~ The face amount is denominated in U.S. dollars unless otherwise indicated.

* Non-income producing security.

** Includes cumulative appreciation (depreciation).

† Value determined based on Level 1 inputs, unless otherwise noted. — See Note 3.

†† Value determined based on Level 2 inputs, unless otherwise noted. — See Note 3.

††† Value determined based on Level 3 inputs — See Note 3.

Security was fair valued by the Valuation Committee at February 28, 2019. The total market value of fair valued securities amounts to \$31,641,617, (cost \$32,112,931) or 5.2% of total net assets.

2 Affiliated issuer.

3 Perpetual maturity.

4 Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

5 Rate indicated is the 7-day yield as of February 28, 2019.

6 Payment-in-kind security.

Security is a 144A or Section 4(a)(2) security. These securities have been determined to be liquid under guidelines

7 established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) securities is

\$144,069,603 (cost \$157,373,140), or 23.7% of total net assets.

Variable rate security. Rate indicated is the rate effective at February 28, 2019. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a

8 position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

Guggenheim Strategic Opportunities Fund
SCHEDULE OF INVESTMENTS (Unaudited)

February 28, 2019

- 9 Security has no stated coupon. However, it is expected to receive residual cash flow payments on defined deal dates.
- 10 Security is a step up/down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity. Rate indicated is the rate at February 28, 2019. See table below for additional step information for each security.
- 11 Security is a 144A or Section 4(a)2 security. These securities have been determined to be illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) illiquid and restricted securities is \$20,666,268 (cost \$27,223,581), or 3.4% of total net assets — See Note 6.
- 12 Security is in default of interest and/or principal obligations.
- 13 Rate indicated is the effective yield at the time of purchase.
- 14 Zero coupon rate security.
- 15 Repurchase Agreements — See additional disclosure in the repurchase agreements table below for more information on repurchase agreements.
- 16 All or a portion of these securities have been physically segregated in connection with futures contracts and unfunded loan commitments. As of February 28, 2019, the total value of segregated securities was \$27,984,942.
- 17 The rate is adjusted periodically by the counterparty, subject to approval by the Adviser, and is not based upon a set reference rate and spread. Rate indicated is the rate effective at February 28, 2019.

Senior Floating Rate Interests	826,962	Enterprise Value	Valuation Multiple	10.3 x	10.3 x
Warrants	131	Enterprise Value	Valuation Multiple	17 x	—
Total	\$37,186,546				
Liabilities:					
Unfunded Loan Commitments	\$635,104	Model Price	Purchase Price	—	—

Any remaining Level 3 securities held by the Fund and excluded from the tables above, were not considered material to the Fund.

Significant changes in an indicative quote, market comparable yield or valuation multiple would generally result in significant changes in the fair value of the security.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

As of February 28, 2019, the Fund had securities with a total value of \$8,372,156 transfer from Level 3 to Level 2 due to availability of market price information at period end and had securities with a total value of \$1,743,913 transfer from Level 2 to Level 3 due to lack of observable inputs. There were no other securities that transferred between levels.

Summary of Fair Value Level 3 Activity

Following is a reconciliation of Level 3 assets and liabilities for which significant unobservable inputs were used to determine fair value for the period ended February 28, 2019:

LEVEL 3 - Fair value measurement using significant unobservable inputs

	Assets							Total Assets
	Asset-Backed Securities	Corporate Bonds	Senior Floating Rate Interests	Warrants	Common Stocks	Preferred Stocks	Senior Fixed Rate Interests	
Beginning Balance	\$ 11,860,166	\$ 10,036,584	\$ 27,159,336	\$-	\$ 228,184	\$ 485,000	\$-	\$ 49,769,270
Purchases/(Receipts)	-	21,203	5,547,513	-	-	35,857	-	5,604,573
Sales, maturities and (paydowns)/Fundings	(393,686)	(1,606,146)	(9,490,366)	-	(4,791)	-	-	(11,494,989)

Transfers out of Level 3	(2,173,617)	(4,014,675)	(2,183,864)	-	-	-	-	(8,372,156)
Ending Balance	\$9,719,017	\$4,370,536	\$21,722,512	\$131	\$89,580	\$520,857	\$763,913	\$37,186,546
Net change in unrealized appreciation (depreciation) for investments in Level 3 securities still held at February 28, 2019	\$225,132	\$(52,031)	\$(429,552)	\$131	\$(133,599)	\$-	\$(117,747)	\$(507,666)

Step Coupon Bonds

The following table discloses additional information related to step coupon bonds held by the Fund. Rates for all step coupon bonds held by the Fund are scheduled to increase, none are scheduled to decrease.

Name	Coupon Rate	
	at Next and Final Reset Date	Next and Final Rate Reset Date
Apollo Aviation Securitization Equity Trust 2016-1A, 6.50% due 03/17/36	8.50%	03/15/23
Willis Engine Securitization Trust II 2012-A, 5.50% due 09/15/37	8.50%	09/15/20

Repurchase Agreements

In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian takes possession of the underlying collateral. For the following repurchase agreements, the collateral is in the possession of the Fund's custodian and is evaluated to ensure that its market value exceeds, at a minimum, 102% of the original face amount of the repurchase agreements, with the exception of where securities are being sold short. The interest rate on repurchase agreements is market driven based on the underlying collateral obtained.

Counterparty and Terms of Agreement	Face Value	Repurchase Price	Collateral	Par Value	Fair Value

Maturity*				

* The rate is adjusted periodically by the counterparty, subject to approval by the Adviser, and is not based upon a set reference rate and spread. Rate indicated is the rate effective at February 28, 2019.

In the event of counterparty default, the Fund has the right to collect the collateral to offset losses incurred. There is potential loss to the Fund in the event the Fund is delayed or prevented from exercising its right to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund’s investment adviser, acting under the supervision of the Board of Trustees, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments (“GI”), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-Q

Guggenheim Strategic Opportunities Fund
SCHEDULE OF INVESTMENTS (Unaudited)

February 28, 2019

Transactions during the period ended February 28, 2019, in which the company is an affiliated issuer, were as follows:

Security Name	Value 05/31/18	Additions	Reductions	Change in		Value 02/28/19	Shares/Face Amount 02/28/19	Investment Income

* Non-income producing security.

**Market value is less than \$1.

1 Security was fair valued by the Valuation Committee at February 28, 2019. The total market value of fair valued and affiliated securities amounts to \$27,407, (cost \$13,480) or less than 0.1% of total net assets.

Variable rate security. Rate indicated is the rate effective at February 28, 2019. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

3 Security is in default of interest and/or principal obligations.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Note 1 – Organization and Significant Accounting Policies

Organization

Guggenheim Strategic Opportunities Fund (the “Fund”) was organized as a Delaware statutory trust on November 13, 2006. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”).

The Fund’s investment objective is to maximize total return through a combination of current income and capital appreciation.

Significant Accounting Policies

The Fund operates as an investment company and, accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) and are consistently followed by the Fund. This requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. All time references are based on Eastern Time.

(a) Valuation of Investments

The Board of Trustees of the Fund (the “Board”) has adopted policies and procedures for the valuation of the Fund’s investments (the “Valuation Procedures”). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim’s investment management, fund administration, legal and compliance departments (the “Valuation Committee”), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Fund’s securities and/or other assets.

Valuations of the Fund’s securities are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed, to review the valuation of all assets which have been fair valued for reasonableness. The Fund’s officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review procedures used and valuations provided by the pricing services.

If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Equity securities listed on an exchange (New York Stock Exchange (“NYSE”) or American Stock Exchange) are valued at the last quoted sale price as of the close of business on the NYSE, usually at 4:00 p.m. on the valuation date. Equity securities listed on the NASDAQ market system are valued at the NASDAQ Official Closing Price on the valuation date, which may not necessarily represent the last sale price. If there has been no sale on such exchange or NASDAQ on a given day, the security is valued at the closing bid price on that day.

Open-end investment companies are valued at their net asset value (“NAV”) as of the close of business on the valuation date. Exchange-traded funds and closed-end investment companies are valued at the last quoted sale price.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the NYSE. The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currencies are valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. Investments in foreign securities may involve risks not present in domestic investments. The Valuation Committee will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: the value of the securities traded on other foreign markets, ADR trading, closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities. In addition, under the Valuation Procedures, the Valuation Committee and Guggenheim Funds Investment Advisors, LLC (“GFIA” or the “Advisor”) are authorized to use prices and other information supplied by a third party pricing vendor in valuing foreign securities.

U.S. Government securities are valued by either independent pricing services, the last traded fill price, or at the reported bid price at the close of business.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Debt securities with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker-dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term debt securities with a maturity of 60 days or less at acquisition are valued at amortized cost, provided such amount approximates market value. Money market funds are valued at their NAV.

Repurchase agreements are valued at amortized cost, provided such amounts approximate market value.

Typically, loans are valued using information provided by an independent third party pricing service which uses broker quotes. If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Listed options are valued at the official settlement price listed by the exchange, usually as of 4:00 p.m. Long options are valued using the bid price and short options are valued using the ask price. In the event that a settlement price is not available, fair valuation is enacted. Over-the-counter (“OTC”) options are valued using the average bid price (for long options) or average ask price (for short options) obtained from one or more security dealers.

The value of futures contracts is accounted for using the unrealized appreciation or depreciation on the contracts that is determined by marking the contracts to their current realized settlement prices. Financial futures contracts are valued at the 4:00 p.m. price on the valuation date. In the event that the exchange for a specific futures contract closes earlier than 4:00 p.m., the futures contract is valued at the official settlement price of the exchange. However, the underlying securities from which the futures contract value is derived are monitored until 4:00 p.m. to determine if fair valuation would provide a more accurate valuation.

The value of credit default swap agreements entered into by a Fund is accounted for using the unrealized appreciation or depreciation on the agreements that is determined by marking the agreements to the last quoted value of the index that the swap pertains to at the close of the NYSE. The swap’s market value is then adjusted to include dividends accrued, financing charges and/or interest associated with the swap agreements.

Forward foreign currency exchange contracts are valued daily based on the applicable exchange rate of the underlying currency.

Investments for which market quotations are not readily available are fair-valued as determined in good faith by GFIA, subject to review and approval by the Valuation Committee, pursuant to methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security’s (or asset’s or liability’s) “fair value”. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to market prices; sale prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics, or based on inputs such as anticipated cash flows or collateral, spread over U.S. Treasury securities, and other information analysis.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Note 2 – Financial Instruments and Derivatives

As part of its investment strategy, the Fund utilizes short sales and a variety of derivative instruments. These investments involve, to varying degrees, elements of market risk. Valuation and accounting treatment of these instruments can be found under Significant Accounting Policies in Note 1 of these Notes to Schedule of Investments.

Short Sales

A short sale is a transaction in which a Fund sells a security it does not own. If the security sold short decreases in price between the time the Fund sells the security and closes its short position, the Fund will realize a gain on the transaction. Conversely, if the security increases in price during the period, the Fund will realize a loss on the transaction. The risk of such price increases is the principal risk of engaging in short sales.

Derivatives

Derivatives are instruments whose values depend on, or are derived from, in whole or in part, the value of one or more other assets, such as securities, currencies, commodities or indices. Derivative instruments may be used to increase investment flexibility (including to maintain cash reserves while maintaining exposure to certain other assets), for risk management (hedging) purposes, to facilitate trading, to reduce transaction costs and to pursue higher investment returns. Derivative instruments may also be used to mitigate certain investment risks, such as foreign currency exchange rate risk, interest rate risk and credit risk. U.S. GAAP requires disclosures to enable investors to better understand how and why a Fund uses derivative instruments, how these derivative instruments are accounted for and their effects on the Fund's financial position and results of operations.

Options Written

A call option on a security gives the purchaser of the option the right to buy, and the writer of a call option the obligation to sell, the underlying security. The purchaser of a put option has the right to sell, and the writer of the put option the obligation to buy, the underlying security at any time during the option period. The risk associated with purchasing options is limited to the premium originally paid.

The risk in writing a call option is that a Fund may incur a loss if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that a Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there may be an imperfect correlation between the movement in prices of options and the underlying securities where a Fund may not be able to enter into a closing transaction because of an illiquid secondary market; or, for OTC options, a Fund may be at risk because of the counterparty's inability to perform.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Future Contracts

A futures contract is an agreement to purchase (long) or sell (short) an agreed amount of securities or other instruments at a set price for delivery at a future date. There are significant risks associated with a Fund's use of futures contracts, including (i) there may be an imperfect or no correlation between the changes in market value of the underlying asset and the prices of futures contracts; (ii) there may not be a liquid secondary market for a futures contract; (iii) trading restrictions or limitations may be imposed by an exchange; and (iv) government regulations may restrict trading in futures contracts. When investing in futures, there is minimal counterparty credit risk to a Fund because futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees against default. Securities held as collateral are noted on the Schedule of Investments.

Swap Agreements

A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. A Fund utilizing OTC swaps bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying asset declines in value. Certain standardized swaps are subject to mandatory central clearing and are executed on a multi-lateral or other trade facility platform, such as a registered exchange. There is limited counterparty credit risk with respect to centrally-cleared swaps as the transaction is facilitated through a central clearinghouse, much like exchange-traded futures contracts. Upon entering into certain centrally-cleared swap transactions, the Fund is required to deposit with its clearing broker an amount of cash or securities as an initial margin. Subsequent variation margin payments or receipts are made or received by the Fund, depending on fluctuations in the fair value of the reference entity.

Credit default swaps are instruments which allow for the full or partial transfer of third party credit risk, with respect to a particular entity or entities, from one counterparty to the other. In accordance with its principal investment strategy, the Fund enters into credit default swaps as a "seller" or "buyer" of protection primarily to gain or reduce exposure to the high yield bond market. A seller of credit default swaps is selling credit protection or assuming credit risk with respect to the underlying entity or entities. The buyer in a credit default swap is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If a credit event occurs, as defined under the terms of the swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the reference index. The Notional Amount reflects the maximum potential amount the seller of credit protection could be required to pay to the buyer if a credit event occurs. The seller of protection receives periodic premium payments from the buyer and may also receive or pay an upfront premium adjustment to the stated periodic payments.

The quoted market prices and resulting market values for credit default swap agreements on securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract is an agreement between two parties to exchange two designated currencies at a specific time in the future. Certain types of contracts may be cash settled, in an amount equal to the change in exchange rates during the term of the contract. The contracts can be used to hedge or manage exposure to foreign currency risks with portfolio investments or to gain exposure to foreign currencies.

The market value of a forward foreign currency exchange contract changes with fluctuations in foreign currency exchange rates. Furthermore, the Fund may be exposed to risk if the counterparties cannot meet the contract terms or if the currency value changes unfavorably as compared to the U.S. dollar.

In conjunction with short sales and the use of derivative instruments, the Fund is required to maintain collateral in various forms. Depending on the financial instrument utilized and the broker involved, the Fund uses margin deposits at the broker, cash and/or securities segregated at the custodian bank, discount notes or repurchase agreements allocated to the Fund.

The Fund has established counterparty credit guidelines and enters into transactions only with financial institutions of investment grade or better. The Fund monitors the counterparty credit risk.

Note 3 – Fair Value Measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

Level 1 — quoted prices in active markets for identical assets or liabilities.

Level 2 — significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

Independent pricing services are used to value a majority of the Fund's investments. When values are not available from a pricing service, they will be determined using a variety of sources and techniques, including: market prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics or based on inputs such as anticipated cash flows or collateral, spread over U.S. Treasury securities, and other information and analysis. A significant portion of the Fund's assets and liabilities are categorized as Level 2, as indicated in this report.

Indicative quotes from broker-dealers, adjusted for fluctuations in criteria such as credit spreads and interest rates, may be also used to value the Fund's assets and liabilities, i.e. prices provided by a broker-dealer or other market

participant who has not committed to trade at that price. Although indicative quotes are typically received from established market participants, the Fund may not have the transparency to view the underlying inputs which support the market quotations. Significant changes in an indicative quote would generally result in significant changes in the fair value of the security.

Certain fixed income securities are valued by obtaining a monthly indicative quote from a broker-dealer, adjusted for fluctuations in criteria such as credit spreads and interest rates.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The suitability of the techniques and sources employed to determine fair valuation are regularly monitored and subject to change.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) February 28, 2019

Note 4 – Federal Income Tax Information

The Fund intends to comply with the provisions of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and will distribute substantially all taxable net investment income and capital gains sufficient to relieve the Fund from all, or substantially all, federal income, excise and state income taxes. Therefore, no provision for federal or state income tax is required.

Tax positions taken or expected to be taken in the course of preparing the Fund's tax returns are evaluated to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Management has analyzed the Fund's tax positions taken, or to be taken, on federal income tax returns for all open tax years, and has concluded that no provision for income tax is required in the Fund's financial statements. The Fund's federal tax returns are subject to examination by the Internal Revenue Service for a period of three years after they are filed.

At February 28, 2019, the cost of securities for Federal income tax purposes, the aggregate gross unrealized appreciation for all securities for which there was an excess of value over tax cost, and the aggregate gross unrealized depreciation for all securities for which there was an excess of tax cost over value were as follows:

Tax Cost	Tax Unrealized Appreciation	Tax Unrealized Depreciation	Net Unrealized Depreciation
\$655,972,293	\$13,692,484	\$(30,327,183)	\$(16,634,699)

Note 5 – Unfunded Loan Commitments

Pursuant to the terms of certain loan agreements, the Fund held unfunded loan commitments as of February 28, 2019. The Fund is obligated to fund these loan commitments at the borrower's discretion.

The unfunded loan commitments as of February 28, 2019, were as follows:

Borrower	Maturity Date	Face Amount*	Value
Acosta, Inc.	09/26/19	486,914	\$243,083
Alexander Mann	08/09/24	GBP 1,250,000	210,395

		\$27,223,581	\$20,666,268

¹ Variable rate security. Rate indicated is the rate effective at February 28, 2019. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are

shown, the effective rate is based on a weighted average.

2 Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

3 Security is in default of interest and/or principal obligations.

All or a portion of these securities have been physically segregated in connection with borrowings, reverse

4 repurchase agreements and unfunded loan commitments. As of February 28, 2019, the total value of restricted and segregated securities was \$6,973,442.

5 Payment-in-kind security.

Other Information (Unaudited)

Sector Classification

Information in the “Schedule of Investments” is categorized by sectors using sector-level classifications used by Bloomberg Industry Classification System, a widely recognized industry classification system provider. In the Fund’s registration statement, the Fund has investment policies relating to concentration in specific industries. For purposes of these investment policies, the Fund usually classifies industries based on industry-level classifications used by widely recognized industry classification system providers such as Bloomberg Industry Classification System, Global Industry Classification Standards and Barclays Global Classification Scheme.

Item 2. Controls and Procedures.

(a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) as of a date within 90 days of the filing date of this report and have concluded, based on such evaluation, that the registrant's disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the registrant in this Form N-Q was recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There was no change in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the registrant's last fiscal quarter that has materially affected or is reasonably likely to materially affect the registrant's internal control over financial reporting.

Item 3. Exhibits.

A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended (17 CFR 270.30a-2(a)), is attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
