Glencairn Gold Corporation

Management's Discussion and Analysis

For the three and nine months ended September 30, 2007

The following discussion and analysis should be read in conjunction with the Company's unaudited interim consolidated financial statements and related notes thereto for the three and nine month periods ended September 30, 2007, which have been prepared in United States dollars and in accordance with Canadian generally accepted accounting principles for interim financial statements. The reader should also refer to the Annual Information Form, audited consolidated financial statements and Management's Discussion and Analysis for the years ended December 31, 2006 and 2005. This Management's Discussion and Analysis has been prepared as of November 7, 2007. All dollar amounts are US dollars unless otherwise indicated.

Overview

SIGNATURE

Edgar Filing: Glencairn Gold CORP - Form 6-K

Glencairn Gold Corporation (Glencairn or the Company) is a gold producer with mining and exploration activities focused in Nicaragua. The Company currently operates the Limon Mine and plans to convert the Libertad Mine from a heap leach to a conventional milling operation. Both properties are located in Nicaragua. The Company also holds an option to acquire a 100% interest in the Mestiza gold property which is located 70 kilometers from the Limon Mine. Glencairn's growth strategy is focused on optimizing current operations and expanding mineral reserves at existing mines.

On March 31, 2007, mining operations at the Libertad Mine were suspended due to low recoveries while the Company implements a project to convert the heap-leach refining process to a conventional milling operation. The Company has made payments totalling \$4,899,000 towards the purchase of a used mill facility. As at September 30, 2007 consultant fees and other costs of \$995,000 have been spent by the Company as it progresses towards completing a feasibility study and building a conventional mill at the Libertad Mine. The Company expects the final feasibility study to be completed in the first quarter of 2008.

On July 25, 2007, mining operations at the Bellavista Mine were suspended due to ground movements in the heap leach pad at the site. After initial review by consultants, the Company believes that these movements were in part caused by water saturation due to abnormally high rain fall during the past several years. Extensive ground monitoring and a number of remedial measures were undertaken to reduce ground movements including de-watering wells and surface water control. The Company implemented measures to rinse the cyanide used in the heap leach processing on the site. Sampling of solution discharge from the leach pad as well as solid sampling of the leach pad has confirmed that cyanide concentrations have been lowered to acceptable discharge levels and pose no threat to the environment. On October 24, 2007, the Company announced that a localized landslide resulting from the ground movement and continuing heavy rains caused significant damage to the structure of its ADR recovery plant. As a result of the proactive measures taken, there was no release of cyanide into the environment. Until the ground becomes stabilized and the rainy season ends, localized slides are not unexpected. The Company does not perceive that there is any risk of further damage to any existing facilities including the grinding mill, which is located in another area of the site, as a result of ground movement.

The suspension of mining operations at the Bellavista Mine in July 2007 caused an immediate and serious negative effect on the cash flow of the Company and, accordingly, Glencairn initiated an aggressive program to conserve cash. This program included the immediate cessation of all discretionary spending, including the Company's exploration program, staff reductions and deferring or eliminating, where possible, capital expenditures.

In the third quarter of 2007, the magnitude of the ground movement problem at the Bellavista Mine, coupled with the lack of an economically feasible solution has resulted in a write-down in the carrying

2

value of the assets at the mine site to their estimated fair value. A charge of \$53,797,000 has been recorded and includes write-downs of \$9,118,000 on product inventory, \$1,167,000 on supplies inventories, and \$43,512,000 on property, plant and equipment. It is not likely that the mine will reopen. As a result, management intends to start remediation of the site during 2008 and expects the remediation project to last for at least four years. The costs for this project have been revised to \$7,520,000 due to accelerated timing and the current state of the property.

4

Edgar Filing: Glencairn Gold CORP - Form 6-K

On October 1, 2007, Glencairn entered into a letter of intent with Bellhaven Copper & Gold, Inc. to sell its 60% interest in the Cerro Quema advanced development project located in Panama for an aggregate consideration of \$6,000,000, paid or payable as follows: (i) an initial payment of \$100,000 upon entering into the letter of intent; (ii) \$400,000 at closing of the transaction on October 31, 2007; (iii) \$2,500,000 within 30 days of the closing; (iv) \$1,000,000 on June 30, 2008; and (v) \$2,000,000 on December 31, 2008. As the Company decided to focus on its properties in Nicaragua, it determined Cerro Quema was a non-core asset and therefore sold the property.

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000. A syndicate of underwriters, purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010. The proceeds from the sale of the subscription receipts will be held in escrow for the Company pending receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants underlying the subscription receipts. A shareholders meeting is scheduled to take place on November 29, 2007. Upon satisfaction of such conditions, each subscription receipt will be automatically converted into one unit (without any further action by the holders thereof, including payment of additional consideration). If approval is not obtained by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

While the Company expects the subscription receipts will be released from escrow upon receipt of shareholder approval, there can be no assurance that this will occur. The solvency of the Company is dependent on the net proceeds of this financing for development of the Libertad Mine, resumption of exploration activities at the Company's mineral properties, and for general working capital purposes.

* These gold ounces were produced and sold in the pre-commercial production period from the Santa Pancha deposit and are not included in sales figures as disclosed in this Management's Discussion and Analysis and in the Consolidated Financial Statements.

Sales from the Limon Mine decreased marginally by \$19,000 in the third quarter of 2007 compared to 2006. The decrease in sales revenue was attributable to the 10% decrease in gold ounces sold. Lower ounces were sold because less tonnes were being mined due to production delays as a result of mechanical problems. The effect of the decline in ounces was offset in part by the 11% increase in average realized gold prices compared to the same period in the previous year.

Edgar Filing: Glencairn Gold CORP - Form 6-K

Cost of sales increased by \$1,117,000 or 29% and cash operating costs per ounce increased by \$197 to \$644 in the third quarter of 2007 compared to 2006. Lower gold production along with higher production costs such as salaries, fuel, and especially electricity resulted in higher cash cost per ounce during the quarter.

Royalties and production taxes decreased \$45,000 or 13%, which reflects the decrease in ounces produced and sold. Depreciation and depletion decreased by \$17,000 or 5% due to lower capital investment and lower production when compared to the same period in the previous fiscal year.

	\$ 16,120	\$ 12,976	\$ 3,144	24%
Income from mining operations	\$ 2,062	\$ 2,575	\$ (513)	(20%)

* These gold ounces were produced and sold in the pre-commercial production period from the Santa Pancha deposit and are not included in sales figures as disclosed in this Management's Discussion and Analysis and in the Consolidated Financial Statements.

Sales from the Limon Mine increased by \$2,631,000 or 17% in the nine months ended September 30, 2007 compared to 2006. The higher gold production was from the higher ore grades mined in the Santa Pancha area of the Limon Mine. This was marginally offset by the lower recoveries. The market strength for gold resulted in an 11% increase in the average realized gold price per ounce which contributed to the

SIGNATURE

7

Edgar Filing: Glencairn Gold CORP - Form 6-K

increase in sales revenue.

Cost of sales increased by \$2,870,000 or 26% and cash operating costs per ounce increased by \$85 to \$511 in 2007. The increased cost of sales was attributed to generally higher production costs, especially salaries, fuel, and electricity costs. Royalties and production taxes increased by 16% as gold ounces produced and sold increased over the same period in the previous fiscal year.

In the first quarter of 2007, the Company's Santa Pancha deposit at the Limon Mine entered into commercial production. As such, all subsequent gold ounces sold from the deposit are being recognized in revenue. Additionally, the capitalized cost of the deposit is now being depreciated over ounces produced thereby increasing depreciation and depletion expenses by 12% in the nine months ended September 30, 2007.

On July 25, 2007, Glencairn suspended all mining activities at the Bellavista Mine due to ground movements in the heap leach pad. Residual gold ounces were recovered from the heap leach up until the end of August 2007, at which point all activities were ceased. Sales from the

SIGNATURE

8

Edgar Filing: Glencairn Gold CORP - Form 6-K

Bellavista Mine decreased \$2,388,000 or 46% compared to the same quarter in the previous fiscal period. The mine sold 4,264 less ounces than in the comparable period in 2006.

The lack of mining activity and decrease in ounces produced resulted in a decrease in cost of sales of \$1,603,000 or 53% as well as a corresponding decrease in cash operating costs per ounce of \$13 to \$350 in 2007. As costs pertaining to production declined in the third quarter of 2007, the mine began incurring care and maintenance costs for activities related to the upkeep of the mine and expenditures relating to the investigation of the ground movement and rinsing of the heap leach pads. These costs have been classified as care and maintenance expenses and are not reflected in the above figures.

The ounces sold in the third quarter of 2007 declined 51%, which correlated with a decline of 59% in royalties and production taxes. Depreciation and depletion charges also declined due to the decrease in ounces produced and sold and less capital investment when compared to the same period in 2006.

As a result of the cessation of mining activities during the quarter and the unlikelihood of the mine reopening, a write-down of \$43,512,000 was recognized on property, plant and equipment. Product and supplies inventories were also written-down by \$9,118,000 and \$1,167,000, respectively. Product inventory consisted of the cost of the gold on the heap leach pad which is no longer recoverable due to cessation of operations.

Edgar Filing: Glencairn Gold CORP - Form 6-K

	\$ 13,937	\$ 13,896	\$ 41	0%
Income from mining operations	\$ 1,202	\$ 5,000	\$ (3,798)	(76%)

On July 25, 2007, Glencairn suspended all mining activities at the Bellavista Mine due to ground movements. Residual gold ounces were recovered from the heap leach up until the end of August 2007, at which point all activities were ceased. As such, only residual gold ounces were recovered from the heap leach during the third quarter of 2007 thereby decreasing the nine month comparative figure with the previous fiscal year.

Sales from the Bellavista Mine decreased by \$3,757,000 or 20% in the nine months ended September 30, 2007 compared to 2006. Even though the average realized gold price in 2007 was \$68 per ounce, or 12%, higher than in 2006, the mine sold 9,004 ounces less than in the comparable period of 2006. The decrease in ounces sold was mainly attributable to the suspension of mining activities in July 2007.

Cost of sales decreased by \$690,000 or 7% and cash operating costs per ounce increased by \$88 to \$388 in 2007. The effect of lower sales volumes and the fixed nature of many production costs resulted in a higher than expected cost of sales. Additionally, production delays due to heavy rains and plugged collection tubes in the second quarter of 2007 contributed to higher costs for the nine month period. The increase in cash operating costs per ounce of 29% over the same period in the previous fiscal period was a result of the significant decrease in gold ounces sold resulting from the shut-down of mining activities since the beginning of the third quarter of 2007. Management intends to start remediation of the site during 2008 and expects the remediation project to last for at least four years. The costs for this project have been revised to \$7,520,000 due to accelerated timing and the current state of the property.

As ounces sold in the nine months ended September 30, 2007 declined 28%, a reduction of 32% was reflected in royalties and production taxes. Although ounces of gold produced declined in the nine months ended September 30, 2007, the depreciation base increased due to the milling circuit reaching commercial production in the first half of 2007. This resulted in an increase in depreciation and depletion expenses of \$553,000 or 14%.

As a result of the cessation of mining activities during the third quarter and the unlikelihood of the mine reopening, a write-down of \$43,512,000 was recognized on property, plant and equipment. Product and supplies inventories were also written-down by \$9,118,000 and \$1,167,000, respectively.

Glencairn acquired the Libertad Mine in July of 2006. Since that time, Glencairn decreased the cost of gold production significantly, but not by an amount to make the operation profitable. The Company suspended operations on March 31, 2007. Since that time, only residual gold ounces were being recovered from the heap leach pads. Production will cease completely in the fourth quarter of 2007.

The decline in cost of sales, royalties and production taxes, and depreciation and depletion is correlated with the decline in sales revenue.

The Company undertook an independent valuation of the Libertad and Cerro Quema assets acquired in July 2006 and the final report received during the third quarter of 2007 from this work has resulted in final values being allocated to tangible assets and liabilities.

**The comparative information presented for 2006 only contains data for the period July 6, 2006 to September 30, 2006, after Glencairn took over ownership of the mine.*

Glencairn acquired the Libertad Mine in July of 2006. The site sold 12,146 ounces during the first quarter but at high cash operating costs. Management suspended operations on March 31, 2007 while the Company started a project to convert the site to a conventional milling circuit. Subsequent recoveries of gold ounces were from residual heap leaching. Gold production and revenue will cease during the fourth quarter of 2007.

The Company undertook an independent valuation of the Libertad and Cerro Quema assets acquired in July 2006 and the final report received during the third quarter of 2007 from this work has resulted in changes to the value allocated to tangible assets and liabilities.

Edgar Filing: Glencairn Gold CORP - Form 6-K

Care and maintenance	2,287	-	2,287	-%
Stock options	270	803	(533)	(66%)
Exploration	584	137	447	326%
Other (income) expense	858	243	615	253%
Non-controlling interest	(8)	-	(8)	-%
	\$ 59,623	\$ 2,301	\$ 57,322	2,491%

General and administrative expenses increased \$717,000 or 64% over the same period in the previous year and includes \$641,000 spent in the third quarter of 2007 on engineering costs, consulting fees and other expenditures related to the Libertad Mine mill project. Engineering and administrative costs relating to this project will be expensed until a positive final feasibility study is available for this project. The increases of the Libertad mill expenditures were partially offset by a \$109,000 reduction in salaries and benefits. This was a direct result of a program of cost-cutting implemented in the third quarter of 2007.

Glencairn identified a ground movement problem in the heap leach pad occurring at its Bellavista Mine during the third quarter of 2007. Since that time, mining activities were suspended while management brought in third-party consultants to evaluate and assess the viability of a cost feasible solution. On September 30, 2007, property, plant and equipment at the Bellavista Mine were written-down to their estimated recoverable values due to the ongoing uncertainty of the mine resuming operations in the foreseeable future. A write-down of \$43,512,000 was recorded against property, plant and equipment. The carrying value after the write-down reflects management's best estimate of the residual value of the mining property. In addition, product and supplies inventories were written-down by \$9,118,000 and \$1,167,000, respectively.

Care and maintenance costs of \$631,000 incurred at the Libertad Mine were incurred to maintain a proper state of upkeep while mining operations were suspended. These costs primarily relate to the maintenance of a basic administrative function as well as expenditures on electricity, property holding costs, and caretaking activities. Also included in care in maintenance were costs of \$1,656,000 not directly related to the production of gold at the Bellavista Mine.

Stock options expense decreased by \$533,000 or 66% over the same period in the previous fiscal year. During the third quarter of 2007, 150,000 options were granted. Glencairn amended its vesting policy in the third quarter of 2006 whereby options would vest over an 18 month period. Previous to the third quarter of 2006, options vested on the grant date. Total stock-based compensation amounted to \$270,000 as a result of vesting options.

In the third quarter of 2007, exploration expenses were \$584,000. These costs relate mainly to work being performed on the feasibility study for the Libertad Mill project. In late 2005, all Nicaraguan exploration activities were suspended for an indefinite period after a three-week labour disruption at the Limon operations. The exploration program resumed in the third quarter of 2006 after the acquisition of the Libertad Mine, and the Cerro Quema and Mestiza properties in the third quarter of 2006.

Edgar Filing: Glencairn Gold CORP - Form 6-K

In the third quarter of 2007 the Company made a decision to dispose of all non-core assets and liquidated a significant portion of its marketable security holdings. A gain of \$829,000 was recognized, for proceeds of \$1,223,000, on the disposition of the securities. These gains on the sale of marketable securities were included in other income.

Other components of income and other expenses included: interest and other miscellaneous gains of \$136,000; \$1,104,000 in losses from the settlement of various litigation matters, most notably the Blue Hill litigation. In August 2007, the Company reached a final settlement of litigation in both the State of Maine and in Ontario regarding remediation of the Blue Hill site in Maine. The Company has expensed an amount of \$1,000,000 relating to this settlement. The Company has also recorded a provision of \$847,000 related to uncollectible tax receivables.

Non-controlling interest represents 40% of Cerro Quema owned by a minority interest.

Nine months ended September 30, 2007

	Nine months ended September 30			%

Non-controlling interest	(91)	-	(91)	-%
	\$ 57,918	\$ 4,316	\$ 53,602	1,242%

General and administrative expense increased by \$1,406,000 or 43% over the same period in the previous fiscal year. Of this increase, \$995,000 was spent in 2007 on engineering, consulting and other expenditures related to the assessment and preparation of a scoping and feasibility study for a conventional milling circuit at the Libertad Mine. Management's active cost control plans resulted in decreases to salaries and benefits, legal fees, investor relations expenditures, and travel costs totaling approximately \$575,000.

Stock options expense decreased by \$84,000 over the same period in the previous fiscal year. As part of Glencairn's compensation program, stock options are granted to employees and directors from time-to-time. During the nine months ended September 30, 2007, a total of 3,931,000 stock options were granted and the Company recognized an expense of \$933,000 using the Black-Scholes option pricing model.

Exploration expense increased by \$1,524,000 in 2007 compared with 2006. Nicaraguan exploration activities were suspended from November 2005 to August 2006. In July of 2006, the Company acquired the Libertad Mine and Cerro Quema property and closed a financing that provided the funds to resume exploration work on the properties. Exploration work in the first half of 2007 consisted mainly of drilling at Libertad, exploration drilling and trenching at Limon and Mestiza, and ongoing holding costs. Exploration activities during the third quarter of 2007 were necessary to support the Libertad Mill feasibility report. The balance in 2006 consisted mainly of land holding costs.

Edgar Filing: Glencairn Gold CORP - Form 6-K

Other income totalled \$6,189,000 in 2007, an increase of \$6,002,000 from 2006. The Company earned interest and other gains totalling \$615,000. Glencairn sold marketable securities during the first nine months of 2007 resulting in a gain of \$960,000. During the second quarter, the Company recorded a combined gain of \$6,548,000 from the receipt of 2,500,000 Independent Nickel Corp. shares valued at Cdn\$0.79 per share and cash of \$4,694,000 (Cdn\$5,000,000) related to the sale of Glencairn's sliding

12

scale 1-3% net smelter royalty on Victory Nickel Inc.'s Minago nickel deposit, as well as the 2% net smelter royalty on the Lynn Lake property, both located in Manitoba. The Company incurred interest charges of \$313,000 on a long-term debt which was fully repaid on June 30, 2007. The Company recorded \$1,104,000 related to the settlement of the Blue Hill litigation in Maine and other smaller lawsuits stemming from the Nicaraguan operations. The Company has also recorded a provision of \$847,000 related to uncollectible tax receivables.

Non-controlling interest represents 40% of Cerro Quema owned by a minority interest.

Cash Flows

Three months ended September 30, 2007

Operating activities used \$4,598,000 in 2007, compared to \$2,978,000 in 2006. Since the Libertad Mine ceased mining operations earlier in the year, only 1,454 ounces of gold were sold from the continued leaching in the third quarter. Expenditures were incurred at the Libertad Mine with respect to consulting and engineering costs related to the mill project and care and maintenance costs being incurred since the temporary cessation of mining activities. The Company's Bellavista Mine also ceased operations during the quarter, selling 4,136 ounces gold from the residual leaching process. Amounts totalling \$543,000 were expended on consulting and engineering costs to assess the ground movement situation during the third quarter. Since the cessation of mining operations on July 25, 2007, the mine started incurring care and maintenance costs. In August 2007, the Company settled the outstanding Blue Hill litigation for \$1,000,000 and made an initial payment of \$500,000 during the quarter and the final \$500,000 was paid at the end of October 2007.

Glencairn extinguished its long-term debt obligation at June 30, 2007. Additionally, there were no exercises of stock options into common shares during the third quarter of 2007. Financing activities were nil for the quarter.

Investing activities consisted of \$1,223,000 in proceeds from the sale of marketable securities in the third quarter in 2007. Acquisitions for property, plant and equipment used \$2,592,000. The Limon Mine, Bellavista Mine, and Libertad Mine acquired assets totalling \$460,000, \$213,000 and \$1,632,000, respectively. The Mestiza acquisition totalled \$300,000 less minor dispositions. In the comparative period in 2006, investing activities utilized cash of \$2,209,000. Of this balance, \$283,000 was attributable to payments for the Mestiza property. The remaining balance consisted mainly of capitalized expenditures for the Bellavista Mine's grinding mill.

SIGNATURE

15

Nine months ended September 30, 2007

Operating activities used \$880,000 for the nine months ended September 30, 2007, compared to cash inflows of \$1,107,000 in the same period in 2006. Operating cash flows decreased as mining costs increased in 2007, however, this was mitigated by an increase in the average realized selling price for gold increasing to \$663 in 2007 from \$597 in 2006. Cash outflows also included care and maintenance charges at the two non-operating mines totaling \$3,052,000. The Libertad Mine mill project also resulted in cash payments totalling \$995,000 in non-capital expenditures. In August 2007, the Company settled the outstanding Blue Hill litigation for \$1,000,000 and made an initial payment of \$500,000 during the quarter.

In 2007, financing activities used \$2,185,000. This consisted of \$2,500,000 expended on the repayment of a long-term debt which was partially offset by \$315,000 received on the issuance of common shares. For the comparative period in 2006, Glencairn repaid \$2,500,000 of the long-term debt and received \$16,158,000 on the issuance of common shares.

13

Investing activities used \$2,434,000 in 2007. Investments in property, plant, and equipment totalled \$8,291,000. The Limon Mine, Bellavista Mine, and Libertad Mine acquired assets totalling \$1,741,000, \$1,589,000 and \$4,667,000, respectively. Of the Libertad Mine expenditures, \$4,899,000 was from payments for a used mill which is expected to be installed at the Libertad Mine in 2008. The Mestiza acquisition consisted of an option payment of \$300,000 towards the purchase of the property. The Company received \$4,694,000 in proceeds from the sale of Manitoba nickel royalties. Additionally, the Company sold marketable securities which generated net proceeds of \$1,406,000. In early 2007, the Company had its Costa Rican bank accounts seized, which stemmed from the loss of an arbitration case. These bank accounts are currently unavailable for operations and have cash balances of approximately \$243,000. In the comparative period in 2006, purchases and deferred costs relating to property, plant, and equipment were made in amounts totaling \$1,390,000, \$5,411,000, and \$125,000 for the Limon Mine, Bellavista Mine, and Libertad Mine, respectively. Option payments of \$230,000 were made towards the acquisition of the Mestiza property in the first nine months of 2006.

Liquidity and Capital Resources

The Company had cash of \$4,068,000 (December 31, 2006 - \$9,567,000) and working capital deficit of \$2,576,000 at September 30, 2007 (December 31, 2006 - \$13,634,000).

In February 2007, the Company announced its conversion/expansion program to install a conventional milling circuit at the Libertad Mine. A feasibility study is expected in the first quarter of 2008. At September 30, 2007, the Company has made payments totalling \$4,899,000 on the acquisition of a used mill which will be re-assembled at the Libertad site. Additional amounts of \$1,672,000 were paid to November 7, 2007. Future payments of \$3,024,000, which includes costs of dismantling, shipping and principal component refurbishing, are committed for the used mill acquisition. Engineering and consultant fees to September 30, 2007 have totalled \$995,000 for this project. The Libertad Mine was placed in care and maintenance mode at the beginning of the second quarter of 2007 and has incurred expenses of \$1,396,000 for the nine month period ended September 30, 2007. Gold sales from the Libertad Mine were only 15,747 ounces for the period as a result of the cessation of mining activities on March 31, 2007. Only residual ounces will be recovered from the heap leach operation.

SIGNATURE

16

Edgar Filing: Glencairn Gold CORP - Form 6-K

On July 25, 2007, Glencairn suspended mining operations at the Bellavista Mine in Costa Rica due to ground movements in the heap leach pad. After initial review by a number of external consultants, the Company believed that this movement was in part caused by water saturation due to abnormally high rain fall during the past several years. The results of engineering and consulting studies for a cost feasible solution have been ongoing and inconclusive. It is not likely the mine will resume operations in the foreseeable future. For the nine month period in 2007, 22,996 ounces of gold have been sold from the Bellavista Mine. As the residual heap leach operation ended August 31, 2007, there will not be any future gold production. Ongoing care and maintenance costs will be incurred. Reclamation activities for the site are anticipated to begin in 2008 and are estimated to take four years. Total undiscounted expenditures are expected to be approximately \$7,520,000 over the next four years.

In June 2007, the Company closed an agreement with Independent Nickel Corp. (INI) to sell its sliding scale 1% - 3% net smelter return royalty (NSR) on Victory Nickel Inc. 's Minago nickel deposit, as well as the 2% NSR on the Lynn Lake property, both located in northern Manitoba, to INI. Under the terms of the purchase agreement, INI paid Cdn\$5,000,000 in cash and issued 2,500,000 INI shares to Glencairn, in exchange for the two royalties. The shares are subject to a contractual escrow agreement and will be released on a graduated basis over two years.

During the first three quarters of 2007, and especially during the third quarter, Glencairn liquidated various holdings in marketable securities. Total proceeds of \$1,406,000 were received in the disposition of shares. The remaining securities at September 30, 2007 have a market value of \$1,916,000. Of this balance, 2,000,000 shares of Independent Nickel Corp. were subject to a contractual escrow agreement

14

with the release of blocks of shares in intervals up to June 2009. In addition, 4,000,000 shares of Carlisle Goldfields Limited are also subject to a regulatory escrow agreement with the release of blocks of shares in intervals up to July 2008.

As a result of two of Glencairn 's three mines being placed in care and maintenance, there have been significant declines in gold production for the combined Company. In response to the situation, the Company has temporarily restricted exploration activities, reduced the number of employees, cut capital expenditure programs and eliminated discretionary expenditures. Cash on hand at September 30, 2007 and cash flows expected from operations, the sale of its Cerro Quema gold property and the cash proceeds received on the October 22, 2007 financing closing would not be sufficient to fund the Company 's ongoing and future expansion needs for the next twelve months if disinterested shareholder approval is not obtained on November 29, 2007.

On September 28, 2007, the Company entered into a letter of intent with Bellhaven Copper & Gold, Inc. to sell its interest in the Cerro Quema advanced development project located in Panama for aggregate consideration of \$6,000,000, payable as follows: (i) an initial payment of \$100,000 upon entering into the letter of intent; (ii) \$400,000 paid at closing of the transaction; (iii) \$2,500,000 within 30 days of the closing; (iv) \$1,000,000 on June 30, 2008; and (v) \$2,000,000 on December 31, 2008. This sale closed on October 31, 2007.

On October 22, 2007 the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000. A syndicate of underwriters, purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010.

SIGNATURE

17

Edgar Filing: Glencairn Gold CORP - Form 6-K

The proceeds from the sale of the subscription receipts will be held in escrow pending satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts. Upon satisfaction of such conditions, each subscription receipt will be automatically converted into one unit (without any further action by the holders thereof, including payment of additional consideration). If such conditions are not satisfied by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

The net proceeds from the sale of the non-core Cerro Quema property and the financing will be used by the Company for development of the Libertad Mine, resumption of an exploration program on the Company's mineral properties, and for general working capital purposes.

The company does not have any off balance sheet arrangements.

Related Party Transactions

During September 2007, 500,000 shares of Independent Nickel Corp. (INI) were sold to a company owned by the Chairman of Glencairn at the time of the transaction. These escrowed shares were sold at market value. A gain of \$171,000 was recognized for the transaction and \$213,000 in proceeds were received. This gain on sale of marketable securities is included in other income.

Outlook

Gold sales in 2007 are expected to be approximately 75,000 ounces at a cash operating cost of approximately \$500 per ounce. The decrease from an earlier production estimate of 90,000 to 105,000 ounces is attributable to the suspension of operations at the Bellavista Mine on July 25, 2007. Many

15

production inputs, such as fuel and hydro have been increasing over the past few years but gold prices have increased significantly more and are predicted by many analysts to increase beyond current levels.

The Company temporarily suspended mining operations at the Libertad Mine effective March 31, 2007, until such time as a conventional mill circuit is commissioned. In July 2007, Glencairn exercised an option agreement with a third-party vendor to purchase a previously owned and operated mill. The Company has made payments of \$6,571,000 to date towards the purchase of this mill, of which, \$1,672,000 was paid in October 2007. Additional future payments of \$3,024,000, which includes costs of dismantling, shipping and principal component refurbishing, are committed for the used mill acquisition. It is expected that the total cost of the project including the feasibility study will be between \$25 and

SIGNATURE

18

Edgar Filing: Glencairn Gold CORP - Form 6-K

\$30 million dollars however final numbers will only be known once the feasibility study is completed. In opting to refurbish an existing mill as opposed to acquiring a new one, the Company is optimistic that the Libertad Mine can be returned to full production in a shorter time frame and at a lower capital cost. A mill operation is expected to result in higher recovery rates and lower costs per ounce compared to heap leaching. Dismantling of the mill from its current site is expected to be completed early in the fourth quarter and re-assembly in Libertad would be done, expected in 2008. Completion of the Libertad mill plan is dependent on completion of the announced financing and permits being obtained on a timely basis.

The Company suspended mining operations at the Bellavista Mine on July 25, 2007, due to ground movements in the heap leach pad, which were believed to be in part caused by water saturation due to abnormally high rainfall during the past several years. Extensive ground monitoring was undertaken along with rinsing of the cyanide solution from the heap leach pad. Sampling of solution discharge from the heap leach pad as well as solid sampling of the leach pad has confirmed that cyanide concentrations have been reduced to acceptable levels that pose no threat to the environment. It is not likely that the Bellavista Mine will resume operations. The Company anticipates reclamation activities on the property to commence in the following fiscal year.

As a result of the cessation of activities at two of the Company's three operating mines, an aggressive cost control program was implemented which included the suspension of all exploration activities, reducing the number of employees, cutting planned capital expenditures, where possible, and elimination of discretionary expenditures. Cash on hand at September 30, 2007 and cash flows expected from operations, the sale of its Cerro Quema gold property and the cash proceeds received on the October 22 finance closing would not be sufficient to fund the Company's ongoing and future expansion needs for the next twelve months if disinterested shareholder approval is not received on November 29, 2007. In October 2007, the Company made the \$500,000 final payment in the Blue Hill litigation.

In January 2007, the Company and the Province of Manitoba reached an agreement as to the final work to be carried out in the Lynn Lake area under which the Company will complete certain work for which it is responsible and will pay an aggregate of Cdn\$2,000,000 in four annual payments commencing when the formal agreement is signed. Final documentation is in progress. Until signing of the formal agreement, ongoing water treatment costs will be shared between the Company and the Manitoba government.

During October 2007, the Company announced a restructuring program which resulted in or contemplates the following:

The Cerro Quema property was sold for \$6,000,000 in a transaction that closed on October 31, 2007. Of this amount, \$100,000 was received on acceptance of the offer, \$400,000 was received on October 31, 2007, and the remaining \$5,500,000 will be received in three payments, up to December 31, 2008. All amounts are non-refundable once paid.

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000, of which Cdn\$5,672,000 was received and Cdn\$19,269,000 was held in escrow and will be released upon shareholder approval. A syndicate of underwriters purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each

unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010. The proceeds from the sale of the

Edgar Filing: Glencairn Gold CORP - Form 6-K

subscription receipts will be held in escrow pending satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts. An additional 6,849,750 compensation warrants will be issued to the underwriters, with each compensation warrant being exercisable to acquire one unit of the Company, having the same attributes as the units being sold under the private placement. As a result of this offering and assuming all subscription receipts are exercised, Yamana will own 55,355,833 common shares of the Company, representing approximately 13.3% of the issued and outstanding common shares of the Company. As a result of this offering and assuming all subscription receipts are exercised, Aberdeen International Inc. will own 46,333,001 common shares of the Company, representing approximately 11.2% of the issued and outstanding common shares of the Company.

The appointment of Messrs. Stan Bharti, George Faught, and Joe Milbourne to the Company's Board of Directors and Mr. Stan Bharti as Chairman of the Board.

The resignation of Messrs. Donald Charter, Ian McDonald and Kerry Knoll from the Board of Directors.

Dr. Bill Pearson P. Geo., joining the Company as Executive Vice President, Exploration, effective October 01, 2007.

A capital restructuring through a share consolidation on a seven-for-one basis.

A change in the Company's name to Central Sun Mining Inc.

The Company has scheduled a special meeting of its shareholders to be held on November 29, 2007. At this meeting, the Company intends to seek shareholder approval to (i) change its name to reflect its new strategic plan; (ii) consolidate its outstanding common shares on a seven-for-one basis; and (iii) complete the subscription receipt portion of the above-mentioned private placement which is over and above the maximum allowed by the Toronto Stock Exchange without obtaining shareholder approval.

Significant Accounting Policies

On January 1, 2007, the Company adopted three new accounting standards that were issued by the Canadian Institute of Chartered Accountants (CICA): Handbook Section 1530 *Comprehensive Income*, Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, and Handbook Section 3865, *Hedges*. The Company adopted these standards prospectively; accordingly, comparative amounts for prior periods have not been restated. See the Company's financial statements for full disclosure.

Non-GAAP Performance Measures

Total cash cost figures and cash operating cost figures are calculated in accordance with standards developed by The Gold Institute, which was a worldwide association of suppliers of gold and gold products and included leading North American gold producers. The Gold Institute ceased operations in 2002, but the standard is the accepted standard of reporting cash costs of production in North America. Adoption of the standard is voluntary and the cost measures presented below may not be comparable to other similarly titled measures of other companies. Cash operating costs include mine site operating costs such as mining, processing and administration, but are exclusive of amortization, reclamation, capital, development and exploration costs. These costs are then divided by ounces sold to arrive at the cash operating cost per ounce. Total cash costs include cash operating costs, royalties and production taxes. Total cash costs are then divided by ounces sold to arrive at the total cash costs per ounce. These measures are considered to be a key indicator of a company's ability to generate operating earnings and cash flow from its mining operations. These data are furnished to provide additional information and is a non-GAAP measure. It should not be considered in isolation as a substitute for measures of performance prepared in accordance with GAAP and is not necessarily indicative of operating costs presented under GAAP.

Cash Operating Cost per ounce:

Note 1: The subscription receipts will be automatically exchanged into one common share and one half-share purchase warrant on satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts.

Note 2: The agents warrants are convertible into one common share and one half-share purchase warrant. Each full warrant is exercisable into a common share at the price indicated in the table.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Position and Operating Results contains forward-looking statements, within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation. Forward-looking statements include, but are not limited to, statements with respect to the future financial or operating performance of the Company, its subsidiaries and its projects, the future price of gold, expectation that a solution to the ground movement at Bellavista be found, expectation that the Libertad mill scoping and feasibility studies will be positive, estimated recoveries under the milling plan, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital for the mill project, operating and exploration expenditures, costs and timing of the development of new deposits, costs and timing of future exploration, requirements for additional capital, government regulation of mining operations, environmental risks, reclamation

expenses, title disputes or claims, limitations of insurance coverage and the timing and possible outcome of pending litigation and regulatory matters. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as plans, expects or does not expect, is expected, budget, scheduled, estimates, forecasts, intends, anticipates or does not anticipate, or believes, or various words and phrases or state that certain actions, events or results may, could, would, might or will be taken, occur or be achieved. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; actual results of reclamation activities; conclusions of economic evaluations; changes in project parameters as plans

Edgar Filing: Glencairn Gold CORP - Form 6-K

continue to be refined; future prices of gold; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; political instability, insurrection or war; delays in obtaining governmental approvals or required financing or in the completion of development or construction activities, as well as those factors discussed in the section entitled "General Development of the Business" "Risks of the Business" in the Company's annual information form for the year ended December 31, 2006 on file with the securities regulatory authorities in Canada and the Company's Form 40-F on file with the Securities and Exchange Commission in Washington, D.C. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.

Additional information on the Company, including its annual information form is available on SEDAR at www.sedar.com.

Glencairn Gold Corporation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three and Nine Months ended September 30, 2007 and 2006

(unaudited)

(US Dollars, except where noted, tabular amounts in thousands)

1. NATURE OF OPERATIONS, BASIS OF PRESENTATION AND GOING CONCERN

Glencairn Gold Corporation's (the Company or Glencairn) business is gold mining which includes exploration, development, extraction, processing and reclamation. The Company's business also includes acquisition of gold properties in operation or in the development stage. The Company owns the Limon Mine in Nicaragua, the Bellavista Mine in Costa Rica, and the Libertad Mine in Nicaragua. The company also has an option to acquire the Mestiza exploration property in Nicaragua.

On March 31, 2007, the Company suspended mining activities at the Libertad Mine and has made payments towards the acquisition of a conventional milling circuit. The mine continues to incur care and maintenance charges and revenues have significantly decreased since suspension.

Edgar Filing: Glencairn Gold CORP - Form 6-K

On July 25, 2007, the Company suspended all mining and production activities at the Bellavista Mine due to concerns over ground movements in the heap leach pad. It is not likely the mine will resume operations. The Bellavista Mine has been on care and maintenance since this date and revenues from residual leaching of the pads ceased at the end of August 2007. Management intends to start remediation of the site during 2008 and expects the remediation project to last for at least four years. The costs for this project have been revised to \$7,520,000 due to accelerated timing and the current state of the property.

As a result of the events during the year, the Company has temporarily suspended all exploration activities, reduced the number of employees, cut or deferred capital expenditures, where possible, and eliminated discretionary expenditures until such time a new financing was secured.

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000 (see details in Note 20 b)). Of this amount \$19,269,000 is held in escrow for the Company pending receipt of disinterested shareholder approval. This shareholder vote is scheduled for November 29, 2007. If approval is not obtained by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

Cash on hand at September 30, 2007 and cash flows expected from operations, the sale of its Cerro Quema gold property (see Note 20 c)) and the cash proceeds received on the closing of the October 22, 2007 financing would not be sufficient to fund the Company's ongoing and future expansion needs for the next twelve months if disinterested shareholder approval is not received on November 29, 2007. While the Company believes it will get this approval, there can be no assurance it will be successful. Should disinterested shareholder approval not be granted, these circumstances would result in substantial doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to a going concern, and do not reflect the adjustments to the carrying value of assets and liabilities, the reported revenues and expenses and the balance sheet classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

The unaudited consolidated financial statements of the Company, which are expressed in U.S. dollars, have been prepared in accordance with Canadian generally accepted accounting principles for interim financial information and they follow the same accounting policies and methods of application as the audited consolidated financial statements for the year ended December 31, 2006 except for those changes disclosed in Note 2. These unaudited interim consolidated financial statements do not include all the information and note disclosures required by generally accepted accounting principles for annual financial statements and therefore should be read in conjunction with the most recent annual consolidated financial statements and notes thereto.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three and Nine Months ended September 30, 2007 and 2006

(unaudited)

(US Dollars, except where noted, tabular amounts in thousands)

In the opinion of management, all adjustments considered necessary for fair and consistent presentation of interim financial statements have been included.

2. SIGNIFICANT ACCOUNTING POLICIES

a) New Accounting Standards

On January 1, 2007, the Company adopted three new accounting standards that were issued by the Canadian Institute of Chartered Accountants (CICA): Handbook Section 1530 *Comprehensive Income*, Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, and Handbook Section 3865, *Hedges* and related amendments to Handbook Section 3251, *Equity*. The Company adopted these standards and amendments prospectively; accordingly, comparative amounts for prior periods have not been restated.

Comprehensive Income

Section 1530 introduces Comprehensive Income, which consists of net income and other comprehensive income (OCI). OCI represents changes in shareholders' equity during a period arising from transactions and other events with non-owner sources and includes unrealized gains and losses on financial assets classified as available-for-sale, unrealized foreign currency translation gains or losses arising from self-sustaining foreign operations, net of hedging activities, and changes in the fair value of the effective portion of cash flow hedging instruments. The Company has included in these interim consolidated financial statements a Consolidated Statement of Comprehensive Income for the changes in these items during 2007, while the cumulative changes in OCI are included in Accumulated Other Comprehensive Income (AOCI), which is presented as a new category of shareholders' equity on the Consolidated Balance Sheet.

Financial Instruments - Recognition and Measurement

CICA Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, effective for fiscal years beginning on or after October 1, 2006, establishes standards for the recognition, classification and measurement of financial instruments including the presentation of any resulting gains and losses. Assets classified as available-for-sale securities will have revaluation gains and losses included in other comprehensive income (and not included in the income statement) until such time as the asset is disposed of or incurs a decline in fair value that is other than temporary. At such time, any gains or losses will then be realized and reclassified to the income statement.

Transaction costs with respect to instruments not classified as held-for-trading are recognized as an adjustment to the costs of the underlying instrument, when it is recognized, and amortized using the effective interest method. On January 1, 2007 the Company reclassified unamortized deferred financing costs of \$178,000 to current portion of long-term debt as a result of adopting the new standards. Financing fees are amortized using the effective interest rate method over the life of the related debt instrument.

SIGNATURE

Glencairn Gold Corporation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three and Nine Months ended September 30, 2007 and 2006

(unaudited)

(US Dollars, except where noted, tabular amounts in thousands)

Impact upon adoption of CICA Handbook Sections 1530, 3855 and 3865

Adjustments arising from remeasuring financial assets classified as available-for-sale at fair value were recognized in opening AOCI as at January 1, 2007 and amounted to \$514,000.

The Company had no hedging relationships existing prior to adopting Section 3865.

b) Future Accounting Changes

On December 1, 2006, the CICA issued three new accounting standards: Handbook Section 1535, *Capital Disclosures*, Handbook Section 3862, *Financial Instruments - Disclosures*, and Handbook Section 3863, *Financial Instruments - Presentation*. These new standards are effective for interim and annual financial statements for the Company's reporting period beginning on January 1, 2008.

Handbook Section 1535 specifies the disclosure of an entity's objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital, whether the entity has complied with any capital requirements and, if it has not complied, the consequences of such non-compliance.

Handbook Section 3862 and Handbook Section 3863 replace Handbook 3861, *Financial Instruments - Disclosure and Presentation* and revise and enhance financial instrument disclosure requirements and carry forward the previous presentation requirements.

SIGNATURE

The Company is currently assessing the impact of these future accounting standards on its consolidated financial statements.

3. ACQUISITION OF CENTRAL AMERICAN MINE HOLDINGS AND RNC (PANAMA) LIMITED

On July 6, 2006 the Company acquired 100% of the common shares of Central American Mine Holdings Limited (CAMHL) and 100% of the common shares of RNC (Panama) Limited (RNC Panama) from Yamana Gold Inc. CAMHL indirectly owns 100% of the Libertad Mine; RNC Panama indirectly owns 60% of the Cerro Quema property. Consideration for the acquisition was 32,000,000 common shares of Glencairn valued at \$20,889,000. Transaction costs totalled \$324,000.

The allocation of the fair value of the consideration paid for the fair value of the identifiable assets and liabilities on the closing dates are set out below. The Company retained outside specialists to assist in determining the final fair value allocations for CAMHL and RNC Panama. The change from the original estimated fair value of assets acquired and liabilities assumed has been applied prospectively.

Glencairn Gold Corporation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three and Nine Months ended September 30, 2007 and 2006

(unaudited)

(US Dollars, except where noted, tabular amounts in thousands)

	CAMHL	RNC Panama	Total
Cash	\$ 356	\$ -	\$ 356
Other current assets	2,954	11	2,965

Edgar Filing: Glencairn Gold CORP - Form 6-K

(a) Sale of Manitoba Nickel Royalties

In June 2007, the Company completed the sale to Independent Nickel Corp. (INI) of its sliding scale 1-3% net smelter royalty (NSR) on Victory Nickel Inc. 's Minago nickel deposit, as well as the 2% NSR on the Lynn Lake property, both located in northern Manitoba, to INI.

Under terms of the purchase agreement, INI paid \$4,694,000 (Cdn\$5,000,000) in cash and issued 2,500,000 INI shares to Glencairn (see Note 5), in exchange for the two royalties.

(b) Sale of Property, Plant and Equipment

In February 2006, the Company sold surplus land near the Bellavista Mine for \$900,000. The gain on the sale, net of selling expenses, was \$855,000.

(c) Legal Settlements

In August 2007, Glencairn reached a final settlement of litigation in both the State of Maine and in Ontario regarding remediation of the Blue Hill site in Maine. Under this settlement, Glencairn has made an initial payment of \$500,000 and will pay the \$500,000 balance by October 31, 2007.

5. MARKETABLE SECURITIES

Glencairn Gold Corporation**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Three and Nine Months ended September 30, 2007 and 2006****(unaudited)****(US Dollars, except where noted, tabular amounts in thousands)****8. BELLAVISTA MINE WRITE-DOWN**

In each reporting period, the Company considers events that have occurred which may be indicative of an impairment in the value of long-lived assets, primarily mineral property, plant and equipment. A write-down is recognized when the carrying amount of an asset exceeds the sum of the undiscounted cash flows expected from its use and disposal; the write-down recognized is the amount by which the carrying amount of the

SIGNATURE

37

asset exceeds its fair value.

On July 25, 2007, Glencairn announced that mining operations at the Bellavista Mine in Costa Rica were suspended due to ground movements in the heap leach pad. Glencairn took this measure until a full technical analysis is completed and a feasible remediation plan is completed.

A cost feasible solution has not been found. Accordingly, management has assessed that the fair value of the property is negligible, which has been determined using estimated discounted cash flows. In relation to this situation product inventories on the heap leach pad have also been deemed to be unrecoverable. Supplies inventories related to unusable parts of the operation have also been written down to lower of cost or market.

The following balances have been written-down:

	Write-down
Product Inventory	\$ 9,118
Supplies Inventory	1,167
Property, plant and equipment (Note 9)	43,512
	\$ 53,797

Deferred stripping costs pertained to the Bellavista Mine.

(c) Libertad Mine, Nicaragua

On March 31, 2007 activities at the Libertad Mine were suspended. The Company is converting to a conventional milling facility. The Libertad Mine will continue to incur care and maintenance costs until the conversion is completed.

(d) Construction in process

During the quarter, the Company has made payments of \$4,899,000 to a third party as part of the acquisition of a used mill facility for the Libertad Mine. Remaining payments of \$2,696,000 will be required in future periods to complete the acquisition.

(e) Mestiza, Nicaragua

On September 6, 2006, Glencairn signed an option agreement to acquire 100% of the Mestiza property in Nicaragua. The Company has since made payments totaling \$530,000. The Company can complete the acquisition by making further cash installments totalling \$1,603,000. The installments are due as follows:

<u>Date</u>	<u>Amount</u>
-------------	---------------

10. PROPERTY HELD FOR SALE

On July 6, 2006, the Company acquired a 60% interest in the Cerro Quema property (see Note 3).

On September 28, 2007, the Company entered into a letter of intent with a third party to sell its interest in the Cerro Quema advanced development project for aggregate consideration of \$6,000,000, payable as follows: \$100,000 initial payment was made upon signing of the letter of intent; \$400,000 at closing of the transaction; \$2,500,000 within 30 days of closing; \$1,000,000 on June 30, 2008; and, \$2,000,000 on December 31, 2008. The transaction closed on October 31, 2007 (see Note 20(c)).

Net assets of the Cerro Quema property held for sale are as follows:

Amount

Stock options exercised	715	310
Warrants exercised	15	22
At September 30, 2007	241,322	\$ 93,619

On November 6, 2006, Glencairn amended its stock option vesting policy whereby stock options vest at 25% on each of the date of grant and six, twelve and eighteen months from the date of grant. The estimated fair value of these options are expensed over the options vesting period of 18 months and recorded as contributed surplus within shareholders equity.

The Company recognizes compensation costs associated with vested stock options based on the fair market value of the option on the date of the grant. Stock option expense of \$270,000 for the three months ended September 30, 2007 (2006 - \$803,000) and \$933,000 for the nine month period (2006 - \$1,017,000) was recognized. The fair value of each option grant was estimated on the date of grant using the Black-Scholes pricing model. During 2007, the following options were granted:

Grant on January 11, 2007:

Grant on January 11, 2007:

Edgar Filing: Glencairn Gold CORP - Form 6-K

The Company's gold production is refined in Canada. Gold is sold to customers in the United States, but due to the liquidity of the gold market and the large number of potential customers world wide, future sales may not be limited to these customers.

20. SUBSEQUENT EVENTS

a) Strategic Plan

As part of a new strategic plan announced on October 2, 2007, and subject to shareholder approval, the Company name will be changing and there will be a share consolidation on a seven-for-one basis.

b) Private Placement

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000. A syndicate of underwriters purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010.

The proceeds from the sale of the subscription receipts will be held in escrow pending satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts. Upon satisfaction of such conditions, each subscription receipt will be automatically converted into one unit (without any further action by the holders thereof, including payment of additional consideration). If such conditions are not satisfied by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

Yamana Gold Inc. (Yamana) acquired Cdn\$2,000,000 of units and subscription receipts pursuant to its right to maintain a pro rata interest in the Company. As a result of this offering and assuming all subscription receipts are exercised, Yamana will own 55,355,833 common shares of the Company, representing approximately 13.3% of the issued and outstanding common shares of the Company.

Edgar Filing: Glencairn Gold CORP - Form 6-K

As a result of this offering and assuming all subscription receipts are exercised, Aberdeen International Inc. will own 46,333,001 common shares of the Company, representing approximately 11.2% of the issued and outstanding common shares of the Company.

c) Sale of the Cerro Quema Project

On October 31, 2007, the Company closed on the sale transaction of its 60% interest in the Cerro Quema property (see Note 10). An initial payment of \$100,000 was received upon signing of the letter of intent and \$400,000 on the closing of the transaction. The remaining payments are scheduled as follows:

<u>Date</u>	<u>Amount</u>
November 29, 2007	\$ 2,500
June 30, 2008	1,000
December 31, 2008	2,000
	\$ 5,500

Under the terms of the agreement, the property will revert back to Glencairn if any of the future payments are not made by the purchaser.

Management's Discussion and Analysis

For the three and nine months ended September 30, 2007

The following discussion and analysis should be read in conjunction with the Company's unaudited interim consolidated financial statements and related notes thereto for the three and nine month periods ended September 30, 2007, which have been prepared in United States dollars and in accordance with Canadian generally accepted accounting principles for interim financial statements. The reader should also refer to the Annual Information Form, audited consolidated financial statements and Management's Discussion and Analysis for the years ended December 31, 2006 and 2005. This Management's Discussion and Analysis has been prepared as of November 7, 2007. All dollar amounts are US dollars unless otherwise indicated.

Overview

Glencairn Gold Corporation (Glencairn or the Company) is a gold producer with mining and exploration activities focused in Nicaragua. The Company currently operates the Limon Mine and plans to convert the Libertad Mine from a heap leach to a conventional milling operation. Both properties are located in Nicaragua. The Company also holds an option to acquire a 100% interest in the Mestiza gold property which is located 70 kilometers from the Limon Mine. Glencairn's growth strategy is focused on optimizing current operations and expanding mineral reserves at existing mines.

On March 31, 2007, mining operations at the Libertad Mine were suspended due to low recoveries while the Company implements a project to convert the heap-leach refining process to a conventional milling operation. The Company has made payments totalling \$4,899,000 towards the purchase of a used mill facility. As at September 30, 2007 consultant fees and other costs of \$995,000 have been spent by the Company as it progresses towards completing a feasibility study and building a conventional mill at the Libertad Mine. The Company expects the final feasibility study to be completed in the first quarter of 2008.

On July 25, 2007, mining operations at the Bellavista Mine were suspended due to ground movements in the heap leach pad at the site. After initial review by consultants, the Company believes that these movements were in part caused by water saturation due to abnormally high rain fall during the past several years. Extensive ground monitoring and a number of remedial measures were undertaken to reduce ground movements including de-watering wells and surface water control. The Company implemented measures to rinse the cyanide used in the heap leach processing on the site. Sampling of solution discharge from the leach pad as well as solid sampling of the leach pad has confirmed that cyanide concentrations have been lowered to acceptable discharge levels and pose no threat to the environment. On October 24, 2007, the Company announced that a localized landslide resulting from the ground movement and continuing heavy rains caused significant damage to the structure of its ADR recovery plant. As a result of the proactive measures taken, there was no release of cyanide into the environment. Until the ground becomes stabilized and the rainy season ends, localized slides are not unexpected. The Company does not perceive that there is any risk of further damage to any existing facilities including the grinding mill, which is located in another area of the site, as a result of ground movement.

The suspension of mining operations at the Bellavista Mine in July 2007 caused an immediate and serious negative effect on the cash flow of the Company and, accordingly, Glencairn initiated an aggressive program to conserve cash. This program included the immediate cessation of all discretionary spending, including the Company's exploration program, staff reductions and deferring or eliminating, where possible, capital expenditures.

In the third quarter of 2007, the magnitude of the ground movement problem at the Bellavista Mine, coupled with the lack of an economically feasible solution has resulted in a write-down in the carrying

value of the assets at the mine site to their estimated fair value. A charge of \$53,797,000 has been recorded and includes write-downs of \$9,118,000 on product inventory, \$1,167,000 on supplies inventories, and \$43,512,000 on property, plant and equipment. It is not likely that the mine will reopen. As a result, management intends to start remediation of the site during 2008 and expects the remediation project to last for at least four years. The costs for this project have been revised to \$7,520,000 due to accelerated timing and the current state of the property.

On October 1, 2007, Glencairn entered into a letter of intent with Bellhaven Copper & Gold, Inc. to sell its 60% interest in the Cerro Quema advanced development project located in Panama for an aggregate consideration of \$6,000,000, paid or payable as follows: (i) an initial payment of \$100,000 upon entering into the letter of intent; (ii) \$400,000 at closing of the transaction on October 31, 2007; (iii) \$2,500,000 within 30 days of the closing; (iv) \$1,000,000 on June 30, 2008; and (v) \$2,000,000 on December 31, 2008. As the Company decided to focus on its properties in Nicaragua, it determined Cerro Quema was a non-core asset and therefore sold the property.

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000. A syndicate of underwriters, purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010. The proceeds from the sale of the subscription receipts will be held in escrow for the Company pending receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants underlying the subscription receipts. A shareholders meeting is scheduled to take place on November 29, 2007. Upon satisfaction of such conditions, each subscription receipt will be automatically converted into one unit (without any further action by the holders thereof, including payment of additional consideration). If approval is not obtained by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

While the Company expects the subscription receipts will be released from escrow upon receipt of shareholder approval, there can be no assurance that this will occur. The solvency of the Company is dependent on the net proceeds of this financing for development of the Libertad Mine, resumption of exploration activities at the Company's mineral properties, and for general working capital purposes.

* These gold ounces were produced and sold in the pre-commercial production period from the Santa Pancha deposit and are not included in sales figures as disclosed in this Management's Discussion and Analysis and in the Consolidated Financial Statements.

Sales from the Limon Mine decreased marginally by \$19,000 in the third quarter of 2007 compared to 2006. The decrease in sales revenue was attributable to the 10% decrease in gold ounces sold. Lower ounces were sold because less tonnes were being mined due to production delays as a result of mechanical problems. The effect of the decline in ounces was offset in part by the 11% increase in average realized gold prices compared to the same period in the previous year.

Cost of sales increased by \$1,117,000 or 29% and cash operating costs per ounce increased by \$197 to \$644 in the third quarter of 2007 compared to 2006. Lower gold production along with higher production costs such as salaries, fuel, and especially electricity resulted in higher cash cost per ounce during the quarter.

Royalties and production taxes decreased \$45,000 or 13%, which reflects the decrease in ounces produced and sold. Depreciation and depletion decreased by \$17,000 or 5% due to lower capital investment and lower production when compared to the same period in the previous fiscal year.

* These gold ounces were produced and sold in the pre-commercial production period from the Santa Pancha deposit and are not included in sales figures as disclosed in this Management's Discussion and Analysis and in the Consolidated Financial Statements.

Sales from the Limon Mine increased by \$2,631,000 or 17% in the nine months ended September 30, 2007 compared to 2006. The higher gold production was from the higher ore grades mined in the Santa Pancha area of the Limon Mine. This was marginally offset by the lower recoveries. The market strength for gold resulted in an 11% increase in the average realized gold price per ounce which contributed to the increase in sales revenue.

Cost of sales increased by \$2,870,000 or 26% and cash operating costs per ounce increased by \$85 to \$511 in 2007. The increased cost of sales was attributed to generally higher production costs, especially salaries, fuel, and electricity costs. Royalties and production taxes increased by 16% as gold ounces produced and sold increased over the same period in the previous fiscal year.

In the first quarter of 2007, the Company's Santa Pancha deposit at the Limon Mine entered into commercial production. As such, all subsequent gold ounces sold from the deposit are being recognized in revenue. Additionally, the capitalized cost of the deposit is now being depreciated over ounces produced thereby increasing depreciation and depletion expenses by 12% in the nine months ended September 30, 2007.

	\$ 2,588	\$ 4,257	\$ (1,669)	(39%)
Income from mining operations	\$ 173	\$ 892	\$ (719)	(81%)

On July 25, 2007, Glencairn suspended all mining activities at the Bellavista Mine due to ground movements in the heap leach pad. Residual gold ounces were recovered from the heap leach up until the end of August 2007, at which point all activities were ceased. Sales from the Bellavista Mine decreased \$2,388,000 or 46% compared to the same quarter in the previous fiscal period. The mine sold 4,264 less ounces than in the comparable period in 2006.

The lack of mining activity and decrease in ounces produced resulted in a decrease in cost of sales of \$1,603,000 or 53% as well as a corresponding decrease in cash operating costs per ounce of \$13 to \$350 in 2007. As costs pertaining to production declined in the third quarter of 2007, the mine began incurring care and maintenance costs for activities related to the upkeep of the mine and expenditures relating to the investigation of the ground movement and rinsing of the heap leach pads. These costs have been classified as care and maintenance expenses and are not reflected in the above figures.

The ounces sold in the third quarter of 2007 declined 51%, which correlated with a decline of 59% in royalties and production taxes. Depreciation and depletion charges also declined due to the decrease in ounces produced and sold and less capital investment when compared to the same period in 2006.

As a result of the cessation of mining activities during the quarter and the unlikelihood of the mine reopening, a write-down of \$43,512,000 was recognized on property, plant and equipment. Product and supplies inventories were also written-down by \$9,118,000 and \$1,167,000, respectively. Product inventory consisted of the cost of the gold on the heap leach pad which is no longer recoverable due to cessation of operations.

On July 25, 2007, Glencairn suspended all mining activities at the Bellavista Mine due to ground movements. Residual gold ounces were recovered from the heap leach up until the end of August 2007, at which point all activities were ceased. As such, only residual gold ounces were recovered from the heap leach during the third quarter of 2007 thereby decreasing the nine month comparative figure with the previous fiscal year.

Sales from the Bellavista Mine decreased by \$3,757,000 or 20% in the nine months ended September 30, 2007 compared to 2006. Even though the average realized gold price in 2007 was \$68 per ounce, or 12%, higher than in 2006, the mine sold 9,004 ounces less than in the comparable period of 2006. The decrease in ounces sold was mainly attributable to the suspension of mining activities in July 2007.

Cost of sales decreased by \$690,000 or 7% and cash operating costs per ounce increased by \$88 to \$388 in 2007. The effect of lower sales volumes and the fixed nature of many production costs resulted in a higher than expected cost of sales. Additionally, production delays due to heavy rains and plugged collection tubes in the second quarter of 2007 contributed to higher costs for the nine month period. The increase in cash operating costs per ounce of 29% over the same period in the previous fiscal period was a result of the significant decrease in gold ounces sold resulting from the shut-down of mining activities since the beginning of the third quarter of 2007. Management intends to start remediation of the site during 2008 and expects the remediation project to last for at least four years. The costs for this project have been revised to \$7,520,000 due to accelerated timing and the current state of the property.

As ounces sold in the nine months ended September 30, 2007 declined 28%, a reduction of 32% was reflected in royalties and production taxes. Although ounces of gold produced declined in the nine months ended September 30, 2007, the depreciation base increased due to the milling circuit reaching commercial production in the first half of 2007. This resulted in an increase in depreciation and depletion expenses of \$553,000 or 14%.

Edgar Filing: Glencairn Gold CORP - Form 6-K

As a result of the cessation of mining activities during the third quarter and the unlikelihood of the mine reopening, a write-down of \$43,512,000 was recognized on property, plant and equipment. Product and supplies inventories were also written-down by \$9,118,000 and \$1,167,000, respectively.

Glencairn acquired the Libertad Mine in July of 2006. Since that time, Glencairn decreased the cost of gold production significantly, but not by an amount to make the operation profitable. The Company suspended operations on March 31, 2007. Since that time, only residual gold ounces were being recovered from the heap leach pads. Production will cease completely in the fourth quarter of 2007.

The decline in cost of sales, royalties and production taxes, and depreciation and depletion is correlated with the decline in sales revenue.

**The comparative information presented for 2006 only contains data for the period July 6, 2006 to September 30, 2006, after Glencairn took over ownership of the mine.*

Glencairn acquired the Libertad Mine in July of 2006. The site sold 12,146 ounces during the first quarter but at high cash operating costs. Management suspended operations on March 31, 2007 while the Company started a project to convert the site to a conventional milling circuit. Subsequent recoveries of gold ounces were from residual heap leaching. Gold production and revenue will cease during the fourth quarter of 2007.

10

Expenses and Other Income

Three months ended September 30, 2007

	Three months ended September 30			%
	2007	2006	Change	Change
General and administrative	\$ 1,835	\$ 1,118	\$ 717	64%
Bellavista Mine write-down	53,797	-	53,797	-%
Care and maintenance	2,287	-	2,287	-%
Stock options	270	803	(533)	(66%)
Exploration	584	137	447	326%
Other (income) expense	858	243	615	253%
Non-controlling interest	(8)	-	(8)	-%
	\$ 59,623	\$ 2,301	\$ 57,322	2,491%

General and administrative expenses increased \$717,000 or 64% over the same period in the previous year and includes \$641,000 spent in the third quarter of 2007 on engineering costs, consulting fees and other expenditures related to the Libertad Mine mill project. Engineering and administrative costs relating to this project will be expensed until a positive final feasibility study is available for this project. The increases of the Libertad mill expenditures were partially offset by a \$109,000 reduction in salaries and benefits. This was a direct result of a program of cost-cutting implemented in the third quarter of 2007.

Glencairn identified a ground movement problem in the heap leach pad occurring at its Bellavista Mine during the third quarter of 2007. Since that time, mining activities were suspended while management brought in third-party consultants to evaluate and assess the viability of a cost feasible solution. On September 30, 2007, property, plant and equipment at the Bellavista Mine were written-down to their estimated recoverable values due to the ongoing uncertainty of the mine resuming operations in the foreseeable future. A write-down of \$43,512,000 was recorded against property, plant and equipment. The carrying value after the write-down reflects management's best estimate of the residual value of the mining property. In addition, product and supplies inventories were written-down by \$9,118,000 and \$1,167,000, respectively.

Edgar Filing: Glencairn Gold CORP - Form 6-K

Care and maintenance costs of \$631,000 incurred at the Libertad Mine were incurred to maintain a proper state of upkeep while mining operations were suspended. These costs primarily relate to the maintenance of a basic administrative function as well as expenditures on electricity, property holding costs, and caretaking activities. Also included in care in maintenance were costs of \$1,656,000 not directly related to the production of gold at the Bellavista Mine.

Stock options expense decreased by \$533,000 or 66% over the same period in the previous fiscal year. During the third quarter of 2007, 150,000 options were granted. Glencairn amended its vesting policy in the third quarter of 2006 whereby options would vest over an 18 month period. Previous to the third quarter of 2006, options vested on the grant date. Total stock-based compensation amounted to \$270,000 as a result of vesting options.

In the third quarter of 2007, exploration expenses were \$584,000. These costs relate mainly to work being performed on the feasibility study for the Libertad Mill project. In late 2005, all Nicaraguan exploration activities were suspended for an indefinite period after a three-week labour disruption at the Limon operations. The exploration program resumed in the third quarter of 2006 after the acquisition of the Libertad Mine, and the Cerro Quema and Mestiza properties in the third quarter of 2006.

11

In the third quarter of 2007 the Company made a decision to dispose of all non-core assets and liquidated a significant portion of its marketable security holdings. A gain of \$829,000 was recognized, for proceeds of \$1,223,000, on the disposition of the securities. These gains on the sale of marketable securities were included in other income.

Other components of income and other expenses included: interest and other miscellaneous gains of \$136,000; \$1,104,000 in losses from the settlement of various litigation matters, most notably the Blue Hill litigation. In August 2007, the Company reached a final settlement of litigation in both the State of Maine and in Ontario regarding remediation of the Blue Hill site in Maine. The Company has expensed an amount of \$1,000,000 relating to this settlement. The Company has also recorded a provision of \$847,000 related to uncollectible tax receivables.

Non-controlling interest represents 40% of Cerro Quema owned by a minority interest.

Nine months ended September 30, 2007

Nine months ended September 30

			%
2007	2006	Change	Change

Edgar Filing: Glencairn Gold CORP - Form 6-K

General and administrative	\$ 4,655	\$ 3,249	\$ 1,406	43%
Bellavista Mine write-down	53,797	-	53,797	-%
Care and maintenance	3,052	-	3,052	-%
Stock options	933	1,017	(84)	(8%)
Exploration	1,761	237	1,524	643%
Other expense (income)	(6,189)	(187)	(6,002)	(3,210%)
Non-controlling interest	(91)	-	(91)	-%
	\$ 57,918	\$ 4,316	\$ 53,602	1,242%

General and administrative expense increased by \$1,406,000 or 43% over the same period in the previous fiscal year. Of this increase, \$995,000 was spent in 2007 on engineering, consulting and other expenditures related to the assessment and preparation of a scoping and feasibility study for a conventional milling circuit at the Libertad Mine. Management's active cost control plans resulted in decreases to salaries and benefits, legal fees, investor relations expenditures, and travel costs totaling approximately \$575,000.

Stock options expense decreased by \$84,000 over the same period in the previous fiscal year. As part of Glencairn's compensation program, stock options are granted to employees and directors from time-to-time. During the nine months ended September 30, 2007, a total of 3,931,000 stock options were granted and the Company recognized an expense of \$933,000 using the Black-Scholes option pricing model.

Exploration expense increased by \$1,524,000 in 2007 compared with 2006. Nicaraguan exploration activities were suspended from November 2005 to August 2006. In July of 2006, the Company acquired the Libertad Mine and Cerro Quema property and closed a financing that provided the funds to resume exploration work on the properties. Exploration work in the first half of 2007 consisted mainly of drilling at Libertad, exploration drilling and trenching at Limon and Mestiza, and ongoing holding costs. Exploration activities during the third quarter of 2007 were necessary to support the Libertad Mill feasibility report. The balance in 2006 consisted mainly of land holding costs.

Other income totalled \$6,189,000 in 2007, an increase of \$6,002,000 from 2006. The Company earned interest and other gains totalling \$615,000. Glencairn sold marketable securities during the first nine months of 2007 resulting in a gain of \$960,000. During the second quarter, the Company recorded a combined gain of \$6,548,000 from the receipt of 2,500,000 Independent Nickel Corp. shares valued at Cdn\$0.79 per share and cash of \$4,694,000 (Cdn\$5,000,000) related to the sale of Glencairn's sliding

scale 1-3% net smelter royalty on Victory Nickel Inc.'s Minago nickel deposit, as well as the 2% net smelter royalty on the Lynn Lake property, both located in Manitoba. The Company incurred interest charges of \$313,000 on a long-term debt which was fully repaid on June 30, 2007. The Company recorded \$1,104,000 related to the settlement of the Blue Hill litigation in Maine and other smaller lawsuits stemming from the Nicaraguan operations. The Company has also recorded a provision of \$847,000 related to uncollectible tax receivables.

Edgar Filing: Glencairn Gold CORP - Form 6-K

Non-controlling interest represents 40% of Cerro Quema owned by a minority interest.

Cash Flows

Three months ended September 30, 2007

Operating activities used \$4,598,000 in 2007, compared to \$2,978,000 in 2006. Since the Libertad Mine ceased mining operations earlier in the year, only 1,454 ounces of gold were sold from the continued leaching in the third quarter. Expenditures were incurred at the Libertad Mine with respect to consulting and engineering costs related to the mill project and care and maintenance costs being incurred since the temporary cessation of mining activities. The Company's Bellavista Mine also ceased operations during the quarter, selling 4,136 ounces gold from the residual leaching process. Amounts totalling \$543,000 were expended on consulting and engineering costs to assess the ground movement situation during the third quarter. Since the cessation of mining operations on July 25, 2007, the mine started incurring care and maintenance costs. In August 2007, the Company settled the outstanding Blue Hill litigation for \$1,000,000 and made an initial payment of \$500,000 during the quarter and the final \$500,000 was paid at the end of October 2007.

Glencairn extinguished its long-term debt obligation at June 30, 2007. Additionally, there were no exercises of stock options into common shares during the third quarter of 2007. Financing activities were nil for the quarter.

Investing activities consisted of \$1,223,000 in proceeds from the sale of marketable securities in the third quarter in 2007. Acquisitions for property, plant and equipment used \$2,592,000. The Limon Mine, Bellavista Mine, and Libertad Mine acquired assets totalling \$460,000, \$213,000 and \$1,632,000, respectively. The Mestiza acquisition totalled \$300,000 less minor dispositions. In the comparative period in 2006, investing activities utilized cash of \$2,209,000. Of this balance, \$283,000 was attributable to payments for the Mestiza property. The remaining balance consisted mainly of capitalized expenditures for the Bellavista Mine's grinding mill.

Nine months ended September 30, 2007

Operating activities used \$880,000 for the nine months ended September 30, 2007, compared to cash inflows of \$1,107,000 in the same period in 2006. Operating cash flows decreased as mining costs increased in 2007, however, this was mitigated by an increase in the average realized selling price for gold increasing to \$663 in 2007 from \$597 in 2006. Cash outflows also included care and maintenance charges at the two non-operating mines totaling \$3,052,000. The Libertad Mine mill project also resulted in cash payments totalling \$995,000 in non-capital expenditures. In August 2007, the Company settled the outstanding Blue Hill litigation for \$1,000,000 and made an initial payment of \$500,000 during the quarter.

In 2007, financing activities used \$2,185,000. This consisted of \$2,500,000 expended on the repayment of a long-term debt which was partially offset by \$315,000 received on the issuance of common shares. For the comparative period in 2006, Glencairn repaid \$2,500,000 of the long-term debt and received \$16,158,000 on the issuance of common shares.

Investing activities used \$2,434,000 in 2007. Investments in property, plant, and equipment totalled \$8,291,000. The Limon Mine, Bellavista Mine, and Libertad Mine acquired assets totalling \$1,741,000, \$1,589,000 and \$4,667,000, respectively. Of the Libertad Mine expenditures, \$4,899,000 was from payments for a used mill which is expected to be installed at the Libertad Mine in 2008. The Mestiza acquisition consisted of an option payment of \$300,000 towards the purchase of the property. The Company received \$4,694,000 in proceeds from the sale of Manitoba nickel royalties. Additionally, the Company sold marketable securities which generated net proceeds of \$1,406,000. In early 2007, the Company had its Costa Rican bank accounts seized, which stemmed from the loss of an arbitration case. These bank accounts are currently unavailable for operations and have cash balances of approximately \$243,000. In the comparative period in 2006, purchases and deferred costs relating to property, plant, and

equipment were made in amounts totaling \$1,390,000, \$5,411,000, and \$125,000 for the Limon Mine, Bellavista Mine, and Libertad Mine, respectively. Option payments of \$230,000 were made towards the acquisition of the Mestiza property in the first nine months of 2006.

Liquidity and Capital Resources

The Company had cash of \$4,068,000 (December 31, 2006 - \$9,567,000) and working capital deficit of \$2,576,000 at September 30, 2007 (December 31, 2006 - \$13,634,000).

In February 2007, the Company announced its conversion/expansion program to install a conventional milling circuit at the Libertad Mine. A feasibility study is expected in the first quarter of 2008. At September 30, 2007, the Company has made payments totalling \$4,899,000 on the acquisition of a used mill which will be re-assembled at the Libertad site. Additional amounts of \$1,672,000 were paid to November 7, 2007. Future payments of \$3,024,000, which includes costs of dismantling, shipping and principal component refurbishing, are committed for the used mill acquisition. Engineering and consultant fees to September 30, 2007 have totalled \$995,000 for this project. The Libertad Mine was placed in care and maintenance mode at the beginning of the second quarter of 2007 and has incurred expenses of \$1,396,000 for the nine month period ended September 30, 2007. Gold sales from the Libertad Mine were only 15,747 ounces for the period as a result of the cessation of mining activities on March 31, 2007. Only residual ounces will be recovered from the heap leach operation.

On July 25, 2007, Glencairn suspended mining operations at the Bellavista Mine in Costa Rica due to ground movements in the heap leach pad. After initial review by a number of external consultants, the Company believed that this movement was in part caused by water saturation due to abnormally high rain fall during the past several years. The results of engineering and consulting studies for a cost feasible solution have been ongoing and inconclusive. It is not likely the mine will resume operations in the foreseeable future. For the nine month period in 2007, 22,996 ounces of gold have been sold from the Bellavista Mine. As the residual heap leach operation ended August 31, 2007, there will not be any future gold production. Ongoing care and maintenance costs will be incurred. Reclamation activities for the site are anticipated to begin in 2008 and are estimated to take four years. Total undiscounted expenditures are expected to be approximately \$7,520,000 over the next four years.

In June 2007, the Company closed an agreement with Independent Nickel Corp. (INI) to sell its sliding scale 1% - 3% net smelter return royalty (NSR) on Victory Nickel Inc. 's Minago nickel deposit, as well as the 2% NSR on the Lynn Lake property, both located in northern Manitoba, to INI. Under the terms of the purchase agreement, INI paid Cdn\$5,000,000 in cash and issued 2,500,000 INI shares to Glencairn, in exchange for the two royalties. The shares are subject to a contractual escrow agreement and will be released on a graduated basis over two years.

During the first three quarters of 2007, and especially during the third quarter, Glencairn liquidated various holdings in marketable securities. Total proceeds of \$1,406,000 were received in the disposition of shares. The remaining securities at September 30, 2007 have a market value of \$1,916,000. Of this balance, 2,000,000 shares of Independent Nickel Corp. were subject to a contractual escrow agreement

14

with the release of blocks of shares in intervals up to June 2009. In addition, 4,000,000 shares of Carlisle Goldfields Limited are also subject to a regulatory escrow agreement with the release of blocks of shares in intervals up to July 2008.

As a result of two of Glencairn's three mines being placed in care and maintenance, there have been significant declines in gold production for the combined Company. In response to the situation, the Company has temporarily restricted exploration activities, reduced the number of employees, cut capital expenditure programs and eliminated discretionary expenditures. Cash on hand at September 30, 2007 and cash flows expected from operations, the sale of its Cerro Quema gold property and the cash proceeds received on the October 22, 2007 financing closing would not be sufficient to fund the Company's ongoing and future expansion needs for the next twelve months if disinterested shareholder approval is not obtained on November 29, 2007.

On September 28, 2007, the Company entered into a letter of intent with Bellhaven Copper & Gold, Inc. to sell its interest in the Cerro Quema advanced development project located in Panama for aggregate consideration of \$6,000,000, payable as follows: (i) an initial payment of \$100,000 upon entering into the letter of intent; (ii) \$400,000 paid at closing of the transaction; (iii) \$2,500,000 within 30 days of the closing; (iv) \$1,000,000 on June 30, 2008; and (v) \$2,000,000 on December 31, 2008. This sale closed on October 31, 2007.

On October 22, 2007 the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000. A syndicate of underwriters, purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010.

The proceeds from the sale of the subscription receipts will be held in escrow pending satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts. Upon satisfaction of such conditions, each subscription receipt will be automatically converted into one unit (without any further action by the holders thereof, including payment of additional consideration). If such conditions are not satisfied by December 31, 2007, the Company will repurchase the subscription receipts at a redemption price per subscription receipt equal to the issue price of Cdn\$0.15 plus interest.

The net proceeds from the sale of the non-core Cerro Quema property and the financing will be used by the Company for development of the Libertad Mine, resumption of an exploration program on the Company's mineral properties, and for general working capital purposes.

The company does not have any off balance sheet arrangements.

Related Party Transactions

During September 2007, 500,000 shares of Independent Nickel Corp. (INI) were sold to a company owned by the Chairman of Glencairn at the time of the transaction. These escrowed shares were sold at market value. A gain of \$171,000 was recognized for the transaction and \$213,000 in proceeds were received. This gain on sale of marketable securities is included in other income.

Outlook

Gold sales in 2007 are expected to be approximately 75,000 ounces at a cash operating cost of approximately \$500 per ounce. The decrease from an earlier production estimate of 90,000 to 105,000 ounces is attributable to the suspension of operations at the Bellavista Mine on July 25, 2007. Many production inputs, such as fuel and hydro have been increasing over the past few years but gold prices have increased significantly more and are predicted by many analysts to increase beyond current levels.

15

The Company temporarily suspended mining operations at the Libertad Mine effective March 31, 2007, until such time as a conventional mill circuit is commissioned. In July 2007, Glencairn exercised an option agreement with a third-party vendor to purchase a previously owned and operated mill. The Company has made payments of \$6,571,000 to date towards the purchase of this mill, of which, \$1,672,000 was paid in October 2007. Additional future payments of \$3,024,000, which includes costs of dismantling, shipping and principal component refurbishing, are committed for the used mill acquisition. It is expected that the total cost of the project including the feasibility study will be between \$25 and \$30 million dollars however final numbers will only be known once the feasibility study is completed. In opting to refurbish an existing mill as opposed to acquiring a new one, the Company is optimistic that the Libertad Mine can be returned to full production in a shorter time frame and at a lower capital cost. A mill operation is expected to result in higher recovery rates and lower costs per ounce compared to heap leaching. Dismantling of the mill from its current site is expected to be completed early in the fourth quarter and re-assembly in Libertad would be done, expected in 2008. Completion of the Libertad mill plan is dependent on completion of the announced financing and permits being obtained on a timely basis.

The Company suspended mining operations at the Bellavista Mine on July 25, 2007, due to ground movements in the heap leach pad, which were believed to be in part caused by water saturation due to abnormally high rainfall during the past several years. Extensive ground monitoring was undertaken along with rinsing of the cyanide solution from the heap leach pad. Sampling of solution discharge from the heap leach pad as well as solid sampling of the leach pad has confirmed that cyanide concentrations have been reduced to acceptable levels that pose no threat to the environment. It is not likely that the Bellavista Mine will resume operations. The Company anticipates reclamation activities on the property

Edgar Filing: Glencairn Gold CORP - Form 6-K

to commence in the following fiscal year.

As a result of the cessation of activities at two of the Company's three operating mines, an aggressive cost control program was implemented which included the suspension of all exploration activities, reducing the number of employees, cutting planned capital expenditures, where possible, and elimination of discretionary expenditures. Cash on hand at September 30, 2007 and cash flows expected from operations, the sale of its Cerro Quema gold property and the cash proceeds received on the October 22 finance closing would not be sufficient to fund the Company's ongoing and future expansion needs for the next twelve months if disinterested shareholder approval is not received on November 29, 2007. In October 2007, the Company made the \$500,000 final payment in the Blue Hill litigation.

In January 2007, the Company and the Province of Manitoba reached an agreement as to the final work to be carried out in the Lynn Lake area under which the Company will complete certain work for which it is responsible and will pay an aggregate of Cdn\$2,000,000 in four annual payments commencing when the formal agreement is signed. Final documentation is in progress. Until signing of the formal agreement, ongoing water treatment costs will be shared between the Company and the Manitoba government.

During October 2007, the Company announced a restructuring program which resulted in or contemplates the following:

The Cerro Quema property was sold for \$6,000,000 in a transaction that closed on October 31, 2007. Of this amount, \$100,000 was received on acceptance of the offer, \$400,000 was received on October 31, 2007, and the remaining \$5,500,000 will be received in three payments, up to December 31, 2008. All amounts are non-refundable once paid.

On October 22, 2007, the Company closed a private placement financing for gross proceeds of Cdn\$26,050,000, of which Cdn\$5,672,000 was received and Cdn\$19,269,000 was held in escrow and will be released upon shareholder approval. A syndicate of underwriters purchased 40,000,000 units and 133,670,000 subscription receipts at a price of Cdn\$0.15 per unit or subscription receipt. Each unit

16

is comprised of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of Cdn\$0.18 until October 22, 2010. The proceeds from the sale of the subscription receipts will be held in escrow pending satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts. An additional 6,849,750 compensation warrants will be issued to the underwriters, with each compensation warrant being exercisable to acquire one unit of the Company, having the same attributes as the units being sold under the private placement. As a result of this offering and assuming all subscription receipts are exercised, Yamana will own 55,355,833 common shares of the Company, representing approximately 13.3% of the issued and outstanding common shares of the Company. As a result of this offering and assuming all subscription receipts are exercised, Aberdeen International Inc. will own 46,333,001 common shares of the Company, representing approximately 11.2% of the issued and outstanding common shares of the Company.

The appointment of Messrs. Stan Bharti, George Faught, and Joe Milbourne to the Company's Board of Directors and Mr. Stan Bharti as Chairman of the Board.

The resignation of Messrs. Donald Charter, Ian McDonald and Kerry Knoll from the Board of Directors.

Dr. Bill Pearson P.Ge., joining the Company as Executive Vice President, Exploration, effective October 01, 2007.

A capital restructuring through a share consolidation on a seven-for-one basis.

A change in the Company's name to Central Sun Mining Inc.

The Company has scheduled a special meeting of its shareholders to be held on November 29, 2007. At this meeting, the Company intends to seek shareholder approval to (i) change its name to reflect its new strategic plan; (ii) consolidate its outstanding common shares on a seven-for-one basis; and (iii) complete the subscription receipt portion of the above-mentioned private placement which is over and above the maximum allowed by the Toronto Stock Exchange without obtaining shareholder approval.

Significant Accounting Policies

On January 1, 2007, the Company adopted three new accounting standards that were issued by the Canadian Institute of Chartered Accountants (CICA): Handbook Section 1530 *Comprehensive Income*, Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, and Handbook Section 3865, *Hedges*. The Company adopted these standards prospectively; accordingly, comparative amounts for prior periods have not been restated. See the Company's financial statements for full disclosure.

Non-GAAP Performance Measures

Edgar Filing: Glencairn Gold CORP - Form 6-K

Total cash cost figures and cash operating cost figures are calculated in accordance with standards developed by The Gold Institute, which was a worldwide association of suppliers of gold and gold products and included leading North American gold producers. The Gold Institute ceased operations in 2002, but the standard is the accepted standard of reporting cash costs of production in North America. Adoption of the standard is voluntary and the cost measures presented below may not be comparable to other similarly titled measures of other companies. Cash operating costs include mine site operating costs such as mining, processing and administration, but are exclusive of amortization, reclamation, capital, development and exploration costs. These costs are then divided by ounces sold to arrive at the cash operating cost per ounce. Total cash costs include cash operating costs, royalties and production taxes. Total cash costs are then divided by ounces sold to arrive at the total cash costs per ounce. These measures are considered to be a key indicator of a company's ability to generate operating earnings and cash flow from its mining operations. These data are furnished to provide additional information and is a non-GAAP measure. It should not be considered in isolation as a substitute for measures of performance prepared in accordance with GAAP and is not necessarily indicative of operating costs presented under GAAP.

Note 1: The subscription receipts will be automatically exchanged into one common share and one half-share purchase warrant on satisfaction of certain conditions, including receipt of disinterested shareholder approval for the issuance of the common shares and common share purchase warrants upon exercise of the subscription receipts.

Note 2: The agents' warrants are convertible into one common share and one half-share purchase warrant. Each full warrant is exercisable into a common share at the price indicated in the table.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Position and Operating Results contains forward-looking statements, within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation. Forward-looking statements include, but are not limited to, statements with respect to the future financial or operating performance of the Company, its subsidiaries and its projects, the future price of gold, expectation that a solution to the ground movement at Bellavista be found, expectation that the Libertad mill scoping and feasibility studies will be positive, estimated recoveries under the milling plan, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital for the mill project, operating and exploration expenditures, costs and timing of the development of new deposits, costs and timing of future exploration, requirements for additional capital, government regulation of mining operations, environmental risks, reclamation

19

expenses, title disputes or claims, limitations of insurance coverage and the timing and possible outcome of pending litigation and regulatory matters. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as plans, expects or does not expect, is expected, budget, scheduled, estimates, forecasts, intends, anticipates or does not anticipate, or believes, or various words and phrases or state that certain actions, events or results may, could, would, might or will be taken, occur or be achieved. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; actual results of reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of gold; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; political instability, insurrection or war; delays in obtaining governmental approvals or required financing or in the completion of development or construction activities, as well as those factors discussed in the section entitled General Development of the Business Risks of the Business in the Company's annual information form for the year ended December 31, 2006 on file with the securities regulatory authorities in Canada and the Company's Form 40-F on file with the Securities and Exchange Commission in Washington, D.C. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.

Additional information on the Company, including its annual information form is available on SEDAR at www.sedar.com.
