PRESS RELEASE 3Q02

PERFORMANCE OF COMPANHIA VALE DO RIO DOCE IN THE THIRD QUARTER OF 2002

THE FINANCIAL AND OPERATIONAL INFORMATION CONTAINED IN THIS PRESS RELEASE, EXCEPT OTHERWISE INDICATED, REFERS TO THE PARENT COMPANY AND WAS CALCULATED IN ACCORDANCE WITH GENERALLY ACCEPTED BRAZILIAN ACCOUNTING PRINCIPLES (BRAZILIAN GAAP). FROM THE FIRST QUARTER OF 2003, THE COMPANY WILL BE PUBLISHING QUARTERLY CONSOLIDATED FINANCIAL STATEMENTS IN BRAZILIAN GAAP.

Rio de Janeiro, November 13, 2002 - Companhia Vale do Rio Doce (CVRD) has reported accumulated net earnings of R\$ 502 million in the first nine months of the year, compared to R\$ 2.412 billion in the same period a year earlier. In the third quarter of 2002 (3Q02), CVRD reported a loss of R\$ 216 million, corresponding to R\$ 0.56 per share.

The depreciation of the Real against the US dollar (USD) was the main factor behind this quarterly result, once the negative monetary variation from exchange rate losses totalled R\$ 2.122 billion and were not compensated for by an improvement in the Company's operating results.

The rate of exchange on the last day of 3Q02, used for the calculation of monetary variation, was R\$ 3.8949 per USD, a difference of 36.9% relative to the rate recorded on the last day of 2Q02, of R\$ 2.8444 per USD. The average daily

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

exchange rate in 3Q02, which impacts CVRD's cash flow and operating result, was R\$ 3,1227 per USD, a difference of 25% compared to the previous quarter, of R\$ 2,4408 per USD.

CVRD's cash flow is positively correlated to the appreciation in the USD against the Real, due to the asymmetry between revenues and expenses in regard to currency composition. For example, in 3Q02 about 81% of the Company's gross revenues were US dollar-linked while 85% of the cost of goods sold (COGS) was denominated in Reais.

The Board of Directors of CVRD has approved the payment of interest on shareholders equity of R\$ 2.68 per share, totalling R\$ 1.029 billion, which will be paid out from December 10th, 2002. Therefore, in this year CVRD will have distributed to its shareholders R\$ 4.985 per share, totalling R\$ 1.915 billion, taking into account the amount of R\$ 2.305 per share paid from April 30th, 2002. The average dividend yield in USD of CVRD's shares in the period 1997/2001 was 6.5%, 120 basis point higher than the average yield of the 10-year US Treasury Bond. 2002 dividend yield is estimated to be approximately the same number.

1

2

Companhia
Vale do Rio Doce

BR GAAP 3Q02

BR GAAP 3Q02

Gross operating revenues in 3Q02 amounted to R\$ 2.340 billion, up by 27% qoq, while gross margin was 54.5%. Revenues for the first nine months of the year amounted to R\$ 5.784 billion, 20.3% higher than the same period in 2001.

Cash generation as measured by EBITDA (earnings before interest, tax, depreciation and amortization) amounted to R\$ 1.205 billion in 3Q02, 22.2% higher than in 3Q01 and 39.5% higher than the previous quarter. EBITDA margin, in other words, the ratio between EBITDA and net revenues, came to 53.3% in 3Q02. This percentage is the highest in 2002 and higher than the average of 49.0% for the 19 quarters between 1Q98 and 3Q02.

The volume shipped of iron ore and pellets, of 36.925 million tons, is a new quarterly record beating the previous record achieved in 2Q02 by 595,000 tons. Total volume for the first nine months of the year amounted to 106.918 million tons, compared to 96.133 million tons in the same period of the previous year.

By the same token, general cargo transportation (cargo other than iron ore and pellets) set another new record, with CVRD railroads (Carajas and Vitoria a Minas) handling 3.89 billion net ton kilometres (ntk). This performance began to reflect focus on maximising the use of transportation assets, which is being achieved through the offering of new services, such as scheduled trains, the exploitation of intermodal connections and greater integration between CVRD's own assets.

Capital expenditures by the Parent Company totalled US\$ 155.5 million in 3Q02 and US\$ 528.6 million in the first nine months of the year.

CVRD's gross consolidated revenue, calculated according to Brazilian GAAP, amounted to R\$ 10.756 billion in the period January to September 2002, equivalent to US\$ 4.015 billion. CVRD's consolidated exports totalled US\$ 2.304 billion, representing 5.3% of Brazil's entire export revenue in this period. CVRD's net exports (exports less imports) amounted to US\$ 2.139 billion,

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

therefore making an important contribution to Brazil's current trade surplus of US\$ 7.856 billion in the first nine month of 2002. The Company's investment program in new mining and metals projects and the expansion of existing projects, allows the Company to look forward to growth in exports over the next few years.

Revenue generated by foreign-based subsidiaries and affiliates amounted to US\$ 741 million, accounting for 18.5% of consolidated gross revenues.

RELEVANT EVENTS

CORPORATE GOVERNANCE

Continuing the implementation of the Corporate Governance model announced in October 2001, which is based on the principles of transparency in the decision-making process and the definition of clear roles and responsibilities, CVRD has been developing new initiatives designed to improve corporate governance practices. These efforts seek to emphasize the transparency of information and the protection of investors' rights.

At the end of July 2002, the Company announced its DISCLOSURE POLICY, in accordance with the best investor relations practices, with the main aim of presenting a global and simultaneous spread of information to capital markets and minimising the risk of an information imbalance.

Today, the Company is releasing three important documents.

1. DIVIDEND POLICY, which has two basic objectives: (a) increase predictability in the distribution of dividends and/or interest on shareholders equity; (b) increase the correlation between the remuneration to shareholders and free cash flow performance, linking this policy more closely to the Company's financial management. The reduction in uncertainty is to be achieved by the announcement, until January 31 of each year, of a minimum amount per share, denominated in USD, to be paid to shareholders in April and October. Thus the distribution periodicity will be known and

3

Companhia
Vale do Rio Doce

BR GAAP 3Q02

the exchange rate risk for investors not resident in Brazil will be eliminated, an innovative and a pioneering move by CVRD in shareholder remuneration policy in Latin America.

2. SECURITIES TRADING POLICY, which specifies the occasions when, and the mechanisms through which the Company's executives can trade securities issued by CVRD and its subsidiaries, seeking to minimize the possible use of privileged information for personal benefit.
3. CODE OF ETHICS AND STANDARDS OF PROFESSIONAL CONDUCT FOR MEMBERS OF THE FINANCIAL AREA, which defines a code of conduct of the highest ethical standards for the professionals in this area of the Company, who in their business activities deal with privileged information and large sized financial transactions.

RISK MANAGEMENT

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

The Board of directors of CVRD approved prudential rules for financial investments (cash management) and commercial risk management criteria.

DIVESTITURES

The sale of the assets of Florestas Rio Doce was completed for R\$ 195.3 million, resulting in a capital gain of R\$ 111 million. This transaction concludes the divestiture of CVRD's pulp and paper assets, as determined by its strategic directives. The forestry assets of Celmar are likely to be used in projects linked to the mining and metals businesses, which are currently under analysis.

SHAREHOLDERS DEBENTURES

On October 4, 2002 the CVM (the Brazilian Securities Commission) authorised the registry with the SND - Sistema Nacional de Debentures (the National Debenture System), of Shareholders Debentures that were issued by CVRD at the time of its privatization in 1997 as a way of guaranteeing to all its shareholders prior to privatization, including the Brazilian government, the right to participate in the net revenues derived from the exploration of specific mineral deposits of the Company and some of its subsidiaries. From October 28th, 2002, the trading of these notes was authorised by the SND. More detailed information on these debentures can be found on CVRD's website (www.cvr.com.br), Investor Relations section under Shareholders Information, Debentures.

PUBLIC OFFERING FOR THE PURCHASE OF SHARES IN COMPANHIA PAULISTA DE FERRO LIGAS

On November 26, 2002 at 1.30 p.m. on Bovespa - Sao Paulo Stock Exchange, an auction will be held to repurchase shares of Companhia Paulista de Ferro Ligas, a ferro-alloys company controlled by CVRD. The purpose of this transaction is to acquire the remaining 6% of the capital still owned by minority shareholders, and subsequently delist the company. The price of the offer is R\$ 15.80 per share, corrected by the variation in the TR index (reference rate) calculated pro rata die, from September 2nd, 2002 to the date of settlement of the auction held on Bovespa. The price set incorporates a 45.5% premium to the average trading price of the shares over the thirty trading days prior to the price being set and a premium of 7.9% over the book value of the shares as at June 30th, 2002.

