NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Basis of Presentation

As used herein, the "Company," "we," "us," or "our" refers to Selective Insurance Group, Inc. (the "Parent"), and its subsidiaries, except as expressly indicated or unless the context otherwise requires. Our interim unaudited consolidated financial statements ("Financial Statements") have been prepared by us in conformity with: (i) U.S. generally accepted accounting principles ("GAAP"); and (ii) the rules and regulations of the U.S. Securities and Exchange Commission ("SEC") regarding interim financial reporting. The preparation of the Financial Statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported financial statement balances, as well as the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. All significant intercompany accounts and transactions between the Parent and its subsidiaries are eliminated in consolidation.

Certain amounts in the prior years' Financial Statements and related notes have been reclassified to conform to the 2015 presentation. Such reclassifications had no effect on our net income, stockholders' equity, or cash flows.

Our Financial Statements reflect all adjustments that, in our opinion, are normal, recurring, and necessary for a fair presentation of our results of operations and financial condition. Our Financial Statements cover the first quarters ended March 31, 2015 ("First Quarter 2015") and March 31, 2014 ("First Quarter 2014") and do not include all of the information and disclosures required by GAAP and the SEC for audited annual financial statements. Results of operations for any interim period are not necessarily indicative of results for a full year. Consequently, our Financial Statements should be read in conjunction with the consolidated financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2014 ("2014 Annual Report") filed with the SEC.

NOTE 2. Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period ("ASU 2014-12"). ASU 2014-12 requires that performance targets that affect vesting and could be achieved after the requisite service period be treated as performance conditions. The effective date for ASU 2014-12 is for interim and annual periods beginning after December 15, 2015. The adoption of ASU 2014-12 will not affect us, as we are currently recording expense consistent with the requirements of this accounting update.

In August 2014, the FASB issued ASU 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern ("ASU 2014-15"). ASU 2014-15 provides guidance about: (i) management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern; and (ii) the content of related footnote disclosures. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and interim periods beginning in 2017. Early application is permitted. The adoption of this ASU is not expected to impact the Company.

In February 2015, the FASB issued ASU 2015-02, Amendments to the Consolidation Analysis ("ASU 2015-02"). ASU 2015-02 amends the current consolidation guidance, focusing mainly on the investment management industry, although entities across all industries will be impacted. The main provisions in this update affect the following areas: (i) limited partnerships and similar legal entities; (ii) the evaluation of fees paid to a decision maker or a service provider as a variable interest; (iii) the effect of fee arrangements on the primary beneficiary determination; (iv) the effect of related parties on the primary beneficiary determination; and (v) certain investment funds. ASU 2015-02 is effective for interim and annual reporting periods beginning after December 15, 2015. While we are currently evaluating ASU 2015-02, we do not expect a material impact on our financial condition or results of operations from the adoption of this guidance.

¹ CMBS includes government guaranteed agency securities with a fair value of \$12.9 million at March 31, 2015 and \$13.2 million at December 31, 2014.

² RMBS includes government guaranteed agency securities with a fair value of \$29.2 million at March 31, 2015 and \$32.4 million at December 31, 2014.

Unrealized gains and losses of AFS securities represent fair value fluctuations from the later of: (i) the date a security is designated as AFS; or (ii) the date that an OTTI charge is recognized on an AFS security, through the date of the balance sheet. These unrealized gains and losses are recorded in Accumulated other comprehensive income ("AOCI") on the Consolidated Balance Sheets.

¹ Gross unrealized losses include non-OTTI unrealized amounts and OTTI losses recognized in AOCI. In addition, this column includes remaining unrealized gain or loss amounts on securities that were transferred to an HTM designation in the first quarter of 2009 for those securities that are in a net unrealized/unrecognized loss position.

² Unrecognized gains represent fair value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an OTTI charge is recognized on an HTM security.

The table below provides our net unrealized/unrecognized loss positions by impairment severity as of March 31, 2015 compared to December 31, 2014:

The improvement in the number of securities in a loss position in our portfolio and the related loss amounts was mainly driven by a lower interest rate environment. During First Quarter 2015, interest rates on the 10-year U.S. Treasury Note fell by 25 basis points. This interest rate movement had a positive impact on the valuation of our fixed income securities portfolio, thus decreasing the number of securities in a loss position and the corresponding dollar amount of unrealized losses. For a discussion regarding the impact of interest rate movements on our fixed income securities portfolio, refer to Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." in our 2014 Annual Report. Partially offsetting the improvement in fixed income securities was an increase in unrealized losses on our equity portfolio. Unrealized losses of \$3.3 million on this portfolio related to 28 securities with an average impairment severity of 3% of cost. The temporary dislocation in market value on these securities was driven by energy and utility-related holdings that are expected to recover in the near term.

We do not intend to sell any of the securities in the tables above, nor do we believe we will be required to sell any of these securities. We have also reviewed these securities under our OTTI policy, as described in Note 2. "Summary of Significant Accounting Policies" within Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report, and have concluded that they are temporarily impaired. This conclusion reflects our current judgment as to the financial position and future prospects of the entity that issued the investment security and underlying collateral. If our judgment about an individual security changes in the future, we may ultimately record a credit loss after having originally concluded that one did not exist, which could have a material impact on our net income and financial position in future periods.

Table of Contents

(d) Fixed income securities at March 31, 2015, by contractual maturity, are shown below. Mortgage-backed securities ("MBS") are included in the maturity tables using the estimated average life of each security. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations, with or without call or prepayment penalties.

Listed below are the contractual maturities of HTM fixed income securities at March 31, 2015:

| (\$ in thousands) | Carrying Value | Fair Value |

Table of Contents

The following table sets forth gross summarized financial information for our other investments portfolio, including the portion not owned by us. The investments are carried under the equity method of accounting. The last line of the table below reflects our share of the aggregate income, which is the portion included in our Financial Statements. As the majority of these investments report results to us on a one quarter lag, the summarized financial statement information for the three-month periods ended December 31 is as follows:

| Income Statement Information (\$ in millions) | Quarter ended December 31, | |
|---|----------------------------|---------|
| | 2014 | 2013 |
| Net investment income | \$77.0 | 65.1 |
| Realized gains | 160.5 | 63.3 |
| Net change in unrealized (depreciation) appreciation | (518.0 |) 505.9 |
| Net (loss) income | \$(280.5 |) 634.3 |
| Selective's insurance subsidiaries' other investments (loss) income | \$(3.5 |) 5.2 |

(f) We have pledged certain AFS fixed income securities as collateral related to: (i) our outstanding borrowing of \$60 million with the Federal Home Loan Bank of Indianapolis ("FHLBI"); and (ii) our reinsurance obligations related to our 2011 acquisition of our excess and surplus lines ("E&S") book of business. In addition, certain securities were on deposit with various state and regulatory agencies to comply with insurance laws. We retain all rights regarding all securities pledged as collateral.

The following table summarizes the market value of these securities at March 31, 2015:

| (\$ in millions) | FHLBI Collateral | Reinsurance Collateral | State and Regulatory Deposits | Total |

| Other investments | | |
| Gains | — | — |
| Losses | (654 |) — |
| Total net realized gains (excluding OTTI charges) | \$20,977 | 8,181 |

Realized gains and losses on the sale of investments are determined on the basis of the cost of the specific investments sold. Proceeds from the sale of AFS securities were \$138.4 million in First Quarter 2015 and \$62.8 million in First Quarter 2014. The \$21.0 million in net realized gains in First Quarter 2015 were primarily related to the sale of AFS equity securities due to a change in our dividend equity strategy from a quantitative, model-driven stock selection strategy to a fundamentally-based stock selection approach that incorporates an assessment of the sustainability and growth rate of a company's dividends and future cash flow. The \$8.2 million in net realized gains in First Quarter 2014 was primarily related to the sale of AFS equity securities due to the quantitative rebalancing of our dividend yield strategy holdings.

NOTE 5. Indebtedness

Of our ten insurance subsidiaries ("Insurance Subsidiaries"), we have two domiciled in Indiana ("Indiana Subsidiaries") that are members of the FHLBI. In January 2015, the Indiana Subsidiaries borrowed \$15 million in the aggregate from the FHLBI for general corporate purposes. The unpaid principal amount accrues interest of 0.63%, which is paid on the 15th of every month. The principal amount is due on July 22, 2016. For a summary of the Indiana Subsidiaries' borrowings from the FHLBI, refer to Note 10. "Indebtedness" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

NOTE 6. Fair Value Measurements

The following table presents the carrying amounts and estimated fair values of our financial instruments as of March 31, 2015 and December 31, 2014:

| (\$ in thousands) | March 31, 2015 | | December 31, 2014 | |

| 1.25% borrowings from FHLBI | 45,000 | 45,338 | 45,000 | 45,244 |
| 7.25% Senior Notes | 49,896 | 60,407 | 49,896 | 59,181 |
| 6.70% Senior Notes | 99,405 | 117,389 | 99,401 | 114,845 |
| 5.875% Senior Notes | 185,000 | 189,440 | 185,000 | 185,000 |
| Total notes payable | \$394,301 | 427,568 | 379,297 | 404,270 |

The fair values of our financial assets and liabilities are generated using various valuation techniques and are placed into the fair value hierarchy considering the following: (i) the highest priority is given to quoted prices in active markets for identical assets (Level 1); (ii) the next highest priority is given to quoted prices in markets that are not active or inputs that are observable either directly or indirectly, including quoted prices for similar assets in markets that are not active and other inputs that can be derived principally from, or corroborated by, observable market data for substantially the full term of the assets (Level 2); and (iii) the lowest priority is given to unobservable inputs supported by little or no market activity and that reflect our assumptions about the exit price, including assumptions that market participants would use in pricing the asset (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. Transfers between levels in the fair value hierarchy are recognized at the end of the reporting period.

For a discussion of the techniques used to value our financial assets and liabilities, refer to Note 2. "Summary of Significant Accounting Policies" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

NOTE 8. Segment Information

Selective Insurance Group, Inc., through its Insurance Subsidiaries, offers property and casualty insurance products in the standard and E&S marketplaces. We classify our business into four reportable segments, which are as follows:

Standard Commercial Lines - comprised of insurance products and services provided in the standard marketplace to commercial enterprises, which are typically businesses, non-profit organizations, and local government agencies.

Standard Personal Lines - comprised of insurance products and services, including flood insurance coverage, provided primarily to individuals acquiring coverage in the standard marketplace.

E&S Lines - comprised of insurance products and services provided to customers who have not obtained coverage in the standard marketplace.

Investments - invests the premiums collected by our Standard Commercial Lines, Standard Personal Lines, and E&S Lines, our earnings and amounts generated through our capital management strategies, which may include the issuance of debt and equity securities.

In the fourth quarter of 2014, we revised our reporting segments from our previously-reported Standard Insurance Operations segment to Standard Commercial Lines and Standard Personal Lines. For information regarding this change, see Note 11. "Segment Information" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

In computing the results of each segment, we do not make adjustments for interest expense or net general corporate expenses. While we do not fully allocate taxes to all segments, we do allocate taxes to our Investments segment as we manage that segment on after-tax results. We do not maintain separate investment portfolios for the segments and therefore, do not allocate assets to the segments.

In First Quarter 2014, we sold the renewal rights to our \$37 million self-insured group, or "SIG," book of business within the Standard Commercial Lines segment. We decided to opportunistically sell this small and specialized book of pooled business as a significant portion of the business was produced outside of our standard lines footprint, and proved difficult to grow. As this was a renewal rights sale, we will continue to service policies that were in force at the date of the sale. We continue to remain active in the municipal and public school marketplace for individual risks that procure traditional insurance programs rather than pooling arrangements. The proceeds from this sale, which amounted to \$8 million, are included in "Miscellaneous income" within the table below as a component of Standard Commercial Lines revenue.

Note 11. Litigation

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our Insurance Subsidiaries as either: (i) liability insurers defending or providing indemnity for third-party claims brought against our customers; or (ii) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss expense reserves. We expect that the ultimate liability, if any, with respect to such ordinary course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to our consolidated financial condition, results of operations, or cash flows.

Our Insurance Subsidiaries are also from time to time involved in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Our Insurance

Subsidiaries also are involved from time to time in individual actions in which extra-contractual damages, punitive damages, or penalties are sought, such as claims alleging bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to our consolidated financial condition. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, an adverse outcome in certain matters could, from time to time, have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods. As of March 31, 2015, we do not believe the Company was involved in any legal action that could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Forward-Looking Statements

As used herein, the "Company," "we," "us," or "our" refers to Selective Insurance Group, Inc., and its subsidiaries, except as expressly indicated or unless the context otherwise requires. In this Quarterly Report on Form 10-Q, we discuss and make statements regarding our intentions, beliefs, current expectations, and projections regarding our company's future operations and performance. Such statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are often identified by words such as "anticipates," "believes," "expects," "will," "should," and "intends" and their negatives. We caution prospective investors that such forward-looking statements are not guarantees of future performance. Risks and uncertainties are inherent in our future performance. Factors that could cause actual results to differ materially from those indicated by such forward-looking statements include, but are not limited to, those discussed under Item 1A. "Risk Factors" below in Part II "Other Information." These risk factors may not be exhaustive. We operate in a continually changing business environment and new risk factors emerge from time to time. We can neither predict such new risk factors nor can we assess the impact, if any, of such new risk factors on our businesses or the extent to which any factor or combination of factors may cause actual results to differ materially from those expressed or implied in any forward-looking statements in this report. In light of these risks, uncertainties, and assumptions, the forward-looking events discussed in this report might not occur. We make forward-looking statements based on currently available information and assume no obligation to update these statements due to changes in underlying factors, new information, future developments, or otherwise.

Introduction

Selective Insurance Group, Inc., through its subsidiaries, offers property and casualty insurance products in the standard and excess and surplus ("E&S") marketplaces. We classify our business into four reportable segments, which are as follows:

Standard Commercial Lines - comprised of insurance products and services provided in the standard marketplace to commercial enterprises, which are typically businesses, non-profit organizations, and local government agencies.

Standard Personal Lines - comprised of insurance products and services, including flood insurance coverage, provided primarily to individuals acquiring coverage in the standard marketplace.

E&S Lines - comprised of insurance products and services provided to customers who have not obtained coverage in the standard marketplace.

Investments - invests the premiums collected by our Standard Commercial Lines, Standard Personal Lines, and E&S Lines, our earnings, and amounts generated through our capital management strategies, which may include the issuance of debt and equity securities.

Our Standard Commercial and Standard Personal Lines products and services are sold through nine subsidiaries, some of which write flood business through the National Flood Insurance Program ("NFIP"), which is restricted to pay flood claims under the Write Your Own ("WYO") program.

Our E&S products and services are sold through one subsidiary. This subsidiary, Mesa Underwriters Specialty Insurance Company ("MUSIC"), provides us with a nationally-authorized non-admitted platform to offer insurance products and services to customers who have not obtained coverage in the standard marketplace.

Our ten insurance subsidiaries are collectively referred to as the "Insurance Subsidiaries."

