Item 5 of Form F-3 filed with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934

INTRODUCTION

Canadian Imperial Bank of Commerce (CIBC) produces quarterly and annual reports, which are submitted to the U.S. Securities and Exchange Commission (SEC) under Form 6-K and Form 40-F, respectively. These reports are prepared in accordance with Canadian generally accepted accounting principles (GAAP). SEC regulations require certain additional disclosure to be included in registration statements relating to offerings of securities. This additional disclosure is contained within this document, which should be read in conjunction with CIBC's Second Quarter 2008 Report, First Quarter 2008 Report, and 2008 Annual Accountability Report; these documents were submitted to the SEC on May 29, 2008, February 28, 2008 and December 10, 2007, respectively.

When we use the term CIBC, we, our, and us, we mean Canadian Imperial Bank of Commerce and its consolidated subsidiaries.

Page 1

*Additional note to the financial statements (unaudited)***RECONCILIATION OF CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES**

CIBC's interim consolidated financial statements are prepared in accordance with Canadian GAAP. Set out below are the more significant differences which would result if United States (U.S.) GAAP were applied in the preparation of the April 30, 2008 interim consolidated financial statements.

For a full discussion of the relevant accounting differences between Canadian and U.S. GAAP, see Note 28 of the 2007 Annual Accountability Report. This note updates that disclosure for the six-month period ended April 30, 2008.

Changes in significant accounting policies affecting Canadian and U.S. GAAP differences

Accounting for uncertainty in income taxes

Effective November 1, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48

Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109 (FIN 48). This interpretation requires that an entity recognize in its financial statements, the impact of a tax position, if that position is more likely than not to be sustained on examination by the taxing authorities, based on the technical merits of the position. Tax benefits resulting from such a position should be measured as the maximum amount that is more likely than not on a cumulative basis to be sustained on examination. FIN 48 also provides guidance on derecognition, classification, interest and penalties on income taxes and accounting in interim periods. The adoption of FIN 48 did not materially impact our consolidated financial position and results of operations.

Leveraged leases

Effective November 1, 2007, we adopted FASB Staff Position FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction*. The staff position requires that a change in the estimated timing of the cash flows relating to income taxes results in a recalculation of the timing of income recognition from the leveraged lease.

The adoption of this guidance resulted in a \$66 million charge to opening retained earnings as at November 1, 2007. An amount approximating this non-cash charge will be recognized into income over the remaining lease terms using the effective interest rate method. As a result of the coterminous adoption of Canadian Institute of Chartered Accountants Emerging Issues Committee Abstract 46, *Leveraged Leases*, no incremental adjustment was required to our U.S. GAAP reconciliation.

If new information becomes available in the future causing a change in our assumptions regarding the timing and amount of income tax cash flows, we will be required to recalculate our net investment in the leases and recognize the effect in income.

Written Loan Commitments recorded at fair value through earnings

On November 5, 2007, the SEC issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value Through Earnings* (SAB 109). This guidance requires an entity to include expected net future cash flows related to the associated servicing of the loan in the measurement of its written loan commitments that are accounted for at fair value through earnings. In addition, internally developed intangible assets should not be included in the fair value of a derivative loan commitment. The impact of the application of SAB 109 on February 1, 2008 was not material to our consolidated financial position and results of operations.

Joint ventures

Investments in joint ventures other than variable interest entities are proportionately consolidated under Canadian GAAP and accounted for using the equity method under U.S. GAAP.

Leveraged loans held for sale

Leveraged loans held for sale are accounted for at lower of cost and market value under U.S. GAAP.

Future accounting changes

We are currently evaluating the impact of adopting the standards listed below:

Accounting for defined benefit pension and other post-retirement plans

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) 158, *Employers Accounting for Defined Benefit Pension Plan and Other Post-retirement Plans – an amendment of FASB Statements No. 87, 88, 106 and 132 (R)*. This statement does not change the current or future net income recognition related to post-retirement benefit plans, but requires an entity to recognize the full over-funded or under-funded status of a defined benefit post-retirement plan as an asset or liability in its balance sheet. As a result, the unamortized balances that were previously netted from the funded status are now reported as a component of accumulated other comprehensive income and the concept of an additional minimum liability no longer applies. The statement also requires an entity to measure the funded status of a plan as of the date of its year-end balance sheet. The requirement to recognize the funded status of a defined benefit post-retirement plan was previously applied prospectively as at October 31, 2007. The requirement to measure the plan assets and benefit obligations as of the date of the entity's year-end balance sheet is effective in fiscal 2009.

Fair Value Measurement

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements* (SFAS 157), which offers enhanced guidance for using fair value to measure assets and liabilities. It provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. The statement specifies a hierarchy whereby the fair value with the highest priority is a quoted price in an active market. Under the statement, fair value measurements are disclosed by level within that hierarchy. The statement will require the use of bid and ask prices as appropriate, rather than closing prices, for valuing securities. In addition, the statement will require that the day-1 profits on derivatives fair valued without the benefit of observable market inputs be recognized in income rather than effectively deferred and then recognized on an appropriate basis over the life of the derivative. SFAS 157 is effective beginning November 1, 2008, except with regard to certain non-financial assets and liabilities in which case SFAS 157 is effective beginning November 1, 2009.

Fair value option for financial assets and liabilities

On February 15, 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Liabilities* (SFAS 159), which provides an entity the option to report selected financial assets and liabilities at fair value. Under this standard, entities may irrevocably elect to report financial instruments and certain other items at fair value on a contract by contract basis with changes in value reported in earnings. SFAS 159 is effective beginning November 1, 2008.

Offsetting of amounts related to certain contracts

On April 30, 2007, the FASB issued Staff Position FIN 39-1, *Amendment of FASB Interpretation No. 39* (FSP FIN 39-1), which permits an entity to offset fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. FSP FIN 39-1 must be applied consistently and is effective November 1, 2008.

Income tax benefits of dividends on share-based payment awards

Emerging Issues Task Force Issue 06-11 *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards* (EITF 06-11) applies to the accounting for realized tax benefits on dividend payments related to certain share based payment arrangements which can be treated as a deductible compensation expense for income tax purposes.

Under EITF 06-11 a realized tax benefit on dividends or

dividend equivalents that are charged to retained earnings and paid to employees for equity-classified non-vested shares, non-vested share units or outstanding share options, should be recognized as an increase in additional paid-in capital (APIC) as those tax benefits are considered excess tax benefits under SFAS 123 (revised 2004), *Share-based Payment*. Furthermore, when an entity's estimate of forfeitures increases or actual forfeitures exceed the prior estimates, the amount of the tax benefit previously recognized in APIC should be reclassified into the income statement; however, the amount reclassified is limited to the entity's pool of excess tax benefits on the reclassification date. EITF 06-11 will apply to us effective November 1, 2008.

Accounting for non-controlling interests

In December 2007 the FASB issued SFAS 160 *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. Effective November 1, 2009 this standard will require the following retroactive changes in presentation:

- non-controlling interests will be separately presented in equity, rather than in the mezzanine section of the balance sheet; and

- consolidated net income will no longer be adjusted for the non-controlling interests, although the amount of consolidated net income attributable to the parent and to non-controlling interests must be clearly identified and presented on the statement of operations and the consolidated net income will be required to be adjusted by the portion attributable to the non-controlling interests for the purposes of calculating earnings per share.

In addition, effective November 1, 2009 this standard will require the following prospective changes in measurement:

- a loss of control of an entity that results in a deconsolidation will require a remeasurement of the fair value of the retained ownership interest in the entity with the offset recognized in the statement of operations; and

- a change in the ownership interest in an entity that is controlled both before and after the change will be treated as an equity transaction.