THE SHORT TERM OUTLOOK

Recent statistics reveal that the global economy is recovering much more slowly than had been expected at the beginning of the year. Probably 2003 will be the third year running of growth below the long term trend in the global economy, which has progressed over the past three decades at an average annual rate of 3.5%. This is due, in large part, to the absence of an engine to lead global economic expansion.

This role was played in the latter half of the nineties by the United States, responsible for 40% of global economic growth in this period. Despite the fact that US GDP grew by 3.1% in 3Q02, the outlook is not good. A substantial part of this expansion in 3Q02 was explained by a rise in vehicle purchases,

4

Companhia
Vale do Rio Doce

BR GAAP 3Q02

stimulated by aggressive incentive policies, and leading indicators of economic

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

activity have been suggesting a slowdown in the growth rate. This situation has led the Federal Reserve Bank to cut the short term interest rate by 50 basis points to 1.25% per year, the lowest rate in nominal terms since 1961.

In the Eurozone, economic growth has been extremely modest and future expectations are pessimistic. Recently, the IMF revised its predictions for GDP growth in the region to 0.75% in 2002 and 2% in 2003. In Japan, the recovery driven by external demand has lost steam. The behaviour of leading indicators suggest that the fragile Japanese recovery has already reached its peak and a return to recession has become increasingly probable.

China appears as an oasis of prosperity in this low expansion environment. Export growth, investment in infrastructure and foreign direct investment are fuelling GDP growth of 8% a year in that country. One of the consequences of the rapid growth in China is its economy's increasing influence on mining and metals markets, such as iron ore, steel, alumina, copper, and aluminum.

Global steel production is rising at growing rates this year. In the first nine months of 2002, steel output was up by 5.1% in relation to the same period in 2001, and September showed an increase of 8.5% on the same month in the previous year.

The current dynamism in the steel market has therefore been not only directly affected by China, whose steel production is expanding at 25% a year, but also indirectly by growth in its imports, which amounted to 17.2 million tons between January and September, and are mainly supplied by Japan.

The International Institute for Steel and Iron (IISI) projects a 4.2% growth in the steel global demand in 2002 and 4.9% in 2003, based mainly in the strong Chinese demand expansion.

At the same time, there was a substantial recovery in the price of steel products, the CRUspi index showing a variation of 35.6% between December 2001 and the end of October this year. Usually, the steel prices recovery cycle takes from 15 to 18 months.

The pace in the seaborne demand for iron ore and pellets has seen an upturn, with an expected increase of 20 million tons for 2002 for a forecast total of 470 million tons. The Company expects a continuation of this strong demand and that the seaborne market will reach 490 million tons in 2003.

Chinese imports in the period January to September rose 23.8% in relation to 2001, rising from 67.1 million tons to 83.1 million tons. It is very probable that the estimate of 110 million tons for 2002 will be met. In the first nine months of the year, CVRD's market share in China was 16%. Japan, the world's largest importer of iron ore, purchased 95.7 million tons in the first nine months of the year, compared to 94.8 million in 2001.

The rise in the cost of maritime freight, also widening the freight spreads for iron ore shipped from Brazil to China, and that shipped from Australia to China, by some US\$ 2.50 per ton, in large part reflected the strong Chinese demand for iron ore. In the iron ore upcycle freight spreads tend to widen, and vice-versa.

The growing sophistication in Chinese steel plants, seeking to mix their domestic ore which has a low iron content and a high level of impurities with high quality ore, is favouring, and should continue to favour CVRD, a high quality ore supplier. The difference in quality represents an important compensating factor in offsetting the competitive disadvantage of geographical distance.

In the case of aluminum, despite the recovery in demand, there has been excessive growth in global supply. This is because various aluminum smelters,

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

which were shut down during the power crisis on the West Coast of the United States, have re-started operations causing a build-up in stock levels and keeping prices relatively low.

Furthermore, the global production capacity of primary aluminium is likely to increase by approximately 2.5 million tons between 2003 and 2005, which will probably prevent any vigorous price recovery, possibly forcing the closure of smelters with a high cost of production. In this context, Albras, one of the lowest cost producers in the world, should continue to obtain good profit margins.

5

Companhia
Vale do Rio Doce

BR GAAP 3Q02

Alumina, CVRD's strategic focus in this segment, is likely to benefit from expected growth in Chinese imports and the expansion in production capacity of primary aluminum by companies who do not have sufficient domestic supplies of this raw material. In January 2003, Alunorte's stage 3 should begin to operate, increasing its annual nominal production capacity to 2.4 million tons. Alunorte nominal production capacity can be expanded up to 6.1 million tons of alumina per year.

SALES VOLUME AND REVENUES

Shipments of iron ore and pellets in 3Q02 reached a record level of 36.925 million tons, surpassing the previous record achieved in 2Q02 of 36.330 million tons. Sales in 3Q02 were up 6.2% qoq. In the nine months ended on September, sales amounted to 106.918 million tons, up 11.2% compared to the same period in 2001.

Sales of iron ore fines were responsible for 77.7% of shipments in 3Q02, lumps accounting for 10.8% and pellets, 11.5%. In a similar vein to that which occurred in 2Q02, pellet sales saw the highest growth, up 5.3% QoQ, compared to growth in iron ore sales of 1.2%. This trend is reflecting the recovery in demand for pellets, influenced by the rise in steel prices.

CVRD purchased 2.749 million tons of pellets for resale to customers from the pellet joint ventures (Nibrasco, Itabrasco, Kobrasco and Hispanobras) compared to 3.049 million in 2Q02. In the first nine months of the year, CVRD purchased 7.568 million tons of pellets from the joint ventures for resale to its clients, very close to the volume purchased in the same period in 2001, 7.553 million tons.

Sales of iron ore to China amounted to 13.6 million tons for the first nine months of 2002 up 18.3% on the same period in 2001. In 2002, China became CVRD's second largest iron ore market, accounting for 13% of the total, being only surpassed by the Brazilian domestic market with a 15% share.

Sales to Europe, which accounted for some 30% of total shipments, have grown considerably in relation to last year, up by 34.4%. This is explained principally by the increase in shipments to Germany and Eastern European countries.

SALES OF IRON ORE AND PELLETS - PARENT COMPANY

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

	1Q 01	2Q 01	3Q 01	4Q 01	1Q 02
Iron Ore and Pellets	30,175	31,189	34,769	33,815	33,663
Iron Ore	26,546	27,038	30,996	29,983	30,379
Fines	23,512	24,226	27,617	26,044	27,016
Lump	3,034	2,812	3,379	3,939	3,363
Pellets	3,629	4,151	3,773	3,832	3,284

Railroad general cargo transportation also reached record levels in 3Q02, with the shipment of 3.89 billion net ton kilometres (ntk). This amount is 6.4% and 16.5% higher than 2Q02 and 3Q01 figures, respectively. In addition to general cargo, the Vitoria a Minas Railroad (EFVM) transported 1.587 million tons of iron ore for third parties, compared to 1.401 million in 2Q02..

GENERAL CARGO RAILROAD TRANSPORTATION

	1Q 01	2Q 01	3Q 01	4Q 01	1Q 02	2Q 02
EF Vitoria a Minas	2,643	2,890	2,844	2,791	2,737	2,844
EF Carajas	356	543	494	423	664	844
TOTAL	2,999	3,433	3,338	3,214	3,401	3,688

CVRD's ports handled 5.83 million tons of general cargo in 3Q02 compared to 6.06 million tons in the previous quarter.

6

Companhia
Vale do Rio Doce

BR GAAP 3Q02

Railroad productivity indicators showed improvement in the quarter. EFVM transported 0.96 million ntk per locomotive in service, per day, compared to 0.95 million in 2Q02, while on the Carajas Railroad (EFC) this index remained constant at 1.91 million ntk. The fleet of waggons was more intensively used for general cargo on both railroad networks. EFVM transported 5,540 ntk per waggon in service per day in 3Q02 compared to 4,810 in 2Q02 and EFC, 16,340 ntk compared to 15,960 in 2Q02.

