Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). You should not place undue reliance on these statements. Forward-looking statements include information concerning possible or assumed future results of operations, capital expenditures, the outcome of pending legal proceedings and claims, including environmental matters, goals and objectives for future operations, including descriptions of our business strategies and purchase commitments from customers. These statements are typically identified by words such as "believe," "anticipate," "expect," "plan," "intend," "estimate" and similar expressions. We base these statements on particular assumptions that we have made in light of our industry experience, as well as our perception of historical trends, current conditions, expected future developments and other factors that we believe are appropriate under the circumstances. As you read and consider the information in this report, you should understand that these statements are not guarantees of performance or results. They involve risks, uncertainties and assumptions. In light of these risks and uncertainties, there can be no assurance that the results and events contemplated by the forward-looking statements contained in, or incorporated by reference into, this report will in fact transpire.

You should carefully consider the risks described below and the other information in this report. Our operating results may fluctuate significantly and may not meet our expectations or those of securities analysts or investors. The price of our stock would likely decline if this occurs. Factors that may cause fluctuations in our operating results include, but are not limited to, the following:

- automobile industry sales and production rates and the willingness of automobile purchasers to pay for the option of
 a premium audio system and/or a multi-functional infotainment system;
- changes in consumer confidence and spending;
- fluctuations in currency exchange rates and other risks inherent in international trade and business transactions;
- our ability to satisfy contract performance criteria, including technical specifications and due dates;
- our ability to design and manufacture our products profitably under our long-term contractual commitments;
- the loss of one or more significant customers, including our automotive manufacturer customers;
- competition in the automotive, consumer or professional markets in which we operate;
- model-year changeovers in the automotive industry;
- our ability to enforce or defend our ownership and use of intellectual property;
- our ability to effectively integrate acquisitions made by our company;
- strikes, work stoppages and labor negotiations at our facilities, or at a facility of one of our significant customers; or work
 - stoppages at a common carrier or a major shipping location;
- the outcome of pending or future litigation and administrative claims, including the outcome of any litigation that has been

or may be instituted against our company and others relating to the formerly proposed acquisition of our company by KHI

Parent Inc., a company formed by investment funds affiliated with Kohlberg Kravis Roberts & Co. L.P. and GS Capital

Partners VI Fund, L.P. and its related funds, which are sponsored by Goldman, Sachs & Co.;

- changes in general economic conditions and specific market conditions; and
- world political stability.

Although we believe that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect our actual financial results or results of operations and could cause actual results to differ materially from those expressed in the forward-looking statements. As a result, the forgoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this and other reports we file with the Securities and Exchange Commission, including the information in Item 1A, "Risk Factors" of Part I to our Annual Report on Form 10-K for the fiscal year ended June 30, 2007 and Item 1A, "Risk Factors" of this report.

HARMAN INTERNATIONAL INDUSTRIES, INCORPORATED AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1. Basis of Presentation

Our unaudited, condensed consolidated financial statements at September 30, 2007 and for the three months ended September 30, 2007 and 2006, have been prepared pursuant to rules and regulations of the Securities and Exchange Commission ("SEC"). These unaudited condensed consolidated financial statements do not include all information and footnote disclosures included in our audited financial statements. In the opinion of management, the accompanying unaudited, condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments and accruals, necessary to present fairly, in all material respects, the consolidated financial position, results of operations and cash flows for the periods presented. Operating results for the three months ended September 30, 2007 are not necessarily indicative of the results that may be expected for the full fiscal year ending June 30, 2008 due to seasonal, economic and other factors.

Where necessary, information for prior periods has been reclassified to conform to the consolidated financial statement presentation for the corresponding periods in the current fiscal year.

The methods, estimates and judgments we use in applying our accounting policies, in conformity with generally accepted accounting principles in the United States ("GAAP"), have a significant impact on the results we report in our financial statements. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. The estimates affect the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

These unaudited condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and accompanying notes included in our Annual Report on Form 10-K for the fiscal year ended June 30, 2007.

Note 2. Inventories

Inventories consist of the following:

	Se	ptember 30,	June 30,
(\$000s omitted)		2007	2007
Finished goods	\$	224,940	235,736
Work in process		61,607	52,682
Raw materials		188,608	164,738
Total	\$	475,155	453,156

Inventories are stated at the lower of cost or market. Cost is determined principally by the first-in, first-out method. The valuation of inventory requires us to make judgments and estimates regarding obsolete, damaged or excess inventory as well as current and future demand for our products. The estimates of future demand along with analysis of usage data that we use in the valuation of inventory are the basis for our inventory reserves and have an effect on our results of operations. We calculate inventory reserves using a combination of a lower of cost or market analysis, analysis of historical usage data, forecast demand data and historical disposal rates. Lower of cost or market

analysis is typically applied to those items of inventory that represent a

7

substantial portion of the total value of inventory on-hand. The high-value units typically represent a small percentage of the total inventory items, so identification of obsolescence or valuation reserve requirements for the balance of the inventory on-hand is accomplished using either historical or forecast usage to identify slow-moving or obsolete items.

