### EEX CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

- The accompanying unaudited consolidated financial statements present the financial position, results of operations and cash flows of EEX Corporation and its subsidiaries ("EEX" or the "Company"). These consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission governing interim financial disclosures. These consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) that, in the opinion of management, are necessary to fairly present the Company's financial position as of June 30, 2002 and December 31, 2001, and the results of operations and cash flows for the six months ended June 30, 2002 and 2001. Operating results for the six months ended June 30, 2002 are not necessarily indicative of the results that may be expected for the year ending December 31, 2002.

Up to the end of 2001, EEX reported its business operations in four segments: Onshore, Deepwater Operations, Deepwater FPS and Pipelines and International. See Note 23 to the Consolidated Financial Statements in Item 8 of EEX's Annual Report on Form 10-K and Note 9, below. In the fourth quarter of 2001, the Company began marketing all of its Indonesian assets. As a result, the results of operations of the Indonesian subsidiaries (International segment) are presented as a discontinued operation in accordance with Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144"). The historical financial statements have been restated to give effect to this treatment. During the second quarter of 2002, the Company closed the sale of all of the shares of a subsidiary that owns a 25% interest in the Tuban Concession to PT Medco Energi Internasional. The sale of the other Indonesian subsidiary has not closed.

## Edgar Filing: EEX CORP - Form 10-Q

These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

2. The Company's consolidated financial statements have been presented on the basis that it is a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The Company has incurred recurring net losses and there are uncertainties relating to the Company's ability to meet future expenditures and cash flow requirements. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of these uncertainties.
3. On May 28, 2002, EEX Operating, L.P. ("EEX Operating") and EEX entered into a new revolving credit facility with a group of banks. The maximum credit amount under the new credit agreement is \$240 million, with a \$10 million sublimit for letters of credit, and an additional \$10 million available only for letters of credit to support surety bond obligations of EEX. As of June 30, 2002, the outstanding balance is \$221 million and is classified as a current liability on the balance sheet. The new credit agreement matures March 31, 2003, unless earlier terminated upon the occurrence of certain specified events. The interest rate for (i) base rate loans is the higher of the federal funds rate plus 1/2 of 1% or the Administrative Agent's prime rate plus 2.75% and (ii) Eurodollar loans, is LIBOR plus 4.0%. The interest rates increase 0.5% per quarter beginning June 30, 2002. Loans are guaranteed by all of EEX's domestic subsidiaries other than EEX Reserves Funding LLC and its subsidiaries and secured by security interests in the equity and ownership interests of EEX's domestic subsidiaries (other than the subsidiaries of EEX Reserves Funding LLC); other material tangible and intangible assets of EEX Operating, EEX and its subsidiaries; and mortgages on substantially all of the oil and gas properties of EEX Operating and EEX.

Covenants of the new credit agreement limit additional borrowings, repayment of existing debt, capital expenditures, dividends, distributions and redemptions, investments, loans and advances, liens, gas imbalances, take-or-pay obligations, mergers, property transfers and the sale of oil and gas properties; restrict the restructuring of the gas sales obligation and hedging agreements; and include other customary negative covenants. EEX may not use borrowed funds to pay the scheduled principal and interest payment due January 2, 2003 on the secured notes. The new credit agreement requires, on a quarterly basis, that: (i) EEX's ratio of total debt (as defined) to EBITDAX (as defined) for the four most recent quarters may not be greater than 4.0 to 1.0; (ii) commencing April 1, 2002, EEX's ratio of EBITDAX to fixed charges (as defined) may not be less than 1.0 to 1.0; and (iii) EEX's proved oil and natural gas reserves must be at least 375 billion cubic feet equivalent, and the present value, using the lenders' price deck and discount rate (currently 9%), of EEX's proved developed producing reserves must be at least 70% of the present value of EEX's total proved reserves.

## Edgar Filing: EEX CORP - Form 10-Q

4. On January 1, 2002, the Company adopted SFAS No. 144. Consequently, the Indonesian operations are held for sale and presented as discontinued operations. The assets and liabilities specifically related to this segment are classified as held for sale in the accompanying consolidated balance sheets, which include working capital and fixed assets. These assets have been recorded at their estimated fair market values and the effect of any adjustments have been reflected in the net income from discontinued operations.

In the fourth quarter of 2001, the Company began marketing all of its Indonesian assets. In March 2002, the Company negotiated and signed two stock purchase agreements subject to certain conditions to closing. On April 26, 2002, the Company closed the sale of all of the shares of a subsidiary that owns a 25% interest in the Tuban Concession, onshore Java, to PT Medco Energi Internasional and received approximately \$26 million. The sale of this subsidiary was recorded during the second quarter 2002.

The sale of the other Indonesian subsidiary that owns a 15% interest in the Asahan Concession, offshore Sumatra, has not closed. An impairment of approximately \$0.5 million was recorded in the second quarter of 2002 to reflect the impact of a disputed drilling cost overrun.

Refer to Note 9 - Segment Information - International segment for results of operations for the quarter ended and the six months ended June 30, 2002 compared to June 30, 2001.

5. The preferred stock has a stated value of \$100 and a current dividend rate of 8% per year, payable quarterly. The 8% dividend rate will be adjusted to a market rate, not to exceed 18%, in January 2006 or upon the earlier occurrence of certain events, including a change of control. Prior to any such adjustment of the dividend rate, EEX may, at its option, accrue dividends or pay them in cash, shares of preferred stock or shares of common stock. After any adjustment of the dividend rate, dividends must be paid in cash.

The following table shows the dividends in-kind paid on, and the liquidation preference of, the preferred stock as of the dates shown:

Date	Amount of Dividends (In millions)	Number of Preferred Shares Issued	Liquidation Preference (In millions)
June 30, 2002	\$3.9	38,749	\$197.6
March 31, 2002	\$3.8	37,990	\$193.7

6. Payments under the gas sales obligation are amortized using the interest method through final pay out using an interest rate of 9.5%. Payments related to this obligation made during the second quarter of 2002 were \$6 million, and during the first quarter of 2002, \$7 million.
7. The Statement of Cash Flows for the six months ended June 30, 2002 reflects \$3 million related to the early settlement of several hedges as a non-cash transaction. This amount was reclassified from other comprehensive income and recognized as revenues to match the underlying sales transaction being hedged. In addition, the Statement of Cash Flows also reflects the net change in the fair value of derivative financial instruments which results in a non-cash decrease of \$34 million to shareholders' equity.

## Edgar Filing: EEX CORP - Form 10-Q

8. EEX is involved in a number of legal and administrative proceedings incident to the ordinary course of its business. In the opinion of management, based on the advice of counsel and current assessment, any liability to EEX relative to these ordinary course proceedings will not have a material adverse effect on EEX's operations or financial condition.

The operations and financial position of EEX continue to be affected from time to time in varying degrees by domestic and foreign political developments as well as legislation and regulations pertaining to restrictions on oil and gas production, imports and exports, natural gas regulation, tax increases, environmental regulations and cancellation of contract rights. Both the likelihood and overall effect of such occurrences on EEX vary greatly and are not predictable.

EEX has taken and will continue to take into account uncertainties and potential exposures in legal and administrative proceedings in periodically establishing accounting reserves.

6

### EEX CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

9. Segment information has been prepared in accordance with Statement of Financial Accounting Standards No. 131, Disclosures About Segments of an Enterprise and Related Information. EEX has determined that its reportable segments are those that are based on the Company's method of internal reporting. EEX has four reportable segments, which are primarily in the business of natural gas and crude oil exploration and production: Onshore, Deepwater Operations, Deepwater FPS/Pipelines, and International. The accounting policies of the segments are the same as those described in the summary of significant accounting policies (See Note 3 to the Consolidated Financial Statements in Item 8 of EEX's 2001 Annual Report on Form 10-K). EEX's reportable segments are managed separately because of their geographic locations.

In the fourth quarter of 2001, the Company began marketing all of its Indonesian assets. In accordance with SFAS No. 144, the results of operations of the Indonesian subsidiaries (International segment) are presented as a discontinued operation. Historical segment information has been restated to give effect to this treatment. During the second quarter 2002, the Company closed and recorded the sale of all of the shares of the subsidiary that owns a 25% interest in the Tuban Concession. The sale of the other Indonesian subsidiary has not closed.

(a) Includes primarily cogeneration plant operations, general and administrative, gains/loss on hedging and sale of assets.

(b) Includes taxes other than income.

- The Company addresses market risk by selecting instruments whose value fluctuations correlate strongly with the underlying commodity being hedged. The Company enters into swaps, options, collars and other derivative contracts to hedge the price risks associated with a portion of anticipated future oil and gas production. While the use of hedging arrangements limits the downside risk of adverse price movements, it may also limit future gains from favorable movements. Under these agreements, payments are received or made based on the differential between a fixed and a variable product price. These agreements are settled in cash at expiration or exchanged for physical delivery contracts. The Company enters into the majority of its hedging transactions with one counterparty and a netting agreement is in place with that counterparty. The Company does not obtain collateral to support the agreements but monitors the financial viability of counter-parties and believes its credit risk is minimal on these transactions. In the event of nonperformance, the Company would be exposed to price risk. The Company has some risk of accounting loss since the price received for the product at the actual physical delivery point may differ from the prevailing price at the delivery point required for settlement of the hedging transaction.

The net gain related to financial hedging activities that was reclassified to revenues to match the underlying sales transaction being hedged was approximately \$1 million for the quarter ended June 30, 2002, compared to a loss of \$2 million for the same period of 2001.

EEX CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

At June 30, 2002, EEX had outstanding natural gas swaps that were entered into as hedges extending through December 31, 2003, to exchange payments on 29,290 billion British Thermal Units of natural gas. At June 30, 2002, the weighted average strike price and market price per million British Thermal Units ("MMBtu") of natural gas were \$3.47 and \$3.73, respectively. At June 30, 2002, the Company estimated, using a NYMEX price strip as of that date, that the fair market value represented a net current liability of approximately \$2.8 million, a net noncurrent liability of \$3.7 million and accumulated other comprehensive loss of approximately \$6.5 million. The Company realized no hedge ineffectiveness in the second quarter of 2002.

At June 30, 2002, EEX had outstanding natural gas collars that were entered into as hedges extending through October 2002 to exchange payments on approximately 1 Bcf of natural gas. At June 30, 2002, the weighted average floor and ceiling strike prices and the market price per MMBtu of natural gas were \$2.40, \$2.73 and \$3.30, respectively. At June 30, 2002, the Company estimated, using a NYMEX price strip as of that date, that the fair market value represented a net current liability of approximately \$0.4 million and accumulated other comprehensive loss of approximately \$0.4 million. The Company recognized no hedge ineffectiveness in the second quarter of 2002.

The Company may from time to time settle early derivative transactions. Gains or losses are included in accumulated other comprehensive income until they are recognized in revenues to match the underlying sales transaction being hedged. The Company also terminated several financial hedges with Enron North America Corp. in December 2001 due to Enron's bankruptcy filing. During the second quarter of 2002, the Company reclassified approximately \$1.3 million from accumulated other comprehensive income to revenues related to these transactions. As of June 30, 2002, approximately \$2.5 million remains to be reclassified from other comprehensive income to revenues in 2002 and approximately \$3.2 million remains to be reclassified from other comprehensive income to revenues in 2003.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations and all accompanying information should be read in conjunction with the consolidated financial statements, accompanying notes and other financial information included in this Quarterly Report on Form 10-Q and in the Company's most recent Annual Report on Form 10-K for the year ended December 31, 2001.

Certain statements in this report, including statements of EEX and management's expectations, intentions, plans and beliefs, are "forward-looking statements," within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to certain events, risks and uncertainties that may be

## Edgar Filing: EEX CORP - Form 10-Q

outside EEX's control. Actual results and developments could differ materially from those expressed in or implied by such statements due to a number of factors, including, without limitation, those described in the context of such forward-looking statements, the risks, uncertainties and critical accounting policies and estimates described in the Company's Annual Report on Form 10-K for the year ended December 31, 2001, and described from time to time in EEX's other documents and reports filed with the Securities and Exchange Commission. The following discussion should be read in conjunction with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations--Risks, Uncertainties and Critical Accounting Policies and Estimates," in the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

### Newfield Merger

On May 29, 2002, EEX entered into a definitive merger agreement with Newfield Exploration Company ("Newfield"). In the aggregate, the outstanding shares of EEX common stock would be converted into approximately 2.4 million shares of Newfield common stock, or 0.05703 shares of Newfield common stock per share of EEX common stock. EEX's common shareholders will also have the option to elect to receive units in a new trust in lieu of Newfield stock. Approximately 42.5 million trust units will be available. For each unit that an EEX shareholder elects to receive, the number of shares of Newfield common stock that the shareholder would otherwise receive will be reduced by 0.00054 of one share. The trust will own overriding royalty interests in future production from defined intervals generally below 20,000 feet from Gulf of Mexico lease blocks in which EEX owns or may acquire an interest. Those leases are the subject of the Asset Purchase, Farmout and Joint Exploration Agreement effective as of March 1, 2002, with BP Exploration & Production Inc. ("BP") described below.

The holders of EEX's preferred stock, each of whom has signed a voting agreement to vote its shares in favor of the merger, will receive a total of 4.7 million shares of Newfield common stock in the merger.

The merger is subject to the approval of EEX's shareholders, certain regulatory approvals and other conditions.

### Gulf of Mexico Deep Shelf

In May 2002, EEX entered into an Asset Purchase, Farmout and Joint Exploration Agreement effective as of March 1, 2002, with BP. BP acquired 75% of EEX's current interest in 22 outer continental shelf ("OCS") leases. As part of this agreement, BP will conduct further leasing and geophysical activities with a minimum cost of \$4.7 million in an area encompassing 140 OCS blocks. At the end of the initial evaluation period, BP may, at its option, commit to the drilling of up to three wells. The first election must be made on or before June 1, 2003, and the well must be commenced not later than December 31, 2003. BP may elect to drill a second well within 180 days of the completion of the first well and a third well within 120 days of the completion of the second well. EEX will be carried for its 25% interest of the costs of the initial evaluation period and the drilling of the first three exploration wells. There is no production currently associated with the interests that are the subject of the agreement.

In addition to the acquired blocks, EEX and BP were successful bidders on six federal offshore blocks at OCS Lease Sale No. 182 held March 20, 2002, that are included in the agreement. All the blocks have been awarded by the Minerals Management Service.

## Edgar Filing: EEX CORP - Form 10-Q

### Other Gulf of Mexico Activities

The Devil's Island well completed operations on June 12, 2002. The original well bore encountered approximately 100 feet of pay and the updip sidetrack, the second of two sidetracks, encountered approximately 30 feet of pay in a zone separate from that encountered in the original well bore. EEX has a 20% working interest in the Devil's Island project. The Glomar Arctic I rig was demobilized from the Devil's Island well location to a stack location effective June 14, 2002. The rig contract expired on July 3, 2002 and the rig was released. The Devil's Island operator plans further study to determine future operations. EEX is preparing possible development options for consideration by the operator that would combine the Devil's Island discovery and EEX's Jason discovery.

EEX continued its marketing efforts for the Floating Production System ("FPS") and the Pipelines during the second quarter. EEX owns 60% of the FPS and Pipelines; a subsidiary of Exxon Mobil Corp. owns 40%. EEX has received market inquiries for use of the FPS as a drilling rig. EEX is continuing to market the asset for use as a floating production system which use management believes is higher valued than use as a drilling rig. No assurance can be given that EEX will be successful in selling this asset at the higher valued use or that any sale will recover the carrying value of the asset. The value of the Pipelines depends on their use to transport production from the greater Llano area or other areas in proximity to the Pipelines. EEX is now developing a proposal for the Pipelines to transport production from the Jason and Devil's Island discoveries. While EEX currently holds controlling interest in the Jason discovery, the Devil's Island development plan will be decided by the operator. EEX is also awaiting notification from the Llano operator to determine the utility of the Pipelines for Llano field production. There can be no assurance that these efforts will be successful or that the value received from transportation of production from such discoveries would recover the carrying value of the asset. If the Llano owners decide to use other pipelines for the Llano field's development, the potential markets for use of the Pipelines will be narrower. When the proposed merger with Newfield is completed, new management may employ a different strategy to realize value from these assets, which may impact their value.

### RESULTS OF OPERATIONS

EEX Corporation reported a second quarter 2002 net loss of \$8 million, or (\$0.19) per share, compared to a net loss of \$1 million, or (\$0.03) per share for the second quarter of 2001. The Indonesian subsidiaries (the International segment) are reported as a discontinued operation under Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," ("SFAS No. 144"). The financial statements have been restated in accordance with SFAS No. 144 to eliminate the impact of the discontinued Indonesian operations from continuing operations. During the second quarter, the Company closed and recorded the sale of all of the shares of the subsidiary that owns a 25% interest in the Tuban Concession. The sale of the other Indonesian subsidiary that owns a 15% interest in the Asahan Concession has not closed.

A discussion of results of continuing operations for the three and six months ended June 30, 2002, compared to the same period of 2001 follows.

### RESULTS OF CONTINUING OPERATIONS

Quarters Ended June 30, 2002 and 2001

For the second quarter of 2002, EEX reported a loss from continuing operations of \$8 million (\$0.18 per share), versus a net loss of \$7 million (\$0.17 per share) for the same period in 2001.

## Edgar Filing: EEX CORP - Form 10-Q

For the second quarter of 2002, total revenues were \$39 million, 2% higher than the first quarter of 2001. Natural gas revenues for the second quarter of 2002 were 6% higher than the same quarter of 2001. This increase was due to a 2% increase in the average natural gas sales price and a 4% increase in production. Natural gas production for the second quarter of 2002 was 11 billion cubic feet ("Bcf"), slightly higher than the same period of 2001. The average natural gas sales price per thousand cubic feet ("Mcf") was \$3.18 in the second quarter of 2002, compared with \$3.13 in the same period of 2001. The average natural gas sales price for the second quarter 2002 includes hedging gains of \$1 million and 2,645 billion British thermal units ("BBtu") delivered under the gas sales obligation at an average price of \$2.36 per million British thermal units ("MMBtu"). The average natural gas sales price of \$3.13 per Mcf for the second quarter 2001 includes hedging losses of approximately \$2 million and 5,730 BBtu delivered under fixed-price delivery contracts and the gas sales obligation at an average price of \$2.54 per MMBtu. Oil revenues for the second quarter of 2002 decreased 17% from the same quarter of 2001. This decrease was primarily due to a 5% decrease in the average oil sales price and a 13% decrease in production. The average oil price per barrel during the second quarter of 2002 was \$24.65 compared to \$25.85 for the same period of 2001.

11

Costs and expenses for the second quarter of 2002 were \$36 million, compared with \$34 million in the same period of 2001. Operating expenses (production and operating, general, administrative and other, and taxes other than income) were \$14 million in the current quarter, 13% higher than the second quarter of 2001. This increase was primarily due to increased general, administrative and other primarily due to approximately \$1 million of fees incurred in the second quarter of 2002 related to the Company's planned merger and exploration of strategic alternatives. Exploration expenses for the second quarter of 2002 were \$9 million, compared to \$8 million for the same period of 2001. The second quarter of 2002 includes approximately \$3 million in costs associated with stacking of the Arctic I rig compared to \$0.6 million for the same period of 2001. "Stacking" means maintaining the rig inactive, in this case, at an offshore location. Depletion, depreciation and amortization for the second quarter of 2002 was \$12 million, unchanged from the same period of 2001.

Total interest and other financing costs for the second quarter of 2002, including interest income, preferred stock dividends and other income, were \$10 million, a \$1 million decrease from the same period of 2001. This decrease is primarily due to lower interest expense related to the debt associated with the FPS and Pipelines and the gas sales obligation offset by higher interest expense associated with increased borrowings under the revolving credit agreement.

### Six Months Ended June 30, 2002 and 2001

For the six months ended June 30, 2002, total revenues were \$79 million, 5% lower than total revenues for the six months ended June 30, 2001. Natural gas revenues for the first six months of 2002 were 2% lower than the first six months of 2001. This decrease was due to a 6% decrease in average natural gas sales prices offset by a 5% increase in production. The average natural gas sales price per Mcf was \$3.30 for the first six months of 2002, compared with \$3.50 in the same period of 2001. The average natural gas sales price of \$3.30 per Mcf for the first six months of 2002 includes hedging gains of \$12 million and 5,456 BBtu delivered under the gas sales obligation at an average price of \$2.47 per MMBtu. The average natural gas sales price of \$3.50 per Mcf for the first six months of 2001 includes hedging losses of approximately \$10 million and 10,847 BBtu delivered under fixed-price delivery contracts and the gas sales obligation at an average price of \$2.67 per MMBtu. Natural gas production for

## Edgar Filing: EEX CORP - Form 10-Q

the first six months of 2002 was 22 Bcf, compared with 21 Bcf in the same period of 2001. Oil revenues decreased 27% primarily due to a 19% decline in average oil sales prices for the six months ended June 30, 2002. The average oil price during the first six months of 2002 decreased to \$21.70 from \$26.80, a decrease of 19%.

Costs and expenses for the first six months of 2002 were \$67 million, compared with \$81 million for the same period of 2001. Operating expenses (production and operating, general and administrative and taxes other than income) remained flat from period to period. General, administrative and other costs and production and operating costs were higher, offset by lower taxes, other than income. General, administrative and other costs were higher primarily due to fees related to the Company's planned merger and exploration of strategic alternatives. Taxes, other than income were lower for the six months ended June 30, 2002 primarily due to lower average natural gas sales prices. Exploration expenses for the first six months of 2002 were \$15 million, compared to \$28 million for the same period of 2001. Exploration expense for the first six months of 2002 includes approximately \$3 million in costs associated with the stacking of the Arctic I rig compared to \$14 million in costs associated with the stacking of the Arctic I rig and recognition of the net cost associated with the assignment of the Arctic I contract through May 2001 included in the first six months of 2001. Depletion, depreciation and amortization for the first six months of 2002 was \$24 million, \$1 million higher than the same period of 2001.

Total interest and other financing costs for the first six months of 2002, including interest income, preferred stock dividends and other income, were \$20 million, a \$3 million decrease from the same period of 2001. This decrease is primarily due to lower interest expense related to the debt associated with the FPS and Pipelines and the gas sales obligation offset by higher interest expense associated with increased borrowings under the revolving credit agreement.

12

- (d) One million barrels of crude oil or other liquid hydrocarbons.

### RESULTS OF DISCONTINUED OPERATIONS

During the second quarter of 2002, EEX closed and recorded the sale of all of the shares of the subsidiary that owns a 25% interest in the Tuban Concession. The sale of the other Indonesian subsidiary that owns a 15% interest in the Asahan Concession has not closed.

For the six months ended June 30, 2002, EEX reported net income from discontinued Indonesian operations (International segment), net of tax, of approximately \$3 million, \$0.06 per share, versus net income of approximately \$11 million, \$0.26 per share, for the same period of 2001.

For the six months ended June 30, 2002, oil revenues were \$10 million, 63% lower than oil revenues in the same period of 2001 primarily due to recording revenues for only the first quarter of 2002 due to the sale of the Mudi Field. The average oil price per barrel during the first six months of 2002 was \$20.57 compared to \$26.03 for the same period of 2001, a decrease of approximately 21%. Oil production for the first six months of 2002 decreased 53% compared to the same period in 2001. In accordance with SFAS No. 144, an impairment of approximately \$4 million, net of tax, was recorded in the first quarter of 2002, which represented the Company's estimate at that time of the difference between the book value and the fair value of the assets held for sale. In accordance with SFAS No. 144, depletion was suspended in the first quarter of 2002. Depletion for the first six months of 2001 was approximately \$10 million.

Net cash flows provided by discontinued operations were \$27 million for the six months ended June 30, 2002, compared to net cash flows provided by discontinued operations of \$16 million for the same period 2001. The 2002 cash flow is primarily due to the proceeds received from the sale of all of the shares of the subsidiary that owns a 25% interest in the Tuban Concession during the second quarter of 2002. The 2001 cash flow is primarily attributable to operations.

13

### LIQUIDITY AND CAPITAL RESOURCES

#### Cash and Cash Equivalents and Cash Flows from Continuing Operations

The following summary table reflects the Company's cash flows from continuing operations (in millions):

Six Months Ended  
June 30  
-----

## Edgar Filing: EEX CORP - Form 10-Q

	2002	2001
	-----	-----
Net cash provided by operating activities	\$ 15	\$ 3
Net cash (used in) investing activities	(32)	(92)
Net cash (used in) provided by financing activities	(130)	56

As of June 30, 2002, the cash and cash equivalents balance was approximately \$17 million.

Net cash flows provided by operating activities from continuing operations for the six months ended June 30, 2002 were approximately \$15 million, an increase of approximately \$13 million over the same period of 2001. This increase was primarily due to full utilization of the Arctic I rig through mid June 2002.

Net cash flows used in investing activities for continuing operations for the six months ended June 30, 2002 were approximately \$32 million, a \$61 million decrease from cash flows used in investing activities for the same period of 2001. The decrease in investing activities is primarily due to lower capital expenditures and proceeds received from dispositions of property, plant and equipment in 2002. The Encogen obligation was completed in the first half of 2001 and onshore spending was reduced in 2002 due to capital constraints offset by capital spent on the Devil's Island well. In addition, the Company received \$11 million from the sale of a part of the production payment associated with the Encogen obligation.

Net cash flows used in financing activities for continuing operations for the six months ended June 30, 2002 were approximately \$130 million, compared to net cash flows provided by financing activities of \$56 million for the same period of 2001. During the second quarter of 2002, the Company entered into a new credit facility and paid down the old facility resulting in a net repayment of approximately \$104 million. During the second quarter of 2001, the Company borrowed \$132 million.

### Financing Activities

Effective May 28, 2002, EEX Operating, L.P. ("EEX Operating"), as Borrower and an Obligor and EEX, as an additional Obligor, entered into a new revolving credit facility with a group of banks and JPMorgan Chase Bank, as Administrative Agent. A copy of the new credit agreement and related documents were filed as exhibits to EEX's Current Report on Form 8-K filed on June 6, 2002. Unless indicated otherwise, capitalized terms used in this section are defined in the new credit agreement.

Maximum credit amount: \$240 million, with a \$10 million sublimit for letters of credit, and an additional \$10 million available only for letters of credit to support surety bond obligations of EEX.

Maturity: March 31, 2003, unless earlier terminated upon the occurrence of certain specified events.

Interest rate: (i) For Base Rate Loans, the higher of Federal Funds Rate plus 1/2 of 1% or Administrative Agent's prime rate plus 2.75% and (ii) for Eurodollar Loans, the Eurodollar Rate plus 4.0%, each rate increasing 0.5% per quarter beginning June 30, 2002.

Fees: A loan restructuring fee of \$2,500,000 and an arrangement fee of \$750,000 are payable by September 30, 2002; provided, that in the event that EEX has received all governmental approvals for its proposed

## Edgar Filing: EEX CORP - Form 10-Q

merger and has distributed all proxy and related voting materials to its shareholders by such date, then payment of the fees shall be delayed until November 30, 2002; and provided further, that if the merger has been consummated by November 30, 2002, then EEX Operating shall have no obligation to pay the fees.

### Guaranties:

Loans are guaranteed by all of EEX's domestic subsidiaries other than EEX Reserves Funding LLC and its subsidiaries.

14

### Security:

Security interests in the equity and ownership interests of EEX's domestic subsidiaries (other than the subsidiaries of EEX Reserves Funding LLC); other material tangible and intangible assets of EEX Operating, EEX and its subsidiaries; and mortgages on substantially all of the oil and gas properties of EEX Operating and EEX. EEX and EEX Operating are required to maintain liens on oil and gas properties of not less than 100% of the total value of their oil and gas properties and 100% of the proved and probable reserves (other than \$500,000 of properties outside of Texas and Louisiana).

### Mandatory Prepayment:

The proceeds from sales of assets and equity offerings must be used to prepay loans outstanding; mandatory prepayments reduce the maximum credit amount.

### Negative Covenants:

Limits on additional borrowings, repayment of existing debt, capital expenditures, dividends, distributions and redemptions, investments, loans and advances, liens, gas imbalances, take-or-pay obligations, other prepayments, mergers, property transfers and the sale of oil and gas properties and hedging agreements; restrictions on the restructuring of the gas sales obligation with Bob West Treasure L.L.C., an Enron affiliate; and other customary negative covenants. EEX may not use borrowed funds to pay the scheduled principal and interest payment due January 2, 2003 on its Secured Notes.

### Financial Covenants:

The ratio of Total Debt to EBITDAX for the four most recent quarters may not be greater than 4.0 to 1.0.

Commencing April 1, 2002, the ratio of EBITDAX to Fixed Charges may not be less than 1.0 to 1.0.

EEX is required to maintain at least 375 Bcfe of proved oil and natural gas reserves. The present value, using JPMorgan's price deck and discount rate (currently 9%), of EEX's proved developed producing reserves must be at least 70% of the present value of EEX's total proved reserves.

## Edgar Filing: EEX CORP - Form 10-Q

Events of Default: Nonpayment of principal when due; nonpayment of interest, fees or other amounts after an agreed upon grace period; material inaccuracy of representations and warranties; violation of covenants; cross-default; bankruptcy events; material judgments; change in control; and other defaults customary for oil and gas industry borrowers.

EEX Operating borrowed \$225 million under the new credit agreement upon execution and advanced that amount to EEX, and EEX used that amount, together with \$100 million in cash it had on hand, to repay and terminate its existing revolving credit agreement. On July 31, 2002, the outstanding amount under the new credit agreement was \$223 million and the available credit was \$17 million. As of June 30, 2002, EEX met the required financial covenant ratios of the Total Debt to EBITDAX and EBITDAX to Fixed Charges. Based upon preliminary information, EEX expects to meet the requirement to maintain at least 375 Bcfe of proved reserves with at least 70% of the present value attributed to proved developed producing.

There can be no assurances that EEX will be able to meet the financial covenants of the new credit agreement as of the end of the third fiscal quarter, and, if it does not, it will be in default. There can be no assurances that EEX will be able to cure such default, or any other covenant default that may occur.

### Future Capital Requirements

Capital expenditures from continuing operations for the six months ended June 30, 2002 were approximately \$35 million, compared to approximately \$96 million for the six months ended June 30, 2001. This decrease in capital spending during the first half of 2002 is primarily due to the completion of the Encogen obligation in the same period of 2001 and reduced onshore spending due to capital constraints offset by capital spent on the Devil's Island Well. Capital expenditures for the remainder of 2002 are expected to be approximately \$20 million. Substantially all of these capital expenditures will be made on drilling development wells on the Onshore segment.

### Sources of Capital and Liquidity

During April 2002, the Company received approximately \$26 million from the sale of the shares of a subsidiary that owns a 25% interest in the Tuban Concession. During the remainder of the year, EEX's sources of liquidity will be operating cash flows from EEX Operating and borrowings under the new credit agreement. The operating cash flows from EEX E&P Company, L.P. will not be available to EEX because of restrictions in the agreement related to the gas sales obligation. EEX estimates, based upon its current budget forecast, that it will have drawn all of its available credit under the new credit agreement at or before December 31, 2002. EEX has no current source of funds to make the approximately \$15 million payment on its Secured Notes due January 2, 2003.

EEX is not currently pursuing additional sources of financing because of the pending merger and merger agreement with Newfield. If the merger does not take place, there can be no assurances that EEX will be able to obtain additional financing before it uses all of its available credit under the new credit agreement. EEX will also require additional financing to make the January 2, 2003 payment on the Secured Notes if the merger does not take place.

## Edgar Filing: EEX CORP - Form 10-Q

No assurances can be given that EEX will be successful in completing the merger with Newfield or an acceptable financing plan should the merger not occur. In the event of default under the new credit agreement, EEX's lenders may attempt to enforce their security interest in EEX's oil and gas properties and other assets. EEX may then have to seek protection from its creditors and reorganization under Federal bankruptcy laws.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

Hedging activity for the six months ended June 30, 2002 resulted in a gain of approximately \$12 million for natural gas. The table below provides information about EEX's hedging instruments as of June 30, 2002. The Notional Amount is equal to the volumetric hedge position of EEX during the periods. The fair values of the hedging instruments, which have been recorded in other comprehensive income, are based on the difference between the applicable strike price and the New York Mercantile Exchange future prices for the applicable trading months.

	Notional Amount (BBtu) (1)	Average Strike Price (Per MMBtu) (2)	
	-----	-----	
		Floor	Ceiling

## Edgar Filing: EEX CORP - Form 10-Q

### Item 1. Legal Proceedings

EEX is involved in a number of legal and administrative proceedings incident to the ordinary course of its business. In the opinion of management, based on the advice of EEX's General Counsel, Richard L. Edmonson, individual litigation counsel, and current assessments, any liability to EEX relative to these ordinary course proceedings will not have a material adverse effect on EEX's operations or financial condition.

The operations and financial position of EEX continue to be affected from time to time in varying degrees by domestic and foreign political developments as well as legislation and regulations pertaining to restrictions on oil and gas production, imports and exports, natural gas regulation, tax increases, environmental regulations and cancellation of contract rights. Both the likelihood and overall effect of such occurrences on EEX vary greatly and are not predictable.

EEX has taken and will continue to take into account uncertainties and potential exposures in legal and administrative proceedings in periodically establishing accounting reserves.

### Item 2. Changes in Securities and Use of Proceeds

- (a) On May 29, 2002, EEX amended its Rights Agreement by the Third Amendment to Rights Agreement. The amendment provides that the execution of the merger agreement with Newfield and of certain voting agreements entered into in connection with the merger agreement, the performance of the merger agreement and consummation of the transactions contemplated in the merger agreement and voting agreements (see Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operation - Newfield Merger," above) will not be considered events that trigger the distribution of Rights under the Rights Agreement. A copy of the Third Amendment to Rights Agreement is an exhibit to EEX's Current Report on Form 8-K, filed June 6, 2002 with the Securities and Exchange Commission.

### Item 4. Submission of Matters to a Vote of Security Holders

At the annual meeting of shareholders held on May 30, 2002, the shareholders elected two directors for terms expiring at the annual meeting in 2005, and ratified the appointment of Ernst & Young LLP as Independent Auditors for fiscal year 2002. In addition to the two directors elected at the meeting, Thomas M. Hamilton, B. A. Bridgewater, Frederick M. Lowther, and M. P. Mallardi continued their respective terms of office after the meeting. Below is the result of the vote.

#### Election of Directors:

Name	Votes for	Withheld	Abstentions and Broker Non-Votes