Gold sales fell sharply due to the closure of the Igarape Bahia mine at the end of the last quarter. CVRD, therefore, shipped only 63.5 troy ounces of gold in 3Q02 compared to 111.9 in 2Q02.

Potash sales were up 16.1% in relation to the previous quarter, totalling 223,000 tons. The Taquari-Vassouras mine is operating at full capacity and all production for the year has already been reserved, the result of the strong growth in production in Brazil's agricultural segment.

SALES OF LOGISTICS SERVICES, GOLD AND POTASH - PARENT COMPANY

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

	1Q 01	2Q 01	3Q 01	4Q 01	1Q 02	2Q 02
Gold (troy ounces)	108,253	114,780	144,295	141,444	115,455	111,444

Ports	9,355	8,571	7,228	6,564	5,517	7,228

Gross operating revenues amounted to R\$ 2.340 billion in 3Q02, of which 81% is denominated in USD. The export market accounted for 62.2% of sales revenues. Overseas, the main markets were Europe, accounting for 25.0% of revenue generated, China 8.5% and Japan 7.8%.

Iron ore accounted for 62% of total revenues, pellets 18%, railroad transportation 10.3% and potash 3.5%.

CVRD has stakes in two hydro-electric plants under operation: Igarapava (38.15%), with installed capacity of 210 MW, and Porto Estrela (33.33%), with installed capacity of 112 MW, both located in the state of Minas Gerais. CVRD's take in Igarapava is dedicated to supply the energy needs of the Southern System, contributing to cost reductions, while the energy produced by Porto Estrela is sold in the market. In the first nine months of 2002, revenues derived from energy sales amounted to R\$ 9 million.

EXCHANGE RATE VOLATILITY GENERATES QUARTERLY LOSS

The effect of the depreciation of the Real against the US dollar on CVRD's net liabilities denominated in foreign currency was the determining factor in causing the loss of R\$ 216 million in 3Q02, as negative monetary variation amounted to R\$ 2.122 billion.

Compared with 2Q02, net operating revenues were up by R\$ 497 million, results of investment participation grew by R\$ 75 million and the sale of the assets of Florestas Rio Doce resulted in capital gain of R\$ 111 million, all these factors helped to offset the negative effect of monetary variation.

In the quarter, results of investment participation amounted to R\$ 482 million. The results of investment participation is composed by gain on equity income, amortization goodwill, provisions for losses and dividends received from affiliates and subsidiaries accounted as cost. Main contributions for the positive result of investment participation appeared in the equity income result, from subsidiaries and affiliates in the iron ore and pellet businesses (R\$ 791 million), steel (R\$ 133 million) and manganese and ferro-alloys (R\$ 77 million). The aluminum area contributed with a negative equity income result of R\$ 321 million, due to the impact of exchange rate devaluation on the foreign currency denominated debt of Albras and Alunorte.

Loss provisions were made for investments in subsidiaries and affiliates in the amount of R\$ 377 million, made necessary by the negative net worth of these companies. Most of the provisions were made for investments in Albras (R\$ 107 million), PPSA (R\$ 53 million) - whose net worth turned negative as a result of exchange rate losses - and FCA and MRS (R\$ 138 million).

RESULTS OF EQUITY INVESTMENTS - BY BUSINESS AREA

Others	56	6.5%	71	7.3%	5
TOTAL	867	100.0%	972	100.0%	1,02

Operational expenses were up by R\$ 74 million QoQ, due to an increase under the other operational expenses line, which rose from R\$ 77 million to R\$ 130 million. The main items of other operational expenses were: provisions for contingencies (R\$ 62 million), provisions for profit sharing plan (R\$ 37 million), provisions for losses with credits against Eletrobras (R\$ 29 million) and provision for a special pension plan (R\$ 20 million).

The amount spent on research and development rose by R\$ 16 million, while administrative expenses were down R\$ 5 million.

The financial result worsen in 3Q02, from minus R\$ 148 million in 2Q02 to minus R\$ 491 million. Contributed to this deterioration the increase of R\$ 111 million with losses with derivatives and of R\$ 156 million in financial expenses with related parties.

CVRD uses derivatives operations to set the levels of interest taxes of its liabilities contracted with floating exchange rates and also to hedge against gold prices fluctuations, which are registered marked to market. The decrease of the Libor was the main driver of the losses with derivatives in this quarter.

On March 2001, CVRD transferred its 10.33% ownership in CSN's capital, equivalent to R\$ 520 million, to Valia, its employees pension fund, cancelling actuarial deficit existent on that time. The contract celebrated between CVRD and Valia guaranteed to the pension fund minimum return on CSN shares equal to the variation of the General Index of Price - Internal Availability (IGP-DI), plus 6% of interest per year. As this condition was not satisfied, CVRD made in this quarter a provision of R\$ 140 million, classified as financial expense with related parties. Such provision can appear again in future quarters if the profitability of CSN shares on BOVESPA (Sao Paulo Stock Exchange) are lower than the minimum assured by CVRD to Valia in the contract.

EBITDA PERFORMANCE

EBITDA generated in 3Q02 was of R\$ 1.205 billion, 39.5% higher than 2Q02 and 22.2% higher than 3Q01. EBITDA accumulated in the first nine months of the year was R\$ 2.797 billion, 14.2% higher than the one obtained in the same period of last year.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

The strong EBITDA growth in the quarter was caused by the increase of R\$ 497 million in net operating revenues, determined by the increase of iron ore and pellets sales volumes and by the depreciation of the Real. EBITDA margin was 53.3%, the third highest quarterly margin since the privatization of the Company.

INVESTMENTS

In the third quarter of 2002, CVRD carried out investment of US\$ 155.5 million, bringing the accumulated total for the first nine months of the year to US\$ 528.6 million. This amount includes disbursements for the acquisition of total control of the Salobo Copper Project (US\$ 50.4 million)

Bearing in mind that the Company has an extensive range of projects in its main business areas, which are scheduled to enter into operation between 2003 and 2007, and will require capital expenses of an estimated US\$ 6 billion, more than 50% of the amount invested in 3Q02, US\$85.2 million, was allocated to greenfield and brownfield capacity expansion.

Of this sum, US\$ 28 million was directed to the ferrous minerals, the main investments being in the infrastructure needed for the good functioning of the new pellet plant at Sao Luis (US\$ 16.5 million), and the last steps in the enlarging of iron ore production capacity in the Northern System to 56 million

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

tons. This includes construction of Pier III at Ponta da Madeira and the construction and enlargement of the iron ore stock yards, which in 3Q02 received investment of US\$ 5.7 million and US\$ 1.8 million, respectively.

The Sossego and Salobo copper projects were responsible for investment of some US\$ 28 million. Work on the Sossego project began in April 2002 and is progressing according to schedule. The current phase of copper's economic cycle, with relatively low prices and little expansion in capacity, contributed to reducing the costs of developing Sossego. At the same time, the depreciation in real terms of the Brazilian currency, has helped further to reduce the US dollar cost of this investment, given that only 25% of the capital expenditure planned is actually denominated in US dollars. Therefore, these two factors could reduce the amount spent on the project, compared with the initial budget of US\$ 384 million.

10

Companhia
Vale do Rio Doce

BR GAAP 3Q02

In the non-ferrous segment, US\$ 2.6 million was invested in enlarging the production capacity of the Taquari-Vassouras potash mine. New capacity of 850,000 tons a year is scheduled to come on stream in the middle of 2005.

Our hydroelectric generation projects have required investment of US\$ 17.5 million in the quarter. Most of this was dedicated to the building of the hydro-electric plants at Aimores (US\$ 8.4 million), Funil (US\$ 5.2 million) and Candonga (US\$ 2.5 million). The Funil plant, located in the state of Minas Gerais, which has an installed capacity of 180 MW, is programmed to start up in December 2002.

US\$ 8.5 million was invested in the logistics segment, mainly in the purchase of locomotives and the enlarging of capacity to handle general cargo in the Southern System.

Maintenance costs for existing operations in 3Q02 amounted to US\$ 40.6 million.

The Company invested US\$ 9.5 million in mineral exploration, continuing its prospecting for new deposits of copper, nickel, gold, platinum and zinc, among others. In addition to this, US\$ 2.7 million was spent on information technology and US\$ 1.1 million on environmental protection measures.

