Notes to Consolidated Financial Statements

(Table amounts in thousands, except per share data, unaudited)

Note 1 – Summary of Significant Accounting Policies

The accounting policies followed in the preparation of the interim consolidated financial statements are consistent with those used in the preparation of the annual financial information. The interim consolidated financial statements reflect all normal and recurring adjustments, which are necessary, in the opinion of management, for a fair statement of results for the interim period presented. Results for the period ended September 30, 2014, are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. These interim consolidated financial statements are unaudited and should be read in conjunction with the audited financial statements and notes included in Old Second Bancorp, Inc.'s (the "Company") annual report on Form 10-K for the year ended December 31, 2013. Unless otherwise indicated, amounts in the tables contained in the notes to the consolidated financial statements are in thousands. Certain items in prior periods have been reclassified to conform to the current presentation.

The Company's consolidated financial statements are prepared in accordance with United States generally accepted accounting principles ("GAAP") and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the consolidated financial statements. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the consolidated financial statements.

All significant accounting policies are presented in Note 1 to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2013. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the consolidated financial statements and how those values are determined.

**Recent Accounting Pronouncements** 

In July 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-11 "Income Taxes (Topic 740) — Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 amended existing guidance related to the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss or a tax credit carryforward exists. These amendments provide that an unrecognized tax benefit, or a portion thereof, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except to the extent that a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date to settle any additional income taxes that would result from disallowance of a tax position, or the tax law does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, then the unrecognized tax benefit should be presented as a liability. These amendments are effective for interim and annual reporting periods beginning after December 15, 2013, and are incorporated in the financial statements contained in this report. The effect of adopting this standard does not have a material effect on the Company's operating results or financial condition.

In January 2014, the FASB issued ASU No. 2014-04 Receivables — Troubled Debt Restructurings by Creditors (Subtopic 310-40) — "Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." ASU 2014-04 is intended to reduce diversity in practice by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate property recognized. ASU 2014-04 requires a creditor to reclassify a collateralized consumer mortgage loan to real estate property upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. ASU 2014-04 is effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. For entities other than public business entities, the amendments in the ASU are effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. The adoption of this standard is not expected to have a material effect to the Company's operating results or financial condition.

In May 2014, the FASB issued ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)." The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this update recognized at the date of initial application. Early application is not permitted. The Company is assessing the impact of ASU 2014-09 on its accounting and disclosures.

#### **Table of Contents**

In June 2014, FASB issued Accounting Standards Update (ASU) No. 2014-12 "Compensation - Stock Compensation (Topic 718) - Accounting for Share Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." ASU 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for interim and annual periods beginning after December 15, 2015. The amendments can be applied prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented and to all new or modified awards thereafter. Early adoption is permitted. The adoption of this standard is not expected to have a material effect to the Company's operating results or financial condition.

In August 2014, FASB issued ASU No. 2014-15 "Presentation of Financial Statements—Going Concern (Subtopic 205-40) Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." ASU 2014-15 provide guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. ASU 2014-15 is effective for interim and annual periods beginning after December 15, 2016. The amendments in this Update are effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The adoption of this standard is not expected to have a material effect to the Company's operating results or financial condition.

Note 2 – Securities

Investment Portfolio Management

Our investment portfolio serves the liquidity and income needs of the Company. While the portfolio serves as an important component of the overall liquidity management at the Bank, portions of the portfolio will also serve as income producing assets. The size and composition of the portfolio reflects liquidity needs, loan demand and interest income objectives.

Portfolio size and composition will be adjusted from time to time. While a significant portion of the portfolio consists of readily marketable securities to address liquidity, other parts of the portfolio may reflect funds invested pending future loan demand or to maximize interest income without undue interest rate risk.

Investments are comprised of debt securities and non-marketable equity investments. Securities available-for-sale are carried at fair value. Unrealized gains and losses, net of tax, on securities available-for-sale are reported as a separate component of equity. This balance sheet component changes as interest rates and market conditions

change. Unrealized gains and losses are not included in the calculation of regulatory capital.

