

ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/
Form 10-Q
August 04, 2009

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D. C. 20549

FORM 10-Q

Quarterly report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended June 30, 2009 or

Transition report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

001-09731

(Commission file No.)

ARRHYTHMIA RESEARCH TECHNOLOGY, INC.
(Exact name of registrant as specified in its charter)

DELAWARE

(State or other jurisdiction of incorporation
or organization)

72-0925679

(I.R.S. employer identification no.)

25 Sawyer Passway
Fitchburg, Massachusetts 01420
(Address of principal executive offices)

(978) 345-5000

(Issuer's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer [] Accelerated filer [] Non-Accelerated filer [] Smaller reporting company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of July 30, 2009 there were 2,675,481 shares of the Company's common stock outstanding.

ARRHYTHMIA RESEARCH TECHNOLOGY, INC.

Cash and cash equivalents at end of period	\$ 2,016,570	\$ 2,232,770

The accompanying notes are an integral part of the consolidated financial statements.

Notes to the Consolidated Financial Statements

1. Basis of Presentation:

The unaudited interim consolidated financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in complete financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The accompanying unaudited interim consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Arrhythmia Research Technology, Inc. and subsidiary (the "Company") Annual Report on Form 10-K for the year ended December 31, 2008 filed March 25, 2009.

The information presented reflects, in the opinion of the management of the Company, all adjustments necessary for a fair presentation of the financial results for the interim period presented.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Operating results for interim periods are not necessarily indicative of results that may be expected for the entire fiscal year.

2. Inventories:

Inventories consist of the following as of:	June 30, 2009	December 31, 2008
Raw materials	\$ 1,219,933	\$ 1,099,876
Work-in-process	457,655	773,245
Finished goods	1,913,878	1,854,371
Total	\$ 3,591,466	\$ 3,727,492

3. Share-Based Compensation:

The Company accounts for non-cash share based compensation under Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment, which accounts for equity instruments exchanged for employee services. Under the provisions of SFAS 123(R), share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grant).

The Company estimates the fair value of stock options using the Black-Scholes valuation model. Key input assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of the Company's stock over the option's expected term, the risk-free interest rate over the option's expected term, and the Company's expected annual dividend yield. The Company believes that the valuation technique and the approach utilized to develop the underlying assumptions are appropriate in calculating the fair values of the Company's stock options. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by persons who receive equity awards.

The following assumptions were used to estimate the fair market value of options granted using the Black Scholes valuation method:

	Six Months Ended June 30, 2008
Dividend Yield	0%
Expected Volatility	40.65%
Risk Free Interest Rate	3.28%
Expected Option Terms (in years)	4.5

The Company recognized share-based compensation expense of \$36,770 and \$54,338 in general and administrative expense for the six months ended June 30, 2009 and 2008, respectively. A grant totaling 107,500 options to 24 persons including directors and management was made during the six months ended June 30, 2008. No grants were made in the first six months of 2009.

Share-based Incentive Plan

At June 30, 2009, the Company has one stock option plan that includes both incentive stock options and non-statutory stock options to be granted to certain eligible employees, non-employee directors, or consultants of the Company. The maximum number of shares reserved for issuance is 400,000 shares. The options granted have six-year contractual terms and either vest immediately or vest annually over a five-year term.

At June 30, 2009, there were 140,000 shares available for future grants under the above stock option plan. The weighted average exercise price of options outstanding was \$8.76 at June 30, 2009.

The following table presents the average price and contractual life information about options outstanding and exercisable at June 30, 2009:

Exercise Price	Number of Outstanding Shares	Weighted Average Contractual Life (years)	Number of Remaining Options Currently Exercisable	Average Fair Value at Grant Date
\$ 4.85	25,000	0.08	25,000	\$ 0.66
7.15	96,000	4.51	19,200	2.74
9.86	69,000	2.47	66,000	4.22
12.42	10,000	3.10	4,000	5.38
23.10	10,000	3.68	4,000	10.77

The aggregated intrinsic value of options outstanding and vested at June 30, 2009 was \$0. The Company expects 73,000 of the 88,800 options to vest over their remaining life.

The following table summarizes the status of Company's non-vested options since December 31, 2008:

	Non-Vested Options	Weighted Average Fair Value
	Number of Shares	Value
Non-vested at December 31, 2008	111,000	\$ 3.46
Granted	-	-
Vested	(21,200)	3.50
Forfeited	(1,000)	2.74
Non-vested at June 30, 2009	88,800	\$ 3.46

At June 30, 2009, there was \$258,366 of total unrecognized cost related to non-vested share-based compensation arrangements granted under the Plan. This non-cash expense is expected to be recognized over a weighted average period of 4.22 years.

4. Income Taxes:

The Company accounts for income taxes in accordance with FASB Interpretation No. 48 (“FIN 48”), Accounting for Uncertainty in Income Taxes which is an interpretation of SFAS No. 109, Accounting for Income Taxes. FIN 48 requires management to perform a two-step evaluation of all tax positions, ensuring that these tax return positions meet the “more-likely than not” recognition threshold and can be measured with sufficient precision to determine the benefit recognized in the financial statements.

The Company files income tax returns in the U.S. Federal jurisdiction and various state jurisdictions. The periods from 2005 to 2008 remain open to examination by the IRS and state jurisdictions. The Company believes it is not subject to any significant tax risk. The Company does not have any accrued interest or penalties associated with any unrecognized tax benefits. Interest and penalties for a state jurisdiction audit of revenue and sales tax over a 3 year period resulted in \$1,685 of interest expense recognized during the six months ended June 30, 2009.

5. Earnings per share:

In accordance with SFAS No. 128, the basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional shares that would have been outstanding if the potential shares had been issued and if the additional shares were dilutive. At June 30, 2009, all of stock equivalents were anti-dilutive and excluded in the earnings per share computation.

6. Asset Impairment:

Asset impairment charges of \$22,378 were recorded in the three months ended June 30, 2008. These charges were related to equipment used in the testing of sensors in the assembly of electrodes. The equipment has been written down to its estimated net realizable value.

7. Recent Accounting Pronouncements:

In March 2008, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 161, “Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133.” SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities,” to provide improved transparency into the uses and financial statement impact of derivative instruments and hedging activities. The adoption of SFAS No. 161 did not have a material impact on our Financial Statements.

In April 2008, the FASB issued FASB Staff Position (“FSP”) FAS No. 142-3, “Determination of the Useful Life of Intangible Assets” (“FSP FAS 142-3”). This pronouncement amends FASB Statement of Financial Accounting Standards (“SFAS”) No. 142, “Goodwill and Other Intangible Assets” (“SFAS No. 142”), regarding the factors that should be considered in developing the useful lives for intangible assets with renewal or extension provisions. FSP FAS 142-3 requires an entity to consider its own historical experience in renewing or extending similar arrangements, regardless of whether those arrangements have explicit renewal or extension provisions, when determining the useful life of an intangible asset. In the absence of such experience, an entity shall consider the assumptions that market participants would use about renewal or extension, adjusted for entity-specific factors. FSP FAS 142-3 also requires an entity to disclose information regarding the extent to which the expected future cash flows associated with an intangible asset are affected by the entity’s intent and/or ability to renew or extend the arrangement. FSP FAS 142-3 will be effective for qualifying intangible assets acquired by the Company on or after July 1, 2009. The application of FSP FAS 142-3 is not expected to have a material impact on the Company’s results of operations, cash flows or financial positions; however, it could impact future transactions entered into by the Company.

In May 2009, the FASB issued SFAS No. 165, “Subsequent Events” (“SFAS 165”). SFAS 165 sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS 165 will be effective for interim or annual periods ending after June 15, 2009 and will be applied prospectively. The Company will adopt the requirements of this pronouncement for the quarter ended June 30, 2009. The Company does not anticipate the adoption of SFAS 165 will have an impact on its consolidated results of operations or consolidated financial position.

In June 2009, the FASB issued SFAS No. 168 “The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles – A Replacement of FASB Statement No. 162” (“SFAS 168”). Statement 168 establishes the FASB Accounting Standards Codification™ (Codification) as the single source of authoritative U.S. generally accepted accounting principles (U.S. GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. SFAS 168 and the Codification are effective for financial statements issued for interim and annual periods ending after September 15, 2009. When effective, the Codification will supersede all existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification will become nonauthoritative. Following SFAS 168, the FASB will not issue new standards in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts. Instead, the FASB will issue Accounting Standards Updates, which will serve only to: (a) update the Codification; (b) provide background information about the guidance; and (c) provide the bases for conclusions on the change(s) in the Codification. The adoption of SFAS 168 will not have an impact on the Company’s consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

Any forward looking statements made herein are based on current expectations of the Company that involve a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. Forward looking statements may be identified by the use of words such as “expect,” “anticipate,” “believe,” “intend,” “plans,” “predict” or “will”. Although the Company believes that our expectations are based on reasonable assumptions, we can give no assurance that our expectations will materialize. Many factors could cause actual results to differ materially from our forward looking statements. Several of these factors include, without limitation: our ability to maintain our current pricing model and/or decrease our cost of sales; continued availability of supplies or materials used in manufacturing at competitive prices; volatility in commodity and energy prices and our ability to offset higher costs with price increases; the costs inherent with complying with new statutes and regulations applicable to public reporting companies, such as the Sarbanes-Oxley Act of 2002; variability of customer delivery requirements; our ability to efficiently integrate future acquisitions and other new lines of business that the Company may enter in the future, if any; and other risks referenced from time to time elsewhere in this report and in our filings with the SEC.

The Company is under no obligation and does not intend to update, revise or otherwise publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of any unanticipated events. More information about factors that potentially could affect the Company's financial results is included in the Company's filings with the Securities and Exchange Commission, including its Annual Report on Form 10-K for the year ended December 31, 2008.

Overview

Arrhythmia Research Technology, Inc. (“ART”) is engaged in the licensing of medical software, which acquires data and analyzes electrical impulses of the heart to detect and aid in the treatment of potentially lethal arrhythmias. Micron Products, Inc. (“Micron”), a wholly owned subsidiary, is the primary source of consolidated revenues. Micron manufactures disposable electrode sensors used as a component part in the manufacture of integrated disposable electro-physiological electrodes. These disposable medical devices are used world wide in the monitoring of electric signals in various medical applications. Micron has expanded into custom plastic injection molded products and product life cycle management. Revenues in this sector are primarily custom injection molding, tooling, and end-to-end product life cycle management through a comprehensive portfolio of value-added services such as design, engineering, prototyping, manufacturing, machining, assembly and packaging.

Results of Operations

Revenue was \$5,371,439 for the three months ended June 30, 2009 as compared to \$6,426,120 for the same period in 2008, a decrease of 16% or \$1,054,681. Revenues associated with the discontinued unprofitable forging product totaled \$1,025,836 in the three months ended June 30, 2008. Sales of Micron's medical sensors and snaps with silver surcharge decreased by \$440,695, while the volume increased by 7%. Management will continue to focus on the protection and growth of sensor market share. Other miscellaneous sales increased by \$41,274. Revenue from the Micron Integrated Technology's (MIT) other product life cycle management programs increased \$370,576. The MIT division in Micron Products includes the custom manufacturing and product life cycle businesses. This division's revenue is derived from the custom molding, precision metal machining and mold making activities.

