Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-2/A

Approximate date of proposed public offering: From time to time after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, as amended, other than securities offered in connection with a dividend reinvestment plan, check the following box x

Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-2/A

It is proposed that this filing will become effective (check appropriate box):

When declared effective pursuant to section 8(c).

If appropriate, check the following box:

This [post-effective] amendment designates a new effective date for a previously filed [post-effective amendment] [registration statement].

This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration statement number of the earlier effective registration statement for the same offering is _____.

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered	Proposed	Proposed	Amount of Registration Fee
		Maximum Offering Price Per Share	Maximum Aggregate Offering Price	
Common Shares, \$0.01 par value	(1)	(2)	\$125,000,000	(3) \$12,587.50 (4)

- (1) There are being registered hereunder a presently indeterminate number of common shares to be offered on an immediate, continuous or delayed basis.
- (2) The proposed maximum offering price per share will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the common shares registered under this registration statement.
- (3) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(o) under the Securities Act of 1933, as amended.
- (4) Includes \$12,587.50 previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that the Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

PROSPECTUS

Subject to Completion, dated October 14, 2016

\$125,000,000

Guggenheim Strategic Opportunities Fund

Common Shares

Investment Objective and Philosophy. Guggenheim Strategic Opportunities Fund (the “Fund”) is a diversified, closed-end management investment company. The Fund’s investment objective is to maximize total return through a combination of current income and capital appreciation. The Fund will pursue a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. The Fund’s sub-adviser seeks to combine a credit-managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. The Fund’s investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns as compared to such benchmark indexes. The Fund cannot ensure investors that it will achieve its investment objective.

Investment Portfolio. The Fund will seek to achieve its investment objective by investing in a wide range of fixed-income and other debt and senior equity securities (“Income Securities”) selected from a variety of sectors and credit qualities, including, but not limited to, corporate bonds, loans and loan participations, structured finance investments, U.S. government and agency securities, mezzanine and preferred securities and convertible securities, and in common stocks, limited liability company interests, trust certificates and other equity investments (“Common Equity Securities”) that the Fund’s sub-adviser believes offer attractive yield and/or capital appreciation potential, including employing a strategy of writing (selling) covered call and put options on such equities.

Offering. The Fund may offer, from time to time, up to \$125,000,000 aggregate initial offering price of common shares of beneficial interest, par value \$0.01 per share (“Common Shares”), in one or more offerings in amounts, at prices and on terms set forth in one or more supplements to this Prospectus (each a “Prospectus Supplement”). You should read this Prospectus and any related Prospectus Supplement carefully before you decide to invest in the Common Shares.

The Fund may offer Common Shares (1) directly to one or more purchasers, (2) through agents that the Fund may designate from time to time or (3) to or through underwriters or dealers. The Prospectus Supplement relating to a particular offering of Common Shares will identify any agents or underwriters involved in the sale of Common Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and agents or underwriters or among underwriters or the basis upon which such amount may be calculated. The Fund may not sell Common Shares through agents, underwriters or dealers without delivery of this Prospectus and a Prospectus Supplement. See “Plan of Distribution.”

Investing in the Fund’s Common Shares involves certain risks. See “Risks” on page 65 of this Prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Prospectus dated _____, 2016

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Investment Adviser and Sub-Adviser. Guggenheim Funds Investment Advisors, LLC (the “Investment Adviser”) serves as the Fund’s investment adviser and is responsible for the management of the Fund. Guggenheim Partners Investment Management, LLC (the “Sub-Adviser”) will be responsible for the management of the Fund’s portfolio of securities. Each of the Investment Adviser and the Sub-Adviser is a wholly-owned subsidiary of Guggenheim Partners, LLC (“Guggenheim Partners”). Guggenheim Partners is a diversified financial services firm with wealth management, capital markets, investment management and proprietary investing businesses, whose clients are a mix of individuals, family offices, endowments, foundation insurance companies and other institutions that have entrusted Guggenheim Partners with the supervision of more than \$240 billion of assets as of June 30, 2016. Guggenheim Partners is headquartered in Chicago and New York with a global network of offices throughout the United States, Europe, and Asia.

Investment Parameters. The Fund may allocate its assets among a wide variety of Income Securities and Common Equity Securities. The Fund may invest without limitation in below-investment grade securities (e.g., securities rated below Baa3 by Moody’s Investors Service, Inc., below BBB- by Standard & Poor’s Ratings Group or Fitch Ratings or comparably rated by another nationally recognized statistical rating organization or, if unrated, determined by the Sub-Adviser to be of comparable quality). Below investment grade securities are commonly referred to as “high-yield” or “junk” bonds and are considered speculative with respect to the issuer’s capacity to pay interest and repay principal. The Fund’s investments in any of the sectors and types of Income Securities in which the Fund may invest may include, without limitation, below-investment grade securities. Under normal market conditions, the Fund will not invest more than: 50% of its total assets in Common Equity Securities consisting of common stock; 30% of its total assets in other investment companies, including registered investment companies, private investment funds and/or other pooled investment vehicles; 20% of its total assets in non-U.S. dollar-denominated Income Securities; and 10% of its total assets in Income Securities of issuers in emerging markets.

