Item 5 of Form F-3 filed with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934

INTRODUCTION

Canadian Imperial Bank of Commerce (CIBC) produces quarterly and annual reports, which are submitted to the U.S. Securities and Exchange Commission (SEC) under Form 6-K and Form 40-F, respectively. These reports are prepared in accordance with Canadian generally accepted accounting principles (GAAP). SEC regulations require certain additional disclosure to be included in registration statements relating to offerings of securities. This additional disclosure is contained within this document, which should be read in conjunction with CIBC's Second Quarter 2007 Report, First Quarter 2007 Report, and 2006 Annual Accountability Report; these documents were submitted to the SEC on May 31, 2007, March 1, 2007 and December 18, 2006, respectively.

When we use the term CIBC, we, our, and us, we mean Canadian Imperial Bank of Commerce and its consolidated subsidiaries.

Page 1

*Additional note to the financial statements (unaudited)***RECONCILIATION OF CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES**

CIBC's interim consolidated financial statements are prepared in accordance with Canadian GAAP. Set out below are the more significant differences which would result if United States (U.S.) GAAP were applied in the preparation of the April 30, 2007 interim consolidated financial statements.

For a full discussion of the relevant accounting differences between Canadian and U.S. GAAP, see Note 25 of the 2006 Annual Accountability Report. This note updates that disclosure for the six-month period ended April 30, 2007.

Total other comprehensive income	(70)	(218)
Comprehensive income	\$ 1,691	\$ 1,123

Changes in significant accounting policies affecting Canadian and U.S. GAAP differences

Financial instruments

The Canadian GAAP accounting for securities, derivatives and hedging relationships became substantially harmonized with U.S. GAAP upon the adoption of the Canadian Institute of Chartered Accountants (CICA) handbook sections 1530, *Comprehensive income*, 3855, *Financial Instruments Recognition and Measurement*, 3865, *Hedges*, and 3251 *Equity*, effective November 1, 2006. The significant differences between Canadian GAAP and U.S. GAAP subsequent to the adoption of these new Canadian standards primarily relate to the following:

While the new Canadian GAAP hedge accounting rules are now substantially harmonized with U.S. GAAP, we continue to designate certain hedges for accounting purposes only under Canadian GAAP.

Our residential mortgage commitments continue to meet the definition of a derivative only under Canadian GAAP.

Canadian GAAP provides an entity with the option to designate certain instruments on initial recognition as instruments that it will measure at fair value through the consolidated statement of operations (the fair value option). As U.S. GAAP does not currently embody the concept of a fair value option, instruments to which we have applied the fair value option under Canadian GAAP receive different classification under U.S. GAAP. Certain securities to which we apply the fair value option under Canadian GAAP are classified as trading securities under U.S. GAAP, while certain traded loans under U.S. GAAP are also carried at fair value and classified as loans on the consolidated balance sheet. Other instruments that we have applied the fair value option to under Canadian GAAP, such as certain deposit liabilities, are not currently carried at fair value under U.S. GAAP.

Under the new Canadian standards, trading securities must now be valued based on quoted bid prices, while current U.S. GAAP requires the use of quoted closing prices. In addition, certain valuation adjustments that continue to apply under Canadian GAAP are not permitted under U.S. GAAP.

Guidance for quantifying financial statement misstatements

As of November 1, 2006 CIBC adopted Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108) that describes the approach that should be used to quantify the materiality of a misstatement and provides guidance on how prior year misstatements, when they are identified, should be considered in the current year financial statements. SAB 108 requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement, when all relevant quantitative and qualitative factors are considered, as material to current or prior period financial statements. Based on SAB 108, an immaterial adjustment has been recognized to increase earnings in the amount of \$50 million pre-tax and \$36 million after-tax related to the application of the effective interest rate method.

Accounting changes and error corrections

Effective November 1, 2006, we adopted Statement of Financial Accounting Standard (SFAS) 154, *Accounting Changes & Error Corrections*. The statement provides entities with guidance on reporting a change in accounting estimate, a change in accounting policies, the correction of an error in previously issued financial statements, and the reporting and disclosure of accounting changes in interim-period information. This guidance harmonized U.S. GAAP with existing Canadian GAAP for these matters. The adoption of this U.S. accounting standard did not impact our consolidated financial position or results of operations.

Accounting for certain hybrid financial instruments

Effective November 1, 2006, we adopted SFAS 155, *Accounting for Certain Hybrid Financial Instruments* an amendment of FASB Statements No. 133 and 140. SFAS No. 155 allows any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation under SFAS 133, *Accounting for Derivative Instruments and Hedging Activities* to be carried at fair value in its entirety, with changes in fair value recognized in earnings. In addition, SFAS 155 requires that beneficial interests in securitized financial assets be analyzed to

determine whether they are freestanding derivatives or contain an embedded derivative. We did not

Page 4

elect to measure any hybrid financial instrument at fair value and as a result, the adoption of this U.S. accounting standard did not impact our consolidated financial position or results of operations.

Accounting for servicing financial assets

Effective November 1, 2006, we adopted SFAS 156, *Accounting for Servicing of Financial Assets an amendment of FASB Statement 140*. SFAS 156 requires an entity to initially measure servicing rights at fair value and either amortize servicing rights over the term of the servicing contract and adjust based on a comparison to fair value each reporting date or to subsequently remeasure the servicing rights at fair value with changes in fair value recognized in earnings in the period. The adoption of this U.S. accounting standard did not impact our consolidated financial position or results of operations.

Limited partnerships

In June 2005, the Financial Accounting Standards Board (FASB) issued Emerging Issues Task Force Abstract (EITF) 04-5, which provides guidance on determining whether a general partner controls a limited partnership. The EITF was effective after June 29, 2005, for all newly formed limited partnerships and for any pre-existing limited partnerships that modify their partnership agreements after that date. The EITF was effective for general partners of all other limited partnerships on November 1, 2006. The guidance is based on the fundamental principle that a general partner in a limited partnership is presumed to control the limited partnership, regardless of the extent of its ownership interest. Consequently, a general partner is required to consolidate the partnership unless the presumption of control can be overcome. The assessment of whether the limited partners possess sufficient rights to overcome this presumption is a matter of judgment that depends on facts and circumstances. The adoption of this U.S. accounting guidance did not impact our consolidated financial position or results of operations.

Future accounting changes

We are currently evaluating the impact of adopting the standards listed below:

Accounting for defined benefit pension and other post-retirement plans

In September 2006, the FASB issued SFAS 158, *Employers Accounting for Defined Benefit Pension Plan and Other Post-retirement Plans an amendment of FASB Statements No. 87, 88, 106 and 132 (R)*. This statement does not change the current or future net income recognition related to post-retirement benefit plans, but requires an entity to recognize the full over-funded or under-funded status of a defined benefit post-retirement plan as an asset or liability in its balance sheet. The unamortized balances that were previously netted from the funded status will now be reported as a component of accumulated other comprehensive income. The statement also requires an entity to measure the funded status of a plan as of the date of its year-end balance sheet. The requirement to recognize the funded status of a defined benefit post-retirement plan is to be applied prospectively and is effective at the end of the fiscal year 2007. The requirement to measure the plan assets and benefit obligations as of the date of the entity's year-end balance sheet is effective in fiscal 2009.

Accounting for uncertainty in income taxes

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109*. This interpretation requires that an entity recognize in the financial statements, the impact of a tax position, if that position is more likely than not to be sustained on examination by the taxing authorities, based on technical merits of the position. Tax benefits resulting from such a position should be measured as the amount that is more likely than not on a cumulative basis to be sustained on examination. FIN 48 also provides guidance on derecognition, classification, interest and penalties on income taxes and accounting in interim periods. The provisions of FIN 48 are effective beginning November 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to the November 1, 2007 opening retained earnings.

Fair Value Measurement

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements*, which offers enhanced guidance for using fair value to measure assets and liabilities. It provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. The statement specifies a hierarchy whereby the fair value with the highest priority is a quoted price in an active market. Under the statement, fair value measurements are disclosed by level within that hierarchy. The statement will require the use of bid and ask prices as appropriate, rather than closing prices, for valuing securities. In addition, the statement will require that the day-1 profits on derivatives fair valued without the benefit of observable market inputs be recognized in income rather than effectively deferred and then recognized on an appropriate basis over the life of the derivative. SFAS 157 is effective beginning November 1, 2008.

Fair value option for financial assets and liabilities

On February 15, 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Liabilities*, which provides an entity the option to report selected financial assets and liabilities at fair value. SFAS 159 is effective beginning November 1, 2008.
