QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2014

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 1-11263

EXIDE TECHNOLOGIES

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

23-0552730

(I.R.S. Employer Identification Number)

13000 Deerfield Parkway,

Building 200

Milton, Georgia

(Address of principal executive offices)

(678) 566-9000

(Registrant's telephone number, including area code)

30004

(Zip Code)

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: EXIDE TECHNOLOGIES - Form 10-Q

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

As of August 4, 2014, 79,077,274 shares of common stock were outstanding.

EXIDE TECHNOLOGIES AND SUBSIDIARIES
DEBTOR-IN-POSSESSION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) PROCEEDINGS UNDER CHAPTER 11 OF THE BANKRUPTCY CODE

Reorganization under Chapter 11 of the U.S. Bankruptcy Code

The Consolidated Financial Statements include the accounts of Exide Technologies (referred to together with its subsidiaries, unless the context requires otherwise, as "Exide" or the "Company") and all of its majority-owned subsidiaries. Unless otherwise indicated or unless the context otherwise requires, references to "fiscal year" refer to the period ended March 31 of that year (e.g. "fiscal 2015" refers to the period beginning April 1, 2014 and ending March 31, 2015).

On June 10, 2013 ("Petition Date"), Exide Technologies ("Debtor") filed a voluntary petition for relief ("Chapter 11 Case") under Chapter 11 of the United States Bankruptcy Code ("Bankruptcy Code" or "Chapter 11"), in the United States Bankruptcy Court for the District of Delaware ("Bankruptcy Court") under the caption In re Exide Technologies, case number 13-11482. The Company's subsidiaries, foreign and domestic, have been excluded from the Chapter 11 Case, continue to operate their businesses without supervision from the Bankruptcy Court, and are not subject to the requirements of the Bankruptcy Code.

The Company filed for reorganization under Chapter 11 as it offered the most efficient alternative to restructure the Company's balance sheet and access new working capital while continuing to operate in the ordinary course. Factors leading to the reorganization included the Company's significant debt burden, the adverse impact of economic conditions on the Company's markets, particularly the U.S. and European markets, ongoing competitive pressures, loss of key customers over several years, the unplanned production shut down of one of the Company's facilities, and higher commodity costs including lead and purchased spent batteries. These factors contributed to higher costs and lower revenues and have resulted in significant operating losses and material adverse reductions in cash flows, severely affecting the Company's financial condition and its ability to make debt payments coming due. Downgrades of the Company's credit rating and loss of credit insurance used by certain suppliers adversely affected supplier trade credit terms, further impacting the Company's liquidity.

Exide is currently operating as a Debtor-in-Possession ("DIP") under the jurisdiction of the Bankruptcy Court and the applicable provisions of the Bankruptcy Code. In general, as a DIP, Exide is authorized to continue to operate as an ongoing business but may not engage in transactions outside the ordinary course of business without the prior approval of the Bankruptcy Court.

Exide received Bankruptcy Court approval for, among other things, access to a \$500.0 million DIP financing facility ("DIP Credit Facility") on the terms set forth in the Amended and Restated Superpriority Debtor-in-Possession Credit Agreement ("DIP Credit Agreement"), the ability to pay pre-petition and post-petition employee wages, salaries and benefits, and to honor customer warranty, sales returns and rebate obligations. Subsequent to the Petition Date, the Company received approval from the Bankruptcy Court to pay or otherwise honor certain pre-petition obligations generally designed to stabilize the Company's operations including employee obligations, taxes, and from limited available funds, pre-petition claims of certain critical vendors, certain customer programs, limited foreign supplier obligations, adequate protection payments, and certain other pre-petition claims. Additionally, the Company has been paying and intends to continue to pay undisputed post-petition obligations in the ordinary course of business.

The DIP Credit Facility is used to supplement cash flows from operations during the reorganization process including the payment of post-petition ordinary course trade and other payables, the payment of certain permitted pre-petition claims, working capital needs, letter of credit requirements, and other general corporate purposes. The DIP Credit Facility contains certain financial covenants. Failure to maintain compliance with these covenants would result in an event of default which would restrict the availability of funds necessary to maintain the Company's operations and assist in funding the Company's reorganization plans.

The Chapter 11 petition triggered defaults on substantially all debt obligations of the Company and, as a result, the Company's senior secured notes and convertible notes have been accelerated and are due and payable. Under Section

362 of the Bankruptcy Code, actions to collect pre-petition indebtedness, as well as most other pending litigation, are stayed. Absent an order of the Bankruptcy Court, substantially all pre-petition liabilities are subject to settlement under a plan of reorganization approved by the Bankruptcy Court. There can be no assurance that a plan will be proposed by the Company or confirmed by the Bankruptcy Court or that any such plan will be successfully implemented.

On August 9, 2013, the Company filed with the Bankruptcy Court schedules and statements of financial affairs setting forth, among other things, the assets and liabilities of the Company as shown by the Company's books and records on the petition date, subject to the assumptions contained in certain notes filed in connection therewith. The schedules and statements of financial affairs are subject to further amendment or modification. On September 13, 2013, the Bankruptcy Court entered an

order which, among other things, established October 31, 2013, as the general bar date for filing claims and December 9, 2013 as the bar date for claims by certain governmental authorities. The claims bar date order was supplemented by a further order on October 24, 2013 extending the bar date to January 31, 2014 solely with respect to personal injury claims related to the Company's secondary lead recycling facility in Vernon, California. As the distribution to holders of allowed claims will likely be addressed by a plan of reorganization that has not yet been filed, the amount of distribution with respect to allowed claims is not presently ascertainable.

At this time it is not possible to predict the ultimate effect of the Chapter 11 reorganization on our business, various creditors and security holders, or when it may be possible to emerge from Chapter 11. The Company believes that under any reorganization plan the Company's common stock would likely be substantially diluted or canceled in its entirety. Accordingly, the Company urges that caution be exercised with respect to existing and future investments in any of these securities or other Company claims. In addition, the Company's common stock has been delisted from trading on the Nasdaq Stock Market ("NASDAQ"). Further, it is also expected that the Company's senior secured notes and convertible notes will suffer substantial impairment.

The Consolidated Financial Statements have been prepared on a going concern basis, which assumes continuity of operations and realization of assets and satisfaction of liabilities in the ordinary course of business. The ability of the Company to continue as a going concern is predicated upon, among other things, the confirmation of a reorganization plan, compliance with the provisions of the DIP Credit Agreement, the ability of the Company to generate cash flows from operations, and where necessary, obtaining financing sources sufficient to satisfy future obligations. As a result of the Chapter 11 filing, and consideration of various strategic alternatives, including possible assets sales, the Company expects that any reorganization plan will likely result in material changes to the carrying amount of assets and liabilities in the Consolidated Financial Statements. Given this uncertainty there is substantial doubt about our ability to continue as a going concern.

The Consolidated Financial Statements do not include adjustments, if any, to reflect the possible future effects on the recoverability and classification of recorded assets or the amounts and classifications of liabilities that may result from the outcome of these uncertainties.

Reorganization Costs:

Reorganization items included in the Consolidated Financial Statements included costs directly related to the Chapter 11 proceedings, as follows:

	Three Months Ended	
	June 30, 2014	June 30, 2013
	(In thousands)	
Professional fees	\$17,604	\$24,033
Write off debt financing costs/other	—	12,106
Other direct costs	—	3,399
Total	\$17,604	\$39,538

Liabilities Subject To Compromise:

The amounts of the various liabilities that are subject to compromise are set forth below. These amounts represent the Company's estimate of known or potential pre-petition claims to be resolved in connection with the Chapter 11 proceedings. Such claims remain subject to future adjustments which may result from: (i) negotiations; (ii) actions of the Bankruptcy Court; (iii) disputed claims; (iv) rejection of executory contracts and unexpired leases; (v) the determination as to the value of any collateral securing claims; (vi) proofs of claim; or (vii) other events. Such future adjustments will likely be material. Liabilities subject to compromise included the following:

	June 30, 2014	March 31, 2014
	(In thousands)	
Debt	\$787,702	\$788,376
Accrued interest	26,352	10,515
Accounts payable	73,370	72,275
Retirement obligations	52,861	52,864
Restructuring reserve	6,785	7,274
Other accrued liabilities	18,663	19,339
Total	\$965,733	\$950,643

While operating as a DIP under Chapter 11 of the Bankruptcy Code, the Debtor may sell, otherwise dispose of, or liquidate assets, or settle liabilities, subject to the approval of the Bankruptcy Court or otherwise as permitted in the ordinary course of business, in amounts other than those reflected in the Consolidated Financial Statements.

Moreover, a plan of reorganization could materially change the amounts and classifications of assets and liabilities in the historical Consolidated Financial Statements.

Basis of Presentation

The Consolidated Financial Statements are presented in accordance with the requirements of Form 10-Q and, consequently, do not include all of the disclosures normally required by U.S. generally accepted accounting principles ("GAAP") or those disclosures normally made in the Company's annual report on Form 10-K. Accordingly, the reader of this Form 10-Q should refer to the Company's annual report on Form 10-K for the fiscal year ended March 31, 2014 for further information.

The financial information has been prepared in accordance with the Company's customary accounting practices. In the Company's opinion the accompanying Consolidated Financial Statements include all adjustments of a normal recurring nature necessary for a fair statement of the results of operations, comprehensive loss, financial position, and cash flows for the periods presented. This includes accounting and disclosures related to any subsequent events occurring from the balance sheet date through the date the Consolidated Financial Statements were issued.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). This update represents a new comprehensive revenue recognition model to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance will be effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The guidance will be applied with a full retrospective or modified retrospective approach. The Company will adopt this standard in the first quarter ending June 30, 2017. The Company does not expect the standard to have a material impact on the Company's consolidated financial position or results of operations.

Table of Contents

(2) DEBTOR'S FINANCIAL STATEMENTS

The financial statements reflect the results of operations, financial position, and cash flows of the Debtor only, including certain amounts and activities between Debtor and non-Debtor subsidiaries of the Company, which were eliminated in the Consolidated Financial Statements.

(In thousands)						
As of June 30, 2014:						
Gross amount	\$917	\$61,564	\$14,003	\$107,923	\$26,051	\$210,458
Accumulated amortization—	—	—	(11,230)	(45,441)	(13,107)	(69,778)
Total	\$917	\$61,564	\$2,773	\$62,482	\$12,944	\$140,680
As of March 31, 2014:						
Gross amount	\$916	\$61,532	\$13,996	\$107,993	\$26,030	\$210,467
Accumulated amortization—	—	—	(10,961)	(44,349)	(12,776)	(68,086)
Total	\$916	\$61,532	\$3,035	\$63,644	\$13,254	\$142,381

Amortization of intangible assets for both the three months ended June 30, 2014 and 2013 was \$1.7 million, respectively. Excluding the impact of any future acquisitions, if any, the Company anticipates annual amortization of intangible assets for each of the next five years to be approximately \$6.4 million. Intangible assets have been recorded at the legal entity level and are subject to foreign currency fluctuation.

(5) INVENTORIES

Inventories, valued using the first in, first out method, consisted of the following:

	June 30, 2014 (In thousands)	March 31, 2014
Raw materials	\$104,601	\$94,694
Work-in-process	130,529	115,731
Finished goods	295,765	272,793
Total	\$530,895	\$483,218

(6) OTHER NONCURRENT ASSETS

Other noncurrent assets consisted of the following:

	June 30, 2014 (In thousands)	March 31, 2014
Deposits (a)	\$3,747	\$4,040
Deferred financing costs	7,745	14,773
Investment in affiliates	540	549
Capitalized software, net	3,624	3,864
Retirement plans	16,917	14,941
Other	10,370	12,503
Total	\$42,943	\$50,670

(a) Deposits principally represent amounts held by beneficiaries as cash collateral for the Company's contingent obligations with respect to certain environmental matters, workers' compensation insurance, and operating lease commitments.

Table of Contents

(7) DEBT

At June 30, 2014 and March 31, 2014 short-term borrowings of \$16.5 million and \$4.1 million, respectively, consisted of borrowings under various operating lines of credit and working capital facilities maintained by certain of the Company's non-U.S. subsidiaries. Certain of these borrowings are collateralized by receivables, inventories, and/or property. These borrowing facilities are typically for one-year renewable terms and generally bear interest at current local market rates plus up to one percent per annum. The weighted average interest rate on short-term borrowings was 7.1% at both June 30, 2014 and March 31, 2014, respectively.

Total long-term debt consisted of the following:

	June 30, 2014 (In thousands)	March 31, 2014
DIP Credit Facility	\$299,692	\$284,625
Other, including capital lease obligations and other loans at interest rates generally ranging up to 7.7% due in installments through 2019	18,899	19,294
	318,591	303,919
Current maturities	(302,983)	(288,386)
Total long-term debt	\$15,608	\$15,533

Total debt, including short-term borrowings, at June 30, 2014 and March 31, 2014 was \$335.1 million and \$308.0 million, respectively.

In connection with the Chapter 11 Case, the Bankruptcy Court has approved the DIP Credit Facility on the terms set forth in the DIP Credit Agreement. The DIP Credit Agreement provides for senior secured super priority DIP financing facilities in an aggregate amount of up to \$500.0 million, consisting of a \$225.0 million senior secured asset based revolving credit facility (the "ABL revolving credit facility"), subject to a borrowing base, and a \$275.0 million "last out" term loan facility. Effective July 12, 2013, the DIP Credit Agreement was amended and restated to provide a \$25.0 million swingline facility sub-limit, as well as the creation of two separate tranches in the \$225.0 million revolver facility: (i) a \$110.0 million facility under which only advances denominated in U.S. Dollars can be drawn; and (ii) a \$115.0 million facility under which advances denominated in U.S. Dollars or Euros can be drawn.

Effective July 24, 2013, the DIP Credit Agreement was amended to permit an increase in the quarterly maximum capital expenditure limits of \$25.0 million by \$2.5 million should the preceding quarter's EBITDA exceed 110.0% of the DIP budget, with the rolling four quarter maximum capital expenditures increased to \$90.0 million for the four quarters ending after March 31, 2014.

Effective October 9, 2013, a second amendment provided additional flexibility to the Company with regard to certain non-core asset transactions and further clarified certain terms of the DIP Credit Agreement. The second amendment revised the definition of "Permitted Liens" to permit contractual encumbrances in connection with certain permitted dispositions under the DIP Credit Agreement. The second amendment further changed the definition of cumulative total adjusted operating cash flows to exclude the effect of Frisco Escrow Account receipts from cumulative total adjusted operating cash flows.

Effective May 28, 2014, the Company entered into the third amendment to the DIP Credit Agreement, which, among other things, extended to June 30, 2014 the milestone for the Company to file a plan of reorganization with the Bankruptcy Court. The third amendment increased the quarterly and rolling four quarter capital expenditure limits from \$25.0 million and \$90.0 million to \$36.0 million and \$120.0 million, respectively. The third amendment also excluded from the definition of "Capital Expenditure" expenditures made in connection with the replacement, substitution, restoration or repair of assets funded through the receipt of insurance proceeds or other compensation awards paid on account of a casualty loss. Finally, the third amendment increased the European factoring basket to Euro 100.0 million from Euro 75.0 million and expanded the subsidiaries whose receivables can be factored to include subsidiaries domiciled in Belgium, Denmark, Finland, Luxembourg, the Netherlands, Norway, and Sweden.

Effective June 27, 2014, the Company entered into the fourth amendment to the DIP Credit Agreement, which extended to July 31, 2014 the deadline for filing a plan of reorganization and eliminating the milestone related to soliciting acceptance of the plan of reorganization. The fourth amendment also increased to \$85.0 million from \$75.0 million the letters of credit sublimit.

Also, effective on June 27, 2014, the Company entered into the fifth amendment to the DIP Credit Agreement, which, among other things, extended to August 15, 2014 the date by which the Company is required to deliver annual audited financial statements and the related Compliance Certificate for the fiscal year of the Company ended March 31, 2014.

Table of Contents

On July 22, 2014, the Company entered into the sixth amendment to the DIP Credit Agreement, which, among other things, sought to modify the DIP Credit Agreement as follows:

eliminate restrictions on capital expenditures, modify the definition of EBITDA and adjust the minimum EBITDA covenant to include the period October through November 2014 and address lower anticipated earnings through the end of calendar 2014;

- extend the maturity date of the loans made under the DIP Credit Agreement to December 31, 2014 ("the Extension Amendment") effective upon the satisfaction of certain conditions, including, among other things, the Company and members of the Unofficial Committee of Senior Secured Noteholders ("UNC") holding a majority in principal amount of the Company's Senior Secured Notes entering into a customary plan support agreement with respect to an Acceptable Plan of Reorganization, as that term is defined in the amended DIP Credit Agreement; and

provide for \$60.0 million in additional term loan financing (the "Upsizing Amendment"), which will be funded pursuant to a commitment letter executed by certain members of the Unofficial Committee of Senior Secured Noteholders ("UNC") to provide additional term loan financing with net cash proceeds of \$60.0 million, subject to satisfaction of certain conditions including approval by the Bankruptcy Court.

On July 28, 2014, the Bankruptcy Court entered an order approving the Upsizing Amendment.

On July 25, 2014, the Company entered into the seventh amendment to the DIP Credit Agreement, which eliminated the milestone related to filing a plan of reorganization.

On June 30, 2014, the Company received a non-binding POR Proposal from the UNC, whose members hold a substantial majority of the term loan component of the DIP Credit Facility and pre-petition senior secured notes. The POR Proposal, which is subject to completion of definitive documentation and certain other conditions, including the resolution of matters relating to certain of the Company's environmental obligations in a manner satisfactory to the UNC, provides approximately \$485.0 million in new capital, and is currently expected to be comprised of the following:

A preferred convertible equity capital commitment of approximately \$300.0 million (a portion of which will be in the form of a rights offering backstopped by certain members of the UNC and another portion in the form of a direct investment by certain members of the UNC);

• A \$185.0 million term loan or high yield bond issuance also backstopped by certain members of the UNC; and

• An asset based loan facility for which commitments would be obtained from potential lenders in conjunction with the plan confirmation process.

While the Company continues to negotiate the POR Proposal, there can be no assurance at this time that the Company will be able to satisfy the conditions to the POR Proposal.

The maturity date of the loans made under the DIP Credit Agreement is the earliest to occur: (i) the date occurring 16 months following the closing date or December 31, 2014, assuming satisfaction of certain conditions in the sixth amendment to the DIP Credit Agreement including entering into a customary plan support agreement with respect to an Acceptable Plan of Reorganization; (ii) the effective date of the Debtor plan of reorganization; or (iii) the acceleration of such loans. The revolving loans bear interest at the rate of LIBOR plus 3.25% and the term loan bears interest at a rate of 9.0%. The obligations of the Borrowers under the DIP Credit Agreement are unconditionally guaranteed by certain material foreign subsidiaries. In addition, the U.S. Borrower unconditionally guarantees the obligations of the Foreign Borrower. Subject to certain exceptions, the obligations of the Borrowers and the guarantors under the DIP Credit Agreement and the other loan documents are secured by first priority liens on specified assets of the Borrowers and the foreign guarantors and 100.0% pledge of equity interests of certain of the Borrowers' direct and indirect subsidiaries. The DIP Credit Agreement required the Borrowers to comply with financial covenants as defined by the agreement relating to minimum liquidity, cumulative total adjusted operating cash flows, minimum cumulative EBITDA, and minimum twelve month trailing EBITDA.

Events of default under the DIP Credit Agreement include, among other things, failure to pay any principal, interest or other amounts due under the applicable credit agreement, breach of specific covenants, and a change of control of the Company. Upon an event of default, the requisite lenders may declare the outstanding obligations under the DIP Credit Agreement to be immediately due and payable and exercise other rights and remedies provided for thereunder.

(8) INTEREST EXPENSE, NET

Interest income of \$0.1 million and \$0.3 million was included in interest expense, net for the three months ended June 30, 2014 and 2013, respectively.

Table of Contents

(9) OTHER EXPENSE, NET

Other expense, net consisted of the following:

	Three Months Ended	
	June 30, 2014	June 30, 2013
	(In thousands)	
Currency remeasurement loss (a)	\$688	\$5,609
Other	8	(444)
Total	\$696	\$5,165

(a) The currency remeasurement loss related primarily to intercompany loans to foreign subsidiaries denominated in Euros, Australian dollars, and various other foreign currencies.

(10) EMPLOYEE BENEFITS

The following tables set forth the plans' expenses recognized in the Company's Consolidated Financial Statements:

	Pension Benefits	
	Three Months Ended	
	June 30, 2014	June 30, 2013
	(In thousands)	
Components of net periodic benefit cost:		
Service cost	\$528	\$556
Interest cost	7,221	7,075
Expected return on plan assets	(7,839)	(7,524)
Amortization of:		
Prior service cost	17	16
Actuarial loss	753	780
Net periodic benefit cost	\$680	\$903

	Other Post-Retirement Benefits	
	Three Months Ended	
	June 30, 2014	June 30, 2013
	(In thousands)	
Components of net periodic benefit cost:		
Service cost	\$196	\$193
Interest cost	210	248
Amortization of:		
Prior service cost	(123)	(122)
Actuarial loss	87	170
Net periodic benefit cost	\$369	\$489

The estimated fiscal 2015 pension plan and other post-retirement plan contributions are \$22.4 million and \$1.7 million, respectively. The Company funded \$4.9 million during three months ended June 30, 2014.

(11) COMMITMENTS AND CONTINGENCIES

Private Party Lawsuits and other Legal Proceedings

In 2003, the Company served notices in the U.S. Bankruptcy Court for the District of Delaware to reject certain executory contracts with EnerSys, which the Company contended were executory, including a 1991 Trademark and Trade Name License Agreement (the "Trademark License"), pursuant to which the Company had licensed to EnerSys use of the "Exide" trademark on certain industrial battery products in the United States and 80 foreign countries. EnerSys objected to the rejection of certain of those contracts, including the Trademark License. In 2006, the Bankruptcy Court granted the Company's request to reject

certain of the contracts, including the Trademark License. EnerSys appealed those rulings. On June 1, 2010, the Third Circuit Court of Appeals reversed the Bankruptcy Court ruling, and remanded to the lower courts, holding that certain of the contracts, including the Trademark License, were not executory contracts and, therefore, were not subject to rejection. On August 27, 2010, acting on the Third Circuit's mandate, the Bankruptcy Court vacated its prior orders and denied the Company's motion to reject the contracts on the grounds that the agreements are not executory. On September 20, 2010, the Company filed a complaint in the Bankruptcy Court seeking a declaratory judgment that EnerSys did not have enforceable rights under the Trademark License under Bankruptcy Code provisions which the Company believed are relevant to non-executory contracts. EnerSys filed a motion to dismiss that complaint, which the Bankruptcy Court granted on January 8, 2013.

On June 7, 2013, EnerSys Delaware Inc., formerly known as EnerSys, Inc. filed suit against the Company in the Court of Chancery for the State of Delaware seeking an accounting and restitution for alleged benefits received by the Company and alleged losses incurred by EnerSys allegedly as the result of the granting by the 2002 Bankruptcy Court in 2006 of an Order which allowed the Company to reject the Trademark License and use the licensed "Exide" trademark for Industrial battery products and the 2002 Bankruptcy Court's subsequent August 2010 Order vacating the 2006 Order and denying the Company's request to reject the Trademark License. On June 10, 2013, the Company filed a voluntary petition for reorganization pursuant to Chapter 11 of the U.S. Bankruptcy Code in the District of Delaware, and the suit filed by EnerSys Delaware Inc. was automatically stayed pursuant to Section 362(a)(1) of the Bankruptcy Code.

On April 15, 2013, David M. Loritz filed a purported class action lawsuit against the Company, James R. Bolch, Phillip A. Damaska, R. Paul Hirt, Jr., and Michael Ostermann alleging violations of certain federal securities laws. On May 3, 2013, Trevor Knopf filed a nearly identical complaint against the same named defendants in the same court. These cases were filed in the United States District Court for the Central District of California purportedly on behalf of purchasers of the Company's stock between February 9, 2012 and April 3, 2013. On June 4, 2013, James Cassella and Sandra Weitsman filed a substantially similar action in the same court, purportedly on behalf of those who purchased the Company's stock between June 1, 2011 and April 24, 2013, against the Company, Messrs. Bolch, Damaska, Hirt, and Louis E. Martinez. On July 9, 2013, Judge Stephen V. Wilson consolidated these cases under the *Loritz v. Exide Technologies, Inc.* caption, lead docket number 2:13-02607-SVW-E, and appointed Sandra Weitsman and James Cassella Lead Plaintiffs of the putative class of former Exide stockholders. Judge Wilson ordered Lead Plaintiffs to file their consolidated amended complaint on or before August 23, 2013. On July 17, 2013, Lead Plaintiffs voluntarily dismissed their claims against the Company, without prejudice, to re-file at a future date. Lead Plaintiffs have indicated that they intend to pursue their claims against the individual defendants during the pendency of Exide's bankruptcy and may seek to reinstate their claims against the Company when it emerges from bankruptcy. On September 6, 2013, pursuant to an order extending the previous deadline, Lead Plaintiffs filed their Consolidated Amended Complaint, naming as defendants Messrs. James R. Bolch, Phillip A. Damaska, R. Paul Hirt, Jr., Louis E. Martinez, John P. Reilly, Herbert F. Aspbury, Michael R. D'Appolonia, David S. Ferguson, John O'Higgins, and Dominic J. Pilleggi. Lead Plaintiffs did not name Mr. Ostermann as a defendant in the Consolidated Amended Complaint. In the Consolidated Amended Complaint Lead Plaintiffs purport to state claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 on behalf of purchasers of the Company's stock during the period June 1, 2011 and May 24, 2013. In addition, Lead Plaintiffs purport to state claims under Sections 10(b) and 20(a) of the Securities Exchange Act and Sections 11 and 15 of the Securities Act of 1933 on behalf of purchasers of the Company's senior secured notes during the period August 8, 2011 through May 24, 2013. Lead Plaintiffs allege that certain public statements made by the Company and its officers during these periods were materially false and misleading. The Consolidated Amended Complaint does not specify an amount of damages sought. Defendants deny all allegations against them and intend to vigorously pursue their defense. Defendants moved to dismiss all claims against them and, on December 19, 2013, Judge Wilson granted defendants' motion to dismiss in its entirety, without prejudice. Judge Wilson gave Lead Plaintiffs leave to file their Consolidated Second Amended Complaint on or before January 30, 2014. On January 30, 2014, Lead Plaintiffs filed their Consolidated Second Amended Complaint, which is nearly identical in every material respect to the Consolidated Amended Complaint. The Consolidated Second Amended Complaint does not specify an amount of damages sought. On February 13, 2014, Defendants filed their Motion to Dismiss the Consolidated Second Amended Complaint. On August 11, 2014, Judge Wilson entered an order dismissing Plaintiffs' Section 15 claim against R. Paul Hirt, Jr., former Executive Vice President and President

of Exide Americas, but denying the remainder of Defendants' motion to dismiss. Discovery in this litigation will now proceed and it is expected to continue through the remainder of 2014. No trial date has been set in this matter. Defendants deny all allegations against them and intend to vigorously pursue their defense.

The Company's Netherlands subsidiary, Exide Technologies B.V. ("BV"), received notice from the Dutch competition authorities that it was the subject of an investigation of a local trade association's members in the traction/Motive Power batteries segment. On July 9 and July 16, 2013, the authorities conducted an on-site inspection and requested additional information and documentation, which the Company has provided. In December 2013, the Company submitted to the Dutch Competition Authority (the "ACM") a leniency application for immunity or reduction of fines that might be imposed as a result of the investigation. The Company was recently notified by the ACM of a provisional grant of leniency in respect of certain conduct and that the Company did not receive provisional leniency for certain other conduct. As required under the ACM's

Table of Contents

leniency program, the Company continues to cooperate with the Dutch authority. The ACM has not issued a statement of charges to the Company or its subsidiaries. Accordingly, the precise scope and time period at issue, as well as the final outcome of the Netherlands investigation, remains uncertain.

In connection with BV's cooperation with the above-described investigation, the Company discovered activities also in different segments of its Industrial Energy division in Austria, Belgium and Germany that appeared to have occurred in prior years that did not conform to the Company's internal policies. Upon discovery of these facts, the Company commenced an internal investigation led by independent outside counsel. While a majority of the activities had ceased prior to the initiation of the internal investigation, the Company promptly stopped any remaining ongoing conduct. The Company brought the matter to the attention of the appropriate competition authorities, and, in all affected jurisdictions, the Company has been cooperating with them in further information gathering. As a result of this action, the Company has been granted conditional immunity by regulators in Austria, Germany and Belgium. Additionally, the authority in Austria has decided that the actions would likely have fallen outside any applicable statute of limitations period and the authority has advised that it does not intend to pursue an investigation at this stage. The grants of immunity in Belgium and Germany, which are conditioned on factors that include the Company's continued cooperation with authorities, should eliminate any governmental fines and penalties that could result if the reported conduct is found to violate applicable law in such jurisdictions. Should immunity be revoked, these investigations could result in significant penalties.

Further, even with the grants of conditional immunity in Austria, Germany, and Belgium, the Company might be subject to disputes with private parties concerning alleged damages that are claimed to be a result of the Company's prior conduct. While the Company believes it would have defenses to any adverse allegations in private actions and would intend to vigorously defend itself in any such actions, litigation of this type is inherently uncertain, costly, and complex, and the Company cannot be certain that it would prevail. Accordingly, there can be no assurance that the outcome of the Netherlands investigation or any private party disputes would not have a material adverse affect on the business, financial condition, cash flows, and results of operations of the Company, despite the fact the Company has been granted conditional immunity in Austria, Germany, and Belgium, and continues to cooperate with the applicable regulatory authorities.

On August 8, 2014, the Company received a grand jury subpoena from the Department of Justice in the Central District of California in connection with a criminal investigation involving its Vernon, California recycling facility. The subpoena requests the production of documents relating to materials transportation and air emissions. The Company was informed that it and certain unidentified individuals are targets of the investigation. The Company will cooperate with the investigation. We cannot estimate the amount or range of loss, if any, in this matter, as such analysis would depend on facts and law that are not yet fully developed or resolved.

Environmental Matters

As a result of its multinational manufacturing, distribution and, recycling operations, the Company is subject to numerous federal, state, and local environmental, occupational health, and safety laws and regulations, as well as similar laws and regulations in other countries in which the Company operates (collectively, "EH&S laws"). The Company is exposed to liabilities under such EH&S laws arising from its past handling, release, storage, and disposal of materials now designated as hazardous substances and hazardous wastes. The Company previously has received notification from the EPA, equivalent state and local agencies or others alleging or indicating that the Company is or may be responsible for performing and/or investigating environmental remediation, or seeking the repayment of the costs spent by governmental entities or others performing investigations and/or remediation at certain U.S. sites under the Comprehensive Environmental Response, Compensation and Liability Act or similar state laws.

The Company monitors and responds to inquiries from the EPA, equivalent state and local agencies and others at approximately 50 federally defined Superfund or state equivalent sites. While the ultimate outcome of the environmental matters described in this paragraph is uncertain due to several factors, including the number of other parties that may also be responsible, the scope of investigation performed at such sites and the remediation alternatives pursued by such federal and equivalent state and local agencies, the Company presently believes any liability for these matters, individually and in the aggregate, will not have a material adverse affect on the Company's

financial condition, cash flows or results of operations.

The Company is also involved in the assessment and remediation of various other properties, including certain currently and formerly owned or operating facilities. Such assessment and remedial work is being conducted pursuant to applicable EH&S laws with varying degrees of involvement by appropriate regulatory authorities. In addition, certain environmental matters concerning the Company are pending in various courts or with certain environmental regulatory agencies with respect to these currently or formerly owned or operating locations. In particular, the Company's Vernon, California recycling facility is currently unable to comply with certain recently enacted regulations, and may not resume operations until the installation of certain equipment is completed in the fourth quarter of fiscal 2015 should the Company decide to proceed. Additionally, proposed legislation in California would require regulatory authorities to make a final determination on the Company's application for a permanent hazardous waste permit by December 31, 2015. If such legislation is enacted, the Company is

Table of Contents

uncertain whether it would be able to obtain such permit. The ultimate outcome of the environmental matters described in this paragraph is uncertain, and the Company's failure to timely resume operations at the Vernon plant or obtain a permanent operating permit would have a material adverse affect on the Company's financial condition, cash flows or results of operations.

On April 12, 2013, the Company was served with a notification of violation and 60 day intent to sue regarding the Company's Vernon, California facility from the California Communities Against Toxics (CCAT). CCAT alleges the Company violated the warning requirement of the State of California's Proposition 65, the Safe Drinking Water and Toxic Enforcement Act, regarding alleged community exposure to the chemical, 1,3-butadiene. Following the Company's Chapter 11 bankruptcy filing, CCAT submitted a Proof of Claim in the Bankruptcy Court. The matter remains pending in the Bankruptcy Court.

On May 28, 2013, the Company was served with a Notice of Intent to Sue by CCAT pursuant to the federal Resource Conservation and Recovery Act (RCRA)'s citizens suit provision at 42 USC Section 6972, alleging that the Company has created an imminent and substantial endangerment to health and the environment in and around the Company's Vernon, California facility. Following the Company's Chapter 11 bankruptcy filing, CCAT submitted a Proof of Claim in the Bankruptcy Court. The matter remains pending in the Bankruptcy Court.

On March 26, 2014, the Company was served with a Proposition 65 notification of violation and 60 day intent to sue regarding the Vernon, California facility from Shefa LMV LLC (Shefa). Shefa alleges that Exide failed to warn the community regarding chemical exposures, and further alleges that Exide has released chemicals into a source of drinking water. The Company is evaluating the claim.

On April 25, 2013, Zach Hernandez filed a purported class action lawsuit in the California Superior Court for the County of Los Angeles against the Company and Does 1-100 seeking damages and medical monitoring for an alleged class consisting of all Los Angeles County residents who allegedly have sustained physical or neurological injury or toxic exposure allegedly as the result of the release of allegedly hazardous waste or chemicals from the Company's facility located in Vernon, California. On June 10, 2013, the Company filed a voluntary petition for reorganization pursuant to Chapter 11 of the U.S. Bankruptcy Code in the District of Delaware, and the case is stayed.

On October 18, 2013, the South Coast Air Quality Monitoring District ("SCAQMD") filed a petition seeking the suspension of operations at the Vernon facility for alleged violation of an SCAQMD rule and related furnace control equipment permit conditions until compliance is achieved. The Company contested the SCAQMD's petition. A hearing on the SCAQMD's petition commenced on December 14, 2013 and continued into calendar 2014.

On April 11, 2014, as a result of the Vernon facility allegedly exceeding the SCAQMD ambient air standard for lead, the SCAQMD filed a second petition seeking an order that Exide "cease and desist" from violating air quality standards, or in the alternative, to comply with other such conditions and increments of progress which the SCAQMD Hearing Board deems appropriate.

On January 10, 2014, the SCAQMD adopted an amended rule that contained new emissions and equipment requirements with varying compliance dates, including an April 10, 2014 deadline that would require the Company to operate the furnaces at the Vernon facility under continuous "negative pressure" ("Rule 1420.1"). In response, the Company initiated two separate related proceedings on February 7, 2014: (i) a Petition for Variance before the SCAQMD Hearing Board, requesting a delay of the negative pressure requirement until December 31, 2014, and (ii) a Writ of Mandamus in Superior Court of Los Angeles County, seeking to invalidate the negative pressure requirement of Rule 1420.1. Additionally, on February 21, 2014, the Company filed a request for a preliminary injunction that would temporarily suspend the April 10, 2014 deadline until such time as the Superior Court could conduct a trial on the Writ of Mandamus.

On April 7, 2014, the Los Angeles County Superior Court denied the Company's preliminary injunction. Additionally, on April 8, 2014, the SCAQMD Hearing Board denied the Company's variance request. As a result of these two decisions, the Company suspended operations at the Vernon facility until such time as the Company can design, engineer, permit, install, and test new equipment needed to achieve the new standard under Rule 1420.1.

On July 10, 2014 the SCAQMD Hearing Board approved a resolution of the Company's pending administrative matters with the SCAQMD through the issuance of two Orders for Abatement ("Stipulated OAs"). The Stipulated OAs require the Company: (i) to refrain from resuming operations of the Vernon facility furnaces until it installs

certain air quality control improvements required to comply with the newly adopted Rule 1420.1 standards in accordance with SCAQMD issued permits and applicable SCAQMD rules; and (ii) to install those improvements in accordance with an SCAQMD approved dust mitigation plan. Concurrently, in a settlement agreement, the Company agreed to dismiss its Writ of Mandamus legal action. The Company currently estimates the full operation of the furnaces under continuous negative pressure will not occur until after installation of the aforesaid equipment expected to be completed in the fourth quarter of fiscal 2015 should the Company decide to proceed.

Table of Contents

On January 16, 2014, the Company and unnamed individuals (“DOE Defendants”), were named as defendants in a civil lawsuit brought by the SCAQMD in the case captioned as People of the State of California, ex rel South Coast Air Quality Management District, a Public Entity v. Exide Technologies, Inc., and DOE Defendants 1 through 50. The SCAQMD alleges that the Company and the DOE Defendants failed to comply with several of the SCAQMD's rules related to operation of equipment or lead and arsenic emissions at the Company's Vernon, California lead recycling facility. The SCAQMD is seeking penalties in an amount not less than \$40.0 million. The Company denies the allegations in the lawsuit and intends to vigorously defend itself against such allegations. The matter is just entering the discovery stage and the SCAQMD is amending its complaint to add additional factual allegations and causes of action, but seeks the same magnitude of penalties.