Note 3. Property, Plant and Equipment

Property, plant and equipment are composed of the following:

	S	eptember 30,	June 30,	
(\$000s omitted)		2007		
Land	\$	13,664	14,738	
Buildings and improvements		272,881	269,968	
Machinery and equipment		965,484	905,293	
Furniture and fixtures		43,601	41,386	
		1,295,630	1,231,385	
Less accumulated depreciation and amortization		(689,989)	(639,409)	
Property, plant and equipment, net	\$	605,641	591,976	

Note 4. Warranty Liabilities

We warrant our products to be free from defects in materials and workmanship for periods ranging from six months to six years from the date of purchase, depending on the business segment and product. The warranty is a limited warranty, and it may impose certain shipping costs on the customer and exclude deficiencies in appearance except for those evident when the product is delivered. Our dealers and warranty service providers normally perform warranty service for loudspeakers and electronics in the field, using parts supplied on an exchange basis by our company. Estimated warranty liabilities are based upon past experience with similar types of products, the technological complexity of certain products, replacement cost and other factors. We take these factors into consideration when assessing the adequacy of our warranty provisions for periods still open to claim.

Details of the estimated warranty liabilities are as follows:

	Three months ended			
		Septembe	er 30,	
(\$000s omitted)	2007		2006	
Beginning balance (June 30)	\$	48,148	60,768	
Warranty provisions		20,579	12,545	
Warranty payments (cash or in-kind)		(6,874)	(9,830)	
Ending balance	\$	61,853	63,483	

The warranty liabilities are included in accrued liabilities.

Note 5. Comprehensive Income

The components of comprehensive income are as follows:

	Three month Septembe	
(\$000s omitted)	2007	2006
Net income	\$ 36,529	56,608
Other comprehensive income (loss):		
Foreign currency translation	36,647	(5,912)
Unrealized gains on hedging	(3,280)	1,438
Change in pension benefits	(9)	4
Total comprehensive income	\$ 69,887	52,138

The components of accumulated other comprehensive income (loss) as of September 30, 2007 and June 30, 2007 and the activity for the three months ended September 30, 2007 are presented below:

				Cumulative	
	Un	realized		foreign	Accumulated
	1	oss on		currency	other
	h	edging	Pension	translation	comprehensive
(\$000s omitted)	\$000s omitted) deriva		benefits	adjustment	income (loss)
June 30, 2007	\$	(510)	(15,778)	98,479	82,191
Foreign currency translation adjustments				36,647	36,647
Change in fair value of foreign currency					
cash flow hedges		(3,280)			(3,280)
Change in pension benefits			(9)		(9)
September 30, 2007	\$	(3,790)	(15,787)	135,126	115,549

Note 6. Earnings Per Share

The following table presents the calculation of basic and diluted earnings per common share outstanding:

		Three months ended September 30,			er 30,		
(000s omitted except per share amounts)		2007			2006		
		Basic	Diluted	Basic	Diluted		
Net income	\$	36,529	36,529	56,608	56,608		
Weighted average shares outstanding		65,242	65,242	65,517	65,517		
Employee stock options			1,121		1,159		
Total weighted average shares outstanding		65,242	66,363	65,517	66,676		
Earnings per share	\$	0.56	0.55	0.86	0.85		

Certain options were outstanding and not included in the computation of diluted net earnings per share because the assumed exercise of these options would have been antidilutive. Options to purchase 617,796 shares of our common stock with exercise prices ranging from \$85.36 to \$126.94 per share during the quarter ended September 30, 2007, were outstanding and not included in the computation of diluted earnings per share because the exercise of these options would have been antidilutive.

Options to purchase 1,338,043 shares of our common stock with exercise prices ranging from \$75.22 to \$126.94 per share during the quarter ended September 30, 2006 were outstanding and not included in the computation of diluted earnings per share because the exercise of these options would have been antidilutive.

Note 7. Stock Options

On September 30, 2007, we had one share-based compensation plan with shares available for future grants, the 2002 Stock Option and Incentive Plan (the "2002 Plan"). The 2002 Plan permits the grant of stock options, stock appreciation rights, restricted stock and restricted stock units for up to 6,000,000 shares of our common stock. During the quarter ended September 30, 2007, options to purchase 100,000 shares of our common stock and 15,000 shares of restricted stock were granted under the 2002 Plan. In addition, 49,579 shares of restricted stock and 32,291 restricted stock units were granted outside of the 2002 Plan. The 32,291 restricted stock units are required to be settled in cash. As such, the restricted stock units were excluded from share-based compensation expense and accounted for as bonus compensation, accrued ratably over the period of service.

Share-based compensation expense was \$4.9 million and \$3.7 million for the quarters ended September 30, 2007 and 2006, respectively. The total income tax benefit recognized in the income statement for share-based compensation arrangements was \$1.4 million and \$1.0 million for the quarters ended September 30, 2007 and 2006, respectively.

Fair Value Determination

The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model, which uses the assumptions noted in the following table.

