SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Fiscal Year Ended December 31, 2012

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____.
Commission File Number: 0-15204

NATIONAL BANKSHARES, INC.
(Exact name of registrant as specified in its charter)

Virginia
(State of incorporation)

54-1375874
(I.R.S. Employer Identification No.)

101 Hubbard Street
P.O. Box 90002
Blacksburg, VA 24062-9002
(540) 951-6300

(Address and telephone number of principal executive offices)

Securities registered pursuant to Section 12(b) of the
Act:
None

Securities registered Pursuant to Section 12(g) of the
Act:
Common Stock, Par Value \$1.25 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such period that the registrant was required to submit and post files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of “accelerated filer, large accelerated filer, and smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [] Accelerated filer [x] Non-accelerated filer [] Smaller reporting company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes [] No [x]

The aggregate market value of the voting common stock of the registrant held by stockholders (not including voting common stock held by Directors, Executive Officers and Corporate Governance) on June 30, 2012 (the last business day of the most recently completed second fiscal quarter) was approximately \$200,195,893. As of February 20, 2013, the registrant had 6,947,974 shares of voting common stock outstanding.

Item 1. Business

History and Business

National Bankshares, Inc. (the “Company” or “NBI”) is a financial holding company that was organized in 1986 under the laws of Virginia and is registered under the Bank Holding Company Act of 1956. It conducts most of its operations through its wholly-owned community bank subsidiary, the National Bank of Blacksburg (“NBB”). It also owns National Bankshares Financial Services, Inc. (“NBFS”), which does business as National Bankshares Insurance Services and National Bankshares Investment Services.

The National Bank of Blacksburg

The National Bank of Blacksburg, which does business as National Bank, was originally chartered in 1891 as the Bank of Blacksburg. Its state charter was converted to a national charter in 1922 and it became the National Bank of Blacksburg. In 2004, NBB purchased Community National Bank of Pulaski, Virginia. In May, 2006, Bank of Tazewell County, a Virginia bank which since 1996 had also been a wholly-owned subsidiary of NBI, was merged with and into NBB.

NBB is community-oriented, and it offers a full range of retail and commercial banking services to individuals, businesses, non-profits and local governments from its headquarters in Blacksburg, Virginia and its twenty-four branch offices throughout southwest Virginia. NBB has telephone and internet banking and it operates twenty-three automated teller machines in its service area. Lending is focused at small and mid-sized businesses and at individuals. Loan types include commercial, agricultural, real estate, home equity and consumer. Merchant credit card services and business and consumer debit and credit cards are available. Deposit accounts offered include demand deposit accounts, money market deposit accounts, savings accounts and certificates of deposit. NBB offers other miscellaneous services normally provided by commercial banks, such as letters of credit, night depository, safe deposit boxes, travelers checks, utility payment services and automatic funds transfer. NBB conducts a general trust business that has wealth management, and trust and estate services for individual and business customers.

At December 31, 2012, NBB had total assets of \$1,101,345 and total deposits of \$946,939. NBB’s net income for 2012 was \$18,025, which produced a return on average assets of 1.67% and a return on average equity of 12.42%. Refer to Note 12 of the Notes to Consolidated Financial Statements for NBB’s risk-based capital ratios.

National Bankshares Financial Services, Inc.

In 2001, National Bankshares Financial Services, Inc. was formed in Virginia as a wholly-owned subsidiary of NBI. NBFS offers non-deposit investment products and insurance products for sale to the public. NBFS works cooperatively with Infinex Investments, Inc. to provide investments and with Bankers Insurance, LLC for insurance products. NBFS does not significantly contribute to NBI’s net income.

Operating Revenue

The percentage of total operating revenue attributable to each class of similar service that contributed 15% or more of the Company’s total operating revenue for the years ended December 31, 2012, 2011 and 2010 is set out in the following table.

Period	Class of Service	Percentage of Total Revenues
--------	------------------	------------------------------

Edgar Filing: NATIONAL BANKSHARES INC - Form 10-K

December 31, 2012	Interest and Fees on Loans	61.58%
	Interest on Investments	22.78%
December 31, 2011	Interest and Fees on Loans	62.57%
	Interest on Investments	22.75%
December 31, 2010	Interest and Fees on Loans	64.22%
	Interest on Investments	21.03%

Market Area

The Company's market area in southwest Virginia is made up of the counties of Montgomery, Giles, Pulaski, Tazewell, Wythe, Smyth and Washington. It includes the independent cities of Radford and Galax, and the portions of Carroll and Grayson Counties that are adjacent to Galax. The Company also serves those portions of Mercer County and McDowell County, West Virginia that are contiguous with Tazewell County, Virginia. Although largely rural, the market area is home to two major universities, Virginia Tech and Radford University, and to three community colleges. Virginia Tech, located in Blacksburg, Virginia, is the area's largest employer and is the Commonwealth's second largest university. A second state supported university, Radford University, is located nearby. State support for public colleges and universities, like Virginia Tech and Radford University, has been adversely affected by the recession and State budget considerations. In recent years, Virginia Tech's Corporate Research Center has brought a number of technology related companies to Montgomery County. However, the recession has slowed the growth of new jobs in the Center.

In addition to education, the market area has a diverse economic base, with manufacturing, agriculture, tourism, healthcare, retail and service industries all represented. Large manufacturing facilities in the region include Celanese Acetate, the largest employer in Giles County, and Volvo Heavy Trucks, the largest company in Pulaski County. Both of these firms have experienced cycles of hiring and layoffs within the past several years. Pulaski and Galax have in the past been centers for furniture manufacturing. However, this industry has been declining because of growing furniture imports and the loss of demand. Several furniture companies have gone out of business in the recent past. Tazewell County is largely dependent on the coal mining industry and on agriculture for its economic base. Coal production is a cyclical industry that was negatively affected by the economic decline. Montgomery County, Bluefield in Tazewell County and Abingdon in Washington County are regional retail centers and have facilities to provide basic health care for the region.

NBI's market area offers the advantages of a good quality of life, scenic beauty, moderate climate and historical and cultural attractions. The region has some recent success attracting retirees, particularly from the Northeast and urban northern Virginia.

Because NBI's market area is economically diverse and includes large public employers, it has historically avoided the most extreme effects of past economic downturns. However, because the current national and state economic problems have been severe and prolonged, most of the Company's market area is experiencing higher levels of unemployment and very slow economic growth. For the Company, the result is a higher number of loan defaults than its historical average and a lower loan demand.

Competition

The banking and financial services industry in NBI's market area is highly competitive. The competitive business environment is a result of changes in regulation, changes in technology and product delivery systems and competition from other financial institutions as well as non-traditional financial services. NBB competes for loans and deposits with other commercial banks, credit unions, securities and brokerage companies, mortgage companies, insurance companies, retailers, automobile companies and other nonbank financial service providers. Many of these competitors are much larger in total assets and capitalization, have greater access to capital markets and offer a broader array of financial services than NBB. In order to compete, NBB relies upon a deep knowledge of its markets, a service-based business philosophy, personal relationships with customers, specialized services tailored to meet customers' needs and the convenience of office locations. In addition, the bank is generally competitive with other financial institutions in its market area with respect to interest rates paid on deposit accounts, interest rates charged on loans and other service charges on loans and deposit accounts.

Organization and Employment

NBI, NBB and NBFS are organized in a holding company/subsidiary structure. Functions that serve both subsidiaries, including audit, compliance, loan review and human resources, are at the holding company level, and fees are charged to the respective subsidiary for those services.

At December 31, 2012, NBI employed 19 full time employees, NBB had 192 full time equivalent employees and NBFS had 3 full time employees.

Regulation, Supervision and Government Policy

NBI and NBB are subject to state and federal banking laws and regulations that provide for general regulatory oversight of all aspects of their operations. As a result of substantial regulatory burdens on banking, financial institutions like NBI and NBB are at a disadvantage to other competitors who are not as highly regulated, and NBI and NBB's costs of doing business are accordingly higher. Legislative efforts to prevent a repeat of the 2008 financial crisis culminated in the Dodd-Frank Wall Street Reform Act of 2010. This legislation, together with existing and planned regulations, has dramatically increased the regulatory burden on commercial banks. The burden falls disproportionately on community banks like NBB, which must devote a higher proportion of their human and other resources to compliance than do their larger competitors. The financial crisis has also heightened the examination focus by banking regulators, particularly on real estate related assets and commercial loans. In the current environment, the potential for additional laws and regulations that will impact the Company, as well as heightened examination standards with regard to asset quality, cannot be ruled out. The following is a brief summary of certain laws, rules and regulations that affect NBI and NBB.

National Bankshares, Inc.

NBI is a bank holding company qualified as a financial holding company under the Federal Bank Holding Company Act (BHCA), which is administered by the Board of Governors of the Federal Reserve System (the “Federal Reserve”). NBI is required to file an annual report with the Federal Reserve and may be required to furnish additional information pursuant to the BHCA. The Federal Reserve is authorized to examine NBI and its subsidiaries. With some limited exceptions, the BHCA requires a bank holding company to obtain prior approval from the Federal Reserve before acquiring or merging with a bank or before acquiring more than 5% of the voting shares of a bank unless it already controls a majority of shares.

The Bank Holding Company Act. Under the BHCA, a bank holding company is generally prohibited from engaging in nonbanking activities unless the Federal Reserve has found those activities to be incidental to banking. Bank holding companies also may not acquire more than 5% of the voting shares of any company engaged in nonbanking activities. Amendments to the BHCA that were included in the Gramm-Leach-Bliley Act of 1999 (see below) permitted any bank holding company with bank subsidiaries that are well-capitalized, well-managed and which have a satisfactory or better rating under the Community Reinvestment Act (see below) to file an election with the Federal Reserve to become a financial holding company. A financial holding company may engage in any activity that is (i) financial in nature (ii) incidental to a financial activity or (iii) complementary to a financial activity. Financial activities include insurance underwriting, securities dealing and underwriting and providing financial, investment or economic advising services. NBI is a financial holding company.

The Virginia Banking Act. The Virginia Banking Act requires all Virginia bank holding companies to register with the Virginia State Corporation Commission (the “Commission”). NBI is required to report to the Commission with respect to financial condition, operations and management. The Commission may also make examinations of any bank holding company and its subsidiaries and must approve the acquisition of ownership or control of more than 5% of the voting shares of any Virginia bank or bank holding company.

The Gramm-Leach-Bliley Act. The Gramm-Leach-Bliley Act (“GLBA”) permits significant combinations among different sectors of the financial services industry, allows for expansion of financial service activities by bank holding companies and offers financial privacy protections to consumers. GLBA preempts most state laws that prohibit financial holding companies from engaging in insurance activities. GLBA permits affiliations between banks and securities firms in the same holding company structure, and it permits financial holding companies to directly engage in a broad range of securities and merchant banking activities.

The Sarbanes-Oxley Act. The Sarbanes-Oxley Act (“SOX”) enacted major reforms of the federal securities laws intended to protect investors by improving the accuracy and reliability of corporate disclosures. It impacts all companies with securities registered under the Securities Exchange Act of 1934, including NBI. SOX creates increased responsibility for chief executive officers and chief financial officers with respect to the content of filings with the Securities and Exchange Commission. Section 404 of SOX and related Securities and Exchange Commission rules focused increased scrutiny by internal and external auditors on NBI’s systems of internal controls over financial reporting, which is designed to insure that those internal controls are effective in both design and operation. SOX sets out enhanced requirements for audit committees, including independence and expertise, and it includes stronger requirements for auditor independence and limits the types of non-audit services that auditors can provide. Finally, SOX contains additional and increased civil and criminal penalties for violations of securities laws.

