**CRYPTOLOGIC ENDS 2005 WITH RECORD HIGHS IN REVENUE & EARNINGS**

*Fourth quarter: revenue up 40%, earnings up 54%, poker fees up 92%, casino fees up 20%*  
*Strategy focused on key customers, products & markets delivers high returns*

**February 16, 2006 (Toronto, ON)** CryptoLogic Inc., a leading software developer to the global Internet gaming market, announced today its financial results for the fourth quarter and year ended December 31, 2005. Record revenue and earnings, and healthy operating cash flow reflected the company's disciplined strategy and strong growth in the major casino and poker segments of the global online gaming market.

For CryptoLogic, 2005 marked a decade of innovation and consistent performance, said Lewis Rose, CryptoLogic's President and CEO. It was a milestone year of delivering the world's most innovative games to some of the world's most trusted gaming and entertainment brands. The results speak for themselves – we achieved all-time highs in revenue and earnings. CryptoLogic is among the industry growth leaders in both the Internet casino and Internet poker markets.

### **Fiscal 2005 fourth quarter highlights included:**

Record fourth quarter earnings grew to \$0.43 per diluted share (\$5.8 million), ahead of analysts' average forecast of \$0.40, and 59% above the 2004 fourth quarter of \$0.27 (\$3.8 million). This was on record revenue of \$25.1 million;

Record 2005 full year earnings grew to \$1.46 per diluted share (\$20.5 million), up 45% on a 35% increase in revenue to a record \$86.3 million;

Online poker fees derived from the company's WagerLogic licensing subsidiary rose 92% to \$7.9 million over Q4 2004, up 13% sequentially over Q3 2005. Poker software fees accounted for 32% of Q4 2005 revenue, and grew 126% to \$27.0 million in fiscal 2005 over a year ago;

The launch of a new Greek-language Internet poker site for William Hill, the UK's largest sports bookmaker, marked the first multi-language version of CryptoLogic-developed poker software;

Internet casino revenue rose 20% to \$15.5 million compared with Q4 2004, up 23% sequentially over Q3 2005. Fees from casino software represented 62% of total Q4 2005 revenue, and rose 11% to \$53.0 million in fiscal 2005 over a year ago.

2

CryptoLogic received *Gambling Online Magazine's* Top Casino Software Award; and WagerLogic was named iGaming Software Provider of the Year at the *2006 UK Gambling Awards*;

Geographic diversification remained on track with licensees' revenue from international markets exceeding 65% of total revenue, up from over 60% in 2004;

Declared the next quarterly dividend of US\$0.07 per share, payable on March 15, 2006;

In 2005, CryptoLogic repurchased and cancelled 509,700 shares at an approximate average price of US\$18.05 per share (\$9.2 million) under its Normal Course Issuer Bids; and

Subsequent to year-end, the company renewed and extended its agreement with an existing customer, ukbetting plc, Europe's largest online sports content network, exclusively for online poker to 2009 and for online casino until 2008.

### **Record Financial Performance** *(All figures are expressed in US dollars)*

CryptoLogic delivered both record revenue and earnings for the fourth quarter ended December 31, 2005. The first and fourth quarters are typically the strongest periods for Internet gaming as players tend to spend more time indoors during the winter and fall seasons. Revenue rose

Fiscal 2005 fourth quarter highlights included:

3

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

40% to \$25.1 million (Q4 2004: \$17.9 million). EBITDA<sup>(1)</sup> for the quarter grew to \$5.0 million (Q4 2004: \$4.7 million). EBITDA<sup>(1)</sup> margin for the quarter was 20% as a percentage of revenue, which takes into account certain unusual costs as described below (Q4 2004: 26%). Earnings for Q4 2005 rose 54% to \$5.8 million or \$0.43 per diluted share (Q4 2004: \$3.8 million or \$0.27 diluted share).

For the year ended December 31, 2005, CryptoLogic's revenue increased by 35% to \$86.3 million (2004: \$63.7 million). EBITDA<sup>(1)</sup> for fiscal 2005 rose by 29% to \$22.3 million (2004: \$17.3 million). This translated into EBITDA<sup>(1)</sup> margin for the year of 26% (2004: 27%), which also takes into account the unusual costs as described below. Earnings for the full year improved by 50% to \$20.5 million or \$1.46 per diluted share (2004: \$13.7 million or \$1.01 per diluted share).

Fourth quarter revenue reflected strong organic growth from existing customers in both Internet casino and poker. The immediate popularity of the company's new Bejeweled and Marvel-themed casino games, coupled with increasing player volumes and growth in popularity of the company's Internet poker licensees have contributed to record top line performance in these core game segments.

### **Investment Strategy and Direction**

CryptoLogic's \$12.5 million investment program to enhance its software and systems, launched in Q3 2004, is now complete. Over the past six quarters, \$7.8 million were operating costs and \$4.7 million were capital expenditures (comprising \$3.2 million for the purchase of capital assets and \$1.5 million in capitalized software development related to the investment program).

As a result, CryptoLogic remains at the forefront of bringing the latest product innovation and entertainment concepts to its Internet gaming software, as evidenced by significant revenue growth and industry awards. During Q4 2005, the company decided to outsource certain projects to enhance ongoing operating efficiencies. This approach combines the strengths of in-house technical expertise with industry-leading external resources to continue to introduce new games to market faster, and led to the consolidation and streamlining of certain development groups to optimize efficiency and use of resources. These decisions resulted in \$3.3 million of costs, which included staff reduction expenses, and were largely offset by two unrelated items.

---

3

The following unusual factors contributed to the company's Q4 2005 financial results, and collectively had a negative net effect on earnings of approximately \$0.8 million:

\$0.8 million in chargeback recovery given the company's continued improvement in fraud control experience, which added to revenue;

\$3.3 million of costs associated with the expensing of capitalized software development and severances; and

\$1.7 million of tax recovery primarily resulting from tax benefits derived from previously unrecognized tax losses.

Going forward, CryptoLogic's investment in its business will remain proportionate to the company's growth, revenue generation and market potential. Capital investments are expected to be in the range of 10% to 15% as a percentage of revenue to enhance the company's position in a competitive and growing marketplace. These investments will be aimed at normal course capital replacement; initiatives to strengthen its game platform, infrastructure and business intelligence and support tools; and to meet evolving regulatory requirements. CryptoLogic's commitment to investing in innovative gaming software and solutions continues to drive increasing near and long term returns.

### **Balance Sheet Strength**

CryptoLogic continued to add to its financial strength. At December 31, 2005, the company had no debt, and total cash grew to \$99.1 million or a cash value of \$7.05 per diluted share (comprising cash and cash equivalents, short term investments, and including security deposits of \$1.5 million). Working capital grew to \$73.6 million or \$5.23 per diluted share.

Operating cash flow for the fourth quarter of 2005 grew to \$11.3 million (Q4 2004: \$9.0 million). For fiscal 2005, operating cash flow rose significantly to \$34.7 million (2004: \$18.9 million). The year-over-year increase related primarily to higher earnings and a significant reduction

Fiscal 2005 fourth quarter highlights included:

4

in security deposit requirements with payment processors.

#### **Quarterly Dividend**

On February 14, 2006, the Board declared the company's quarterly dividend of US\$0.07 per share, payable on March 15, 2006 to shareholders of record as at March 8, 2006.

#### **Geographic Diversification in Key Markets**

CryptoLogic continues to benefit from a geographically diversified business in the key markets for Internet gaming. In 2005, more than 65% of licensees' revenue was derived from international players, up from over 60% a year ago. The UK and Continental Europe remain the largest markets, together accounting for more than 60% of licensees' overall revenue.

CryptoLogic continues to grow its business with the world's major international gaming brands. In January 2006, announced just after the end of the fourth quarter, ukbetting plc Europe's largest online sports content network, with 8.75 million UK and European users each month renewed and extended its multi-year contract with WagerLogic. ukbetting will continue to use WagerLogic's Internet poker solution exclusively through to 2009, and WagerLogic's casino software until 2008 for both its premier betting brands, [www.ukbetting.com](http://www.ukbetting.com) and [www.totalbet.com](http://www.totalbet.com).

#### **Product Innovation in Key Game Segments**

CryptoLogic's focus on delivering an ever-expanding and innovative Internet game portfolio continues to drive strong performance in both its casino and poker software businesses.

Internet casino remains the largest revenue contributor for CryptoLogic, accounting for 62% of Q4 2005 revenue. Online casino fees grew 20% to \$15.5 million (Q4 2004: \$12.9 million), up 23% over Q3 2005. For fiscal 2005, casino revenue rose 11% to \$53.0 million (2004: \$47.9 million).

CryptoLogic's product strategy of affiliating with the world's premier consumer brands is delivering excellent returns. The company's recently released online slot version of Bejeweled, the very popular, gem-matching game, and games featuring the legendary Marvel Super Heroes contributed to more than 10% of licensees' casino revenue for December 2005.

During the quarter, CryptoLogic introduced its first European language poker software offering a new Greek-language poker site for William Hill. This latest offering leverages CryptoLogic's decade of experience in delivering multi-language, multi-currency software that enable leading gaming operators to localize their online offerings for worldwide appeal.

The central online poker room shared by the company's licensees continued to experience significant growth and attract increasing player traffic, driven by ongoing enhancements to the wide range of games, stakes and tournament opportunities offered through CryptoLogic-developed poker software. As a result, fees earned from Internet poker rose 92% to \$7.9 million (Q4 2004: \$4.1 million), up 13% sequentially over Q3 2005. Online poker fees accounted for 32% of total Q4 2005 revenue, rising 126% to \$27.0 million in fiscal 2005 (2004: \$12.0 million).

#### **Outlook**

By executing a disciplined strategy that targets key customers, product segments and markets, CryptoLogic has achieved record revenue and earnings, and consistent cash generation even in the fast-evolving and increasingly competitive Internet gaming industry. The company expects its positive momentum to continue into 2006. Revenue in the first quarter is forecasted to range from \$25.1-\$25.5 million, with earnings of \$6.7-\$6.9 million or \$0.49-\$0.50 per diluted share.

CryptoLogic's growth plan remains principally focused on driving significant organic growth from its existing customers, while targeting selected new customers that meet the clear criteria of brand strength, established player bases and marketing resources and commitment. Although no new customers were added in 2005, the company renewed and strengthened existing customer relationships. CryptoLogic will continue its strategy of innovation by developing and delivering market-responsive games and concepts in both casino and poker to help customers attract players and retain their loyalty in today's increasingly demanding and sophisticated market.

**2005 Fourth Quarter and Year End Analyst Call**

A conference call is scheduled for 8:30 a.m. (EST) (1:30 p.m. GMT) on Thursday, February 16, 2006. Interested parties should call either 416-695-6622, 1-877-888-3855 (North America) or international toll free number at (Country Code) 800-4222-8835. Instant replay will be available until February 23, 2006 by calling 416-695-5275 or 1-888-509-0081.

**About CryptoLogic® (www.cryptologic.com)**

Focused on integrity and innovation, CryptoLogic Inc. is a world leading, blue-chip public developer and supplier of Internet gaming software. Its leadership in regulatory compliance makes it one of the very few companies with gaming software that is certified to strict standards similar to land-based gaming. WagerLogic Limited, a wholly-owned subsidiary of CryptoLogic, is responsible for the licensing of its gaming software and services to customers worldwide. For information on WagerLogic®, visit www.wagerlogic.com.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**As at December 31, 2005**

*(All figures are in thousands of US dollars, except per share disclosure and where otherwise indicated)  
(Unaudited)*

These consolidated interim financial statements of CryptoLogic Inc. (the Company) have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) using the same accounting policies as were used for the audited consolidated financial statements for the year ended December 31, 2004. These interim consolidated financial statements do not contain all annual disclosures required by GAAP and, as such, should be read in conjunction with the audited consolidated financial statements including the notes thereto for the year ended December 31, 2004, as set out in the 2004 Annual Report.

**1. Stock Option Plan**

In accordance with the guidelines of the Canadian Institute of Chartered Accountants, the Company has expensed the costs of all stock option grants issued on or after January 1, 2003. The fair value of the options granted in 2004 and 2005 was made using the Black-Scholes option pricing model using the following weighted assumptions:

	<u>2005</u>	<u>2004</u>
Dividend yield	0.75%	0.75%
Risk-free rate	3.25%	2.75%
Expected volatility	50.0%	50.0%
Expected life of options in years	5.0	5.0

The estimated fair value of options is recorded over the vesting period of the options. The cost of stock options of \$522 in Q4 2005 (Q4 2004: \$337) and \$1,807 in 2005 (2004: \$1,200) are included in operating costs with a corresponding addition to Stock Options in Shareholders' Equity. The Stock Options account is reduced as options are exercised with an entry to Share Capital totaling \$33 in Q4 2005 (Q4 2004: \$47) and \$758 in 2005 (2004: \$524). Consideration paid by employees on the exercise of stock options is recorded as share capital.

Had compensation expense been determined based on the fair value of the employee stock option awards for 2002 grants at the grant dates in accordance with the new recommendations, the Company's net earnings and earnings per share would have been changed to the following pro forma amounts:
