NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Basis of Presentation

As used herein, the "Company," "we," "us," or "our" refers to Selective Insurance Group, Inc. (the "Parent"), and its subsidiaries, except as expressly indicated or unless the context otherwise requires. Our interim unaudited consolidated financial statements ("Financial Statements") have been prepared by us in conformity with U.S. generally accepted accounting principles ("GAAP") and the rules and regulations of the U.S. Securities and Exchange Commission ("SEC") regarding interim financial reporting. The preparation of the Financial Statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported financial statement balances, as well as the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. All significant intercompany accounts and transactions between the Parent and its subsidiaries are eliminated in consolidation.

Our Financial Statements reflect all adjustments that, in our opinion, are normal, recurring, and necessary for a fair presentation of our results of operations and financial condition. Our Financial Statements cover the first quarters ended March 31, 2019 ("First Quarter 2019") and March 31, 2018 ("First Quarter 2018"). These Financial Statements do not include all of the information and disclosures required by GAAP and the SEC for audited annual financial statements. Additionally, results of operations for any interim period are not necessarily indicative of results for a full year. Consequently, our Financial Statements should be read in conjunction with the consolidated financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2018 ("2018 Annual Report") filed with the SEC.

NOTE 2. Adoption of Accounting Pronouncements

The Financial Accounting Standards Board ("FASB") issued new leasing guidance through ASU 2016-02, Leases, which was issued in February 2016, as well as additional implementation guidance that was issued in 2018 and 2019 (collectively referred to as "ASU 2016-02"). ASU 2016-02 requires all lessees to recognize assets and liabilities on their balance sheets for the rights and obligations created by leases with terms longer than 12 months. For leases with a term of 12 months or less, an accounting policy election is allowed to recognize lease expense on a straight-line basis over the lease term.

ASU 2016-02 allows for certain practical expedients, accounting policy elections, and a transition method election. We adopted practical expedients related to reassessing: (i) whether our existing contracts are, or contain, leases; (ii) lease classification for existing leases; and (iii) initial direct costs for existing leases. Additionally, we adopted accounting policy elections to: (i) aggregate lease and non-lease components of a contract into a single lease component; and (ii) expense short-term leases on a straight-line basis over the lease term. We adopted ASU 2016-02 effective January 1, 2019. See Note 12. "Leases" in this Form 10-Q for additional information regarding our leases and the impact of this guidance on our financial condition and results of operations.

In June 2018, the FASB issued ASU 2018-07, Compensation - Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting ("ASU 2018-07"). The amendments in ASU 2018-07 expand the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. We adopted ASU 2018-07 in First Quarter 2019 and it did not have a material impact on our financial condition or results of operations.

Pronouncements to be effective in the future

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses ("ASU 2016-13"). ASU 2016-13 will change the way entities recognize impairment of financial assets by requiring immediate recognition of estimated credit losses expected to occur over the remaining life of many financial assets, including, among others, held-to-maturity ("HTM") debt securities, trade receivables, and reinsurance recoverables. This ASU will not impact

the impairment accounting model for available-for-sale ("AFS") debt securities. ASU 2016-13 requires a valuation allowance to be calculated on these financial assets, and that they be presented on the financial statements net of the valuation allowance. The valuation allowance is a measurement of expected losses that is based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. This methodology is referred to as the current expected credit loss model. ASU 2016-13 is effective for fiscal years beginning after December 15, 2019, including interim periods within those annual periods. We are currently evaluating the impact of this guidance on our financial condition and results of operations.

In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement ("ASU 2018-13"). ASU 2018-13 modifies the disclosure requirements for fair value measurements. The modifications removed the following disclosure requirements: (i) the amount of, and reasons for, transfers between Level 1 and Level 2 of the fair value hierarchy; (ii) the policy for timing of transfers between levels; and (iii) the valuation processes for Level 3 fair value measurements. This ASU added the following disclosure requirements: (i) the changes in unrealized gains and losses for the period included in other comprehensive income ("OCI") for recurring Level 3

Table of Contents

fair value measurements held at the end of the reporting period; and (ii) the range and weighted average of significant observable inputs used to develop Level 3 fair value measurements. This update is effective for annual and interim periods beginning after December 15, 2019, with early adoption permitted. As the requirements of this literature are disclosure only, ASU 2018-13 will not impact our financial condition or results of operations.

In August 2018, the FASB issued ASU 2018-14, Compensation - Retirement Benefits - Defined Benefit Plans - General: Disclosure Framework - Changes to the Disclosure Requirements for Defined Benefit Plans (“ASU 2018-14”). ASU 2018-14 modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. These modifications include: (i) removing the requirement to disclose the amount in accumulated other comprehensive income (“AOCI”) expected to be recognized as components of net periodic benefit cost over the next fiscal year; and (ii) adding the requirement to disclose an explanation of the reasons for significant gains or losses related to changes in the benefit obligation for the period. This update is effective for fiscal years ending after December 15, 2020, with early adoption permitted. As the requirements of this literature are disclosure only, ASU 2018-14 will not impact our financial condition or results of operations.

In August 2018, the FASB issued ASU 2018-15, Intangibles - Goodwill and Other - Internal-Use Software: Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract (“ASU 2018-15”). ASU 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. This update is effective for annual and interim periods beginning after December 15, 2019, with early adoption permitted. We are currently evaluating the impact of this guidance on our financial condition or results of operations.

NOTE 3. Statements of Cash Flows

Supplemental cash flow information was as follows:

NOTE 4. Investments

(a) Our HTM fixed income securities as of March 31, 2019 represented less than 1% of our total invested assets, largely unchanged compared to December 31, 2018. The carry value and net unrealized/unrecognized gains were \$36.5 million and \$1.5 million, respectively, at March 31, 2019, and \$37.1 million and \$1.3 million, respectively, at December 31, 2018. Included in the net unrealized/unrecognized gains were gross unrealized/unrecognized losses of \$0.1 million at March 31, 2019 and \$0.2 million at December 31, 2018.

Unrecognized holding gains and losses of HTM securities are not reflected in the Financial Statements, as they represent fair value fluctuations from the date a security is designated as HTM through the date of the balance sheet.

(b) Information regarding our AFS securities as of March 31, 2019 and December 31, 2018 was as follows:

Unrealized gains and losses of AFS securities represent fair value fluctuations from the later of: (i) the date a security is designated as AFS; or (ii) the date that an other-than-temporary impairment ("OTTI") charge is recognized on an AFS security, through the date of the balance sheet. These unrealized gains and losses are recorded in AOCI on the Consolidated Balance Sheets.