MINERAL EXPLORATION AND TECHNOLOGY

In 2002, CVRD's mineral exploration and technology activities underwent reorganization, coming under control of the Department for the Development of Mineral Projects. This department aims to develop new businesses and projects for the Company, with a view to its long term growth.

11

Companhia
Vale do Rio Doce

BR GAAP 3Q02

CVRD's mineral exploitation program is distributed into three main areas: Carajas, other regions in Brazil and abroad. Investment in the first nine months of 2002 amounted to US\$ 38 million, including a tranche of US\$ 15 million from the BNDES, referring to the Mineral Risk Contract.

This exploration program gives priority to the mineral province of Carajas, where 75% of efforts are concentrated, the main focus being the development of the copper projects (Sossego, 118, Cristalino, Alemao and Salobo), as well as the identification of new deposits of copper and gold. Investment is also being made in the Niquel do Vermelho project, which is in the pre-feasibility stage, with tests ongoing in a pilot plant and actions designed to minimize risk. Additionally, prospecting programs are ongoing in the search for nickel, and platinum group metals (PGMs), all still in their initial stages.

In terms of mineral exploration outside Brazil, the initial focus is the copper-bearing province of Cordilheira dos Andes, with opportunities being looked at in Argentina, Chile, Peru and Equador. In this context, CVRD and Antofagasta Plc, one of the main copper producers in Chile, have formed a joint venture company, Cordillera de las Minas S.A., whose aim is to carry out mineral prospecting and extraction in the south of Peru, near Cuzco. The area of interest covers an approximate total of 60,000 square kilometres. Other significant mining enterprises are located in this region and there is a great potential for rich mineral deposits.

"This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Comissao de Valores Mobiliarios and the U.S. Securities and Exchange."

CVRD

PART I

Expressed in thousands of reais

- 1- MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE OPERATING RESULTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2002 COMPARED WITH THE NINE MONTHS ENDED SEPTEMBER 30, 2001
 - 1.1- General Aspects
 - (a) The Company's segments of business are mining, logistics and energy, as follows:
 - o Ferrous minerals: includes iron ore and pellets as well as manganese and ferroalloys;
 - o Non-ferrous minerals: includes gold, kaolin, potash and copper;
 - o Logistics: includes railroads, ports and maritime terminals and shipping;
 - o Energy: includes electric power generation; and
 - o Shareholdings: includes equity holdings in producers of aluminum, steel and fertilizers.
 - (b) The variations of the main currencies and indices at 09/30/02 and 09/30/01 in terms of percentages in relation to the real, which impacted the results of the Company and its subsidiaries, jointly controlled companies and affiliates, were as follows:

Period -----	/\ % Currencies/Indexes -----					Parity -----	
	U.S. -----	YEN ---	GOLD -----	IGPM -----	TJLP -----	US\$xR\$ -----	US\$xYen -----
9/30/02	67.9	80.8	26.6	10.5	7.3	2.8949	121.87
9/30/01	36.6	30.9	6.8	7.7	6.9	2.6713	119.68
12/31/01	18.7	3.7	1.2	10.4	9.5	2.3204	131.30

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

12/31/00 9.3 (2.2) (5.4) 10.0 10.8 1.9554 114.70

About 62% of the Company's gross revenue on 09/30/02 (57% of the consolidated revenue) is derived from exports and part of domestic sales are denominated in U.S. dollars, while the costs are in mainly incurred in reais. Consequently, fluctuations in the exchange rate between the two currencies have a significant impact on the operating cash flows;

Approximately 95% of the short-term and long-term loans of the Company on 09/30/02 are denominated in U.S. dollars. As a result, exchange rate fluctuations have a significant impact on the financial expenses (Notes 6.11 and 6.19);

Total	5,693,687
	=====

1.3- Comments on the Parent Company Results

The net income of the Company for the period was R\$ 502,212 (net income of R\$ 718,388 in the first six months and loss of R\$ 216,176 in the third quarter), a 79.2% decrease compared with the R\$ 2,411,580 in the third quarter of 2001, reducing the earnings per share to R\$ 1.31 on 09/30/02 from R\$ 6.28 on 09/30/01. The 2002 results include a gain on discontinued operations due to sale of the holding in Florestas Rio Doce in the amount of R\$ 110,693, and in 2001 includes a gain on investments in the amount of R\$ 1,770,516, basically due to the sale of Bahia Sul and Cenibra.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

1.3.1- Gross Revenues

Gross revenues increased 20.3% (from R\$ 4,806,738 on 09/30/01 to R\$ 5,784,506 on 09/30/02), this reflects the strengthening of the dollar against the real (83% of revenues are linked to the U.S. dollar) as well as growth in iron ore and potash sales volumes. The increase in iron ore sales is due to growth of the Chinese and European markets as well as mining operations previously belonging to Samitri. However, these events resulted in a decrease in gross revenue from railroad transport and port services, since CVRD ceased to sell these services to that company and absorbed related costs as part of its own activities.

The following table shows sales volume and revenues by products and services:

	In thousands of metric tons (except gold)		/\%	09
	09/30/02	09/30/01

1.3.3- Result of Shareholdings by Business Area

The results of shareholdings by business area are as follows:

Business Area	09/30/02	09/30/01
-----	-----	-----
Ferrous		
.. Iron ore and pellets	1,474,291	270,513
.. Manganese and ferro-alloys	139,137	(8,732)
Non-ferrous	(88,212)	(186,769)
Logistics	(286,205)	(303,704)
Investments		
.. Steel	181,907	244,631
.. Pulp and paper	7,258	24,274
.. Aluminum	(382,726)	(68,698)
.. Fertilizers	15,025	5,969
Others	(19,769)	4
	-----	-----
	1,040,706	(22,512)
	=====	=====

The numbers reported per area do not necessarily reflect the individual results of each company, but rather the amounts effectively applicable to the business area.

Equity earnings increased from a loss of R\$ 22,512 on 09/30/01 to a gain of R\$ 1,040,706 on 09/30/02, this variation was due to a combination of the following factors:

Ferrous

(a) Iron ore and pellets

FERTECO - An increase in the equity result of R\$ 189,352 (a gain of R\$ 92,395 on 09/30/2002 against a loss of R\$ 96,957 on 09/30/2001) due to increased sales volume and recording in 2001 of financial expenses and exchange rate variation on loans indexed in dollars. The company was acquired in April 2001. In 2002, R\$ 69,312 was booked as amortization of goodwill.

.. ITACO/RDE - An improved equity result of R\$ 1,016,829 (a gain of R\$ 1,459,054 on 09/30/02 against a gain of R\$ 442,225 on 09/30/01), basically due to the devaluation of the real against the dollar (positive exchange rate variation of R\$ 1,077,932 on 09/30/02 versus positive exchange rate variation of R\$ 243,260 on 09/30/01). In operational terms, iron ore sales rose 42.0% (63,791 thousand tons in 2002 against 44,926 thousand tons in 2001), including sales of its subsidiary CVRD Overseas.

.. KOBRASCO - A reduction in the equity result of R\$ 23,954 (a loss of R\$ 69,276 on 09/30/02 versus a loss of R\$ 45,322 on 09/30/01), due to the increased negative effects of exchange rate variation on debt, a 3.9% decrease in the average sale price (US\$ 30.09 per ton on 09/30/02 against US\$ 31.32 per ton on 09/30/01) and a 12.8% drop in volume sold (2,718

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

thousand tons on 09/30/02 against 3,116 thousand tons on 09/30/01).

- .. NIBRASCO - An improved equity result of R\$ 11,656 (a gain of R\$ 2,598 on 09/30/02 against a loss of R\$ 9.058 on 09/30/01), due to booking in 2001 of R\$ 21,000 as a provision for losses on the realization of ICMS (VAT) credits. Additionally, sales volume dropped by 9.3% (5,099 thousand tons on 09/30/2002 against 5,622 thousand tons on 09/30/2001) and the average price fell 5.2% (US\$ 28.69 per ton on 09/30/02 versus US\$ 30.25 per ton on 09/30/01).
- .. SAMARCO - A reduction in the equity result of R\$ 11,689 (a loss of R\$ 17,319 on 09/30/02 against a loss of R\$ 5,630 on 09/30/01), due to increased negative effects of exchange rate variation on debt. In operational terms, sales volume increased 22.9% (10,608 thousand tons on 09/30/02 against 8,630 thousand tons on 09/30/01), offset by a 4.1% drop in the average sales price (US\$ 28.38 per ton on 09/30/02 against US\$ 29.58 per ton on 09/30/01).