Common Shares. The Fund’s currently outstanding Common Shares are, and the Common Shares offered in this Prospectus will be, listed on the New York Stock Exchange (the “NYSE”) under the symbol “GOF.” The net asset value of the Common Shares at the close of business on October 10, 2016 was \$18.76 per share, and the last sale price of the Common Shares on the NYSE on such date was \$19.64. See “Market and Net Asset Value Information.”

Financial Leverage. The Fund may seek to enhance the level of its current distributions by utilizing financial leverage through the issuance of preferred shares (“Preferred Shares”), through borrowing or the issuance of commercial paper or other forms of debt (“Borrowings”), through reverse repurchase agreements, dollar rolls or similar transactions or through a combination of the foregoing (collectively “Financial Leverage”). The Fund’s total Financial Leverage may vary over time; however, the aggregate amount of Financial Leverage is not currently expected to exceed 33 ¹/₃ % of the Fund’s Managed Assets (as defined herein) after such issuance and/or borrowing; however, the Fund may utilize Financial Leverage up to the limits imposed by the Investment Company Act of 1940, as amended. The Fund has entered into a committed facility agreement with BNP Paribas Prime Brokerage, Inc. (“BNP Paribas”) pursuant to which the Fund may borrow up to \$80 million. As of May 31, 2016, outstanding Borrowings under the committed facility agreement were approximately \$9.4 million, which represented approximately 2.1% of the Fund’s Managed Assets as of such date. In addition, as of May 31, 2016, the Fund had reverse repurchase agreements outstanding representing Financial Leverage equal to approximately 29% of the Fund’s Managed Assets. As of May 31, 2016, the Fund’s total Financial Leverage represented approximately 31.1% of the Fund’s Managed Assets. See “Use of Financial Leverage.”

You should read this Prospectus, which contains important information about the Fund, together with any Prospectus Supplement, before deciding whether to invest, and retain it for future reference. A Statement of Additional Information, dated _____, 2016, containing additional information about the Fund, has been filed with the Securities and Exchange Commission (the “SEC”) and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the Statement of Additional Information, the table of contents of which is on page 105 of this Prospectus, by calling (800) 345-7999 or by writing to the Investment Adviser at Guggenheim Funds Investment Advisors, LLC, 227 West Monroe Street, Chicago, Illinois 60606, or you may obtain a copy (and other information regarding the Fund) from the SEC’s web site (<http://www.sec.gov>). Free copies of the Fund’s reports and its Statement of Additional Information will also be available from the Fund’s web site at www.guggenheiminvestments.com/gof. The information contained in, or that can be accessed through, the Fund’s

website is not part of this Prospectus.

The Fund's Common Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

ii

You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer of these securities in any state where the offer is not permitted.

FORWARD-LOOKING STATEMENTS

This Prospectus contains or incorporates by reference forward-looking statements, within the meaning of the federal securities laws, that involve risks and uncertainties. These statements describe the Fund's plans, strategies, and goals and the Fund's beliefs and assumptions concerning future economic and other conditions and the outlook for the Fund, based on currently available information. In this Prospectus, words such as "anticipates," "believes," "expects," "objectives," "goals," "future," "intends," "seeks," "will," "may," "could," "should," and similar expressions are used in an effort to identify forward-looking statements, although some forward-looking statements may be expressed differently. The Fund is not entitled to the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended.

This page intentionally left blank.

PROSPECTUS SUMMARY

This is only a summary of information contained elsewhere in this Prospectus. This summary does not contain all of the information that you should consider before investing in the Fund's Common Shares. You should carefully read the more detailed information contained elsewhere in this Prospectus and any related Prospectus Supplement prior to making an investment in the Fund, especially the information set forth under the headings "Investment Objective and Policies" and "Risks." You may also wish to request a copy of the Fund's Statement of Additional Information, dated _____, 2016 (the "SAI"), which contains additional information about the Fund

Guggenheim Strategic Opportunities Fund (the "Fund") is a diversified, closed-end management investment company that commenced operations on July 26, 2007. The Fund's objective is to maximize total return through a combination of current income and capital appreciation.

The The Fund's common shares of beneficial interest, par value \$0.01 per share, are called "Common Shares" and the holders of Common Shares are called "Common Shareholders" throughout this Prospectus.

