- (a) Securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At February 28, 2014, these securities amounted to \$185,034,655, which represents 60.6% of net assets.
- (b) All or a portion of these securities have been physically segregated in connection with borrowings, unfunded commitments and reverse repurchase agreements. As of February 28, 2014, the total amount segregated was \$411,375,801.

- (c) Illiquid security.
- (d) Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.
- (e) Security is perpetual and, thus does not have a predetermined maturity date. The coupon rate shown is in effect as of February 28, 2014.
- (f) The issuer of this security will accrue interest on the secured note at a rate of 12% per annum and will make interest payments as follows: (1) 10% in cash and (2) 2% payment-in-kind shares of the secured note.
- (g) Paid-in-kind toggle note. The issuer in each interest period has the option to pay interest in cash or to issue payment-in-kind shares of the note.
- (h) Floating or variable rate coupon. The rate shown is as of February 28, 2014.
- (i) Non-income producing as security is in default.
- (j) Security is valued in accordance with Fair Valuation procedures established in good faith by management and approved by the Board of Trustees and is based, in part on significant unobservable inputs. The total market value of such securities is \$2,932,129 which represents 1.0% of net assets.
- (k) Security has no stated coupon. However, it is expected to receive residual cashflow payments on deal defined payment dates.
- (1) Security is a "Step-up" bond where the coupon increases or steps up at a predetermined date. The rate shown reflects the rate in effect as of February 28, 2014.
- (m) Term loans held by the Fund have a variable interest rate feature which is periodically adjusted based on an underlying interest rate benchmark. In addition, term loans may include mandatory and/or optional prepayment terms. As a result, the actual maturity dates of the loan may be different than the amounts disclosed in the portfolios of investments. Term loans may be considered restricted in that the Fund may be contractually obligated to secure approval from the Agent Bank and/or Borrower prior to the sale or disposition of loan.
- (n) Non-income producing security.
- (o) Security represents cover for outstanding written options.

See previously submitted notes to financial statements for the period ended November 30, 2013.

(1) The Fund receives a fixed rate based upon the notional amount of \$3 million and if a defined credit event occurs,

pays cumulative losses in excess of a stated percentage on an underlying basket of distinct corporate entities.

The maximum loss exposure is \$3 million.

(2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap

agreements on corporate issues or sovereign issues of an emerging country as of period end serve as an indicator of the

current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The

implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront

payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced

entity's credit soundless and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

At February 28, 2014, the Fund had the following unfunded loan commitments which could be extended at the option of the borrower:

The Fund values equity securities at the last reported sale price on the principal exchange or in the principal over-the-counter ("OTC") market in which such securities are traded, as of the close of regular trading on the New York Stock Exchange ("NYSE") on the day the securities are being valued or, if there are no sales, at the mean between the last available bid and ask prices on that day. Securities traded on the NASDAO are valued at the NASDAQ Official Closing Price. Preferred stocks are valued at their sale price as of the close of the exchange on which they are traded. Preferred stocks for which the last sale price is not available are valued at the last available bid price. Debt securities (including asset-backed securities, collateralized mortgage obligations and term loans) are valued at the last available bid price. If bids are not available, debt securities are estimated using valuation models that incorporate market data that may include assumptions relating to current yields, timing of cash flows, dealer quotes, prepayment risk, value of underlying collateral, general market conditions, liquidity and prices of other debt securities with comparable coupon rates, maturities/duration, and credit quality. Municipal bonds are valued at the last available bid price for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. Foreign securities are translated from the local currency into U.S. dollars using the current exchange rate. The Fund's securities that are primarily traded in foreign markets may be traded in such markets on days that the NYSE is closed. As a result, the net asset value of the Fund may be significantly affected on days when holders of common shares have no ability to trade common shares on the NYSE. Exchange traded funds are valued at the last sale price or official closing price on the exchange where the security is principally traded. Investment companies are valued at the last available closing price. The Fund values exchange-traded options and other derivative contracts at the mean of the best bid and ask prices at the close on those exchanges on which they are traded. Swaps are valued daily by independent pricing services or dealers using the mid price. Short-term securities with remaining maturities of 60 days or less, at the time of purchase, are valued at amortized cost, which approximates market value. The Fund values money market funds at net asset value.

For those securities where quotations or prices are not available, the valuations are determined in accordance with procedures established in good faith by management and approved by the Board of Trustees ("Trustees"). A valuation committee consisting of representatives from investment management, fund administration, legal and compliance is responsible for the oversight of the valuation process of the Fund and convenes monthly, or more frequently as needed. The valuation committee reviews monthly Level 3 fair valued securities methodology, price overrides, broker quoted securities, price source changes, illiquid securities, unchanged valuations, halted securities, price challenges, fair valued securities sold and back testing trade prices in relation to prior day closing prices. On a quarterly basis, the valuations and methodologies of all Level 3 fair valued securities are presented to the Fund's Trustees.

Valuations in accordance with these procedures are intended to reflect each security's (or asset's) "fair value." Fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. Each such determination is based on a consideration of

all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security's disposition, (iv) the price and extent of public trading in similar securities of the issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security).

For fixed income securities, fair valuations may include input from Guggenheim Partners Investment Management, LLC ("GPIM") utilizing a wide variety of market data including yields or prices of investments of comparable quality, type of issue, coupon, maturity, rating, indications of value from security dealers, evaluations of anticipated cash flows or collateral, spread over Treasuries, and other information and analysis. GPIM also uses third party service providers to model certain securities using cash flow models to represent a fair market value.

There are three different categories for valuation. Level 1 valuations are those based upon quoted prices in active markets. Level 2 valuations are those based upon quoted prices in inactive markets or based upon significant observable inputs (e.g. yield curves; benchmark interest rates; indices). Level 3 valuations are those based upon unobservable inputs (e.g. discounted cash flow analysis; non-market based methods used to determine fair valuations).

The Fund values Level 1 securities using readily available market quotations in active markets. The Fund values Level 2 fixed income securities using independent pricing providers who employ matrix pricing models utilizing market prices, broker quotes and prices of securities with comparable maturities and qualities. In addition, the Fund values certain Level 2 fixed income securities using broker quotes. The Fund values Level 2 equity securities using various observable market inputs as described above. The fair value estimate for the Level 3 securities in the Fund are determined in accordance with the Fund's valuation procedures described above.

Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

The following table represents the Fund's investments carried by caption and by level within the fair value hierarchy at February 28, 2014.

The following table summarizes valuation techniques and inputs used in determining the fair value of holdings categorized as Level 3 at February 28, 2014:

Investments, at Value Asset Backed Securities:	Value as of February 28,2014	Valuation Technique	Unobservable Inputs
Collateralized Loan			Discounted Projected Cash
Obligations	\$ 3	Model Price	Flows
-		Third-Party	
Credit Cards	966,206	Pricing Vendor	Single Broker Quote
Term Loans:		-	-
Health Care	1,078,000	Cost	Trade Price
