SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-Q

- QUARTERLY REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For Quarter Ended December 1, 2012

Commission File No. 001-15141

HERMAN MILLER, INC.

A Michigan Corporation

ID No. 38-0837640

855 East Main Avenue, Zeeland, MI 49464-0302

Phone (616) 654 3000

Indicate by check mark whether the registrant:

(1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Common Stock Outstanding at January 7, 2013 - 58,487,292 shares

HERMAN MILLER, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The condensed consolidated financial statements have been prepared by Herman Miller, Inc. ("the company"), in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. Management believes the disclosures made in this document are adequate with respect to interim reporting requirements.

The accompanying unaudited condensed consolidated financial statements, taken as a whole, contain all adjustments which are of a normal recurring nature necessary to present fairly the financial position of the company as of December 1, 2012, and the results of its operations and cash flows for the interim periods presented. Operating results for the six-month period ended December 1, 2012, are not necessarily indicative of the results that may be expected for the year ending June 1, 2013. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and notes thereto included in the company's Form 10-K filing for the year ended June 2, 2012. Certain prior year information has been reclassified to conform to the current year presentation.

2. NEW ACCOUNTING STANDARDS

In July 2012, the FASB issued ASU No. 2012-02, "Intangibles-Goodwill and Other (ASC Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment." ASU 2012-02 amends prior indefinite-lived intangible asset impairment testing guidance. Under ASU 2012-02, the company has the option to first assess qualitative factors to determine whether it is more likely than not (a likelihood of more than 50%) that an indefinite-lived intangible asset is impaired. If, after considering the totality of events and circumstances, an entity determines it is more likely than not that an indefinite-lived intangible asset is not impaired, then calculating the fair value of such asset is unnecessary. ASU 2012-02 will be effective for the company during the interim and annual periods beginning after September 15, 2012, although early adoption is permitted. The company adopted the required provisions of ASU 2012-02 in the second quarter of fiscal 2013. The adoption did not have a material impact on the company's consolidated financial position, results of operations or cash flows.

3. FISCAL YEAR

The company's fiscal year ends on the Saturday closest to May 31. Fiscal 2013, the year ending June 1, 2013, and fiscal 2012, the year ended June 2, 2012, contain 52 weeks and 53 weeks, respectively. The first six months of fiscal 2013 and fiscal 2012 contained 26 weeks and 27 weeks, respectively. The second quarter of fiscal 2013 and fiscal 2012 contained 13 weeks, respectively.

4. ACQUISITIONS AND DIVESTITURES

Acquisitions

On April 3, 2012, the company acquired POSH Office Systems Ltd. ("POSH"). POSH is a Hong Kong-based designer and distributor of office furniture systems, freestanding furniture, seating, and filing and storage with distribution in Hong Kong and China. The allocation of the purchase price is preliminary and was based upon the valuation information, estimates and assumptions available at December 1, 2012. Management is still in the process of verifying data and finalizing information related to the valuation of a component of contingent consideration. The company expects to finalize these matters within the measurement period. Subject to the finalization of certain post-closing adjustments, consideration transferred to acquire POSH includes \$47.1 million in net cash transferred during fiscal 2012 and an additional component of performance based contingent consideration ranging between \$1.0 million and \$13.0 million to be earned over the next three years. The company also made a \$1.7 million cash payment during the second quarter of fiscal 2013 as final settlement of the cash purchase price for the company's acquisition of POSH.

This payment resulted in adjustments to the preliminary purchase accounting resulting in an increase in goodwill and accrued liabilities.

Divestitures

During the first quarter of fiscal 2012, the company completed the sale of two wholly-owned contract furniture dealerships in Texas and Colorado.

During the second quarter of fiscal 2012, the company completed the sale of one wholly-owned contract furniture dealership in California. The effect of these transactions on the company's consolidated financial statements was not material.

5. INVENTORIES

(In millions)	December 1, 2012	June 2, 2012
Finished goods and work in process	\$49.9	\$40.4
Raw materials	19.4	18.9
Total	\$69.3	\$59.3

Inventories are valued at the lower of cost or market and include material, labor, and overhead. The inventories of the majority of domestic manufacturing subsidiaries are valued using the last-in, first-out method ("LIFO"). The inventories of all other subsidiaries are valued using the first-in, first-out method.

6. GOODWILL AND INDEFINITE-LIVED INTANGIBLES

Goodwill and other indefinite-lived assets included in the Condensed Consolidated Balance Sheets consist of the following as of December 1, 2012 and June 2, 2012:

(In millions)	Goodwill	Indefinite-lived Intangible Assets	Total Goodwill and Indefinite-lived Intangible Assets
June 2, 2012	\$146.4	\$39.3	\$185.7
Foreign currency translation adjustments	0.4	—	0.4
December 1, 2012	\$146.8	\$39.3	\$186.1

7. EMPLOYEE BENEFIT PLANS

The company maintains retirement benefit plans for substantially all of its employees.

Pension Plans and Post-Retirement Medical Insurance

During the fourth quarter of fiscal 2012, the company announced a change to its employee retirement programs from a defined benefit-based model to a defined contribution structure. The company approved a plan to freeze future benefit accruals of its primary domestic defined benefit plan as of September 1, 2012 and intends to ultimately terminate its domestic defined benefit plans. The company transitioned employees to a new defined contribution program as of September 1, 2012. The termination process for the defined benefit plans is expected to take 12 to 24 months from September 1, 2012.

The measurement date for the company's primary domestic pension plan is the last day of the fiscal year. As part of the company's planned termination process, some participants of this plan elected a lump-sum payment of their pension benefits during the second quarter of fiscal 2013. These elections resulted in the recognition of settlement expenses of \$16.0 million in the second quarter. Subsequent to the accounting for this settlement activity, the company then remeasured the assets and liabilities of this plan as of the end of the second quarter of fiscal 2013.

A pension settlement charge is recorded when the total lump-sum payments for a year exceed total service and interest costs recognized for that year. The settlement charge recognizes a pro-rata portion of the unrecognized actuarial net losses equal to the percentage reduction in the pension benefit obligation. The settlement expenses recognized in the second quarter are non-cash and do not affect total equity, as the amounts are reclassified from accumulated other comprehensive loss within stockholders' equity.

Based on information currently available to the company, it is likely, but not certain, that the company will recognize additional settlement expenses between \$3.0 million and \$5.0 million over the balance of fiscal 2013.

Components of Net Periodic Benefit Costs

(In millions)	Three Months Ended			
	Pension Benefits		Other Post-Retirement Benefits	
	December 1, 2012	December 3, 2011	December 1, 2012	December 3, 2011

Settlement loss recognized	16.0	—	—	—
Net periodic benefit cost	\$18.8	\$2.3	\$0.1	\$0.2
International:				
Service cost	\$—	\$0.4		
Interest cost	0.9	1.0		
Expected return on plan assets	(1.2) (1.2)	
Net amortization loss	0.4	0.1		
Net periodic benefit cost	\$0.1	\$0.3		
Six Months Ended				
	Pension Benefits		Other Post-Retirement Benefits	
	December 1, 2012	December 3, 2011	December 1, 2012	December 3, 2011
Domestic:				
Service cost	\$1.9	\$3.5	\$—	\$—
Interest cost	5.8	7.2	0.2	0.2
Expected return on plan assets	(6.3) (9.6) —	—
Net amortization loss	6.2	3.6	0.1	0.1
Settlement loss recognized	16.0	—	—	—
Net periodic benefit cost	\$23.6	\$4.7	\$0.3	\$0.3
International:				
Service cost	\$—	\$0.8		
Interest cost	1.8	2.0		
Expected return on plan assets	(2.4) (2.4)	
Net amortization loss	0.7	0.2		
Net periodic benefit cost	\$0.1	\$0.6		

8. EARNINGS PER SHARE

The following table reconciles the numerators and denominators used in the calculations of basic and diluted earnings per share (EPS).

	Three Months Ended		Six Months Ended	
	December 1, 2012	December 3, 2011	December 1, 2012	December 3, 2011
Numerators:				
Numerator for both basic and diluted EPS, net earnings (In millions)	\$8.4	\$23.7	\$28.3	\$48.3
Denominators:				
Denominator for basic EPS, weighted-average common shares outstanding	58,373,256	58,160,339	58,345,979	58,108,349
Potentially dilutive shares resulting from stock plans	344,965	227,447	322,546	266,785
Denominator for diluted EPS	58,718,221	58,387,786	58,668,525	58,375,134

Options to purchase 2,179,007 shares and 2,096,240 shares of common stock for the three months ended December 1, 2012 and December 3, 2011, respectively, have not been included in the denominator for the computation of diluted earnings per share because they were anti-dilutive.

Options to purchase 2,125,822 and 1,942,748 shares of common stock for the six months ended December 1, 2012 and December 3, 2011, respectively, have not been included in the denominator for the computation of diluted earnings per share because they were anti-dilutive.

Restricted stock and restricted stock units granted to certain key employees of the company are included in the denominator for diluted EPS. Each restricted stock unit represents one equivalent share of the company's common stock to be awarded, free of restrictions, after the vesting period. However, these units do not entitle participants to the rights of shareholders of common stock, such as voting rights, and they are forfeitable at all times prior to the vesting date. Dividend-equivalent awards are credited and accumulate quarterly and are forfeitable at all times until vested. The company has certain share-based payment awards that meet the definition of participating securities. The company has evaluated the impact on EPS of all participating securities under the two-class method, noting no impact on EPS.

9. STOCK-BASED COMPENSATION

The company's stock-based compensation expense for the three month periods ended December 1, 2012 and December 3, 2011 was \$2.1 million and \$1.6 million, respectively. The related income tax benefit was \$0.7 million and \$0.6 million for the three month periods ended December 1, 2012 and December 3, 2011, respectively. For the six months ended December 1, 2012 and December 3, 2011, compensation costs were \$3.9 million and \$3.0 million, respectively. The related income tax benefit for the respective six month periods was \$1.4 million and \$1.1 million, respectively.

Stock-based compensation expense recognized in the Condensed Consolidated Statements of Operations and Comprehensive Income for the three and six month periods ended December 1, 2012 and December 3, 2011 has been reduced for estimated forfeitures, as it is based on awards ultimately expected to vest. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures are estimated based on historical experience.

Stock Option Plans

The company has stock option plans under which options to purchase the company's stock are granted to employees and non-employee directors and officers at a price not less than the market price of the company's common stock on the date of grant. Under the current award program, all options become exercisable between one year and three years from date of grant and expire ten years from date of grant. Most options are subject to graded vesting with the related compensation expense recognized on a straight-line basis over the requisite service period.

The company estimated the fair value of employee stock options on the date of grant using the Black-Scholes model. In determining these values, the weighted-average assumptions in the table below were used for the periods indicated.

	Three Months Ended		Six Months Ended		
	December 1, 2012 (5)	December 3, 2011 (5)	December 1, 2012	December 3, 2011	
Risk-free interest rates ⁽¹⁾	—	% —	% 0.77	% 1.75	%
Expected term of options (in years) ⁽²⁾			5.5	5.5	
Expected volatility ⁽³⁾	—	% —	% 47	% 42	%
Dividend yield ⁽⁴⁾	—	% —	% 1.98	% 0.34	%
Weighted-average grant-date fair value of stock options:					
Granted with exercise prices equal to the fair market value of the stock on the date of grant	\$—	\$—	\$6.52	\$10.15	

(1) Represents the U.S. Treasury yield over the same period as the expected option term.

(2) Represents the period of time that options granted are expected to be outstanding. Based on analysis of historical option exercise activity, the company has determined that all employee groups typically exhibit similar exercise and post-vesting termination behavior.

(3) Amount is determined based on analysis of historical price volatility of the company's common stock over a period equal to the expected term of the options.

(4) Represents the company's estimated cash dividend yield over the expected term of options.

(5) No stock options were granted during the three months ended December 1, 2012 and December 3, 2011.

Employee Stock Purchase Program

Under the terms of the company's Employee Stock Purchase Plan, 4 million shares of authorized common stock were reserved for purchase by plan participants at 85 percent of the market price. The company recognizes pre-tax compensation expense related to the market value discount.

Restricted Stock Grants

The company periodically grants restricted common stock to certain key employees. Shares are granted in the name of the employee, who has all the rights of a shareholder, subject to certain restrictions on transferability and risk of forfeiture. The grants are subject to either cliff-based or graded vesting over a period not exceeding five years, and are subject to forfeiture if the employee ceases to be employed by the company for certain reasons. After the vesting period, the risk of forfeiture and restrictions on transferability lapse. The company recognizes the related compensation expense on a straight-line basis over the requisite service period.

Restricted Stock Units

The company grants restricted stock units to certain key employees. The awards generally cliff-vest after a three or five-year service period, with prorated vesting under certain circumstances and full or partial accelerated vesting upon retirement. Each restricted stock unit represents one equivalent share of the company's common stock to be awarded, free of restrictions, after the vesting period. Compensation expense related to these awards is recognized over the requisite service period, which includes any applicable performance period. Dividend equivalent awards are credited quarterly. The units do not entitle participants the rights of shareholders of common stock, such as voting rights, until shares are issued after the vesting period.

Performance Share Units

The company has granted performance share units to certain key employees. The number of units initially awarded is based on the value of a portion of the participant's long-term incentive compensation, divided by the fair value of the company's common stock on the date of grant. Each unit represents one equivalent share of the company's common stock. The number of common shares ultimately issued in connection with these performance share units is determined based on the company's financial performance over the related three-year service period. Compensation expense is determined based on the grant-date fair value and the number of common shares projected to be issued, and is recognized over the requisite service period.

10. INCOME TAX DISCLOSURE

The effective tax rates for the three months ended December 1, 2012 and December 3, 2011, were 34.9 percent and 33.4 percent, respectively. For the six months ended December 1, 2012 and December 3, 2011, the effective tax rates were 33.9 percent and 33.3 percent respectively.

The company's United States federal statutory rate is 35 percent. The effective rate in the current year and the prior year are below the statutory rate primarily due to the manufacturing deduction under the American Jobs Creation Act of 2004.

The company has income tax accruals associated with uncertain tax benefits totaling \$1.5 million and \$1.7 million as of December 1, 2012 and December 3, 2011, respectively.

The company recognizes interest and penalties related to uncertain tax benefits through income tax expense in its Condensed Consolidated Statements of Operations and Comprehensive Income. Interest and penalties for the six months ended December 1, 2012 and December 3, 2011 were negligible. As of December 1, 2012 and December 3, 2011, the company's recorded liability for potential interest and penalties related to uncertain tax benefits totaled \$0.6 million.

The company is subject to periodic audits by domestic and foreign tax authorities. Currently, the company is undergoing routine periodic audits in both domestic and foreign tax jurisdictions. It is reasonably possible the amounts of unrecognized tax benefits could change in the next 12 months as a result of the audits. Tax payments related to these audits, if any, are not expected to be material to the company's Condensed Consolidated Statements of Operations and Comprehensive Income.

For the majority of tax jurisdictions, the company is no longer subject to state, local or non-U.S. income tax examinations by tax authorities for fiscal years before 2009.

11. FAIR VALUE DISCLOSURES

The following describes the methods the company uses to estimate the fair value of financial assets and liabilities, to which there have been no significant changes in the current period:

Available-for-sale securities — The company's available-for-sale marketable securities primarily include mortgage-backed debt securities, government obligations and corporate debt securities and are recorded at fair value using quoted prices for similar securities.

Foreign currency exchange contracts — The company's foreign currency exchange contracts are valued using an approach based on foreign currency exchange rates obtained from active markets. The estimated fair value of forward currency exchange contracts is based on month-end spot rates as adjusted by market-based current activity.

The following tables set forth financial assets and liabilities measured at fair value in the Condensed Consolidated Balance Sheets and the respective pricing levels to which the fair value measurements are classified within the fair value hierarchy as of December 1, 2012 and June 2, 2012.

(In millions)	Fair Value Measurements	
	December 1, 2012	June 2, 2012
	Quoted Prices With Other Observable Inputs (Level 2)	Quoted Prices With Other Observable Inputs (Level 2)
Financial Assets		

Available-for-sale marketable securities:

Edgar Filing: MILLER HERMAN INC - Form 10-Q

Asset-backed securities	\$—	\$0.2

Mortgage-backed securities	3.2	—	—	3.2
Total	\$9.5	\$0.1	\$—	\$9.6

Adjustments to the fair value of available-for-sale securities are recorded as increases or decreases, net of income taxes, within accumulated other comprehensive gain (loss) in stockholders' equity. The cost of securities sold is based on the specific identification method; realized gains and losses resulting from such sales are included in the Condensed Consolidated Statements of Operations and Comprehensive Income within "Other, net".

The company reviews its investment portfolio for any unrealized losses that would be deemed other-than-temporary and require the recognition of an impairment loss in earnings. If the cost of an investment exceeds its fair value, the company evaluates, among other factors, general market conditions, the duration and extent to which the fair value is less than its cost, the company's intent to hold the investment, and whether it is more likely than not that the company will be required to sell the investment before recovery of the amortized cost basis. The company also considers the type of security, related industry and sector performance, as well as published investment ratings and analyst reports to evaluate its portfolio. Once a decline in fair value is determined to be other-than-temporary, an impairment charge is recorded and a new cost basis in the investment is established. If conditions within individual markets, industry segments, or macro-economic environments deteriorate, the company could incur future impairments.

Maturities of debt securities included in marketable securities as of December 1, 2012, are as follows.

(In millions)	Cost	Fair Value
Due within one year	\$0.8	\$0.8
Due after one year through five years	8.6	8.7
Total	\$9.4	\$9.5

There were no investments in unrealized loss positions as of December 1, 2012 and June 2, 2012.

12. COMMITMENTS AND CONTINGENCIES

Product Warranties

The company provides warranty coverage to the end-user for parts and labor on products sold. The standard length of warranty is 12 years; however, this varies depending on the product classification. The company does not sell or

otherwise issue warranties or warranty extensions as stand-alone products. Reserves have been established for the various costs associated with the company's warranty program and are included in the Condensed Consolidated Balance Sheets under "Accrued warranty." General warranty reserves are based on historical claims

experience and other currently available information. These reserves are adjusted once an issue is identified and the actual cost of correction becomes known or can be estimated.

(In millions)	Three Months Ended		Six Months Ended

Guarantees

The company is periodically required to provide performance bonds in order to do business with certain customers. These arrangements are common and generally have terms ranging between one and three years. The bonds are required to provide assurances to customers that the products and services they have purchased will be installed and/or provided properly and without damage to their facilities. The bonds are provided by various bonding agencies; however, the company is ultimately liable for claims that may occur against them. As of December 1, 2012, the company had a maximum financial exposure related to performance bonds totaling approximately \$16.2 million. The company has no history of claims, nor is it aware of circumstances that would require it to pay under any of these arrangements. The company also believes that the resolution of any claims that might arise in the future, either individually or in the aggregate, would not materially affect the company's financial statements. Accordingly, no liability has been recorded as of December 1, 2012 and June 2, 2012.

The company has entered into standby letter of credit arrangements for the purpose of protecting various insurance companies against default on the payment of certain premiums and claims. A majority of these arrangements are related to the company's wholly-owned captive insurance company. As of December 1, 2012, the company had a maximum financial exposure from these standby letters of credit totaling approximately \$7.7 million. The company has no history of claims, nor is it aware of circumstances that would require it to perform under any of these arrangements and believes that the resolution of any claims that might arise in the future, either individually or in the aggregate, would not materially affect the company's financial statements. Accordingly, no liability has been recorded as of December 1, 2012 and June 2, 2012.

Contingencies

The company leases a facility in the U.K. under an agreement that expired in June 2011, and the company is currently leasing the facility on a month to month basis. Under the terms of the lease, the company is required to perform the maintenance and repairs necessary to address the general dilapidation of the facility. The ultimate cost of this provision to the company is dependent on a number of factors including, but not limited to, the future use of the facility by the lessor and whether the company chooses and is permitted to renew the lease term. The company has estimated the cost of these maintenance and repairs to be between \$0 million and \$3.0 million, depending on the outcome of future plans and negotiations. As a result, an estimated liability of \$1.2 million has been recorded under the caption "Other accrued liabilities" in the Condensed Consolidated Balance Sheets at December 1, 2012, and June 2, 2012, respectively.

The company is also involved in legal proceedings and litigation arising in the ordinary course of business. In the opinion of management, the outcome of such proceedings and litigation currently pending will not materially affect the company's consolidated financial statements.

13. OPERATING SEGMENTS

The company's reportable segments consist of North American Furniture Solutions, Non-North American Furniture Solutions, and Specialty and Consumer. The North American Furniture Solutions reportable segment includes the operations associated with the design, manufacture, and sale of furniture products for work-related settings, including office, education, and healthcare environments, throughout the United States and Canada. The business associated with the company's owned contract furniture dealers is also included in the North American Furniture Solutions reportable segment. The Non-North American Furniture Solutions reportable segment includes the operations associated with the design, manufacture, and sale of furniture products, primarily for work-related settings for Mexico and outside of North America, as well as Non-North America consumer retail business. The Specialty and Consumer reportable segment includes the operations associated with the design, manufacture, and sale of high-end furniture products including Geiger wood products, Herman Miller Collection products and the North American consumer retail business.

The company also reports a "Corporate" category consisting primarily of startup business and unallocated corporate expenses including restructuring and impairment costs.

Edgar Filing: MILLER HERMAN INC - Form 10-Q

The performance of the operating segments is evaluated by the company's management using various financial measures. The following is a summary of certain key financial measures for the respective fiscal periods indicated.

(In millions)	Three Months Ended		Six Months Ended

14

The accounting policies of the reportable operating segments are the same as those of the company. Additionally, the company employs a methodology for allocating corporate costs and assets with the underlying objective of this methodology being to allocate corporate costs according to the relative usage of the underlying resources and to allocate corporate assets according to the relative expected benefit. The company has determined that allocation based on relative net sales is appropriate. The majority of corporate costs are allocated to the operating segments; however, certain costs generally considered the result of isolated business decisions are not subject to allocation and are evaluated separately from the rest of the regular ongoing business operations. For example, restructuring charges that are reflected in operating earnings are allocated to the "Corporate" category.

14. RESTRUCTURING ACTIVITIES

In May 2012, the company announced a plan ("The 2012 Plan") to consolidate the Nemschoff manufacturing operations in Sheboygan, Wisconsin with the closure of the Sioux Center, Iowa seating plant. The 2012 Plan also includes the consolidation of the Sheboygan manufacturing sites into one location. This plan will reduce fixed costs and operating expenses in order to improve operating performance, profitability and further enhance productivity. The 2012 Plan will reduce the company's workforce in North America by approximately 70 employees. The company anticipates it will incur an additional \$0.1 million in restructuring expense during future periods for the 2012 Plan.

The following is a summary of changes in restructuring accruals during fiscal 2012 and fiscal 2013 for the 2012 Plan.

2012 Plan	Total Restructuring Accrual	Severance and Outplacement	Building Impairment	Building Exit	
Balance as of May 28, 2011	—	—	—	—	
Restructuring and other related expenses	1.6	0.2	1.4	—

Adjustments	(0.2) —	—	(0.2)
Balance as of December 1, 2012	0.4	—	—	0.4	

15. DEBT

During the second quarter of fiscal 2012, the company entered into an amendment and restatement of the syndicated revolving line of credit, which provides the company with up to \$150 million in revolving variable interest borrowing capacity and includes an "accordion feature" allowing the company to increase, at its option and subject to the approval of the participating banks, the aggregate borrowing capacity of the facility by \$75 million. The facility expires in November 2016 and outstanding borrowings bear interest at rates based on the prime rate, federal funds rate, LIBOR, or negotiated rates as outlined in the agreement. Interest is payable periodically throughout the period if borrowings are outstanding. As of December 1, 2012 and June 2, 2012, total usage against this facility was \$7.7 million and \$9.7 million, respectively, all of which related to outstanding letters of credit.

During the second quarter of fiscal 2013, the company entered into a revolving line of credit, which provides the company with approximately \$5.0 million in revolving variable interest borrowing capacity. The company intends to utilize the revolver, which is denominated in Chinese Renminbi, to meet working capital cash flow needs at its Ningbo, China operations. The uncommitted facility is subject to changes in bank approval and outstanding borrowings bear interest at rates based on a benchmark lending rate as outlined in the agreement. Each draw on the line of credit is subject to a maximum period of one year, and corresponding interest is payable on the maturity date of

each draw. As of December 1, 2012, total borrowings against this facility were \$2.4 million.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of certain significant factors that affected the company's financial condition, earnings and cash flow during the periods included in the accompanying condensed consolidated financial statements and should be read in conjunction with the company's Annual Report on Form 10-K for the fiscal year ended June 2, 2012. References to "Notes" are to the footnote disclosures included in the condensed consolidated financial statements.

Discussion of Current Business Conditions

The second quarter of fiscal 2013 and 2012 included 13 weeks of operations. Fiscal year 2013 year-to-date included 26 weeks of operations as compared to 27 weeks in the prior year period. The extra week in the prior year is required approximately every six years in order to re-align our fiscal reporting dates with the actual calendar months. This is a factor that should be considered when comparing our financial results to the prior year period.

The macro-economic backdrop to our business remained fairly consistent throughout the second quarter - with relative health in some measures being offset by continued weakness in others. While the United States economy has been tepid, it is growing. The U.S. housing market appears poised for a rebound, and employers are beginning to hire as productivity gains are nearly exhausted. Office vacancy rates remain high - a factor offering some companies a positive incentive to move, which typically leads to demand for our products and services. This relatively encouraging picture is offset by uncertainty surrounding the ongoing tax and spending policy debates within the U.S. federal government. While the fiscal policy debate is likely to impact other regions of the world, Asia continues to grow, albeit at a slower rate than the past few years. The European economy remains weak and there appears little prospect of recovery in the near term. While Europe will impact us, we do not have a significant presence on the continent and we leverage our capabilities in the UK to serve the Middle East and other countries in the region. Assuming U.S. policy makers can forge a meaningful, long-term fiscal resolution in the months ahead, we expect US office furniture will continue to grow in calendar 2013. A recovery in housing should help our consumer business, and we believe the long term demographics of U.S. healthcare and emerging economies of Brazil, Russia, India and China are positively aligned with our strategy.

The Business Institutional Furniture Manufacturers Association's ("BIFMA") most recent domestic industry forecast was released in November 2012. This forecast anticipates that orders and shipments for calendar 2012 will decrease approximately 1 percent each. BIFMA's outlook for calendar 2013 forecasts orders and shipments increasing approximately 4.5 and 3.4 percent, respectively.

Our consolidated net sales in the second quarter totaled \$441.8 million, 0.9 percent lower than the same quarter last fiscal year. This sales performance also fell short of the \$445 million to \$465 million revenue range we were expecting coming into the period. We based this range on our beginning backlog, plus an expectation around order levels in the first six weeks of the quarter. While the level and pacing of new orders entered throughout the second quarter was in line with our expectations, weather-related delays on the East coast prevented us from recognizing revenue on some projects. We estimate this delayed between \$5 million and \$7 million in net sales that would have otherwise been recognized in the second quarter. While the storm did impact our ability to recognize revenue in the quarter, it did not have a long-term negative effect on our distribution resources in the region. Additionally, some of the orders taken in the second quarter were scheduled with longer than normal lead-times. This, too, contributed to the lower-than-expected sales performance in the quarter; as these orders will likely be recognized as revenue during the second half of the fiscal year.

While net sales in the quarter did not meet our expectations, we were encouraged by the order growth and level of activity across each of our reportable segments. Orders in the second quarter of \$475.8 million were 8.1 percent higher than the second quarter of last fiscal year. We were also pleased to end the quarter in a strong backlog position, which

at \$314.2 million was up \$33.4 million or 11.9 percent from the second quarter of fiscal 2012.

In our North American Furniture Solutions segment, revenue was down approximately 5 percent, while orders were up more than 7 percent from the second quarter of last fiscal year. This reflects real strength in commercial customers, offset, in part, by continued decline in orders and shipments to the U.S. government. The year-over-year order growth was driven by our investments in innovative design and expanding customer channels. This included gains in key office product categories, highlighted by growing momentum for our Canvas furniture systems. Our Thrive Portfolio of ergonomic tools and furnishings is another component of the North American reportable segment that continues to gain ground, both with our dealers and customers. Additionally, building on the successful sales model that we first established with Thrive, we recently introduced a new initiative focused on Small and Medium Business (“SMB”) customers. The SMB team is now well underway, working in coordination with our dealer channel to provide great service in specification and delivery.

Continuing within the North American segment, while sales to healthcare-related customers remain below our expectations, if we exclude the federal government, revenue appears to have stabilized. We are pleased with the progress the team is making in stabilizing the business and building for the future, and we're confident that the underlying demographics are there to make the healthcare sector a strong contributor to our future growth.

Our Specialty and Consumer segment also improved significantly in the second quarter, with sales and orders up 22 percent and 11 percent, respectively, from the same period last fiscal year. Sales and orders of retail and Herman Miller Collection products each posted double digit percentage growth relative to last year. Retailers have reported that sell through was good during the Christmas season and our semi-annual sale, so we expect good levels of restocking in the third quarter. We are also getting optimistic reports from our dealers and sales executives as to their success with the Herman Miller Collection with contract customers. Geiger also reported strong sales into executive and premium office environments this quarter.

With the addition of POSH, our Non-North American Furniture Solutions segment reported solid sales and order growth over the prior year. While customer demand in Europe was weaker than we expected this quarter, we continued to perform well in the Middle East and Asia. The highlight for the segment this quarter was our expanding momentum and presence in Asia, driving a substantial increase in sales and orders for the region. This was achieved not only through the addition of POSH, but also through organic sales growth in key markets including China, India, and Australia. The POSH integration continues, and the business generated approximately break-even operating earnings in the quarter. We know China and other fast developing markets in Asia and elsewhere are critical elements in our future and we will continue to strategically invest in those markets in order to build the teams, products, and operational infrastructure to grow with them.

As previously announced, in order to improve the predictability of cash flows and expenses associated with our employee benefit programs, we intend to terminate our U.S. defined benefit pension plans in favor of a new defined contribution retirement program. During the second quarter of fiscal 2013, we converted active employees to this new defined contribution program. Concurrent with this change, effective September 1, 2012, we ceased ongoing benefit accruals under the defined benefit pension plans that we plan to terminate in the future. We expect the termination process for the defined benefit pension plans to be completed during the second quarter of fiscal 2014. At the time of termination, we will be required to make additional contributions to the plans, which we currently estimate will total approximately \$50 million.

Our results in the second quarter and six-months ended December 1, 2012 include expenses associated with the transition from (and planned termination of) the domestic defined benefit pension plans. These expenses, referred to as, "legacy pension costs" throughout this document, include settlements caused by the transition and net periodic benefit expenses, subsequent to September 1, 2012, related to the defined benefit plans in question. They also include incremental pension expenses in the first quarter of fiscal 2013 resulting from modifications we made to the investment strategy of our defined benefit plan assets in order to prepare for the termination process. We recognized legacy pension costs totaling \$18.8 million and \$20.5 million in the second quarter and six-months ended December 1, 2012, respectively. A large majority of these expenses are reflected within Operating Expenses in each period.

Earlier this fiscal year we announced an increase in our quarterly cash dividend - moving it from \$0.022 to \$0.09 per share. The increase was driven by improvements we've made to our balance sheet in recent years, including reductions in outstanding debt levels and progress toward the termination of our domestic defined benefit pension plans. In total, cash dividends paid were \$5.2 million in the second quarter of fiscal 2013 compared to \$1.3 million in the second quarter of last fiscal year. Through the first six months of fiscal 2013, dividend payments totaled \$6.5 million compared to \$2.5 million in the same period last fiscal year.

The remaining sections within Item 2 include additional analysis of our second quarter and six months ended December 1, 2012, including discussion of significant variances compared to prior year periods.

Analysis of Second Quarter Results

The following table presents certain key highlights from the results of operations for the periods indicated.

(In millions, except per share data)	Three Months Ended			Six Months Ended		
	December 1,	December 3,	Percent Change	December 1,	December 3,	Percent Change
	2012	2011		2012	2011	
Net Sales	\$441.8	\$445.6	(0.9)%	\$891.5	\$903.7	(1.4)%
Gross Margin	148.5	152.1	(2.4)	298.2	306.4	(2.7)

Income Tax Expense	1.0	2.7	1.6	2.7
Net Earnings	1.9	% 5.3	% 3.2	% 5.3

Consolidated Sales

Net sales in the second quarter of fiscal 2013 were \$441.8 million, a decrease of \$3.8 million from the same period last year. Net sales were decreased by \$3 million due to the sale of a dealer during the second quarter of fiscal 2012. While the fourth quarter fiscal 2012 acquisition of POSH contributed an additional \$13 million in net sales in the current quarter, this was more than offset by an \$18 million decrease in sales to the U.S. federal government. The remaining change in sales was due to increased volumes in the current period.

For the first six months of fiscal 2013, net sales were \$891.5 million; a decrease of \$12.2 million from the same period last year. The decrease in net sales was largely driven by the extra week of operations in the prior year period and the sale of a dealer during the second quarter of fiscal 2012. These items had the effect of decreasing net sales in the current period by approximately \$32 million and \$7 million, respectively. Foreign exchange rate changes also decreased net sales by approximately \$6 million in the first six months of fiscal year 2013. These factors were partially offset by the fourth quarter fiscal 2012 acquisition of POSH, which accounted for approximately \$27 million

in net sales in the first half of fiscal 2013. Also, the capture of recent price increases (net of deeper discounting) increased net sales in the first half of fiscal 2013 by

18

approximately \$6 million. The first six months of fiscal 2013 also experienced a \$40 million decrease in sales to the U.S. federal government. The remaining change in sales was due to increased volumes in the first half of fiscal 2013.

Performance versus the Domestic Contract Furniture Industry

We monitor the trade statistics reported by BIFMA, the trade association for the U.S. domestic office furniture industry, and consider them an indicator of industry-wide sales and order performance. BIFMA publishes statistical data for the contract segment and the office supply segment within the U.S. furniture market. The U.S. contract segment is primarily composed of large to mid-size corporations serviced by a network of dealers. The office supply segment is primarily made up of smaller customers serviced by wholesalers and retailers. We primarily participate in, and believe we are a leader in, the contract segment. While comparisons to BIFMA are important, we continue to pursue a strategy of revenue diversification that makes us less reliant on the drivers that impact BIFMA and lessens our dependence on the U.S. office furniture market.

We also use BIFMA statistical information as a benchmark for the performance of our domestic U.S. business (as defined by BIFMA) and also to that of our competitors. The timing of large project-based business may affect comparisons to this data. We remain cautious about reaching conclusions regarding changes in market share based on analysis of data on a short term basis. Instead, we believe such conclusions should only be reached by analyzing comparative data over several quarters.

While the sales and order data for our U.S. operations provide a relative comparison to BIFMA, it is not intended to be an exact comparison. The data we report to BIFMA is consistent with the BIFMA definition of office furniture "consumption." This definition differs slightly from the categorization we have presented in this report. Notwithstanding this difference, we believe our presentation provides the reader with a more relevant comparison.

For the three-month period ended December 1, 2012, the company's domestic U.S. shipments, as defined by BIFMA, decreased 1.8 percent year-over-year, while the company's domestic orders increased 3.3 percent. BIFMA reported an estimated year-over-year decrease in shipments of 0.2 percent and an increase in orders of 0.8 percent for the comparable period.

Consolidated Gross Margin

Consolidated gross margin in the second quarter was 33.6 percent of net sales; a decrease of 50 basis points compared to the second quarter last year.

Direct material costs were 43.0 percent of net sales, an increase of 30 basis points from the second quarter last year. The material costs as a percent of net sales was impacted by approximately a 60 basis point increase related to the acquisition of POSH. Partially offsetting these increases were favorable impacts from lower commodity costs (primarily steel and steel components) of 30 basis points.

Direct labor was 6.7 percent of net sales for the second quarter, an increase of 10 basis points from the second quarter of last year. The increase is primarily related to a shift in net sales of products with a higher labor content.

Manufacturing overhead was 10.5 percent of net sales for the second quarter; decreasing 30 basis points from the prior year period. Overhead costs in the second quarter of fiscal 2013 included approximately \$0.8 million of incremental employee benefit costs related to the transition from (and planned termination of) the domestic defined benefit pension plans. These incremental costs account for a 20 basis point increase in overhead as a percent of net sales. This increase was offset by an approximate 10 basis point decrease in manufacturing overhead percent due to the dealer divestiture in the second quarter of fiscal 2012. Overhead costs were also decreased by approximately 10 basis points due to lower incentive costs. The remaining decrease in manufacturing overhead percent was due to increased absorption of overhead costs.

Freight costs were 4.5 percent of net sales for the second quarter; increasing 30 basis points compared to the same period last year. This was driven primarily by increased diesel costs as well as the impact of changes in the product and channel mix compared to the prior year period.

Net sales, cost of sales and resulting gross margin are affected by changes in foreign currency exchange rates. During the second quarter the estimated impact was a decrease to gross margin of \$0.2 million relative to the prior year period.

For the first six months of fiscal 2013 consolidated gross margin was 33.4 percent of net sales; a decrease of 50 basis points from the gross margin reported in the same period last year. The impact of incremental employee benefit costs accounted for a 20 basis point decrease in the gross margin percent for the first six months of fiscal 2013. The second quarter fiscal 2013 year-to-date gross margin was favorably impacted by 70 basis points related to net pricing increases. Lower commodity costs contributed an additional 30 basis points of improvement. The remaining decrease in the year-to-date gross margin was due to a shift in product mix and lower volumes driving lower leverage from production.

Operating Expenses and Operating Earnings

Second quarter operating expenses (including restructuring related expenses) were \$131.0 million, or 29.7 percent of net sales, which is an increase of \$19.6 million from the second quarter of fiscal 2012. The increase in operating expenses primarily relates to legacy pension costs of \$18.0 million. The acquisition of POSH contributed an additional \$3.0 million of operating expenses in the quarter. In addition, research and

development and marketing expenses increased \$1.7 million and \$1.1 million, respectively. The 2012 Plan to consolidate the Nemschoff manufacturing operations resulted in a \$0.7 million increase in restructuring expenses. Warranty expenses for the period were lower by approximately \$2.0 million due primarily to lower customer specific claims in the period compared to the prior year period. The remaining change was related to decreases in various other operating expenses compared to the prior year period.

Operating expenses are also impacted by changes in foreign currency exchange rates. During the second quarter of fiscal 2013 the estimated impact to operating expenses was an increase of approximately \$0.1 million relative to the prior year period.

For the first six months of fiscal 2013 operating expenses (including restructuring related expenses) were \$246.4 million compared to \$223.9 million in the prior year period; an increase of \$22.5 million. The increase in operating expenses primarily relates to the legacy pension costs of \$18.9 million. The acquisition of POSH contributed an additional \$5.8 million of operating expenses. In addition, research and development expenses increased \$3.0 million. The 2012 Plan to consolidate the Nemschoff manufacturing operations resulted in a \$1.2 million increase in expenses for the first six months of fiscal 2013. The extra week of operations in the prior year included approximately \$3.0 million in additional compensation expense. The company also recorded \$2.0 million less employee incentive expense compared to the prior year period. Warranty expenses for the period were lower by approximately \$3.0 million due primarily to lower customer specific claims in the period compared to the prior year period. The remaining change was due to decreases in various other operating expenses compared to the prior year period.

Operating earnings in the second quarter were \$17.5 million, a decrease of \$23.2 million compared to the same period last year. This decrease primarily relates to legacy pension costs of \$18.8 million. The year-to-date operating earnings were \$51.8 million compared to the year-to-date operating earnings of \$82.5 million for fiscal 2012. The largest contributor of this decrease was the legacy pension costs of \$20.5 million.

Other Income/Expense and Income Taxes

Net other expense of \$4.6 million in the second quarter of fiscal 2013 was \$0.5 million lower compared to the prior year period. The decrease in the current period was due to lower currency loss of \$0.2 million and higher investment income in the second quarter of fiscal 2013 compared to the prior year period.

Net other expense for fiscal 2013 year-to-date was \$8.9 million, a \$1.2 million decrease compared to the prior year period. The decrease was due to the same factors that impacted the second quarter variances.

The effective tax rates for the three months ended December 1, 2012 and December 3, 2011 were 34.9 percent and 33.4 percent, respectively.

The effective tax rates for the six months ended December 1, 2012 and December 3, 2011 were 33.9 percent and 33.3 percent, respectively. The effective rate in the current year and the prior year are below the statutory rate primarily due to the manufacturing deduction under the American Jobs Creation Act of 2004. The rate increase in the current quarter in relationship to the prior year's quarter relates primarily to differences in the mix of earnings across the company's domestic and international entities. Subsequent to the end of the second quarter, the U.S. Congress adopted legislation extending the Research & Development Tax Credit for a two year period. The extension applies retroactively from December 31, 2011 and will be effective through December 31, 2013. The company will begin recognizing the benefit of this credit in the third quarter of fiscal 2013, and expects its third quarter effective tax rate to be in the range of 27.5 percent and 29.5 percent.

Reportable Operating Segments

The business is comprised of various operating segments as defined by generally accepted accounting principles in the United States. These operating segments are determined on the basis of how the company internally reports and

evaluates financial information used to make operating decisions. For external reporting purposes, the company has identified the following reportable segments:

North American Furniture Solutions — Includes the operations associated with the design, manufacture, and sale of furniture products for work-related settings, including office, education, and healthcare environments, throughout the United States and Canada. The business associated with the company's owned contract furniture dealers is also included in the North American Furniture Solutions segment. In addition, the Healing operating segment has been aggregated with the North American Furniture Solutions segment.

Non-North American Furniture Solutions — Includes the operations associated with the design, manufacture, and sale of furniture products, primarily for work-related settings, for Mexico and outside of North America as well as the company's Non-North America consumer retail business.

Specialty and Consumer — Includes the operations associated with the design, manufacture, and sale of high-end furniture products including Geiger wood products, Herman Miller Collection products and the company's North American consumer retail business.

The company also reports a corporate category consisting primarily of startup business and unallocated corporate expenses including restructuring and other related expenses (including impairment expenses).

The current quarter and prior year period segment results are as follows:

(In millions)	Three Months Ended			Six Months Ended		
	December 1, 2012	December 3, 2011	Change	December 1, 2012	December 3, 2011	Change
Net Sales:						
North American Furniture Solutions	\$304.7	\$321.7	\$(17.0)	\$625.0	\$652.2	\$(27.2)
Non-North American Furniture Solutions	92.8	87.5	5.3	187.4	172.4	15.0
Specialty and Consumer	44.3	36.4	7.9	79.1	79.1	—
Corporate	—	—	—	—	—	—
Total	\$441.8	\$445.6		\$891.5	\$903.7	
Operating Earnings (Loss):						
North American Furniture Solutions	\$9.7	\$28.5	\$(18.8)	\$36.6	\$56.8	\$(20.2)
Non-North American Furniture Solutions	4.6	8.8	(4.2)	10.1	18.4	(8.3)
Specialty and Consumer	3.9	3.6	0.3	6.3	7.8	(1.5)
Corporate	(0.7)	(0.2)	(0.5)	(1.2)	(0.5)	(0.7)
Total	\$17.5	\$40.7		\$51.8	\$82.5	

Further information regarding the reportable operating segments can be found in Note 13.

North America

Net sales within the North American Furniture Solutions reportable segment (North America) decreased \$17.0 million to \$304.7 million in the second quarter, representing a 5.3 percent decrease from the second quarter last year. The impact of foreign currency changes was to increase the second quarter fiscal 2013 net sales by approximately \$0.5 million compared to the same period last year. The divestiture of the California dealer during the second quarter of fiscal 2012 led to approximately a \$3 million decrease in both net sales and orders during the current quarter within this reportable segment. The second quarter of fiscal 2013 also experienced a \$18 million decrease in sales to the U.S. federal government. The remaining change in net sales was primarily driven by increased volumes.

Year-to-date net sales within North America decreased 4.2 percent to \$625.0 million. The divestiture of the California dealer during the second quarter of fiscal 2012 led to approximately a \$7 million decrease in both net sales and orders during the first six months of fiscal 2013. The impact of net changes in pricing is estimated to have had a \$6 million increase on net sales for the second quarter year-to-date as compared to fiscal 2012. The extra week of operations in the first six months of fiscal 2012 contributed approximately \$23 million in net sales. The impact of foreign currency changes was to decrease the second quarter year-to-date fiscal 2013 net sales by approximately \$0.5 million compared to the same period in the prior fiscal year. The first six months of fiscal 2013 also experienced a \$40 million decrease in sales to the U.S. federal government. The remaining change in net sales was primarily driven by increased volumes.

Operating earnings for North America in the second quarter were \$9.7 million, or 3.2 percent of net sales. This compares to operating earnings of \$28.5 million or 8.9 percent of net sales in the second quarter fiscal 2012. This decrease in operating earnings primarily relates to legacy pension costs of \$17.6 million. Warranty expenses for the period were lower by approximately \$2.0 million due primarily to lower customer specific claims in the period compared to the prior year period. The remaining decrease in the year-to-date gross margin was due to lower leverage from production caused by a shift in product mix and lower volumes.

Year-to-date operating earnings for North America decreased to \$36.6 million. This decrease in operating earnings primarily relates to legacy pension costs of \$19.3 million. The extra week of operations in the first six months of fiscal 2012 contributed an estimated \$1.8 million additional operating earnings. Warranty expenses for the period were lower by approximately \$2.5 million due primarily to lower customer specific claims in the period compared to the prior year. In addition, North America had a decrease of approximately \$2.5 million in employee incentive expenses during the first six months of fiscal 2013 compared to the same period in the prior year. The remaining decrease in the year-to-date operating earnings was due to a shift in product mix and lower volumes driving lower leverage from production.

Non-North America

Net sales within the Non-North American Furniture Solutions reportable segment (Non-North America) were \$92.8 million in the second quarter, an increase of \$5.3 million from the second quarter of fiscal 2012. Net sales increased approximately \$13 million in the second quarter of fiscal 2013 from the acquisition of POSH, which was acquired in the fourth quarter of fiscal 2012. The impact of foreign currency changes was to decrease the second quarter fiscal 2013 sales by approximately \$0.5 million compared to the same period in the prior fiscal year. The remaining change in net sales was primarily driven by lower volumes.

Year-to-date net sales within Non-North America increased \$15.0 million to \$187.4 million. The extra week of operations in the first quarter of fiscal 2012 contributed approximately \$6 million in net sales. Additionally, net sales increased approximately \$27 million in the first six months of fiscal 2013 from the acquisition of POSH. The impact of net changes in pricing is estimated to have had a \$1.5 million decrease on net sales during the first half of fiscal 2013 over the first half of fiscal 2012. The impact of foreign currency changes was to decrease the second quarter year-to-date fiscal 2013 sales by approximately \$5.5 million compared to the same period in the prior year. The remaining change in net sales was primarily driven by increased volumes.

Operating earnings within Non-North America were \$4.6 million and \$8.8 million for the second quarter of fiscal 2013 and fiscal 2012, respectively, and represents 5.0 percent and 10.1 percent of net sales for the second quarter of fiscal 2013 and fiscal 2012, respectively. The acquisition of POSH had no impact on operating earnings for the second quarter of fiscal 2013. The impact of foreign currency changes decreased the current periods operating earnings for Non-North America by approximately \$0.7 million compared to the same period in the prior year. The remaining decrease in operating earnings was primarily driven by leverage due to lower sales volumes.

Year-to-date operating earnings for Non-North America decreased \$8.3 million to \$10.1 million. The extra week of operations in the first half of fiscal 2012 contributed an estimated \$0.6 million additional operating earnings. The acquisition of POSH contributed an additional \$0.7 million of operating earnings to the first half of fiscal 2013. The impact of foreign currency changes decreased the operating earnings for the first six months of fiscal 2013 for Non-North America by approximately \$2.6 million compared to the same period in the prior year. The remaining change in operating earnings as a percent of net sales was primarily driven by changes in sales mix.

Specialty and Consumer

Net sales for the second quarter within the Specialty and Consumer reportable segment (Specialty and Consumer) were \$44.3 million compared to \$36.4 million in the prior year period. The change in net sales was primarily driven by increased volumes.