CVRD

7

(b) Manganese and Ferro-alloys

- .. RDME - An increase in the equity result of R\$ 57,063 (a gain of R\$ 80,808 on 09/30/02 versus a gain of R\$ 23,745 on 09/30/01), due basically to the fall in the exchange rate between the real and the euro in 2002.
- .. SIBRA - A better equity result of R\$ 83,704 (a gain of R\$ 103,262 on 09/30/02 versus a gain of R\$ 19,558 on 09/30/01), due to a 60.0% increase in ferroalloy sales (112 thousand tons on 09/30/02 against 70 thousand tons on 09/30/01), offset partly by a 13.3% decrease in the price of ferroalloys (US\$ 445.85 per ton on 09/30/02 against US\$ 514.06 per ton on 09/30/01) as well as an 18.1% increase in the average manganese sales price (US\$ 54.68 per ton on 09/30/02 against US\$ 46.28 per ton on 09/30/01), also partly offset by a 4.4% decrease in manganese sales volume (818 thousand tons on 09/30/02 against 856 thousand tons on 09/30/01).
- .. URUCUM - An improved equity result of R\$ 7,091 (a gain of R\$ 14,006 on 09/30/02 against a gain of R\$ 6,915 on 09/30/01), due mainly to an increase of 88.7% in manganese sales (251 thousand tons on 09/30/02 against 133 thousand tons on 09/30/01).

Non-ferrous

- .. PARA PIGMENTOS - A provision for losses of R\$ 87,936 was booked on 09/30/02 against R\$ 103,725 on 09/30/01, due basically to the negative effects of exchange rate variation on debt. In 2001, R\$ 83,150 was recorded as amortization of goodwill.

Logistics

- .. DOCENAVE - An improved equity result of R\$ 121,618 (a gain of R\$ 107,014 on 09/30/02 against a loss of R\$ 14,604 on 09/30/01), due to the appreciation of the dollar against the real, offset partly by a 34.1% drop in the average freight rate (US\$ 4.80 per ton on 09/30/02 versus US\$ 7.28 per ton on 09/30/01).

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

- .. DOCEPAR - R\$ 50,735 basically refers to a provision for losses on assets of doubtful realization.
- .. FCA - R\$ 131,115 was booked as a provision for losses on 09/30/02 against R\$ 107,965 on 09/30/01, due to the negative effects of exchange rate variation of debt, along with R\$ 86,172 of amortization of goodwill on 09/30/02 against R\$ 138,559 on 09/30/01. CVRD's interest in FCA is held through its subsidiary Tacuma.
- .. MRS - R\$ 65,543 was recorded as a provision for losses on 09/30/02, due to the negative effects of exchange rate variation on debt, along with R\$ 16,881 of amortization of goodwill. Our participation on this investment is held through Ferteco Mineracao S.A., Belem Administracoes e Participacoes Ltda. and Caemi Mineracao e Metalurgia S.A..

Shareholdings

(a) Steel

- .. CSI - An increase in the equity result of R\$ 233,511 (a gain of R\$ 352,161 on 09/30/02 against a gain of R\$ 118,650 on 09/30/01), caused by a 10.5% increase in sales volume (R\$ 1,520 thousand tons in 2002 against 1,376 thousand tons in 2001) and the appreciation of the dollar against the real (positive exchange rate variation of R\$ 303,682 on 09/30/02 versus a positive variation of R\$ 132,019 on 09/30/01).
 - .. CSN - An equity result of R\$ 107,522 was recorded on 09/30/01 due to unwinding the cross shareholdings between CVRD and CSN carried out in March 2001.
 - .. CST - A lower equity result of R\$ 29,929 (a loss of R\$ 42,907 on 09/30/02 against a loss of R\$ 12,978 on 09/30/01), due to the increased negative effects of exchange rate variation on indebtedness, offset in part by a 2.4% increase in the volume of slabs sold (3,547 thousand tons in 2002 against 3,464 thousand tons in 2001).
- USIMINAS - A reduction in the equity result of R\$ 110,172 (a loss of R\$ 107,453 on 09/30/02 versus a gain of R\$ 2,719 on 09/30/01) caused mainly by the negative effects of exchange rate variation on indebtedness.

(b) Aluminum

- .. ALBRAS - A reduced equity result of R\$ 126,958 (a loss of R\$ 222,875 on 09/30/02 against a loss of R\$ 95,917 on 09/30/01), due to increased negative effects of exchange rate variation on the company's debt. In operational terms, the average aluminum sales price dropped 10.5% (US\$ 1,313.92 per ton on 09/30/02 compared with US\$ 1,468.08 per ton on 09/30/01) and sales volume rose by 15.3% (302 thousand tons on 09/30/02 against 262 thousand tons on 09/30/01).

8

CVRD

- .. ALUNORTE - A reduced equity result of R\$ 125,919 (a loss of R\$ 213,782 on 09/30/02 against a loss of R\$ 87,863 on 09/30/01), due to increased negative effects of exchange rate variation on the company's debt. Operationally, the average sales price of alumina dropped 13.8% (US\$ 165.51 per ton on 09/30/02 versus US\$ 192.04 per ton on 09/30/01) while sales volume remained stable (1,185 thousand tons on 09/30/02 versus

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

1,180 thousand tons on 09/30/01).

- .. MRN - A reduction in the equity result of R\$ 47,507 (a gain of R\$ 10,256 on 09/30/02 against a gain of R\$ 57,763 on 09/30/01), due to the negative effects of exchange rate variation on debt, a 10.7% decrease in sales volume (6,946 thousand tons on 09/30/02 compared with 7,777 thousand tons on 09/30/01), and a 10.5% decrease in the sales price (US\$ 18.75 per ton on 09/30/02 against US\$ 20.95 per ton on 09/30/01).
- .. VALESUL - An increase in the equity result of R\$ 2,718 (a gain of R\$ 22,443 on 09/30/02 against a gain of R\$ 19,725 on 09/30/01), caused by a 5.0% rise in sales volume (63 thousand tons on 09/30/02 against 60 thousand tons on 09/30/01), while the average sales price dropped 12.4% (US\$ 1,679.61 per ton on 09/30/02 against US\$ 1,916.59 per ton on 09/30/01).
- .. ALUVALE - An increase in the equity result (own operations) of R\$ 7,859 (a gain of R\$ 25,442 on 09/30/02 against a gain of R\$ 17,583 on 09/30/01) basically due to financial result.
- .. ITACO - A reduction in the equity result of R\$ 24,221 (a loss of R\$ 4,210 on 09/30/02 against a gain of R\$ 20,011 on 09/30/01), due to increased financial expenses. In operational terms, the average sales prices fell for aluminum (10.5%), alumina (22.5%) and bauxite (17.8%), while sales volume rose for all three: aluminum (19.8%), alumina (24.1%) and bauxite (63.2%).

1.3.4- Operating Expenses

The operating expenses remained fairly stable (R\$ 775,436 on 09/30/01 against R\$ 727,341 on 09/30/02), with the reduction in other expenses having been offset by increases in:

- o Selling expenses, due to an increase in commissions, in turn caused by higher export sales;
- o Administrative expenses, due to higher expenses for consulting; and
- o Expenses for research and studies along with more copper prospecting.

1.3.5- Net Financial Result

The net financial result decreased R\$ 2,421,670 (R\$ 1,402,033 on 09/30/01 compared to R\$ 3,823,703 on 09/30/02), mainly due to the increased effect of exchange rate variation on the net Company debt (Note 6.19).

1.3.6- Discontinued Operations

The result in 2002 refers to gain on sale of assets of Florestas Rio Doce, and in 2001 reflects gains on sale of the Company's holdings in Bahia Sul and Cenibra, of R\$ 230,384 and R\$ 1,471,544 respectively.

1.3.7- Cash Flow

The operating cash flow measured by EBITDA (earnings before interest, income tax, depreciation, amortization and depletion) was R\$ 2,796,688 on 09/30/02, reflecting an increase of 14.2% over 09/30/01, which was R\$ 2,449,531 (other information, item 7.4).

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

1.3.8- Income Tax and Social Contribution

Income tax and social contribution showed a credit of R\$ 1,188,596 (credit of R\$ 585,034 on 09/30/01), mainly due to the tax write-off on losses from exchange rate variation in the period for constitution of this tax/social contribution benefit, based on the provisioning of interest on shareholders' equity of R\$ 349,753 on 09/30/02 (R\$ 603,002 on 09/30/01) (Note 6.8).

13

6- NOTES TO THE QUARTERLY INFORMATION AT SEPTEMBER 30, 2002 AND 2001

Expressed in thousands of reais

6.1- Operations

Companhia Vale do Rio Doce - CVRD is a publicly traded corporation whose predominant activities are mining, processing and sale of iron ore, pellets, gold and potash, as well as port and railroad transportation services and power generation. In addition, through its direct and indirect subsidiaries and jointly controlled companies, CVRD operates in logistics, geological studies and technological research services, steel and aluminum.

6.2- Presentation of Financial Statements

The quarterly information has been prepared according to the accounting principles provided for in Brazilian corporate legislation as well as the rules and guidelines issued by the Comissao de Valores Mobiliarios - CVM (Brazilian Securities Commission) and IBRACON - Instituto dos Auditores Independentes do Brasil (Brazilian Independent Auditors Institute).

In order to provide better information to the market, the Company is presenting the Statement of Cash Flow. The disclosure of this statement is encouraged by the CVM according to the Official Instruction 01/00 of 01/31/00.

Certain amounts and classifications in the 2001 quarterly information have been adjusted to the criteria used on 09/30/02 for better comparability.

6.3- Significant Accounting Policies

- (a) The Company adopts the accrual basis of accounting;
- (b) Assets and liabilities that are realizable or due more than twelve months after the quarterly information date are classified as long-term;

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

- (c) Marketable securities, classified as cash and cash equivalents, are stated at cost plus accrued income earned to the quarterly information date;
- (d) Inventories are stated at average purchase or production cost, and imports in transit at the cost of each item, not exceeding market or realizable value;
- (e) Assets and liabilities in foreign currencies are translated at exchange rates in effect at the quarterly information date, and those in local currency are restated based on contractual indices;
- (f) Investments in subsidiaries, jointly controlled companies and affiliated companies are accounted for by the equity method, based on the stockholders' equity of the investees, and when applicable increased/decreased by goodwill and negative goodwill to be amortized and provision for losses. Other investments are recorded at cost, less provision for unrealized losses when applicable;
- (g) Property, plant and equipment, including interest incurred during the construction period of large-scale projects, are recorded at historic cost (increased by monetary restatement up to 1995) and depreciated by the straight-line method, at rates that take into consideration the useful lives of the assets. Depletion of mineral reserves is based on the ratio between production and estimated capacity.

6.4- Cash and Cash Equivalents

	09/30/02	06/30/02
	-----	-----
Marketable securities related to CDI (*)	1,096,578	338,377
Fixed-yield bond investments (funds)	23,135	96,084
Government securities (NBC-E, NTN-D, LFT)	89,904	84,509
Others	828	2,865
	-----	-----
	1,210,445	521,835
	=====	=====

- (*) For part of these investments the Company contracted swap operations with financial institutions related to interest rate and/or currency variations.

14

6.7- Inventories

Finished products
 . Iron ore and pellets
 . Gold
 . Others

Spare parts and maintenance supplies

6.8- Deferred Income Tax and Social Contribution

Income of the Company is subject to the normal tax system. The balances of deferred assets and liabilities are presented as follows:

	09/30/02	06/30/02
	-----	-----
Tax loss carryforward	999,936	359,738
Temporary differences:		
. Pension Plan	179,062	164,462
. Contingent liabilities	324,413	285,252
. Provision for losses on assets	412,012	308,946
. Provision for losses on derivative financial instruments	88,652	32,035
. Others	94,762	55,506
	-----	-----
Inflationary profit	2,098,837	1,205,939
Capital reserve - special monetary restatement - Law 8,200	-	-
Accelerated depreciation	-	-
Contribution on Net Profit to collect - Samitri	-	-
Long-term sales	-	-
	-----	-----
Total	2,098,837	1,205,939
	=====	=====
Short-term	1,480,462	569,017
Long-term	618,375	636,922
	-----	-----
	2,098,837	1,205,939
	=====	=====

The realization of tax credits arising from temporary differences occurs at the time of effective payment of the provisions made, in accordance with tax law.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

In addition to the credits recorded, the Company has a lawsuit pending claiming an additional 51.83% monetary restatement for tax purposes applied to the months of January and February 1989 ("Plano Verao" monetary plan). A favorable ruling has already been obtained for compensation of credits corresponding to 42.72% instead of the 51.83% requested. The amount of these credits covered by the ruling totals approximately R\$ 405,000, and the accounting effects have not yet been recognized in the quarterly information.

The current expectation is to realize substantially the deferred income tax credit by the end of the year 2003.

16

CVRD

The amounts reported as income tax and social contribution which affected income for the period are as follows:

	09/30/02

Income before income tax and social contribution	(686,384)
(-) Equity in results of subsidiaries and affiliated companies	(1,871,936)
(-) Result from discontinued operations	(110,693)

	=====

In July 2002, Itabira Rio Doce Company Limited - ITACO was sold to Itabira International Servicos e Comercio Ltda.;

- (i) The consolidated shareholding in Vale do Rio Doce Aluminio S.A. - ALUVALE is 100%, the subsidiary Itabira Rio Doce Company Limited - ITACO owns 5.26% of the capital;
- (j) In March 2001, CVRD withdrew from CSN by unwinding the cross-holding relationship between the companies;
- (k) On 06/19/02, CVRD acquired from Anglo American Brasil Ltda. (Anglo), a subsidiary of Anglo American plc, 44,172,369 common shares, corresponding to 50% of the total capital of Salobo Metais S.A., for R\$ 136,159. This transaction was carried out through the intermediation of Caulim do Brasil Investimentos S.A., a wholly owned CVRD subsidiary. With this acquisition, CVRD became sole owner of Salobo;
- (l) CVRD's holding in MRS Logistica is hold through Ferteco Mineracao S.A., Belem Administracao e Participacao Ltda., and Caemi Mineracao e Metalurgia S.A.;
- (m) Attachment I presents additional information about the companies in the areas of aluminum, pellets, manganese and ferroalloys.

The average annual depreciation rates are 3% for buildings, from 2% to 10% for installations, from 10% to 20% for equipment, and from 1% to 4% for railroads. Mineral reserve depletion is calculated annually as a function of the volume of ore extracted in relation to the proven and probable reserves.

6.12 - Securitization Program

On September 29, 2000, CVRD finalized the financial conditions for a US\$ 300 million securitization program based on existing and future receivables generated by its subsidiary CVRD Overseas Ltd.. This transaction, relating to exports of iron ore and pellets to six of CVRD's major customers in Europe, the United States and Asia, was structured by Bank of America Securities LLC, and is divided into three tranches as follows:

Tranche	Amount (US \$ million)	Maturity	Grace Period (years)	Yield to Investor (per year)
1	25	10/15/2007	2	8.682%
2 (insured)	125	10/15/2007	2	Libor+0.65%
3	150	10/15/2010	3	8.926%

The balance of this operation on 09/30/02 totals R\$ 1,184,046 (R\$ 89,671 in current liabilities and R\$ 1,094,375 in long-term liabilities) and is included in related party liabilities to the subsidiary CVRD Overseas Ltd. (Note 6.6).

CVRD

23

6.13 - Contingent Liabilities

At the quarterly information dates the contingent liabilities of the Company were:

- (a) Provisions for contingencies and respective judicial deposits, considered by management and its legal counsel as sufficient to cover possible losses from any type of lawsuit, were as follows:

	Judicial deposits		Provisions for contingencies	
	09/30/02	06/30/02	09/30/02	06/30/02
Tax contingencies	401,283	322,700	511,182	382,700
Labor claims	137,643	123,637	350,427	363,637
Civil claims	112,242	105,856	299,931	264,931
Others	4,544	6,117	18,905	17,905
Total	655,712	558,310	1,180,445	1,028,173

The Company and its subsidiaries are parties to labor, civil, tax and other suits have been contesting these matters both administratively and in the courts. When necessary, these are backed by judicial deposits. Provisions for

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

eventual losses are estimated and restated monetarily by management upon the advice of the legal department and outside counsel.