Capital and Related Requirements. The Federal Reserve has adopted risk-based capital guidelines that are applicable to NBI. The guidelines provide that the Company must maintain a minimum ratio of 8% of qualified total capital to risk-weighted assets (including certain off-balance sheet items, such as standby letters of credit). At least half of total

capital must be comprised of Tier 1 capital, for a minimum ratio of Tier 1 capital to risk-weighted assets of 4%. In addition, the Federal Reserve has established minimum leverage ratio guidelines of 4% for banks that meet certain specified criteria. The leverage ratio is the ratio of Tier 1 capital to total average assets, less intangibles. NBI is expected to be a source of capital strength for its subsidiary bank, and regulators can undertake a number of enforcement actions against NBI if its subsidiary bank becomes undercapitalized. NBI's bank subsidiary is well capitalized and fully in compliance with capital guidelines.

Bank regulators are actively reviewing capital stress testing and liquidity requirements for banking organizations beyond current levels. Implementation of the so-called BASEL III accord has been delayed. NBI is unable to predict when the BASEL III requirements will be implemented or the extent to which they may be applied to community banking organizations like NBI.

Emergency Economic Stabilization Act of 2008. On October 14, 2008, the U.S. Treasury announced the Troubled Asset Relief Program ("TARP") under the Emergency Economic Stabilization Act of 2008. In the program, the Treasury was authorized to purchase up to \$250 billion of senior preferred shares in qualifying U.S. banks, saving and loan associations and bank and savings and loan holding companies. The amount of TARP funds was later increased to \$700 billion. The minimum subscription amount was 1% of risk-weighted assets and the maximum amount was the lesser of \$25 billion or 3% of risk-weighted assets. The Dodd-Frank Act (described below) reduced the amount attributed to \$475 billion. NBI did not participate in TARP.

American Recovery and Reinvestment Act of 2009. The ARRA was enacted in 2009 and includes a wide range of programs to stimulate economic recovery. In addition, it also imposed new executive compensation and corporate governance obligations on TARP Capital Purchase Program recipients. Because NBI did not participate in TARP, it is not affected by these requirements.

Dodd-Frank Wall Street Reform and Consumer Protection Act. The Dodd-Frank Act was signed into law on July 21, 2010. Its wide ranging provisions affect all federal financial regulatory agencies and nearly every aspect of the American financial services industry. Among the provisions of the Dodd-Frank Act that directly impact the Company is the creation of an independent Consumer Financial Protection Bureau (CFPB), which has the ability to write rules for consumer protections governing all financial institutions. All consumer protection responsibility formerly handled by other banking regulators is consolidated in the CFPB. It will also oversee the enforcement of all federal laws intended to ensure fair access to credit. For smaller financial institutions such as NBI and NBB, the CFPB will coordinate its examination activities through their primary regulators.

The Dodd-Frank Act contains provisions designed to reform mortgage lending, which includes the requirement of additional disclosures for consumer mortgages. The CFPB has begun implementing mortgage lending regulations to carry out its mandate. In addition, the Federal Reserve issued new rules, effective October 1, 2011, which had the effect of limiting the fees charged to merchants by credit card companies for debit card transactions. The Dodd-Frank Act also contains provisions that affect corporate governance and executive compensation.

Although the Dodd-Frank Act provisions themselves are extensive, the ultimate impact on the Company of this massive legislation is unknown. The Act provides that several federal agencies, including the Federal Reserve, the CFPB and the Securities and Exchange Commission, shall issue regulations implementing major portions of the legislation, and this process is ongoing.

The National Bank of Blacksburg

NBB is a national banking association incorporated under the laws of the United States, and the bank is subject to regulation and examination by the Office of the Comptroller of the Currency (“OCC”). NBB’s deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to the limits of applicable law. The OCC, as the primary regulator, and the FDIC regulate and monitor all areas of NBB’s operation. These areas include adequacy of capitalization and loss reserves, loans, deposits, business practices related to the charging and payment of interest, investments, borrowings, payment of dividends, security devices and procedures, establishment of branches, corporate reorganizations and maintenance of books and records. NBB is required to maintain certain capital ratios. It must also prepare quarterly reports on its financial condition for the OCC and conduct an annual audit of its financial affairs. OCC requires NBB to adopt internal control structures and procedures designed to safeguard assets and monitor and reduce risk exposure. While appropriate for the safety and soundness of banks, these requirements add to overhead expense for NBB and other banks.

The Community Reinvestment Act. NBB is subject to the provisions of the Community Reinvestment Act (“CRA”), which imposes an affirmative obligation on financial institutions to meet the credit needs of the communities they serve, including low and moderate income neighborhoods. The OCC monitors NBB’s compliance with the CRA and assigns public ratings based upon the bank’s performance in meeting stated assessment goals. Unsatisfactory CRA ratings can result in restrictions on bank operations or expansion. NBB received a “satisfactory” rating in its last CRA examination by the OCC.

The Gramm-Leach-Bliley Act. In addition to other consumer privacy provisions, the Gramm-Leach-Bliley Act (“GLBA”) restricts the use by financial institutions of customers’ nonpublic personal information. At the inception of the customer relationship and annually thereafter, NBB is required to provide its customers with information regarding its policies and procedures with respect to handling of customers’ nonpublic personal information. GLBA generally

prohibits a financial institution from providing a customer's nonpublic personal information to unaffiliated third parties without prior notice and approval by the customer.

The USA Patriot Act. The USA Patriot Act ("Patriot Act") facilitates the sharing of information among government entities and financial institutions to combat terrorism and money laundering. The Patriot Act imposes an obligation on NBB to establish and maintain anti-money laundering policies and procedures, including a customer identification program. The bank is also required to screen all customers against government lists of known or suspected terrorists. There is additional regulatory oversight to insure compliance with the Patriot Act.

Consumer Laws and Regulations. There are a number of laws and regulations that regulate banks' consumer loan and deposit transactions. Among these are the Truth in Lending Act, the Truth in Savings Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Fair Credit Reporting Act, the Electronic Funds Transfer Act and the Fair Debt Collections Practices Act. NBB is required to comply with these laws and regulations in its dealings with customers. In addition, the CFPB has begun adopting rules regulating consumer mortgage lending pursuant to the Dodd-Frank Act. There are numerous disclosure and other compliance requirements associated with the consumer laws and regulations.

Deposit Insurance. NBB has deposits that are insured by the FDIC. FDIC maintains a Deposit Insurance Fund (“DIF”) that is funded by risk-based insurance premium assessments on insured depository institutions. Assessments are determined based upon several factors, including the level of regulatory capital and the results of regulatory examinations. FDIC may adjust assessments if the insured institution’s risk profile changes or if the size of the DIF declines in relation to the total amount of insured deposits. In 2009, because of the troubled economy and the number of failed banks nationwide, there was pressure on the reserve ratio of the DIF. In order to rebuild the Fund and to help maintain public confidence in the banking system, on June 30, 2009, the FDIC imposed a special assessment of five basis points of NBB’s FDIC insured assets, minus Tier 1 capital. The special assessment, which was in addition to regular DIF assessments was payable on September 30, 2009. In an effort to further strengthen the Fund, on November 12, 2009 the FDIC adopted a rule requiring insured depository institutions (including NBB) to prepay their estimated quarterly regular risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012 on December 30, 2009. In 2011, the method for calculating the FDIC assessment changed from deposit based to asset based.

FDIC announced its Transaction Account Guarantee Program (“TAG”) on October 14, 2008. The TAG, which was a part of the Temporary Liquidity Guarantee Program, provided unlimited coverage for noninterest bearing deposit accounts for FDIC-insured institutions that elected to participate. NBB elected to participate in this program, and its DIF assessments increased to reflect the additional FDIC coverage. The TAG expired on December 31, 2012. The expiration of TAG is likely to cause an outflow of deposits from banks to money market funds.

After giving primary regulators an opportunity to first take action, FDIC may initiate an enforcement action against any depository institution it determines is engaging in unsafe or unsound actions or which is in an unsound condition, and the FDIC may terminate that institution’s deposit insurance. NBB has no knowledge of any matter that would threaten its FDIC insurance coverage.

Capital Requirements. The same capital requirements that are discussed above with relation to NBI are applied to NBB by the OCC. The OCC guidelines provide that banks experiencing internal growth or making acquisitions are expected to maintain strong capital positions well above minimum levels, without reliance on intangible assets. In addition, implementation of the BASEL III requirements could increase required capital minimums as well as compliance costs due to their complexity.

Limits on Dividend Payments. A significant portion of NBI’s income is derived from dividends paid by NBB. As a national bank, NBB may not pay dividends from its capital, and it may not pay dividends if the bank would become undercapitalized, as defined by regulation, after paying the dividend. Without prior OCC approval, NBB’s dividend payments in any calendar year are restricted to the bank’s retained net income for that year, as that term is defined by the laws and regulations, combined with retained net income from the preceding two years, less any required transfer to surplus.

The OCC and FDIC have authority to limit dividends paid by NBB if the payments are determined to be an unsafe and unsound banking practice. Any payment of dividends that depletes the bank’s capital base could be deemed to be an unsafe and unsound banking practice.

Branching. As a national bank, NBB is required to comply with the state branch banking laws of Virginia, the state in which the bank is located. NBB must also have the prior approval of OCC to establish a branch or acquire an existing banking operation. Under Virginia law, NBB may open branch offices or acquire existing banks or bank branches anywhere in the state. Virginia law also permits banks domiciled in the state to establish a branch or to acquire an existing bank or branch in another state. The Dodd-Frank Act permits the OCC to approve applications by national banks like NBB to establish de novo branches in any state in which a bank located in that state is permitted to establish a branch.

Monetary Policy

The monetary and interest rate policies of the Federal Reserve, as well as general economic conditions, affect the business and earnings of NBI. NBB and other banks are particularly sensitive to interest rate fluctuations. The spread between the interest paid on deposits and that which is charged on loans is the most important component of the bank's earnings. In addition, interest earned on investments held by NBI and NBB has a significant effect on earnings. As conditions change in the national and international economy and in the money markets, the Federal Reserve's actions, particularly with regard to interest rates, can impact loan demand, deposit levels and earnings at NBB. It is not possible to accurately predict the effects on NBI of economic and interest rate changes.

Other Legislative and Regulatory Concerns

Particularly because of uncertain economic conditions and the current political environment, federal and state laws and regulations are regularly proposed that could affect the regulation of financial institutions. New regulations could add to the regulatory burden on banks and other financial service providers and increase the costs of compliance, or they could change the products that can be offered and the manner in which financial institutions do business. We cannot foresee how regulation of financial institutions may change in the future and how those changes might affect NBI.

Company Website

NBI maintains a website at www.nationalbankshares.com. The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are made available on its website as soon as is practical after the material is electronically filed with the Securities and Exchange Commission. The Company's proxy materials for the 2013 annual meeting of stockholders are also posted on a separate website at www.nationalbanksharesproxy.com.

Item 1A. Risk Factors

If recovery from the economic downturn slows further or recession returns, our credit risk will increase and there could be greater loan losses.

A further slowing in economic recovery or return to recession is likely to result in a higher rate of business closures and increased job losses in the region in which we do business. In addition, reduced State funding for the public colleges and universities that are large employers in our market area could have an adverse effect on employment levels and on the area's economy. These factors would increase the likelihood that more of our customers would become delinquent or default on their loans. A higher level of loan defaults could result in higher loan losses, which could adversely affect our performance.

An extended economic recovery or return to recession could increase the risk of losses in our investment portfolio. We hold both corporate and municipal bonds in our investment portfolio. A slow recovery or return to recession could increase the actual or perceived risk of default by both corporate and government issuers and, in either case, could adversely affect the value of these investments.

If the real estate market remains depressed for an extended period, our business could be negatively affected. A depressed real estate market can impact us in several ways. First, the demand for new real estate loans will decline, and existing loans may become delinquent. In addition, if there is a general devaluation in real estate, loan collateral values will decline.

Market interest rates are currently low. If market interest rates rise, our net interest income can be negatively affected in the short term.

The direction and speed of interest rate changes affect our net interest margin and net interest income. In the short term, rising interest rates may negatively affect our net interest income, because our interest-bearing liabilities (generally deposits) reprice sooner than our interest-earning assets (generally loans).

The allowance for loan losses may not be adequate to cover actual losses.

In accordance with accounting principles generally accepted in the United States, an allowance for loan losses is maintained to provide for loan losses. The allowance for loan losses may not be adequate to cover actual credit losses, and future provisions for credit losses could materially and adversely affect operating results. The allowance for loan losses is based on prior experience, as well as an evaluation of the risks in the current portfolio. The amount of future losses is susceptible to changes in economic, operating, and other outside forces and conditions, including changes in interest rates, all of which are beyond the Company's control; and these losses may exceed current estimates. Federal regulatory agencies, as an integral part of their examination process, review the Company's loans and allowance for loan losses. While management believes that the allowance for loan losses is adequate to cover current losses, it cannot make assurances that it will not further increase the allowance for loan losses or that regulators will not require it to increase this allowance. Either of these occurrences could adversely affect earnings.

The allowance for loan losses requires management to make significant estimates that affect the financial statements. Due to the inherent nature of this estimate, management cannot provide assurance that it will not significantly increase

the allowance for loan losses, which could materially and adversely affect earnings.

An increase in bank failures nationwide could significantly increase the cost of FDIC insurance.

Since insured depository institutions, including our bank, bear the full cost of deposit insurance provided by FDIC, a high number of bank failures could put additional pressure on a stressed Deposit Insurance Fund. This possibility could in turn lead to higher assessments that could negatively impact our earnings.

The expiration of the Transaction Guarantee Program may affect customer account retention and deposit levels.

The expiration on December 31, 2012 of the Dodd-Frank Act's modification and extension of the Transaction Account Guarantee Program ("TAG"), which provided unlimited coverage for noninterest bearing deposit accounts held at NBB, may have an impact on NBB's ability to attract and retain customer accounts and deposits as those customers may consider placing their funds in other institutions and financial vehicles in order to maximize FDIC insurance coverage. The Company and its subsidiaries may be required to place aside additional collateral to ensure the security and safety of customer accounts, including municipal accounts. While the effects of the TAG program expiration are uncertain, the potential loss of accounts and deposits may impact NBB's ability to make loans to small businesses and individuals.

If more competitors come into our market area, our business could suffer.

The financial services industry in our market area is highly competitive, with a number of commercial banks, credit unions, insurance companies and stockbrokers seeking to do business with our customers. If there is additional competition from new business or if our existing competitors focus more attention on our market, we could lose customers and our business could suffer.

Additional laws and regulations could lead to a significant increase in our regulatory burden.

The Dodd-Frank Act and its implementing regulations will result in greater compliance costs and may reduce the profitability of some of our products and services. Implementation of the proposed BASEL III rules for capital could increase our compliance costs because of the complexity in the risk assessment rules among other things. Both federal and state governments could enact new laws affecting financial institutions that would increase our regulatory burden and could negatively affect our profits.

New laws and regulations could limit our sources of noninterest income.

New laws and regulations could limit our ability to offer certain profitable products and services or require that we offer unprofitable products and services. This could have a negative effect on the level of noninterest income.

Intense oversight by regulators could result in stricter requirements and higher overhead costs.

The regulatory environment could cause financial industry regulators to impose additional requirements, such as higher capital limits, which would impact the Company's earnings.

Political stalemates in the U.S. and world governments could negatively affect the financial markets.

Political stalemates in the U.S. and world governments could affect financial markets and affect fiscal policy which could negatively affect our investment portfolio and earnings.

Our information systems may experience an interruption or security breach.

We rely heavily on communications and information systems to conduct our business. Any failure, interruption or breach in security of these systems could result in failures or disruptions in our internet banking, deposit, loan and other systems. While we have policies and procedures designed to prevent or limit the effect of the possible failure, interruption or security breach of our information systems, there can be no assurance that any such failure, interruption or security breach will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failure, interruption or security breach of our communications and information systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny or expose us to civil litigation and possible financial liability.

Changes in funding for higher education could materially affect our business.

Federal and state support for public colleges and universities in the Company's market area has been adversely affected by the recession and budgetary considerations. As a result, our business may be adversely affected from declines in university programs, capital projects, employment and other related factors.

Item 1B. Unresolved Staff Comments

There are none.

Item 2. Properties

NBB owns and has a branch bank in NBI's headquarters building located at 101 Hubbard Street, Blacksburg, Virginia. The bank's main office is at 100 South Main Street, Blacksburg, Virginia. NBB owns an additional nineteen branch

offices and it leases four. NBB owns a former branch building in Tazewell, Virginia that is actively marketing for sale. NBI owns a building in Pulaski, Virginia that it rents on a month-to-month basis and is actively marketing for sale. We believe that existing facilities are adequate for current needs and to meet anticipated growth.

Item 3. Legal Proceedings

NBI, NBB, and NBFS are not currently involved in any material pending legal proceedings.

Item 4. Mine Safety Disclosures

Not applicable.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Information and Dividends

National Bankshares, Inc.'s common stock is traded on the NASDAQ Capital Market under the symbol "NKSH." As of December 31, 2012, there were 776 record stockholders of NBI common stock. The following is a summary of the market price per share and cash dividend per share of the common stock of National Bankshares, Inc. for 2012 and 2011.

Common Stock Market Prices

	2012		2011		Dividends per share	
	High	Low	High	Low	2012	2011
First Quarter	\$ 31.16	\$ 25.95	\$ 31.80	\$ 27.46	\$ ---	\$ ---
Second Quarter	30.65	28.60	29.71	24.08	0.53	0.48
Third Quarter	35.82	29.18	27.23	22.93	---	---
Fourth Quarter	33.82	29.03	29.00	23.21	0.57	0.52

NBI's primary source of funds for dividend payments is dividends from its bank subsidiary, NBB. Bank dividend payments are restricted by regulators, as more fully disclosed in Note 11 of Notes to Consolidated Financial Statements.

On May 9, 2012, NBI's Board of Directors approved the repurchase of up to 100,000 shares of equity securities that are registered by the Company pursuant to Section 12 of the Securities Exchange Act of 1934. During 2012, there were no shares repurchased, and 100,000 shares may yet be purchased under the program.

Stock Performance Graph

The following graph compares the yearly percentage change in the cumulative total of stockholder return on NBI common stock with the cumulative return on the NASDAQ Composite Index, and the NASDAQ Bank Index for the five-year period commencing on December 31, 2007. These comparisons assume the investment of \$100 in National Bankshares, Inc. common stock in each of the indices on December 31, 2007, and the reinvestment of dividends.

	2007	2008	2009	2010	2011	2012
NATIONAL BANKSHARES, INC.	100	119	179	206	190	228
NASDAQ COMPOSITE INDEX	100	60	87	103	102	120

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

\$ in thousands, except per share data

The purpose of this discussion and analysis is to provide information about the results of operations, financial condition, liquidity and capital resources of National Bankshares, Inc. and its subsidiaries (the "Company"). The discussion should be read in conjunction with the material presented in Item 8, "Financial Statements and Supplementary Data," of this Form 10-K.

Subsequent events have been considered through the date on which the Form 10-K was issued.

Cautionary Statement Regarding Forward-Looking Statements

We make forward-looking statements in this Form 10-K that are subject to significant risks and uncertainties. These forward-looking statements include statements regarding our profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy, and financial and other goals, and are based upon our management's views and assumptions as of the date of this report. The words "believes," "expects," "may," "will," "should," "projects," "contemplates," "anticipates," "forecasts," "intends," or other similar words or terms are intended to identify forward-looking statements.

These forward-looking statements are based upon or are affected by factors that could cause our actual results to differ materially from historical results or from any results expressed or implied by such forward-looking statements. These factors include, but are not limited to, changes in:

- interest rates,
- general economic conditions,
- the legislative/regulatory climate,
- monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury, the Office of the Comptroller of the Currency, the Federal Reserve Board and the Federal Deposit Insurance Corporation, and the impact of any policies or programs implemented pursuant to the Emergency Economic Stabilization Act of 2008 ("EESA") the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act") and other financial reform legislation,
 - unanticipated increases in the level of unemployment in the Company's trade area,
 - the quality or composition of the loan and/or investment portfolios,
 - demand for loan products,
 - deposit flows,
 - competition,
 - demand for financial services in the Company's trade area,
 - the real estate market in the Company's trade area,
 - the Company's technology initiatives, and
 - applicable accounting principles, policies and guidelines.

These risks and uncertainties should be considered in evaluating the forward-looking statements contained in this report. We caution readers not to place undue reliance on those statements, which speak only as of the date of this report. This discussion and analysis should be read in conjunction with the description of our "Risk Factors" in Item 1A. of this Form 10-K.

The recession continues to impact the national economy as well as the Company's market. Signs of economic recovery are mixed with continued high unemployment and diminished real estate values. The Company's trade area contains a diverse economy that includes large public colleges and universities, which somewhat insulated the Company's market from the dramatic declines in real estate values seen in some other areas of the country. Real estate values in the Company's market area saw moderate declines in 2009 and 2010 that appeared to stabilize in 2011 and 2012. Nonperforming assets fell in 2011 but increased slightly in 2012. If the economic recovery wavers or reverses,

it is likely that unemployment will continue at higher-than-normal levels or rise in the Company's trade area. Because of the importance to the Company's markets of state-funded universities, cutbacks in the funding provided by the State as a result of the recession could also negatively impact employment. This could lead to an even higher rate of delinquent loans and a greater number of real estate foreclosures. Higher unemployment and the fear of layoffs causes reduced consumer demand for goods and services, which negatively impacts the Company's business and professional customers. In conclusion, a slow economic recovery could have an adverse effect on all financial institutions, including the Company.

Critical Accounting Policies

General

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP). The financial information contained within our statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset or relieving a liability. The Company uses historical loss factors as one indicator in determining the inherent loss that may be present in the loan portfolio. Actual losses could differ significantly from one previously acceptable method to another method. Although the economics of the Company's transactions would be the same, the timing of events that would impact the transactions could change.

Allowance for Loan Losses

The allowance for loan losses is an accrual of estimated losses that have been sustained in our loan portfolio. The allowance is reduced by charge-offs of loans and increased by the provision for loan losses and recoveries of previously charged-off loans. The determination of the allowance is based on two accounting principles, Accounting Standards Codification (“ASC”) Topic 450-20 (Contingencies) which requires that losses be accrued when occurrence is probable and the amount of the loss is reasonably estimable, and ASC Topic 310-10 (Receivables) which requires accrual of losses on impaired loans if the recorded investment exceeds fair value.

Probable losses are accrued through two calculations, individual evaluation of impaired loans and collective evaluation of the remainder of the portfolio. Impaired loans are larger non-homogeneous loans for which there is a probability that collection will not occur according to the loan terms, as well as nonaccrual loans and loans whose terms have been modified in a troubled debt restructuring. Impaired loans with an estimated impairment loss are placed on nonaccrual status.

Impaired loans

Impaired loans are identified through the Company’s credit risk rating process. Estimated loss for an impaired loan is the amount of recorded investment that exceeds the loan’s fair value. Fair value of an impaired loan is measured by one of three methods: the fair value of collateral (“collateral method”), the present value of future cash flows (“cash flow method”), or observable market price. The Company applies the collateral method to collateral-dependent loans, loans for which foreclosure is eminent and to loans for which the fair value of collateral is a more reliable estimate of fair value. The cash flow method is applied to loans that are not collateral dependent and for which cash flows may be estimated.

The Company bases collateral-method fair valuation upon the “as-is” value of independent appraisals or evaluations. Updated appraisals or evaluations are ordered when the loan becomes impaired if the appraisal or evaluation on file is more than twelve months old. Appraisals and evaluations are reviewed for propriety and reasonableness and may be discounted if the Company determines that the value exceeds reasonable levels. If an updated appraisal or evaluation has been ordered but has not been received by a reporting date, the fair value may be based on the most recent available appraisal or evaluation, discounted for age.

The appraisal or evaluation value for a collateral-dependent loan for which recovery is expected solely from the sale of collateral is reduced by estimated selling costs. Estimated losses on collateral-dependent loans, as well as any other impairment loss considered uncollectible, are charged against the allowance for loan losses. For loans that are not collateral dependent, the impairment loss is accrued in the allowance. Impaired loans with partial charge-offs are maintained as impaired until the remaining balance is satisfied. Smaller homogeneous impaired loans that are not troubled debt restructurings or part of a larger impaired relationship are collectively evaluated.

Troubled debt restructurings are impaired loans and are measured for impairment under the same valuation methods as other impaired loans. Troubled debt restructurings are maintained in nonaccrual status until the loan has demonstrated reasonable assurance of repayment. Troubled debt restructurings with impairment losses remain in nonaccrual status.

Collectively-evaluated loans

Non-impaired loans and smaller homogeneous impaired loans that are not troubled debt restructurings and not part of a larger impaired relationship are grouped by portfolio segments that are made up of smaller loan classes. Loans within a segment or class have similar risk characteristics. Probable loss is determined by applying historical net charge-off rates as well as additional percentages for trends and current levels of quantitative and qualitative factors. Loss rates are calculated for and applied to individual classes and encompass losses for the current year and the previous year. Qualitative factors represented by delinquency rates, loan quality and concentrations are evaluated on a class level, with allocations based on the evaluation of trends and levels. Economic factors such as unemployment rates, bankruptcy rates and others are evaluated, with standard allocations applied consistently to relevant classes.

The Company accrues additional estimated loss for criticized loans within each class and for loans designated high risk. High risk loans are defined as junior lien mortgages, loans with high loan-to-value ratios and loans with terms that require only interest payments. Both criticized loans and high risk loans are included in the base risk analysis for each class and are allocated additional reserves.

Estimation of the allowance for loan losses

The estimation of the allowance involves analysis of internal and external variables, methodologies, assumptions and our judgment and experience. Key judgments used in determining the allowance for loan losses include internal risk rating determinations, market and collateral values, discount rates, loss rates, and our view of current economic conditions. These judgments are inherently subjective and our actual losses could be greater or less than the estimate. Future estimates of the allowance could increase or decrease based on changes in the financial condition of individual borrowers, concentrations of various types of loans, economic conditions or the markets in which collateral may be sold. The estimate of the allowance accrual determines the amount of provision expense and directly affects our financial results.

The estimate of the allowance for December 31, 2012 considered market and portfolio conditions during 2012 as well as the elevated levels of delinquencies and net charge-offs in 2011. Given the continued economic difficulties, the ultimate amount of loss could vary from that estimate. For additional discussion of the allowance, see the notes to the financial statements, "Asset Quality," and "Provision and Allowance for Loan Losses."

Goodwill and Core Deposit Intangibles

Goodwill is subject to at least an annual assessment for impairment by applying a fair value based test. The Company performs impairment testing in the fourth quarter. Accounting guidance provides the option of performing preliminary assessment of qualitative factors before performing more substantial testing for impairment. The Company opted not to perform the preliminary assessment. The Company's goodwill impairment analysis considered three valuation techniques appropriate to the measurement. The first technique uses the Company's market capitalization as an estimate of fair value; the second technique estimates fair value using current market pricing multiples for companies comparable to NBI; while the third technique uses current market pricing multiples for change-of-control transactions involving companies comparable to NBI. Each measure indicated that the Company's fair value exceeded its book value, validating that goodwill is not impaired.

Certain key judgments were used in the valuation measurement. Goodwill is held by the Company's bank subsidiary. The bank subsidiary is 100% owned by the Company, and no market capitalization is available. Because most of the Company's assets are comprised of the subsidiary bank's equity, the Company's market capitalization was used to estimate the Bank's market capitalization. Other judgments include the assumption that the companies and transactions used as comparables for the second and third technique were appropriate to the estimate of the Company's fair value, and that the comparable multiples are appropriate indicators of fair value, and compliant with accounting guidance.

Acquired intangible assets (such as core deposit intangibles) are recognized separately from goodwill if the benefit of the asset can be sold, transferred, licensed, rented, or exchanged, and amortized over its useful life. The Company amortizes intangible assets arising from branch transactions over their useful life. Core deposit intangibles are subject to a recoverability test based on undiscounted cash flows, and to the impairment recognition and measurement provisions required for other long-lived assets held and used. The impairment testing showed that the expected cash flows of the intangible assets exceeded the carrying value.

Overview

National Bankshares, Inc. is a financial holding company incorporated under the laws of Virginia. Located in southwest Virginia, NBI has two wholly-owned subsidiaries, the National Bank of Blacksburg and National Bankshares Financial Services, Inc. The National Bank of Blacksburg ("NBB"), which does business as National Bank from twenty-five office locations, is a community bank. NBB is the source of nearly all of the Company's revenue. National Bankshares Financial Services, Inc. ("NBFS") does business as National Bankshares Investment Services and National Bankshares Insurance Services. Income from NBFS is not significant at this time, nor is it expected to be so in the near future.

National Bankshares, Inc. common stock is listed on the NASDAQ Capital Market and is traded under the symbol "NKSH." National Bankshares, Inc. has been included in the Russell Investments Russell 3000 and Russell 2000 Indexes since June 29, 2009.

Performance Summary

The following table presents NBI's key performance ratios for the years ending December 31, 2012 and December 31, 2011:

Edgar Filing: NATIONAL BANKSHARES INC - Form 10-K

	12/31/12		12/31/11	
Return on average assets	1.64	%	1.71	%
Return on average equity	12.01	%	12.89	%
Basic net earnings per common share	\$ 2.56		\$ 2.54	
Fully diluted net earnings per common share	\$ 2.55		\$ 2.54	
Net interest margin (1)	4.38	%	4.59	%
Noninterest margin (2)	1.36	%	1.45	%

(1) Net Interest Margin – Year-to-date tax equivalent net interest income divided by year-to-date average earning assets.

(2) Noninterest Margin – Noninterest expense (excluding the provision for bad debts and income taxes) less noninterest income (excluding securities gains and losses) divided by average year-to-date assets.

The return on average assets for the year ended December 31, 2012 was 1.64%, a decrease of 7 basis points from the 1.71% for the year ended December 31, 2011. The return on average equity decreased from 12.89% for the year ended December 31, 2011 to 12.01% for the year ended December 31, 2012.

Reflecting both the effects of the low interest rate environment throughout 2012 on NBI's funding costs and the Company's asset/liability management practices, the net interest margin decreased from 4.59% at year-end 2011 to 4.38% at December 31, 2012.

The noninterest margin decreased from 1.45% to 1.36% over the same period, while basic net earnings per common share increased from \$2.54 for the year ended December 31, 2011 to \$2.56 for the year ended December 31, 2012.

Growth

NBI's key growth indicators are shown in the following table:

	12/31/12	12/31/11
Securities	\$ 352,043	\$ 318,913
Loans, net	583,813	580,402
Deposits	946,766	919,333
Total assets	1,104,361	1,067,102

Securities, loans, and total assets all experienced growth in 2012, primarily funded by increases in customer deposits. Customer deposits grew \$27,433 or 2.98% from December 31, 2011, with increases mainly from municipal deposits and individuals seeking to safeguard principal by avoiding more volatile investments in financial markets. The liquidity provided by customer deposits supported growth in loans of \$3,692 or 0.63% and securities of \$33,130 or 10.39%.

In both 2011 and 2012, the Company's growth was internally generated and was not the result of acquisitions.

Asset Quality

Key indicators of NBI's asset quality are presented in the following table:

	12/31/12	12/31/11
Nonperforming loans(1)	\$ 5,617	\$ 5,204
Loans past due 90 days or more and accruing	170	481
Other real estate owned	1,435	1,489
Allowance for loan losses to loans(2)	1.41 %	1.37 %
Net charge-off ratio	0.49 %	0.43 %

(1) Nonperforming loans include nonaccrual loans plus restructured loans in nonaccrual status. Accruing restructured loans are not included.

(2) Loans are net of unearned income and deferred fees.

The Company monitors asset quality indicators in managing credit risk and in determining the allowance and provision for loan losses. In 2012, the Company's asset quality remained at similar levels to those in 2011. Nonperforming loans were \$5,617 or 0.95% of loans net of unearned income and deferred fees. This compares to \$5,204 and 0.88% at December 31, 2011. Loans past due 90 days or more and still accruing at year-end 2012 totaled \$170, a decrease of \$311 or 64.66%, from \$481 at December 31, 2011. The net charge-off ratio increased slightly, from 0.43% for the year ended December 31, 2011 to 0.49% for the year ended December 31, 2012, while other real estate owned declined \$54 or 3.63% for the same period.

The Company's risk analysis determined an allowance for loan losses of \$8,349 at December 31, 2012, resulting in a provision for the year of \$3,134, an increase of \$185 or 6.27% from the \$2,949 for 2011. The ratio of the allowance for loan losses to loans increased to 1.41%, from 1.37% at December 31, 2011. The methodology for determining the allowance for loan losses relies on historical charge off-trends, modified by trends in nonperforming loans and economic indicators. More information about the level and calculation methodology of the allowance for loan losses is provided in "Balance Sheet – Loans – Risk Elements," "Balance Sheet – Loans – Troubled Debt Restructurings," as well as Notes 1 and 5 to the financial statements.

Sufficient resources have been dedicated to working out problem assets, and exposure to loss is somewhat mitigated because most of the nonperforming loans are collateralized. More information about nonaccrual and past due loans is provided in "Balance Sheet – Loans – Risk Elements." The Company continues to monitor risk levels within the loan portfolio and expects that any further increase in the allowance for loan losses would be the result of the refinement of loss estimates and would not dramatically affect net income.

Net Interest Income

Net interest income for the period ended December 31, 2012 was \$40,783, an increase of \$21, or 0.05%, when compared to the prior year. The net interest margin for 2012 was 4.38%, compared to 4.59% for 2011. Total interest income for the period ended December 31, 2012 was \$48,670, a decrease of \$1,276 from the period ended December 31, 2011. Interest expense was down by \$1,297 during the same time frame, from \$9,184 for the year ended December 31, 2011 to \$7,887 for the year ended December 31, 2012. The decline in interest expense came about in part because higher priced certificates of deposit renewed at lower interest rates. In addition, noninterest-bearing deposits and low-rate interest-bearing deposits volume increased substantially. Please refer to the section titled "Analysis of Changes In Interest Income and Interest Expense" for further information related to rate and volume changes. In summary, the rates paid on the Company's deposit liabilities declined at a more rapid pace than the interest rates on its interest-earning assets.