Year-to-date net sales for the first half of fiscal 2013 for Specialty and Consumer were \$79.1 million and were flat as compared to the same period in the prior year. The extra week of operations in the first half of fiscal 2012 contributed approximately \$3 million in net sales. The impact of net changes in pricing is estimated to have had a \$0.5 million increase on net sales during the first six months of fiscal 2013 as compared to the same period in the prior year. The remaining change in net sales was primarily driven by increased volumes.

Operating earnings within Specialty and Consumer were \$3.9 million for the second quarter of fiscal 2013 or 8.8 percent of net sales. This compares to operating earnings of \$3.6 million or 9.9 percent of net sales in the same period in the prior fiscal year. Operating earnings for the period included a charge of \$1.2 million for legacy pension costs. The remaining change in operating earnings as a percent of net sales was driven by increased sales volumes in the current period.

Year-to-date operating earnings within Specialty and Consumer decreased \$1.5 million to \$6.3 million for the first half of fiscal 2013. Operating earnings for the six month period included a charge of \$1.2 million for legacy pension costs.

The extra week of operations in the first half of fiscal 2012 contributed an estimated \$0.3 million additional operating earnings.

Financial Condition, Liquidity, and Capital Resources

The table below presents certain key cash flow and capital highlights for the periods indicated.

(In millions)	Six Months Ended		
	December 1, 2012	December 3, 2011	
Cash and cash equivalents, end of period	\$185.7	\$181.0	
Marketable securities, end of period	9.5	9.7	
Cash provided by operating activities	47.3	38.7	
Cash (used in) provided by investing activities	(29.8) 0.9	
Cash (used in) provided by financing activities	(3.7) (0.1)
Capital expenditures	(29.1) (13.2)
Stock repurchased and retired	(0.4) (2.7)
Notes payable	2.4	—	
Interest-bearing debt, end of period	250.0	250.0	
Available unsecured credit facility, end of period ⁽¹⁾	142.3	140.1	

⁽¹⁾ Amounts shown are net of outstanding letters of credit of \$7.7 million and \$9.9 million at December 1, 2012 and December 3, 2011, respectively, which are applied against the company's unsecured credit facility.

Cash Flow — Operating Activities

Cash generated from operating activities was \$47.3 million for the six months ended December 1, 2012, as compared to \$38.7 million in the prior year.

Six Months Ended December 1, 2012

Through the first six months of fiscal 2013, changes in working capital balances drove a use of cash totaling \$16.3 million. The main factors impacting working capital were increases in accounts receivable and inventory of \$8.7 million and \$8.8 million, respectively. These amounts were partially offset by a decrease in prepaid expenses of \$2.5 million.

The company is not planning any cash contributions to its defined benefit pension plans in the remainder of fiscal 2013. The company froze future benefit accruals of its primary domestic defined benefit plan as of September 1, 2012. The termination process is expected to take 12 to 24 months from the time that the benefit accruals were frozen, at which time the company will make the final plan contributions necessary to complete the termination process which are estimated to be \$50 million.

Six Months Ended December 3, 2011

Through the first six months of fiscal 2012, changes in working capital balances drove a use of cash totaling \$31.7 million. The main factors impacting working capital were increases in accounts receivable and inventory balances of \$15.0 million and \$9.2 million, respectively. These amounts were partially offset by a decrease in prepaid balances of \$12.4 million. A decrease in accrued compensation and employee incentive accruals of \$22.0 million also contributed to the use of cash. The company also contributed cash of \$3.7 million to its primary domestic benefit plan during the first six months of fiscal 2012.

Cash Flow — Investing Activities

The most significant cash outflow during the first six months of fiscal 2013 relates to investments in capital assets. The company purchased \$29.1 million of capital assets in fiscal 2013 compared to \$13.2 million in the first six months of fiscal 2012. \$7.4 million of the first six month's capital expenditures relate to the company's purchase of property for the planned construction of a new manufacturing facility in Ningbo, China. At the end of the second quarter of fiscal 2013, there were outstanding commitments for capital purchases of \$12.4 million. The company expects full-year capital purchases to be between \$50 million and \$60 million primarily due to planned investments in the company's facilities. This compares to full-year capital spending of \$28.5 million in fiscal 2012. The company also

received cash proceeds of \$6.2 million from the sale of a dealership during the prior year second quarter and \$13.8 million year-to-date, which includes the sale of two dealers during the first quarter of fiscal 2012. The company also made a \$1.7 million payment during the second quarter of fiscal 2013 related to an adjusted purchase price for the company's acquisition of POSH.

Cash Flow — Financing Activities

Cash outflows from financing activities were \$3.7 million for the first six months of fiscal 2013 compared to a use of cash of \$0.1 million in the first six months last year. Cash outflows for dividend payments were \$6.5 million and \$2.5 million for the first six months of fiscal 2013 and fiscal 2012, respectively. Dividend payments this quarter reflected the increased quarterly dividend of \$0.09 per share the company announced at the start of this fiscal year. In total, cash dividends paid for the three months ended December 1, 2012 were \$5.2 million compared to \$1.3 million for the three months ended December 3, 2011. Cash inflows for stock issuances related to employee benefit programs were \$0.8 million and \$5.1 million during the six months of fiscal 2013 and fiscal 2012, respectively. During the second quarter of fiscal 2013 the company also borrowed \$2.4 million to meet short term working capital needs for its Ningbo, China operations.

Outstanding standby letters of credit totaled \$7.7 million and are considered as usage against the company's unsecured revolving credit facility at the end of the second quarter fiscal 2013. At the end of the second quarter the availability under this credit facility was \$142.3 million. The provisions of the private placement notes and unsecured credit facility require that the company adhere to certain covenant restrictions and maintain certain performance ratios. The company was in compliance with all such restrictions and performance ratios this quarter and expects to remain in compliance in the future.

At the end of the second quarter fiscal 2013, the company had cash of \$185.7 million including \$44.9 million of cash held outside the U.S. In addition, the company had marketable securities of \$9.5 million held by one of its international subsidiaries. The subsidiary holding the company's marketable securities is taxed as a U.S. taxpayer at the company's election; consequently, for tax purposes all U.S. tax impacts for this subsidiary have been recorded. The company currently plans to repatriate approximately \$4.6 million within fiscal 2013 from foreign subsidiaries, for which all U.S taxes have been recorded. The company's intent is to permanently reinvest the remainder of the cash amounts outside the U.S. The company's plans do not demonstrate a need to repatriate these balances to fund U.S. operations.

The company believes cash on hand, cash generated from operations, and the borrowing capacity will provide adequate liquidity to fund near term and future business operations and capital needs.

Contractual Obligations

Contractual obligations associated with the ongoing business and financing activities will require cash payments in future periods. A table summarizing the amounts and estimated timing of these future cash payments was provided in the company's Form 10-K filing for the year ended June 2, 2012.

Guarantees

The company provides certain guarantees to third parties under various arrangements in the form of product warranties, loan guarantees, standby letters of credit, lease guarantees, performance bonds and indemnification provisions. These arrangements are accounted for and/or disclosed in accordance with FASB ASC Topic 460, Guarantees, as described in Note 12 to the condensed consolidated financial statements.

Variable Interest Entities

On occasion, the company provides financial support to certain independent dealers in the form of term loans, lines of credit, and/or loan guarantees that may represent variable interests in such entities. As of December 1, 2012, the company was not considered the primary beneficiary of any such dealer relationships under FASB ASC Topic 810, Consolidation. Accordingly, the company is not required to consolidate the financial statements of any of these entities as of December 1, 2012.

The risk and rewards associated with the interests in these dealerships are primarily limited to the outstanding loans and guarantee amounts. As of December 1, 2012, the company's maximum exposure to potential losses, net of reserve amounts, related to outstanding loans to these other entities was zero.

Contingencies

See Note 12 to the condensed consolidated financial statements.

Critical Accounting Policies

The company strives to report financial results clearly and understandably. The company follows accounting principles generally accepted in the United States in preparing its consolidated financial statements, which require certain estimates and judgments that affect the financial position and results of operations for the company. The company continually reviews the accounting policies and financial information disclosures. A summary of the more significant accounting policies that require the use of estimates and judgments in preparing the financial statements is provided in the company's Form 10-K filing for the year ended June 2, 2012. During the first six months of fiscal 2013, there was no material change in the accounting policies and assumptions previously disclosed.