	Three months ended September 30,		
	2007	2006	
Expected volatility	35.1%-40.8%	36.0%-42.0%	
Weighted-average volatility	37.0%	39.4%	
Expected annual dividend	\$0.05	\$0.05	
Expected term (in years)	2.71 - 6.71	1.55 - 7.65	
Risk-free rate	4.9%-5.0%	4.6%-5.0%	

Groups of option holders (directors, executives and non-executives) that have similar historical behavior are considered separately for valuation purposes. Expected volatilities are based on historical closing prices of our common stock over the expected option term. We use historical data to estimate option exercises and employee terminations within the valuation model. The expected term of options granted is derived using the option valuation model and represents the estimated period of time from the date of grant that the option is expected to remain outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Stock Option Activity

A summary of option activity under our stock option plans as of September 30, 2007 and changes during the fiscal year is presented below:

	Shares	Weighted average exercise price	Weighted average remaining contractual term(years)	Aggregate intrinsic value (\$000s)
Outstanding at July 1, 2007	3,214,238	\$ 61.11		
Granted	100,000	116.65		
Exercised	(11,750)	70.91		
Forfeited or expired	(6,400)	85.84		
Outstanding at September 30, 2007	3,296,088	62.71	6.27	\$ 101,580
Exercisable at September 30, 2007	1,861,238	\$ 36.61	4.54	\$ 94,847

The weighted-average grant-date fair value of options granted during the quarters ended September 30, 2007 and 2006 was \$45.08 and \$34.43, respectively. The total intrinsic value of options exercised during the quarters ended September 30, 2007 and 2006 was \$2.2 million and \$3.1 million, respectively.

A summary of the status of our nonvested restricted stock as of September 30, 2007 and changes during the quarter ended September 30, 2007, is presented as follows:

		Weighted
		average
		grant-date
	Shares	fair value
Nonvested at July 1, 2007	12,000	\$ 82.00
Granted	64,579	116.65
Vested		
Forfeited		
Nonvested at September 30, 2007	76,579	\$ 111.22

As of September 30, 2007, there was \$5.8 million of total unrecognized compensation cost related to nonvested restricted stock-based compensation arrangements. The weighted average recognition period is 2.10 years.

At September 30, 2007, the aggregate intrinsic value of the restricted stock unit grant was \$2.2 million. As of September 30, 2007, there was \$1.1 million of total unrecognized compensation cost related to restricted stock unit compensation arrangements granted under the 2002 Plan. The weighted average recognition period is 2.01 years. Other than 32,291 restricted stock units that are required to be settled in cash, no restricted stock units were granted, vested or exercisable in the three months ended September 30, 2007 and 2006.

Note 8. Business Segment Data

We design, manufacture and market high-quality, high fidelity audio products and electronic systems for the automotive, consumer and professional markets. We organize our businesses into reporting segments by the end-user markets served. Our chief operating decision makers evaluate performance and allocate resources primarily based on net sales, operating income and working capital in each of the reporting segments. We report on the basis of three segments: Automotive, Consumer and Professional.

Our Automotive segment designs, manufactures and markets audio, electronic and infotainment systems for vehicle applications primarily to be installed as original equipment by automotive manufacturers. Our automotive products and systems are marketed worldwide under brand names including JBL, Infinity, Harman/Kardon, Becker, Logic 7 and Mark Levinson. Our premium branded audio, video, navigation and infotainment systems are offered to automobile manufacturers through engineering and supply agreements. See Note 13, *Significant Customers*.

Our Consumer segment designs, manufactures and markets audio, video and electronic systems for home, computer and multimedia applications. Our Consumer home products and systems are marketed worldwide under brand names including JBL, Infinity, Harman/Kardon, Lexicon, Mark Levinson and Revel. Our audio and electronic products are offered through audio/video specialty and retail chain stores. Our branded audio products for computer and multimedia applications are focused on retail customers with products designed to enhance sound for computers, Apple's iPods and other music control players.

The Professional segment designs, manufactures and markets loudspeakers and electronic systems used by audio professionals in concert halls, stadiums, airports and other buildings and for recording, broadcast, cinema and music reproduction applications. Our Professional products are marketed worldwide under brand names including JBL Professional, AKG, Crown, Soundcraft, Lexicon, DigiTech, dbx and Studer. We provide high-quality products to the sound reinforcement, music instrument support and broadcast and recording segments of the professional audio market. We offer complete systems solutions for professional installations and users around the world.

The following table reports net sales and operating income (loss) by each reporting segment:

		Three months ended	1
		September 30,	
(\$000s omitted)	2007		2006
Net sales:			
Automotive	\$	682,303	600,998
Consumer		119,438	93,126
Professional		145,221	131,419
Total	\$	946,962	825,543
Operating income (loss):			
Automotive	\$	45,979	90,168
Consumer		(3,093)	(4,449)
Professional		20,388	17,075
Other		(21,833)	(15,876)
Total	\$	41,441	86,918

Other operating loss is comprised of activity related to our corporate operations, net of reporting segment allocations.

Note 9. Derivatives

We use foreign currency forward contracts to hedge a portion of our forecasted transactions. These forward contracts are designated as foreign currency cash flow hedges and recorded at fair value in the accompanying consolidated balance sheet with a corresponding entry to accumulated other comprehensive income (loss) until the underlying forecasted foreign currency transaction occurs.

When the transaction occurs, the gain or loss from the derivative designated as a hedge of the transaction is reclassified from accumulated other comprehensive income (loss) to the same income statement line item in which the foreign currency gain or loss on the underlying hedged transaction is recorded. When it becomes apparent that an underlying forecasted transaction will not occur, the amount recorded in accumulated other comprehensive income (loss) related to the hedge is reclassified to the miscellaneous, net line of the income statement in the then-current period.

Changes in the fair value of the derivatives are highly effective in offsetting changes in the cash flows of the hedged items because the amounts and the maturities of the derivatives approximate those of the forecasted exposures. Any ineffective portion of the derivative is recognized in current earnings to the same income statement line item in which the foreign currency gain or loss on the underlying hedged transactions is recorded. When it has been determined that a hedge has become ineffective, the ineffective portion of the hedge is recorded in current earnings. For the three months ending September 30, 2007 and 2006 we recognized no ineffectiveness.

We elected to exclude forward points from the effectiveness assessment. At the end of the period we calculate the fair value relating to the change in forward points which is recorded to current earnings as other non-operating income. For the three months ended September 30, 2007, we recognized \$0.8 million in net gains related to the change in forward points.

At September 30, 2007, we had forward contracts maturing through June 2008 to sell Euros and buy US Dollars of approximately \$60 million, and through December 2007 to buy Canadian dollars and sell US Dollars of approximately \$2.6 million to hedge future foreign currency purchases. At September 30, 2007, the amount associated with these hedges that is expected to be reclassified from accumulated other comprehensive income (loss) to earnings within the next twelve months is a loss of approximately \$4.2 million. The fair market value of the forward contracts as of September 30, 2007 was a loss of \$3.4 million. In the three months ended September 30, 2007, we recognized less than \$0.1 million net losses from cash flow hedges of forecasted foreign currency transactions compared to \$0.4 million in net losses in the same period last year.

As of September 30, 2007, we had forward contracts maturing through January 2008 to purchase and sell the equivalent of \$41.2 million of various currencies to hedge foreign currency denominated inter-company loans. At September 30, 2007, the fair value on these contracts was a net loss of \$0.3 million. Adjustments to the carrying value of the foreign currency forward contracts offset the gains and losses on the underlying loans in other non-operating income.

In February 2007 we entered into an interest rate swap contract to effectively convert interest on an operating lease from a variable rate to a fixed rate. The objective of the swap is to offset changes in rent expenses caused by interest rate fluctuations. The interest rate swap is designated as a cash flow hedge. At the end of each reporting period the discounted fair value of the swap is calculated and recorded to other comprehensive income. The accrued but unpaid net interest on the swap is recorded in rent expense, which is included in selling, general and administrative expenses in our consolidated statement of operations. Changes in the fair value of the interest rate swap are highly effective in offsetting changes in the hedged item. Effectiveness is

tested using a hypothetical swap that replicates the actual cash flows of the interest portion of rent expense regressed against the interest rate swap. If the calculated correlation factor shows a high degree of correlation, the interest rate swap is deemed to be highly effective. If the hedge is determined to be ineffective, the ineffective portion will be reclassified from other comprehensive income and recorded as rent expense. For the three months ended September 30, 2007, we recognized no ineffectiveness.

As of September 30, 2007, the notional amount of the swap contract was \$28.6 million and the amount recorded in other comprehensive income was a gain of \$0.4 million. The amount associated with the swap contract that is expected to be recorded as rent expense over the next twelve months is a gain of \$0.1 million.

Note 10. Commitments and Contingencies

On May 8, 2007, Helen Rodgers Living Trust ("Plaintiff") filed a putative class action lawsuit against the Company and all of its directors in the Superior Court of the District of Columbia seeking declaratory and injunctive relief, damages and costs. The original complaint alleged that the Company's directors breached their fiduciary duties to the Company's stockholders by entering into a merger agreement with a company ("Parent") formed by investment funds affiliated with Kohlberg Kravis Roberts & Co. L.P. ("KKR") and GS Capital Partners VI Fund, L.P. and its related funds, which are sponsored by Goldman, Sachs & Co. ("GSCP"). According to Plaintiff, the consideration to be offered to the Company's stockholders under the merger agreement was "inadequate" and the merger agreement "inequitably favor[ed] . . . insiders" of the Company. The original complaint also alleged that the termination fee in the merger agreement was excessive, that the Company's directors purportedly would not "fairly and adequately" evaluate any alternative bids, and that the provision in the merger agreement that allowed the Company to solicit proposals for alternative bidders during a 50-day period ending in June 2007 was "illusory."

