with a recorded investment of \$58.5 million.

- In the aggregate, the ALLL related to taxi medallion loans was 8.0% of the outstanding balance at September 30, 2016, compared to 4.7% at December 31, 2015. Charge-offs of \$4.2 million were recognized in the nine months

ended September 30, 2016 related to taxi medallion loans.

Table of Contents

We are no longer originating new taxi medallion loans. Our portfolio management strategies include, but are not limited to, working with borrowers experiencing temporary cash flow challenges to provide short term relief and/or extended amortization periods, pro-actively attempting to refinance loans prior to maturity, shortening amortization periods when possible with an emphasis on converting interest only loans, continuing to monitor industry data and obtain updated borrower and guarantor financial information, and identifying and closely monitoring loans with higher risk profiles. As taxi medallion loans approach maturity or are refinanced, we expect the number and amount of TDRs in this portfolio segment to increase.

Residential

New 1-4 single family residential loans past due more than 30 days totaled \$9.5 million and \$2.5 million at September 30, 2016 and December 31, 2015, respectively. The amount of these loans 90 days or more past due was \$0.3 million and \$1.5 million at September 30, 2016 and
