MapInfo Corporation and Subsidiaries  
Notes to Financial Statements

(Unaudited)

1. Basis of Presentation

In the opinion of management, the accompanying balance sheets and related income statements and statements of cash flows include all adjustments (consisting only of normal recurring items) necessary for their fair presentation. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. The results of operations for the interim period are not necessarily indicative of the results of operations for the full year.

The September 30, 2000 balance sheet data was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles.

Certain reclassifications have been made to amounts previously reported to conform to the fiscal 2001 presentation.

## 2. Earnings Per Share (EPS)

The following table represents the reconciliation of the basic and diluted earnings per share amounts for the three months ended December 31, 2000 and 1999.

	Three Months Ended December 31,	
	2000	1999
	(Amounts in thousands, except per share data)	
Net income	\$ 2,104	\$ 1,002
Weighted average shares for basic EPS	14,170	13,014
Effect of dilutive stock options	1,238	1,157
Weighted average shares and assumed exercise of stock options for diluted EPS	15,408	14,171
Basic EPS	\$ 0.15	\$ 0.08
Diluted EPS	\$ 0.14	\$ 0.07

MapInfo Corporation and Subsidiaries  
Notes to Financial Statements - Continued

(Unaudited)

### 3. New Accounting Standards

In the first quarter of fiscal 2001, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities," which establishes accounting and reporting standards for derivative instruments and hedging activities. It requires that an entity recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value. The accounting for changes in the fair value of a derivative is dependent on the intended use of the derivative and the resulting designation. The adoption of SFAS No. 133 did not have a material effect on the Company's financial position or results of operations.

In December 1999, the SEC issued Staff Accounting Bulletin No. 101 "Revenue Recognition in Financial Statements," which is effective no later than the fourth fiscal quarter of the first fiscal year beginning after December 15, 1999. SAB 101 clarifies the SEC's views related to revenue recognition and disclosure. The Company believes that the adoption of SAB 101 will not have a material effect on the Company's financial position or results of operations.

### 4. Segment Information

The Company's operations involve the design, development, marketing, licensing and support of software and data products, application development tools, and industry-specific solutions, together with a range of consulting, training and technical support services.

The Company conducts business globally and is managed geographically. The Company's management relies on an internal management accounting system. This system includes revenue and cost information by geographic location. Revenues are attributed to a geographic location based on the origination of the order from the customer. The Company's management makes financial decisions and allocates resources based on the information it receives from this internal system. Based on the criteria set forth in SFAS No. 131, the Company has three reportable segments: the Americas, EAME (Europe, Africa and the Middle East) and Asia-Pacific.

MapInfo Corporation and Subsidiaries  
Notes to Financial Statements - Continued

(Unaudited)

### 4. Segment Information (continued)

Summary financial information by segment for the three months ended December 31, 2000 and 1999, as taken from the internal management accounting system discussed above, is as follows:

	Three Months Ended December 31,	
	2000	1999
Net revenues:		
Americas	\$ 17,366	\$ 12,003
EAME	6,953	6,107
Asia-Pacific	2,201	2,909

Edgar Filing: MAPINFO CORP - Form 10-Q

Total net revenues	\$ 26,520	\$ 21,019
	<u>                    </u>	<u>                    </u>
Operating income :		
Americas	\$ 6,846	\$ 4,460
EAME	2,219	1,424
Asia-Pacific	479	874
Corporate adjustments:		
R&D	(3,252)	(2,555)
Marketing	(2,084)	(1,747)
G&A	(1,205)	(1,139)
G&A	<u>                    </u>	<u>                    </u>
Total operating income	\$ 3,003	\$ 1,317
	<u>                    </u>	<u>                    </u>

The operating income by segment above differs from the amounts recognized under generally accepted accounting principles because the Company does not allocate certain corporate costs for research and development, marketing, and general and administrative activities to the geographic locations. The table above reconciles the operating income by segment to operating income as reported on the Income Statements by including such adjustments.

## 5. Acquisition

### The Acquisition of Assets of Compusearch Inc.

Pursuant to an Asset Purchase Agreement executed on November 13, 2000, on December 8, 2000 the Company acquired substantially all of the assets and assumed certain liabilities of Compusearch Inc. ("Compusearch"), a Canadian corporation. Compusearch is a leading provider of micro-marketing segmentation and market analysis solutions in Canada and has been a strategic data partner of the Company since 1998. The purchase price was approximately \$6.3 million in cash. The acquisition was accounted for as a purchase; and, accordingly, the Company has included Compusearch's results of operations in the financial statements from the date of acquisition. Ninety-one employees of Compusearch became employees of MapInfo Canada Inc. upon the acquisition.

### MapInfo Corporation and Subsidiaries Notes to Financial Statements - Continued

(Unaudited)

## 6. Commitments and Contingencies

In February 2001, the Company entered into a 49-year ground lease, with two 10-year renewal options, on 16 acres of land adjacent to the Company's One Global View facility in the Rensselaer Technology Park in Troy, New York. The cost of the 49-year ground lease is \$2.1 million payable in May 2001. Under a Construction and Services Agreement with Rensselaer Polytechnic Institute ("RPI"), the Company plans to construct a four-story, 150,000 square-foot facility to house the Company's Corporate Headquarters and the Americas business operations. The facility is expected to be completed by early calendar year 2002 at a projected total cost of \$17.5 million. Upon occupancy of the new facility, the Company will vacate and terminate the lease on its 40,000 square-foot facility at Four Global View, without further obligation or penalty. In addition, the Company has secured an option to acquire, on or before December 31, 2001, the 60,000 square-foot facility at One Global View for \$5.25 million together with an option to

acquire a 49-year ground lease of the 14 acres on which the One Global View facility is sited. The purchase price for the ground lease is \$1.8 million. If the Company does not exercise such purchase options, it may continue to lease One Global View through 2016. The Company plans to finance the construction of the 150,000 square foot facility and the related ground lease from either existing cash resources, future cash flows from operations, debt or equity financing that the Company may arrange in the future, or from a sale/leaseback transaction.

Pursuant to an Asset Purchase Agreement dated December 15, 1998, the Company acquired substantially all of the assets and assumed certain liabilities of On Target Communications Inc. ("On Target Mapping"). As per the agreement, the Company is obligated to make a contingent cash payment in March 2001, based on the financial performance of On Target Mapping in the two years following the acquisition. The Company estimates this payment to be approximately \$4.0 million. This additional payment will be recorded as goodwill and amortized over the next three years.

In December 2000, the Company was named as a defendant in an action filed by Michael Reiff in the United States District Court Northern District of New York alleging breach of a purported contract of employment, and related matters in connection with the Company's termination of Reiff as the Company's Vice President and General Manager, Asia Pacific Operations. The complaint seeks \$2.6 million compensation for loss of employment and consequent loss of stock option vesting, and \$15.0 million in punitive damages. The Company believes these claims are without merit and intends to defend them vigorously.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### Results of Operations

#### Overview

MapInfo Corporation ("MapInfo" or the "Company") designs, develops, markets, licenses and supports software and data products, application development tools, and industry-specific solutions, together with a range of consulting, training and technical support services. These products are sold through multiple distribution channels, including an indirect channel of value-added resellers and distributors, a corporate account sales force, and a telemarketing sales group. The Company's products are translated into 21 languages and sold in 58 countries throughout the world. MapInfo markets its products worldwide through sales offices in North America, Europe and Australia, and throughout the rest of Europe and the Asia-Pacific region through exclusive and non-exclusive distribution relationships.

#### Net Revenues

For the first quarter of fiscal 2001, revenues increased \$5.5 million or 26% to \$26.5 million from \$21.0 million in the same period a year ago. Approximately \$2.6 million of the increase was attributable to increased unit sales of data products, \$2.0 million was attributable to increased unit sales of software products, and \$0.9 million was attributable to increased sales of services. The growth in data revenues primarily resulted from increased demand for data products, principally in the Americas, as a result of selling enterprise solutions that incorporate the full suite of MapInfo's software, information products and services. On a geographic basis, revenues increased approximately 45% in the Americas and 14% in EAME, offset partially by a decrease of 24% in Asia-Pacific over the same period a year ago. The increase in the Americas revenues was mainly attributable to the increased sales of data and software products as previously discussed. The decrease in Asia-Pacific revenues was mainly the result of a decline in revenues in Australia. Excluding the effect of foreign currency translation, EAME revenue would have increased 21% and Asia-Pacific revenue would have decreased 16% for the quarter compared to the prior year results.

#### Cost of Revenues, Operating Expenses and Income Taxes

## Edgar Filing: MAPINFO CORP - Form 10-Q

Cost of revenues as a percentage of revenues remained flat at 21.6% in the first quarter of 2001 compared to the same period in 2000. As a result, the gross margin was consistent with prior year at 78.4%.

Research and development (R&D) expenses of \$4.1 million in the first quarter of fiscal 2001 increased 26% over the prior year period. The increase in R&D expenses in the quarter was primarily attributable to a 52 person increase in headcount, 18 resulting from the acquisition of Compusearch, with the balance of the increase supporting the Company's QA initiatives and expansion into wireless and CRM applications. As a percentage of revenues, R&D expenses in the first quarter of 2001 remained flat at 15.5% when compared to the first quarter of prior year.

Selling and marketing expenses increased 16% to \$10.4 million in the first quarter of 2001 from \$9.0 million for the same period in 2000. The increase was primarily attributable to a 10% increase in headcount as well as increased commission expense in the sales organization resulting from the strong first quarter 2001 revenue. As a percentage of revenues, selling and marketing expenses decreased to 39.0% in the first quarter of 2001 from 42.6% for the same period in 2000 due to improved sales productivity.

General and administrative (G&A) expenses increased 12% to \$3.3 million in the first quarter of fiscal 2001 from \$2.9 million for the same period in 2000. The Americas' G&A organization experienced an increase in headcount of 11%, primarily in the MIS organization, during the first quarter 2001 compared to prior year. Included in G&A expenses for the first quarter of fiscal 2001 and fiscal 2000 was amortization of intangibles relating to acquisitions of \$308 thousand and \$292 thousand, respectively. For the first quarter of fiscal 2001, G&A expenses as a percentage of revenues decreased to 12.5% as compared to 14.0% for the same period in fiscal 2000.

Other income, net increased \$67 thousand to \$337 thousand in the first quarter of fiscal 2001 from \$270 thousand for the same period in 2000. Other income, net consists primarily of interest income. Interest income for the first quarter was \$596 thousand versus \$359 thousand in the first quarter of fiscal 2000. The increase in interest income is due to the increased cash and short-term investment balances and the increase in interest rates. In addition, foreign currency effects had a negative impact of \$84 thousand in the first quarter of 2001 versus a favorable impact of \$50 thousand in the first quarter of fiscal 2000.

The effective income tax rate for the quarter ended December 31, 2000 was consistent with the quarter ended December 31, 1999 at 37%.

### Financial Condition

The Company's cash and short-term investments totaled \$36.5 million at December 31, 2000 compared to \$39.0 million at September 30, 2000. The Company's investment portfolio consisted primarily of short-term investment grade marketable securities.

MapInfo has no long-term debt. The Company has a \$10 million credit facility with a bank that expires in December 2001, and a \$10 million credit facility with a bank that expires in January 2002. There were no outstanding borrowings under either facility at December 31, 2000.

Net cash generated from operating activities was \$3.9 million for the quarter ended December 31, 2000 compared to \$1.1 million for the same period in fiscal 2000. The cash generated from operating activities in the first quarter of 2001 was principally the result of net income and collection of accounts receivable. Net cash used for investing activities in the first quarter of 2001 was \$8.1 million. Investing activities included \$1.1 million in purchases of property and equipment, \$1.0 million for an equity investment (in the form of a convertible note) in Foveon Corp., and \$6.6 million for the December 8, 2000 acquisition of assets of Compusearch Inc. (including related expenses), offset by net cash flows from short-term investments of \$600 thousand. Financing activities generated \$2.3 million during the first quarter of 2001, principally due to proceeds from the exercise of stock options.

Management believes existing cash and short-term investments together with funds generated from operations will be sufficient to meet the Company's operating requirements for the next twelve months.

In February 2001, the Company entered into a 49-year ground lease, with two 10-year renewal options, on 16 acres of land adjacent to the Company's One Global View facility in the Rensselaer Technology Park in Troy, New York. The cost of the 49-year ground lease is \$2.1 million payable in May 2001. Under a Construction and Services Agreement with Rensselaer Polytechnic Institute ("RPI"), the Company plans to construct a four-story, 150,000 square-foot facility to house the Company's Corporate Headquarters and the Americas business operations. The facility is expected to be completed by early calendar year 2002 at a projected total cost of \$17.5 million. Upon occupancy of the new facility, the Company will vacate and terminate the lease on its 40,000 square-foot facility at Four Global View, without further obligation or penalty. In addition, the Company has secured an option to acquire on or before December 31, 2001 the 60,000 square-foot facility at One Global View for \$5.25 million together with an option to acquire a 49-year ground lease of the 14 acres on which the One Global View facility is sited. The purchase price for the ground lease is \$1.8 million. If the Company does not exercise such purchase options, it may continue to lease One Global View through 2016. The Company plans to finance the construction of the 150,000 square foot facility and the related ground lease from either existing cash resources, future cash flows from operations, debt or equity financing that the Company may arrange in the future, or from a sale/leaseback transaction.

Pursuant to an Asset Purchase Agreement dated December 15, 1998, the Company acquired substantially all of the assets and assumed certain liabilities of On Target Communications Inc. ("On Target Mapping"). As per the agreement, the Company is obligated to make a contingent cash payment in March 2001, based on the financial performance of On Target Mapping in the two years following the acquisition. The Company estimates this payment to be approximately \$4.0 million. This additional payment will be recorded as goodwill and amortized over the next three years.

#### Investment in Alps Mapping Co., Ltd.

In March 2000, the Company acquired 16.7% of the outstanding common stock of Alps Mapping Co., Ltd. ("Alps"), a leading data provider headquartered in Nagoya, Japan. The Company invested 100 million Yen (approximately \$1.0 million) to acquire the 16.7% equity position and 400 million Yen (approximately \$3.7 million) in three debt instruments with warrants that could be converted over time into as much as a 51% common stock ownership position. In addition, the companies have executed an operating agreement whereby MapInfo will assist in the development of new data products for the Japan market and the integration of these products with the full suite of MapInfo software products and solutions. This investment is accounted for under the equity method of accounting.

#### New Accounting Standards

In the first quarter of fiscal 2001, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities," which establishes accounting and reporting standards for derivative instruments and hedging activities. It requires that an entity recognizes all derivatives as either assets or liabilities in the balance sheet and measures those instruments at fair value. The accounting for changes in the fair value of a derivative is dependent on the intended use of the derivative and the resulting designation. The adoption of SFAS No. 133 did not have a material effect on the Company's financial position or results of operations.

In December 1999, the SEC issued Staff Accounting Bulletin No. 101 "Revenue Recognition in Financial Statements," which is effective no later than the fourth fiscal quarter of the first fiscal year beginning after December 15, 1999. SAB 101 clarifies the SEC's views related to revenue recognition and disclosure. The Company does not believe that the adoption of SAB 101 will have a material effect on the Company's financial position or results of operations.

#### Outlook: Issues and Risks

This Quarterly Report on Form 10-Q contains forward-looking statements. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," and similar expressions are intended to identify forward-looking statements, including statements as to the sufficiency of funds to meet operating requirements for the next 12 months. The following important factors, among others, could cause actual results to differ materially from those indicated by forward-looking statements made in this Quarterly Report on Form 10-Q and presented elsewhere by management from time to time. In addition to the other information in this Quarterly Report on Form 10-Q, the following issues and risks, among others, should be considered in evaluating MapInfo's outlook and future.

#### New products and technological change.

The mapping software and information business is characterized by extremely rapid technological change, evolving industry standards, and frequent new product introductions. These conditions require continuous expenditures on product research and development to enhance existing products and to create new products. The Company believes that the timely development of new products and continuing enhancements to existing products is essential to maintain its competitive position in the marketplace. During recent years, the Company introduced a number of new products, including SpatialWare®, TargetPro™, deciBel Planner™, MapXsite®, MapXtreme™ and MapInfo MapX®. The Company also recently began undertaking broad initiatives in wireless and CRM applications. The Company's future success depends, in part, upon customer and market acceptance of these new products and initiatives. Any failure to achieve acceptance of these and other new product offerings could have a material adverse effect on the Company's business and results of operations.

There can be no assurance that the Company will successfully complete the development of new or enhanced products or successfully manage transitions from one product release to the next.

#### Competition.

The Company encounters significant competition in the market for business mapping systems worldwide. Some of the Company's competition may have significant name recognition, as well as substantially greater capital resources, marketing experience, research and development staffs and production facilities than the Company. Increased competition may lead to pricing pressures that could adversely affect the Company's gross margins. Prices of software in Europe and Asia are generally higher than in the Americas to cover localization costs and higher costs of distribution. Such price uplifts could erode in the future.

#### Reliance on third parties.

The Company relies in part on strategic partners and independent developers for the development of specialized data products that use MapInfo software. Failure by such strategic partners or independent developers to continue to develop such data products, or changes in the contractual arrangements with such strategic partners or independent developers, could have a material adverse effect on the Company's business and results of operations.

#### Risks associated with international operations.

Revenues outside the Americas represented approximately 35% of total Company revenues in the first quarter of fiscal 2001. The international portion of the Company's business is subject to a number of inherent risks, including the difficulties in building and managing international operations, reliance on financial commitments from certain international distributors, difficulties in localizing products and translating documentation into foreign languages, fluctuations in import/export duties and quotas, and regulatory, economic, or political changes in international markets. The Company's operating results are also affected by exchange rates. Approximately 25% of the Company's revenues were denominated in foreign currencies during the three months ended December 31, 2000. Changes in international business conditions could have a material adverse effect on the Company's business and results of

operations.

Prices.

Future prices the Company is able to obtain for its products may decrease from previous levels depending upon market or competitive pressures or distribution channel factors. Any decrease could have a material adverse effect on the Company's business and results of operations.

Intellectual property rights.

The Company regards its software as proprietary and attempts to protect it with a combination of copyright, trademark and trade secret laws, employee and third-party non-disclosure agreements, and other methods of protection. Despite these precautions, it may be possible for unauthorized third parties to copy certain portions of the Company's products, reverse engineer or obtain and use information the Company regards as proprietary. In addition, the Company's shrink-wrap licenses, under which the Company licenses its products, may be unenforceable under the laws of certain jurisdictions. Also, the laws of some foreign countries do not protect the Company's proprietary rights to the same extent as the laws of the United States. Any misappropriation of the Company's intellectual property could have a material adverse effect on the Company's business and results of operations. Furthermore, there can be no assurance that third parties will not assert infringement claims against the Company in the future with respect to current or future products. Any such assertion could require the Company to enter into royalty arrangements or result in costly litigation.

Cost of revenues.

Cost of revenues varies with the mix of technology development and licensing fees, product revenues, and services revenues, as well as with the distribution channel mix. Changes in the revenue mix, as well as the distribution model, may affect cost of revenues as a percentage of net revenues in the future.

Risks associated with distribution channels.

The Company primarily markets and distributes its products in North America, Europe and Australia through the Company's telesales, outside sales force and through third-party resellers. In the rest of the Asia-Pacific region, the Company's products are marketed and distributed through exclusive and non-exclusive distribution relationships. The Company has limited control over resellers and distributors that are not employees of the Company. There can be no assurance that the Company will be able to retain its current resellers and distributors, that the resellers and distributors will perform to the Company's expectations, or that the Company will be able to expand its distribution channels by entering into arrangements with new resellers and distributors in the Company's current markets or in new markets.

Variability of quarterly operating results.

The Company's quarterly operating results may vary significantly from quarter to quarter, depending upon factors such as the introduction and market acceptance of new products and new versions of existing products, the ability to reduce expenses, and the activities of competitors. Because a high percentage of the Company's expenses are relatively fixed in the near term, minor variations in the timing of orders and shipments can cause significant variations in quarterly operating results. The Company operates with little or no backlog and has no long-term contracts, and substantially all of its product revenues in each quarter result from software licenses issued in that quarter. Accordingly, the Company's ability to accurately forecast future revenues and income for any period is necessarily limited. Also, the Company could experience reduced revenues from telecommunications and Internet companies as a result of decreased spending in those industries.

Potential volatility of stock price.

There has been, and will likely continue to be, significant volatility in the market price of securities of technology companies. Factors such as announcements of new products by the Company or its competitors, quarterly fluctuations in the Company's financial results or other software companies' financial results, shortfalls in the Company's actual financial results compared to results previously forecasted by stock market analysts, and general conditions in the software industry and conditions in the financial markets could cause the market price of the Common Stock to fluctuate substantially. These market fluctuations may adversely affect the price of the Company's Common Stock.

Risks associated with acquisitions and investments.

The Company has made a number of acquisitions and investments and will continue to review future acquisition opportunities. No assurances can be given that acquisition candidates will continue to be available on terms and conditions acceptable to the Company. Acquisitions involve numerous risks, including, among other things, possible dilution to existing shareholders, difficulties and expenses incurred in connection with the acquisitions and the subsequent assimilation of the operations and services or products of the acquired companies, the difficulty of operating new businesses, the diversion of management's attention from other business concerns and the potential loss of key employees of the acquired company. In the event that the operations of an acquired business do not meet expectations, the Company may be required to restructure the acquired business or write-off the value of some or all of the assets of the acquired business. There can be no assurance that any acquisition will be successfully integrated into the Company's operations.

Reliance on attracting and retaining key employees.

The Company's continued success will depend in large part on its ability to attract and retain highly qualified technical, managerial, sales and marketing, executive, and other personnel. Competition for such personnel is intense. There can be no assurance that the Company will be able to continue to attract or retain such personnel. Loss of key personnel or changes in management could have an adverse impact on the Company.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company exports products to diverse geographic locations. Most of the Company's international revenues through subsidiaries are denominated in foreign currencies. To date, foreign currency fluctuations have not had a material effect on the Company's operating results or financial condition. The Company's exposure is mitigated, in part, by the fact that it incurs certain operating costs in the same foreign currencies in which revenues are denominated. In addition, the Company has entered into a foreign currency contract to hedge against a Japanese yen denominated receivable with a notional value expressed in U.S. dollars of \$3.8 million.

The Company is also exposed to fluctuations in interest rates. A significant portion of the Company's cash is invested in short-term interest-bearing securities. To date, interest rate fluctuations have not had a material impact on the Company's operating results or financial condition.

Part II. Other Information

Item 1. Legal Proceedings

In December 2000, the Company was named as a defendant in an action filed by Michael Reiff in the United States District Court Northern District of New York alleging breach of a purported contract of employment, and related matters in connection with the Company's termination of Reiff as the Company's Vice President and General Manager, Asia Pacific Operations. The complaint seeks \$2.6 million compensation for loss of employment and consequent loss of stock option vesting, and \$15.0 million in punitive damages. The Company believes these claims are without merit and intends to defend them vigorously.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

The exhibits listed in the Exhibit Index filed as part of this report are filed as part of this report or are included in this report

(b) Reports on Form 8-K

No reports on Form 8-K were filed during the three months ended December 31, 2000.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