On June 29, 2007, Plaintiff filed its first amended complaint. While the first amended complaint continued to raise the allegations made in the original complaint, the new focus of Plaintiff's case was that the merger agreement "inequitably favor[ed] . . . insiders" of the Company by allowing such insiders to exchange otherwise worthless "underwater" options for Parent shares on a "one option for one Parent share basis," and by allowing them to separately negotiate with Parent for more favorable treatment of their options. The first amended complaint also alleged that the disclosures contained in the Company's preliminary proxy statement/prospectus were inadequate.

On June 29, 2007, Plaintiff filed a motion for preliminary injunction. The motion sought to enjoin the conversion of the "underwater" options into Parent shares, and also sought to "unw[i]nd or otherwise cancel[]" the challenged options. In the motion, Plaintiff did not seek to enjoin the shareholder vote or the merger. After Defendants filed their opposition to the motion for preliminary injunction on July 23, 2007, Plaintiff agreed to voluntarily withdraw its motion.

Thereafter, on September 4, 2007, Plaintiff was granted leave to file a second amended complaint. The second amended complaint narrows Plaintiff's claims by eliminating, among other things, most of its disclosure claims and allegations relating to "underwater" options. Defendants answered Plaintiff's second amended complaint on September 21, 2007, denying Plaintiff's claims for breach of fiduciary duty and disclosure deficiencies.

We believe the lawsuit is without merit and intend vigorously to defend against it.

At September 30, 2007, we were involved in several additional legal actions. The outcome of these legal actions cannot be predicted with certainty; however, management, based upon advice from legal counsel, believes such actions are either without merit or will not have a material adverse effect on our financial position or results of operations. In fiscal 2005, we recorded a \$6 million liability for probable unasserted claims. There was no change in the status of these claims at September 30, 2007. As such, this amount continues to be accrued at September 30, 2007.

At September 30, 2007, our Board of Directors had authorized the repurchase of a total of up to 20 million shares of common stock. Through September 30, 2007, we had acquired and placed in treasury a total of 18,198,082 shares of our common stock at a total cost of \$639.6 million. Our program was suspended upon the announcement in April 2007 of our proposed merger with a company formed by investment funds affiliated with KKR and GSCP. No determination has been made regarding when this program will be reinstated. See Note 15 *Subsequent Events* for additional information regarding the termination of the proposed merger and an accelerated share repurchase program effected in October 2007.

Note 11. Recent Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in accordance with Statement of Financial Accounting Standards ("SFAS") No. 109, *Accounting for Income Taxes*. It also prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement for a tax position taken or expected to be taken in a tax return. FIN 48 is effective for fiscal years beginning after December 15, 2006. We adopted the provisions of FIN 48 on July 1, 2007. See Note 14, *Income Taxes* to review the effect of adoption on our consolidated financial statements.

In May 2007, the FASB issued FASB Staff Position ("FSP") No. FIN 48-1, *Definition of Settlement in FASB Interpretation No.* 48 ("FSP FIN 48-1") which amends FIN 48, to provide guidance about how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. Under FSP FIN 48-1, a tax position is considered to be effectively settled if the taxing authority completed its examination, the enterprise does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future. We adopted the provisions of FSP FIN 48-1 on July 1, 2007. See Note 14, *Income Taxes* to review the effect of adoption on our consolidated financial statements.

The FASB recently issued proposed FSP APB 14-a, "Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement" which would require issuers of convertible debt that may be settled wholly or partly in cash to account for the debt and equity components separately. The proposed FSP would require separate accounting to be applied retrospectively to both new and existing convertible instruments within the proposal's scope and would thereby affect our net income and earnings per share. See Note 15, Subsequent Events for additional information regarding our recently issued convertible notes.

Note 12. Retirement Benefits

We have certain business units in Europe that maintain defined benefit pension plans for many of our current and former employees. The coverage provided and the extent to which the retirees' share in the cost of the program vary by business unit. Generally, plan benefits are based on age, years of service, and average compensation during the final years of service. The measurement date used for determining pension benefits is the last day of our fiscal year-end, June 30. In the United States, we have a Supplemental Executive Retirement Plan ("SERP") that provides retirement, death and termination benefits, as defined, to certain key executives designated by the Board of Directors.

Our retirement benefits are more fully disclosed in Notes 1 and 12 of our Consolidated Financial Statements included in Item 8 of our Annual Report on Form 10-K for the fiscal year ended June 30, 2007.

The following table presents the components of net periodic benefit costs:

	Three months ended		
		Septembe	r 30,
(\$000s omitted)		2007	2006
Service cost	\$	917	809
Interest cost		1,588	1,267
Amortization of prior service cost		215	182
Amortization of net loss		303	467
Net periodic benefit cost	\$	3,023	2,725

During the three months ended September 30, 2007, we made an insignificant contribution to the defined benefit pension plans and expect full year contributions to be immaterial.