Fund Guggenheim Funds Investment Advisors, LLC (the "Investment Adviser") serves as the Fund's investment adviser and is responsible for the management of the Fund. Guggenheim Partners Investment Management, LLC (the "Sub-Adviser") is responsible for the management of the Fund's portfolio of securities. Each of the Investment Adviser and the Sub-Adviser are wholly-owned subsidiaries of Guggenheim Partners, LLC ("Guggenheim Partners").

The Fund may offer, from time to time, up to \$125,000,000 aggregate initial offering price of Common Shares, on terms to be determined at the time of the offering. The Fund will offer Common Shares at prices and on terms to be set forth in one or more supplements to this Prospectus (each a "Prospectus Supplement").

The The Fund may offer Common Shares (1) directly to one or more purchasers, (2) through agents that the Fund may designate from time to time, or (3) to or through underwriters or dealers. The Prospectus Supplement relating to a particular offering will identify any agents or underwriters involved in the sale of Common Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and agents or underwriters or among underwriters or the basis upon which such amount may be calculated. The Fund may not sell Common Shares through agents, underwriters or dealers without delivery of this Prospectus and a Prospectus Supplement describing the method and terms of the offering of Common Shares. See "Plan of Distribution."

Use of Unless otherwise specified in a Prospectus Supplement, the Fund intends to invest the net proceeds of an offering of Common Shares in accordance with its investment objective and policies as stated herein. It is currently anticipated that the Fund will be able to invest substantially all of the net proceeds of an offering of Common Shares in accordance with its investment objective and policies within three months after the completion of such offering. Pending such investment, it is anticipated that the proceeds will be invested in U.S. government securities or high quality, short-term money market

securities. The Fund may also use the proceeds for working capital purposes, including the payment of distributions, interest and operating expenses, although the Fund currently has no intent to issue Common Shares primarily for this purpose.

Investment Objective The Fund's investment objective is to maximize total return through a combination of current income and capital appreciation. The Fund cannot ensure investors that it will achieve its investment objective. The Fund's investment objective is considered fundamental and may not be changed without the approval of Common Shareholders. See "Investment Objective and Policies—Investment Philosophy and Investment Process."

The Fund will pursue a relative value-based investment philosophy, which utilizes quantitative and qualitative analysis to seek to identify securities or spreads between securities that deviate from their perceived fair value and/or historical norms. The Sub-Adviser seeks to combine a credit managed fixed-income portfolio with access to a diversified pool of alternative investments and equity strategies. The Fund's investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns as compared to such benchmark indexes.

Investment Philosophy Process The Sub-Adviser's process for determining whether to buy a security is a collaborative effort between various groups including: (i) economic research, which focus on key economic themes and trends, regional and country-specific analysis, and assessments of event-risk and policy impacts on asset prices, (ii) the Portfolio Construction Group, which utilize proprietary portfolio construction and risk modeling tools to determine allocation of assets among a variety of sectors, (iii) its Sector Specialists, who are responsible for identifying investment opportunities in particular securities within these sectors, including the structuring of certain securities directly with the issuers or with investment banks and dealers involved in the origination of such securities, and (iv) portfolio managers, who determine which securities best fit the Fund based on the Fund's investment objective and top-down sector allocations. In managing the Fund, the Sub-Adviser uses a process for selecting securities for purchase and sale that is based on intensive credit research and involves extensive due diligence on each issuer, region and sector. The Sub-Adviser also considers macroeconomic outlook and geopolitical issues.

The Fund will seek to achieve its investment objective by investing in:

Investment Portfolio Income Securities. The Fund may invest in a wide range of fixed-income and other debt and senior equity securities ("Income Securities") selected from a variety of sectors and credit qualities. The Fund may invest in Income Securities of any credit quality, including, without limitation, Income Securities rated below-investment grade (commonly referred to as "high-yield" or "junk" bonds), which are considered speculative with respect to the issuer's capacity to pay interest and repay principal. The sectors and types of Income Securities in which the Fund may invest, include, but are not limited to:

- Corporate bonds;
- Loans and loan participations (including senior secured floating rate loans, “second lien” secured floating rate loans, and other types of secured and unsecured loans with fixed and variable interest rates) (collectively, “Loans”);
- Structured finance investments (including residential and commercial mortgage-related securities, asset-backed securities, collateralized debt obligations and risk-linked securities);
- U.S. government and agency securities;
- Mezzanine and preferred securities; and
- Convertible securities.

Common Equity Securities and Covered Call Option Strategy. The Fund may invest in common stocks, limited liability company interests, trust certificates and other equity investments (“Common Equity Securities”) that the Sub-Adviser believes offer attractive yield and/or capital appreciation potential. As part of its Common Equity Securities strategy, the Fund currently intends to employ a strategy of writing (selling) covered call options and may, from time to time, buy or sell put options on individual Common Equity Securities and, to a lesser extent, on indices of securities and sectors of securities. This covered call option strategy is intended to generate current gains from option premiums as a means to enhance distributions payable to the Fund’s Common Shareholders.

Structured Finance Investments. The Fund may invest in structured finance investments, which are Income Securities and Common Equity Securities typically issued by special purpose vehicles that hold income-producing securities (e.g., mortgage loans, consumer debt payment obligations and other receivables) and other financial assets. Structured finance investments are tailored, or packaged, to meet certain financial goals of investors. Typically, these investments provide investors with capital protection, income generation and/or the opportunity to generate capital growth. The Sub-Adviser believes that structured finance investments provide attractive risk-adjusted returns, frequent sector rotation opportunities and prospects for adding value through security selection. Structured finance investments include:

Mortgage-Related Securities. Mortgage-related securities are a form of derivative collateralized by pools of commercial or residential mortgages. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. These securities may include complex instruments such as collateralized mortgage obligations, real estate investment trusts (“REITs”) (including debt and preferred stock issued by REITs), and other real estate-related securities. The mortgage-related securities in which the Fund may invest include those with fixed, floating or variable interest rates, those with interest rates that change based on multiples of changes in a specified index of interest rates, and those with interest rates that change inversely to changes in

interest rates, as well as those that do not bear interest. The Fund may invest in residential and commercial mortgage-related securities issued by governmental entities and private issuers, including subordinated mortgage-related securities. The underlying assets of certain mortgage-related securities may be subject to prepayments, which shorten the weighted average maturity and may lower the return of such securities.

Asset-Backed Securities. Asset-backed securities (“ABS”) are a form of structured debt obligation. ABS are payment claims that are securitized in the form of negotiable paper that is issued by a financing company (generally called a special purpose vehicle). Collateral assets brought into a pool according to specific diversification rules. A special purpose vehicle is founded for the purpose of securitizing these payment claims and the assets of the special purpose vehicle are the diversified pool of collateral assets. The special purpose vehicle issues marketable securities which are intended to represent a lower level or risk than an underlying collateral asset individually, due to the diversification in the pool. The redemption of the securities issued by the special purpose vehicle takes place out of the cash flow generated by the collected assets. A special purpose vehicle may issue multiple securities with different priorities to the cash flows generated and the collateral assets. The collateral for ABS may include home equity loans, automobile and credit card receivables, boat loans, computer leases, airplane leases, mobile home loans, recreational vehicle loans and hospital account receivables. The Fund may invest in these and other types of ABS that may be developed in the future. There is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these securities.

Collateralized Debt Obligations. A collateralized debt obligation (“CDO”) is an asset-backed security whose underlying collateral is typically a portfolio of bonds, bank loans, other structured finance securities and/or synthetic instruments. Where the underlying collateral is a portfolio of bonds, a CDO is referred to as a collateralized bond obligation (“CBO”). Where the underlying collateral is a portfolio of bank loans, a CDO is referred to as a collateralized loan obligation (“CLO”). Investors in CLOs bear the credit risk of the underlying collateral. Multiple tranches of securities are issued by the CLO, offering investors various maturity and credit risk characteristics. Tranches are categorized as senior, mezzanine, and subordinated/equity, according to their degree of risk. If there are defaults or the CLO’s collateral otherwise underperforms, scheduled payments to senior tranches take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. This prioritization of the cash flows from a pool of securities among the several tranches of the CLO is a key feature of the CLO structure. If there are funds remaining after each tranche of debt receives its contractual interest rate and the CLO meets or exceeds required collateral coverage levels (or other similar covenants), the remaining funds may be paid to the subordinated (or residual) tranche (often referred to as the “equity” tranche). CLOs are subject to the same risk

of prepayment described with respect to certain mortgage-related and asset-backed securities.

The Fund may invest in senior, rated tranches as well as mezzanine and subordinated tranches of CLOs. Investment in the subordinated tranche is subject to special risks. The subordinated tranche does not receive ratings and is considered the riskiest portion of the capital structure of a CLO because it bears the bulk of defaults from the loans in the CLO and serves to protect the other, more senior tranches from default in all but the most severe circumstances.

Risk-Linked Securities. Risk-linked securities (“RLS”) are a form of derivative issued by insurance companies and insurance-related special purpose vehicles that apply securitization techniques to catastrophic property and casualty damages. RLS are typically debt obligations for which the return of principal and the payment of interest are contingent on the non-occurrence of a pre-defined “trigger event.” Depending on the specific terms and structure of the RLS, this trigger could be the result of a hurricane, earthquake or some other catastrophic event.

Real Property Asset Companies. The Fund may invest in Income Securities and Common Equity Securities issued by companies that own, produce, refine, process, transport and market “real property assets,” such as real estate and the natural resources upon or within real estate (“Real Property Asset Companies”).

Personal Property Asset Companies. The Fund may invest in Income Securities and Common Equity Securities issued by companies that seek to profit primarily from the ownership, rental, leasing, financing or disposition of personal (as opposed to real) property assets (“Personal Property Asset Companies”). Personal (as opposed to real) property includes any tangible, movable property or asset. The Fund will typically seek to invest in Income Securities and Common Equity Securities of Personal Property Asset Companies the investment performance of which is not expected to be highly correlated with traditional market indexes because the personal property asset held by such company is non-correlated with traditional debt or equity markets. Such personal property assets include special situation transportation assets (e.g., railcars, airplanes and ships) and collectibles (e.g., antiques, wine and fine art).

Private Securities. The Fund may invest in privately issued Income Securities and Common Equity Securities of both public and private companies (“Private Securities”). Private Securities have additional risk considerations than comparable public securities, including availability of financial information about the issuer and valuation and liquidity issues.

Investment Funds. As an alternative to holding investments directly, the Fund may also obtain investment exposure to Income Securities and Common Equity Securities by investing in other investment companies, including registered investment companies, private investment funds and/or other pooled investment vehicles (collectively, “Investment Funds”). The Fund may invest up to 30% of its total assets in Investment Funds that primarily hold (directly or indirectly) investments in which the Fund may invest directly. The 1940 Act generally limits a registered

investment company's investments in other investment companies to 10% of its total assets. However, pursuant to exemptions set forth in rules and regulations promulgated under the 1940 Act, the Fund may invest in excess of this limitation provided that the conditions of such exemptions are met. In addition, the Fund may invest in certain ETFs in excess of the 10% limitation in reliance upon and in accordance with exemptive relief obtained by such ETFs. The Fund will invest in private investment funds, commonly referred to as "hedge funds," only to the extent permitted by applicable rules, regulations and interpretations of the SEC and NYSE. The Fund has no current intention to invest in private investment funds. Investments in other Investment Funds involve operating expenses and fees at the Investment Fund level that are in addition to the expenses and fees borne by the Fund and are borne indirectly by holders of the Fund's Common Shares.

Synthetic Investments. As an alternative to holding investments directly, the Fund may also obtain investment exposure to Income

Securities and Common Equity Securities through the use of customized derivative instruments (including swaps, options, forwards, notional principal contracts or other financial instruments) to replicate, modify or replace the economic attributes associated with an investment in Income Securities and Common Equity Securities (including interests in Investment Funds).

Derivative Transactions. The Fund may purchase and sell derivative instruments (which derive their value by reference to another instrument, security or index) for investment purposes, such as obtaining investment exposure to an investment category; risk management purposes, such as hedging against fluctuations in securities prices or interest rates; diversification purposes; or to change the duration of the Fund. In order to help protect the soundness of derivative transactions and outstanding derivative positions, the Sub-Adviser generally requires derivative counterparties to have a minimum credit rating of A from Moody's Investors Service (or a comparable rating from another nationally recognized statistical rating organization ("NRSRO")) and monitors such rating on an ongoing basis. In addition, the Sub-Adviser seeks to allocate derivative transactions to limit exposure to any single counterparty. The Fund has not adopted a maximum percentage limit with respect to derivative investments. However, the maximum level of and types of derivative transactions used by the Fund will be approved by the Board of Trustees and the Board of Trustees will receive regular reports from the Investment Adviser and the Sub-Adviser regarding the Fund's use of derivative instruments and the effect of derivative transactions on the management of the Fund's portfolio and the performance of the Fund.

The Fund may allocate its assets among a wide variety of Income Securities and Common Equity Securities.

The Fund may invest without limitation in below-investment grade securities (e.g., securities rated below Baa3 by Moody's Investors Service, Inc., below BBB- by Standard & Poor's Ratings Group or Fitch Ratings or comparably rated by another nationally recognized statistical rating organization or, if unrated, determined by the Sub-Adviser to be of comparable quality). Below-investment grade securities are commonly referred to as "high-yield" or "junk" bonds and are considered speculative with respect to the issuer's capacity to pay interest and repay principal. The Fund's investments in any of the sectors and types of Income Securities in which the Fund may invest may include, without limitation, below investment grade securities. The Fund's investments in below investment grade securities may include distressed and defaulted securities.

**Investment
Policies**

Under normal market conditions, the Fund will not invest more than:

- 50% of its total assets in Common Equity Securities consisting of common stock;
- 30% of its total assets in Investment Funds;
- 20% of its total assets in non-U.S. dollar-denominated Income Securities of corporate and governmental issuers located outside the United States; and
- 10% of its total assets in Income Securities of issuers in emerging markets.

The percentage of the Fund's total assets allocated to any category of investment may at any given time be significantly less than the maximum percentage permitted pursuant to the above referenced investment policies.

Unless otherwise stated in this Prospectus or the SAI, the Fund's investment policies are considered non-fundamental and may be changed by the Board of Trustees of the Fund (the "Board of Trustees") without Common Shareholder approval. The Fund will provide investors with at least 60 days' prior written notice of any change in the Fund's investment policies. See "Investment Objective and Policies" in this Prospectus and in the SAI.

**Financial
Leverage**

The Fund may seek to enhance the level of its current distributions by utilizing financial leverage through the issuance of preferred shares ("Preferred Shares"), through borrowing or the issuance of commercial paper or other forms of debt ("Borrowings"), through reverse repurchase agreements, dollar rolls or similar transactions or through a combination of the foregoing (collectively "Financial Leverage"). The Fund's total Financial Leverage may vary over time; however, the aggregate amount of Financial Leverage is not currently expected to exceed $33 \frac{1}{3}$ % of the Fund's Managed Assets (as defined herein) after such issuance and/or borrowing; however, the Fund may utilize Financial Leverage up to the limits imposed by the 1940 Act. Under the 1940 Act the Fund may not utilize Borrowings if, immediately after incurring such Borrowing, the Fund would have

asset coverage (as defined in the 1940 Act) of less than 300% (i.e., for every dollar of Borrowings outstanding, the Fund is required to have at least three dollars of assets). Under the 1940 Act, the Fund may not issue Preferred Shares if, immediately after issuance, the Fund would have asset coverage (as defined in the 1940 Act) of less than 200% (i.e., for every dollar of Preferred Shares outstanding, the Fund is required to have at least two dollars of assets). The Fund has no present intention to issue Preferred Shares. The Fund may also borrow in excess of such limit for temporary purposes such as the settlement of transactions.

The Fund has entered into a committed facility agreement with BNP Paribas Prime Brokerage, Inc. (“BNP Paribas”) pursuant to which the Fund may borrow up to \$80 million. As of May 31, 2016, outstanding Borrowings under the committed facility agreement were approximately \$9.4 million, which represented approximately 2.1% of the Fund’s Managed Assets as of such date. In addition, as of May 31, 2016, the Fund had reverse repurchase agreements outstanding representing Financial Leverage equal to approximately 29% of the Fund’s Managed Assets. As of May 31, 2016, the Fund’s total Financial Leverage represented approximately 31.1% of the Fund’s Managed Assets. With respect to leverage incurred through investments in reverse repurchase agreements, dollar rolls and similar transactions, the Fund intends to earmark or segregate cash or liquid securities in accordance with applicable interpretations of the staff of the Securities and Exchange Commission (the “SEC”). As a result of such segregation, the Fund’s obligations under such transactions will not be considered indebtedness for purposes of the 1940 Act and the Fund’s use of leverage through reverse repurchase agreements, dollar rolls and similar transactions will not be limited by the 1940 Act. However, the Fund’s use of leverage through reverse repurchase agreements, dollar rolls and similar transactions will be included when calculating the Fund’s Financial Leverage, and therefore is not currently expected to exceed $33 \frac{1}{3} \%$ of the Fund’s Managed Assets, and may be further limited by the availability of cash or liquid securities to earmark or segregate in connection with such transactions.

In addition, the Fund may engage in certain derivatives transactions that have economic characteristics similar to leverage. To the extent the terms of such transactions obligate the Fund to make payments, the Fund intends to earmark or segregate cash or liquid securities in an amount at least equal to the current value of the amount then payable by the Fund under the terms of such transactions or otherwise cover such transactions in accordance with applicable interpretations of the staff of the SEC. As a result of such segregation or cover, the Fund’s obligations under such transactions will not be considered indebtedness for purposes of the 1940 Act and will not be included in calculating the aggregate amount of the Fund’s Financial Leverage. To the extent that the Fund’s obligations under such transactions are not so segregated or covered, such obligations may be considered “senior securities representing indebtedness” under the 1940 Act and therefore subject to the 300% asset coverage requirement described above.

So long as the net rate of return on the Fund's investments purchased with the proceeds of Financial Leverage exceeds the cost of such Financial Leverage, such excess amounts will be available to pay higher distributions to holders of the Fund's Common Shares. In connection with the Fund's use of Financial Leverage, the Fund may seek to hedge the interest rate risks associated with the Financial Leverage through interest rate swaps, caps or other derivative transactions. There can be no assurance that the Fund's Financial Leverage strategy will be successful during any period during which it is employed. The costs associated with the issuance of Financial Leverage will be borne by Common Shareholders, which will result in a reduction of net asset value of the Common Shares. The fee paid to the Adviser will be calculated on the basis of the Fund's Managed Assets, including proceeds from Financial Leverage, so the fees paid to the Adviser will be higher when Financial Leverage is utilized. Common Shareholders bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of Financial Leverage, which means that Common Shareholders effectively bear the entire advisory fee. See "Use of Financial Leverage" and "Risks—Financial Leverage Risk."

**Other
Investment
Practices**

Temporary Defensive Investments. At any time when a temporary defensive posture is believed by the Sub-Adviser to be warranted (a "temporary defensive period"), the Fund may, without limitation, hold cash or invest its assets in money market instruments and repurchase agreements in respect of those instruments. The Fund may not achieve its investment objective during a temporary defensive period or be able to sustain its historical distribution levels. See "Investment Objective and Policies—Temporary Defensive Investments."

**Management
of the Fund**

Guggenheim Funds Investment Advisors, LLC acts as the Fund's Investment Adviser pursuant to an advisory agreement with the Fund (the "Advisory Agreement"). Pursuant to the Advisory Agreement, the Investment Adviser is responsible for the management of the Fund and administers the affairs of the Fund to the extent requested by the Board of Trustees. As compensation for its services, the Fund pays the Investment Adviser a fee, payable monthly, in an annual amount equal to 1.00% of the Fund's average daily Managed Assets. "Managed Assets" means the total assets of the Fund, including the assets attributable to the proceeds from any borrowings or other forms of Financial Leverage, minus liabilities, other than liabilities related to any Financial Leverage.

Guggenheim Partners Investment Management, LLC acts as the Fund's Sub-Adviser pursuant to a sub-advisory agreement with the Fund and the Investment Adviser (the "Sub-Advisory Agreement"). Pursuant to the Sub-Advisory Agreement, the Sub-Adviser is responsible for the management of the Fund's portfolio of securities. As compensation for its services, the Investment Adviser pays the Sub-Adviser a fee, payable monthly, in a maximum annual amount equal to 0.50% of the Fund's average daily Managed Assets.

Each of the Investment Adviser and the Sub-Adviser are wholly-owned subsidiaries of Guggenheim Partners.

The Fund intends to pay substantially all of its net investment income to Common Shareholders through monthly distributions. In addition, the Fund intends to distribute any net long-term capital gains to Common Shareholders as long-term capital gain dividends at least annually. The Fund expects that dividends paid on the Common Shares will consist of (i) investment company taxable income, which includes, among other things, ordinary income, short-term capital gain and income from certain hedging and interest rate transactions, (ii) qualified dividend income and (iii) long-term capital gain (gain from the sale of a capital asset held longer than one year). To the extent the Fund receives dividends with respect to its investments in Common Equity Securities that consist of qualified dividend income (income from domestic and certain foreign corporations), a portion of the Fund's distributions to its Common Shareholders may consist of qualified dividend income. The Fund cannot assure you, however, as to what percentage of the dividends paid on the Common Shares, if any, will consist of

Distributions qualified dividend income or long-term capital gains, which are taxed at lower rates for individuals than ordinary income. In certain circumstances, the Fund may elect to retain income or capital gain and pay income or excise tax on such undistributed amount, to the extent that the Board of Trustees, in consultation with Fund management, determines it to be in the best interest of shareholders to do so. See "Distributions."

If you hold your Common Shares in your own name or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the "Plan"), unless you elect to receive cash, all dividends and distributions that are declared by the Fund will be automatically reinvested in additional Common Shares of the Fund pursuant to the Plan. If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial adviser for more information. See "Dividend Reinvestment Plan."

Listing and Symbol The Fund's currently outstanding Common Shares are, and the Common Shares offered in this Prospectus will be, listed on the New York Stock Exchange (the "NYSE") under the symbol "GOF." Not a Complete Investment Program. An investment in the Common Shares of the Fund should not be considered a complete investment program. The Fund is intended for long-term investors seeking current income and capital appreciation. The Fund is not meant to provide a vehicle for those who wish to play short-term swings in the stock market. Each Common Shareholder should take into account the Fund's investment objective as well as the Common Shareholder's other investments when considering an investment in the Fund.

Special Risk Considerations Investment and Market Risk. An investment in Common Shares of the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest. An investment in the Common Shares of the Fund represents an indirect investment in the securities owned by the Fund. The value of those securities may fluctuate, sometimes rapidly and unpredictably. The value of the

securities owned by the Fund may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived economic conditions, changes in interest or currency rates or changes in investor sentiment or market outlook generally. At any point in time, your Common Shares may be worth less than your original investment, including the reinvestment of Fund dividends and distributions.

Management Risk. The Fund is subject to management risk because it has an actively managed portfolio. The Sub-Adviser will apply investment techniques and risk analysis in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The Fund's allocation of its investments across various asset classes and sectors may vary significantly over time based on the Adviser's analysis and judgment. As a result, the particular risks most relevant to an investment in the Fund, as well as the overall risk profile of the Fund's portfolio, may vary over time.

Income Risk. The income investors receive from the Fund is based primarily on the interest it earns from its investments in Income Securities, which can vary widely over the short-and long-term. If prevailing market interest rates drop, investors' income from the Fund could drop as well. The Fund's income could also be affected adversely when prevailing short-term interest rates increase and the Fund is utilizing leverage, although this risk is mitigated to the extent the Fund invests in floating-rate obligations.

Dividend Risk. Dividends on common stock and other Common Equity Securities which the Fund may hold are not fixed but are declared at the discretion of an issuer's board of directors. There is no guarantee that the issuers of the Common Equity Securities in which the Fund invests will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

Income Securities Risk. In addition to the risks discussed above, Income Securities, including high-yield bonds, are subject to certain risks, including:

Issuer Risk. The value of Income Securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage, reduced demand for the issuer's goods and services, historical and projected earnings, and the value of its assets.

Credit Risk. Credit risk is the risk that one or more debt obligations in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the obligation experiences a decline in its financial status.

Interest Rate Risk. Interest rate risk is the risk that Income Securities will decline in value because of changes in market interest rates. When market interest rates rise, the market value of Income Securities generally will fall. These risks may be greater in the current market environment because interest rates are near historically low levels.

Prevailing interest rates may be adversely impacted by market and economic factors, including the potential impact of

tapering of “quantitative easing” by the Federal Reserve Board. If interest rates rise the markets may experience increased volatility, which may adversely affect the value and/or liquidity of certain of the Fund’s investments.

Increases in interest rates may adversely affect the Fund’s ability to achieve its investment objective.

The prices of longer-term securities fluctuate more than prices of shorter-term securities as interest rates change. The Fund’s use of leverage, as described below, will tend to increase common share interest rate risk. The Fund may utilize certain strategies, including taking positions in futures or interest rate swaps, for the purpose of reducing the interest rate sensitivity of credit securities held by the Fund and decreasing the Fund’s exposure to interest rate risk. The Fund is not required to hedge its exposure to interest rate risk and may choose not to do so. In addition, there is no assurance that any attempts by the Fund to reduce interest rate risk will be successful or that any hedges that the Fund may establish will perfectly correlate with movements in interest rates. The Fund may invest in variable and floating rate debt instruments, which generally are less sensitive to interest rate changes than fixed rate instruments, but generally will not increase in value if interest rates decline.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund’s portfolio will decline if the Fund invests the proceeds from matured, traded or called Income Securities at market interest rates that are below the Fund portfolio’s current earnings rate. A decline in income could affect the Common Shares’ market price or the overall return of the Fund.

Prepayment Risk. During periods of declining interest rates, borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk.

Liquidity Risk. The Fund may invest without limitation in Income Securities for which there is no readily available trading market or which are otherwise illiquid, including certain high-yield bonds. The Fund may not be able to readily dispose of illiquid securities and obligations at prices that approximate those at which the Fund could sell such securities and obligations if they were more widely traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. In addition, limited liquidity could affect the market price of Income Securities, thereby adversely affecting the Fund’s net asset value and ability to make distributions.

Valuation of Certain Income Securities Risk. Because the secondary markets for certain investments may be limited, they may be difficult to value. Where market quotations are not readily available, valuation may require more research than for more liquid investments. In addition, elements of judgment may play a greater role in valuation in such cases than for investments with a more active secondary market because there is less reliable objective data available. A security that is fair valued may be valued at a price higher or lower than the value determined by other funds using their own fair valuation procedures.

Prices obtained by the Fund upon the sale of such securities may not equal the value at which the Fund carried the investment on its books, which would adversely affect the net asset value of the Fund.

Duration and Maturity Risk. The Fund has no set policy regarding portfolio maturity or duration. Holding long duration and long maturity investments will expose the Fund to certain magnified risks. These risks include interest rate risk, credit risk and liquidity risks as discussed above. Generally speaking, the longer the duration of the Fund's portfolio, the more exposure the Fund will have to interest rate risk described above.

Below-Investment Grade Securities Risk. T
