Item 2.05 Costs Associated with Exit or Disposal Activities.

On November 30, 2015, The Chemours Company (the “Company”) announced that it completed the strategic review of its Reactive Metals Solutions (RMS) business and made the decision to stop production at the Niagara Falls, NY site by the end of December 2016. The Niagara Falls plant has approximately 200 employees and contractors that will be impacted by this action.

The Company estimates it will incur approximately \$30 million in connection with the plant closure. The estimated cash expenditures are expected to consist of approximately \$11 million for severance and other employee costs, \$4 million of contract termination costs, and \$12 to \$17 million for decommissioning, dismantling and removal costs associated with the plan. Of these charges, the Company expects to incur approximately \$17 million of cash charges in the fourth quarter of 2015. The remaining cash charges are expected to be incurred during the next two to three years, primarily for decommissioning, dismantling and removal.

Because the Company is in the early stages of implementing this plan, the amount and timing of the above estimates may differ from the ranges provided.

Also on November 30, 2015, the Company announced a reduction of its global workforce by approximately 400 positions, which represents about 5 percent of its total workforce. This action is part of an effort to continue to streamline and simplify the structure of the global organization and reduce costs, and will result in fourth quarter 2015 charge of approximately \$45 million. The headcount reduction is expected to be across business lines and functions in the US and overseas and is expected to be completed during 2016.