Note 13. Significant Customers

Presented below are the percentages of net sales to and receivables due from the customer that represented 10 percent or more of our net sales or accounts receivable for the periods presented:

	Net Sa	Net Sales		able	
	Three mont				
	Septemb	September 30,		September 30	
	2007	2006	2007	2006	
Daimler AG	21%	26%	15%	16%	
Other Customers	79	74	85	84	
Total	100%	100%	100%	100%	

We anticipate that Daimler AG will continue to account for a significant portion of our net sales and accounts receivable for the foreseeable future. Our automotive customers are not obligated to any long-term purchase of our products. The loss of Daimler AG as a customer would have a material adverse effect on our total consolidated net

Edgar Filing: HARMAN INTERNATIONAL INDUSTRIES INC /DE/ - Form 10-Q sales, earnings and financial position.

Note 14. Income Taxes

Our provision for income taxes is based on an estimated annual tax rate for the year applied to federal, state and foreign income. The projected effective tax rate of 27 percent for 2008 differs from the U.S. statutory rate primarily due to foreign rates, which differ from those in the U.S., the realization of certain business tax credits including R&D, favorable permanent differences between book and tax treatment for items, and the benefit from the conclusion of a tax audit. This rate is expected to be greater than the full year 2007 effective tax rate of 18.36 percent because the 2007 rate included the recognition of certain federal tax credits.

We adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"), on July 1, 2007. FIN 48 clarifies the accounting for income tax uncertainties. The company has developed and implemented a process based on the guidelines of FIN 48 to ensure that uncertain tax positions are identified, analyzed and properly reported in the company's financial statements in accordance with SFAS 109. Based on all known facts and circumstances and current tax law, the company believes that the total amount of unrecognized tax benefits as of June 30, 2007 was \$31.2 million. As a result of the implementation of FIN 48, we recognized a \$6.9 million reduction to the \$31.2 million unrecognized tax benefit due to the fact that the tax position was at a more likely than not threshold at July 1, 2007. This reduction was included as an increase to the July 1, 2007 balance of retained earnings. Additionally, the company effectively settled a German tax audit for fiscal tax years up to and including June 30, 2004. During the three months ended September 30, 2007, we recognized \$5.7 million in previously unrecognized tax benefits due to the effective settlement criteria of FSP FIN 48-1.

The unrecognized tax benefits at July 1, 2007 are tax positions that are permanent in nature and, if recognized, would reduce the effective tax rate. However, the Company's federal, certain state and certain non-U.S. income tax returns are currently under various stages of audit or potential audit by applicable tax authorities and the amounts ultimately paid, if any, upon resolution of the issues raised by the taxing authorities may differ materially from the amounts accrued for each year. The material tax jurisdictions for the company are Germany and the United States. The tax years subject to exam for Germany are fiscal years 2005 through the current year. The tax years subject to exam in the United States are fiscal years 2004 through the current year. Due to provisions allowed in the tax law, we may recognize \$3.4 million in unrecognized tax benefits within the next 12 months.

We recognize interest and penalties related to unrecognized tax benefits in income tax expense. We had \$2.5 million accrued at July 1, 2007 for the payment of any such interest and penalties.

Income tax expense for the quarter ended September 30, 2007 was \$3.7 million, compared to \$29.6 million for the same period last year. The effective tax rate for the three months ended September 30, 2007 was 9.3 percent, compared to 34.5 percent in the prior year period. The tax rate for the quarter ended September 30, 2007 includes \$5.7 million of previously unrecognized tax benefits resulting from the effective settlement of a German tax audit. Additionally, the tax rate for the quarter was lower due to a \$4.4 million benefit related to a change in German tax law which lowered the German effective tax rate.

We currently expect the tax rate for the full fiscal year 2008 to be approximately 27 percent.

Note 15. Subsequent Events

On October 1, 2007, a purported class action lawsuit was filed against the Company and certain of its officers in the United States District Court for the District of Columbia seeking compensatory damages and costs on behalf of all persons who purchased the Company's common stock between April 26, 2007 and September 24, 2007 (the "Class Period"). The

complaint purports to allege claims for violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The complaint alleges that defendants omitted to disclose material adverse facts about the Company's financial condition and business prospects. The complaint contends that had these facts not been concealed at the time the merger agreement was entered, there would not have been a merger agreement, or it would have been at a much lower price, and the price of the Company's common stock therefore would not have been artificially inflated during the Class Period. The plaintiff alleges that, following the reports that the proposed merger was not going to be completed, the price of the Company's common stock declined causing the plaintiff class significant losses.

We believe the lawsuit is without merit and intend vigorously to defend against it.

On October 22, 2007, the Company entered into a Termination and Settlement Agreement (the "Termination Agreement") with KKR, KHI Parent Inc., KHI Merger Sub Inc. and GSCP. Under the Termination Agreement, effective on October 23, 2007, each of (a) the Agreement and Plan of Merger, dated April 26, 2007, among the Company, KHI Parent Inc. and KHI Merger Sub Inc. (the "Merger Agreement"), (b) the related guarantees (the "Guarantees") and (c) the Election Agreement, dated April 26, 2007, between KHI Parent Inc. and Dr. Sidney Harman, was terminated in its entirety. Under the Termination Agreement, the Company and affiliates of KKR and GSCP agreed to release each other from all claims and actions arising out of or related to the Merger Agreement, the Guarantees and the transactions contemplated thereby.