The amount of net interest income earned is affected by various factors, including changes in market interest rates due to the Federal Reserve Board's monetary policy, the level and composition of the earning assets, and the composition of interest-bearing liabilities. The Company has the ability to respond over time to interest rate movements and reduce volatility in the net interest margin. However, the frequency and/or magnitude of changes in market interest rates are difficult to predict and may have a greater impact on net interest income than adjustments by management.

During 2012, interest rates continued at historic lows. Offsetting the positive effect of low interest rates is the fact that some higher yielding securities in the Company's investment portfolio were called and were replaced with securities with yields at the lower market rate. Another negative effect of the low interest rate environment is the level of interest earned on overnight funds. This impacted the yield on the Company's interest-bearing deposits in other banks. The yield on these assets in 2012 was 0.25%, while the cost to fund them was 0.77% in the same period. These assets are used primarily to provide liquidity.

The primary source of funds used to support the Company's interest-earning assets is deposits. Deposits are obtained in the Company's trade area through traditional marketing techniques. Other funding sources, such as the Federal Home Loan Bank, while available, are only used occasionally. The cost of funds is dependent on interest rate levels and competitive factors. This limits the ability of the Company to react to interest rate movements.

The factors that may influence the Company's net interest margin include current Federal Reserve policies that depress long-term interest rates, and market forces that may encourage repricing of interest-bearing liabilities more quickly than interest-earning assets if rates were to increase. Because interest rates are at historic lows, interest rates will likely increase in the future. Management cannot predict the timing and level of interest rate increases.

Analysis of Net Interest Earnings

The following table shows the major categories of interest-earning assets and interest-bearing liabilities, the interest earned or paid, the average yield or rate on the daily average balance outstanding, net interest income and net yield on average interest-earning assets for the years indicated.

	December 31, 2012			December 31, 2011			December 31, 2010		
	Average Balance	Interest	Average Yield/Rate	Average Balance	Interest	Average Yield/Rate	Average Balance	Interest	Average Yield/Rate
Interest-earning assets:									
Loans, net (1)(2)(3)	\$ 589,935	\$ 35,744	6.06 %	\$ 589,257	\$ 36,813	6.25 %	\$ 585,933	\$ 37,282	6.36 %
Taxable securities(4)	167,874	6,613	3.94 %	155,765	6,745	4.33 %	123,920	5,588	4.51 %
Nontaxable securities (1)(4)	167,355	10,002	5.98 %	163,174	10,102	6.19 %	161,571	10,074	6.24 %
Interest-bearing deposits	94,724	240	0.25 %	64,977	155	0.24 %	55,477	128	0.23 %
Total interest-earning assets	\$ 1,019,888	\$ 52,599	5.16 %	\$ 973,173	\$ 53,815	5.53 %	\$ 926,901	\$ 53,072	5.73 %
Interest-bearing liabilities:									
Interest-bearing demand deposits	\$ 420,947	\$ 4,167	0.99 %	\$ 378,971	\$ 4,088	1.08 %	\$ 322,705	\$ 3,332	1.03 %
Savings deposits	64,973	36	0.06 %	58,273	45	0.08 %	54,543	51	0.09 %
Time deposits	298,797	3,684	1.23 %	314,920	5,051	1.60 %	352,887	7,775	2.20 %
Total interest-bearing liabilities	\$ 784,717	\$ 7,887	1.01 %	\$ 752,164	\$ 9,184	1.22 %	\$ 730,135	\$ 11,158	1.53 %
Net interest income and interest rate spread		\$ 44,712	4.15 %		\$ 44,631	4.31 %		\$ 41,914	4.20 %
Net yield on average interest-earning assets			4.38 %			4.59 %			4.52 %

(1) Interest on nontaxable loans and securities is computed on a fully taxable equivalent basis using a Federal income tax rate of 35% in the three years presented.

(2) Loan fees of \$802 in 2012, \$729 in 2011 and \$863 in 2010 are included in total interest income.

(3) Nonaccrual loans are included in average balances for yield computations.

(4) Daily averages are shown at amortized cost.

Analysis of Changes in Interest Income and Interest Expense

The Company's primary source of revenue is net interest income, which is the difference between the interest and fees earned on loans and investments and the interest paid on deposits and other funds. The Company's net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities and by changes in yields earned on interest-earning assets and rates paid on interest-bearing liabilities. The following table sets forth, for the years indicated, a summary of the changes in interest income and interest expense resulting from changes in average asset and liability balances (volume) and changes in average interest rates (rate).

	2012 Over 2011			2011 Over 2010		
	Changes Due To		Net Dollar Change	Changes Due To		Net Dollar Change
	Rates(2)	Volume(2)		Rates(2)	Volume(2)	
Interest income: (1)						
Loans	\$ (1,111)	\$ 42	\$ (1,069)	\$ (680)	\$ 211	\$ (469)
Taxable securities	(634)	502	(132)	(229)	1,386	1,157
Nontaxable securities	(355)	255	(100)	(71)	99	28
Interest-bearing deposits	10	75	85	4	23	27
Increase (decrease) in income on interest-earning assets	\$ (2,090)	\$ 874	\$ (1,216)	\$ (976)	\$ 1,719	\$ 743
Interest expense:						
Interest-bearing demand deposits	\$ (352)	\$ 431	\$ 79	\$ 154	\$ 602	\$ 756
Savings deposits	(14)	5	(9)	(9)	3	(6)
Time deposits	(1,119)	(248)	(1,367)	(1,952)	(772)	(2,724)
Increase (decrease) in expense of interest-bearing liabilities	\$ (1,485)	\$ 188	\$ (1,297)	\$ (1,807)	\$ (167)	\$ (1,974)
Increase (decrease) in net interest income	\$ (605)	\$ 686	\$ 81	\$ 831	\$ 1,886	\$ 2,717

(1) Taxable equivalent basis using a Federal income tax rate of 35% in 2012, 2011 and 2010.

(2) Variances caused by the change in rate times the change in volume have been allocated to rate and volume changes proportional to the relationship of the absolute dollar amounts of the change in each.

Total interest expense declined by \$1,297, while interest income on a taxable-equivalent basis decreased \$1,216, resulting in an increase of \$81 in taxable-equivalent net interest income when 2012 and 2011 are compared. Of this increase, \$686 was attributable to volume offset by a decline due to rates of \$605.

The lower interest rate environment led to a decline of \$1,069 in interest income from loans. The average balance of loans increased from \$589,257 in 2011 to \$589,935 in 2012, causing an increase in interest income of \$42, on a taxable-equivalent basis.

Interest income on taxable securities decreased \$634 due to rates, offset by an increase of \$502 due to average volume, for a net decrease of \$132 compared to 2011. The low interest rate environment increased the number of called securities in 2012 and reduced the opportunity to reinvest the proceeds in securities with more attractive yields. Because of low yields in the securities markets and flat loan demand, the Company priced deposits

accordingly.

Interest on time deposits declined \$1,367 from 2011 to 2012, with a decline of \$1,119 due to rates and \$248 attributable to volume. See "Net Interest Income" for additional information related to the decline in interest expense.

The low interest rate environment was also present in 2010. As compared with 2010, there was a \$2,724 decline in interest expense associated with time deposits in 2011. Of the total decline, \$1,952 was due to rates, and \$772 stemmed from lower deposit volume. Management focused on deposit pricing in 2010 and took advantage of falling rates to lower interest expense.

From 2010 to 2011 interest on loans decreased by \$469. Loan interest income attributable to rates was \$680 lower, offset partially by an increase of \$211 due to volume. As compared with 2010, there was an increase of \$2,717 in net interest income in 2011, \$831 of the increase was due to rates and \$1,886 due to volume.

Interest Rate Sensitivity

The Company considers interest rate risk to be a significant market risk and has systems in place to measure the exposure of net interest income and fair market values to movement in interest rates. Among the tools available to management is interest rate sensitivity analysis, which provides information related to repricing opportunities. Interest rate shock simulations indicate potential economic loss due to future interest rate changes. Shock analysis is a test that measures the effect of a hypothetical, immediate and parallel shift in interest rates. The following table shows the results of a rate shock and the effects on the return on average assets and the return on average equity projected at December 31, 2012 and 2011. For purposes of this analysis, noninterest income and expenses are assumed to be flat.

Rate Shift (bp)	Return on Average Assets		Return on Average Equity	
	2012	2011	2012	2011
300	1.13%	0.96%	8.02%	6.96%
200	1.35%	1.13%	9.53%	8.19%
100	1.56%	1.30%	10.92%	9.32%
(-)100	1.95%	1.62%	13.51%	11.51%
(-)200	1.82%	1.58%	12.61%	11.23%
(-)300	1.55%	1.46%	10.85%	10.39%

Simulation analysis is another tool available to the Company to test asset and liability management strategies under rising and falling rate conditions. As a part of the simulation process, certain estimates and assumptions must be made. These include, but are not limited to, asset growth, the mix of assets and liabilities, rate environment and local and national economic conditions. Asset growth and the mix of assets can, to a degree, be influenced by management. Other areas, such as the rate environment and economic factors, cannot be controlled. In addition, competitive pressures can make it difficult to price deposits and loans in a manner that optimally minimizes interest rate risk. Therefore, actual results may vary materially from any particular forecast or shock analysis. This shortcoming is offset somewhat by the periodic reforecasting of the balance sheet to reflect current trends and economic conditions. Shock analysis must also be updated periodically as a part of the asset and liability management process.

Noninterest Income

	Year Ended		
	December 31, 2012	December 31, 2011	December 31, 2010
Service charges on deposits	\$ 2,594	\$ 2,617	\$ 2,858
Other service charges and fees	243	287	317
Credit card fees	3,278	3,197	2,954
Trust fees	1,313	1,087	1,118
Bank-owned life insurance income	814	762	760
Other income	472	449	354
Realized securities gains (losses)	25	11	(14)
Total noninterest income	\$ 8,739	\$ 8,410	\$ 8,347

Service charges on deposit accounts totaled \$2,594 for the year ended December 31, 2012. This is a decline of \$23, or 0.88%, from \$2,617 for the year ended December 31, 2011. Service charges on deposit accounts decreased \$241, or 8.43%, from 2010 to 2011. This income category is affected by the number of deposit accounts, the level of service charges and the number of checking account overdrafts. The 2012 decline resulted primarily from a decrease of \$53 in ATM transaction fees offset by a \$36 increase in overdraft fees. The Company removed two automatic teller machines in 2012 to obtain cost savings that is expected to exceed the associated decline in ATM fee income. The 2011 decline resulted from a decrease in fees from checking account overdrafts and fees for checks returned for insufficient funds. Other service charges and fees included charges for official checks, income from the sale of checks to customers, safe deposit box rent, fees from letters of credit and income from commissions on the sale of credit life, accident and health insurance. These fees were \$243 for the year ended December 31, 2012, down by \$44, or 15.33%, from the \$287 for 2011. The total for the year ended December 31, 2011 was \$30 below the \$317 posted for the year ended December 31, 2010. The decline in 2012 and 2011 was primarily attributable to lower check sales, decreasing income by \$35 in 2012 and \$46 in 2011. This in turn, was attributed to increased customer adoption of debit cards and internet banking bill-pay.