On May 22, 2014, the Federal Environmental Protection Agency (“EPA”) served a Finding and Notice of Violation (“Federal NOV”) on Exide, alleging that Exide violated air quality standards for lead at various times in 2013 and 2014; the alleged violations are duplicative of those cited by the South Coast Air Quality Management District in its penalty action. EPA seeks civil penalties for these alleged violations. An initial conference was convened with the EPA on June 30, 2014 and discussions continue regarding a resolution to the notice.

On September 24, 2013, the Company received a Notice of Enforcement issued by the Texas Commission on Environmental Quality (“TCEQ”) for alleged violations related to the compliance of its site in its Frisco, Texas, a former recycling facility, with Industrial Solid Waste and Municipal Hazardous waste requirements. The Company reasonably believes the proceeding may result in monetary sanctions to be paid to TCEQ in excess of \$0.1 million. The Company has established liabilities for on-site and off-site environmental remediation costs where such costs are probable and reasonably estimable and believes that such liabilities are adequate. As of June 30, 2014 and March 31, 2014, the amount of such liabilities on the Company's Consolidated Balance Sheets was approximately \$25.1 million and \$25.5 million, respectively. Because environmental liabilities are not accrued until a liability is determined to be probable and reasonably estimable, not all potential future environmental liabilities have been included in the Company's environmental liabilities. Therefore, changes in estimates or future findings could have a material adverse effect on the Company's financial condition, cash flows, or results of operations.

The sites that currently have the largest environmental reserves include the following:

Tampa, Florida

The Tampa site is a former secondary lead recycling plant, lead oxide production facility, and sheet lead-rolling mill that operated from 1943 to 1989. Under a RCRA Part B Closure Permit and a Consent Decree with the State of Florida, Exide is required to investigate and remediate certain historic environmental impacts to the site. Cost estimates for remediation (closure and post-closure) are expected to range from \$13.0 million to \$20.0 million depending on final State of Florida requirements. The remediation activities are expected to occur over the course of several years.

Columbus, Georgia

The Columbus site is a former secondary lead recycling plant that was taken out of service in 1999, but remains part of a larger facility that includes an operating lead-acid battery manufacturing facility. Groundwater remediation activities began in 1988. Costs for supplemental investigations, remediation and site closure are currently estimated at \$6.0 million to \$8.5 million.

Guarantees

At June 30, 2014, the Company had outstanding letters of credit with a face value of \$70.0 million and surety bonds with a face value of \$56.1 million. The majority of the letters of credit and surety bonds have been issued as collateral or financial assurance with respect to certain liabilities that the Company has recorded, including but not limited to environmental remediation obligations and self-insured workers' compensation reserves. Failure of the Company to satisfy its obligations with respect to the primary obligations secured by the letters of credit or surety bonds could entitle the beneficiary of the related letter of credit or surety bond to demand payments pursuant to such instruments. The letters of credit generally have terms up to one year. Collateral held by the surety in the form of letters of credit at June 30, 2014, pursuant to the terms of the agreement, was \$53.9 million.

Certain of the Company's European and Asia Pacific subsidiaries have bank guarantees outstanding as collateral or financial assurance in connection with environmental obligations, income tax claims and customer contract

requirements. At June 30, 2014, bank guarantees with an aggregate face value of \$17.5 million were outstanding.

Table of Contents

(12) INCOME TAXES

The effective tax rate for the three months ended June 30, 2014 and 2013 is (2.3)% and (0.3)%, respectively. The effective tax rate for the three months ended June 30, 2014 included the recognition of taxes on income and losses in almost all of the Company's jurisdictions with the exception of the United States, Spain and the United Kingdom, on which full valuation allowances are recorded.

Valuation allowances have been recognized in the U.S. and certain foreign tax jurisdictions to reduce the deferred tax assets for loss carryforwards and deductible temporary differences for which it is more likely than not that the tax benefits associated with those assets will not be realized. In other jurisdictions (primarily France and Germany), the Company's net deferred tax assets include loss carryforwards and deductible temporary differences which management believes are realizable through future taxable income. Each quarter, the Company reviews the need to report the future realization of tax benefits of deductible temporary differences or loss carryforwards on its Consolidated Financial Statements. All available evidence is considered to determine whether a valuation allowance should be established against these future tax benefits or previously established valuation allowances should be released. This review is performed on a jurisdiction by jurisdiction basis. As global market conditions and the Company's financial results in certain jurisdictions change, the continued release and establishment of related valuation allowances may occur.

The Company files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for years ended before March 31, 2011.

With respect to state and local jurisdictions and countries outside of the United States, with limited exceptions, the Company and its subsidiaries are no longer subject to income tax audits for years ended before March 31, 2007.

Although the outcome of tax audits is always uncertain, the Company believes that adequate amounts of tax, interest and penalties have been provided for any adjustments that could result from these years.

The Company's unrecognized tax benefits did not change during the three months ended June 30, 2014, and remain \$36.0 million. The amount, if recognized, that would affect the Company's effective tax rate at June 30, 2014 is \$32.1 million.

The Company classifies interest and penalties on uncertain tax benefits as income tax expense. At both June 30, 2014 and March 31, 2014, before any tax benefits, the Company had \$1.0 million of accrued interest and penalties on unrecognized tax benefits.

During the next twelve months, the Company does not expect the resolution of any tax audits which could potentially reduce unrecognized tax benefits by a material amount. However, expiration of the statute of limitations for a tax year in which the Company has recorded an uncertain tax benefit will occur in the next twelve months. The removal of this uncertain tax benefit would affect the Company's forecasted annual effective tax rate by \$0.1 million.

(13) RESTRUCTURING AND IMPAIRMENTS, NET

The Company continued to implement operational changes to streamline and rationalize its structure in an effort to simplify the organization and eliminate redundant and/or unnecessary costs. As part of these restructuring programs, the nature of the positions eliminated range from plant employees and clerical workers to operational, sales management, and divisional leadership.

During fiscal 2015, the Company recorded restructuring charges of \$3.3 million, representing \$1.0 million severance and \$2.3 million closure costs. These restructuring charges primarily represent consolidation efforts in the Company's workforce of approximately 10 positions. The impairments related to closed facilities and other asset write offs of \$(0.6) million.

The following summarizes restructuring reserve activity and gain on asset sales/impairments, net:

Table of Contents

	Severance Costs	Closure Costs	Total Restructuring	Gain on Asset Sales / Impairments, net	Total Restructuring / Impairments, net
	(In thousands)				
As of March 31, 2014	\$7,921	\$ 6,714	\$ 14,635		
Expenses	1,046	2,259	3,305	\$(623) \$2,682
Payments and currency translation	(3,743) (627) (4,370)	
	\$5,224	\$ 8,346	\$ 13,570		
Reclassify to liabilities subject to compromise			(6,785)	
As of June 30, 2014			\$6,785		

Remaining expenditures principally represent (i) severance and related benefits payable per employee agreements and/or regulatory requirements, (ii) lease commitments for certain closed facilities, branches and offices, as well as leases for excess and permanently idle equipment payable in accordance with contractual terms, and (iii) certain other closure costs including dismantlement and costs associated with removal obligations incurred in connection with the exit of facilities.

Restructuring and impairments, net by operating segment:

	Three Months Ended		
	June 30, 2014	June 30, 2013	
	(In thousands)		
Transportation Americas	\$208	\$7,339	
Transportation Europe & ROW	(410) (77)
Industrial Energy Americas	51	93	
Industrial Energy Europe & ROW	2,833	1,070	
Unallocated corporate	—	299	
Total	\$2,682	\$8,724	

(14) LOSS PER SHARE

The Company computes basic loss per share by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted loss per share is computed by dividing net loss by diluted weighted average shares outstanding.

Potentially dilutive shares include the assumed exercise of stock options and the assumed vesting of restricted stock and stock unit awards (using the treasury stock method) as well as the assumed conversion of the convertible debt, if dilutive (using the if-converted method).

Due to a net loss for the three months ended June 30, 2014 and 2013 certain potentially dilutive shares were excluded from the diluted loss per share calculation because their effect would be antidilutive. Potentially dilutive shares consisted of the following:

	June 30, 2014	June 30, 2013
	(In thousands)	
Shares associated with convertible debt (assumed conversion)	3,697	3,697
Employee stock options	1,633	2,872
Restricted stock awards (non-vested)	108	1,502
Total	5,438	8,071

(15) FAIR VALUE MEASUREMENTS

The Company used available market information and appropriate methodologies believed to be appropriate to estimate the fair value of its financial instruments. Considerable judgment is required in interpreting market data to develop these estimates. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that

the Company could realize in a current market exchange. Certain of these financial instruments are with major financial institutions and expose the Company to market and credit risks and may at times be concentrated with certain counterparties or groups of counterparties. The creditworthiness of counterparties is continually reviewed and full performance is currently anticipated.

The Company's cash and cash equivalents, accounts receivable, accounts payable, DIP Credit Facility, and short-term borrowings all have carrying amounts that are a reasonable estimate of their fair values. The carrying values and estimated fair values of the Company's long-term obligations and other financial instruments are as follows:

21

Table of Contents

	June 30, 2014		March 31, 2014	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
	(In thousands)			
Asset (Liability):				
Senior secured notes (a)	\$ (734,464)	\$ (437,930)	\$ (734,474)	\$ (560,955)
Convertible senior subordinated notes (a)	(51,900)	(7,915)	(51,900)	(12,988)
Commodity swap / forward (b)	79	79	(1,709)	(1,709)

(a) Classified as liabilities subject to compromise

(b) These financial instruments are required to be measured at fair value, and are based on inputs as described in the three-tier hierarchy that prioritizes inputs used in measuring fair value as of the reported date:

- Level 1 – Observable inputs such as quoted prices in active markets for identical assets and liabilities;
- Level 2 – Inputs other than quoted prices in active markets that were observable either directly or indirectly; and
- Level 3 – Inputs from valuation techniques in which one or more key value drivers were not observable, and must be based on the reporting entity's own assumptions.

The following table represents the Company's financial instruments that are measured at fair value on a recurring basis, and the basis for that measurement:

	Total Fair Value Measurement	Quoted Price in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(In thousands)			
As of June 30, 2014:				
Asset:				
Commodity swap / forward	\$ 79	\$ —	\$ 79	\$ —

As of March 31, 2014:

Liability:

Commodity swap / forward	(1,709)	—	(1,709)	—
--------------------------	----------	---	----------	---

The Company uses a market approach to determine the fair values of all of its derivative instruments subject to recurring fair value measurements. The fair value of each financial instrument was determined based upon observable forward prices for the related underlying financial index or commodity price, and each has been classified as Level 2 based on the nature of the underlying markets in which those derivatives are traded.

(16) SEGMENT INFORMATION

The Company reports its results in four business segments: Transportation Americas; Transportation Europe and Rest of World (“ROW”); Industrial Energy Americas; and Industrial Energy Europe and ROW. The Company is a global producer and recycler of lead-acid batteries. The Company’s four business segments provide a comprehensive range of stored electrical energy products and services for transportation and industrial applications.

Transportation markets include original equipment and aftermarket batteries for cars, trucks, off-road vehicles, agricultural and construction vehicles, motorcycles, recreational vehicles, marine, and other applications. Industrial markets include batteries for Motive Power and Network Power applications. Motive Power batteries are used in the materials handling industry for electric forklift trucks, and in other industries, including floor cleaning machinery, powered wheelchairs, railroad locomotives, mining, and the electric road vehicles market. Network Power batteries

are used for backup power for use with telecommunications systems, computer installations, hospitals, air traffic control, security systems, utility, railway, and military applications.

Table of Contents

The Company's reportable segments are determined based upon the nature of the markets served and the geographic regions in which they operate. The Company's chief operating decision-maker monitors and manages the financial performance of these four business groups. Costs of certain shared services and other corporate costs are not allocated or charged to the business groups.

Selected financial information concerning the Company's reportable segments were as follows:

	Three Months Ended

(17) RELATED PARTY TRANSACTIONS

Robert M. Caruso, the Company's President and Chief Executive Officer, and Edgar W. Mosley, Jr., the Company's Chief Restructuring Officer, are employed by Alvarez & Marsal North America, LLC ("Alvarez & Marsal" or "A&M") as Managing Director and Senior Director, respectively. A&M has been retained by the Company in connection with its Chapter 11 restructuring. Mr. Caruso, who has been associated with A&M since 2006, remains a Managing Director while serving as the Company's President and Chief Executive Officer. Mr. Mosley has been with A&M since 2008, and remains a Senior Director of A&M while serving as the Company's Chief Restructuring Officer. In addition, Mr. Caruso holds a minority equity interest in A&M's parent company which indirectly entitles him to a share of A&M's profits.

Table of Contents

Pursuant to an Agreement dated June 9, 2013, as amended by a Letter Agreement dated July 25, 2013 between the Company and A&M (the "Services Agreement"), the Company retained A&M in connection with its Chapter 11 restructuring. Under the Services Agreement, the Company is charged monthly fees for the services of Messrs. Caruso and Mosley and hourly fees for the services of other temporary personnel of A&M and its affiliates who are providing services to the Company (in an officer capacity or otherwise) and such temporary personnel (including Messrs. Caruso and Mosley) are compensated by A&M independently pursuant to their arrangements with A&M. The Services Agreement also provides for payment of a one-time success fee to A&M as a result of our emergence from Chapter 11. The amount of the success fee could be up to \$1.8 million, at the discretion of the Board of Directors and subject to approval by the U.S. Bankruptcy Court. Fees and expenses the Company incurred under the Services Agreement amounted to \$6.1 million for the three months ended June 30, 2014 and \$3.7 million for the three months ended June 30, 2013.

The Company understands from Messrs. Caruso and Mosley that they do not and will not, as applicable, directly receive a portion of the fees paid by the Company to A&M in respect of their hourly fees, the overall fee, the success fee, or any other fees relating to any other aspect of the Company's engagement of A&M. However, Messrs. Caruso and Mosley may be entitled to discretionary bonuses at the end of each A&M fiscal year which may, similar to other professional services firms, take into account revenues and expenses related to matters on which they have worked or managed. A&M has disclosed that the ultimate amount of Messrs. Caruso's and Mosley's compensation, which has not yet been determined, will depend on a number of factors related to, among other things, their performance as employees, their contribution to the revenue generating activities (including but not limited to the engagement for the Company), and A&M's overall financial results.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of the Company's consolidated results of operations and financial condition. The discussion should be read in conjunction with the Consolidated Financial Statements and Notes thereto contained in this Quarterly Report on Form 10-Q.

Some of the statements contained in the following discussion of the Company's financial condition and results of operations refer to future expectations or include other "forward-looking" information. Those statements are subject to known and unknown risks, uncertainties and other factors that could cause the actual results to differ materially from those contemplated by these statements. The forward-looking information is based on various factors and was derived from numerous assumptions. See "Cautionary Statement for Purposes of the Safe Harbor Provision of the Private Securities Litigation Reform Act of 1995," and Item 1A in Part II included in this Report on Form 10-Q, as well as the risk factors included in Item 1A in Part I of the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2014 for a discussion of factors to be considered when evaluating forward-looking information detailed below. These factors could cause our actual results to differ materially from the forward-looking statements. For a discussion of certain legal contingencies, see Note 11 to the Consolidated Financial Statements.

Executive Overview

The Company is a global producer and recycler of lead-acid batteries. The Company's four business segments, Transportation Americas, Transportation Europe and ROW, Industrial Energy Americas, and Industrial Energy Europe and ROW, provide a comprehensive range of stored electrical energy products and services for transportation and industrial applications.

Transportation markets include original equipment ("OE") and aftermarket automotive, heavy-duty truck, agricultural and marine applications, and new technologies for hybrid vehicles including Stop & Start; micro-hybrid flooded ("MHF") and AGM, and other automotive applications. Industrial markets include batteries for telecommunications systems, utilities, railroads, computer installation and data centers, material handling, mining, and other commercial vehicles.

The Company's four reportable segments are determined based upon the nature of the markets served and the geographic regions in which they operate. The Company's chief operating decision-maker monitors and manages the financial performance of these four business groups.

Chapter 11 Case

Overview

On June 10, 2013, the Company filed a voluntary petition for relief under the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. The Chapter 11 Case is being administered under the caption In re Exide Technologies, case number 13-11482. The Company's subsidiaries, foreign and domestic, have been excluded from the Chapter 11 proceedings and continue to operate their businesses without supervision from the Bankruptcy Court and are not subject to the requirements of the Bankruptcy Code.

Table of Contents

The Company is operating as a DIP under the jurisdiction of the Bankruptcy Court and the applicable provisions of the Bankruptcy Code. In general, as a DIP, we are authorized to continue to operate as an ongoing business but may not engage in transactions outside the ordinary course of business without the prior approval of the Bankruptcy Court. The Bankruptcy Code enables the Company to continue to operate its business without interruption and the Bankruptcy Court has granted a number of first day motions allowing Exide to pay pre-petition obligations to, among other parties, (i) employees, (ii) taxing authorities, (iii) insurance providers, (iv) independent contractors, (v) foreign vendors, and (vi) certain vendors deemed critical to the Company's operations.

While operating as a DIP under Chapter 11 of the Bankruptcy Code, Exide may sell or otherwise dispose of or liquidate assets or settle liabilities, subject to the approval of the Bankruptcy Court or otherwise as permitted in the ordinary course of business. Moreover, the Company has not yet filed with the Bankruptcy Court a plan of reorganization. The ultimate plan of reorganization, which would be subject to acceptance by the requisite majorities of empowered creditors under the Bankruptcy Code and Bankruptcy Court approval, could materially change the amounts and classifications of assets and liabilities in the historical Consolidated Financial Statements.

No assurance can be given as to the value, if any, that may be distributable to holders of the Company's various pre-petition liabilities and other securities. The Company expects that the ultimate value of any distribution to holders of its securities will be determined in connection with a plan of reorganization. The Company believes that under any reorganization plan the Company's common stock would likely be substantially diluted or canceled in its entirety. Accordingly, the Company urges that caution be exercised with respect to existing and future investments in any of these securities or other Company claims. The Company's common stock has been delisted from trading on the NASDAQ.

General Information

Notices to Creditors; Effect of Automatic Stay. The Company notified all known current or potential creditors that the Chapter 11 Case had been filed. Subject to certain exceptions under the Bankruptcy Code, the filing of the Exide's Chapter 11 Case automatically enjoined, or stayed, the continuation of most judicial or administrative proceedings or filing of other actions against the Company or its property to recover on, collect or secure a claim arising prior to the Petition Date. Thus, for example, most creditor actions to obtain possession of property from the Company, or to create, perfect or enforce any lien against the property of the Company, or to collect on monies owed or otherwise exercise rights or remedies with respect to a pre-petition claim, are enjoined unless and until the Bankruptcy Court lifts the automatic stay as to any such claim. Vendors are being paid for goods furnished and services provided after the Petition Date in the ordinary course of business.

Executory Contracts and Unexpired Leases. Under Section 365 and other relevant sections of the Bankruptcy Code, the Company may assume, assume and assign, or reject certain executory contracts and unexpired leases, subject to the approval of the Bankruptcy Court and certain other conditions. The Company's rights to assume or assume and assign unexpired leases of non-residential real estate expired on January 6, 2014.

In general, rejection of an executory contract or unexpired lease is treated as a pre-petition breach of the executory contract or unexpired lease in question and, subject to certain exceptions, relieves the Company from performing its future obligations under such executory contract or unexpired lease but entitles the contract counterparty or lessor to a pre-petition general unsecured claim for damages caused by such deemed breach. Counterparties to such rejected contracts or leases have the right to file claims against the Company's estate for such damages. Generally, the assumption of an executory contract or unexpired lease requires the Company to cure existing defaults under such executory contract or unexpired lease.

Any description of an executory contract or unexpired lease elsewhere in this report or reflected in the Notes to the Consolidated Financial Statements, including where applicable the Company's express termination rights or a quantification of its obligations, must be read in conjunction with, and is qualified by, any rights the Company or counterparties have under Section 365 of the Bankruptcy Code.

Exide expects that liabilities subject to compromise and resolution in the Chapter 11 Case will arise in the future as a result of damage claims created by the Company's rejection of various executory contracts and unexpired leases. Due to the uncertain nature of many of the potential rejection claims, the magnitude of such claims is not reasonably estimable at this time. Such claims may be material.

Magnitude of Potential Claims. On August 9, 2013, the Company filed with the Bankruptcy Court schedules and statements of financial affairs setting forth, among other things, the assets and liabilities of the Company, subject to the assumptions filed in connection therewith. All of the schedules are subject to further amendment or modification. Bankruptcy Rule 3003(c)(3) requires the Bankruptcy Court to fix the time within which proofs of claim must be filed in a Chapter 11 Case pursuant to Section 501 of the Bankruptcy Code. This Bankruptcy Rule also provides that any creditor who asserts a claim against the Company that arose prior to the Petition Date and whose claim (i) is not listed on the Company's schedules or (ii) is listed on the schedules as disputed, contingent, or unliquidated, must file a proof of claim. On September 13, 2013, the Bankruptcy Court entered an order, which, among other things, established October 31, 2013, as the general bar date

Table of Contents

for filing claims and December 9, 2013, as the bar date for claims by certain governmental authorities. This order was supplemented by a further order on October 24, 2013, extending the bar date to January 31, 2014, solely with respect to personal injury claims related to the Company's secondary lead recycling facility in Vernon, California.

Differences between amounts scheduled by the Company and claims by creditors will be investigated and resolved in connection with the claims resolution process. In light of the expected number of creditors, the claims resolution process may take considerable time to complete. Accordingly, the ultimate number and amount of allowed claims is not presently known, nor can the ultimate recovery with respect to allowed claims be presently ascertained.

Plan of reorganization. Under Chapter 11 of the Bankruptcy Code, the Company has the exclusive right for 120 days after the Petition Date to file a plan of reorganization and, if it does so, 60 additional days to obtain necessary acceptances of the plan. The Company's exclusivity period may be extended by the Court, for cause, for up to 18 months from the Petition Date. On October 15, 2013, the Bankruptcy Court entered an order extending the Company's exclusive period to file a plan to May 31, 2014, and the period to solicit acceptances of a plan to July 24, 2014. On May 13, 2014, the Company filed a motion to further extend the exclusivity period to file a plan to July 31, 2014, and to September 30, 2014, to solicit acceptances for a plan. By an order entered July 1, 2014, the Bankruptcy Court approved the extensions. On July 30, 2014, the Company filed a motion with the Bankruptcy Court seeking a further extension of the exclusivity period to file a plan to December 10, 2014, and to solicit acceptances of a plan to February 10, 2015. If the Company's exclusivity period lapses, any party in interest may file a plan of reorganization for the Company. In addition to being voted on by holders of impaired claims and equity interests, a plan of reorganization must satisfy certain requirements of the Bankruptcy Code and must be approved, or confirmed, by the Bankruptcy Court in order to become effective. A plan of reorganization has been accepted by holders of claims against and equity interests in the Company if (i) at least one-half in number and two-thirds in dollar amount of claims actually voting in each impaired class of claims have voted to accept the plan and (ii) at least two-thirds in amount of equity interests actually voting in each impaired class of equity interests has voted to accept the plan.

Under certain circumstances set forth in Section 1129(b) of the Bankruptcy Code, the Bankruptcy Court may confirm a plan even if such plan has not been accepted by all impaired classes of claims and equity interests - a process known as "cram down". A class of claims or equity interests that does not receive or retain any property under the plan on account of such claims or interests is deemed to have voted to reject the plan. The precise requirements and evidentiary showing for confirming a plan notwithstanding its rejection by one or more impaired classes of claims or equity interests depends upon a number of factors, including the status and seniority of the claims or equity interests in the rejecting class (i.e., secured claims or unsecured claims, subordinated or senior claims, preferred or common stock). Generally, with respect to common stock interests, a plan may be "crammed down" even if the shareowners receive no recovery if the proponent of the plan demonstrates that (i) no class junior to the common stock is receiving or retaining property under the plan and (ii) no class of claims or interests senior to the common stock is being paid more than in full.

On June 30, 2014, the Company received a non-binding POR Proposal from the UNC, whose members hold a substantial majority of the term loan component of the DIP Credit Facility and pre-petition senior secured notes. The POR Proposal, which is subject to completion of definitive documentation and certain other conditions, including the resolution of matters relating to certain of the Company's environmental obligations in a manner satisfactory to the UNC, provides approximately \$485.0 million in new capital, and is currently expected to be comprised of the following:

A preferred convertible equity capital commitment of approximately \$300.0 million (a portion of which will be in the form of a rights offering backstopped by certain members of the UNC and another portion in the form of a direct investment by certain members of the UNC);

• A \$185.0 million term loan or high yield bond issuance also backstopped by certain members of the UNC; and

• An asset based loan facility for which commitments would be obtained from potential lenders in conjunction with the plan confirmation process.