In connection with the Termination Agreement, on October 22, 2007, the Company entered into a note purchase agreement under which it sold \$400 million aggregate principal amount of its 1.25 percent Convertible Senior Notes due 2012 (the "Notes") to an affiliate of KKR, GSCP, Citibank, N.A. and HSBC USA, Inc. The Notes are convertible at a conversion price of \$104 per share into cash, and at Harman's option, if applicable, shares of Harman common stock. The agreement contains a settlement provision commonly referred to as a "net share settlement." Net settlement provisions are currently under review by the FASB. If the FASB adopts the proposed new accounting standard, we would incur higher interest expense and thus lower earnings per share.

On October 30, 2007, the Company used the proceeds from the issuance and sale of the Notes to repurchase and retire for accounting purposes approximately 4.8 million shares of the Company's common stock for a total purchase price of approximately \$400 million from Bear, Stearns International Limited and J.P. Morgan Securities Inc., as agent for JPMorgan Chase Bank, National Association, London Branch, under two separate accelerated share repurchase (ASR) programs. The 4.8 million shares represented approximately 7 percent of the then outstanding shares of the Company's common stock.

For more detailed information, see our Current Reports on Form 8-K filed with the Securities and Exchange Commission on October 25, 2007 and October 31, 2007.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The following discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and the related notes included in Item 1 of this Quarterly Report on Form 10-Q, together with Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended June 30, 2007 ("2007 Form10-K"). This discussion contains forward-looking statements which are based on our current expectations and experience and our perception of historical trends, current market conditions, including customer acceptance of our new products, current economic data, expected future developments, including foreign currency exchange rates, and other factors that we believe are appropriate under the circumstances. These statements involve risks and uncertainties that could cause actual results to differ materially from those suggested in the forward-looking statements, including the litigation resulting from the terminated merger agreement with a company formed by investment funds affiliated with Kohlberg Kravis Roberts & Co. L.P. and GS Capital Partners VI Fund, L.P.

We begin our discussion with an overview of our company to give you an understanding of our business and the markets we serve. We then discuss our critical accounting policies. This is followed by a discussion of our results of operations for the three months ended September 30, 2007 and 2006. We include in this discussion an analysis of certain significant period-to-period variances in our consolidated statements of operations. We also provide specific information regarding our three reportable business segments: Automotive, Consumer and Professional. Our liquidity, capital resources and cash flows are discussed under the caption Financial Condition. We complete our discussion with a business outlook for future periods.

Overview

We design, manufacture and market high-quality, high fidelity audio products and electronic systems for the automotive, consumer and professional markets. We have developed, both internally and through a series of strategic acquisitions, a broad range of product offerings sold under renowned brand names in our principal markets. These brand names have a heritage of technological leadership and product innovation. Our three reportable business segments, Automotive, Consumer and Professional, are based on the end-user markets we serve.

Automotive designs, manufactures and markets audio, electronic and infotainment systems for vehicle applications. Our systems are generally shipped directly to our automotive customers for factory installation. Infotainment systems are a combination of infotainment and entertainment components that may include or control GPS navigation, traffic information, voice-activated telephone and climate control, rear seat entertainment, wireless Internet access, hard disk recording, MP3 playback and a high-end branded audio system. These systems include scaleable software to allow us to better serve a full range of vehicles from luxury through the entry-level vehicles. Future infotainment systems may also provide driver safety capabilities such as lane guidance, pre-crash emergency braking, adaptive cruise control and night vision. Automotive also provides aftermarket products such as personal navigation devices ("PNDs") to customers primarily in Europe. Our PNDs leverage many of the successful applications developed by our Automotive segment.

Consumer designs, manufactures and markets audio, video and electronic systems for home, mobile and multimedia applications. Home product applications include systems to provide high-quality audio throughout the home and to enhance in-home video systems such as home theatres. Our aftermarket mobile products, such as iPod adaptors, speakers and amplifiers, deliver audio entertainment in the vehicle. Additionally, aftermarket mobile products include PNDs that provide GPS navigation, video and other infotainment capabilities. Our multimedia applications include loudspeaker accessories for personal computers, music phones, and portable electronic devices such as the iPod and other MP3 players. Our consumer products are primarily distributed through retail outlets.

Professional designs, manufactures and markets loudspeakers and electronic systems used by audio professionals in concert halls, stadiums, airports, houses of worship and other public spaces. We also develop products for recording, broadcast, cinema, touring and music reproduction applications. In addition, we have leading shares of both the portable PA market and musician vertical markets serving small bands, DJ's and other performers. These products are increasingly linked by our proprietary HiQnet network protocol which provides centralized monitoring and control of both complex and simple professional audio systems.

Our products are sold worldwide, with the largest markets being the United States and Germany. In the United States, our primary manufacturing facilities are located in California, Indiana, Kentucky, Missouri and Utah. Outside of the United States, we have significant manufacturing facilities in Germany, Austria, the United Kingdom, Mexico, Hungary, France and China. Our businesses operate using local currencies. Therefore, we are subject to currency fluctuations that are partially mitigated by the fact that we purchase raw materials and supplies locally when possible. We are especially affected by Euro exchange rates since a significant percentage of our sales are made in Euros.

We experience seasonal fluctuations in sales and earnings. Historically, our first quarter ending September 30 is generally the weakest due to the production schedules of our automotive customers and summer holidays in Europe. Our sales and earnings may also vary due to customer acceptance of our products, the timing of new product introductions, product offerings by our competitors and general economic conditions. Our reported sales and earnings may also fluctuate due to foreign currency exchange rates, especially for the Euro.

We achieved solid results for the first quarter ended September 30, 2007. Each of our three reportable business segments reported sales growth for the first quarter. Our initiative to develop cost saving strategies is underway and we expect to gain procurement, engineering and manufacturing efficiencies that we believe will improve margins over the course of this fiscal year. We continue to be a strong company with exceptional technology, products and market position. With the termination of the Merger Agreement behind us, we now look forward to turning our full attention to operating and improving our business.

Recent Developments

On October 22, 2007, we announced that we entered into an agreement with KKR, GSCP and companies formed by investment funds affiliated with KKR and GSCP to terminate the Merger Agreement dated April 26, 2007 without litigation or payment of a termination fee. In connection with the termination of the Merger Agreement, we sold \$400 million of our 1.25 percent Convertible Senior Notes due 2012, convertible at a conversion price of \$104 per share into cash, and at our option, if applicable, shares of our common stock.

On October 30, 2007, we entered into an accelerated share repurchase ("ASR") agreement with Bear, Stearns International Limited and a separate ASR agreement with J.P. Morgan Securities Inc., as agent for JPMorgan Chase Bank, National Association, London Branch. Pursuant to these agreements, we purchased, in the aggregate, 4,775,549 shares of our common stock for a total purchase price of approximately \$400 million, subject to adjustment.

Critical Accounting Policies

Our critical accounting policies are described under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our 2007 Form 10-K. These policies include allowance for doubtful accounts, inventory valuation, goodwill, pre-production and development costs, warranty liabilities, income taxes, and stock-based compensation. Also see Note 1, *Summary of Significant Accounting Policies* to our Consolidated Financial Statements included in our 2007 Form 10-K.

Results of Operations

Sales

Our net sales for the quarter ended September 30, 2007 were \$947.0 million, a 15 percent increase compared to the prior year period. All three of our reporting segments reported higher sales compared to the same period in the prior year. The effects of foreign currency translation contributed approximately \$42 million to the increase in sales. Exclusive of foreign currency, net sales were 9 percent higher than the prior year period. The growth in overall net sales was primarily due to increased shipments of infotainment systems to automotive customers, higher sales of personal navigation devices in Europe, and higher sales of consumer and professional products to major retailers.

Presented below is a summary of our net sales by reporting segment:

(\$000s omitted)	Three months ended September 30,				
	2007	%	2006	%	
Net sales:					
Automotive	\$ 682,303	72%	600,998	73%	
Consumer	119,438	13%	93,126	11%	
Professional	145,221	15%	131,419	16%	
Total	\$ 946,962	100%	825,543	100%	

Automotive - Net sales for the quarter ended September 30, 2007 increased \$81.3 million, or 14 percent compared to the same period last year. Foreign currency translation contributed approximately \$36 million to the increase in sales. Since a significant percentage of our automotive sales are to customers in Europe, Automotive incurs most of our foreign currency translation exposure. New introductions of infotainment systems including Chrysler's MyGig infotainment systems in North America, the roll-out of our first mid-level infotainment system for BMW and the extension of our Multi Media Interface infotainment system for the Audi A4 and A5 were primary factors contributing to the higher sales. A strong demand for Traffic Assist, our European aftermarket PND, also contributed significantly to the increase in sales over the prior year period.

Consumer - Net sales for the quarter ended September 30, 2007 increased \$26.3 million, or 28 percent, compared to the same period last year. Foreign currency translation contributed approximately \$4 million to the increase in sales compared to the prior year. New product introductions and strong Harman/Kardon and multimedia sales contributed significantly to the sales increase at Consumer. Higher sales of consumer products for home applications including Harman/Kardon electronics and JBL loudspeakers, multimedia products and our consumer mobile PNDs, each contributed to the sales growth over the prior year period.

Professional - Net sales for the quarter ended September 30, 2007 increased \$13.8 million, or 11 percent compared to the same period last year. Foreign currency translation contributed approximately \$2 million to the increase in sales compared to the prior year period. The increase in sales compared to the same period last year was primarily due to new installed sound product introductions, higher JBL Professional sales to major US retailers and recently introduced digital consoles from Soundcraft and Studer.

Gross Profit

Gross profit as a percentage of net sales decreased 6.9 percentage points to 27.9 percent for the quarter ended September 30, 2007 compared to 34.8 percent of sales in the same period last year. The decrease was due to lower margins in our Automotive and Consumer business segments.

Presented below is a summary of our gross profit by reporting segment:
