INFORMATION ABOUT GUGGENHEIM STRATEGIC
OPPORTUNITIES FUND

The shareholder report you are reading right now is just the beginning of the story.
Online at guggenheiminvestments.com/gof, you will find:

- Daily, weekly and monthly data on share prices, net asset values, distributions and more
- Portfolio overviews and performance analyses
- Announcements, press releases and special notices
- Fund and adviser contact information

Guggenheim Partners Investment Management, LLC and Guggenheim Funds Investment Advisors, LLC are continually updating and expanding shareholder information services on the Fund's website in an ongoing effort to provide you with the most current information about how your Fund's assets are managed and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Fund.

(Unaudited)

November 30, 2015

DEAR SHAREHOLDER

We thank you for your investment in the Guggenheim Strategic Opportunities Fund (the “Fund”). This report covers the Fund’s performance for the six-month period ended November 30, 2015.

The Fund’s investment objective is to maximize total return through a combination of current income and capital appreciation. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. There is no guarantee that the perceived fair value will be achieved. The Fund’s sub-adviser seeks to combine a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies.

All Fund returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2015, the Fund provided a total return based on market price of -11.52% and a total return based on NAV of -2.27%. NAV return includes the deduction of management fees, operating expenses, and all other Fund expenses.

As of November 30, 2015, the Fund’s market price of \$17.69 represented a discount of 2.16% to its NAV of \$18.08. The market value of the Fund’s shares fluctuates from time to time and may be higher or lower than the Fund’s NAV. Past performance is not a guarantee of future results.

From June 2015 through November 2015, the Fund paid a monthly distribution of \$0.1821. The November distribution represents an annualized distribution rate of 12.35% based on the Fund’s closing market price of \$17.69 on November 30, 2015. The Fund’s distribution rate is not constant and is subject to change based on the performance of the Fund. Please see Note 2(h) on page 49 for more information on distributions for the period.

Guggenheim Funds Investment Advisors, LLC (the “Adviser”) serves as the investment adviser to the Fund. Guggenheim Partners Investment Management, LLC (“GPIM” or the “Sub-Adviser”) serves as the Fund’s investment sub-adviser and is responsible for the management of the Fund’s portfolio of investments. Each of the Adviser and the Sub-Adviser is an affiliate of Guggenheim Partners, LLC (“Guggenheim”), a global diversified financial services firm.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan (“DRIP”), which is described in detail on page 67 of this report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund’s common shares is at a premium above NAV, the DRIP reinvests participants’ dividends in newly-issued common shares at the greater of NAV per share or 95% of the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time. Since the Fund endeavors to maintain a stable monthly distribution, the DRIP effectively provides an income averaging technique, which causes shareholders to accumulate a larger number of Fund shares when the market price is depressed than when the price is higher.

41 GOF 1 GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT

QUESTIONS & ANSWERS (Unaudited)

November 30, 2015

Guggenheim Strategic Opportunities Fund (“Fund”) is managed by a team of seasoned professionals at Guggenheim Partners Investment Management, LLC (“GPIM”). This team includes B. Scott Miner, Chairman of Guggenheim Investments and Global Chief Investment Officer; Anne B. Walsh, CFA, JD, Senior Managing Director and Assistant Chief Investment Officer; and James W. Michal, Managing Director and Portfolio Manager. In the following interview, the investment team discusses the market environment and the Fund’s performance for the six-month period ended November 30, 2015.

What is the Fund’s investment objective and how is it pursued?

The Fund seeks to maximize total return through a combination of current income and capital appreciation. The Fund pursues a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. There is no guarantee that the perceived fair value of the Fund’s portfolio investments will be achieved.

GPIM seeks to combine a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. The Fund seeks to achieve its investment objective by investing in a wide range of fixed-income and other debt and senior-equity securities (“Income Securities”) selected from a variety of credit qualities and sectors, including, but not limited to, corporate bonds, loans and loan participations, structured finance investments, U.S. government and agency securities, mezzanine and preferred securities and convertible securities, and in common stocks, limited liability company interests, trust certificates, and other equity investments (“Common Equity Securities,” exposure to which is obtained primarily by investing in exchange-traded funds, or ETFs) that GPIM believes offer attractive yield and/or capital appreciation potential, including employing a strategy of writing (selling) covered call and put options on such equities. GPIM believes the volatility of the Fund can be reduced by diversifying across a large number of sectors and securities, many of which historically have not been highly correlated to one another.

Under normal market conditions:

- The Fund may invest up to 60% of its total assets in fixed-income securities rated below investment grade (commonly referred to as “junk bonds”); the Fund may invest in below-investment grade income securities of any rating;
- The Fund may invest up to 20% of its total assets in non-U.S. dollar denominated fixed-income securities of corporate and governmental issuers located outside the U.S., including up to 10% of total assets in fixed-income securities of issuers located in emerging markets;
- The Fund may invest up to 50% of its total assets in common equity securities; and
- The Fund may invest up to 30% of its total assets in investment funds that primarily hold (directly or indirectly) investments in which the Fund may invest directly, of which amount up to 30% of the Fund’s total assets may be invested in investment funds that are registered as investment companies under the Investment Company Act of 1940 (the “1940 Act”) to the extent permitted by applicable law and related interpretations of the staff of the U.S. Securities and Exchange Commission.

QUESTIONS & ANSWERS (Unaudited) continued

November 30, 2015

GPIM's investment process is a collaborative effort between its Portfolio Construction Group, which utilizes tools such as a proprietary risk optimization model to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions.

The Fund uses financial leverage (borrowing) to finance the purchase of additional securities. Although financial leverage may create an opportunity for increased return for shareholders, it also results in additional risks and can magnify the effect of any losses. There is no assurance that the strategy will be successful. If income and gains earned on securities purchased with the financial leverage proceeds are greater than the cost of the financial leverage, common shareholders' return will be greater than if financial leverage had not been used. Conversely, if the income or gains from the securities purchased with the proceeds of financial leverage are less than the cost of the financial leverage, common shareholders' return will be less than if financial leverage had not been used.

Describe changes to certain nonfundamental investment policies that were approved during the period.

During the period, the Fund's Board of Trustees (the "Board") approved modifications to certain nonfundamental investment policies, which will become effective as of February 9, 2016.

The Fund will continue to pursue its investment objective to maximize total return through a combination of current income and capital appreciation. In addition, the Fund will continue to seek to achieve its investment objective by investing among a wide variety of Income Securities and Common Equity Securities.

As an alternative to investing in Common Equity Securities directly, the Fund may seek to obtain exposure to Common Equity Securities through investments in exchange-traded funds ("ETFs") or other investment funds that track equity market indices and/or through derivative instruments that replicate the economic characteristics of exposure to Common Equity Securities. To the extent that the Fund seeks exposure to Common Equity Securities through derivative instruments, the Fund currently expects to obtain such exposure primarily through futures contracts and total return swaps on equity indices.

The Fund currently employs a strategy of writing (selling) covered call and put options on Common Equity Securities held by the Fund. Pursuant to its current covered call option strategy, the Fund does not write "naked" or uncovered call options. However, in connection with seeking exposure to Common Equity Securities through derivative instruments, the Fund will modify its option strategy. Pursuant to this option strategy, the Fund may write (sell) covered call options on individual Common Equity Securities or ETFs held by the Fund or on indices tracked by ETFs held by the Fund.

The Fund may also write call options on securities that are not directly held by the Fund or on indices, or ETFs that track indices, that do not directly correspond to securities held by the Fund, but which GPIM expects to have returns and economic characteristics that are closely correlated with certain of the Fund's holdings or the securities or indices to which the Fund has otherwise obtained investment exposure. In addition, the Fund may, from time to time, buy or sell put options on individual Common Equity Securities and, to a lesser extent, on indices of securities and sectors of securities.

To the extent the Fund seeks to obtain equity exposure primarily through derivative instruments that replicate the economic characteristics of exposure to Common Equity Securities, the Fund expects to implement its option strategy primarily by writing call options on the securities or indices to which the Fund has obtained investment exposure or on securities or indices that GPIM expects to have returns and economic characteristics that are closely correlated with certain of the Fund's holdings or the securities or indices to which the Fund has obtained investment exposure. While there are special risks associated with uncovered option writing, because the Fund intends to write options on the securities or indices to which the Fund has obtained investment exposure or on securities or indices that GPIM expects to have returns and economic characteristics that are closely correlated to such securities or indices, such positions are expected to economically offset some or all of the risk associated with the written option.

What were the significant events affecting the economy and market environment over the past six months?

At the U.S. Federal Reserve's Federal Open Market Committee (the Fed FOMC) meeting on December 16, after the period ended, the Fed raised their target Fed Funds rate by 25 bps. This decision to tighten monetary policy was in recognition that growth in the U.S. economy is sufficient to meet expectations in the current recovery. Historically, the period when the Fed begins to tighten leads to an initial sell-off in the bond market, as investors brace themselves for the ill-effects of restrictive monetary policy on the economy. Then, as investors realize the Fed is raising rates because the economy is strong, the fear of defaults diminishes and credit spreads tighten again.

Turning to equities in the U.S., valuations are approaching highs not seen since the internet bubble, based on the historical relationship of total market cap to gross domestic product (GDP) relative to interest rates. However, valuation is a poor timing tool—just because as things get expensive doesn't mean they won't get more expensive. Meanwhile, equity valuations in Europe look reasonable, and valuations in certain emerging markets look downright cheap.

At the end of the period, U.S. investors could draw optimism from the fundamental strength of the U.S. economy, seasonal factors that continue to kick in support for equity prices, and expectations that the holiday retail season would be a good one. Abroad, investors need to have more faith in the willingness and ability of central bankers to print money. In Europe and Japan, bad news is good news, and with any real signs of weakness, the policymakers should respond with further accommodation.

Among positives for the U.S. economy, the consumer price index rose by 0.2% in October after two months of declines, and has begun to accelerate in year-over-year terms due to positive base effects. The Empire State Manufacturing Survey posted its strongest growth since July, and September job openings of 5.52 million beat expectations. Although October retail sales growth of just 0.1% was disappointing, consumer sentiment rebounded in October and November, and the outlook for consumer spending is bright. Another positive could be El Niño, the massive weather pattern that, as it gains strength, should actually become a boon to the U.S. economy, potentially adding 1.5% to GDP in the first quarter.

QUESTIONS & ANSWERS (Unaudited) continued

November 30, 2015

With the Fed's first rate hike in seven years now decided, the tailwinds of positive economic data, accommodative global central banks, and positive seasonal forces are bolstering market resilience and reaffirming a positive environment backdrop for risk assets.

For the six months ended November 30, 2015, the Standard & Poor's 500 Index returned -0.21%; the Barclays U.S. Aggregate Bond Index returned -0.12%; the Barclays U.S. Corporate High Yield Index returned -5.84%; and the Barclays 1–3 Month U.S. Treasury Bill Index returned 0.01%. All returns are total return.

How did the Fund perform for the six months ended November 30, 2015?

All Fund returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2015, the Fund provided a total return based on market price of -11.52% and a total return based on NAV of -2.27%. NAV return includes the deduction of management fees, operating expenses, and all other Fund expenses.

As of November 30, 2015, the Fund's market price of \$17.69 represented a discount of 2.16% to its NAV of \$18.08. As of May 31, 2015, the Fund's market price of \$21.21 represented a premium of 8.16% to its NAV of \$19.61. The market value of the Fund's shares fluctuates from time to time and may be higher or lower than the Fund's NAV. Past performance is not a guarantee of future results.

From June 2015 through November 2015, the Fund paid a monthly distribution of \$0.1821. The November distribution represents an annualized distribution rate of 12.35% based on the Fund's closing market price of \$17.69 on November 30, 2015. The Fund's distribution rate is not constant and the amount of distributions, when declared by the Fund's Board of Trustees, is subject to change based on the performance of the Fund. Please see Note 2(h) on page 49 for more information on distributions for the period.

Why did the Fund accrue excise tax during the period?

As a registered investment company, the Fund is subject to a 4% excise tax that is imposed if the Fund does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the fund's fiscal year). The Fund generally intends to distribute income and capital gains in the manner necessary to minimize (but not necessarily eliminate) the imposition of such excise tax. While the Fund's income and capital gains can vary significantly from year to year, the Fund seeks to maintain more stable monthly distributions over time. The Fund may retain income or capital gains and pay excise tax when it is determined that doing so is in the best interest of shareholders. Management, in consultation with the Board of Trustees, evaluates the costs of the excise tax relative to the benefits of retaining income and capital gains, including that such undistributed amounts (net of the excise tax paid) remain available for investment by the Fund and are available to supplement future distributions, which may facilitate the payment of more stable monthly distributions year over year.

QUESTIONS & ANSWERS (Unaudited) continued

November 30, 2015

What influenced performance over the period?

The world kept a watchful eye on the U.S. Federal Reserve (Fed) this summer as headlines moved from Greece to China. Weak economic growth prompted several rate cuts by the People's Bank of China, and despite efforts by the Chinese authorities to support the market, the leverage-fueled boom in China's stock market unraveled, with the Shanghai Composite falling 32% in the 3.5 weeks following its June 12 peak. Left with few other meaningful alternatives, China devalued the yuan by 1.9% in August, the first devaluation of its currency in 20 years. Inevitably, markets drew parallels to the 1997 Asian financial crisis. As China's move sent shockwaves through global financial markets, the Fed opted to keep overnight rates zero-bound at its September meeting, citing concerns about potential downside risks to the U.S. outlook posed by recent global market volatility. The Fed then raised the overnight rate by 25 basis points at its December meeting, which occurred after the period ended.

During the period, the Fund saw negative returns largely attributable to widening credit spreads. Negative spread returns have predominantly been driven by the Fund's investments in high yield corporate debt, bank loans and collateralized loan obligations. However, negative aggregate returns were somewhat mitigated by return attributable to carry. The Fund continues to maintain low interest rate duration, particularly at the front end of the yield curve, and thus has largely avoided losses due to a flattening curve. It also maintains an overweight position to floating rate securities.

The Fund continued to find attractive relative value by tactically rotating among sectors, with a focus on securities that are overlooked by the broader market participants. Low long-term rates have been an increasing support to the residential real estate market and homebuilders, for example. The Fund had also reduced energy sector exposure to address the potential for lower energy prices, but valuations at the end of the period were presenting an attractive entry point for select energy credits. High-yield bonds and leveraged loans continue to experience spread widening, and the Fund continues to use periods of weakness to add to attractive assets.

What is the Fund's view of the market at the end of the period?

The watchword across risk assets over the past few months has been caution. Partial evidence lies in fixed-income mutual fund flows, as skeptical and risk-averse investors have pulled billions of dollars from high-yield bond mutual funds and bank loan mutual funds. Notably, the withdrawal of assets from bank loan funds has not materially affected the loan market due to anemic supply and a robust collateralized loan obligation (CLO) market.

Even after the Fed raised overnight interest rates in December, long-term rates are unlikely to increase dramatically. We believe the yield curve is likely to flatten and that the highest point for the Fed Funds rate is probably not more than 2.5-3%, which will likely take two to three years to achieve. In the near term, credit markets had already priced in a Fed rate hike and, with the strength of underlying economy as well as seasonal market dynamics, this may be an opportune time to increase risk in portfolios.

A risk to the U.S. economy, however, is an overly strong dollar. This has already had some effect on U.S. manufacturing and is clearly a concern for the Federal Reserve. In addition, continued low oil prices are exerting pressure on the large energy industry in the U.S. and bear watching.

QUESTIONS & ANSWERS (Unaudited) continued

November 30, 2015

Discuss the Fund's approach to duration.

Although the Fund has no set policy regarding portfolio duration or maturity, the Fund currently maintains a low-duration target, but adds opportunistically to attractive long duration assets when it can take advantage of short-term fluctuations in interest rates.

What is the overall credit quality of the portfolio?

The Fund has the ability to invest up to 60% of its total assets in below-investment grade securities of any rating (including securities rated below "CCC" by Moody's or "Caa2" by S&P or that, at the time of purchase, are in default).

As of the end of the period, approximately 59% of the Fund's total investments were invested in below-investment grade securities.

The Fund's flexibility to invest in equity securities and income securities across the credit rating spectrum gives the Fund the ability to more effectively pursue its strategy.

What is the Fund's leverage strategy?

Since leverage adds to performance when the cost of leverage is less than the total return generated by investments, the use of leverage detracted from the Fund's total return during this period. The purpose of leverage (borrowing) is to fund the purchase of additional securities that provide increased income and potentially greater appreciation to common shareholders than could be achieved from an unlevered portfolio. Leverage results in greater NAV volatility and entails more downside risk than an unlevered portfolio.

As of November 30, 2015, the amount of leverage was approximately 32% of total managed assets. GPIM employs leverage through two vehicles: reverse repurchase agreements, under which the Fund temporarily transfers possession of portfolio securities and receives cash which can be used for additional investments, and a committed financing facility through a leading financial institution. There is no guarantee that the Fund's leverage strategy will be successful. The Fund's use of leverage may cause the Fund's NAV and market price of common shares to be more volatile and can magnify the effect of any losses.

Index Definitions

Indices are unmanaged and reflect no expenses. It is not possible to invest directly in an index.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.

QUESTIONS & ANSWERS (Unaudited) continued

November 30, 2015

The Barclays 1-3 Month U.S. Treasury Bill Index tracks the performance of U.S. Treasury bills with a remaining maturity of one to three months. U.S. Treasury bills, which are short-term loans to the U.S. government, are full faith-and-credit obligations of the U.S. Treasury and are generally regarded as being free of any risk of default.

The Barclays U.S. Corporate High Yield Index measures the market of U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate funds.

Risks and Other Considerations

The views expressed in this report reflect those of the portfolio managers only through the report period as stated on the cover. These views are subject to change at any time, based on market and other conditions and should not be construed as a recommendation of any kind. The material may also include forward looking statements that involve risk and uncertainty, and there is no guarantee that any predictions will come to pass. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value.

Please see guggenheiminvestments.com/gof for a detailed discussion of the Fund's risks and considerations.

* Non-income producing security.

** Less than 0.1%.

† Value determined based on Level 1 inputs, unless otherwise noted — See Note 4.

†† Value determined based on Level 2 inputs, unless otherwise noted — See Note 4.

††† Value determined based on Level 3 inputs — See Note 4.

1 Security was fair valued by the Valuation Committee as of November 30, 2015. The total market value of fair valued securities amounts to \$22,827,749, (cost \$27,088,921) or 7.2% of total net assets.

2 All or a portion of these securities have been physically segregated in connection with borrowings, reverse repurchase agreements and unfunded loan commitments. As of November 30, 2015, the total market value of the segregated securities was \$281,270,998.

3 Variable rate security. Rate indicated is rate effective as of November 30, 2015.

4 Security represents cover for outstanding written option.

5 Security is a 144A or Section 4(a)(2) security. The total market value of 144A or Section 4(a)(2) securities is \$171,507,771 (cost \$185,868,655), or 53.7% of total net assets. These securities have been determined to be liquid under guidelines established by the Board of Trustees.

6 Security has no stated coupon. However, it is expected to receive residual cashflow payments on defined deal dates.

7 Security is a 144A or Section 4(a)(2) security. These securities are illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) securities is \$11,560,018 (cost \$18,077,789), or 3.6% of total net assets - see Note 12.

8 Security is a step up/step down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity.

9 Perpetual maturity.

- 10 Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.
- 11 Security is in default.
- 12 Zero coupon rate security.
- 13 Security is a pay in-kind bond.
- 14 Rate indicated is the 7-day yield as of November 30, 2015.

See notes to financial statements.

36 | GOF | GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT

PORTFOLIO OF INVESTMENTS (Unaudited) continued

November 30, 2015

The following is a summary of significant unobservable inputs used in the fair valuation of assets and liabilities categorized within Level 3 of the fair value hierarchy:

Category	Ending Balance at 11/30/15	Valuation Technique	Unobservable Inputs
Corporate Bonds	\$6,241,377	Option adjusted spread off the month end broker quote over the 3 month LIBOR	Indicative Quote
Corporate Bonds	\$1,967,980	Enterprise Value	Valuation Multiple*
Corporate Bonds	\$392,192	Model Priced	Liquidation Value
Asset Backed Securities	\$3,799,957	Option adjusted spread off the month end broker quote over the 3 month LIBOR	Indicative Quote
Asset Backed Securities	\$1,506,060	Enterprise Value	Valuation Multiple*
Collateralized Mortgage Obligations	\$3,328,080	Option adjusted spread off the month end broker quote over the 3 month LIBOR	Indicative Quote
Senior Floating Rate Interests	\$1,440,450	Option adjusted spread off the month end broker quote over the 3 month LIBOR	Indicative Quote
Senior Floating Rate Interests	\$18,817,714	Enterprise Value	Valuation Multiple*
Senior Floating Rate Interests	\$143,424	Model Priced	Valuation Multiple*
Common Stocks	\$379	Model Priced	Liquidation Value

* Valuation multiples utilized ranged from 5.5 to 14.

Significant changes in an indicative quote or valuation multiple would generally result in significant changes in the fair value of the security.

Any remaining Level 3 securities held by the Fund and excluded from the tables above, were not considered material to the Fund.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

As of November 30, 2015, the Fund had securities with a total value of \$10,220,619 transferred from Level 2 to Level 3 due to lack of multiple vendor prices. As of November 30, 2015, the Fund had a security with a total value of \$379

transferred from Level 1 to Level 3 due to security being halted on the principal exchange on which it trades. The Fund had a security with a total value of \$361,356 transferred from Level 3 to Level 2 due to availability of market price information at the period end.

See notes to financial statements.

End of period	\$319,245,284	\$ 342,987,543
Distributions in excess of net investment income at end of period	\$(11,242,753)	\$(1,338,644)

See notes to financial statements.

GOF I GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT I 41

STATEMENT OF CASH FLOWS

November 30, 2015

For the Six Months Ended November 30, 2015 (Unaudited)

Cash Flows from Operating Activities:

Net Decrease in net assets resulting from operations	\$(7,758,322)
Adjustments to Reconcile Net Decrease in Net Assets Resulting from Operations to Net Cash Provided by Operating and Investing Activities:	
Net change in unrealized appreciation (depreciation) on investments	26,447,926
Net change in unrealized appreciation (depreciation) on written options	37,882
Net change in unrealized appreciation (depreciation) on foreign currency translations	(52,843)
Net realized gain on investments	(7,722,115)
Net realized gain on written options	(1,254,006)
Net accretion of bond discount and amortization of bond premium	(1,617,802)
Purchase of long-term investments	(336,316,236)
Paydowns received on mortgage and asset backed securities	21,728,275
Proceeds from written options	5,549,495
Cost of closing written options	(2,558,534)
Proceeds from sales of long-term investments	333,316,057
Other payments	50,391
Net purchases of short-term investments	(2,026,471)
Decrease in dividends receivable	29,678
Decrease in interest receivable	212,812
Decrease in investments sold receivable	816,086
Increase in tax reclaims receivable	(9,409)
Increase in other assets	(9,688)
Decrease in investments purchased payable	(8,687,346)
Increase in interest payable on borrowings	153,817
Increase in fair value of unfunded loans	619,351
Decrease in investment advisory fees payable	(30,039)
Decrease in administration fees payable	(635)
Increase in trustees' fees and expenses payable	3,722
Decrease in fund accounting fees payable	(1,870)
Increase in excise tax payable	160,000
Decrease in accrued expenses and other liabilities	(12,613)
Net Cash Provided by Operating and Investing Activities	21,067,563
Cash Flows From Financing Activities:	
Net proceeds from the issuance of common shares	2,651,487
Decrease in receivable for fund shares sold through at-the-market offering	262,025
Distributions to common shareholders	(18,619,273)
Decrease in reverse repurchase agreements	(12,334,812)
Proceeds from borrowings	8,000,000
Payments made on borrowings	(2,969,000)
Offering costs in connection with the issuance of common shares	(3,531)
Net Cash Used in Financing Activities	(23,013,104)
Net decrease in cash	(1,945,541)
Cash at Beginning of Period (including foreign currency and restricted cash)	3,051,529
Cash at End of Period (including foreign currency and restricted cash)	\$1,105,988
Supplemental Disclosure of Cash Flow Information: Cash paid during the period for interest	\$737,788

Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-CSRS

Supplemental Disclosure of Non Cash Financing Activity: Dividend reinvestment	\$621,603
Supplemental Disclosure of Non Cash Operating Activity: Additional principal received on payment-in-kind bonds	\$111,473

See notes to financial statements.

FINANCIAL HIGHLIGHTS continued

November 30, 2015

	Period Ended November 30, 2015 (Unaudited)	Year Ended May 31, 2015	Year Ended May 31, 2014	Year Ended May 31, 2013	Year Ended May 31, 2012	Year Ended May 31, 2011
Senior Indebtedness						
Total Borrowings outstanding (in thousands)	\$ 152,943	\$ 160,247	\$ 136,430	\$ 115,573	\$ 83,842	\$ 80,670
Asset Coverage per \$1,000 of indebtedness (f)	\$ 3,087	\$ 3,140	\$ 3,331	\$ 3,479	\$ 3,473	\$ 3,322

(a) Based on average shares outstanding.

(b) Total return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value (“NAV”) or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund’s Dividend Reinvestment Plan for market value returns. Total return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.

(c) The ratios of total expenses to average net assets applicable to common shares do not reflect fees and expenses incurred indirectly by the Fund as a result of its investment in shares of other investment companies. If these fees were included in the expense ratios, the expense ratios would increase by 0.03% for the six months ended November 30, 2015 and 0.03%, 0.03%, 0.05%, 0.04% and 0.03% for the years ended May 31, 2015, 2014, 2013, 2012 and 2011, respectively.

(d) Excluding interest expense, the operating expense ratios for the six months ended November 30, 2015 and the years ended May 31 would be:

November 30, 2015	2015	2014	2013	2012	2011
1.72%	1.72%	1.78%	1.81%	1.78%	1.85%

(e) Portfolio turnover is not annualized for periods of less than one year.

(f) Calculated by subtracting the Fund’s total liabilities (not including the borrowings) from the Fund’s total assets and dividing by the total borrowings.

(g) Annualized.

See notes to financial statements.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

November 30, 2015

Note 1 – Organization:

Guggenheim Strategic Opportunities Fund (the “Fund”) was organized as a Delaware statutory trust on November 13, 2006. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (“1940 Act”).

The Fund’s investment objective is to maximize total return through a combination of current income and capital appreciation.

Note 2 – Accounting Policies:

The Fund operates as an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies consistently followed by the Fund.

(a) Valuation of Investments

The Board of Trustees of the Fund (the “Board”) has adopted policies and procedures for the valuation of the Fund’s investments (the “Valuation Procedures”). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim’s investment management, fund administration, legal and compliance departments (the “Valuation Committee”), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Fund’s securities or other assets.

Valuations of the Fund’s securities are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed and will review the valuation of all assets which have been fair valued for reasonableness. The Fund’s officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review procedures used by, and valuations provided by, the pricing services.

If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Equity securities listed on an exchange (New York Stock Exchange (“NYSE”) or American Stock Exchange) are valued at the last quoted sales price as of the close of business on the NYSE, usually 4:00 p.m. Eastern time on the valuation date. Equity securities listed on the NASDAQ market system are valued at the NASDAQ Official Closing Price on the valuation date, which may not necessarily represent the last sale price. If there has been no sale on such exchange or NASDAQ on such day, the security is valued at the closing bid price on such day.

November 30,
2015

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

Open-end investment companies (“Mutual Funds”) are valued at their NAV as of the close of business on the valuation date. Exchange Traded Funds (“ETFs”) and closed-end investment companies are valued at the last quoted sale price.

Debt securities with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker/dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term debt securities with a maturity of 60 days or less at acquisition and repurchase agreements are valued at amortized cost, provided such amount approximates market value.

Typically loans are valued using information provided by an independent third party pricing service which uses broker quotes in a non-active market.

Listed options are valued at the Official Settlement Price listed in by the exchange, usually as of 4:00 p.m. Eastern time. Long options are valued using the bid price and short options are valued using the ask price. In the event that a settlement price is not available, fair valuation is enacted. Over-the-counter options are valued using the average bid price (for long options), or average ask price (for short options) obtained from one or more security dealers.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the NYSE. The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currency are valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. Eastern time. Investments in foreign securities may involve risks not present in domestic investments. The Valuation Committee will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: the value of the securities traded on other foreign markets, ADR trading, closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities such as World Equity Benchmark Securities. In addition, under the Valuation Procedures, the Valuation Committee and Guggenheim Funds Investment Advisors, LLC (“GFIA” or the “Adviser”) are authorized to use prices and other information supplied by a third party pricing vendor in valuing foreign securities.

Investments for which market quotations are not readily available are fair valued as determined in good faith by the Adviser, subject to review and approval by the Valuation Committee, pursuant to methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security’s (or asset’s) “fair value.” Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security’s disposition, (iv) the price and extent of public trading in similar securities of the issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded

securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security).

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Paydown gains and losses on mortgage and asset-backed securities are treated as an adjustment to interest income. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method.

(c) Restricted Cash

A portion of cash on hand relates to collateral received by the Fund for repurchase agreements. This amount is presented on the Statement of Assets and Liabilities as Restricted Cash.

(d) Swaps

A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Fund enters into swap agreements to manage its exposure to interest rates and/or credit risk or to generate income. Swaps are valued daily at current market value and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized on the termination date of the swap and is equal to the difference between the Fund's basis in the swap and the proceeds of the closing transaction, including any fees. Upon termination of a swap agreement, a payable to or receivable from swap counterparty is established on the Statement of Assets and Liabilities to reflect the net gain/loss, including interest income/expense, on terminated swap positions. The line item is removed upon settlement according to the terms of the swap agreement.

Realized gain (loss) upon termination of swap contracts is recorded on the Statement of Operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation (depreciation) of swap contracts. Net periodic payments received by the Fund are included as part of realized gain (loss) and, in the case of accruals for periodic payments, are included as part of unrealized appreciation (depreciation) on the Statement of Operations.

As of November 30, 2015, the Fund had no swap contracts outstanding.

(e) Covered Call Options and Put Options

When an option is written, the premium received is recorded as an asset with an equal liability and is subsequently marked to market to reflect the current market value of the option written. These liabilities are reflected as options written on the Statement of Assets and Liabilities. Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a

November
30, 2015

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions, as a realized loss. If an option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss.

When a call option is purchased, the Fund obtains the right (but not the obligation) to buy the underlying instrument at the strike price at anytime during the option period. When a put option is purchased, the Fund obtains the right (but not the obligation) to sell the option's underlying instrument at the strike price at anytime during the option period. When the Fund purchases an option, an amount equal to the premium paid by the Fund is reflected as an asset and subsequently marked-to-market to reflect the current market value of the option purchased. Purchased options are included with Investments on the Statement of Assets and Liabilities. Realized and unrealized gains and losses on purchased options are included with Investments on the Statement of Operations.

(f) Currency Translation

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the mean of the bid and ask price of respective exchange rates on the last day of the period. Purchases and sales of investments denominated in foreign currencies are translated at the exchange rate on the bid and ask price of respective exchange rates on the date of the transaction.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Foreign exchange realized gain or loss resulting from holding of a foreign currency, expiration of a currency exchange contract, difference in exchange rates between the trade date and settlement date of an investment purchased or sold, and the difference between dividends or interest actually received compared to the amount shown in the Fund's accounting records on the date of receipt is shown as net realized gains or losses on foreign currency transactions on the Fund's Statement of Operations.

Foreign exchange unrealized gain or loss on assets and liabilities, other than investments, is shown as unrealized appreciation (depreciation) on foreign currency translation on the Fund's Statement of Operations.

(g) Forward Foreign Currency Exchange Contracts

Forward foreign currency exchange contracts are agreements between two parties to buy and sell currencies at a set price on a future date. Fluctuations in the value of open forward foreign currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Fund until the contracts are closed. When the contracts are closed, realized gains and losses are recorded, and included on the Statement of Operations in foreign currency transactions.

November 30,
2015

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

(h) Distributions to Shareholders

The Fund declares and pays monthly distributions to common shareholders. These distributions consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains. Any net realized long-term capital gains are distributed annually to common shareholders. To the extent distributions exceed taxable income, the excess will be deemed a return of capital.

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

Note 3 – Investment Advisory Agreement, Sub-Advisory Agreement and Other Agreements:

Pursuant to an Investment Advisory Agreement between the Fund and the Adviser, the Adviser furnishes offices, necessary facilities and equipment, provides administrative services, oversees the activities of Guggenheim Partners Investment Management, LLC (“GPIM” or “Sub-Adviser”), provides personnel including certain officers required for the Fund’s administrative management and compensates the officers and trustees of the Fund who are affiliates of the Adviser. As compensation for these services, the Fund pays the Adviser a fee, payable monthly, in an amount equal to 1.00% of the Fund’s average daily managed assets (net assets applicable to common shareholders plus any assets attributable to financial leverage).

Pursuant to a Sub-Advisory Agreement among the Fund, the Adviser and GPIM, GPIM, under the supervision of the Fund’s Board of Trustees and the Adviser, provides a continuous investment program for the Fund’s portfolio; provides investment research; makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including certain officers required for its administrative management and pays the compensation of all officers and trustees of the Fund who are GPIM’s affiliates. As compensation for its services, the Adviser pays GPIM a fee, payable monthly, in an annual amount equal to 0.50% of the Fund’s average daily managed assets.

Certain officers and trustees of the Fund may also be officers, directors and/or employees of the Adviser or GPIM. The Fund does not compensate its officers or trustees who are officers, directors and/or employees of the aforementioned firms.