(c) The severity of impairment on AFS securities in an unrealized/unrecognized loss position averaged approximately 1% of amortized cost at March 31, 2019 and approximately 2% at December 31, 2018. Quantitative information regarding these losses is provided below.

¹ Gross unrealized losses include non-OTTI unrealized amounts and OTTI losses recognized in AOCI.

The decrease in the less than 12 months unrealized loss position was due to: (i) lower interest rates, with a 21-basis point decrease in 2-year U.S. Treasury Note yields and a 28-basis point decrease in 10-year U.S. Treasury Note yields during First Quarter 2019; and (ii) tightening option adjusted corporate credit spreads, with a 34-basis point decrease in the Bloomberg Barclays U.S. Aggregate Corporate Bond Index during First Quarter 2019. We do not currently intend to sell any of the securities in the tables above, nor will we be required to sell any of these securities.

Considering these factors, and in accordance with our review of these securities under our OTTI policy, as described in Note 2. "Summary of Significant Accounting Policies" within Item 8. "Financial Statements and Supplementary Data." of our 2018 Annual Report, we have concluded that they are temporarily impaired as we believe: (i) they will mature at par value; (ii) they have not incurred a credit impairment; and (iii) future values of these securities will fluctuate with changes in interest rates. This conclusion reflects our current judgment as to the financial position and future prospects of the entity that issued the investment security and underlying collateral.

(d) Fixed income securities at March 31, 2019, by contractual maturity, are shown below. Mortgage-backed securities are included in the maturity tables using the estimated average life of each security. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations, with or without call or prepayment penalties.

¹The maximum exposure to loss includes both the carry value of these investments and the related unfunded commitments. In addition, tax credits that have been previously recognized in Other securities are subject to the risk of recapture, which we do not consider significant.

We do not have a future obligation to fund losses or debts on behalf of the investments above; however, we are contractually committed to make additional investments up to the remaining commitment outlined above. We have not provided any non-contractual financial support at any time during 2019 or 2018.

The following table sets forth gross summarized financial information for our other investments portfolio, including the portion not owned by us. The majority of these investments are carried under the equity method of accounting. The last line of the table below reflects our share of the aggregate income or loss, which is the portion included in our Financial Statements. As the majority of these investments report results to us on a one quarter lag, the summarized financial statement information for the three-month period ended December 31 is included in our First Quarter results. This information is as follows:

(f) We have pledged certain AFS fixed income securities as collateral related to our relationships with the Federal Home Loan Bank of Indianapolis ("FHLBI") and the Federal Home Loan Bank of New York ("FHLBNY"). In addition, certain securities were on deposit with various state and regulatory agencies at March 31, 2019 to comply with insurance laws. We retain all rights regarding all securities pledged as collateral.

¹ Concurrent with the adoption of ASU 2016-02 discussed in Note 2. "Adoption of Accounting Pronouncements," finance lease obligations are now captured in Long-term debt on our Consolidated Balance Sheets.

Short Term Debt Activity

On March 7, 2019, Selective Insurance Company of America ("SICA") borrowed short-term funds of \$50 million from the FHLB NY at an interest rate of 2.64%. This borrowing was repaid on March 28, 2019.

Long Term Debt Activity

In First Quarter 2019, we issued \$300 million of 5.375% Senior Notes due 2049 at a discount of \$5.9 million which, when coupled with debt issuance costs of approximately \$3.4 million, resulted in net proceeds from the offering of \$290.7 million. The Senior Notes will pay interest on March 1 and September 1 of each year, beginning on September 1, 2019. A portion of the proceeds from this debt issuance was used to fully redeem the \$185 million aggregate principal amount of our 5.875% Senior Notes due 2043, with the remaining \$106 million being used for general corporate purposes. The 5.875% Senior Notes had pre-tax debt retirement costs of \$4.2 million, or \$3.3 million after tax, which was recorded in Interest expense on the Consolidated Statements of Income in First Quarter 2019.

For detailed information on our indebtedness, see Note 10. "Indebtedness" in Item 8. "Financial Statements and Supplementary Data." of our 2018 Annual Report.

Gross reserve for loss and loss expense at end of period	\$3,966,509	3,792,080

Prior year development in First Quarter 2019 of \$10.7 million was primarily driven by favorable casualty development of \$8.0 million in our workers compensation line of business and \$2.0 million in our general liability line of business.

Prior year development in First Quarter 2018 of \$3.9 million included \$8.0 million of favorable casualty development and \$4.1 million of unfavorable property development. The favorable casualty reserve development included \$16.0 million in our workers compensation line of business, partially offset by unfavorable development of \$8.0 million in our commercial automobile line of business.

NOTE 9. Segment Information

The results of our four reportable segments are evaluated as follows:

Our Standard Commercial Lines, Standard Personal Lines, and Excess and Surplus ("E&S") Lines are evaluated based on before and after-tax underwriting results (net premiums earned, incurred loss and loss expense, policyholder dividends, policy acquisition costs, and other underwriting expenses), return on equity ("ROE") contribution, and combined ratios.

Our Investments segment is primarily evaluated based on after-tax net investment income and its ROE contribution. Also included in Investment segment results are after-tax net realized and unrealized gains and losses, which are not included in non-GAAP operating income.

In computing the results of each segment, we do not make adjustments for interest expense or corporate expenses. We do not maintain separate investment portfolios for the segments and therefore, do not allocate assets to the segments.

The following summaries present revenues (net investment income and net realized and unrealized gains on investments in the case of the Investments segment) and pre-tax income for the individual segments:

NOTE 10. Retirement Plans

SICA's primary pension plan is the Retirement Income Plan for Selective Insurance Company of America (the "Pension Plan"). SICA also sponsors the Supplemental Excess Retirement Plan (the "Excess Plan") and a life insurance benefit plan. All plans are closed to new entrants and benefits ceased accruing under the Pension Plan and the Excess Plan after March 31, 2016. For more information concerning SICA's retirement plans, refer to Note 14. "Retirement Plans" in Item 8. "Financial Statements and Supplementary Data." of our 2018 Annual Report.

NOTE 12. Leases

We have various operating leases for office space, equipment, and fleet vehicles. In addition, we have various finance leases for computer hardware. Such lease agreements, which expire at various dates through 2030, are generally renewed or replaced by similar leases.

We determine if an arrangement is a lease on the commencement date of the contract. Lease assets represent our right to use an underlying asset for the lease term, and lease liabilities represent our obligation to make lease payments arising from the lease. The lease asset and liability are measured by the present value of the future minimum lease payments over the lease term. Our fleet vehicle leases include a residual value guarantee; however, it is not probable of being owed. Therefore, there is no impact to the lease liability or lease asset. To measure the present value, the discount rate available in the contract is used. If the discount rate is not readily determinable, our incremental borrowing rate is used. The lease asset is then adjusted to exclude lease incentives. We recognize variable lease payments in the period in which the obligation for those payments is incurred. Our lease terms may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. Lease expense is calculated using the straight-line method.

Upon adoption of ASU 2016-02 on January 1, 2019, we recorded operating lease right-of-use assets of \$20.7 million with related lease liabilities of \$21.0 million. The differential of \$0.3 million was recognized, on an after-tax basis, as a cumulative-effect adjustment to the opening balance of retained earnings as of January 1, 2019. Financing lease right-of-use assets and the related lease liabilities were \$0.9 million as of January 1, 2019. See Note 2. "Adoption of Accounting Pronouncements" in this Form 10-Q for additional information regarding ASU 2016-02 and accounting

policy elections made.

¹Prior to adoption of ASU 2016-02, our historical capital lease liability and asset were measured using an un-discounted cash flow stream due to immateriality of the capital lease population. As we have elected the practical expedient that does not require us to reassess our population of capital leases upon adoption of ASU 2016-02, our existing finance leases do not have a weighted-average discount rate.

NOTE 13. Litigation

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our ten insurance subsidiaries ("Insurance Subsidiaries") as either: (i) liability insurers defending or providing indemnity for third-party claims brought against our customers; or (ii) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss expense reserves. We expect that any potential ultimate liability in such ordinary course claims litigation will not be material to our consolidated financial condition, results of operations, or cash flows after consideration of provisions made for potential losses and costs of defense.

From time to time, our Insurance Subsidiaries also are named as defendants in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Similarly, our Insurance Subsidiaries are also named from time-to-time in individual actions seeking extra-contractual damages, punitive damages, or penalties, some of which allege bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that any potential ultimate liability in any such lawsuit will not be material to our consolidated financial condition, after consideration of provisions made for estimated losses. Nonetheless, given the inherent unpredictability of litigation and the large or indeterminate amounts sought in certain of these actions, an adverse outcome in certain matters could possibly have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

As of March 31, 2019, we do not believe the Company was involved in any legal action that could have a material adverse effect on our consolidated financial condition, results of operations, or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward-Looking Statements

As used herein, the "Company," "we," "us," or "our" refers to Selective Insurance Group, Inc. (the "Parent"), and its subsidiaries, except as expressly indicated or unless the context otherwise requires. In this Quarterly Report on Form 10-Q, we discuss and make statements regarding our intentions, beliefs, current expectations, and projections regarding our company's future operations and performance. Such statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are often identified by words such as "anticipates," "believes," "expects," "will," "should," and "intends" and their negatives. We caution prospective investors that such forward-looking statements are not guarantees of future performance. Risks and uncertainties are inherent in our future performance. Factors that could cause actual results to differ materially from those indicated by such forward-looking statements include, but are not limited to, those discussed under Item 1A. "Risk Factors" below in Part II. "Other Information." These risk factors may not be exhaustive. We operate in a continually changing business environment and new risk factors emerge from time to time. We can neither predict such new risk factors nor can we assess the impact, if any, of such new risk factors on our businesses or the extent to which any factor or combination of factors may cause actual results to differ materially from those expressed or implied in any forward-looking statements in this report. In light of these risks, uncertainties, and assumptions, the forward-looking events discussed in this report might not occur. We make forward-looking statements based on currently available information and assume no obligation to update these statements due to changes in underlying factors, new information, future developments, or otherwise.

Introduction

The Parent, through its ten insurance subsidiaries, collectively referred to as the "Insurance Subsidiaries," offers property and casualty insurance products in the standard and excess and surplus ("E&S") marketplaces. We classify

our business into four reportable segments, which are as follows:

Standard Commercial Lines;
Standard Personal Lines;
E&S Lines; and
Investments.

For further details regarding these segments, refer to Note 9. "Segment Information" in Item 1. "Financial Statements." of this Form 10-Q and Note 11. "Segment Information" in Item 8. "Financial Statements and Supplementary Data." of our Annual Report on Form 10-K for the year ended December 31, 2018 ("2018 Annual Report").

Table of Contents

Our Standard Commercial and Standard Personal Lines products and services are written through nine of our Insurance Subsidiaries, some of which write flood business through the Write Your Own ("WYO") program of the National Flood Insurance Program ("NFIP"). Our E&S products and services are written through one subsidiary, Mesa Underwriters Specialty Insurance Company ("MUSIC"). This subsidiary provides us with a nationally-authorized non-admitted platform to offer insurance products and services to customers who have not obtained coverage in the standard marketplace.

The following is Management's Discussion and Analysis ("MD&A") of the consolidated results of operations and financial condition, as well as known trends and uncertainties, that may have a material impact in future periods. Consequently, investors should read the MD&A in conjunction with Item 1. "Financial Statements." of this Form 10-Q and the consolidated financial statements in our 2018 Annual Report filed with the U.S. Securities and Exchange Commission. Within the MD&A, all prior year amounts in this Form 10-Q for non-catastrophe property losses, and the related ratios, have been adjusted to include the related loss expenses, which is consistent with the current year presentation.

In the MD&A, we will discuss and analyze the following:

• Critical Accounting Policies and Estimates;

• Financial Highlights of Results for the first quarters ended March 31, 2019 ("First Quarter 2019") and March 31, 2018 ("First Quarter 2018");

• Results of Operations and Related Information by Segment;

• Federal Income Taxes;

• Financial Condition, Liquidity, and Capital Resources;

• Ratings;

• Off-Balance Sheet Arrangements; and

• Contractual Obligations, Contingent Liabilities, and Commitments.

Critical Accounting Policies and Estimates

Our unaudited interim consolidated financial statements include amounts based on our informed estimates and judgments for those transactions that are not yet complete. Such estimates and judgments affect the reported amounts in the consolidated financial statements. Those estimates and judgments that were most critical to the preparation of the consolidated financial statements involved the following: (i) reserves for loss and loss expense; (ii) pension and post-retirement benefit plan actuarial assumptions; (iii) investment valuation and other-than-temporary-impairments ("OTTI"); and (iv) reinsurance. These estimates and judgments require the use of assumptions about matters that are highly uncertain and, therefore, are subject to change as facts and circumstances develop. If different estimates and judgments had been applied, materially different amounts might have been reported in the financial statements. For additional information regarding our critical accounting policies, refer to pages 37 through 46 of our 2018 Annual Report.

¹ Refer to the Glossary of Terms attached to our 2018 Annual Report as Exhibit 99.1 for definitions of terms used in this Form 10-Q.

² Non-GAAP operating income is used as an important financial measure by us, analysts, and investors, because the realization of net investment gains and losses on sales of securities in any given period is largely discretionary as to timing. In addition, these net realized investment gains and losses, OTTI that are charged to earnings, unrealized gains and losses on equity securities, and the debt retirement costs could distort the analysis of trends.

Reconciliations of net income, net income per diluted share, and annualized ROE to non-GAAP operating income, non-GAAP operating income per diluted share, and annualized non-GAAP operating ROE, respectively, are provided in the tables below:

The First Quarter 2019 results continued to build on our five-year track record of consistently generating double-digit non-GAAP operating ROEs on an annual basis that have been close to our target returns. At 11.6%, our First Quarter 2019 non-GAAP operating ROE is just below our 2019 target non-GAAP operating ROE of 12%.

Insurance Operations

Our insurance operations' annualized ROE increased 4.8 points, to 5.7%, in First Quarter 2019 compared to the same prior year period, reflecting a decrease in our combined ratio of 4.5 points. This decrease was principally driven by: (i) lower levels of both catastrophe and non-catastrophe property losses; (ii) higher levels of favorable prior year casualty reserve development; and (iii) a lower expense ratio.

The following table provides quantitative information for analyzing the combined ratio:

Our First Quarter 2019 results continue to reflect our efforts to: (i) achieve overall renewal pure price increases at levels that are in line with expected loss trend; (ii) generate new business; and (iii) improve the underlying profitability of our business through various underwriting and claims initiatives. We continue to execute on our

strategy for disciplined NPW growth, with 8% growth in First Quarter 2019 compared to First Quarter 2018. We experienced growth in all three of our insurance segments, most notably due to our Standard Commercial Lines and E&S Lines segments, which had NPW growth of 7% and 19%, respectively, primarily due to increased new business levels coupled with renewal pure price increases and strong retention. The Standard Commercial Lines growth was aided by the net appointment of 24 retail agents, excluding agency consolidations.

Underwriting Expenses

The underwriting expense ratio decreased 0.5 points in First Quarter 2019 compared to First Quarter 2018, primarily due to: (i) a 0.2-point reduction in employee-related expenses; and (ii) a 0.1-point reduction in profit-based compensation to our distribution partners.

Investments Segment

Net investment income, after tax, contributed 8.9 percentage points to ROE in First Quarter 2019, compared to 8.5 points in First Quarter 2018. The improvement in the period reflected after-tax net investment income growth of 15% in First Quarter 2019 compared to the same prior year period, principally driven by: (i) cash flow from operations that was 7% of NPW; (ii) active management of the core fixed income portfolio; and (iii) the \$106 million of net proceeds from our 5.375% Senior Notes issuance. The after-tax earned income yield on the portfolio averaged 2.8% during First Quarter 2019, compared to 2.5% in First Quarter 2018.

Net realized and unrealized gains and losses contributed 2.3 points to ROE in First Quarter 2019, an improvement of 4.3 points over the comparable prior year period. The significant driver of the improvement was unrealized gains on our equity portfolio in First Quarter 2019. These gains contributed \$8.0 million to net income, with an ROE contribution of 1.7 points, compared to an after-tax loss of \$11.1 million in First Quarter 2018, which reduced ROE by 2.6 points in First Quarter 2018.

Other

Our interest and corporate expenses, which are primarily comprised of stock compensation expense at the holding company level, reduced ROE by 3.7 points in First Quarter 2019, compared to 2.9 points in First Quarter 2018. On March 1, 2019, Selective issued 5.375% Senior Notes with an aggregate principal amount of \$300 million, the proceeds of which were used, in part, to redeem our 5.875% Senior Notes with an aggregate principal balance of \$185 million that became callable last year. As

Table of Contents

a result of this redemption, we incurred after-tax debt retirement costs of \$3.3 million, which reduced our ROE by 0.7 points. These costs have been excluded from non-GAAP operating income.

Outlook

We ended 2018 with record levels of capital and liquidity, and our strong First Quarter 2019 results continued to improve our financial position. Additionally, during the quarter we executed our first institutional public debt offering with the issuance of \$300 million aggregate principal amount of 5.375% Senior Notes. We used the net proceeds from this offering to redeem our then-outstanding \$185 million aggregate principal amount of 5.875% Senior Notes, with the remaining \$106 million of net proceeds being used for general corporate purposes.

For 2019, we have established a non-GAAP operating ROE target of 12%, which is an appropriate return for our shareholders based on our current estimated weighted average cost of capital, the current interest rate environment, and property and casualty insurance market conditions.

Our focus in 2019 will be on the following areas:

• Achieving written renewal pure price increases that are in line with expected loss trend. In First Quarter 2019, we achieved overall renewal pure price increases of 3.7%, which was in line with expectations.

• Delivering on our strategy for continued disciplined growth, which will be driven by the addition of new agents, greater "share of wallet" in our agents' offices, and geographic expansion. Our longer-term Standard Commercial Lines target is to attain a 3% market share in the states in which we operate, by appointing distribution partner relationships approximating 25% of their markets and seeking an average "share of wallet" of 12% across the relationships. This goal represents an additional premium opportunity in excess of \$2.7 billion in our 27 state footprint. In First Quarter 2019, we achieved NPW growth of 8%.

• Continuing to enhance the customer experience strategy that we have been highlighting over the past year, including value-added technologies and services such as: (i) our "Selectiv[®] Drive" program, which was introduced to certain commercial automobile policyholders through our distribution partners in the fourth quarter of 2018; (ii) proactive communications in relation to product recalls, possible loss activity, or policy changes; (iii) technology usage to reduce claim cycle time, such as SWIFT claim-fast tracking and EZ Write; and (v) fully digital self-service capabilities for our customers.

• Improving profitability in our lines of business by: (i) generating overall renewal pure price increases that are in line with expected loss trend; (ii) actively managing the new and renewal books in targeted industry segments, which we expect will have a positive impact on profitability through business mix; and (ii) within our E&S segment, exiting some underperforming classes, while entering into new distribution relationships.

• Actively managing the investment portfolio to enhance after-tax yields while managing credit, duration, and liquidity risk. There was a significant decline in interest rates in First Quarter 2019, which demonstrates the need to maintain a strong focus on underwriting discipline to generate adequate returns on invested capital.

As we look to the remainder of 2019, we remain extremely pleased with our financial and strategic position. We are steadfastly focused on underwriting discipline as we execute on our various strategies to generate profitable growth. The investments we are making today in our franchise distribution model, sophisticated underwriting tools and technology, and overall customer experience in an omni-channel environment, will position us to continue as a leader in the coming years.

Turning to expectations for 2019, A.M. Best Company's ("A.M. Best") "US Property/Casualty: 2019 Review & Preview" is currently forecasting a property and casualty industry statutory combined ratio of 101.2%, including 5 points of catastrophe losses, with a return on equity of 4.8%.

After one quarter of results, we are increasing our full-year 2019 after-tax net investment income guidance by \$5 million, to \$180 million, mainly due to net proceeds of \$106 million from the recent 5.375% Senior Notes issuance. All other assumptions remain the same. Our full-year expectations are as follows:

• A GAAP combined ratio, excluding catastrophe losses, of 92.0%. This assumes no additional prior-year casualty reserve development;

• Catastrophe losses of 3.5 points;

Table of Contents

After-tax net investment income of \$180 million, which includes \$8 million after-tax net investment income from our alternative investments;

An overall effective tax rate of approximately 19%, which also includes an effective tax rate of 18% for net investment income, reflecting a tax rate of 5.25% for tax-advantaged municipal bonds, and a tax rate of 21% for all other items; and

Weighted average shares of 60 million on a diluted basis.

For additional information regarding the favorable prior year casualty reserve development by line of business, see the "Financial Highlights of Results for First Quarter 2019 and First Quarter 2018" section above and the line of business discussions below.

There was a 0.7-point decrease in the underwriting expense ratio in First Quarter 2019 compared to First Quarter 2018, the significant drivers of which were as follows:

▲ 0.3-point reduction in employee-related expenses; and

▲ 0.2-point reduction in profit-based compensation to our distribution partners.

The following is a discussion of our most significant Standard Commercial Lines of business:

General Liability

(\$ in thousands)	Quarter ended		Change

The combined ratio decrease in First Quarter 2019 compared to First Quarter 2018 included the impact of favorable prior year casualty reserve development, as illustrated in the table below:

(Favorable) prior year casualty reserve development	\$(2.0)	(1.2)) pts	\$—	pts(1.2) pts

The First Quarter 2019 development was primarily attributable to favorable development on loss severities in accident years 2015 and 2016.

In addition, the combined ratio benefited from a lower underwriting expense ratio, which decreased by 0.6 points in First Quarter 2019 compared to First Quarter 2018.

Table of Contents

The increase in NPW in First Quarter 2019 compared to First Quarter 2018 reflects renewal pure price increases on this line, coupled with an increase in new business as we continue to write commercial automobile policies as part of our overall customer accounts.

The combined ratio improved 4.7 points in First Quarter 2019 compared to First Quarter 2018, driven by the following:

(\$ in millions)	First Quarter 2019		First Quarter 2018		Change	
	Loss and Loss Expenses Incurred	Impact on Combined Ratio	Loss and Loss Expenses Incurred	Impact on Combined Ratio	in	Ratio
Non-catastrophe property loss and loss expenses	\$25.1	19.1 pts	\$22.6	19.1 pts	—	pts
Unfavorable prior year casualty reserve development	—	—	8.0	6.8	(6.8)
Catastrophe losses	0.2	0.1	0.9	0.7	(0.6)
Total	25.3	19.2	31.5	26.6	(7.4)

Partially offsetting the items above was a 4.3-point increase in current year loss costs. This increase reflects the elevated frequencies and severities we experienced during 2018 that are reflected in our 2019 accident year loss expectations. While very early in the 2019 accident year, reported claims frequencies are currently within our expectations.

As seen in the table above, this line of business did not experience any prior year casualty reserve development in First Quarter 2019, and the unfavorable development in First Quarter 2018 was primarily due to greater than expected claims frequencies and to a lesser extent, severities in accident years 2015 through 2017. In First Quarter 2019, we have not seen pressure on the prior accident years' reserves, as frequencies and severities were within expectations.

This line of business remains an area of focus for both us and the industry, as profitability challenges continue to generate combined ratios that are higher than target levels. To address profitability in this line, we have been actively implementing price increases, which averaged 7.3% in First Quarter 2019. In addition to price increases, we have also been actively managing our new and renewal business in targeted industry segments, which we expect will have a positive impact on profitability through business mix improvement. Over the longer term, we expect accounts that adopt our recently introduced Selective® Drive program will have greater insight to their commercial auto risks and have the potential to reduce their loss experience.

The increase in the combined ratio in First Quarter 2019 compared to First Quarter 2018 was driven by a lower level of favorable prior year casualty reserve development, as follows:

(\$ in millions)	First Quarter 2019		First Quarter 2018		Change Points
	Loss and Expense Incurred	Impact on Combined Ratio	Loss and Expense Incurred	Impact on Combined Ratio	
(Favorable) prior year casualty reserve development	\$(8.0)	(10.2) pts	\$(16.0)	(20.3) pts	10.1 pts

The development in both periods was primarily due to lower severities in accident years 2016 and prior.

Partially offsetting the lower favorable prior year development was a 1.2-point reduction in the underwriting expense ratio.

Table of Contents

While reported profitability on this line remains strong due to favorable emergence on prior year reserves, current accident year margins do not support the continued negative pricing levels that are being set by the National Council on Compensation Insurance and independent state Rating Bureaus. A reduction or reversal in the trend of favorable frequencies and severities has the potential to significantly increase this line's combined ratio, which we are monitoring closely.

First Quarter 2018 had elevated catastrophe losses, primarily related to a winter storm that impacted the east coast of the United States in early January and several Nor'easters in March, compared to less severe catastrophe activity in First Quarter 2019. Additionally, First Quarter 2018 had elevated non-catastrophe property losses that principally related to a January deep freeze in our footprint states and a relatively large number of severe fire losses.

NPW increased 19% in the quarter compared to a year ago, driven by a 41% increase in new business. Over the past year, we have taken steps to exit some underperforming classes of E&S business, while entering into new distribution relationships. The premium growth in First Quarter 2019 compared to First Quarter 2018 continues to reflect the impact of one particularly large relationship that we reestablished in the second quarter of 2018. Quantitative information on the premium in this segment is as follows:

(\$ in millions)	Quarter ended March		Change	
	31, 2019	2018	% or Points	
Direct new business	\$25.7	18.3	41	%

While the relatively small size of this segment can lead to some volatility in results, improved underwriting, pricing, and claims outcomes have us on track to achieve our risk-adjusted profitability target for this segment by the end of 2020. The combined ratio in First Quarter 2019 improved 9.0 points compared to First Quarter 2018, primarily driven by property losses, as outlined in the table below:

Investments

The primary objective of the investment portfolio is to maximize after-tax net investment income and the overall total return of the portfolio, while maintaining a high credit quality core fixed income securities portfolio and managing our duration risk profile. The effective duration of the fixed income securities portfolio as of March 31, 2019 was 3.7 years, compared to the Insurance Subsidiaries' liability duration as of December 31, 2018 of approximately 3.6 years. The effective duration of the fixed income securities portfolio is monitored and managed to maximize yield, while managing interest rate risk at an acceptable level. We maintain a well-diversified portfolio across sectors, credit quality, and maturities that affords us ample liquidity. Purchases and sales are made with the intent of maximizing investment returns in the current market environment while balancing capital preservation. Over time, we may seek to increase or decrease the duration and overall credit quality of the portfolio based on market conditions.

Our investment philosophy includes certain return and risk objectives for the fixed income, equity, and other investment portfolios. After-tax yield and net investment income generation are key drivers to our investment strategy, which we believe will be obtained through active management of the portfolio.

Total Invested Assets

(\$ in thousands)	March 31,	December 31,	Change	
	2019	2018		%
Total invested assets	\$6,233,745	5,960,651	5	%

Unrealized (loss) gain – after tax	97,858	9,414	939	

¹Includes unrealized gains on fixed income securities and equity securities.

The increase in invested assets at March 31, 2019 compared to December 31, 2018 was driven by: (i) operating cash flow generated in First Quarter 2019 of \$47 million; (ii) pre-tax unrealized gains in our fixed income and equity securities portfolios of \$112 million due to a reduction in interest rates and tightening corporate credit spreads, as well as strong performance in U.S. equities during First Quarter 2019; and (iii) net proceeds of \$106 million from the issuance of our 5.375% Senior Notes and the redemption of our 5.875% Senior Notes in March 2019. For additional information regarding these debt transactions, see Note 5. "Indebtedness" in Item 1. "Financial Statements" of this Form 10-Q.

At March 31, 2019, our fixed income securities and short-term investment portfolios represented 95% of our total invested assets, consistent with December 31, 2018. These portfolios had a weighted average credit rating of "AA-," with 98% of the securities in the portfolio being investment grade quality at both March 31, 2019 and December 31, 2018. The sector composition and credit quality of our major asset categories within our fixed income securities portfolio did not significantly change from December 31, 2018.

For details regarding the credit quality of our portfolio, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." of our 2018 Annual Report.

Net Investment Income

The components of net investment income earned for the indicated periods were as follows:

Table of Contents

The increase in pre-tax net investment income in First Quarter 2019 compared to First Quarter 2018 was driven primarily by: (i) cash flow from operations that was 7% of NPW; (ii) active management of the core fixed income portfolio; and (iii) the \$106 million of net proceeds from our 5.375% Senior Notes issuance.

Realized and Unrealized Gains and Losses

Our general philosophy for sales of securities is to reduce our exposure to securities and sectors based on economic evaluations and when the fundamentals for that security or sector have deteriorated, or to opportunistically trade out of securities to other securities with better economic return characteristics. Net realized and unrealized gains and losses for the indicated periods were as follows:

(\$ in thousands)	Quarter ended	
	March 31,	
	2019	2018
Net realized gains on disposals, excluding OTTI	\$3,444	4,731
OTTI charges	(104)	(1,212)
Unrealized gains (losses) recognized in income on equity securities	10,111	(14,068)
Total net realized and unrealized gains (losses)	\$13,451	(10,549)

The increase in net realized and unrealized gains in First Quarter 2019 compared to the same period last year was primarily driven by market value fluctuations on our equity portfolio.

Federal Income Taxes

The following table provides information regarding federal income taxes:

(\$ in millions)	Quarter ended	
	March 31,	
	2019	2018
Federal income tax expense	\$12.3	1.0
Effective tax rate	16.8 %	5.0

The effective tax rate in the table above differs from the statutory rate of 21% principally due to the benefit of tax-advantaged interest and dividend income and the impact of excess tax benefits on our stock-based compensation awards, partially offset by the disallowance of certain executive compensation. The increase in the effective tax rate in First Quarter 2019 compared to First Quarter 2018 reflects the contribution of these benefits in relation to overall pre-tax income this year compared to last year.

We continue to expect a full-year effective tax rate of 19%, however, on a quarter-to-quarter basis, there are certain discrete items that cause the quarterly effective rate to differ from our annual expectation. Our effective tax rate in First Quarter 2019 is lower than our full-year expectation as the tax benefit on our stock-based compensation awards are recorded in the period in which they occur and the majority of these benefits occur in the first quarter of each year.

Financial Condition, Liquidity, and Capital Resources

Capital resources and liquidity reflect our ability to generate cash flows from business operations, borrow funds at competitive rates, and raise new capital to meet operating and growth needs.

Liquidity

We manage liquidity with a focus on generating sufficient cash flows to meet the short-term and long-term cash requirements of our business operations. Our cash, excluding restricted cash, and short-term investment position of \$291 million at March 31, 2019 was comprised of \$103 million at the Parent and \$188 million at the Insurance Subsidiaries. Short-term investments are generally maintained in "AAA" rated money market funds approved by the National Association of Insurance Commissioners. The Parent maintains a fixed income security investment portfolio

containing high-quality, highly-liquid government and corporate fixed income securities. This portfolio amounted to \$154 million at March 31, 2019 and \$110 million at December 31, 2018. The Parent had a total of \$257 million of cash and liquid investments at March 31, 2019, compared to \$146 million at December 31, 2018, with the increase being driven by our capital market activities discussed below. The level of cash and invested assets may fluctuate based on various factors, including the amount and availability of dividends from our Insurance Subsidiaries, investment income, expenses, and other liquidity needs of the Parent. Our target is to maintain the cash and liquidity at the Parent to two times its expected annual needs, which is currently estimated at \$160 million.

Table of Contents

Sources of Liquidity

Sources of cash for the Parent have historically consisted of dividends from the Insurance Subsidiaries, the investment portfolio discussed above, borrowings under lines of credit and loan agreements with certain Insurance Subsidiaries, and the issuance of stock and debt securities. We continue to monitor these sources, giving consideration to our long-term liquidity and capital preservation strategies.

Insurance Subsidiary Dividends

We currently anticipate that the Insurance Subsidiaries may pay \$110 million in total dividends to the Parent in 2019, a \$10 million increase from \$100 million paid in 2018, of which \$28 million was paid during First Quarter 2019. As of December 31, 2018, our allowable ordinary maximum dividend was \$210 million for 2019.

Any dividends to the Parent are subject to the approval and/or review of the insurance regulators in the respective Insurance Subsidiaries' domiciliary states and are generally payable only from earned surplus as reported in the statutory annual statements of those subsidiaries as of the preceding December 31. Although past dividends have historically been met with regulatory approval, there is no assurance that future dividends that may be declared will be approved. For additional information regarding dividend restrictions, refer to Note 19. "Statutory Financial Information, Capital Requirements, and Restrictions on Dividends and Transfers of Funds" in Item 8. "Financial Statements and Supplementary Data." of our 2018 Annual Report.

The Insurance Subsidiaries generate liquidity through insurance float, which is created by collecting premiums and earning investment income before losses are paid. The period of the float can extend over many years. Our investment portfolio consists of maturity dates that continually provide a source of cash flows for claims payments in the ordinary course of business. The effective duration of the fixed income securities portfolio was 3.7 years as of March 31, 2019, while the liabilities of the Insurance Subsidiaries had a duration as of December 31, 2018 of 3.6 years. As protection for the capital resources of the Insurance Subsidiaries, we purchase reinsurance coverage for significantly large claims or catastrophes that may occur during the year.

Line of Credit

The Parent's line of credit with Wells Fargo Bank, National Association, as administrative agent, and Branch Banking and Trust Company (BB&T) (referred to as our "Line of Credit"), was renewed effective December 1, 2015 with a borrowing capacity of \$30 million, which can be increased to \$50 million with the approval of both lending partners. This Line of Credit expires on December 1, 2020 and has an interest rate that varies and is based on, among other factors, the Parent's debt ratings. There were no balances outstanding under the Line of Credit at March 31, 2019 or at any time during 2019.

For additional information regarding the Line of Credit agreement and corresponding representations, warranties, and covenants, refer to Note 10. "Indebtedness" in Item 8. "Financial Statements." of our 2018 Annual Report. We continue to meet all covenants under our Line of Credit agreement as of March 31, 2019.

Several of our Insurance Subsidiaries are members of certain branches of the Federal Home Loan Bank, which provides those subsidiaries with additional access to liquidity. Membership is as follows:

Branch	Insurance Subsidiary Member
Federal Home Loan Bank of Indianapolis ("FHLBI")	Selective Insurance Company of South Carolina ("SICSC") ¹ Selective Insurance Company of the Southeast ("SICSE") ¹
Federal Home Loan Bank of New York ("FHLBNY")	Selective Insurance Company of America ("SICA") Selective Insurance Company of New York ("SICNY")

¹These subsidiaries are jointly referred to as the "Indiana Subsidiaries" as they are domiciled in Indiana.

The Line of Credit permits aggregate borrowings from the FHLBI and the FHLBNY up to 10% of the respective member company's admitted assets for the previous year end. Additionally, as SICNY is domiciled in New York, this

company's borrowings from the FHLB NY are limited to the lower of 5% of admitted assets for the most recently completed fiscal quarter or 10% of admitted assets for the previous year end. Consistent with December 31, 2018, we have a remaining capacity of \$288.5 million for Federal Home Loan Bank borrowings, with a \$12.9 million additional stock purchase requirement to allow the member companies to borrow their full remaining capacity amounts.

All borrowings from both the FHLBI and the FHLB NY are required to be secured by investments pledged as collateral. For additional information regarding collateral outstanding, refer to Note 4. "Investments" in Item 1. "Financial Statements." of this Form 10-Q.

Table of Contents

Short-term Borrowings

In First Quarter 2019, SICA borrowed \$50 million from the FHLB NY, which was repaid on March 28, 2019. For further information regarding this borrowing, see Note 5. "Indebtedness" in Item 1. "Financial Statements." of this Form 10-Q.

Intercompany Loan Agreements

The Parent has lending agreements with the Indiana Subsidiaries that have been approved by the Indiana Department of Insurance, which provide additional liquidity to the Parent. Similar to the Line of Credit agreement, these lending agreements limit borrowings by the Parent from the Indiana Subsidiaries to 10% of the admitted assets of the respective Indiana Subsidiary. The remaining capacity under these intercompany loan agreements was \$77.5 million as of March 31, 2019, compared to \$76.2 million as of December 31, 2018.

Capital Market Activities

In First Quarter 2019, the Parent issued \$300 million of 5.375% Senior Notes at a discount of \$5.9 million which, when coupled with debt issuance costs of approximately \$3.4 million, resulted in net proceeds from the offering of \$290.7 million. The Parent used a portion of the proceeds to fully redeem the then outstanding \$185 million aggregate principal amount of its 5.875% Senior Notes, with the remaining \$106 million being used for general corporate purposes. For additional information on these transactions, refer to Note 5. "Indebtedness" in Item 1. "Financial Statements." of this Form 10-Q. The Parent had no private or public issuances of stock during First Quarter 2019.

Uses of Liquidity

The liquidity generated from the sources discussed above is used, among other things, to pay dividends to our shareholders. Dividends on shares of the Parent's common stock are declared and paid at the discretion of the Board of Directors based on our operating results, financial condition, capital requirements, contractual restrictions, and other relevant factors.

Our ability to meet our interest and principal repayment obligations on our debt, as well as our ability to continue to pay dividends to our stockholders, is dependent on liquidity at the Parent coupled with the ability of the Insurance Subsidiaries to pay dividends, if necessary, and/or the availability of other sources of liquidity to the Parent. Our next two principal repayments, each in the amount of \$25 million, are due in 2021, and the next principal payment is due in 2026.

Restrictions on the ability of the Insurance Subsidiaries to declare and pay dividends, without alternative liquidity options, could materially affect our ability to service debt and pay dividends on common stock.

Capital Resources

Capital resources provide protection for policyholders, furnish the financial strength to support the business of underwriting insurance risks, and facilitate continued business growth. At March 31, 2019, we had GAAP stockholders' equity of \$1.9 billion and statutory surplus of \$1.8 billion. With total debt of \$550.1 million, our debt-to-capital ratio was 22.2% at March 31, 2019.

Our cash requirements include, but are not limited to, principal and interest payments on various notes payable, dividends to stockholders, payment of claims, payment of commitments under limited partnership agreements and capital expenditures, as well as other operating expenses, which include commissions to our distribution partners, labor costs, premium taxes, general and administrative expenses, and income taxes. For further details regarding our cash requirements, refer to the section below entitled, "Contractual Obligations, Contingent Liabilities, and Commitments."

We continually monitor our cash requirements and the amount of capital resources that we maintain at the holding company and operating subsidiary levels. As part of our long-term capital strategy, we strive to maintain capital metrics, relative to the macroeconomic environment, that support our targeted financial strength. Based on our analysis and market conditions, we may take a variety of actions, including, but not limited to, contributing capital to the Insurance Subsidiaries in our insurance operations, issuing additional debt and/or equity securities, calling existing debt, repurchasing shares of the Parent's common stock, and increasing stockholders' dividends.

Our capital management strategy is intended to protect the interests of the policyholders of the Insurance Subsidiaries and our stockholders, while enhancing our financial strength and underwriting capacity.

Book value per share increased to \$32.51 as of March 31, 2019, from \$30.40 as of December 31, 2018, driven by \$1.02 in net income per share and \$1.36 in unrealized gains on our fixed income securities portfolio, partially offset by \$0.20 in dividends to our shareholders.

Ratings

We are rated by major rating agencies that issue opinions on our financial strength, operating performance, strategic position, and ability to meet policyholder obligations. We believe that our ability to write insurance business is most influenced by our rating from A.M. Best. We have been rated "A" or higher by A.M. Best for the past 88 years. A downgrade from A.M. Best to a rating below "A-" is an event of default under our Line of Credit and could affect our ability to write new business with customers and/or distribution partners, some of whom are required (under various third-party agreements) to maintain insurance with a carrier that maintains a specified A.M. Best minimum rating.

Our ratings have not changed from those reported in our "Ratings" section of Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations." in our 2018 Annual Report and continue to be as follows:

NRSRO	Financial Strength Rating	Outlook
A.M. Best	A	Stable
Moody's Investor Services ("Moody's")	A2	Stable
Fitch Ratings ("Fitch")	A+	Stable
Standard & Poor's Global Ratings ("S&P")	A	Stable

On April 19, 2019, Fitch reaffirmed our "A+" rating with a "stable" outlook. In taking this action, Fitch cited our strong capitalization and financial performance, with stable underwriting results and return metrics that have remained favorable compared to our peers.

Our S&P, Moody's, and Fitch financial strength and associated credit ratings affect our ability to access capital markets. The interest rate on our Line of Credit varies and is based on, among other factors, the Parent's debt ratings. There can be no assurance that our ratings will continue for any given period of time or that they will not be changed. It is possible that positive or negative ratings actions by one or more of the rating agencies may occur in the future.

Off-Balance Sheet Arrangements

At March 31, 2019 and December 31, 2018, we did not have any material relationships with unconsolidated entities or financial partnerships, such entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, we are not exposed to any material financing, liquidity, market, or credit risk that could arise if we had engaged in such relationships.

Contractual Obligations, Contingent Liabilities, and Commitments

Our future cash payments associated with: (i) loss and loss expense reserves; and (ii) contractual obligations pursuant to operating and financing leases for office space and equipment have not materially changed since December 31, 2018. The following table provides future cash payments on our notes payable as of March 31, 2019, giving consideration to the \$300 million 5.375% Senior Notes issuance and the redemption of our \$185 million 5.875% Senior Notes in First Quarter 2019, the details of which are contained in Note 5. "Indebtedness" in Item 1. "Financial Statements." in this Form 10-Q:

Contractual Obligations (\$ in millions)	Payment Due by Period	Less than			
		Total	1 year	1-3 years	3-5 years
Notes payable	\$560.0	—	50.0	—	510.0
Interest on debt obligations	671.9	29.1	57.7	56.6	528.5
Total	\$1,231.9	29.1	107.7	56.6	1,038.5

As of March 31, 2019, we had contractual obligations that expire at various dates through 2036 that may require us to invest up to \$217.3 million in alternative investments. There is no certainty that any such additional investment will be required. Additionally, as of March 31, 2019, we had the following contractual obligations: (i) \$15.0 million to further invest in non-publicly traded common stock within our equity portfolio that expire through 2023; and (ii) \$37.8 million to further invest in non-publicly traded collateralized loan obligations in our fixed income securities portfolio that expire through 2030. We expect to have the capacity to repay and/or refinance these obligations as they come due.

We have issued no material guarantees on behalf of others and have no trading activities involving non-exchange traded contracts accounted for at fair value. For additional details on transactions with related parties, see Note 16. "Related Party Transactions" in Item 8. "Financial Statements and Supplementary Data." in our 2018 Annual Report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

There have been no material changes in the information about market risk set forth in our 2018 Annual Report.

ITEM 4. CONTROLS AND PROCEDURES.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), as of the end of the period covered by this report. In performing this evaluation, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control – Integrated Framework ("COSO Framework") in 2013. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, our disclosure controls and procedures are: (i) effective in recording, processing, summarizing, and reporting information on a timely basis that we are required to disclose in the reports that we file or submit under the Exchange Act; and (ii) effective in ensuring that information that we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. No changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) of the Exchange Act) occurred during First Quarter 2019 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our Insurance Subsidiaries as either: (i) liability insurers defending or providing indemnity for third-party claims brought against our customers; or (ii) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid losses and loss expense reserves. We expect that any potential ultimate liability in such ordinary course claims litigation will not be material to our consolidated financial condition, results of operations, or cash flows after consideration of provisions made for potential losses and costs of defense.

From time to time, our insurance subsidiaries also are named as defendants in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Similarly, our Insurance Subsidiaries are also named from time-to-time in individual actions seeking extra-contractual damages, punitive damages, or penalties, some of which allege bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that any potential ultimate liability in any such lawsuit will not be material to our consolidated financial condition, after consideration of provisions made for estimated losses. Nonetheless, given the inherent unpredictability of litigation and the large or indeterminate amounts sought in certain of these actions, an adverse outcome in certain matters could possibly have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

As of March 31, 2019, we do not believe the Company was involved in any legal action that could have a material adverse effect on our consolidated financial condition, results of operations, or cash flows.

ITEM 1A. RISK FACTORS.

Certain risk factors exist that can have a significant impact on our business, liquidity, capital resources, results of operations, financial condition, and debt ratings. These risk factors might affect, alter, or change actions that we might take in executing our long-term capital strategy, including but not limited to, contributing capital to any or all of the

Insurance Subsidiaries, issuing additional debt and/or equity securities, repurchasing our equity securities, redeeming our fixed income securities, or increasing or decreasing stockholders' dividends. We operate in a continually changing business environment and new risk factors emerge from time to time. Consequently, we can neither predict such new risk factors nor assess the potential future impact, if any, they might have on our business. There have been no material changes from the risk factors disclosed in Item 1A. "Risk Factors." in our 2018 Annual Report.