Securities held-to-maturity are carried at amortized cost and the discount or premium created in the 2013 transfer from available-for-sale securities or at the time of purchase thereafter is accreted or amortized to the maturity or expected payoff date but not an earlier call. In accordance with GAAP, the Company has the positive intent and ability to hold the securities to maturity.

Nonmarketable equity investments include Federal Home Loan Bank of Chicago ("FHLBC") stock and Federal Reserve Bank of Chicago ("Reserve Bank") stock. FHLBC stock was recorded at \$4.3 million and \$5.5 million at September 30, 2014, and December 31, 2013, respectively. Reserve Bank stock was recorded at \$4.8 million at September 30, 2014, and December 31, 2013. Our FHLBC stock is necessary to maintain access to FHLBC advances.

Recognition of other-than-temporary impairment was not necessary in the nine months ended September 30, 2014, or the year ended December 31, 2013. The changes in fair value related primarily to interest rate fluctuations. Our review of other-than-temporary impairment confirmed no credit quality deterioration.

Note 3 – Loans

Major classifications of loans were as follows:

	September 30, 20	December 31, 2013
Commercial	\$ 106,592	\$ 94,736
Real estate - commercial	600,649	560,233
Real estate - construction	41,936	29,351
Real estate - residential	365,602	390,201
Consumer	3,142	2,760
Overdraft	1,198	628
Lease financing receivables	8,398	10,069
Other	12,757	12,793
	1,140,274	1,100,771
Net deferred loan fees	608	485
	\$ 1,140,882	\$ 1,101,256

It is the policy of the Company to review each prospective credit in order to determine if an adequate level of security or collateral was obtained prior to making a loan. The type of collateral, when required, will vary from liquid assets to real estate. The Company's access to collateral, in the event of borrower default, is assured through adherence to lending laws, the Company's lending standards and credit monitoring procedures. The Bank generally makes loans solely within its market area. There are no significant concentrations of loans where the customers' ability to honor loan terms is dependent upon a single economic sector although the real estate related categories listed above represent 88.4% and 89.0% of the portfolio at September 30, 2014, and December 31, 2013, respectively.

<sup>1.</sup> The "All other" class includes overdrafts and net deferred costs.

#### Credit Quality Indicators:

The Company categorizes loans into credit risk categories based on current financial information, overall debt service coverage, comparison against industry averages, historical payment experience, and current economic trends. This

Recorded

analysis includes loans with outstanding balances or commitments greater than \$50,000 and excludes homogeneous loans such as home equity lines of credit and residential mortgages. Loans with a classified risk rating are reviewed quarterly regardless of size or loan type. The Company uses the following definitions for classified risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

#### **Table of Contents**

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Credits that are not covered by the definitions above are pass credits, which are not considered to be adversely rated.

Credit Quality Indicators by class of loans were as follows:

September 30, 2014		Special

Troubled debt restructurings ("TDRs") are loans for which the contractual terms have been modified and both of these conditions exist: (1) there is a concession to the borrower and (2) the borrower is experiencing financial difficulties. Loans are restructured on a case-by-case basis during the loan collection process with modifications generally initiated at the request of the borrower. These modifications may include reduction in interest rates, extension of term, deferrals of principal, and other modifications. The Bank participates in the U.S. Department of the Treasury's (the "Treasury") Home Affordable Modification Program ("HAMP") which gives qualifying homeowners an opportunity to refinance into more affordable monthly payments.

The specific allocation of the allowance for loan losses on a TDR is determined by either discounting the modified cash flows at the original effective rate of the loan before modification or is based on the underlying collateral value less costs to sell, if repayment of the loan is collateral-dependent. If the resulting amount is less than the recorded book value, the Bank either establishes a valuation allowance (i.e. specific reserve) as a component of the allowance for loan losses or charges off the impaired balance if it determines that such amount is a confirmed loss. This method is used consistently for all segments of the portfolio. The allowance for loan losses also includes an allowance based on a loss migration analysis for each loan category on loans that are not individually evaluated for specific impairment. All loans charged-off, including TDRs charged-off, are factored into this calculation by portfolio segment.