Rydex Fund Services, LLC (“RFS”), an affiliate of the Adviser and the Sub-Adviser, provides fund administration services to the Fund. As compensation for these services, RFS receives a fund administration fee payable monthly at the annual rate set forth below as a percentage of the average daily managed assets of the Fund:

Managed Assets	Rate
First \$200,000,000	0.0275%
Next \$300,000,000	0.0200%
Next \$500,000,000	0.0150%
Over \$1,000,000,000	0.0100%

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

November 30,
2015

RFS serves as the accounting agent for the Fund. As accounting agent, RFS is responsible for maintaining the books and records of the Fund's securities and cash. RFS receives an accounting fee payable monthly at the annual rate set forth below as a percentage of the average daily managed assets of the Fund.

Managed Assets	Rate
First \$200,000,000	0.0300%
Next \$300,000,000	0.0150%
Next \$500,000,000	0.0100%
Over \$1,000,000,000	0.0075%
Minimum annual charge	\$50,000
Certain out-of-pocket charges	Varies

For purposes of calculating the fees payable under the foregoing agreements, average daily managed assets means the average daily value of the Fund's total assets minus the sum of its accrued liabilities. Total assets means all of the Fund's assets and is not limited to its investment securities. Accrued liabilities means all of the Fund's liabilities other than borrowings for investment purposes.

The Bank of New York Mellon ("BNY") acts as the Fund's custodian. As custodian, BNY is responsible for the custody of the Fund's assets.

Note 4 – Fair Value Measurement:

In accordance with GAAP, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

Level 1 — quoted prices in active markets for identical assets or liabilities.

Level 2 — significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

Independent pricing services are used to value a majority of the Fund's investments. When values are not available from a pricing service, they will be determined under the valuation policies that have been reviewed and approved by the Board. In any event, values are determined using a variety of sources and techniques, including: market prices; broker quotes; and models which derive prices

501 GOF 1 GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

November 30,
2015

based on inputs such as prices of securities with comparable maturities and characteristics or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information and analysis. A significant portion of the Funds' assets and liabilities are categorized as Level 2 or Level 3, as indicated in this report.

Indicative quotes from broker-dealers, adjusted for fluctuations in criteria such as credit spreads and interest rates, may be also used to value the Fund's assets and liabilities, i.e. prices provided by a broker-dealer or other market participant who has not committed to trade at that price. Although indicative quotes are typically received from established market participants, the Fund may not have the transparency to view the underlying inputs which support the market quotations.

Certain fixed income securities are valued by obtaining a monthly indicative quote from a broker-dealer, adjusted for fluctuations in criteria such as credit spreads and interest rates. The Fund's fair valuation guidelines categorize these securities as Level 3.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The suitability of the techniques and sources employed to determine fair valuation are regularly monitored and subject to change.

Note 5 – Federal Income Taxes:

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, (the "Internal Revenue Code"), applicable to regulated investment companies.

The Fund may be subject to an excise tax of 4% of the amount by which 98% of the Fund's annual taxable income and 98.2% of net realized gains exceed the distributions from such taxable income and realized gains for the calendar year.

As of November 30, 2015, the cost of investments and accumulated unrealized appreciation/ (depreciation) of investments for federal income tax purposes, were as follows:

	Gross Tax Unrealized Appreciation	Gross Tax Unrealized Depreciation	Net Tax Unrealized Depreciation on Investments
Cost of Investments for Tax Purposes	\$503,077,281	\$13,088,356	\$(39,641,918)
			\$(26,553,562)

The differences between book basis and tax basis unrealized appreciation (depreciation) is primarily attributable to the tax deferral of losses on wash sales, Passive Foreign Investment Companies (PFICs) and non-real estate investment trust return of capital and collateralized loan obligations.

As of May 31, 2015 (the most recent fiscal year end for federal income tax purposes), the tax components of accumulated earnings/losses (excluding paid-in capital) on a tax basis were as follows:

Undistributed
Long-Term Capital

Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-CSRS

Undistributed Ordinary Income	Gains/(Accumulated Capital and Other Losses)	Net Unrealized Depreciation
\$3,348,594	\$(445,492)	\$(152,871)

GOF 1 GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT 1 51

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

November 30,
2015

For the year ended May 31, 2015 (the most recent fiscal year end for federal income tax purposes), the tax character of distributions paid to shareholders as reflected in the Statements of Changes in Net Assets was as follows:

Distributions paid from:	2015
Ordinary income	\$35,891,997

For all open tax years and all major jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Uncertain tax positions are tax positions taken or expected to be taken in the course of preparing the Fund's tax returns that would not meet a more-likely-than-not threshold of being sustained by the applicable tax authority and would be recorded as a tax expense in the current year. Open tax years are those that are open for examination by taxing authorities (i.e. generally the last four tax year ends and the interim tax period since then).

Note 6 – Investments in Securities:

During the six months ended November 30, 2015, the cost of purchases and proceeds from sales of investments, excluding written options and short-term investments, were \$336,316,236 and \$333,316,057, respectively.

Note 7 – Derivatives:

The Fund is required by GAAP to disclose: a) how and why a fund uses derivative instruments, b) how derivative instruments and related hedge fund items are accounted for, and c) how derivative instruments and related hedge items affect a fund's financial position, results of operations and cash flows.

As part of its investment strategy, the Fund utilizes a variety of derivative instruments including options, forwards and swap agreements. These investments involve, to varying degrees, elements of market risk and risks in excess of the amounts recognized in the Statement of Assets and Liabilities.

(a) Covered Call Options and Put Options

The Fund pursues its investment objective by employing an option strategy of writing (selling) covered call options and, from time to time, buys or sells put options on equity securities and indices. The Fund seeks to generate current gains from option premiums as a means to enhance distributions payable to the Fund's common shareholders.

An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option at a specified exercise or "strike" price. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price (in the case of a call) or to pay the exercise price upon delivery of the underlying security (in the case of a put).

There are several risks associated with transactions in options on securities. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from

2015

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. A writer of a put option is exposed to the risk of loss if the fair value of the underlying security declines, but profits only to the extent of the premium received if the underlying security increases in value. The writer of an option has no control over the time when it may be required to fulfill its obligation as writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

To the extent that the Fund purchases options, the Fund will be subject to the following additional risks. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security is purchased to hedge against price movements in a related security, the price of the put or call option may move more or less than the price of the related security. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it had purchased. If the Fund were unable to close out an option that it had purchased on a security, it would have to exercise the option in order to realize any profit or the option may expire worthless. The maximum exposure the Fund has at risk when purchasing an option is the premium paid.

The Fund entered into written option contracts during the period ended November 30, 2015.

Details of the transactions were as follows:

	Number of Contracts	Premiums Received
Options outstanding, beginning of the period	4,656	\$497,512
Options written during the period	31,129	5,549,495
Options closed during the period	(28,812)	(3,812,540)
Options assigned during the period	(3,510)	(1,450,283)
Options outstanding, end of period	3,463	\$784,184

(b) Swaps

Swap agreements are contracts between parties in which one party agrees to make periodic payments to the other party (the "Counterparty") based on the change in market value or level of a specified rate, index or asset. In return, the Counterparty agrees to make periodic payments to the first party based on the return of a different specified rate, index or asset. Swap agreements will usually be done on a net basis, the Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of each Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Fund's custodian bank. During the period that the swap agreement is open, the Fund may be subject to risk from the potential inability of the counterparty to meet the terms of the agreement. The swaps

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

November 30,
2015

involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities.

Credit default swap transactions involve the Fund's agreement to exchange the credit risk of an issuer. A buyer of a credit default swap is said to buy protection by paying periodic fees in return for a contingent payment from the seller if the issuer has a credit event such as bankruptcy, a failure to pay outstanding obligations or deteriorating credit while the swap is outstanding. A seller of a credit default swap is said to sell protection and thus collects the periodic fees and profits if the credit of the issuer remains stable or improves while the swap is outstanding but the seller in a credit default swap contract would be required to pay an agreed upon amount, which approximates the notional amount of the swap, to the buyer in the event of an adverse credit event of the issuer.

The Fund may utilize index swap transactions to manage its exposure to various securities markets, changes in interest rates, or currency values. Index swap transactions allow the Fund to receive the appreciation/depreciation of the specified index over a specified time period in exchange for an agreed upon fee paid to the counterparty.

The Fund did not have any swap agreements outstanding as of November 30, 2015.

(c) Forward Foreign Currency Exchange Contracts

The Fund enters into forward foreign currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchases and sales commitments denominated in foreign currencies and for investment purposes.

A forward foreign currency exchange contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. Forward foreign currency exchange contracts involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities. Risk may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Fund has in that particular currency contract.

As of November 30, 2015, the following forward foreign currency exchange contracts were outstanding:

Contracts to Sell	Counterparty	Settlement Date	Settlement Value	Value as of 11/30/15	Net Unrealized Appreciation
EUR	Bank of America Merrill Lynch	12/9/2015	\$4,482,210	\$4,355,435	\$ 126,775

(d) Summary of Derivatives Information

The Fund is required by GAAP to disclose: a) how and why a fund uses derivative instruments, b) how derivative instruments and related hedge fund items are accounted for, and c) how derivative instruments and related hedge items affect a fund's financial position, results of operations and cash flows.

The following table presents the types of derivatives in the Fund by location as presented on the Statement of Assets and Liabilities as of November 30, 2015.

Primary Risk Exposure	Statement of Assets and Liabilities

Derivative Volume

Forward Foreign Currency Exchange Contracts:

The Fund had the following activity in forward foreign currency exchange contracts during the six months ended November 30, 2015:

Average Settlement Value Purchased	\$2,442,158
Average Settlement Value Sold	2,009,022

Note 8 – Offsetting:

In the normal course of business, the Fund enters into transactions subject to enforceable master netting arrangements or other similar arrangements. Generally, the right to offset in those agreements allows the Fund to counteract the exposure to a specific counterparty with collateral received or delivered to that counterparty based on the terms of the arrangements.

These arrangements provide for the right to liquidate upon the occurrence of an event of default, credit event upon merger or additional termination event.

In order to better define their contractual rights and to secure rights that will help the Fund mitigate their counterparty risk, the Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (“ISDA Master Agreement”) or similar agreement with their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs OTC derivatives, including foreign exchange contracts, and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Fund and the counterparty. For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Fund and cash collateral received from the counterparty, if any, is reported separately on the Statement of Assets and Liabilities as segregated cash with broker/ receivable for variation margin, or payable for swap settlement/variation margin. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold (e.g., \$300,000) before a transfer is required to be made. To the extent amounts due to the Fund from its counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty nonperformance. The Fund attempts to mitigate counterparty risk by only entering into agreements with counterparties that it believes to be of good standing and by monitoring the financial stability of those counterparties.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Assets and Liabilities.

Note 9 – Leverage:

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements as part of its financial leverage strategy. Under a reverse repurchase agreement, the Fund temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker-dealer, in return for cash. At the same time, the Fund agrees to repurchase the instrument at an agreed upon time and price, which reflects an interest payment. Such agreements have the economic effect of borrowings. The Fund may enter into such agreements when it is able to invest the cash acquired at a rate higher than the cost of

the agreement, which would increase earned income. When the Fund enters into a reverse repurchase agreement, any fluctuations in the market value of either the instruments transferred to another party or the instruments in which the proceeds may be invested would affect the market value of the Fund's assets. As a result, such transactions may increase fluctuations in the market value of the Fund's assets. For the six months ended November 30, 2015, the average daily balance of reverse repurchase agreements outstanding amounted to \$100,656,039. The weighted average interest rate was 1.18%. As of November 30, 2015, there was \$102,423,351 in reverse repurchase agreements outstanding.

Wells Fargo Bank, Ltd.	1.54%	12/09/15	915,000
			\$102,423,351

In June 2014, the FASB issued Accounting Standards Update 2014-11, Repurchase-to- Maturity Transactions, Repurchase Financings, and Disclosures (ASU 2014-11) that expanded secured borrowing accounting for certain repurchase agreements. The ASU also sets forth additional disclosure requirements for certain transactions accounted for as secured borrowings, which applies to the reverse repurchase agreements held by the Fund. The ASU became effective prospectively for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015.

The following is a summary of the remaining contractual maturities of the reverse repurchase agreements outstanding as of November 30, 2015, aggregated by asset class of the related collateral pledged by the Fund:

	Overnight and Continuous	Up to 30 days	31 - 90 days	Greater than 90 days	Total
Asset Backed Securities	\$ –	\$6,965,759	\$41,289,412	\$ –	\$48,255,171
Collateralized Mortgage Obligations	–	5,011,338	5,867,486	–	10,878,824
Corporate Bonds	4,446,863	13,366,344	23,458,349	2,017,800	43,289,356
Total Borrowings	\$ 4,446,863	\$25,343,441	\$70,615,247	\$ 2,017,800	\$ 102,423,351
Gross amount of recognized liabilities for reverse repurchase agreements	\$ 4,446,863	\$25,343,441	\$70,615,247	\$ 2,017,800	\$ 102,423,351

Borrowings

The Fund has entered into a \$80,000,000 credit facility agreement with an approved lender whereby the lender has agreed to provide secured financing to the Fund and the Fund will provide pledged collateral to the lender. Interest on the amount borrowed is based on the 3-month LIBOR plus 0.85%. As of November 30, 2015, there was \$50,519,955 outstanding in connection with the Fund's credit facility. The average daily amount of borrowings on the credit facility during the six months ended November 30, 2015, was \$50,144,644 with a related average interest rate of 1.19%. The maximum amount outstanding during the six months ended November 30, 2015 was \$53,488,955. As of November 30, 2015, the total value of securities segregated and pledged as collateral in connection with borrowings was \$83,141,493.

The credit facility agreement governing the loan facility includes usual and customary covenants. These covenants impose on the Fund asset coverage requirements, collateral requirements, investment strategy requirements, and certain financial obligations. These covenants place limits or restrictions on the Fund's ability to (i) enter into additional indebtedness with a party other than the counterparty, (ii) change its fundamental investment policy, or (iii) pledge to any other party, other than to the counterparty, securities owned or held by the Fund over which the counterparty has a lien. In addition, the Fund is required to deliver financial information to the counterparty within established deadlines, maintain an asset coverage ratio (as defined in Section 18(g) of the 1940 Act) greater than 300%, comply with the rules of the stock exchange on which its shares are listed, and maintain its classification as a "closed-end management investment company" as defined in the 1940 Act.

There is no guarantee that the Fund's leverage strategy will be successful. The Fund's use of leverage may cause the Fund's NAV and market price of common shares to be more volatile and can magnify the effect of any losses.

Note 10 – Loan Commitments

Pursuant to the terms of certain Term Loan agreements, the Fund held unfunded loan commitments as of November 30, 2015. The Fund is obligated to fund these loan commitments at the borrower's discretion. The Fund reserves against such contingent obligations by designating cash, liquid securities, and liquid term loans as a reserve. As of November 30, 2015, the total amount segregated in connection with reverse repurchase agreements and unfunded commitments was \$198,129,505.

November 30,
2015

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

As of November 30, 2015, the Fund had the following unfunded loan commitments which could be extended at the option of the borrower:

Borrower	Maturity Date	Face Amount	Value
Acosta, Inc.	09/26/2019	\$1,100,000	\$ 111,899
American Seafoods Group LLC	08/19/2021	433,333	61,501
Authentic Brands	05/27/2021	137,500	462
Deltek, Inc.	06/25/2020	1,500,000	170,669

PowerSchool, Inc.	07/29/2021	525,000	61,969
		\$7,611,606	\$ 680,285

Note 11 – Capital:

Common Shares

The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and 17,658,965 issued and outstanding.

Transactions in common shares were as follows:

	Six Months ended November 30, 2015	Year ended May 31, 2015
Beginning Shares	17,493,253	15,467,075
Common shares issued through at-the-market offering	132,582	1,924,032
Shares issued through dividend reinvestment	33,130	102,146
Ending Shares	17,658,965	17,493,253

On October 26, 2013, the Fund's shelf registration allowing for delayed or continuous offering of additional shares became effective and a post-effective amendment thereto became effective on October 3, 2014. The shelf registration statement allows for the issuance of up to \$150,000,000 of common shares. The Fund entered into an agreement with Cantor Fitzgerald & Co. for the sale of up to an additional 3,977,022 shares.

The Adviser has paid the costs associated with the at-the-market offering of shares and will be reimbursed by the Fund up to 0.60% of the offering price of common shares sold pursuant to the shelf registration statement, not to exceed the amount of actual offering costs incurred. For the period ended November 30, 2015, the Fund incurred \$16,151 of expenses associated with the at-the market offerings.

Note 13 – Indemnifications:

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would require future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 14 – Subsequent Event:

The Fund evaluated subsequent events through the date the financial statements were available for issue and determined there were no additional material events that would require adjustment to or disclosure in the Fund's financial statements.

November 30, 2015

Federal Income Tax Information

In January 2016, you will be advised on IRS Form 1099 DIV or substitute 1099 DIV as to the federal tax status of the distributions received by you in the calendar year 2015.

Sector Classification

Information in the “Schedule of Investments” is categorized by sectors using sector-level Classifications defined by the Bloomberg Industry Classification System, a widely recognized industry classification system provider. Each Fund’s registration statement has investment policies relating to concentration in specific sectors/industries. For purposes of these investment policies, the Funds usually classify sectors/industries based on industry-level Classifications used by widely recognized industry classification system providers such as Bloomberg Industry Classification System, Global Industry Classification Standards and Barclays Global Classification Scheme.

DIVIDEND REINVESTMENT PLAN (Unaudited)

November 30, 2015

Unless the registered owner of common shares elects to receive cash by contacting the Computershare Trust Company, N.A. (the “Plan Administrator”), all dividends declared on common shares of the Fund will be automatically reinvested by the Plan Administrator, Administrator for shareholders in the Fund’s Dividend Reinvestment Plan (the “Plan”), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder’s common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a “Dividend”) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants’ accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (“Newly Issued Common Shares”) or (ii) by purchase of outstanding common shares on the open market (“Open-Market Purchases”) on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant’s account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

DIVIDEND REINVESTMENT PLAN (Unaudited) continued

November 30, 2015

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, Computershare Trust Company, N.A., P.O. Box 30170, College Station, TX 77842-3170; Attention: Shareholder Services Department, Phone Number: (866) 488-3559 or online at www.computershare.com/investor.

FUND INFORMATION continued

November 30, 2015

Privacy Principles of the Fund

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how the Fund protects that information and why, in certain cases, the Fund may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about its shareholders to employees of the Fund's investment advisor and its affiliates with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

Questions concerning your shares of Guggenheim Strategic Opportunities Fund?

- If your shares are held in a Brokerage Account, contact your Broker.
- If you have physical possession of your shares in certificate form, contact the Fund's Transfer Agent: Computershare Trust Company, N.A. , P.O. Box 30170, College Station, TX 77842-3170; (866) 488-3559 or online www.computershare.com/investor.

This report is sent to shareholders of Guggenheim Strategic Opportunities Fund for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (800)345-7999.

Information regarding how the Fund voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling (800)345-7999, by visiting the Fund's website at guggenheiminvestments.com/gof or by accessing the Fund's Form N-PX on the U.S. Securities and Exchange Commission's (SEC) website at www.sec.gov.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC website at www.sec.gov or by visiting the Fund's website at guggenheiminvestments.com/gof. The Fund's Form N-Q may also be viewed and copied at the SEC's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330 or at www.sec.gov.

Notice to Shareholders

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund from time to time may purchase shares of its common stock in the open market.

GOF 1 GUGGENHEIM STRATEGIC OPPORTUNITIES FUND SEMIANNUAL REPORT 1 71

ABOUT THE FUND MANAGERS

Guggenheim Partners Investment Management, LLC

Guggenheim Partners Investment Management, LLC (“GPIM”) is an indirect subsidiary of Guggenheim Partners, LLC, a diversified financial services firm. The firm provides capital markets services, portfolio and risk management expertise, wealth management, and investment advisory services. Clients of Guggenheim Partners, LLC subsidiaries are an elite mix of individuals, family offices, endowments, foundations, insurance companies and other institutions.

Investment Philosophy

GPIM’s investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns over time as compared to such benchmark indexes.

Investment Process

GPIM’s investment process is a collaborative effort between various groups including the Portfolio Construction Group, which utilize proprietary portfolio construction and risk modeling tools to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions, including the structuring of certain securities directly with the issuers or with investment banks and dealers involved in the origination of such securities.