Credit card fees for the year ended December 31, 2012, were \$81 above the \$3,197 reported for the year ended December 31, 2011. From 2010 to 2011, credit card fees increased \$243, or 8.23%. The increases in 2012 and 2011 are due to increased volume of merchant transaction fees and credit card fees.

Trust fees at \$1,313 increased by \$226 or 20.79% when the years ended December 31, 2012 and 2011 are compared, due to a large estate account that affected 2012. For the year ended December 31, 2011 trust fees were \$1,087, a decrease of \$31, or 2.77%, from 2010. Trust fees are generated from a number of different types of accounts, including estates, personal trusts, employee benefit trusts, investment management accounts, attorney-in-fact accounts and guardianships. Trust income varies depending on the number and type of accounts under management and financial market conditions. The mix of account types also affected the level of Trust fees in 2011 and 2012.

Noninterest income from bank-owned life insurance (BOLI) increased, from \$762 for the year ended December 31, 2011 to \$814 for 2012. BOLI income for the year ended December 31, 2010 was \$760. The Company made an additional investment of \$1,900 in 2011. The growth in income in 2011 and 2012 was also affected by the performance of the variable rate policies.

Other income is income from smaller balance accounts that cannot be classified in another category. Some examples include net gains from the sales of fixed assets, rent from foreclosed properties and revenue from investment and insurance sales. Other income for 2012 was \$472, an increase of \$23, or 5.12%, when compared with \$449 for the year ended December 31, 2011. Other income for 2011 increased by \$95, or 26.84%, when compared with 2010. The increase from 2010 to 2011 was primarily due to refunds of prior years' franchise taxes from additional deductions discovered in 2011.

Realized securities net gains and losses for the three years presented were associated with called securities. There were no securities sold in 2012, 2011 or 2010.

Noninterest Expense

	Year Ended		
	December 31,	December 31,	December 31,
	2012	2011	2010
Salaries and employee benefits	\$ 12,005	\$ 11,357	\$ 10,963
Occupancy, furniture and fixtures	1,589	1,599	1,875
Data processing and ATM	1,593	1,701	1,499
FDIC assessment	475	677	1,080
Credit card processing	2,442	2,485	2,300
Intangibles amortization	1,083	1,083	1,083
Net costs of other real estate owned	208	518	214
Franchise taxes	901	780	963
Other operating expenses	3,100	3,138	3,150
Total noninterest expense	\$ 23,396	\$ 23,338	\$ 23,127

Salary and benefits expense increased \$648, or 5.71%, from \$11,357 for the year ended December 31, 2011 to \$12,005 for 2012. The increase is primarily the result of \$325 increase in health benefits. The remaining increase in 2012 was the result of normal compensation and staffing decisions. The increase of \$394, or 3.59% from 2010 to 2011 was also the result of normal compensation and staffing decisions.

Occupancy, furniture and fixtures expense was \$1,589 for the year ended December 31, 2012, a decrease of \$10, or 0.63%, from the prior year. The 2011 total was \$1,599, a decrease of \$276, or 14.72%, from the \$1,875 reported at year-end 2010. The declines in 2012 and 2011 are reflective of the Company's emphasis on containing controllable expenses.

Data processing and ATM expense was \$1,593 in 2012, \$1,701 in 2011 and \$1,499 in 2010. The decrease of \$108 or 6.35% from 2011 to 2012 resulted primarily from declines in maintenance expenses and communications infrastructure expenses. The increase from 2010 to 2011 of \$202 was associated with infrastructure upgrades.

When the years ended December 31, 2012 and December 31, 2011 are compared, there was a decrease in the Federal Deposit Insurance Corporation Deposit Insurance Fund assessment of \$202. The total expense for 2011 was \$677, which compares with \$475 for 2012. The FDIC assessment is accrued based on a method provided by the FDIC. During 2011, the method changed from a deposit based to an asset based method. This resulted in a reduced amount of expense for the Company in 2011 and 2012. The FDIC assessment expense for the year ended December 31, 2011 fell \$403 from \$1,080 for 2010. Given the severe impact of the economic downturn on some of the nation's banks, the Company has no assurance that the FDIC will not increase assessments on insured banks to maintain the integrity of the Deposit Insurance Fund.

Credit card processing expense was \$2,442 for the period ended December 31, 2012, a decrease of \$43, or 1.73% from 2011's total of \$2,485. Credit card processing expense in 2011 increased \$185, or 8.04% from 2010. This expense is driven by the volume of credit card, debit card and merchant account transactions and by the level of merchant discount fees. It is subject to a degree of variability.

The expense for intangibles and goodwill amortization is related to acquisitions. There were no acquisitions in the last year, and the expense for 2012 remained flat from 2011 and 2010 at \$1,083.

Net costs of other real estate owned decreased from \$518 for the period ended December 31, 2011 to \$208 for the year ended December 31, 2012. From 2010 to 2011, net costs of other real estate owned increased \$304 from \$214. This expense category varies with the number of foreclosed properties owned by NBB and with the expense associated with each. It includes write-downs on other real estate owned plus other costs associated with carrying these properties, as well as net gains or losses on the sale of other real estate. In 2012, write-downs on other real estate were \$76. This compares with \$327 in 2011. The Company accounts for other real estate at fair value, using current appraisals. Updated appraisals reflected declines in the value of some properties. Other costs for these properties in 2012 were \$222, while they were \$184 in 2011. There was a total of \$90 in net gains on the sale of other real estate for 2012 and \$7 in net losses for 2011. Because the Company's market area continues to experience the effects of the prolonged recession, it is anticipated that there will be additional foreclosures in the near future. This may result in an associated increase in the costs of other real estate owned.

Franchise taxes were \$901 for the period ended December 31, 2012 and \$780 for 2011, an increase of \$121 or 15.51%. Franchise tax expense decreased \$183 in 2011 from \$963 in 2010. Franchise tax expense in 2011 benefitted from additional deductions discovered in 2011 and applied to prior year's returns. State bank franchise taxes are based upon total equity, which increased in both 2011 and 2012.

The category of other operating expenses includes noninterest expense items such as professional services, stationery and supplies, telephone costs and charitable donations. For the year ended December 31, 2012, other operating expenses were \$3,100. This compares with \$3,138 for 2011 and \$3,150 for 2010. The nominal \$37 decrease from 2011 to 2012 is the result of changes in several categories of expense, with no one item making a significant contribution to the total.

Income Taxes

Income tax expense for 2012 was \$5,245 compared to \$5,247 in 2011 and \$4,223 in 2010. Tax exempt income is the primary difference between expected and actual income tax expense. The Company's effective tax rates for 2012, 2011 and 2010 were 22.81%, 22.93% and 21.34%, respectively. The Company is subject to the 35% marginal tax rate. See Note 10 of the Notes to Consolidated Financial Statements for addition information relating to income taxes.

Effects of Inflation

The Company's consolidated statements of income generally reflect the effects of inflation. Since interest rates, loan demand and deposit levels are related to inflation, the resulting changes are included in net income. The most significant item which does not reflect the effects of inflation is depreciation expense. Historical dollar values used to determine depreciation expense do not reflect the effects of inflation on the market value of depreciable assets after their acquisition.

Provision and Allowance for Loan Losses

In 2012, the Company saw improvements in some asset quality indicators, including the balance of impaired loans, classified loans, loans 90 days past due and still accruing, and other real estate owned, but slight weakening in other indicators, such as net charge-offs, assets rated "special mention" and nonaccrual loans. While, historically, national economic downturns have affected the Company's market area less severely than other areas of the country, downturns and recoveries typically have a delayed effect on the Company's local economy.

At December 31, 2012, total nonperforming assets were \$7,052 compared to \$6,693 at December 31, 2011. See "Balance Sheet – Loans – Risk Elements" for additional detail about nonperforming assets. Net charge-offs increased by \$308, with the ratio of net charge-offs to average loans increasing 6 basis points, from 0.43% in 2011 to 0.49% in 2012.

The Company's internal credit risk analysis takes into consideration trends in nonperforming loans and charge-offs. Based on the analysis, the Company increased the allowance for loan losses to \$8,349, or 1.41% of loans at December 31, 2012. At December 31, 2011, the allowance for loan losses was \$8,068, or 1.37% of loans. The provision for loan losses for 2012 was \$3,134, an increase of \$185 from 2011.

The current level of nonperforming assets is manageable in management's opinion. Core earnings remain strong, and there are sufficient resources available to deal with these assets.

As previously mentioned, the level of nonperforming assets is primarily influenced by local economic conditions. A high degree of uncertainty remains concerning the speed of recovery, and in particular the speed of the recovery in the Company's relatively limited market area. For that reason, management is unable to predict with any degree of certainty whether and how much its asset quality may improve or deteriorate. Based on current information, management believes the level of nonperforming assets will continue to compare well with peers, but may be high when considering its own historic level of nonperforming assets. Please see "Critical Accounting Policies" above for

additional information.

Quarterly Results of Operations

The following is a summary of the unaudited quarterly results of operations for the years ended December 31, 2012, 2011 and 2010:

	2012			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Income Statement Data:				
Interest income	\$ 12,114	\$ 12,182	\$ 12,237	\$ 12,137
Interest expense	2,117	2,018	1,936	1,816
Net interest income	9,997	10,164	10,301	10,321
Provision for loan losses	672	1,104	778	580
Noninterest income	2,152	2,283	2,108	2,196
Noninterest expense	5,711	5,731	6,088	5,866
Income taxes	1,337	1,272	1,250	1,386

Book value per share	18.25	18.44	19.13	18.63

Balance Sheet

On December 31, 2012, the Company had total assets of \$1,104,361, an increase of \$37,259, or 3.49%, over the total of \$1,067,102 on December 31, 2011. For 2012, the growth in assets was entirely internally generated and was not the result of acquisitions. Total assets at December 31, 2011 were up by \$44,864, or 4.38%, over the total at December 31, 2010.

Loans

The Company's loan categorization reflects its approach to loan portfolio management and includes six groups. Real estate construction loans include construction loans for residential and commercial properties, as well as land. Consumer real estate loans include conventional and junior lien mortgages as well as equity lines. Commercial real estate loans are comprised of owner-occupied and leased nonfarm, nonresidential properties, multi-family residence loans and farmland. Commercial non real estate loans include farm loans, operating capital lines and loans secured by capital assets. Public sector and IDA loans are extended to municipalities. Consumer non real estate loans include automobile loans, personal loans, credit cards and consumer overdrafts.

A. Types of Loans

	December 31,				
	2012	2011	2010	2009	2008
Real estate construction	\$ 50,313	\$ 48,531	\$ 46,169	\$ 44,744	\$ 60,798
Consumer real estate	143,262	150,224	153,405	154,380	152,482
Commercial real estate	304,308	303,192	293,171	293,229	277,511
Commercial non real estate	37,349	38,832	37,547	41,402	36,978
Public sector and IDA	26,169	15,571	12,553	19,207	11,518
Consumer non real estate	31,714	33,072	34,543	38,047	37,393
Total loans	\$ 593,115	\$ 589,422	\$ 577,388	\$ 591,009	\$ 576,680
Less unearned income and deferred fees	(953)	(952)	(945)	(1,062)	(1,123)

Edgar Filing: NATIONAL BANKSHARES INC - Form 10-K

Total loans, net of unearned income	\$ 592,162	\$ 588,470	\$ 576,443	\$ 589,947	\$ 575,557
Less allowance for loans losses	(8,349)	(8,068)	(7,664)	(6,926)	(5,858)
Total loans, net	\$ 583,813	\$ 580,402	\$ 568,779	\$ 583,021	\$ 569,699

B. Maturities and Interest Rate Sensitivities

The following table presents maturities and interest rate sensitivities for commercial non real estate, commercial real estate and real estate construction loans.

	December 31, 2012			
	< 1 Year	1 – 5 Years	After 5 Years	Total
Commercial non real estate	\$ 19,872	\$ 14,296	\$ 3,181	\$ 37,349
Commercial real estate	41,481	250,765	12,062	304,308
Real estate construction	48,106	2,207	---	50,313
Total	109,459	267,268	15,243	391,970
Less loans with predetermined interest rates	(24,915)	(23,734)	(6,694)	(55,343)
Loans with adjustable rates	\$ 84,544	\$ 243,534	\$ 8,549	\$ 336,627

C. Risk Elements

The following table presents aggregate amounts for nonaccrual loans, restructured loans in nonaccrual, other real estate owned net, and accruing loans which are contractually past due ninety days or more as to interest or principal payments, and accruing restructured loans.

	December 31,				
	2012	2011	2010	2009	2008
Nonaccrual loans:					
Real estate construction	\$ 89	\$ ---	\$ ---	\$ 2,643	\$ ---

	\$ 2,005	\$ 3,756	\$ 350	\$ 2,652	\$ ---

Loan loss and other indicators related to asset quality are presented in the Loan Loss Data table.

Loan Loss Data Table

	2012		2011		2010	
Provision for loan losses	\$	3,134	\$	2,949	\$	3,409
Net charge-offs to average net loans		0.49	%	0.43	%	0.46
Allowance for loan losses to loans, net of unearned income and deferred fees		1.41	%	1.37	%	1.33
Allowance for loan losses to nonperforming loans		148.64	%	155.03	%	94.96
Allowance for loan losses to nonperforming assets		118.39	%	120.54	%	78.25
Nonperforming assets to loans, net of unearned income and deferred fees, plus other real estate owned		1.19	%	1.13	%	1.69
Nonaccrual loans	\$	3,466	\$	1,398	\$	1,938
Restructured loans in nonaccrual status		2,151		3,806		6,133
Other real estate owned, net		1,435		1,489		1,723
Total nonperforming assets	\$	7,052	\$	6,693	\$	9,794
Accruing loans past due 90 days or more	\$	170	\$	481	\$	1,336

Nonperforming loans include nonaccrual loans and restructured loans (“troubled debt restructurings” or “TDR loans”) in nonaccrual status, but do not include accruing loans 90 days or more past due or accruing restructured loans. Troubled debt restructurings are discussed in detail under the section titled “D. Troubled Debt Restructurings (TDR Loans)” below. Impaired loans, or loans for which management does not expect to collect at the original loan terms, but which may or may not be nonperforming, are presented in Note 5 of Notes to Consolidated Financial Statements. Total impaired loans at December 31, 2012 were \$11,053, of which \$4,417 were in nonaccrual status. Impaired loans at December 31, 2011 and 2010 were \$12,596 and \$8,791, of which \$5,089 and \$7,612 were in nonaccrual status, respectively.

The ratio of the allowance for loan losses to total nonperforming loans decreased from 155.03% in 2011 to 148.64% in 2012. The 5.36% increase in nonperforming assets resulted in the decline in the coverage of the allowance for loan losses to nonperforming assets. The Company believes the allowance for loan losses is adequate for the credit risk inherent in the loan portfolio.

D. Troubled Debt Restructurings (TDR Loans)

In the ordinary course of business the Company modifies loan terms on a case-by-case basis, including both consumer and commercial loans, for a variety of reasons. Modifications to consumer loans generally involve short-term deferrals to accommodate specific, temporary circumstances. The Company may grant extensions to borrowers who have demonstrated a willingness and ability to repay their loan but who are dealing with the consequences of a specific unforeseen temporary hardship.

An extension defers monthly payments and requires a balloon payment at the original contractual maturity. Where the temporary event is not expected to impact a borrower’s ability to repay the debt, and where the Company expects to collect all amounts due including interest accrued at the contractual interest rate for the period of delay at contractual maturity, the modification is not designated a TDR.

Modifications to commercial loans may include, but are not limited to, changes in interest rate, maturity, amortization and financial covenants. In the original underwriting, loan terms are established that represent the then-current and projected financial condition of the borrower. If the modified terms are consistent with competitive market conditions and representative of terms the borrower could otherwise obtain in the open market, the modified loan is not categorized as a TDR.

For a loan modification to be a TDR, the following three conditions must all be present: (1) the borrower is experiencing financial difficulty, (2) the Company makes a concession to the original contractual loan terms, and (3) the concessions are for economic or legal reasons related to the borrower's financial difficulty that the Company would not otherwise consider.

Modifications of loan terms to borrowers experiencing financial difficulty are made in an attempt to protect as much of the Company's investment in the loan as possible. The determination of whether a modification should be accounted for as a TDR requires significant judgment after consideration of all facts and circumstances surrounding the transaction.

Assuming all other TDR criteria are met, the Corporation considers one or a combination of the following concessions to the loan terms to indicate TDR status: a reduction of the stated interest rate, an extension of the maturity date at an interest rate lower than the current market rate for a new loan with a similar term, or forgiveness of principal or accrued interest.

The Company recognizes that the current economy, elevated levels of unemployment and depressed real estate values have resulted in many customers experiencing financial difficulties. The Company has restructured loan terms for certain qualified financially distressed borrowers who have agreed to work in good faith and have demonstrated the ability to make the restructured payments in order to avoid a foreclosure.

The Company had \$4,156 in TDRs as of December 31, 2012 and \$7,562 as of December 31, 2011. Accruing TDR loans amounted to \$2,005 at December 31, 2012 compared to \$3,756 at December 31, 2011. All TDR loans are individually evaluated for impairment for purposes of determining the allowance for loan losses. TDR loans with an impairment loss are maintained on nonaccrual until the borrower demonstrates sustained repayment history under the restructured terms and continued repayment is not in doubt. Otherwise, interest income is recognized using a cost recovery method.

Restructuring generally results in loans with either lower payments or an extended maturity beyond that originally required, and are expected to have a lower risk of loss due to nonperformance than loans classified as nonperforming. In 2012, the Company modified \$1,736 in troubled debt restructurings. Of these, \$1,426 subsequently defaulted. The Company defines default as a delay in one payment of more than 90 days. In 2011, the Company modified \$2,999 in troubled debt restructurings, of which \$2,852 defaulted in 2011. In 2010, the Company modified \$3,787 in troubled debt restructurings, of which \$1,776 defaulted in 2010. Please refer to Note 5 for information on the effect of default on the allowance for loan losses.

TDR Delinquency Status as of December 31, 2012

	Total TDR Loans	Current	Accruing 30-89 Days Past Due	90+ Days Past Due	Nonaccrual

The Company expects that troubled debt restructurings will continue until the economy recovers, bringing improvement in the unemployment rate and the depressed real estate market.

Summary of Loan Loss Experience

A. Analysis of the Allowance for Loan Losses

The following tabulation shows average loan balances at the end of each period; changes in the allowance for loan losses arising from loans charged off and recoveries on loans previously charged off by loan category; and additions to the allowance which have been charged to operating expense:

	December 31,										
	2012		2011		2010		2009		2008		
Average net loans outstanding	\$	588,170	\$	588,439	\$	586,133	\$	579,581	\$	538,868	
Balance at beginning of year		8,068		7,664		6,926		5,858		5,219	
Charge-offs:											
Real estate construction		640		444		---		---		---	
Consumer real estate		370		584		475		181		35	
Commercial real estate		1,589		320		1,050		---		82	
Commercial non real estate		109		990		919		83		64

Additions charged to operations		3,134		2,949		3,409		1,634		1,119	
Balance at end of year	\$	8,349	\$	8,068	\$	7,664	\$	6,926	\$	5,858	
Net charge-offs to average net loans outstanding		0.49	%	0.43	%	0.46	%	0.10	%	0.09	%

The Company charges off commercial real estate loans at the time that a loss is confirmed. When delinquency status or other information indicates that the borrower will not repay the loan, the Company considers collateral value based upon a current appraisal. Any loan amount in excess of collateral value is charged off and the collateral is taken into other real estate owned.

Factors influencing management's judgment in determining the amount of the loan loss provision charged to operating expense include: the quality of the loan portfolio as determined by management, the historical loan loss experience, diversification as to type of loans in the portfolio, the amount of secured as compared with unsecured loans and the value of underlying collateral, banking industry standards and averages, and economic conditions.

Edgar Filing: NATIONAL BANKSHARES INC - Form 10-K

B. Allocation of the Allowance for Loan Losses

The allowance for loan losses has been allocated according to the amount deemed necessary to provide for anticipated losses within the categories of loans for the years indicated as follows:

	2012		2011		December 31, 2010		2009		2008	
	Percent of Loans in Each Category to Allowance Amount	Total Loans	Percent of Loans in Each Category to Allowance Amount	Total Loans	Percent of Loans in Each Category to Allowance Amount	Total Loans	Percent of Loans in Each Category to Allowance Amount	Total Loans	Percent of Loans in Each Category to Allowance Amount	Total Loans
Real estate construction	\$ 1,175	8.48%	\$1,079	8.23%	\$1,087	8.00%	\$1,917	7.57%	\$ 468	10.54%
Consumer real estate	2,263	24.15%	1,245	25.49%	1,052	26.57%	330	26.12%	874	26.44%
Commercial real estate	3,315	51.31%	3,515	51.44%	3,461	50.78%	2,654	49.61%	2,566	48.12%
Commercial non real estate	956	6.30%	1,473	6.59%	1,089	6.50%	1,148	7.01%	1,035	6.41%
Public sector and IDA	142	4.41%	232	2.64%	259	2.17%	84	3.25%	93	2.00%
Consumer non real estate	417	5.35%	403	5.61%	587	5.98%	507	6.44%	700	6.49%
Unallocated	81		121		129		286		122	
	\$ 8,349	100.00%	\$8,068	100.00%	\$7,664	100.00%	\$6,926	100.00%	\$5,858	100.00%

An analysis of the allowance for loan losses by impairment basis follows:

	2012		December 31, 2011		2010	
	Amount	%	Amount	%	Amount	%
Impaired loans	\$ 11,053		\$ 12,596		\$ 8,791	
Allowance related to impaired loans	269		1,123		1,200	
Allowance to impaired loans	2.43	%	8.92	%	13.65	%
Non-impaired loans	582,062		575,874		567,652	
Allowance related to non-impaired loans	8,080		6,945		6,464	
Allowance to non-impaired loans	1.39	%	1.21	%	1.14	%
Total loans, net of unearned income and deferred fees	592,162		588,470		576,443	
Total allowance for loan losses	8,349		8,068		7,664	
Total allowance for total loans	1.41	%	1.37	%	1.33	%

The allowance percentage for impaired loans was 2.43%, 8.92% and 13.65% as of December 31, 2012, 2011 and 2010 respectively. The ratio is subject to fluctuation because impaired loans are individually evaluated. The amount of the

individual impaired loan balances that exceeds the fair value is accrued in the allowance for loan losses.

The allowance percentage for non-impaired loans was 1.39%, 1.21% 1.14% as of December 31, 2012, 2011 and 2010 respectively. The allowance for non-impaired loans is determined by applying historical charge-off percentages, as well as additional accruals for internal and external credit risk factors to groups of non-impaired loans. The ratio increased from prior years because of increased historical charge-off percentages applied by the 2012 calculation and higher risk indications from other factors. The increase in the ratio for non-impaired loans directed the increase in the ratio of total allowance to total loans.

Securities

The fair value of securities available for sale was \$191,504, an increase of \$16,586 or 9.48% from December 31, 2011. The amortized cost of securities held to maturity was \$160,539 at December 31, 2012 and \$143,995 at December 31, 2011, an increase of \$16,544 or 11.49%. Both categories of securities increased in 2012, as liquidity from deposit growth outpaced loan opportunities.

Additional information about securities available for sale and securities held to maturity can be found in Note 3 of the Notes to Consolidated Financial Statements.

The financial markets have experienced increased volatility and increased risk during the economic downturn and slow recovery. The risk in financial markets affects the Company in the same way that it affects other institutional and individual investors. The Company's investment portfolio includes corporate bonds. If, because of economic hardship, the corporate issuers were to default, there could be a delay in the payment of interest, or there could be a loss of principal and accrued interest. To date, there have been no defaults in any of the corporate bonds held in the portfolio. The Company's investment portfolio also contains a large percentage of municipal bonds. The recession and a slow recovery may negatively impact the ability of states and municipalities to make scheduled principal and interest payments on their outstanding indebtedness. If their income from taxes and other sources declines significantly because of the recession, states and municipalities could default on their bond obligations. The risk is at this point hypothetical, because there have been no defaults among the municipal bonds in the Company's investment portfolio. In making investment decisions, management follows internal policy guidelines that help to limit risk by specifying parameters for both security quality and industry and geographic concentrations. Management regularly monitors the quality of the investment portfolio and tracks changes in financial markets. The value of individual securities will be written down if a decline in fair value is considered to be other than temporary, given the totality of the circumstances.

Maturities and Associated Yields

The following table presents the maturities for securities available for sale and held to maturity at their carrying values as of December 31, 2012 and weighted average yield for each range of maturities.

\$ in thousands, except percent data	Maturities and Yields

The majority of mortgage-backed securities and collateralized mortgage obligations held at December 31, 2012 were backed by U.S. agencies. Certain holdings are required to be periodically subjected to the Federal Financial Institution Examination Council's (FFIEC) high risk mortgage security test. These tests address possible fluctuations in the average life and variances caused by the change in rate times the change in volume that have been allocated to rate and volume changes proportional to the relationship of the absolute dollar amounts of the change in each. Except for U.S. Government securities, the Company has no securities with any issuer that exceeds 10% of stockholders' equity.

Deposits

Total deposits increased by \$27,433, or 2.98%, from \$919,333 at December 31, 2011 to \$946,766 at December 31, 2012. Total deposits grew \$34,750, or 3.93%, from \$884,583 at December 31, 2010 to December 31, 2011. A portion of the increase in both 2012 and 2011 is attributable to a higher level of municipal deposits. The increases in total deposits for 2012 and 2011 were internally generated and not the result of acquisitions.

A. Average Amounts of Deposits and Average Rates Paid

Average amounts and average rates paid on deposit categories are presented below:

	Year Ended December 31,					
	2012		2011		2010	
	Average Amounts	Average Rates Paid	Average Amounts	Average Rates Paid	Average Amounts	Average Rates Paid
Noninterest-bearing demand deposits	\$ 141,269	---	\$ 135,880	---	\$ 122,817	---
Interest-bearing demand deposits	420,947	0.99%	378,971	1.08%	322,705	1.03%
Savings deposits	64,973	0.06%	58,273	0.08%	54,543	0.09%
Time deposits	298,797	1.23%	314,920	1.60%	352,888	2.20%
Average total deposits	\$ 925,986	1.01%	\$ 888,044	1.22%	\$ 852,953	1.53%

B. Time Deposits of \$100,000 or More

The following table sets forth time certificates of deposit and other time deposits of \$100,000 or more:

	December 31, 2012					Total
	3 Months or Less	Over 3 Months Through 6 Months	Over 6 Months Through 12 Months	Over 12 Months		
Total time deposits of \$100,000 or more	\$ 29,259	\$ 24,097	\$ 41,312	\$ 17,577	\$ 112,245	

Derivatives and Market Risk Exposures

The Company is not a party to derivative financial instruments with off-balance sheet risks such as futures, forwards, swaps, and options. The Company is a party to financial instruments with off-balance sheet risks such as commitments to extend credit, standby letters of credit, and recourse obligations in the normal course of business to meet the financing needs of its customers. See Note 14, of Notes to Consolidated Financial Statements for additional information relating to financial instruments with off-balance sheet risk. Management does not plan any future involvement in high risk derivative products. The Company has investments in mortgage-backed securities, principally GNMA's and FNMA's, with a fair value of approximately \$5,335. See Note 3 of Notes to Consolidated Financial Statements for additional information relating to securities.

The Company's securities and loans are subject to credit and interest rate risk, and its deposits are subject to interest rate risk. Management considers credit risk when a loan is granted and monitors credit risk after the loan is granted. The Company maintains an allowance for loan losses to absorb losses in the collection of its loans. See Note 5 of Notes to Consolidated Financial Statements for information relating to the allowance for loan losses. See Note 15 of Notes to Consolidated Financial Statements for information relating to concentrations of credit risk. The Company has an asset/liability program to manage its interest rate risk. This program provides management with information related to the rate sensitivity of certain assets and liabilities and the effect of changing rates on profitability and capital accounts.

The effects of changing interest rates are primarily managed through adjustments to the loan portfolio and deposit base, to the extent competitive factors allow. The investment portfolio is generally longer term. Adjustments for asset and liability management concerns are addressed when securities are called or mature and funds are subsequently reinvested. Historically, securities have been sold for reasons related to credit quality or regulatory limitations. Few, if any, securities available for sale have been disposed of for the express purpose of managing interest rate risk. No trading activity for this purpose is planned in the foreseeable future, though it does remain an option.

While the asset/liability planning program is designed to protect the Company over the long term, it does not provide near-term protection from interest rate shocks, as interest rate sensitive assets and liabilities do not by their nature move up or down in tandem in response to changes in the overall rate environment. The Company's profitability in the near term may be temporarily negatively affected in a period of rapidly rising or rapidly falling rates, because it takes some time for the Company to change its rates to adjust to a new interest rate environment. See Note 16 of Notes to Consolidated Financial Statements for information relating to fair value of financial instruments and comments concerning interest rate sensitivity.

Liquidity

Liquidity measures the Company's ability to meet its financial commitments at a reasonable cost. Demands on the Company's liquidity include funding additional loan demand and accepting withdrawals of existing deposits. The Company has diverse liquidity sources, including customer and purchased deposits, customer repayments of loan principal and interest, sales, calls and maturities of securities, Federal Reserve discount window borrowing, short-term borrowing, and Federal Home Loan Bank advances. At December 31, 2012, the bank did not have discount window borrowings, short-term borrowings, or FHLB advances. To assure that short-term borrowing is readily available, the Company tests accessibility annually.

Liquidity from securities is restricted by accounting and business considerations. The securities portfolio is segregated into available-for-sale and held-to-maturity. The Company considers only securities designated available-for-sale for typical liquidity needs. Further, portions of the securities portfolio are pledged to meet state requirements for public funds deposits. Discount window borrowings also require pledged securities. Increased/decreased liquidity from public funds deposits or discount window borrowings results in increased/decreased liquidity from pledging requirements. The Company monitors public funds pledging requirements and unpledged available-for-sale securities accessible for liquidity needs.

Regulatory capital levels determine the Company's ability to use purchased deposits and the Federal Reserve discount window. At December 31, 2012, the Company is considered well capitalized and does not have any restrictions on purchased deposits or the Federal Reserve discount window.

The Company monitors factors that may increase its liquidity needs. Some of these factors include deposit trends, large depositor activity, maturing deposit promotions, interest rate sensitivity, maturity and repricing timing gaps between assets and liabilities, the level of unfunded loan commitments and loan growth. At December 31, 2012, the Company's liquidity is sufficient to meet projected trends in these areas.

To monitor and estimate liquidity levels, the Company performs stress testing under varying assumptions on credit sensitive liabilities and the sources and amounts of balance sheet and external liquidity available to replace outflows. The Company's Contingency Funding Plan sets forth avenues for rectifying liquidity shortfalls. At December 31, 2012, the analysis indicated adequate liquidity under the tested scenarios.

The Company utilizes several other strategies to maintain sufficient liquidity. Loan and deposit growth are managed to keep the loan to deposit ratio within the Company's own policy range of 65% to 75%. At December 31, 2012, the loan to deposit ratio was 62.55%, slightly below policy levels. The investment strategy takes into consideration the term of the investment, and securities in the available for sale portfolio are laddered based upon projected funding needs.

Recent Accounting Pronouncements

See Note 1 of Notes to Consolidated Financial Statements for information relating to recent accounting pronouncements.

Capital Resources

Total stockholders' equity at December 31, 2012 was \$150,109, an increase of \$8,810, or 6.24%, from the \$141,299 at December 31, 2011. The largest component of 2012 stockholders' equity was retained earnings of \$144,162, which included net income of \$17,747, offset by dividends of \$7,639. Exercised stock options provided \$119 in 2012.

Total stockholders' equity grew by \$12,112 or 9.38%, from \$129,187 on December 31, 2010 to \$141,299 on December 31, 2011. Earnings, net of the change in unrealized gains and losses for securities available for sale and dividends paid, accounted for most of the increase in 2011.

The Tier I and Tier II risk-based capital ratios at December 31, 2012 were 21.20% and 22.4%, respectively. Capital ratios are significantly above the regulatory minimum requirements of 4% for Tier I and 8% for Tier II. The Tier I and Tier II risk-based capital ratios at December 31, 2011 were 19.7% and 20.9%, respectively.

Off-Balance Sheet Arrangements

The Company's off-balance sheet arrangements at December 31, 2012 are detailed in the table below.

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Commitments to extend credit	\$ 128,162	\$ 128,162	\$ ---	\$ ---	\$ ---
Standby letters of credit	12,533	12,533	---	---	---
Mortgage loans with potential recourse	22,574	22,574	---	---	---
Operating leases	478	219	237	22	---
Total	\$ 163,747	\$ 163,488	\$ 237	\$ 22	\$ ---

In the normal course of business the Company's banking affiliate extends lines of credit to its customers. Amounts drawn upon these lines vary at any given time depending on the business needs of the customers.

Standby letters of credit are also issued to the bank's customers. There are two types of standby letters of credit. The first is a guarantee of payment to facilitate customer purchases. The second type is a performance letter of credit that guarantees a payment if the customer fails to perform a specific obligation. Revenue from these letters was approximately \$56 in 2012.

While it would be possible for customers to draw in full on approved lines of credit and letters of credit, historically this has not occurred. In the event of a sudden and substantial draw on these lines, the Company has its own lines of credit on which it can draw funds. A sale of loans or investments would also be an option.

The Company sells mortgages on the secondary market for which there are recourse agreements should the borrower default. The mortgages originated must meet strict underwriting and documentation requirements for the sale to be completed. The Company estimates a potential loss reserve for recourse provisions. The amount is not material as of December 31, 2012. To date, no recourse provisions have been invoked.

Operating leases are for buildings used in the Company's day-to-day operations.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Information about market risk is set forth above in the "Interest Rate Sensitivity" and "Derivatives and Market Risk Exposure" sections of the Management's Discussion and Analysis.