## Table of Contents

TDRs are classified as being in default on a case-by-case basis when they fail to be in compliance with the modified terms. The following table presents TDRs that defaulted during the periods shown and were restructured within the 12 month period prior to default. There was no TDR default activity for the three and nine months ended September 30, 2014.

		ult Activity oths Ended September 30, 2013	TDR Default Activity Nine Months Ended September 30,

#### **Table of Contents**

Note 7 – Borrowings

The following table is a summary of borrowings as of September 30, 2014, and December 31, 2013. Junior subordinated debentures are discussed in detail in Note 8:

	September 30, 2014	December 31, 2013
Securities sold under repurchase agreements	\$ 29,438	\$ 22,560
FHLBC advances	40,000	5,000
Junior subordinated debentures	58,378	58,378
Subordinated debt	45,000	45,000
Notes payable and other borrowings	500	500
	\$ 173,316	\$ 131,438

The Company enters into deposit sweep transactions where the transaction amounts are secured by pledged securities. These transactions consistently mature within 1 to 90 days from the transaction date and are governed by sweep repurchase agreements. All sweep repurchase agreements are treated as financings secured by U.S. government agencies and collateralized mortgage-backed securities and have a carrying amount of \$29.4 million at September 30, 2014, and \$22.6 million at December 31, 2013. The fair value of the pledged collateral was \$43.4 million and \$39.2 million at September 30, 2014 and December 31, 2013, respectively. At September 30, 2014, there were no customers with secured balances exceeding 10% of stockholders' equity.

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC. Total borrowings are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. As of September 30, 2014, the Bank had taken an advance of \$40.0 million on the FHLBC stock valued at \$4.3 million, collateralized securities with a fair value of \$93.1 million and loans with a principal balance of \$52.4 million, which carry a combined collateral value of \$91.2 million. The Company has excess collateral of \$49.9 million available to secure borrowings.

One of the Company's most significant borrowing relationships continued to be the \$45.5 million credit facility with a correspondent bank. That credit began in January 2008 and was originally composed of a \$30.5 million senior debt facility, which included \$500,000 in term debt, and \$45.0 million of subordinated debt. The subordinated debt and the term debt portion of the senior debt facility mature on March 31, 2018. The interest rate on the senior debt facility resets quarterly and at the Company's option, is based on, either the lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the subordinated debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the senior line of credit portion of the senior debt facility when it matured and was terminated. The Company had \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in subordinated debt at the end of both September 30, 2014, and December 31, 2013. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has

made all required interest payments on the outstanding principal balance on a timely basis.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the senior debt agreement. The senior debt agreement also contains certain customary representations and warranties, and financial covenants. At September 30, 2014, the Company was out of compliance with two of the financial covenants contained within the credit agreement. As of June 30, 2014, the Company reported being out of compliance on one of the financial covenants contained in the referenced credit agreement. Prior to 2013, the Company had been out of compliance with two of the financial covenants. The agreement provides that noncompliance is an event of default and as the result of the Company's failure to comply with a financial covenant, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line of the term debt by 200 basis points, (iii) declare the senior debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal of the senior debt is the \$500,000 in term debt. Because the subordinated debt is treated as Tier 2 capital for regulatory capital purposes, the senior debt agreement does not provide the lender with any rights of acceleration or other remedies with regard to the subordinated debt upon an event of default caused by the Company's failure to comply with a financial covenant. Specifically, the covenants that were not met address the Bank's return on average assets and nonperforming assets as a percentage of the Bank's primary capital, when calculated per the debt agreement.

#### Note 8 – Junior Subordinated Debentures

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I in June 2003. An additional \$4.1 million of cumulative trust preferred securities were sold in July 2003. The trust preferred securities may remain outstanding for a 30-year term but, subject to regulatory approval, can be called in whole or in part by the Company after June 30, 2008. When not in deferral, distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to Old Second Capital Trust I in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

#### **Table of Contents**

The Company issued an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional, unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the Old Second Capital Trust II in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