Revenue was \$10,054,893 for the six months ended June 30, 2009 as compared to \$11,885,862 for the same period in 2008, a decrease of 15% or \$1,830,969. The revenue decrease associated with the discontinued unprofitable forging product totaled \$1,477,981 in the six months ended June 30, 2009 as compared to the same period in 2008. During this same period, sales of Micron's medical sensors and snaps with silver surcharge decreased by \$662,059, while the volume increased by 14%. High volume precision molded products and other miscellaneous sales decreased by \$7,687. Revenue from the Micron Integrated Technology's (MIT) product life cycle management programs excluding the forging product increased by \$365,901. The snap attaching machine business unit decreased \$49,143 when compared to the same period in 2008. There were no sales of the Company's SAECG products in the first six months of 2009 or 2008.

Revenue from domestic and foreign sales for the first six months is as follows:

	Three Months Ending June 30,				Six Months Ending June 30,			
	2009	%	2008	%	2009	%	2008	%
United States	\$ 3,505,679	65	\$ 3,872,638	60	\$ 6,121,668	61	\$ 6,939,389	58
Canada	873,421	16	1,322,181	21	1,820,099	18	2,663,196	22
Europe	571,091	11	919,573	14	1,372,637	14	1,713,181	15
Pacific Rim	176,045	3	136,709	2	327,475	3	236,362	2
Other	245,203	5	175,019	3	413,014	4	333,734	3
Total	\$ 5,371,439	100	\$ 6,426,120	100	\$ 10,054,893	100	\$ 11,885,862	100

The decrease in domestic sales was largely a result of the MIT division's elimination of an unprofitable forging product. Canadian sales decrease is the result of price concessions and a decrease in silver surcharge collected for Micron's electrophysiological sensor product lines.

Cost of sales was \$4,496,306 or 83.7% for the three months ended June 30, 2009 as compared to \$5,079,649 or 79% for the same period in 2009. Cost of sales was \$8,235,447 or 81.9% for the six months ended June 30, 2009 as compared to \$9,427,953 or 79.3% for the same period in 2008. Cost of manufacturing has been stabilized with the recent success of a company-wide cost reduction team. The reduction and stabilization of costs remains a priority of management efforts. The inability to increase our sensor prices in the competitive global marketplace hinders passing additional material and utility cost increases to our customers, excluding the escalating cost of silver. Management continues to investigate ways to improve the overall gross margin by elimination of low contribution products while expanding higher margin product lines. The investment in automated equipment is ongoing with the full benefit expected to begin the fourth quarter of 2009.

Selling and marketing expense was \$183,729 or 3.5% of sales in the three months ended June 30, 2009 as compared to \$224,654 or 3.5% for the same period in 2008. Selling and marketing expense was \$334,180 or 3.3% of sales for the six months ended June 30, 2009 as compared to \$415,028 or 3.5% of sales for the same period in 2008 a decrease of 19.5%. Selling expenses continue to be stable as a percentage of sales. The decrease in selling expenses reflects a decrease in personnel and travel costs. Selling expenses as a percentage of sales has been and is expected to remain stable in 2009.

General and administrative expense was \$512,391 or 9.6% of sales for the three months ended June 30, 2009 as compared to \$779,084 or 12% of sales for the same period in 2008. General and administrative expense was \$1,087,895 or 10.8% of sales for the six months ended June 30, 2009 as compared to \$1,395,948 or 11.7% of sales for the same period in 2008. Included in the expense for the three months ended June 30, 2008 was a one time charge of \$250,000 for costs associated with a terminated acquisition following due diligence. The 2009 general and administrative expense is expected to increase as the Section 404 of the Sarbanes-Oxley Act of 2002 compliance project is completed this year.

Research and development expense was \$57,716 or 1.1% of sales for the three months ended June 30, 2009 as compared to \$129,051 or 2.0% of sales for the same period in 2008. Research and development expense was \$126,463 or 1.3% of sales for the six months ended June 30, 2009 as compared to \$212,673 or 1.8% of sales in the same period in 2008. The proportion of expense related to ART's product, Predictor®7 was \$7,393 and \$11,649 for the three and six months ended June 30, 2009, compared to \$19,320 and \$40,041 for the same periods in 2008. Although base development work on Predictor 7 has been completed, costs were expended to support a National Institute of Health research project utilizing ART's proprietary Signal Averaged ECG products and patented

algorithms. The remaining portion of the research and development expense is associated with continued work on process improvements to Micron sensor and snap product line and new processes in MIT. This work is expected to continue through the end of 2009.

Other expense, net was \$5,377 for the three months ended June 30, 2009 as compared to \$5,563 for the same period in 2008. Other expense, net was \$19,210 for the six months ended June 30, 2009 as compared to \$769 for the same period in 2008. Interest income in the six months ended June 30, 2009 was offset by a loss on disposal of assets of \$8,904 and interest expense of \$20,334 associated with an equipment note as compared to \$23,772 interest expense in 2008.

Income taxes as a percent of income before income taxes were 37% for the six months ended June 30, 2009 as compared to 35% for the same period in 2008. This difference was the result of tax credits earned in 2008. Management will continue to seek to implement any tax planning opportunities that could effectively reduce the Company's income tax obligations in the future.

Liquidity and Capital Resources

Working capital was \$7,701,339 at June 30, 2009 compared to \$7,440,721 at December 31, 2008, an increase of \$260,618. The increase resulted from the operational cash flows exceeding our capital investment, reduction of debt and stock repurchase program. Capital investment will decrease working capital with any significant investment resulting from future acquisition of assets or businesses, significant expansion of production capacity, a medical study, or further software development. Capital investment in automation equipment is expected to reduce working capital over the next 6 months of 2009.

Net capital expenditures were \$634,572 for the first six months of 2009 as compared to \$264,743 for the same period in 2008. The largest portion of the capital expenditures in the first six months of 2009 resulted from adding automation equipment to our sensor product line. Some of the expenditures were in the form of deposits on production equipment to be installed in the third quarter. At least an additional \$400,000 will be invested in this automation project before the end of 2009. Included in the capital expenditures for the same period in 2008 was the continued installation of the Enterprise Resource Planning software, including shop floor bar code acquisition devices, as well as upgrades to and replacement of existing machinery and tooling. Capital expenditures for the six months ended June 30, 2009 were made with cash from operations.

The Company has an unsecured \$1,000,000 credit line with a large multinational bank. No funds have been drawn down on the line as of June 30, 2009 or December 31, 2008. The Company has a one year term note secured by equipment with a balance at December 31, 2008 of \$638,091. In the third quarter of 2008, the equipment note was extended for one year with a decrease in the fixed rate from 6.75% to 6.5% per annum. The equipment note is amortized over 6 years with a balloon payment for the remaining balance at September 15, 2009. The acquisition note related to the acquisition of Leominster Tool in December of 2006 was paid in full in March 2008.

The Company expects to meet cash demands for its operations at current levels with current operating cash flows for the foreseeable future.

In October 2008, the Company's Board of Directors authorized the repurchase in the open market from time to time of up to \$650,000 of the Company's outstanding stock. An aggregate of 23,389 shares were purchased in the fourth quarter of 2008 under the program for an aggregate of \$53,975. An additional aggregate purchase of 12,810 shares was made in the second quarter of 2009 under the program for \$33,188.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with generally accepted accounting principles requires management to make judgments, assumptions and estimates that affect the amounts reported. Certain of these significant accounting policies are considered to be critical accounting policies, as defined below.

A critical accounting policy is defined as one that is both material to the presentation of the Company's financial statements and requires management to make difficult, subjective, and complex judgments that could have a material effect on the Company's financial condition and results of operations. Specifically, critical accounting estimates have the following attributes: 1) the Company is required to make assumptions about matters that are highly uncertain at the time of the estimate; and 2) different estimates the Company could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on the Company's financial condition or results of operations.

Estimates and assumptions about future events and their effects cannot be determined with certainty. The Company bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable in the circumstances. These estimates may change as new events occur, as additional information is obtained and as the Company's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties are discussed in the section above entitled "Forward-looking Statements." Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that the Company's consolidated financial statements are fairly stated in accordance with generally accepted accounting principles, and present a meaningful presentation of the Company's financial condition and results of operations.

Management believes that the following are critical accounting policies:

Revenue Recognition and Accounts Receivable

Revenues from the sale of products are recorded when the product is shipped, title and risk of loss have transferred to the purchaser, payment terms are fixed or determinable and payment is reasonably assured.

The financing of customer purchased tooling utilizes the direct financing method of revenue recognition. This requires the gain on the sale of the tooling to be recorded at the time the tool is put into service while the expected payments are reflected as a lease receivable.

Based on management's on-going analysis of accounts receivable balances, and after the initial recognition of the revenue, if an event occurs which may adversely affect the ultimate collectability of the related receivable, management will record an allowance for the bad debt. Bad debts have not had a significant impact on the Company's financial condition, results of operations or cash flows.

Stock-Based Compensation

The Company accounts for share based compensation under SFAS No. 123R, "Share Based Payment" ("FAS 123R"). FAS 123R requires that companies recognize and measure compensation expense for all share-based payments at the grant date based on the fair market value of the award. This share-based compensation expense must be included in the Company's statement of operations over the requisite service period.

The Company uses the Black-Scholes option pricing model which requires extensive use of financial estimates and accounting judgment, including the expected volatility of the Company's common stock over the estimated term, and estimates on the expected time period that employees will retain their vested options prior to exercising them. The use of alternative assumptions could produce significantly different estimates of the fair value of the stock-based compensation and as a result, provide significantly different amounts recognized in the Company's statement of income.

Inventory and Inventory Reserves

The Company values its inventory at the lower of cost or market. The Company reviews its inventory for quantities in excess of production requirements, obsolescence and for compliance with internal quality specifications. Any adjustments to inventory would be equal to the difference between the cost of inventory and the estimated net market value based upon assumptions about future demand, market conditions and expected cost to distribute those products to market. If actual market conditions are less favorable than those projected by management, additional inventory reserves may be required.

The Company maintains a reserve for excess, slow moving, and obsolete inventory as well as inventory with a carrying value in excess of its net realizable value. A review of inventory on hand is made at least annually and a provision for excess, slow moving, and obsolete inventory is recorded, if necessary. The review is based on several factors including a current assessment of future product demand, historical experience, and product expiration.

Deferred Tax Assets

The Company assesses its deferred tax assets based upon a more likely than not to be realized criteria. The Company considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In accordance with FIN 48 we recognize the benefits of a tax position if that position is more

likely than not to be sustained on audit, based on the technical merit of the position.

Asset Impairment – Goodwill

The Company reviews the valuation of goodwill and intangible assets to assess potential impairments on an annual basis. The management evaluates the carrying value of goodwill and other intangible assets in accordance with the guidelines set forth in SFAS 142. The value assigned to intangible assets is determined by a valuation based on estimates and judgment regarding expectations for the success and life cycle of products and businesses acquired. To test for impairment, present values of an estimate of future discounted cash flows related to the intangible assets are calculated compared to the value of the intangible asset. When impairment exists it could have a material adverse effect on the Company's business, financial condition and results of operations. As of June 30, 2009, no impairment of goodwill was required.

Asset Impairment – Long Lived Assets

The Company assesses the impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. When it is determined that the carrying value of such assets may not be recoverable, the Company generally measures any impairment based on projected undiscounted future cash flows attributed to the asset and its carrying value. If the carrying value exceeds the future discounted cash flows, asset impairment would be recorded.

Item 3. Quantitative and Qualitative Disclosure About Market Risks

Not applicable.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report, the Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer ("the Certifying Officers"), conducted evaluations of the Company's disclosure controls and procedures. As defined under Sections 13a – 15(e) and 15d – 15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the term "disclosure controls and procedures" means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, included the Certifying Officers, to allow timely decisions regarding required disclosures. Based on this evaluation, the Certifying Officers have concluded that the Company's disclosure controls and procedures were effective to ensure that material information is recorded, processed, summarized and reported by management of the Company on a timely basis in order to comply with the Company's disclosure obligations under the Exchange Act and the rules and regulations promulgated thereunder.

Changes in Internal Control over Financial Reporting

Further, there were no changes in the Company's internal control over financial reporting during the Company's second fiscal quarter that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 5. Risk Factors

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2008.

Failure to comply with Quality System Regulations or industry standards could result in a material adverse effect on our business and results of operations.

The Company's Quality Management System complies with the requirements of ISO 9001:2000. In addition, many of our products are also subject to industry-defined standards. If we are not able to comply with the Quality Management System or industry-defined standards, we may not be able to fill customer orders to the satisfaction of our customers. Failure to produce products compliant with these standards could lead to loss of customers which would have an adverse impact on our business and results of operations.

The initiatives that we are implementing in an effort to improve our manufacturing productivity could be unsuccessful, which could harm our business and results of operations.

In an effort to improve our manufacturing productivity, we have implemented several strategic initiatives focusing on improving our manufacturing processes and procedures. We believe these initiatives should improve customer satisfaction as well as our revenue and income. However, in the event these initiatives are not successful, due to our failure to fully embrace the concepts and maximize the benefits of the investments of equipment and technology, the results of operations will not improve as expected.

Item 6. Submission of Matters to a Vote of Security Holders.

On June 19, 2009, the Company held its Annual Meeting of Stockholders. The following is a tabulation of the voting on the proposals presented at the Annual Meeting.

Proposal 1: The following nominees were elected as a Class II directors, each to serve for three years and until his successor has been duly elected and qualified.

	Shares Voted For	Shares Withheld
Mr. E.P. Marinos	1,953,989	521,914
Dr. Julius Tabin	2,217,533	258,370

The terms of office of Dr. Paul Walter (Class III director) and Mr. James E. Rouse and Mr. Jason R. Chambers (Class I directors) continued after the Annual Meeting.

Proposal 2: The appointment of CCR LLP as the Company's independent registered public accounting firm for the year ending December 31, 2009 was ratified.

Shares Voted For	Shares Withheld	Shares Abstaining
2,419,550	33,754	22,599

Proposal 3: To consider and vote on a proposal to authorize the Board of Directors to adjourn the Annual Meeting to a later date or dates, if necessary, to allow time for further solicitation of proxies, in the event there are insufficient votes present in person or represented by proxy at the Annual Meeting to approve the proposals.

Shares Voted For	Shares Withheld	Shares Abstaining
1,960,538	491,733	23,632

Item 7. Exhibits

(a) Exhibits

3.0 Articles of Incorporation(a)

3.1 Amended and Restated By-laws(b)

10.43* Employment agreement between James E. Rouse and the Company dated December 26th, 2006.(c)

10.44* Employment agreement between David A. Garrison and the Company dated January 1st, 2007.(d)

31.1 Certification of the CEO pursuant to Rule 13a-14(a) or Rule 15(d)-14(a) on page X-1.

31.2 Certification of the CFO pursuant to Rule 13a-14(a) or Rule 15(d)-14(a) on page X-2.

32.1 Certification pursuant to 18 U.S.C. §1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 on page X-3.

32.2 Certification pursuant to 18 U.S.C. §1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 on page X-4.

* Indicates a management contract or compensatory plan required to be filed as an exhibit.

- (a) Incorporated by reference from the Company's Registration Statement on Form S-18 as filed with the Commission in April 1988, Registration Statement No. 33-20945-FW.
 - (b) Incorporated by reference from the Company's Form 8-K as filed with the Commission May 8, 2009.
 - (c) Incorporated by reference from the Company's Form 8-K as filed with the Commission on December 8, 2006.
 - (d) Incorporated by reference from the Company's Form 10-KSB for period ended December 31, 2006 as filed with the Commission in March of 2007.