The following is Management's Discussion and Analysis ("MD&A") of the consolidated results of operations and financial condition, as well as known trends and uncertainties, that may have a material impact in future periods.

Consequently, investors should read the MD&A in conjunction with the consolidated financial statements in our 2014 Annual Report filed with the U.S. Securities and Exchange Commission ("SEC").

Table of Contents

In the MD&A, we will discuss and analyze the following:

• Critical Accounting Policies and Estimates;

• Financial Highlights of Results for the first quarters ended March 31, 2015 ("First Quarter 2015") and March 31, 2014 ("First Quarter 2014");

• Results of Operations and Related Information by Segment;

• Federal Income Taxes;

• Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources;

• Ratings;

• Off-Balance Sheet Arrangements; and

• Contractual Obligations, Contingent Liabilities, and Commitments.

Critical Accounting Policies and Estimates

Our unaudited interim consolidated financial statements include amounts based on our informed estimates and judgments for those transactions that are not yet complete. Such estimates and judgments affect the reported amounts in the consolidated financial statements. Those estimates and judgments most critical to the preparation of the consolidated financial statements involve the following: (i) reserves for loss and loss expenses; (ii) pension and post-retirement benefit plan actuarial assumptions; (iii) other-than-temporary investment impairments ("OTTI"); and (iv) reinsurance. These estimates and judgments require the use of assumptions about matters that are highly uncertain and, therefore, are subject to change as facts and circumstances develop. If different estimates and judgments had been applied, materially different amounts might have been reported in the financial statements. For additional information regarding our critical accounting policies, refer to pages 37 through 48 of our 2014 Annual Report.

¹ Refer to the Glossary of Terms attached to our 2014 Annual Report as Exhibit 99.1 for definitions of terms used in this Form 10-Q.

² Operating income is used as an important financial measure by us, analysts, and investors, because the realization of investment gains and losses on sales in any given period is largely discretionary as to timing. In addition, these realized investment gains and losses, as well as OTTI that are charged to earnings and the results of discontinued

operations, could distort the analysis of trends. See below for a reconciliation of operating income to net income in accordance with GAAP. Operating ROE is calculated by dividing annualized operating income by average stockholders' equity.

Table of Contents

The following table reconciles operating income and net income for the periods presented above:

| (\$ in thousands, except per share amounts) | Quarter ended March 31, | |
|---|-------------------------|--------|
| | 2015 | 2014 |
| Operating income | \$27,434 | 13,283 |
| Net realized gains, net of tax | 12,274 | 4,691 |
| Net income | \$39,708 | 17,974 |

| Diluted net realized gains per share | 0.21 | 0.08 |
| Diluted net income per share | \$0.69 | 0.31 |

We are currently targeting an operating ROE that is three points higher than our weighted-average cost of capital, or approximately 11.5%. Our ROE contributions by component are as follows:

| ROE | Quarter ended March 31, | | |
|---------------------------------|-------------------------|---------|----|

Insurance Segments

The key metric in understanding our insurance segments' contribution to operating ROE is the GAAP combined ratio. The following table provides a quantitative foundation for analyzing this ratio:

| All Lines (\$ in thousands) | Quarter ended March 31, | | |
|------------------------------------|-------------------------|---------|-----------------------|
| | 2015 | 2014 | Change % or Points |
| GAAP Insurance Operations Results: | | | |

Table of Contents

The improvement in our GAAP combined ratio was driven by the following factors:

Lower catastrophe and non-catastrophe property losses as a result of reduced severity in weather-related events in First Quarter 2015 compared to First Quarter 2014. Quantitative details are as follows:

| (\$ in millions) | First Quarter 2015 | | First Quarter 2014 | | Change in Ratio |
|---------------------------------|--------------------|----------------------|--------------------|----------------------|-----------------|
| | Losses Incurred | Impact on Loss Ratio | Losses Incurred | Impact on Loss Ratio | |
| Catastrophe losses | \$25.3 | 5.3 pts | \$34.4 | 7.5 pts | (2.2) pts |
| Non-catastrophe property losses | 71.0 | 14.9 | 91.5 | 20.0 | (5.1) |

Earned rate in excess of expected claims inflation in First Quarter 2015, despite a slowing rate on written renewal pure price increases. Written renewal pure price increases were 3.9% in First Quarter 2015 and 5.6% in full-year 2014, and are currently earning in at 5.1%, which is above our loss inflation trend of approximately 3%. After taking into account the incremental expenses associated with the additional premium, the net benefit to the combined ratio was approximately 1.5 points.

Favorable prior year casualty reserve development of approximately \$20.0 million, or 4.2 points, which was primarily driven by accident years 2013 and prior. The overall favorable development was driven by the general liability line of business. Refer to the table below for further details:

(Favorable)/Unfavorable Prior Year Casualty Reserve Development

| Total (favorable) prior year casualty reserve development | \$(20.0) | \$(14.0) |
| (Favorable) impact on loss ratio | (4.2) pts | (3.1) pts |

For a qualitative discussion of this reserve development, please refer to the respective insurance segment section below in "Results of Operations and Related Information by Segment."

Partially offsetting the improvements in the loss and loss expense ratio above was a 3.7-point increase in the underwriting expense ratio. The prior year ratio included \$8.0 million, or 1.8 points, of a non-recurring benefit related to the sale of the renewal rights to our self-insured group, or "SIG", book of business in March 2014. Excluding the impact of this benefit, the increase in the underwriting expense ratio between First Quarter 2015 and First Quarter 2014 was 1.9 points, which was attributable to: (i) higher commission expenses; and (ii) higher employee-related expenses.

The increase in commissions is due to higher supplemental commission expense to our distribution partners and a change in our mix of business.

The increase in employee-related expenses was primarily related to the following:

Labor expense increases that included staffing additions, such as agency management specialists and information technology professionals, to support our growth initiatives. As the premium growth is not yet reflected in earned premium, the higher labor expenses are putting pressure on the current period GAAP underwriting expense ratio.

Table of Contents

- Pension expense increases driven by the negative impact of declining interest rates last year and the accrual of service costs for eligible employees. Refer to Note 9. "Retirement Plans" in Item 1. "Financial Statements." of this Form 10-Q for additional information regarding our pension plan.

For additional information regarding the sale of our SIG book of business, see Note 8. "Segment Information" in Item 1. "Financial Statements." of this Form 10-Q.

Investments Segment

The investment segment's operating ROE was negatively impacted by a net loss in our alternative investment portfolio in First Quarter 2015, as well as the declining interest rate environment, partially offset by an increase in operating cash. The loss in our alternative investment portfolio was primarily driven by declining oil prices in energy-exposed limited partnerships in the fourth quarter of 2014, the results of which are reported to us on a quarter lag.

The increase in our net realized gains, net of tax, in First Quarter 2015 compared to First Quarter 2014 was primarily related to the sale of available-for-sale ("AFS") equity securities due to a change in our equity portfolio strategy that was deployed this year. For further details, refer to the section below entitled "Investments."

Outlook

Based on its Review & Preview report issued in February 2015, A.M. Best Company, Inc. ("A.M. Best") expects the industry combined ratio to deteriorate almost 200 basis points in 2015 to 99.1%, compared to 97.2% in 2014, reflecting: (i) a reduction in the level of rate increases; (ii) a 0.5-point increase in their catastrophe loss estimate to a more normal level of approximately five points; and (iii) reductions in the level of favorable prior year development. They believe the main challenges facing the industry include: (i) low returns on fixed income investments; (ii) reserve shortfalls due to current accident year underestimations and prior accident year unfavorable development; (iii) developing, attracting, and maintaining underwriting talent; (iv) continuing the evolution of data analytics; and (v) addressing the uncertainties surrounding emerging risks such as terrorism, cyber risk, and infectious diseases. Considering these, among other factors, A.M. Best has a negative outlook on the commercial lines market and a stable outlook on the personal lines market. Additionally, after declining in each of the past two years, A.M. Best expects investment income to increase modestly in 2015, driven by growth in invested assets from positive cash flow, as yields will continue to be challenged.

Our First Quarter 2015 statutory combined ratio, excluding catastrophes, was 87.7%, 3.3 points lower than our stated full-year 2015 goal of 91%, driven by favorable prior year casualty reserve development that benefited the combined ratio by 4.2 points. The catastrophe losses in First Quarter 2015 of \$25.3 million added 5.3 points to our statutory combined ratio, compared to our full-year catastrophe loss expectation of 4.0 points. As noted above, A.M. Best projects a decline in investment yields, continuing a trend that has persisted over the past five years, with yields on new investments remaining significantly lower than those on investments that mature or are called. This is consistent with our experience in First Quarter 2015, with bonds that we purchased having an average yield of 1.8% compared to our full year expectation of 2%, and bonds that were called, matured, or otherwise disposed of yielding an average of 2.6%.

While we expect the competitive market environment to continue, we believe that we have a strong foundation for further improvement in our underlying profitability considering:

- The size of our company and our field model that provides us with the ability to be agile and responsive to our customers' needs;
- Our reserve position that reflects the discipline we have always maintained in our reserving practices;
- Our customer-centric approach to our business with a focus on our policyholders and the service we bring to them;
- The utilization of our capabilities regarding data analytics; and
- Our deep bench of talent in the organization and our continuous cultivation of that talent.

Table of Contents

Given the first quarter performance of alternative investments related to energy, we are lowering our after-tax investment income expectation to \$100 million from \$105 million. Otherwise, we continue to expect to generate:

- An ex-catastrophe combined ratio of 91%, which includes no additional prior year casualty reserve development;
- Four points of catastrophe losses for the full year; and
- Weighted average shares of approximately 58 million.

On a longer-term basis, it is our goal to achieve an operating ROE of three points higher than our weighted-average cost of capital, or approximately 11.5%, which currently equates to a 94% combined ratio.

Table of Contents

The GAAP loss and loss expense ratio decreased 13.0 points in First Quarter 2015 compared to First Quarter 2014 driven by: (i) decreases in catastrophe and non-catastrophe property losses; (ii) written renewal pure price increases that averaged 3.5% in First Quarter 2015 and 5.6% in full-year 2014, the earning of which exceeded our projected loss inflation trend and improved profitability by 1.3 points; and (iii) favorable prior year casualty reserve development. Quantitative information regarding these items are as follows:

| (\$ in millions) | First Quarter 2015 | | pts | First Quarter 2014 | | Change in Ratio | pts |
|---|--------------------|----------------------|-----|--------------------|----------------------|-----------------|-----|
| | Losses Incurred | Impact on Loss Ratio | | Losses Incurred | Impact on Loss Ratio | | |
| Catastrophe losses | \$18.7 | 5.1 | | \$25.9 | 7.4 | (2.3) | |
| Non-catastrophe property losses | 40.4 | 11.1 | | 58.8 | 16.8 | (5.7) | |
| Favorable prior year casualty reserve development | (21.0) | (5.7) | | (12.0) | (3.5) | (2.2) | |

Partially offsetting the improvements in the loss and loss expense ratio above was a 3.8-point increase in the underwriting expense ratio. The prior year ratio included \$8.0 million, or 2.3 points, of non-recurring benefit related to the sale of the renewal rights to our SIG book of business in March 2014. Excluding the impact of this benefit, the increase in the underwriting expense ratio between First Quarter 2015 and First Quarter 2014 was 1.5 points. Similar to the discussion contained in the "Financial Highlights of Results for First Quarter 2015 and First Quarter 2014" section above, this 1.5-point increase was attributable to: (i) higher commission expenses; and (ii) higher employee-related expenses.

For additional information regarding the sale of our SIG book of business, see Note 8. "Segment Information" in Item 1. "Financial Statements." of this Form 10-Q.

The following is a discussion of our most significant standard Commercial Lines of business and their respective statutory results:

General Liability

| (\$ in thousands) | Quarter ended March 31, | | Change % or Points | pts |
|--|-------------------------|---------|--------------------|------|
| | 2015 | 2014 | | |
| Statutory NPW | \$130,482 | 119,504 | 9 | % |
| Direct new business | 25,229 | 19,835 | 27 | |
| Retention | 84 | % 84 | — | pts |
| Renewal pure price increases | 3.5 | % 7.6 | (4.1) |) |

| Statutory combined ratio | 73.0 | % 80.7 | (7.7) |)pts |
| % of total statutory standard Commercial Lines NPW | 31 | % 32 | | |

The increase in NPW and NPE in First Quarter 2015 compared to the same period last year was driven by: (i) direct new business increases; (ii) renewal pure price increases; and (iii) strong retention.

The statutory combined ratio improvement for First Quarter 2015 was driven by the following:

| (\$ in millions) | First Quarter 2015 | | pts | First Quarter 2014 | | Change Points | pts |
|------------------|--------------------|--------------------------|-----|--------------------|--------------------------|---------------|-----|
| | (Benefit) Expense | Impact on Combined Ratio | | (Benefit) Expense | Impact on Combined Ratio | | |

|----------------------------|---|---|------|-------|---|-----|
| Sale of SIG renewal rights | — | — | (2.1 |)(1.8 |) | 1.8 |
|----------------------------|---|---|------|-------|---|-----|

Favorable prior year casualty reserve development in First Quarter 2015 was driven by the 2009 through 2013 accident years, primarily due to continued lower frequencies in recent accident years. Favorable prior year casualty reserve development in First Quarter 2014 was driven by accident years 2012 and prior. In addition, earned renewal pure price increases of 6.0% in First Quarter 2015 exceeded our projected loss inflation trend and improved profitability by approximately 1.5 points.

| % of total statutory standard Commercial Lines NPW | 23 | % 23 | | |

The increase in NPW and NPE in First Quarter 2015 compared to the same period last year was driven by: (i) direct new business increases; (ii) renewal pure price increases; and (iii) strong retention.

Excluding the impact of the SIG sale last year, the statutory combined ratio increased 2.8 points in First Quarter 2015 compared to First Quarter 2014 due to: (i) higher expected loss costs for the current accident year that increased the combined ratio by 2.4 points; and (ii) unfavorable prior year casualty reserve development of 1.2 points. The increases in the current and prior accident years were driven by higher severities in recent accident years.

Workers Compensation

| (\$ in thousands) | Quarter ended March 31, | | Change | |
|--|-------------------------|---------|----------------|------|
| | 2015 | 2014 | % or Points | |
| Statutory NPW | \$83,805 | 75,971 | 10 | % |

| Statutory combined ratio | 90.7 | % 105.9 | (15.2 |)pts |
| % of total statutory standard Commercial Lines NPW | 20 | % 20 | | |

First Quarter 2015 NPW increased compared to First Quarter 2014 mainly due to an increase in direct new business.

The NPE decrease in First Quarter 2015 was consistent with the fluctuation in NPW for the twelve-month period ended March 31, 2015 compared to the twelve-month period ended March 31, 2014.

Our workers compensation line achieved a 90.7% statutory combined ratio in First Quarter 2015 due to the following factors:

A 9.3-point decrease related to lower expected loss costs for the current accident year, which reflect our ongoing focus on improving this competitive line of business through underwriting, pricing, and claims initiatives as further discussed below. Pricing improvements included earned renewal pure price increases of 4.6% in First Quarter 2015, which exceeded our projected loss inflation trend and improved profitability by approximately 1.0 points; and

- Favorable prior year casualty reserve development of \$5.0 million, or 7.3 points, related primarily to accident years 2012 through 2013, compared to no development in First Quarter 2014.

Table of Contents

Reductions in current and prior year loss costs in this line of business are primarily driven by continued lower frequencies. In addition, we have begun to see improvements in claims closure rates and outcomes as a result of centralizing all workers compensation claim handling in Charlotte, North Carolina. Jurisdictionally trained and aligned medical only and lost-time adjusters manage non-complex workers compensation claims within our footprint. Claims with high exposure and/or significant escalation risk are referred to the workers compensation strategic case management unit. While there is still more work to do, the improvement in our workers compensation combined ratio and the favorable prior year casualty reserve development are evidence of our achievements to date.

| Statutory combined ratio | 98.5 | % 131.4 | (32.9 |) pts |
| % of total statutory standard Commercial Lines NPW | 17 | % 17 | | |

The increase in NPW and NPE in First Quarter 2015 compared to the same prior year period was driven by: (i) direct new business increases; (ii) renewal pure price increases; and (iii) strong retention.

The decrease in the statutory combined ratio in First Quarter 2015 compared to First Quarter 2014 was due to the following:

| (\$ in millions) | First Quarter 2015 | | First Quarter 2014 | | Change | |
|---------------------------------|----------------------|--------------------------------|----------------------|-----------------------------|----------------|-------|
| | (Benefit) Expense | Impact on Combined Ratio | (Benefit) Expense | Impact on Combined Ratio | % or Points | |

| Sale of SIG renewal rights | — | — | (1.4 |) (2.2 |) | 2.2 |

Although reduced from First Quarter 2014, catastrophe losses and non-catastrophe property losses were still in excess of our expectations.

The decrease in NPW for the quarter was primarily driven by targeted non-renewals of less profitable accounts coupled with a decrease in new business. Quantitative information is as follows:

| (\$ in millions) | Quarter ended March 31, | |
|-----------------------------|-------------------------|------|
| | 2015 | 2014 |
| Retention | 82 | % 82 |

NPE decreases in First Quarter 2015 compared to First Quarter 2014 were consistent with the fluctuations in NPW for the twelve-month period ended March 31, 2015 compared to the twelve-month period ended March 31, 2014.

The improvement in the GAAP loss and loss expense ratio of 4.5 points in First Quarter 2015 compared to First Quarter 2014 was driven by earned renewal pure price increases of 6.5% in First Quarter 2015, which exceeded our projected loss inflation trend and improved profitability by 2.6 points. In addition, the following fluctuations impacted the ratio:

The increase in the GAAP underwriting expense ratio in First Quarter 2015 compared to First Quarter 2014 was due to the following:

Employee-related expenses that were higher by 3.7 points while premiums declined driven by lower new business due to competition and the targeted non-renewal actions we have taken on this book of business that have put pressure on this component of our underwriting expense ratio in the short-term; and

Higher supplemental commission of 0.4 points to our distribution partners.

E&S Insurance Operations

Our E&S Lines segment, which represents 8% of our combined insurance segments' NPW, sells commercial lines insurance

products and services in all 50 states and the District of Columbia through approximately 80 distribution partners.

Insurance

policies in this segment are sold to customers that typically have business risks with unique characteristics, such as the nature

of the business or its claim history, that have not obtained coverage in the standard marketplace. E&S insurers have more

flexibility in coverage terms and rates compared to standard market insurers, generally resulting in policies with higher rates

and terms and conditions that are customized for specific risks.

The increase in NPW in First Quarter 2015 compared to First Quarter 2014 was primarily driven by direct new business increases of \$6.5 million, or 43%.

The increase in the GAAP combined ratio in First Quarter 2015 compared to First Quarter 2014 was driven by: (i) unfavorable prior year casualty reserve development in First Quarter 2015 of \$1.0 million, or 2.8 points, compared to no prior year casualty reserve development in First Quarter 2014; (ii) an increase of 2.1 points in loss costs for the current accident year, primarily driven by loss trends in excess of renewal pure price increases; and (iii) an increase in

property losses of 0.9 points.

Investments

Our investment philosophy includes certain return and risk objectives for the fixed income, equity, and other investment portfolios. Although yield and income generation remain the key drivers to our investment strategy, our overall philosophy is to invest with a long-term horizon along with predominantly a “buy-and-hold” approach. The primary fixed income portfolio return objective is to maximize after-tax investment yield and income while balancing risk. A secondary objective is to meet or exceed a weighted-average benchmark of public fixed income indices. Within the equity portfolio, a dividend-focused strategy is designed to generate consistent dividend income while maintaining a lower risk profile relative to the Standard & Poor's Ratings Services ("S&P") 500 Index. Additional equity strategies are focused on meeting or exceeding strategy-specific benchmarks of public equity indices. The return objective of the other investment portfolio, which includes alternative investments, is to meet or exceed the S&P 500 Index.

Total Invested Assets

| (\$ in thousands) | March 31, 2015 | December 31, 2014 | Change % or Points |

| Total invested assets | \$4,901,766 | 4,806,834 | 2 % |

| Unrealized gain – after tax | 83,109 | 80,394 | 3 |
| Invested assets per dollar of stockholders' equity | 3.72 | 3.77 | (1) |
| Annualized after-tax yield on investment portfolio | 1.7 | % 2.2 | (0.5) pts |

The increase in our investment portfolio at March 31, 2015 compared to year-end 2014 was primarily due to: (i) cash flows provided by operating activities of \$60.6 million; (ii) additional borrowings from the Federal Home Loan Bank of Indianapolis ("FHLBI") of \$15.0 million; and (iii) proceeds of \$11 million from the sale of securities in December 2014 that were deployed into the investment portfolio in First Quarter 2015.

During First Quarter 2015, interest rates on the 10-year U.S. Treasury Note fell by 25 basis points, which drove the increase in pre-tax unrealized gains on fixed income securities in the portfolio by \$24.6 million. While the low interest rate environment favorably impacts our unrealized position, it presents a challenge to us in generating after-tax return, as new purchase yields are below the average yield on bonds that are currently maturing. Significantly offsetting the pre-tax unrealized gains on our fixed income securities was a \$20.4 million reduction in unrealized gains on our equity portfolio, as we realized gains from the sale of AFS securities during First Quarter 2015. These sales were a result of a change in our dividend equity strategy from a quantitative, model-driven stock selection strategy to a fundamentally-based stock selection approach that incorporates an assessment of the sustainability and growth rate of a company's dividends and future cash flow.

We structure our portfolio conservatively with a focus on: (i) asset diversification; (ii) investment quality; (iii) liquidity, particularly to meet the cash obligations of our insurance operations segments; (iv) consideration of taxes; and (v) preservation of capital. We believe that we have a high quality and liquid investment portfolio. The breakdown of our investment portfolio is as follows:

Table of Contents

Fixed Income Securities

The average duration of the fixed income securities portfolio as of March 31, 2015 was 3.7 years, including short-term investments, compared to the Insurance Subsidiaries' liability duration of approximately 4.2 years. The current duration of the fixed income securities portfolio is within our historical range, and is monitored and managed to maximize yield while managing interest rate risk at an acceptable level. We maintain a well-diversified portfolio across sectors, credit quality, and maturities that affords us ample liquidity. We typically have a long investment time horizon, and every purchase or sale is made with the intent of maximizing risk-adjusted investment returns in the current market environment while balancing capital preservation.

Our fixed income securities portfolio had a weighted average credit rating of "AA-" as of March 31, 2015. The following table presents the credit ratings of this portfolio:

Equity Securities

Our equity securities portfolio was \$211.6 million at March 31, 2015 and \$191.4 million at December 31, 2014, which was 4% of invested assets at both times. During First Quarter 2015, we generated purchases of \$150.5 million and sales of securities that had an original cost of \$108.7 million due to a change in our dividend equity strategy from a quantitative strategy to a fundamental approach, as previously discussed.

Unrealized/Unrecognized Losses

In the aggregate, our net unrealized/unrecognized loss positions on our fixed income and equity portfolios improved by \$3.8 million, to \$6.8 million as of March 31, 2015, compared to December 31, 2014. This improvement was primarily driven by our fixed income securities portfolio, reflecting declining interest rates in the marketplace during First Quarter 2015.

Table of Contents

The following table presents amortized cost and fair value information for our AFS fixed income securities that were in an unrealized loss position at March 31, 2015 by contractual maturity:

We have reviewed the securities in a loss position within our fixed income and equity portfolios, in accordance with our OTTI policy, which is discussed in Note 2. "Summary of Significant Accounting Policies" within Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report. We have concluded that these securities were temporarily impaired as of March 31, 2015. For additional information regarding the unrealized/unrecognized losses in our AFS and HTM portfolios, see Note 4. "Investments" in Item 1. "Financial Statements." of this Form 10-Q.

Other Investments

As of March 31, 2015, other investments of \$95.0 million represented 2% of our total invested assets. In addition to the capital that we have already invested to date, we are contractually obligated to invest up to an additional \$66.8 million in our other investments portfolio through commitments that currently expire at various dates through 2028. For a description of our seven alternative investment strategies, as well as redemption, restrictions, and fund liquidations, refer to Note 5. "Investments" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

Net Investment Income

The components of net investment income earned for the indicated periods were as follows:

| (\$ in thousands) | Quarter ended March 31, | |
|---|-------------------------|-----------|
| | 2015 | 2014 |
| Fixed income securities | \$30,967 | 31,028 |

| Annualized after-tax yield on fixed income securities | 2.1 | 2.2 |
| Annualized after-tax yield on investment portfolio | 1.7 | 2.3 |

Net investment income before tax decreased in First Quarter 2015 compared to the same prior year period. Net investment income in the quarter was negatively impacted by losses from the alternative investments within our other investments portfolio. In particular, our energy-related limited partnerships were negatively impacted by declining oil prices in the fourth quarter of 2014.

Realized Gains and Losses

Our general philosophy for sales of securities is to reduce our exposure to securities and sectors based on economic evaluations and when the fundamentals for that security or sector have deteriorated, or to opportunistically trade out of securities to other securities with better economic return characteristics. We typically have a long investment time horizon, and every purchase or sale is made with the intent of maximizing risk-adjusted investment returns in the current market environment while balancing capital preservation. Total net realized gains amounted to \$18.9 million in First Quarter 2015 and \$7.2 million in First Quarter 2014. These amounts included OTTI charges of \$2.1 million and \$1.0 million, respectively.

We regularly review our entire investment portfolio for declines in fair value. If we believe that a decline in the value of a particular investment is other than temporary, we record it as an OTTI, through realized losses in earnings for the credit-related portion and through unrealized losses in other comprehensive income ("OCI") for the non-credit related portion for fixed income securities. If there is a decline in fair value of an equity security that we do not intend to hold, or if we determine that the decline is other than temporary, we write down the cost of the investment to fair value and record the charge through earnings as a component of realized losses.

For further discussion of our realized gains and losses, as well as our OTTI methodology, see Note 2. "Summary of Significant Accounting Policies" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report. For qualitative information about our OTTI charges, see Note 4. "Investments" in Item 1. "Financial Statements." of this Form 10-Q.

Federal Income Taxes

The following table provides information regarding federal income taxes:

| (\$ in million) | Quarter ended March 31, | |
|----------------------------|-------------------------|------|
| | 2015 | 2014 |
| Federal income tax expense | \$16.6 | 7.1 |
| Effective tax rate | 29 | % 28 |

Federal income tax expense increased in First Quarter 2015 compared to First Quarter 2014 due to higher pre-tax income, primarily driven by an improvement in our underwriting results. The effective tax rate for First Quarter 2015 compared to First Quarter 2014 increased slightly, as tax-advantaged income remained flat compared to the increase in pre-tax income. The majority of our differences from the statutory rate are from recurring nontaxable items, such as tax-advantaged interest and dividends received deductions.

We believe that our future effective tax rate will continue to be impacted by similar items, assuming no significant changes to tax laws occur that would impact our tax-advantaged investments.

Table of Contents

Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources

Capital resources and liquidity reflect our ability to generate cash flows from business operations, borrow funds at competitive rates, and raise new capital to meet operating and growth needs.

Liquidity

We manage liquidity with a focus on generating sufficient cash flows to meet the short-term and long-term cash requirements of our business operations. Our cash and short-term investment position of \$139 million at March 31, 2015 was comprised of \$26 million at Selective Insurance Group, Inc. (the "Parent") and \$113 million at the Insurance Subsidiaries. Short-term investments are generally maintained in "AAA" rated money market funds approved by the National Association of Insurance Commissioners. The Parent continues to maintain a fixed income security investment portfolio containing high-quality, highly-liquid government and corporate fixed income securities to generate additional yield. This portfolio amounted to \$56 million at March 31, 2015 compared to \$50 million at December 31, 2014.

Sources of cash for the Parent have historically consisted of dividends from the Insurance Subsidiaries, borrowings under lines of credit and loan agreements with certain Insurance Subsidiaries, and the issuance of stock and debt securities. We continue to monitor these sources, giving consideration to our long-term liquidity and capital preservation strategies.

We currently anticipate the Insurance Subsidiaries will pay \$58 million in total dividends to the Parent in 2015. Cash dividends of \$14.4 million were paid in First Quarter 2015. As of December 31, 2014, our allowable ordinary maximum dividend was \$162.0 million for 2015.

Any dividends to the Parent are subject to the approval and/or review of the insurance regulators in the respective domiciliary states and are generally payable only from earned surplus as reported in the statutory annual statements of those subsidiaries as of the preceding December 31. Although past dividends have historically been met with regulatory approval, there is no assurance that future dividends that may be declared will be approved. For additional information regarding dividend restrictions, refer to Note 20. "Statutory Financial Information, Capital Requirements, and Restrictions on Dividends and Transfers of Funds" in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

The Parent had no private or public issuances of stock or debt instruments during First Quarter 2015 and there were no borrowings under its \$30 million line of credit ("Line of Credit").

We have two Insurance Subsidiaries domiciled in Indiana ("Indiana Subsidiaries") that are members of the FHLBI. These Insurance Subsidiaries are Selective Insurance Company of South Carolina ("SICSC") and Selective Insurance Company of the Southeast ("SICSE"). Membership in the FHLBI provides these subsidiaries with access to additional liquidity. The Indiana Subsidiaries' aggregate investment of \$2.9 million provides them with the ability to borrow approximately 20 times the total amount of the FHLBI common stock purchased, at comparatively low borrowing rates. All borrowings from the FHLBI are required to be secured by certain investments. For additional information regarding the required collateral, refer to Note 4. "Investments" in Item 1. "Financial Statements." of this Form 10-Q.

The Parent's Line of Credit agreement permits collateralized borrowings by the Indiana Subsidiaries from the FHLBI so long as the aggregate amount borrowed does not exceed 10% of the respective Indiana Subsidiary's admitted assets from the preceding calendar year. Admitted assets amounted to \$564.3 million for SICSC and \$429.8 million for SICSE as of December 31, 2014, for a borrowing capacity of approximately \$99 million, of which \$60 million is currently outstanding (including \$15 million that was borrowed during First Quarter 2015). Accordingly, the Indiana Subsidiaries have the ability to borrow an additional \$39 million before the Line of Credit borrowing limit is met. The Parent has the ability to borrow an additional \$47 million from the Indiana Subsidiaries under lending agreements approved by the Indiana Department of Insurance. Similar to the Line of Credit agreement, these lending agreements

limit borrowings by the Parent from the Indiana Subsidiaries to 10% of the admitted assets of the respective Indiana Subsidiary. For additional information regarding the Parent's Line of Credit, refer to the section below entitled "Short-term Borrowings."

The Insurance Subsidiaries also generate liquidity through insurance float, which is created by collecting premiums and earning investment income before losses are paid. The period of the float can extend over many years. Our investment portfolio consists of maturity dates that continually provide a source of cash flows for claims payments in the ordinary course of business. The duration of the fixed income securities portfolio including short-term investments was 3.7 years as of March 31, 2015, while the liabilities of the Insurance Subsidiaries have a duration of 4.2 years. In addition, the Insurance Subsidiaries purchase reinsurance coverage for protection against any significantly large claims or catastrophes that may occur during the year.

Table of Contents

The liquidity generated from the sources discussed above is used, among other things, to pay dividends to our shareholders. Dividends on shares of the Parent's common stock are declared and paid at the discretion of the Board of Directors based on our operating results, financial condition, capital requirements, contractual restrictions, and other relevant factors.

Our ability to meet our interest and principal repayment obligations on our debt, as well as our ability to continue to pay dividends to our stockholders, is dependent on liquidity at the Parent coupled with the ability of the Insurance Subsidiaries to pay dividends, if necessary, and/or the availability of other sources of liquidity to the Parent. Our FHLBI borrowings are scheduled for repayment in 2016, with \$15 million due in July 2016 and \$45 million due in December 2016. Subsequent to these payments, our next principal repayment is due in 2034. Restrictions on the ability of the Insurance Subsidiaries to declare and pay dividends, without alternative liquidity options, could materially affect our ability to service debt and pay dividends on common stock.

Short-term Borrowings

Our Line of Credit with Wells Fargo Bank, National Association, as administrative agent, and Branch Banking and Trust Company (BB&T), was renewed effective September 26, 2013 with a borrowing capacity of \$30 million, which can be increased to \$50 million with the approval of both lending partners.

The Line of Credit provides the Parent with an additional source of short-term liquidity. The interest rate on our Line of Credit varies and is based on, among other factors, the Parent's debt ratings. The Line of Credit expires on September 26, 2017. There were no balances outstanding under the Line of Credit at any time during First Quarter 2015.

The Line of Credit agreement contains representations, warranties, and covenants that are customary for credit facilities of this type, including, without limitation, financial covenants under which we are obligated to maintain a minimum consolidated net worth, a minimum combined statutory surplus, and a maximum ratio of consolidated debt to total capitalization, as well as covenants limiting our ability to: (i) merge or liquidate; (ii) incur debt or liens; (iii) dispose of assets; (iv) make certain investments and acquisitions; and (v) engage in transactions with affiliates.

The table below outlines information regarding certain of the covenants in the Line of Credit:

| | Required as of March 31, 2015 | Actual as of March 31, 2015 |
|---|----------------------------------|--------------------------------|
| Consolidated net worth | \$905 million | \$1.3 billion |
| Statutory surplus | Not less than \$750 million | \$1.3 billion |
| Debt-to-capitalization ratio ¹ | Not to exceed 35% | 23.4% |
| A.M. Best financial strength rating | Minimum of A- | A |

¹ Calculated in accordance with the Line of Credit agreement.

Capital Resources

Capital resources provide protection for policyholders, furnish the financial strength to support the business of underwriting insurance risks, and facilitate continued business growth. At March 31, 2015, we had statutory surplus of \$1.3 billion, GAAP stockholders' equity of \$1.3 billion, and total debt of \$394.3 million, which equates to a debt-to-capital ratio of approximately 23%.

Our cash requirements include, but are not limited to, principal and interest payments on various notes payable, dividends to stockholders, payment of claims, payment of commitments under limited partnership agreements and capital expenditures, as well as other operating expenses, which include commissions to our distribution partners, labor costs, premium taxes, general and administrative expenses, and income taxes. For further details regarding our cash requirements, refer to the section below entitled, "Contractual Obligations, Contingent Liabilities, and

Commitments.”

We continually monitor our cash requirements and the amount of capital resources that we maintain at the holding company and operating subsidiary levels. As part of our long-term capital strategy, we strive to maintain capital metrics, relative to the macroeconomic environment, that support our targeted financial strength. Based on our analysis and market conditions, we may take a variety of actions, including, but not limited to, contributing capital to the Insurance Subsidiaries in our insurance operations, issuing additional debt and/or equity securities, repurchasing shares of the Parent’s common stock, and increasing stockholders’ dividends.

Table of Contents

Our capital management strategy is intended to protect the interests of the policyholders of the Insurance Subsidiaries and our stockholders, while enhancing our financial strength and underwriting capacity.

Book value per share increased to \$23.11 as of March 31, 2015, from \$22.54 as of December 31, 2014, due to \$0.69 in net income, partially offset by \$0.14 in dividends to our shareholders.

Ratings

We are rated by major rating agencies that issue opinions on our financial strength, operating performance, strategic position, and ability to meet policyholder obligations. We believe that our ability to write insurance business is most influenced by our rating from A.M. Best. In the second quarter of 2014, A.M. Best reaffirmed our rating of "A (Excellent)," their third highest of 13 financial strength ratings, with a "stable" outlook. The rating reflects A.M. Best's view that we have strong risk-adjusted capitalization, disciplined underwriting focus, increasing use of predictive modeling technology, strong distribution partner relationships, and consistently stable loss reserves. We have been rated "A" or higher by A.M. Best for the past 84 years. A downgrade from A.M. Best to a rating below "A-" is an event of default under our Line of Credit and could affect our ability to write new business with customers and/or distribution partners, some of whom are required (under various third-party agreements) to maintain insurance with a carrier that maintains a specified A.M. Best minimum rating.

Ratings by other major rating agencies are as follows:

Fitch Ratings ("Fitch") – Our "A+" rating was reaffirmed in First Quarter 2015, citing our improved underwriting results across all segments, solid capitalization with strong growth in shareholders' equity, and continued improvement in leverage and interest coverage metrics. Our stable outlook was affirmed reflecting a more conservative amount of financial leverage at year end 2014 with adequate financial flexibility.

S&P's Ratings Services – During the fourth quarter of 2014, S&P reaffirmed our financial strength rating of "A-" and revised our outlook to positive from stable. The rating reflects S&P's view of our strong business risk profile, strong competitive position, and very strong capital and earnings. The positive outlook for the rating reflects S&P's view of our ongoing efforts to improve geographic and product diversification and reduce risk concentrations in catastrophe prone areas. In addition, the positive outlook reflects S&P's expectation that we will steadily improve our operating performance and that our capital adequacy will remain redundant at a very strong level.

Moody's Investor Service ("Moody's") – Our "A2" financial strength rating was reaffirmed in the third quarter of 2014 by Moody's, which cited our solid regional franchise with established independent agency support, solid risk adjusted capitalization, strong invested asset quality, and recently improving underwriting profitability. Their outlook remains negative, reflecting Moody's view of challenges in achieving further reductions in segment concentrations and maintaining the pace and consistency of profitability.

Our S&P, Moody's, and Fitch financial strength and associated credit ratings affect our ability to access capital markets. The interest rate on our Line of Credit varies and is based on, among other factors, the Parent's debt ratings. There can be no assurance that our ratings will continue for any given period of time or that they will not be changed. It is possible that positive or negative ratings actions by one or more of the rating agencies may occur in the future.

Off-Balance Sheet Arrangements

At March 31, 2015 and December 31, 2014, we did not have any material relationships with unconsolidated entities or financial partnerships, also referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, we are not exposed to any material financing, liquidity, market, or credit risk that could arise if we had engaged in such relationships.

Contractual Obligations, Contingent Liabilities, and Commitments

Our future cash payments associated with: (i) loss and loss expense reserves; (ii) contractual obligations pursuant to operating leases for office space and equipment; (iii) notes payable; and (iv) contractual obligations related to our alternative and other investments portfolio have not materially changed since December 31, 2014. We expect to have the capacity to repay and/or refinance these obligations as they come due.

We have issued no material guarantees on behalf of others and have no trading activities involving non-exchange traded contracts accounted for at fair value. We have no material transactions with related parties other than those disclosed in Note 17. "Related Party Transactions" included in Item 8. "Financial Statements and Supplementary Data." of our 2014 Annual Report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

There have been no material changes in the information about market risk set forth in our 2014 Annual Report.

ITEM 4. CONTROLS AND PROCEDURES.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act")), as of the end of the period covered by this report. In performing this evaluation, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control – Integrated Framework ("COSO Framework") in 2013. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, our disclosure controls and procedures are: (i) effective in recording, processing, summarizing, and reporting information on a timely basis that we are required to disclose in the reports that we file or submit under the Exchange Act; and (ii) effective in ensuring that information that we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. No changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) of the Exchange Act) occurred during First Quarter 2015 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our Insurance Subsidiaries as either: (i) liability insurers defending or providing indemnity for third-party claims brought against our customers; or (ii) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss expense reserves. We expect that the ultimate liability, if any, with respect to such ordinary course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to our consolidated financial condition, results of operations, or cash flows.

Our Insurance Subsidiaries are also from time to time involved in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Our Insurance Subsidiaries are also involved from time to time in individual actions in which extra-contractual damages, punitive damages, or penalties are sought, such as claims alleging bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to our consolidated financial condition. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, an adverse outcome in certain matters could, from time to time, have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods. As of March 31, 2015, we do not believe the Company was involved in any legal action that could have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

ITEM 1A. RISK FACTORS.

Certain risk factors exist that can have a significant impact on our business, liquidity, capital resources, results of operations, financial condition, and debt ratings. The impact of these risk factors also could impact certain actions that we take as part of our long-term capital strategy, including but not limited to, contributing capital to any or all of the Insurance Subsidiaries, issuing additional debt and/or equity securities, repurchasing our equity securities, redeeming our fixed income securities, or increasing or decreasing stockholders dividends. We operate in a continually changing business environment and new risk factors emerge from time to time. Consequently, we can neither predict such new risk factors nor assess the potential future impact, if any, they might have on our business. There have been no material changes from the risk factors disclosed in Item 1A. "Risk Factors." in our 2014 Annual Report other than as discussed below.

We face risks regarding our flood business because of uncertainties regarding the NFIP.

We are the sixth largest insurance group participating in the WYO arrangement of the NFIP, which is managed by the Mitigation Division of Federal Emergency Management Agency ("FEMA") in the U.S. Department of Homeland Security. For WYO participation, we receive an expense allowance for policies written and a servicing fee for claims administered. Under the program, all losses are 100% reinsured by the Federal Government. Currently, the expense allowance is 30.8% of direct premiums written. The servicing fee is the combination of 0.9% of DPW and 1.5% of incurred losses.

The NFIP is funded by U.S Congress and in 2012, U.S. Congress passed, and the President signed, the Biggert-Waters Flood Insurance Reform Act of 2012 ("Biggert-Waters Act"). The Biggert-Waters Act: (i) extended NFIP funding to September 30, 2017; and (ii) moved the program to more market based rates for certain flood policyholders. FEMA implemented these rates throughout 2013, which created significant public discontent and Congressional concern over the impact of the new rates on NFIP customers.

Consequently, U.S Congress passed and, on March 21, 2014, the President signed into law, the Homeowner Flood Insurance Affordability Act of 2014 (“Flood Affordability Act”). The Flood Affordability Act substantially modifies certain provisions of the Biggert-Waters Act, including the reversal of certain rate increases resulting in premium refunds for many NFIP policyholders that began after October 1, 2014. Effective April 2015, the Flood Affordability Act effectuated certain changes to the NFIP, including: (i) an increase in the Reserve Fund Assessment; (ii) implementation of an annual surcharge on all new and renewal policies; (iii) an additional deductible option; and (iv) increases in the federal policy fee and basic rates.

As a WYO carrier, we are required to follow certain NFIP procedures when administering flood policies and claims. Some of these requirements may differ from our normal business practices and may present a reputational risk to our brand. Insurance companies are regulated by states; however, the NFIP is a federal program. Consequently, we have the risk that regulatory positions taken by the NFIP and a state regulator on the same issue may conflict.

Table of Contents

Despite the passage of the Flood Affordability Act, the role of the NFIP remains under scrutiny by policymakers. The uncertainty behind the public policy debate and politics of flood insurance reform make it difficult for us to predict the future of the NFIP and our continued participation in the program.

Changes in tax legislation initiatives could adversely affect our results of operations and financial condition.

We are subject to the tax laws and regulations of U.S. federal, state, and local governments, which may change in ways that adversely impact us. For example, federal tax legislation could be enacted that reduces the existing statutory U.S. federal corporate income tax rate from 35%, thereby reducing any deferred tax assets. This would require that we recognize, in full, a reduction of a previously-recognized federal tax benefit in the period when enacted, and, along with other changes in the tax rules that may increase our actual tax expense, could materially and adversely affect our results of operations.

In addition, our investment portfolio has benefited from tax exemptions and certain other tax laws, including, but not limited to, those governing dividends received deductions and tax-advantaged municipal bond interest. Federal and/or state tax legislation could be enacted that would lessen or eliminate some or all of the tax advantages currently benefiting us. This could negatively impact the value of our investment portfolio and, in turn, materially and adversely impact our results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

The following table provides information regarding our purchases of our common stock in First Quarter 2015:

| Period | Total Number of Shares Purchased ¹ | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Programs | Maximum Number of Shares that May Yet Be Purchased Under the Announced Programs |
|-----------------------|---|------------------------------|---|---|
| January 1 – 31, 2015 | 2,916 | \$26.48 | — | — |
| February 1 - 28, 2015 | 121,029 | 27.76 | — | — |
| March 1 - 31, 2015 | 5,312 | 26.91 | — | — |
| Total | 129,257 | \$27.70 | — | — |

¹During First Quarter 2015, 129,257 shares were purchased from employees in connection with the vesting of restricted stock units. These repurchases were made to satisfy tax withholding obligations with respect to those employees. These shares were not purchased as part of any publicly announced program. The shares that were purchased in connection with the vesting of restricted stock units were purchased at fair market value as defined in the Selective Insurance Group, Inc. 2005 Omnibus Stock Plan As Amended and Restated Effective as of May 1, 2010.