New Accounting Standards

See Note 2 to the condensed consolidated financial statements.

Safe Harbor Provisions

Certain statements in this filing are not historical facts but are “forward-looking statements” as defined under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act, as amended. Such statements are based on management's beliefs, assumptions, current expectations, estimates and projections about the office furniture industry, the economy and the company itself. Words like “anticipates,” “believes,” “confident,” “estimates,” “expects,” “forecasts,” “likely,” “plans,” “projects,” “should,” variations of such words, and similar expressions identify such forward-looking statements. These statements do not guarantee future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict with regard to timing, extent, likelihood, and degree of occurrence. These risks include, without limitation, employment and general economic conditions, the pace of economic activity in the U.S. and in our international markets, the estimate and timing of anticipated pension amortization, settlement expenses and defined benefit plan pension contributions, the pace and level of government procurement, the increase in white collar employment, the willingness of customers to undertake capital expenditures, the types of products purchased by customers, competitive pricing pressures, the availability and pricing of raw materials, our reliance on a limited number of suppliers, currency fluctuations, the ability to increase prices to absorb the additional costs of raw materials, the financial strength of our dealers, the financial strength of our customers, the mix of our products purchased by customers, our ability to attract and retain key executives and other qualified employees, our ability to continue to make product innovations, the success of newly introduced products, our ability to obtain targeted margins from new products, our ability to serve all of our markets, possible acquisitions, divestitures or alliances, the outcome of pending litigation or governmental audits or investigations, political risk in the international markets we serve, and other risks identified in our filings with the Securities and Exchange Commission. Therefore, actual results and outcomes may materially differ from what we express or forecast. Furthermore, Herman Miller, Inc. undertakes no obligation to update, amend, or clarify forward-looking statements.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

The information concerning quantitative and qualitative disclosures about market risk contained in the company's Annual Report on Form 10-K for its fiscal year ended June 2, 2012 is incorporated herein by reference.

Direct Material Costs

The company is exposed to risks arising from market price changes for certain direct materials used in its manufacturing processes. The largest direct material costs incurred by the company are for steel, plastic/textiles, wood particleboard, and aluminum components. The market price of plastics and textiles are sensitive to the cost of oil and natural gas. The cost of wood particleboard has been impacted by continual downsizing of production capacity in the wood market. Aluminum component prices are sensitive to changes in energy costs associated with the conversion of raw materials to aluminum ingots.

Defined Benefit Pension Plans

The company is exposed to risks in its defined benefit pension plan balance sheet liability arising from sensitivity to changes in yields on high-quality corporate bonds, which are used to determine the Projected Benefit Obligation (PBO), and on actual market returns on plan assets. An increase or decrease to bond yields causes an inverse effect on the PBO and increased or decreased returns on assets have a corresponding one-to-one effect on the balance sheet liability. A decline in the value of pension plan assets or rise in pension plan PBO could result in increases to the balance sheet pension liability, increases in pension expense, and increases in required funding. At the end of fiscal year 2012 the discount rate used for establishing the primary U.S. defined benefit plan's balance sheet liability and projected fiscal 2013 net periodic benefit costs was 3.57 percent. As a rule of thumb, the company views a change of 100 basis points (in this discount rate) as having a 10 percent effect on the plan's Projected Benefit Obligation or an approximately \$33 million effect on the pension balance sheet liability. Generally, both the PBO and plan assets are determined as of the fiscal year-end measurement date.

The company's strategy to close and terminate its domestic defined benefit pension plans will likely require benefit distributions in the form of purchased annuity contracts for certain plan participants. The cost of these contracts will depend on a variety of market specific factors, including but not limited to the general level of demand in the market for similar annuity contracts, the profile of plan participants who elect to have their benefits distributed in the form of an annuity, and the level of market interest rates at the time of purchase. The company expects the termination process to be completed during the second quarter of fiscal 2014. At the time of termination the company will be required to make additional contributions to the plans. The company estimates that this additional funding will be approximately \$50 million during the second quarter of fiscal 2014.

Foreign Exchange Risk

The company manufactures its products in the United States, United Kingdom and China. It also sources completed products and product components from outside the United States. The company's completed products are sold in numerous countries around the world. Sales in foreign countries as well as certain expenses related to those sales are transacted in currencies other than the company's reporting currency, the U.S. dollar. Accordingly, production costs and profit margins related to these sales are affected by the currency exchange relationship between the countries where the sales take place and the countries where the products are sourced or manufactured. These currency exchange relationships can also affect the company's competitive positions within these markets.

In the normal course of business, the company enters into contracts denominated in foreign currencies. The principal foreign currencies in which the company conducts its business are the British pound sterling, European euro, Canadian dollar, Australian dollar, Japanese yen, Mexican peso, Brazilian real, Indian rupee, Hong Kong dollar and Chinese renminbi. As of December 1, 2012, eleven contracts in total were placed to offset various currency exposures. To offset net asset exposure denominated in non-functional currency, four forwards contracts were placed including

two forward contracts to sell 5.2 million euros, one forward contract to sell 0.2 million Australian dollars, and one forward contract to sell 0.5 million U.S. dollars. Conversely, seven contracts were placed to offset the company's net liability exposure denominated in non-functional currency. These seven contracts included forward contracts to buy 25.9 million U.S. dollars. As of June 2, 2012, the company had outstanding, ten forward currency instruments designed to offset either net asset or net liability exposure that is denominated in non-functional currencies. Two forward contracts were placed to offset a 3.9 million euro-denominated net asset exposure and two forward contracts were placed to offset a 0.6 million U.S. dollar-denominated net asset exposure. One forward contract was placed to offset 0.3 million Australian dollar-denominated net asset exposure. Five forward contracts were placed to offset a 4.2 million U.S.dollar-denominated net liability exposure.

Item 4: Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision of, and with the participation of management, the company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of December 1, 2012, and have concluded that as of that date, the company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the quarterly period ended December 1, 2012, that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

HERMAN MILLER, INC.
PART II — OTHER INFORMATION

Item 1: Legal Proceedings

Referred to in Note 12 of the condensed consolidated financial statements.

Item 1A: Risk Factors

Except for the risk factor noted below, there have been no material changes in the assessment of the company's risk factors from those set forth in the Annual Report on Form 10-K for the year ended June 2, 2012.

Adverse economic and industry conditions could have a negative impact on our business, results of operations, and financial condition.

Customer demand within the contract office furniture industry is affected by various macro-economic factors; general corporate profitability, white-collar employment levels, new office construction rates, and existing office vacancy rates are among the most influential factors. History has shown that declines in these measures can have an adverse effect on overall office furniture demand. Additionally, factors and changes specific to our industry, such as developments in technology, governmental standards and regulations, and health and safety issues can influence demand. There are current and future economic and industry conditions, which could adversely affect our business, operating results, or financial condition.

Other macroeconomic developments, such as the recent recessions in Europe and the debt crisis in certain countries in the European Union, could negatively affect the company's ability to conduct business in those geographies. The continuing debt crisis in certain European countries could cause the value of the euro to deteriorate, reducing the purchasing power of the company's European customers and potentially undermine the financial health of the company's suppliers and customers in other parts of the world. Financial difficulties experienced by the company's suppliers and customers, including distributors, could result in product delays and inventory issues; risks to accounts receivable could also include delays in collection and greater bad debt expense.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

(A) Issuer Purchases of Equity Securities

The following is a summary of share repurchase activity during the quarter ended December 1, 2012.

Period	(a) Total Number of Shares (or Units) Purchased ⁽¹⁾	(b) Average price Paid per Share or Unit	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may yet be Purchased Under the Plans or Programs
9/2/12-9/29/12	227	\$ 19.98	227	\$ 166,198,050
9/30/12-10/27/12	—	\$—	—	\$ 166,198,050
10/28/12-12/1/12	—	\$—	—	\$ 166,198,050
Total	227		227	

⁽¹⁾ No shares were purchased outside of a publicly announced plan or program.

No repurchase plans expired or were terminated during the second quarter of fiscal 2013, nor do any plans exist under which the company does not intend to make further purchases.

During the period covered by this report, the company did not sell any of its equity shares that were not registered under the Securities Act of 1933.

Item 3: Defaults upon Senior Securities — None