Tax contingencies relate principally to a suit claiming unconstitutionality of the change in the calculation basis of PIS and COFINS social contributions introduced by Law 9,718/98.

Labor-related actions principally comprise employee claims in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against the Company by contractors in connection with losses alleged to have been incurred as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

(b) Guarantees given to jointly controlled companies (normally in proportion to the Company's percentage of participation) are as follows:

	09/30/02 -----	06/30/02 -----
ALBRAS - Alumínio Brasileiro S.A.	1,371,814	1,015,684
Companhia Coreano-Brasileira de Pelotização - KOBRASCO	103,864	75,871
Ferrovia Centro-Atlântica S.A.	394,741	322,097
Sepetiba Tecon S.A.	89,695	68,931
Others	-	3,270
	-----	-----
	1,960,114	1,485,853
	=====	=====

The breakdown of guarantees by currency is:

	09/30/02 -----	06/30/02 -----
U.S. Dollar	1,572,212	1,167,174
Real	387,902	318,679
	-----	-----
	1,960,114	1,485,853
	=====	=====

(c) Upon privatization of the Company in 1997, The Brazilian government stipulated the issuance of non-convertible debentures (Debentures) to the then stockholders, including the federal government. The maturity dates of these Debentures were established to guarantee that pre-privatization stockholders, including the federal government, would share any future benefits from mineral resources held by the Company and its subsidiary and affiliated companies that were not evaluated at the time of setting the minimum price of CVRD shares at the privatization auction.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one centavo), whose value is to be restated in accordance with the variation in the General Price Index (IGP-M), as set forth in the Issue Deed.

On 10/04/02, the Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission) approved the Company's registration request, filed on 06/28/02, for Public Debentures Trading. As of 10/28/02, the Debentures can be traded on the secondary market.

The debenture holder are entitled to receive twice-yearly payments equivalent to a percentage of the net revenue deriving from determined mineral resources owned in May 1997 and included in the Issue Deed, as per Tables I and II below.

The Debenture Issue Deed establishes that, in the event that the updated and accrued premium the debenture holders are entitled to receive on the respective payment dates falls below R\$ 0.01 (one centavo) per Debenture, such payment may be held in abeyance and accumulated until the next payment date, or until some future period when the accrued value surpasses the minimum determined above. In this case, the amount of the premium must be accrued and increased by monthly interest equal to the Reference Rate of SELIC (System for Settlement and Custody of Federal Securities), calculated as of the determination dates until the month prior to effective payment, and 1% per month during the month when the money is paid to the debenture holders.

In view of the criteria and parameters for applicability of this premium, and although gold sales from the Fazenda Brasileiro mine reached the accumulated volume stipulated in the Deed of 26 metric tons in June 2002, the amount of the premium was determined at approximately R\$ 28.9 thousand, i.e., less than R\$ 0.01 (one centavo) per Debenture. Therefore, from the issue date to present, no remuneration has been paid to the debenture holders.

Based on the estimates for start-up of operations of the copper projects, such premiums are forecast to begin in 2004. Considering iron ore sales, the threshold established in the Deed should be reached in approximately 2030 for the Southern System and 2020 for the Northern System. Regarding the remaining minerals, such as bauxite and nickel, estimates for start of extraction are after 2005, and according to the criteria established in the Deed, payment will be due on the net revenues starting in the fourth year after the first mineral sales. The obligation to make these payments to the debenture holders will terminate when the pertinent mineral resources are depleted.

Criteria and Parameters for Composition and Applicability of the Premium:

Table I

Mineral Product	Premium	Applicability
Iron Ore	1.8% of Net Revenues	Payment calculated on net the date the accrued sales billion tons in the Southe 1.2 billion tons for the N
Gold, Copper and Byproducts	2.5% of Net Revenues	Payment starting from the observing the following co of Carajas-Serra Leste and (i) The Premium will be du corresponding to the parti

CVRD

25

- (d) The Company has commitments under a take-or-pay contract to acquire approximately 207,060 tons of aluminum per year from ALBRAS at market prices. This estimate is based on 51% of the predicted output of ALBRAS at a market price of US\$ 1,319.52 per ton on 09/30/02, representing an annual commitment of R\$ 731,934 based on the average rate for the nine-month period ended September 30, 2002. The same applies to 676,236 tons of alumina per year produced by ALUNORTE, which at a market price of US\$ 168.55 per ton on 09/30/02 represents a yearly commitment of R\$ 305,342 at the same exchange rate mentioned. The effective take of ALBRAS was R\$ 515,028 and R\$ 407,670 on 09/30/02 and 09/30/01, respectively, and directly from ALUNORTE (net of the take assigned to ALBRAS), was R\$ 68,195 and R\$ 49,501 on 09/30/02 and 09/30/01, respectively.

6.14 - Environmental and Site Reclamation and Restoration Costs

Expenditures relating to ongoing compliance with environmental regulations are charged to production costs or capitalized as incurred. The Company manages its environmental policies according to the specifications of ISO 14,001 and maintains ongoing programs to minimize the environmental impact of its mining operations as well as to reduce the costs that will be incurred upon termination

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

of activities at each mine. On 09/30/02, the provision for environmental liabilities amounted to R\$ 56,029 (R\$ 59,651 on 06/30/02), which was accounted in "Others" in long-term liabilities.

6.15 - Pension Plan - VALIA

The Fundacao Vale do Rio Doce de Seguridade Social - VALIA is a non-traded non-profit supplementary social security entity, legally separate from CVRD, founded in 1973 to provide supplementary social security benefits to the employees of the Company, its subsidiaries, affiliated companies and others that participate or may in the future participate in plans administered by the Foundation.

The Company and various of its subsidiaries and affiliated companies are sponsors of VALIA, in the following benefit plans:

(a) Benefit Plan

Defined Benefit Plan - "BD"

A pure defined benefit plan, now being phased out, instituted in 1973 upon establishment of VALIA. This plan has been closed to new members and is maintained only for existing retired participants and their beneficiaries and a few residual active participants.

Mixed-Benefit Plan - "Vale Mais"

A mixed plan which offers programmable retirement income benefits of the defined contribution type, independent of government Social Security. It also includes a deferred severance benefit (vesting), as well as risk benefits: retirement for disability, death benefits and sick-leave assistance. This new plan has more modern, transparent and flexible rules that make it more attractive for employees and more economical for the sponsors.

"Vale Mais" was established in May 2000 and nearly 98.7% of the active participants migrated to this new plan.

The contributions of the sponsors are as follows:

- o Ordinary contribution - Destined to accrue the resources necessary to grant income benefits, sponsor contributions are matched equally by participants, up to 9% of their participation salaries, which may not exceed ten "plan reference units" (this limit was R\$1,383.86 in December 2001).
- o Extraordinary contribution - This can be made at any time, at the discretion of the sponsors.
- o Normal contribution - To fund the risk plan and administrative expenses, fixed by the actuary based on actuarial appraisals.
- o Special contribution - Destined to cover any special commitment that may arise.

During the period ended 09/30/02, the Company made contributions to VALIA in the amount of R\$ 40,392 (R\$ 32,754 on 09/30/01) to fund the benefit plans it sponsors.

(b) Reserve to be amortized

On 03/15/01, CVRD fully paid the total of reserve to be amortized to that date

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

by transferring the total shares of Companhia Siderurgica Nacional - CSN, in the amount of R\$ 521 million, and gave guarantees of minimum gains until VALIA sells them. The guarantee consists of the variation of IGP-DI inflation index plus interest of 6% per year.

26

CVRD

(c) Contractual guarantee

Due to the amount of income guaranteed was over the variation of the shares on 09/30/02, CVRD registered a liability with VALIA in the amount of R\$ 139,272, accounted for as financial expense (Note 6.19), which can be reversed by appreciation in the shares or dividends and interest on shareholders' equity to be paid by CSN. (d) Actuarial liability

(d) Actuarial liability

This provision is the result of the Company's responsibility to provide supplementary pensions relating to the early retirement programs of 1987 and 1989, in the amount of R\$ 460,951, and an additional amount of R\$ 33,075 as required by CVM Deliberation 371. These liabilities were calculated by an independent actuary for the year 2001 and represent the current value of the benefits and pensions. Part is recorded in "Pension Plan" account in current liabilities - R\$ 68,809 (R\$ 64,533 on 06/30/02) and part in long-term liabilities - R\$ 455,758 (R\$ 429,493 on 06/30/02).

6.16 - Capital

The Company's capital is R\$ 5 billion, corresponding to 388,559,056 book shares, of which 249,983,143 are common shares, 138,575,913 are preferred class "A" shares, the latter including one special preferred share ("Golden Share"), all with no par value. On April 29, 2002, the Extraordinary Stockholders' General Meeting approved a capital increase, without new share issue, through capitalization of reserves in the amount of R\$ 1 billion.

Preferred shares have the same rights as common shares, except for the right to elect the members of the Board of Directors. They have priority to a minimum annual dividend of 6% on the portion of capital represented by this class of share.

The special "Golden Share" created during the privatization in 1997 belongs to the Brazilian Government. This share gives it the right to a permanent veto of changes in the Company's name, headquarters location, nature as a mining enterprise, continuous operation of the integrated mining, transportation and loading systems and other matters determined in the Bylaws.

On 09/30/02 the Company's capital is comprised as follows:

Stockholders	Common	%	Preferred

(a) The National Bank for Economic and Social Development (BNDES), in its own name and on behalf of the Brazilian Government, continuing the privatization process started in 1997 as per the terms of the Privatization Rules, on 03/21/02 sold 78,787,838 common CVRD shares to the public.

(b) Litel is the corporate vehicle pursuant to which Previ, Petros, Funcef and Fundacao CESP, each of which is a Brazilian pension fund, hold common shares in CVRD and Valepar.

As of 09/30/02, the number of holders of record who are residents of Brazil was 32,073. These stockholders owned 229,948,776 shares, representing 59.2% of the capital stock.

6.17- American Depositary Receipts (ADR) Program

CVRD

27

On 06/20/00, the Company obtained ADR registration from the United States Securities and Exchange Commission (SEC), beginning a process for its preferred shares to be traded on the New York Stock Exchange (NYSE). On 03/21/02, in connection with the sale of shares held by the BNDES and Brazilian Government, the common shares began to be traded on the NYSE. Each ADR represents 1 (one) preferred Class "A" or common share, traded under the code "RIOPR" and "Rio", respectively.

6.18- Treasury Stock

The Board of Directors, under the terms of subparagraph XV of Article 13 of the Bylaws and based on Article 30 of Law 6,404/76 and CVM Instructions 10 of 02/14/80 and 268 of 11/13/97, approved the acquisition by the Company of its own shares to be held in treasury for later sale or cancellation.

On October 24, 2001, an Extraordinary General Meeting authorized the acquisition of up to 19 million nominative book shares, with no par value, with 14 million being common shares and 5 million preferred shares, in order to hold in treasury for later sale or cancellation, without decreasing in capital stock. Up to 09/30/02, 4,715,170 common and 4,751 preferred shares had been acquired at a cost of R\$ 131,347, and held in treasury.

(**) Includes net losses on derivative financial instruments (Note 6.20).

6.20 - Financial Instruments - Derivatives

The main market risks the Company faces are related to interest rates, exchange rates and commodities prices. CVRD has a policy of managing risks through the use of derivatives instruments.

The Company's risk management follows policies and guidelines reviewed and approved by the Board of Directors and Executive Board. These policies and guidelines generally prohibit speculative trading and short selling and require diversification of transactions and counterparts. The policy of the Company is to settle all contracts financially without physical delivery of the products. The overall position of the portfolio is assessed and monitored daily to measure the financial results and the impact on cash flow. The credit limits and

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

28

CVRD

creditworthiness of counterparts are also reviewed periodically. The results of hedging are reported to the Executive Board and recognized monthly in the CVRD result.

Interest Rate Risk

Interest rate risk derives from floating-rate debt, mainly from trade finance operations. The portion of floating-rate debt denominated in foreign currency is mainly subject to fluctuations in the LIBOR (London Interbank Offered Rate). The portion of floating-rate debt expressed in reais refers basically to the Brazilian long-term interest rate (TJLP), established by the Brazilian Central Bank. Since May 1998, CVRD has been using derivatives to limit its exposure to fluctuations in the LIBOR.

The interest rate derivatives portfolio consists mainly of options trades aiming to cap exposure to interest rate fluctuations, establishing upper and lower limits. Some operations are subject to knock-out provisions which, if triggered, eliminate the protection provided by the cap.

The table below provides information regarding the interest rate derivatives portfolio for 09/30/02 and 09/30/01.

Type	09/30/02		09/30/01	
	Notional value (in US \$ thousand)	Rate range	Unrealized gain (loss) (in R \$ thousand)	Final maturity
Cap	1,200	5.7 - 11.0%	1,737	May/07
Floor	850	5.7 - 6.3%	(80,656)	May/05
Swap	475	5.8 - 6.7%	(175,851)	Oct/07
Total			(254,770)	

Exchange Rate Risk

Exchange rate risk comes from foreign currency debts. On the other hand, a substantial part of the Company's revenues are denominated or indexed in U.S. dollars, while the majority of costs are in reais. This provides a natural hedge against possible devaluation of Brazilian currency. Events of this nature have an immediate negative impact on foreign currency debt, offset by the positive effect on future cash flows.

The Company adopts a strategy of monitoring market fluctuations and, if necessary, carrying out derivatives operations to cover risks related to these variations.

The portion of debt denominated in euros and Japanese yen is protected by derivatives to cover risks of exchange rate movements of these currencies.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

The table below shows the exchange rate derivatives portfolio for 09/30/02 and 09/30/01. These operations are forwards and range forwards which were structured to ensure the purchase price of the following currencies:

				09/30/02 -----		
Type	Notional value (in US \$ thousand)	Rate range	Unrealized gain (loss) (in R \$ thousand)	Final maturity	Notional value (in US \$ thousand)	Rate range
-----	-----	-----	-----	-----	-----	-----

Euros purchased		E 1.18 - 1.23 per US\$	5,465	May/05	17	E1.10 - 1.
Euros sold		E 0.98 - 0.99 per US\$	134	Sep/02	-	

Total			9,562			
			=====			

Commodities Price Risk

The prices of iron ore, the Company's main product, are set in annual negotiations between producers and consumers and are notably stable over time. The Company does not enter into derivatives operations to hedge iron ore exposure.

The Company uses hedge instruments to manage its exposure to changes in the price of gold. These derivatives operations allow establishment of a minimum profit level for future gold output. The Company actively manages its open positions, with the results reported monthly to senior management to allow adjustment of targets and strategies in response to market conditions.

The following table shows the gold derivatives portfolio of the Company on 09/30/02 and 09/30/01.

9- OPINION OF THE INDEPENDENT ACCOUNTANTS

November 13, 2002

To the Board of Directors
Companhia Vale do Rio Doce

- 1 We have carried out limited reviews of the Quarterly Financial Information - ITR of Companhia Vale do Rio Doce for the quarters ended September 30, 2002 and 2001. This financial information is the responsibility of the Company's management.
- 2 Except as mentioned in paragraph three, our limited reviews were carried out in accordance with the specific procedures established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Board, and consisted mainly of: (a) inquires and discussion with the officers responsible for the Company's accounting, financial and operational areas about the procedures adopted for preparing the Quarterly Financial Information - ITR, and (b) review of the information and subsequent events which have, or may have, relevant effects on the Company's financial position and operations.
- 3 The financial statements at September 30, 2002 and 2001, of subsidiary, jointly-owned and associated companies, in which there are relevant investments, have not been reviewed by independent accountants. Thus, the conclusions resulting from our reviews do not cover the amounts of R\$ 7,177,881 thousand (2001 - R\$ 8,659,589 thousand) of these investments and R\$ 1,911,515 thousand (2001 - R\$ 1,169,439 thousand) of the income produced by them for the quarters then ended.
- 4 Based on our limited reviews, except for the effects of any adjustments which might have been required if the financial statements of the subsidiary, jointly-owned and associated companies mentioned in paragraph

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

3 had been reviewed by independent accountants, we are not aware of any relevant adjustments which should be made to the Quarterly Financial Information - ITR, referred to in paragraph 1, for it to be in accordance with the rules issued by the Brazilian Securities Commission - CVM specifically applicable to the preparation of obligatory Quarterly Financial Information - ITR.

- 5 The Quarterly Financial Information - ITR also contains accounting and financial information relating to the quarter ended June 30, 2002. We reviewed this information at the time of its preparation and issued our respective report on August 14, 2002, including the limitation mentioned in paragraph 3.