While the Company continues to negotiate the POR Proposal, there can be no assurance at this time that the Company will be able to satisfy the conditions to the POR Proposal.

Reorganization costs. The Company has incurred and will continue to incur significant costs associated with its reorganization. The amount of these costs, which are being expensed as incurred, are expected to significantly affect the Company's results of operations. Pre-petition claims will be reflected in liabilities subject to compromise on the Consolidated Balance Sheets. For additional information, see Note 1 to the Consolidated Financial Statements. Further Information. For further information regarding the Chapter 11 Case, see Note 1 to the Consolidated Financial Statements. Additional information about the Company's Chapter 11 filing is also available on www.exiderestructures.com and at www.exiderestructuringinfo.com.

Table of Contents

Factors Which Affect the Company's Financial Performance

Lead and Other Raw Materials. Lead represented approximately 44.8% of the Company's cost of goods sold for the three months ended June 30, 2014. The market price of lead fluctuates. Generally, when lead prices decrease, customers may seek disproportionate price reductions from the Company, and when lead prices increase, customers may resist price increases. Either of these situations may cause customer demand for the Company's products to be reduced and the Company's net sales and gross margins to decline. The average price of lead as quoted on the London Metals Exchange ("LME") has increased 2.0% from \$2,054 per metric ton for the three months ended June 30, 2013 to \$2,095 per metric ton for the three months ended June 30, 2014. To the extent that lead prices continue to be volatile and the Company is unable to pass higher material costs resulting from this volatility to its customers, its financial performance will be adversely impacted.

In the Americas, the Company typically obtains the vast majority of its lead requirements from three Company-owned and operated secondary lead recycling plants. The Company's recycling facilities reclaim lead by recycling spent lead-acid batteries, which are obtained for recycling from the Company's customers and outside spent battery collectors. Historically, recycling in the Americas has helped the Company control the cost of its principal raw material compared to purchasing lead at prevailing market prices on the LME. Similar to the fluctuation in lead prices, however, the cost of spent batteries has also fluctuated. The average cost of spent batteries decreased approximately 0.7% for the three months ended June 30, 2014 as compared to the prior fiscal year. The Company takes pricing actions as allowed by the market and is attempting to secure higher captive spent battery return rates to help mitigate price volatility associated with spent battery purchases in the open market. During the three months ended June 30, 2014 the Company's Vernon recycling facility was temporarily suspended for the respective period. The Company was forced to procure lead from alternative sources, including tollers.

In Europe, the Company's lead requirements are mainly fulfilled by third-party suppliers. Because of the Company's exposure to the historically volatile lead market prices in Europe, the Company has implemented several measures to offset changes in lead prices, including selective pricing actions and lead price escalators. The Company has automatic lead price escalators with virtually all original equipment manufacturer customers. The Company currently obtains a small portion of its lead requirements from recycling in its European owned facilities.

The Company expects that volatility in lead and other commodity costs, which affect all business segments, will continue to put pressure on the Company's financial performance. However, selective pricing actions, including lead price escalators in certain contracts, have been implemented to help mitigate these risks. The implementation of selective pricing actions and price escalators generally lag the rise in market prices of lead and other commodities. Both lead price escalators and fuel surcharges may not be accepted by our customers, and if the price of lead decreases, our customers may seek disproportionate price reductions.

Energy Costs. The Company relies on various sources of energy to support its manufacturing and distribution processes, principally natural gas at its recycling facilities, electricity in its battery assembly facilities, and diesel fuel for distribution of its products. The Company seeks to recoup increases in energy costs through price increases or surcharges. To the extent the Company is unable to pass on higher energy costs to its customers, its financial performance will be adversely impacted.

Competition. The global transportation and industrial energy battery markets are highly competitive. In recent years, competition has continued to intensify and has affected the Company's ability to pass along increased prices to keep pace with rising production costs. The affects of this competition have been exacerbated by excess manufacturing capacity in certain of the Company's markets. In addition, fluctuating lead prices and lower priced Asian imports have also impacted certain of the Company's markets.

Exchange Rates. The Company is exposed to foreign currency risk in most European countries, principally from fluctuations in the Euro. For the three months ended June 30, 2014, the average exchange rate of the Euro to the U.S. Dollar has increased 4.6% on average to \$1.37 compared to \$1.31 for three months ended June 30, 2013. At June 30, 2014, the Euro was \$1.37 as compared to \$1.38 at March 31, 2014. Fluctuations in foreign currencies impacted the Company's results for the periods presented herein. For the three months ended June 30, 2014, approximately 59.1% of the Company's net sales were generated in Europe and ROW. Further, approximately 63.5% of the Company's aggregate accounts receivable and inventories as of June 30, 2014 were held by European and ROW

subsidiaries. To the extent foreign currencies are volatile, the Company's financial performance could be adversely impacted.

The Company is also exposed, although to a lesser extent, to foreign currency risk in the U.K., Poland, Australia, and various countries in the Pacific Rim. Fluctuations in exchange rates against the U.S. Dollar can result in variations in the U.S. Dollar value of non-U.S. sales, expenses, assets, and liabilities. In some instances, gains in one currency may be offset by losses in another.

Markets. The Company is subject to concentrations of customers and sales in a few geographic locations and is dependent on customers in certain industries, including the automotive, communications, and data and material handling markets. Economic difficulties experienced in these markets and geographic locations impact the Company's financial results. OE

Table of Contents

volumes in the Transportation and Motive Power channels can be impacted by cyclical demand caused by changes in global economic conditions. In addition, dramatic changes in capital spending levels by major customers in our Network Power channels can also significantly impact sales levels.

Seasonality and Weather. The Company sells a disproportionate share of its transportation aftermarket batteries during the fall and early winter (the Company's third and a portion of its fourth fiscal quarters). Retailers and distributors buy automotive batteries during these periods so they will have sufficient inventory for cold weather periods. The impact of seasonality on sales has the affect of increasing the Company's working capital requirements and also makes the Company more sensitive to fluctuations in the availability of liquidity.

Unusually cold winters or hot summers may accelerate battery failure and increase demand for transportation replacement batteries. Mild winters and cool summers may have the opposite affect. As a result, if the Company's sales are reduced by an unusually warm winter or cool summer, it is not possible for the Company to recover these sales in later periods. Further, if the Company's sales are adversely affected by the weather, the Company cannot make offsetting cost reductions to protect its liquidity and gross margins in the short-term because a large portion of the Company's manufacturing and distribution costs are fixed.

Interest Rates. The Company is exposed to fluctuations in interest rates on its variable rate debt.

Highlights and Outlook

The key elements of the Company's underlying business plans and continued strategies are:

- Successfully emerging from Chapter 11 as a going concern.

- Successful resolution of regulatory and legal matters related to the Vernon, California secondary lead recycling facility and reopening the facility.

- Successful post-shutdown activities at the Company's former Frisco, Texas recycling facility.

Actions designed to improve the Company's liquidity and operating cash flow include working capital reduction plans, the sale of non-strategic assets and businesses, streamlining cash management processes, implementing plans to minimize the cash costs of the Company's restructuring initiatives, and closely managing capital expenditures.

- Continued factory and distribution productivity improvements through the Company's established Lean/Six Sigma program, as well as the Value Analysis Value Engineering ("VAVE") and Take Charge! initiatives.

An enhanced focus on growth of the Industrial Americas business through increased new product offerings (Tubular Motive Power, High Frequency Chargers, etc.), increases in capacity and a larger and more distributed sales and service team tied to the Transportation branch network.

- Continued investment in production capacity to meet evolving needs for enhanced batteries (AGM and MHF) required for the increasing numbers of Stop & Start and micro-hybrid vehicles.

Continued research and development and engineering investments designed to develop enhanced lead-acid products as well as products utilizing alternative chemistries, particularly Lithium-Ion for selected Motor Power application in Europe.

Critical Accounting Policies and Estimates

There were no significant changes to our critical accounting policies and estimates as reported in Item 7 from our Annual Report on Form 10-K for the fiscal year ended March 31, 2014.

Results of Operations

Three months ended June 30, 2014 compared with the three months ended June 30, 2013

Net Sales

Net sales were \$651.6 million for the three months ended June 30, 2014 versus \$682.2 million for the three months ended June 30, 2013. Foreign currency translation (primarily the strengthening of the Euro against the U.S. Dollar) had a favorable impact on net sales for the three months ended June 30, 2014 of approximately \$13.2 million.

Excluding foreign currency translation, net sales decreased by approximately \$43.9 million, or 6.4%, primarily due to the exit of certain OE contracts in Transportation Americas, lower aftermarket unit sales globally due to fully stocked distribution channels, and lower unit sales in Industrial Energy Europe & ROW, partially offset by higher Motive Power unit sales in Industrial Energy Americas. Additionally, lead related pricing actions had an estimated \$9.6 million unfavorable impact on net sales. See segment discussion below.

Table of Contents

Net sales by operating segment:

	Three Months Ended		Favorable / (Unfavorable)		
	June 30, 2014 (In thousands)	June 30, 2013	Total	Currency Related	Non-Currency Related
Transportation Americas	\$158,754	\$190,212	\$(31,458)	\$(1,650)	\$(29,808)
Transportation Europe & ROW	191,331	186,437	4,894	7,955	(3,061)
Industrial Energy Americas	107,847	101,617	6,230	(331)	6,561
Industrial Energy Europe & ROW	193,653	203,976	(10,323)	7,236	(17,559)
Total	\$651,585	\$682,242	\$(30,657)	\$13,210	\$(43,867)

Transportation Americas net sales, excluding foreign currency translation impact, decreased 15.7% primarily due to the exit from OE automotive contracts, 8.8% lower aftermarket unit sales resulting from excess inventory from the winter season, and \$3.4 million lower third party lead and tolling sales resulting from the temporary suspension of the Company's Vernon, California recycling plant in current fiscal year.

Transportation Europe & ROW net sales, excluding foreign currency translation impact, decreased 1.6% primarily due to softer aftermarket unit sales, partially offset by 9.1% stronger unit sales in OE channels. Lead related pricing actions had an unfavorable impact of \$5.0 million.

Industrial Energy Americas net sales, excluding the foreign currency translation impact, increased 6.5% primarily due to 6.7% higher unit sales in the Motive Power market, partially offset by 2.9% lower unit sales in the Network Power market.

Industrial Energy Europe & ROW net sales, excluding foreign currency translation impact, decreased 8.6% as a result of lower unit sales across all markets. Lead related pricing actions had an unfavorable impact of \$4.6 million.

Gross Profit

Gross profit was \$74.1 million for the three months ended June 30, 2014 versus \$76.0 million for the three months ended June 30, 2013. Gross margin increased to 11.4% of net sales from 11.1% of net sales in the prior year. See further discussion below under the caption "Operating loss by operating segment".

Operating Expenses

Selling and administrative expenses were \$89.6 million for the three months ended June 30, 2014 as compared to \$92.2 million prior year. Excluding foreign currency translation impact, selling and administrative expenses decreased primarily due to headcount reductions and lower employee compensation related expense, partially offset by higher legal fees, principally related to matters pertaining to the Company's Vernon, California recycling facility.

Restructuring and impairment expenses decreased from \$8.7 million to \$2.7 million for the three months ended June 30, 2014. Fiscal 2015 restructuring and impairment expenses primarily included the closure costs for the Horten, Norway submarine battery facility. Fiscal 2014 restructuring and impairment expenses included costs related to the Company's Transportation Americas headcount reduction and exit of the Vortex product line and related costs. The remainder related to certain headcount reductions in Europe and the corporate headquarters.

Table of Contents

Operating Loss

Operating loss was \$(18.2) million in the three months ended June 30, 2014 versus \$(24.9) million in the three months ended June 30, 2013. See segment discussion below.

Operating income (loss) by operating segment:

	Three Months Ended		June 30, 2013		Favorable / (Unfavorable)		
	June 30, 2014		Total	Percent of	Total	Currency	Non-Currency
	Total	Percent of	Total	Percent of	Total	Related	Related
	(In thousands)						
Transportation Americas	\$(20,652)	(13.0)%	\$(15,944)	(8.4)%	\$(4,708)	\$(13)	\$(4,695)
Transportation Europe & ROW	448	0.2 %	(4,527)	(2.4)%	4,975	(23)	4,998
Industrial Energy Americas	5,348	5.0 %	4,627	4.6 %	721	(14)	735
Industrial Energy Europe & ROW	4,427	2.3 %	6,078	3.0 %	(1,651)	131	(1,782)
Unallocated corporate expenses	(5,107)	n/a	(6,364)	n/a	1,257	(181)	1,438
	(15,536)	(2.4)%	(16,130)	(2.4)%	594	(100)	694
Restructuring and impairments, net	(2,682)	n/a	(8,724)	n/a	6,042	42	6,000
Operating loss	\$(18,218)	(2.8)%	\$(24,854)	(3.6)%	\$6,636	\$(58)	\$ 6,694

Gross margins by operating segment:

	Three Months Ended			
	June 30, 2014	June 30, 2013		
Transportation Americas	3.3	%	6.7	%
Transportation Europe & ROW	11.4	%	8.9	%
Industrial Energy Americas	16.0	%	16.2	%
Industrial Energy Europe & ROW	15.4	%	14.8	%
Total	11.4	%	11.1	%

Transportation Americas operating loss, excluding foreign currency translation impact, increased primarily due to approximately \$12.0 million unfavorable manufacturing costs resulting from the temporary suspension of the Vernon, California facility for the entirety of the quarter. These incremental expenses consist of higher lead purchase cost as well as idle plant costs including the impact of the workforce. This was partially mitigated by improved margins in the battery portion of the business from exiting OE automotive contracts, lower input costs, improved productivity at the Salina, Kansas facility, and lower SG&A expenses. The Company currently estimates the full operation of the Vernon recycling facility will not occur until after installation of the equipment required under the SCAQMD order expected to be completed in the fourth quarter of fiscal 2015 should the Company decide to proceed (see Note 11 to the Consolidated Financial Statements). If the Company is unable to find adequate sources of lead or if the Company procures such sources of lead at significantly higher cost, such circumstances would result in a material adverse effect on the Company's business, financial condition, cash flows, or results of operations.

Transportation Europe & ROW operating income (loss), excluding foreign currency translation impact, improved primarily due to lower input costs, better manufacturing performance, and lower scrap costs. The prior year results were significantly impacted from higher purchased lead costs.

Industrial Energy Americas operating income, excluding foreign currency translation impact, improved slightly. Strong Motive Power sales and improved core cost drove higher earnings, partially offset by unfavorable manufacturing costs from lower sales in the Network Power market, and higher non-lead commodity costs.

Industrial Energy Europe & ROW operating income, excluding foreign currency translation impact, decreased as a result of lower sales across all markets.

Unallocated corporate expenses, excluding foreign currency translation impact, decreased primarily due to lower headcount and lower employee compensation expense, partially offset by higher professional fees.

30

Table of Contents

Other Expense, net

Other expense, net was \$0.7 million for the three months ended June 30, 2014 compared to \$5.2 million for the three months ended June 30, 2013. The change primarily results from reduced currency remeasurement losses versus the prior year.

Interest Expense, Net

Interest expense was \$33.3 million for the three months ended June 30, 2014 compared to \$21.4 million for the three months ended June 30, 2013. The unfavorable change is due to higher average borrowings, including the DIP financing entered into in June 2013, and higher amortization of deferred financing costs related to the DIP financing. In addition, the Company has continued to accrue interest on certain debt included in Liabilities Subject to Compromise, including the \$675.0 million of senior secured notes.

Reorganization Items, net

Reorganization expense includes items directly related to Debtor Chapter 11 Bankruptcy filing. The majority of these costs relate to the professional advisors to the Company and various creditor constituencies, including legal, financial, and environmental experts. For additional information see Note 1 to the Consolidated Financial Statements.

Income Taxes

	Three Months Ended	
	June 30, 2014	June 30, 2013
	(In thousands)	
Loss before income taxes	\$(69,778)	\$(90,913)
Income tax provision	1,605	309
Effective tax rate	(2.3)%	(0.3)%

The income tax expense for the first quarter of fiscal 2015 includes the recognition of taxes on income and losses in almost all of the Company's jurisdictions with the exception of the United States, Spain, and the United Kingdom, on which full valuation allowances are recorded. In addition, the effective tax rate for the first quarter of fiscal 2015 was affected by the recognition of \$28.2 million in valuation allowances on current period tax benefits.

The income tax expense for the first quarter of fiscal 2014 included the recognition of taxes on income and losses in almost all of the Company's jurisdictions with the exception of the United States, Spain and the United Kingdom, on which full valuation allowances are recorded. In addition, the effective tax rate for the first quarter of fiscal 2014 was affected by the recognition of \$25.9 million in valuation allowances on current period tax benefits.

Liquidity and Capital Resources

The Chapter 11 petition triggered defaults on substantially all debt obligations of the Company and as a result, the senior secured notes, convertible notes, and the Company's prior revolving credit facility had been accelerated and are due and payable. However, under Section 362 of the Bankruptcy Code, the commencement of a Chapter 11 Case automatically stays most creditor actions against the Company's estate. To enhance liquidity, in connection with the Chapter 11 Case, the Company secured a \$500.0 million DIP financing facility.

As of June 30, 2014, the Company had cash and cash equivalents of \$53.6 million and availability under the ABL revolving credit facility of \$80.1 million. As of August 5, 2014, the Company accessed \$60.0 million term loan financing provided by the sixth amendment to the DIP Credit Agreement, as further described below. At March 31, 2014, the Company had cash and cash equivalents of \$103.7 million and availability under the ABL revolving credit facility of \$129.4 million.

DIP Facilities

In connection with the Chapter 11 Case, the Company received Bankruptcy Court approval of DIP financing on the terms set forth in the DIP Credit Agreement. The DIP Credit Agreement provides for senior secured super priority DIP financing facilities in an aggregate amount of up to \$500.0 million, consisting of a \$225.0 million ABL revolving credit facility, subject to a borrowing base, and a \$275.0 million "last out" term loan facility. Effective July 12, 2013, the DIP Credit Agreement was amended and restated to provide a \$25.0 million swingline facility sub-limit, as well as the creation of two separate tranches in the \$225.0 million revolver facility: (i) a \$110.0 million facility under which only advances denominated in U.S. Dollars can be drawn; and (ii) a \$115.0 million facility under which advances denominated in U.S. Dollars or Euros can be drawn.

Effective July 24, 2013, the DIP Credit Agreement was amended to permit an increase of the quarterly maximum capital expenditure limits of \$25.0 million by \$2.5 million should the preceding quarter's EBITDA exceed 110.0% of the DIP budget, with the rolling four quarter maximum capital expenditures increased to \$90.0 million for the four quarters ending after March 31, 2014.

Table of Contents

Effective October 9, 2013, a second amendment provided additional flexibility to the Company with regard to certain non-core asset transactions, and further clarified certain terms of the DIP Credit Agreement. The second amendment revised the definition of "Permitted Liens" to permit contractual encumbrances in connection with certain permitted dispositions under the DIP Credit Agreement. The second amendment further changed the definition of cumulative total adjusted operating cash flows to exclude the affect of Frisco Escrow Account receipts from cumulative total adjusted operating cash flows.

Effective May 28, 2014, the Company entered into the third amendment to the DIP Credit Agreement, which, among other things, extended to June 30, 2014 the milestone for the Company to file a plan of reorganization with the Bankruptcy Court. The third amendment increased the quarterly and rolling four quarter capital expenditure limits from \$25.0 million and \$90.0 million to \$36.0 million and \$120.0 million, respectively. The third amendment also excluded from the definition of "Capital Expenditure" expenditures made in connection with the replacement, substitution, restoration or repair of assets funded through the receipt of insurance proceeds or other compensation awards paid on account of a casualty loss. Finally, the third amendment increased the European factoring basket to 100.0 million Euros from 75.0 million Euros and expanded the subsidiaries whose receivables can be factored to include subsidiaries domiciled in Belgium, Denmark, Finland, Luxembourg, the Netherlands, Norway, and Sweden. Effective June 27, 2014, the Company entered into the fourth amendment to the DIP Credit Agreement, which extended to July 31, 2014 the deadline for filing a plan of reorganization and eliminating the milestone related to soliciting acceptance of the plan of reorganization. The fourth amendment also increased to \$85.0 million from \$75.0 million the letters of credit sublimit. The revised deadline for filing a plan of reorganization to July 31, 2014 was approved by the Bankruptcy Court on June 30, 2014.

Also, effective on June 27, 2014, the Company entered into the fifth amendment to the DIP Credit Agreement, which, among other things, extended to August 15, 2014 the date by which the Company is required to deliver annual audited financial statements and the related Compliance Certificate for the fiscal year of the Company ended March 31, 2014. On July 22, 2014, the Company entered into the sixth amendment to the DIP Credit Agreement, which, among other things, sought to modify the DIP Credit Agreement as follows:

eliminate restrictions on capital expenditures, modify the definition of EBITDA and adjust the minimum EBITDA covenant to include the period October through November 2014 and address lower anticipated earnings through the end of calendar 2014;

- extend the maturity date of the loans made under the DIP Credit Agreement to December 31, 2014 ("the Extension Amendment") effective upon the satisfaction of certain conditions, including, among other things, the Company and members of the Unofficial Committee of Senior Secured Noteholders ("UNC") holding a majority in principal amount of the Company's Senior Secured Notes entering into a customary plan support agreement with respect to an Acceptable Plan of Reorganization, as that term is defined in the amended DIP Credit Agreement; and

provide for \$60.0 million in additional term loan financing (the "Upsizing Amendment"), which will be funded pursuant to a commitment letter executed by certain members of the UNC to provide additional term loan financing with net cash proceeds of \$60.0 million, subject to satisfaction of certain conditions including approval by the Bankruptcy Court.

On July 28, 2014, the Bankruptcy Court entered an order approving the Upsizing Amendment.

On July 25, 2014, the Company entered into the seventh amendment to the DIP Credit Agreement, which eliminated the milestone related to filing a plan of reorganization.

The proceeds of the DIP financing were used to repay amounts outstanding under the pre-petition ABL revolving credit facility and letters of credit which were outstanding.

The maturity date of the loans made under the DIP Credit Agreement is the earliest to occur: (i) the date occurring 16 months following the closing date or December 31, 2014, assuming satisfaction of certain conditions in the sixth amendment to the DIP Credit Agreement including entering into a customary plan support agreement with respect to an Acceptable Plan of Reorganization; (ii) the effective date of the Debtor plan of reorganization; or (iii) the acceleration of such loans. The revolving loans bear interest at the rate of LIBOR plus 3.25% and the term loan bears interest at a rate of 9.0%. The obligations of the Borrowers under the DIP Credit Agreement are unconditionally

guaranteed by certain material foreign subsidiaries. In addition, the U.S. Borrower unconditionally guarantees the obligations of the Foreign Borrower. Subject to certain exceptions, the obligations of the Borrowers and the guarantors under the DIP Credit Agreement and the other loan documents are secured by first priority liens on specified assets of the Borrowers and the foreign guarantors and 100.0% pledge of equity interests of certain of the Borrowers' direct and indirect subsidiaries. The DIP Credit Agreement required the Borrowers to comply with financial covenants as defined by the agreement relating to minimum liquidity, cumulative total adjusted operating cash flows, minimum cumulative EBITDA, and minimum twelve month trailing EBITDA.

Table of Contents

On June 30, 2014, the Company received a non-binding POR Proposal from the UNC, whose members hold a substantial majority of the term loan component of the DIP Credit Facility and pre-petition senior secured notes. The POR Proposal, which is subject to completion of definitive documentation and certain other conditions, including the resolution of matters relating to certain of the Company's environmental obligations in a manner satisfactory to the UNC, provides approximately \$485.0 million in new capital, and is currently expected to be comprised of the following:

A preferred convertible equity capital commitment of approximately \$300.0 million (a portion of which will be in the form of a rights offering backstopped by certain members of the UNC and another portion in the form of a direct investment by certain members of the UNC);

• A \$185.0 million term loan or high yield bond issuance also backstopped by certain members of the UNC; and

• An asset based loan facility for which commitments would be obtained from potential lenders in conjunction with the plan confirmation process.

While the Company continues to negotiate the POR Proposal, there can be no assurance at this time that the Company will be able to satisfy the conditions to the POR Proposal.

Events of default under the DIP Credit Agreement include, among other things, failure to pay any principal, interest or other amount due under the applicable credit agreement, breach of specific covenants, and a change of control of the Company. Upon an event of default, the requisite lenders may declare the outstanding obligations under the DIP Credit Agreement to be immediately due and payable and exercise other rights and remedies provided for thereunder. The Company's business may not generate cash flow in an amount sufficient to enable it to pay the principal of, or interest on the Company's indebtedness, or to fund the Company's other liquidity needs, including working capital, capital expenditures, strategic acquisitions, investments and alliances, restructuring actions, costs related to the Chapter 11 Case, and other general corporate requirements. If the Company cannot fund its liquidity needs, it will have to take actions such as reducing or delaying capital expenditures, strategic acquisitions, and investments and alliances; selling additional assets; restructuring or refinancing its debt; or seeking additional equity capital. These actions may be restricted as a result of the Company's Chapter 11 Case and the DIP Credit Agreement. Such actions could increase the Company's debt, negatively impact customer confidence in the Company's ability to provide products and services, reduce the Company's ability to raise additional capital, delay improvements in profitability, and adversely affect the Company's ability to emerge from bankruptcy. There can be no assurance that any of these remedies could, if necessary, be affected on commercially reasonable terms, if at all, or that they would permit the Company to meet its scheduled debt service obligations. In addition, if the Company incurs additional debt, the risks associated with its substantial leverage, including the risk that it will be unable to service the Company's debt or generate sufficient cash flow to fund its liquidity needs, could intensify.

At June 30, 2014, the Company had outstanding letters of credit with a face value of \$70.0 million and surety bonds with a face value of \$56.1 million. The majority of the letters of credit and surety bonds have been issued as collateral or financial assurance with respect to certain liabilities that the Company has recorded, including but not limited to environmental remediation obligations and self-insured workers' compensation reserves. Failure of the Company to satisfy its obligations with respect to the primary obligations secured by the letters of credit or surety bonds could entitle the beneficiary of the related letter of credit or surety bond to demand payments pursuant to such instruments. The letters of credit generally have terms up to one year. Collateral held by the surety in the form of letters of credit at June 30, 2014, pursuant to the terms of the DIP Credit Agreement was \$53.9 million.

Certain of the Company's European and Asia Pacific subsidiaries have bank guarantees outstanding as collateral or financial assurance in connection with environmental obligations, income tax claims and customer contract requirements. At June 30, 2014, bank guarantees issued on behalf of the Company's European and Asia Pacific subsidiaries with an aggregate face value of \$17.5 million were outstanding.

At June 30, 2014, the Company was in compliance with covenants contained in the DIP Credit Agreement.

Sources and Uses of Cash

The Company's liquidity requirements have been met historically through cash provided by operations, borrowed funds and the proceeds of sales of accounts receivable in certain European subsidiaries. Additional cash has been generated in the past several years through rights offerings, debt issuances, and the sale of non-core businesses and

assets.

The Company's liquidity needs arise primarily in the funding of working capital, and obligations on indebtedness and capital expenditures. Because of the seasonality of the Company's business, more cash has typically been generated in the third and fourth fiscal quarters than the first and second fiscal quarters. Greatest cash demands from operations have historically occurred during the months of April through October, which can adversely affect the Company's liquidity during these periods.

33

Table of Contents

Going forward, the Company's principal sources of liquidity are expected to be cash on hand, cash from operations, borrowings under the DIP Credit Agreement, and the sale of idled assets, principally closed facilities.

Cash used in operating activities was \$58.8 million and \$165.3 million in the three months ended June 30, 2014 and 2013, respectively. This lower cash used relates primarily to a significant reduction in accounts payable in the prior year period. The prior year increased usage primarily relates to Debtor Chapter 11 reorganization fees and accelerated timing of post-petition accounts payable payments generally required for companies under Chapter 11 Bankruptcy protection.

Cash used in investing activities primarily consisted of capital expenditures of \$23.6 million and \$18.9 million in the three months ended June 30, 2014 and 2013, respectively. The three months ended June 30, 2014 include proceeds of \$7.1 million related to the sale of non-core businesses and assets.

Cash provided by financing activities was \$25.0 million and \$152.0 million in the three months ended June 30, 2014 and 2013, respectively. This primarily relates to additional borrowings under the DIP facility reduced by amendment fees. The prior year increase was primarily due to proceeds received from the initial funding under the DIP financing, partially offset by DIP related financing fees.

The fiscal 2015 pension plan and other post-retirement contributions are estimated to be \$22.4 million and \$1.7 million, respectively, which the Company has funded \$4.9 million of during the three months ended June 30, 2014.

In June 2012, the Company announced an agreement to sell approximately 180 acres of undeveloped land surrounding the Company's Frisco, Texas recycling facility and to cease operation of and demolish the recycling facility. The buyer has fully funded an escrow account with the \$45.0 million purchase price, and a portion was made available to the Company to pay for certain demolition and remediation activities on the Company's adjoining property. At the request of regulators and others, the Company will allow interested parties to provide input on pre-closure remedial activities, which may include one or more notice and comment periods. The Company is currently in discussions with regulators regarding the scope of remedial activities on the Company's adjoining property (i.e., the former recycling facility), which may be funded with a portion of the sale proceeds. Consequently, the Company is uncertain of the timing and certainty of closing, and cannot predict the amount of net proceeds to be received. Under the Company's indenture for the Notes, proceeds received, would be required to be invested in future U.S. capital expenditures or toward the repurchase of any Notes outstanding. Under the DIP Credit Agreement, proceeds received, are expected to be used to repay outstanding borrowings under the ABL Facility. To the extent that net proceeds following completion of the remedial activities do not exceed the carrying value of the assets, the Company would be required to recognize an impairment loss, although management currently believes that a loss will not be incurred.

On January 10, 2014, the SCAQMD adopted an amended rule that contained new emissions and equipment requirements with varying compliance dates, including an April 10, 2014 deadline that would require the Company to operate the furnaces at the Vernon facility under continuous "negative pressure" ("Rule 1420.1"). In response, the Company initiated two separate related proceedings on February 7, 2014: (i) a Petition for Variance before the SCAQMD Hearing Board, requesting a delay of the negative pressure requirement until December 31, 2014, and (ii) a Writ of Mandamus in Superior Court of Los Angeles County, seeking to invalidate the negative pressure requirement of Rule 1420.1. Additionally, on February 21, 2014, the Company filed a request for a preliminary injunction that would temporarily suspend the April 10, 2014, deadline until such time as the Superior Court could conduct a trial on the Writ of Mandamus.

On April 7, 2014, the Los Angeles County Superior Court denied the Company's preliminary injunction. Additionally, on April 8, 2014, the SCAQMD Hearing Board denied the Company's variance request. As a result of these two decisions, the Company suspended operations at the Vernon facility until such time as the Company can design, engineer, permit, install, and test new equipment needed to achieve the new standard under Rule 1420.1.

On July 10, 2014 the SCAQMD Hearing Board approved a resolution of the Company's pending administrative matters with the SCAQMD through the issuance of the Stipulated OAs. The Stipulated OAs require the Company: (i) to refrain from resuming operations of the Vernon facility furnaces until it installs certain air quality control improvements required to comply with the newly adopted Rule 1420.1 standards in accordance with SCAQMD issued permits and applicable SCAQMD rules; and (ii) to install those improvements in accordance with an SCAQMD approved dust mitigation plan. Concurrently, in a settlement agreement, the Company agreed to dismiss its Writ of

Mandamus legal action. The Company currently estimates the full operation of the furnaces under continuous negative pressure will not occur until after installation of the aforesaid equipment expected to be completed in the fourth quarter of fiscal 2015 should the Company decide to proceed.

The Company will need to continue to find alternative sources of lead to ensure adequate supply of this critical raw material component in its products. If the Company is unable to find such sources of lead or if it procures such sources of lead at significantly higher cost, such circumstances would result in a material adverse affect on the Company's business, financial condition, cash flows, or results of operations.

Risks and uncertainties could cause the Company's performance to materially differ from management's estimates. As discussed above under "Factors Which Affect the Company's Financial Performance – Seasonality and Weather," the

Table of Contents

Company's business is seasonal. During the Company's first and second fiscal quarters, the Company builds inventory in anticipation of increased sales in the winter months. This inventory build increases the Company's working capital needs. During these quarters, because working capital needs are already high, unexpected decreases in cash flows or, unexpected increases in costs beyond predicted levels could adversely affect the Company's near term liquidity.

Financial Instruments and Market Risk

From time to time, the Company has used forward contracts to hedge certain commodity price exposures, including lead. The forward contracts are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The Company expects that it may increase the use of financial instruments, including fixed and variable rate debt as well as swap, forward and option contracts to finance its operations and to hedge interest rate, currency and, certain commodity purchasing related risks in the future. The swap, forward, and option contracts would be entered into for periods consistent with related underlying exposures and would not constitute positions independent of those exposures. The Company has not entered into, and does not intend to enter into, contracts for speculative purposes nor be a party to any leveraged instruments.

The Company's ability to utilize financial instruments may be restricted because of tightening, and/or elimination of unsecured credit availability with counter-parties. If the Company is unable to utilize such instruments, the Company may be exposed to greater risk with respect to its ability to manage exposures to fluctuations in foreign currencies, interest rates, lead prices, and other commodities.

Accounts Receivable Factoring Arrangements

In the ordinary course of business, the Company utilizes accounts receivable factoring arrangements in countries where programs of this type are typical. Under these arrangements, the Company may sell certain of its trade accounts receivable to financial institutions. The arrangements in virtually all cases do not contain recourse provisions against the Company for its customers' failure to pay. The Company sold approximately \$90.2 million and \$87.5 million of accounts receivable as of June 30, 2014 and March 31, 2014, respectively. Changes in the level of receivables sold from year to year are included in the change in accounts receivable within cash flow from operations in the Consolidated Statements of Cash Flows.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Changes to the quantitative and qualitative market risks as of June 30, 2014 are described in Item 2 above. Also, see the Company's annual report on Form 10-K for the fiscal year ended March 31, 2014 for further information.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company's chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of senior management, including the chief executive officer and the chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon this evaluation, the chief executive officer and the chief financial officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2014.

Changes in Internal Control Over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting during the fiscal quarter ended June 30, 2014 that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR

PROVISION OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Except for historical information, this report may be deemed to contain "forward-looking" statements. The Company is including this cautionary statement for the express purpose of availing itself of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

Examples of forward-looking statements include, but are not limited to (i) projections of revenues, cost of raw materials, income or loss, earnings or loss per share, capital expenditures, growth prospects, dividends, the a of currency translations, capital structure, and other financial items, (ii) statements of plans and objectives of the Company or its management or Board of Directors, including the introduction of new products, or estimates or predictions of actions by customers, suppliers, competitors or regulating authorities, (iii) statements of future economic performance, and (iv) statements of assumptions, such as the prevailing weather conditions in the Company's market areas, underlying other statements and statements about the Company or its business.

Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, the following general factors such as: (i) the ability of the Company to develop, prosecute, confirm and consummate the Chapter 11 plan of reorganization, (ii) the potential adverse impact of the Chapter 11 filing on the Company's liquidity and operations and the risks associated with operating businesses under Chapter 11 protection, (iii) the ability of Exide to comply with the terms of the DIP financing facility, (iv) the Company's ability to obtain additional financing, (v) the Company's ability to retain key management and employees, (vi) customer response to the Chapter 11 filing, (vii) the risk factors or uncertainties listed from time to time in the Company's filings with the Securities and Exchange Commission and with the U.S. Bankruptcy Court in connection with the Company's Chapter 11 filing, (viii) the fact that lead, a major constituent in most of the Company's products, experiences significant fluctuations in market price and is a hazardous material that may give rise to costly environmental and safety claims, (ix) the Company's ability to implement and fund business strategies based on current liquidity, (x) the Company's ability to realize anticipated efficiencies and avoid additional unanticipated costs related to its restructuring activities, (xi) the cyclical nature of the industries in which the Company operates and the impact of current adverse economic conditions on those industries, (xii) unseasonable weather (warm winters and cool summers) which adversely affects demand for automotive and some industrial batteries, (xiii) the Company's substantial debt and debt service

requirements which may restrict the Company's operational and financial flexibility, as well as imposing significant interest and financing costs, (xiv) the litigation proceedings to which the Company is subject, the results of which could have a material adverse affect on the Company and its business, (xv) the realization of the tax benefits of the Company's net operating loss carry forwards, which is dependent upon future taxable income, (xvi) competitiveness of the battery markets in the Americas

Table of Contents

and Europe, (xvii) risks involved in foreign operations such as disruption of markets, changes in import and export laws, currency restrictions, currency exchange rate fluctuations and possible terrorist attacks against U.S. interests, (xviii) the ability to acquire goods and services and/or fulfill later needs at budgeted costs, (xix) general economic conditions, (xx) the Company's ability to successfully pass along increased material costs to its customers, (xxi) recently adopted U.S. lead emissions standards and the implementation of such standards by applicable states, (xxii) the Company's ability to resume operations at its Vernon, California recycling facility, and (xxiii) those risk factors described in the Company's Form 10-K for the fiscal ended March 31, 2014.

The Company cautions each reader of this report to carefully consider those factors set forth above. Such factors have, in some instances, affected and in the future could affect the ability of the Company to achieve its projected results and may cause actual results to differ materially from those expressed herein. We undertake no obligation to update any forward-looking statements in this Form 10-Q.