Under the terms of the subordinated debentures issued to each of Old Second Capital Trust I and II, the Company is allowed to defer payments of interest for 20 quarterly periods without default or penalty, but such amounts continue to accrue. Also during a deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Fixed Rate Cumulative Perpetual Preferred Stock (the "Series B Stock"), as discussed in Note 15. In August of 2010, the Company elected to defer regularly scheduled interest payments on the \$58.4 million of junior subordinated debentures. Because of the deferral on the subordinated debentures, the trusts deferred regularly scheduled dividends on the trust preferred securities. On April 21, 2014, the Company paid all outstanding interest, which totaled \$19.7 million, on the trust preferred securities to the trustees for payment to holders as of the next record date set forth in the indentures and terminated the deferral period. The Company paid \$1.1 million of interest due in the third quarter of 2014. Both of the debentures issued by the Company are disclosed on the Consolidated Balance Sheet as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Operations.

### Note 9 – Equity Compensation Plans

There are stock-based awards outstanding under the Company's 2008 Equity Incentive Plan (the "2008 Plan") and the Company's 2014 Equity Incentive Plan (the "2014 Plan," and together with the 2008 Plan, the "Plans"). The 2014 Plan was approved at the 2014 annual meeting of stockholders. Following approval of the 2014 Plan, no further awards will be granted under the 2008 Plan or any other Company equity compensation plan. A maximum of 375,000 shares may be issued under the 2014 Plan. The Plan authorizes the granting of qualified stock options, non-qualified stock options, restricted stock, restricted stock units, and stock appreciation rights. Awards may be granted to selected directors and officers or employees under the 2014 Plan at the discretion of the Compensation Committee of the Company's Board of Directors. As of September 30, 2014, 210,500 shares remained available for issuance under the 2014 Plan.

Total compensation cost that has been charged for the plans was \$189,000 in the first nine months of 2014 and \$123,000 in the first nine months of 2013.

There were no stock options granted in the third quarter of 2014 or 2013. All stock options are granted for a term of ten years. There were no stock options exercised during the third quarter of 2014 or 2013. There is no unrecognized compensation cost related to unvested stock options as all stock options of the Company's common stock have vested.

A summary of stock option activity in the Plans for the nine months ending September 30, 2014, is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Beginning outstanding Canceled Ending outstanding	325,500 - 325,500	\$ 29.56 - \$ 29.56	1.8	\$ -
Exercisable at end of period	325,500	\$ 29.56	1.8	\$ -

Generally, restricted stock and restricted stock units granted under the Plans vest three years from the grant date, but the Compensation Committee of the Company's Board of Directors has discretionary authority to change some terms including the amount of time until the vest date.

Awards under the 2008 Plan will become fully vested upon a merger or change in control of the Company. Under the 2014 Plan, upon a change in control of the Company, if (i) the 2014 Plan is not an obligation of the successor entity following the change in control, or (ii) the 2014 Plan is an obligation of the successor entity following the change in control and the participant incurs an involuntary termination, then the stock options, stock appreciation rights, stock awards and cash incentive awards under the 2014 Plan will become fully exercisable and vested. Performance-based awards generally will vest based upon the level of achievement of the applicable performance measures through the change in control.

#### **Table of Contents**

The Company granted restricted stock under its equity compensation plans beginning in 2005 and it began granting restricted stock units in February 2009. Restricted stock awards under the Plans generally entitle holders to voting and dividend rights upon grant and are subject to forfeiture until certain restrictions have lapsed including employment for a specific period. Restricted stock units under the Plans are also subject to forfeiture until certain restrictions have lapsed including employment for a specific period, and generally entitle holders to receive dividend equivalents during the restricted period but do not entitle holders to voting rights until the restricted period ends and shares are transferred in connection with the units.

There were no restricted awards issued under the Plans during the third quarter of 2014 and 184,500 restricted awards issued during the nine months ending September 30, 2014. There were no restricted awards issued during the third quarter of 2013 and 155,500 restricted awards issued for the nine months ending September 30, 2013. Compensation expense is recognized over the vesting period of the restricted award based on the market value of the award on the issue date.

A summary of changes in the Company's unvested restricted awards for the nine months ending September 30, 2014, is as follows:

	September 30, 2014		
		Weighted	
	Restricted	Average	
	Stock Shares	Grant Date	
	and Units	Fair Value	
Nonvested at January 1	185,500	\$ 2.95	
Granted	184,500	4.82	
Vested	(25,000)	2.06	
Forfeited	(20,000)	1.74	
Nonvested at September 30	325,000	\$ 4.15	

Total unrecognized compensation cost of restricted awards was \$1.0 million as of September 30, 2014, which is expected to be recognized over a weighted-average period of 2.48 years. Total unrecognized compensation cost of restricted awards was \$411,000 as of September 30, 2013, which was expected to be recognized over a weighted-average period of 2.46 years.

Note 10 – Earnings Per Share

The earnings per share – both basic and diluted – are included below as of September 30 (in thousands except for share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Basic earnings per share:

restricted share rights that are dilutive.				

#### **Table of Contents**

The above earnings per share calculation did not include a warrant for 815,339 shares of common stock that was outstanding as of September 30, 2014, and September 30, 2013 because the warrant was anti-dilutive. Of note, the warrant was sold at auction by the Treasury in June 2013 to a third party investor.

The Company completed the redemption of 25,669 shares of its Series B Stock in the second quarter of 2014. As previously disclosed, the Company completed a public offering of 15,525,000 shares of common stock in April of 2014. Net proceeds of over \$64.0 million were used to pay the accrued but unpaid interest on the Company's trust preferred securities or junior subordinated debentures discussed in Note 8, the accumulated but unpaid dividends on the Series B Stock and to complete this redemption. The amount remaining after the completion of these transactions was retained at the Company for use in addressing general corporate matters. The redemption price for such Series B Stock was 94.75% of the liquidation value of the Series B Stock provided that the holders of shares entered into agreements to forebear payment of dividends due and to waive any rights to such dividend upon redemption. The Company redeemed all shares of Series B Stock held by directors of the Company on the same terms.

#### Note 11 – Regulatory & Capital Matters

The Bank is subject to the risk-based capital regulatory guidelines, which include the methodology for calculating the risk-weighted Bank assets, developed by the Office of the Comptroller of the Currency (the "OCC") and the other bank regulatory agencies. In connection with the current economic environment, the Bank's current level of nonperforming assets and the risk-based capital guidelines, the Bank's board of directors has determined that the Bank should maintain a Tier 1 leverage capital ratio at or above eight percent (8%) and a total risk-based capital ratio at or above twelve percent (12%). The Bank currently exceeds those thresholds.

The Bank exceeded both board of directors' capital ratio objectives. At September 30, 2014, the Bank's Tier 1 capital leverage ratio was 11.67%, up 70 basis points from December 31, 2013, and well above the 8.00% objective. The Bank's total capital ratio was 18.47%, up 43 basis points from December 31, 2013, and also well above the objective of 12.00%.

On July 22, 2011, the Company entered into a Written Agreement with the Reserve Bank designed to maintain the financial soundness of the Company. Pursuant to the Written Agreement, the Company took certain actions and operated in compliance with the Written Agreement's provisions during its term. On January 17, 2014, the Reserve Bank terminated the Written Agreement. Although the Written Agreement has been terminated, the Company expects that it will continue to seek approval from the Reserve Bank prior to paying any dividends on its capital stock and incurring any additional indebtedness.

Bank holding companies are required to maintain minimum levels of capital in accordance with capital guidelines implemented by the Board of Governors of the Federal Reserve System. The general bank and holding company

capital adequacy guidelines are shown in the accompanying table, as are the capital ratios of the Company and the Bank, as of September 30, 2014, and December 31, 2013. The Company's total risk-based capital ratio has been adjusted to correctly account for the Company's subordinated debt, a portion of which was excluded from Tier 2 capital because the subordinated debt is within five years of maturity. This change has also been made in all relevant prior quarters and has resulted in an immaterial reduction in the Company's total risk-based capital ratio for those periods. The reduction in regulatory capital amounts and ratios has no impact on the Company's historical consolidated financial statements or stockholders' equity, which were stated in accordance with GAAP.

The Company completed the redemption of certain of its Series B Fixed Rate Cumulative Preferred Stock (the "Series B Stock") in the second quarter, 2014. The Company completed a public offering of common stock in April. Net proceeds of over \$64.0 million were used to pay the accrued but unpaid interest on trust preferred securities, the accumulated but unpaid dividends on the Series B Stock and to complete this redemption. All ratios for September 30, 2014 reflect these changes in the Company's capital.

At September 30, 2014, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered "adequately capitalized" under current regulatory defined capital ratios. The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies.

**Table of Contents** 

Capital levels and industry defined regulatory minimum required levels:

	Actual	for Capital to be Wel		for Capital			
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
September 30, 2014							
Total capital to risk weighted assets							
Consolidated	\$ 234,500	17.56 %	\$ 106,834	8.00 %	N/A	N/A

Tier 1 capital to risk weighted							
assets							
Consolidated	190,724	14.28	53,424	4.00	N/A	N/A	
Old Second Bank	230,087	17.22	53,446	4.00	80,170	6.00	
Tier 1 capital to average assets							
Consolidated	190,724	9.68	78,812	4.00	N/A	N/A	
Old Second Bank	230,087	11.67	78,864	4.00	98,581	5.00	
December 31, 2013							
Total capital to risk weighted assets							
Consolidated	\$ 191,139	15.16 %	\$ 100,865	8.00 %	N/A	N/A	
Old Second Bank	227,467	18.04	100,872	8.00	\$ 126,090	10.00 %	
Tier 1 capital to risk weighted							
assets							
Consolidated	134,199	10.65	50,403	4.00	N/A	N/A	
Old Second Bank	211,568	16.78	50,433	4.00	75,650	6.00	
Tier 1 capital to average assets							
Consolidated	134,199	6.96	77,126	4.00	N/A	N/A	
Old Second Bank	211,568	10.97	77,144	4.00	96,430	5.00	

<sup>1</sup> The Bank exceeded the general minimum regulatory requirements to be considered "well capitalized".

The Company's credit facility with Bank of America includes \$45.0 million in subordinated debt. That debt obligation qualifies at 60% and 80% of the original amount for Tier 2 regulatory capital at September 30, 2014 and December 31, 2013, respectively. In addition, the trust preferred securities continue to qualify as Tier 1 regulatory capital, and the Company treats the maximum amount of this security type allowable under regulatory guidelines as Tier 1 capital. As of September 30, 2014 all \$56.6 million of the trust preferred proceeds qualified as Tier 1 regulatory capital. As of December 31, 2013, trust preferred proceeds of \$51.6 million qualified as Tier 1 regulatory capital and \$5.0 million qualified as Tier 2 regulatory capital. All of the Series B Stock qualified as Tier 1 regulatory capital as of September 30, 2014, and December 31, 2013.

#### Dividend Restrictions and Deferrals

In addition to the above requirements, banking regulations and capital guidelines generally limit the amount of dividends that may be paid by a Bank without prior regulatory approval. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's profits, combined with the retained profit of the previous two years, subject to the capital requirements described above. The Bank has the ability and the authority to pay dividends to the Company to pay debt and to meet preferred dividend requirements.

As discussed in Note 8, as of September 30, 2014, the Company had \$58.4 million of junior subordinated debentures held by two statutory business trusts that it controls. The Company has the right to defer interest payments on the debentures for a period of up to 20 consecutive quarters, and elected to begin such a deferral in August 2010. However, all deferred interest must be paid before the Company may pay dividends on its common stock. In the second quarter of 2014, the Company terminated the deferral period and paid all accumulated and unpaid interest on the junior subordinated debentures which totaled \$19.7 million. The Company is currently paying interest as it comes due and \$1.1 million was paid in the third quarter of 2014.

Furthermore, as with the debentures discussed above, the Company is prohibited from paying dividends on its common stock unless it has fully paid all deferred dividends on the Series B Stock. In August 2010, it also began to defer the payment of dividends on such Series B Stock. Therefore, in addition to paying all the accrued and unpaid distributions on the debentures set forth above, the Company must also fully pay all deferred and unpaid dividends on the Series B Stock before it may reinstate the payment of dividends on the common stock.

On April 15, 2014, the Company declared a dividend of approximately \$15.8 million on its Series B Stock to stockholders of record on May 1, 2014. Series B Stock dividends of \$10.3 million were paid on May 15, 2014. The Company is currently paying dividends as they come due and \$1.1 million paid was paid on August 15, 2014.

#### **Table of Contents**

On April 28, 2014, the Company redeemed 25,669 shares of the Series B Stock from certain holders, which included certain of the Company's directors, at a redemption price of 94.75% of the per share liquidation value, or \$947.50 per share, for a total price of approximately \$24.3 million. The Company paid \$22.9 million to a large private investor and an additional \$1.4 million to Company directors for these purchases. The holders of such shares waived their rights to any dividends on the Series B Stock, and such holders did not receive any part of the declared dividend on the Series B Stock. In May, the Company paid \$10.3 million in Series B Stock dividends. In the second quarter, the Company also recognized benefit from \$5.4 million in net income available to common stockholders reflecting both reversal of dividends previously accrued as well as dividends accumulated but not accrued by the Company and waived by holders upon redemption.

Further detail on the junior subordinated debentures, the Series B Stock and the deferral of interest and dividends thereon is described in Notes 8 and 15.

Note 12 – Fair Value Option and Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established by the Company also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value are:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own view about the assumptions that market participants would use in pricing an asset or liability.

Transfers between levels are deemed to have occurred at the end of the reporting period. For the quarters ended September 30, 2014, and 2013 there were no significant transfers between levels.

Except for auction rate asset-backed securities, the majority of securities (available-for-sale and held-to-maturity) are valued by external pricing services or dealer market participants and are classified in Level 2 of the fair value hierarchy. Both market and income valuation approaches are utilized. Quarterly, the Company evaluates the methodologies used by the external pricing services or dealer market participants to develop the fair values to determine whether the results of the valuations are representative of an exit price in the Company's principal markets and an appropriate representation of fair value. The Company uses the following methods and significant assumptions to estimate fair value:

- · Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- · Other government-sponsored agency securities, MBS and some of the actively traded real estate mortgage investment conduits and collateralized mortgage obligations are priced using available market information including benchmark yields, prepayment speeds, spreads, volatility of similar securities and trade date.
- · State and political subdivisions are largely grouped by characteristics (e.g., geographical data and source of revenue in trade dissemination systems). Because some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities.
- During 2013, asset-backed auction rate securities were acquired and priced using data from dealer market
  participants until December 31, 2013. At December 31, 2013, to present and including asset-backed auction rate
  securities acquired in 2014, the Company utilized pricing data from a nationally recognized valuation firm providing
  specialized securities valuation services. Therefore, the valuations of auction rate asset-backed securities are
  considered Level 3 valuations.
- During the third quarter of 2014, asset-backed collateralized loan obligations were acquired and priced using data from a pricing matrix support by our bond accounting service provider and are therefore considered Level 2 valuations.
- · Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held-for-sale is determined using quoted secondary market prices.
- · Lending related commitments to fund certain residential mortgage loans, e.g. residential mortgage loans with locked interest rates to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of MBS are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including prices for MBS from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net

#### **Table of Contents**

servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.

- Interest rate swap positions, both assets and liabilities, are based on valuation pricing models using an income approach reflecting readily observable market parameters such as interest rate yield curves.
- · Both the credit valuation reserve on current interest rate swap positions and on receivables related to unwound customer interest rate swap positions were determined based upon management's estimate of the amount of credit risk exposure, including by available collateral protection and/or by utilizing an estimate related to a probability of default as indicated in the Bank credit policy. Such adjustments would result in a Level 3 classification.
- The fair value of impaired loans with specific allocations of the allowance for loan losses is essentially based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are made in the appraisal process by the appraisers to reflect differences between the available comparable sales and income data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.
- · Nonrecurring adjustments to certain commercial and residential real estate properties classified as OREO are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Assets and Liabilities Measured at Fair Value on a Recurring Basis:

The tables below present the balance of assets and liabilities at September 30, 2014, and December 31, 2013, respectively, measured by the Company at fair value on a recurring basis:

	September 30, 2014

## **Table of Contents**

The following table and commentary presents quantitative (dollars in thousands) and qualitative information about Level 3 fair value measurements as of September 30, 2014:
