SEMI-ANNUAL REPORT

JUNE 30, 2008

#### A Letter to Shareholders

THIS PAGE NOT PART OF YOUR FUND REPORT

#### **Dear Shareholder**

Throughout the past year, investors were overwhelmed by lingering credit and financial market troubles, surging oil prices and more recently, renewed inflation concerns. Healthy nonfinancial corporate profits and robust exporting activity remained among the few bright spots, helping the economy to grow at a modest, but still positive, pace.

The Federal Reserve Board (the Fed ) has been aggressive in its attempts to stoke economic growth and ease financial market instability. In addition to slashing the target federal funds rate 325 basis points (3.25%) between September 2007 and April 2008, the central bank introduced the new Term Securities Lending Facility, granted broker-dealers access to the discount window and used its own balance sheet to help negotiate the sale of Bear Stearns. As widely anticipated, the end of the period saw a pause in Fed action, as the central bank held the target rate steady at 2.0% amid rising inflationary pressures.

As the Fed s bold response to the financial crisis helped ease credit turmoil and investor anxiety, U.S. equity markets sank sharply over the last six months, notwithstanding a brief rally in the spring. International markets were not immune to the tumult, with most regions also registering declines.

Treasury securities also traded in a volatile fashion, but generally rallied (yields fell as prices correspondingly rose), with investors continuing to seek safety as part of a broader flight to quality. The yield on 10-year Treasury issues, which fell to 3.34% in March 2008, climbed up to the 4.20% range in mid-June as investors temporarily shifted out of Treasury issues in favor of riskier assets (such as stocks and other high-quality fixed income sectors), then reversed course and declined to 3.99% by period-end when credit fears re-emerged.

Tax-exempt issues eked out gains for the reporting period, but underperformed their taxable counterparts, as the group continued to be pressured by problems among municipal bond insurers and the breakdown in the market for auction rate securities.

The major benchmark indexes generated results that largely reflected heightened investor risk aversion:

Total Returns as of June 30, 2008	6-month		12-month	1
U.S. equities (S&P 500 Index)	(11.91	)%	(13.12	)%

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only.

You cannot invest directly in an index.

As you navigate today s volatile markets, we encourage you to review your investment goals with your financial professional and to make portfolio changes, as needed. For more up-to-date commentary on the economy and financial markets, we invite you to visit <a href="https://www.blackrock.com/funds">www.blackrock.com/funds</a>. As always, we thank you for entrusting BlackRock with your investment assets, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC Trust Summary as of June 30, 2008

#### **BlackRock Insured Municipal 2008 Term Trust**

#### **Investment Objective**

BlackRock Insured Municipal 2008 Term Trust (BRM) (the Trusts) eks to provide monthly income that is exempt from regular federal income tax and to return \$15 per share (the initial offering price per share) to investors on or about December 31, 2008.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned 1.49% based on market price and 1.49% based on net asset value (NAV). For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of (3.26)% on a NAV basis. All returns reflect reinvestment of dividends. The portfolio is being managed to achieve the goal of returning \$15 per share on 12/31/2008, and is invested with a short duration. This, combined with high credit quality, was the primary driver of the Trust soutperformance during a period of rising long-term rates. Low reinvestment rates for maturing principal detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JUNE 30, 2008 4

BlackRock Insured Municipal Term Trust (BMT) (the Trusts) eks to provide monthly income that is exempt from regular federal income tax and to return \$10 per share (the initial offering price per share) to investors on or about December 31, 2010.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned 3.89% based on market price and 1.42% based on NAV. For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of (3.26)% on a NAV basis. All returns reflect reinvestment of dividends. The portfolio is being managed to achieve a goal of returning \$10 per share on 12/31/2010, and is invested in shorter-term issues. This was the primary driver of the Trust soutperformance as long-term rates rose during the six months. Leverage was less efficient during the period, which detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JUNE 30, 2008 5

BlackRock Municipal 2018 Term Trust (BPK) (the Trusts) eks to provide monthly income that is exempt from regular federal income tax and to return \$15 per share (the initial offering price) to investors on or about December 31, 2018.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned 2.10% based on market price and (3.04)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of (3.00)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s shorter duration bias was a positive contributor to performance as long-term rates rose during the six months. Detracting from the Trust s relative performance was the asset allocation to lower-rated issues as the market experienced spread widening.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

JUNE 30, 2008

7

**BlackRock Strategic Municipal Trust (BSD) (the Trust** ) seeks to provide high current income exempt from regular federal income tax, consistent with the preservation of capital.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned (3.75)% based on market price and (4.39)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of (3.00)% on a NAV basis. All returns reflect reinvestment of dividends. On the whole, portfolio positioning and credit exposure were the primary detractors from the Trust's relative performance. Throughout the period, we remained focused on delivering a competitive dividend yield. While we were successful in this effort, the Trust's exposure to lower-rated holdings proved detrimental as credit spreads widened considerably. In the interest of sustaining the Trust's competitive yield, we do not anticipate any significant changes in portfolio composition in the near-term.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

8 SEMI-ANNUAL REPORT JUNE 30, 2008

Trust Summary as of June 30, 2008

**BlackRock California Insured Municipal 2008 Term Trust** 

#### **Investment Objective**

BlackRock California Insured Municipal 2008 Term Trust (BFC) (the Trust ) seeks to provide monthly income that is exempt from regular federal and California income taxes and to return \$15 per share (the initial public offering price) to investors on or about December 31, 2008.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned 1.12% based on market price and 1.26% based on NAV. For the same period, the closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (2.38)% on a NAV basis. All returns reflect reinvestment of dividends. The portfolio is being managed to achieve the goal of returning \$15 per share on 12/31/2008, and is invested primarily in short-term issues. This resulted in the Trust s relative outperformance as long-term rates rose during the six months. Low short-term reinvestment rates detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

10 SEMI-ANNUAL REPORT JUNE 30, 2008

BlackRock Florida Insured Municipal 2008 Term Trust (BRF) (the Trusts) eks to provide monthly income that is exempt from regular federal income tax and Florida intangible personal property taxes and to return \$15 per share (the initial public offering price) to investors on or about December 31, 2008.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned 0.92% based on market price and 1.46% based on NAV. For the same period, the closed-end Lipper Single-State Insured Municipal Debt Funds category posted an average return of (2.38)% on a NAV basis. All returns reflect reinvestment of dividends. The portfolio is being managed to achieve a goal of returning \$15 per share on 12/31/2008, and is invested primarily in short-term issues. This resulted in the relative outperformance as long-term rates rose during the six months. Low short-term reinvestment rates on maturing principal detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JUNE 30, 2008 11

BlackRock Florida Municipal 2020 Term Trust (BFO) (the Trusts) eks to provide current income that is exempt from regular federal income tax and Florida intangible personal property taxes and to return \$15.00 per share (the initial public offering price) on or about December 31, 2020.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned (1.81)% based on market price and (1.23)% based on NAV. For the same period, the closed-end Lipper Florida Municipal Debt Funds category posted an average return of (2.48)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s intermediate duration bias was the primary driver of relative outperformance as long-term rates rose during the six months. Meanwhile, the allocation to lower-rated issues detracted from results as the market experienced spread widening during the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

14 SEMI-ANNUAL REPORT JUNE 30, 2008

BlackRock Pennsylvania Strategic Municipal Trust (BPS) (the Trusts) eks to provide monthly income that is exempt from regular federal and Pennsylvania income taxes.

#### **Performance**

For the six months ended June 30, 2008, the Trust returned (2.44)% based on market price and (2.74)% based on NAV. For the same period, the closed-end Lipper Pennsylvania Municipal Debt Funds category posted an average return of (2.78)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s relatively neutral duration posture benefited performance during a period of municipal bond relative underperformance and rising interest rates. The incremental yield derived from the Trust s lower-rated issues also positively impacted recent performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

#### The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, the Trusts may issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. The interest earned on these investments is paid to Common Shareholders in the form of dividends, and the value of these Portfolios holdings is reflected in the per share NAV of the Trusts Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a trust s Common Share capitalization of \$100 million and the issuance of Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, then the yield curve has a strongly positive slope. The trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the trust s total portfolio of \$150 million earns income based on long-term interest rates.

In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield. However, **if short-term interest rates rise**, narrowing the differential between short-term and long-term interest rates, **the incremental yield pickup on the Common Shares will be reduced or eliminated completely.** At the same time, the market value on the trust s Common Shares (that is, its price as listed on the New York Stock Exchange or American Stock Exchange) may, as a result, decline. Furthermore, **if long-term interest rates rise**, **the Common Shares NAV will reflect the full decline in the price of the portfolio s investments**, **since the value of the trust s Preferred Shares does not fluctuate**. In addition to the decline in NAV, the market value of the trust s Common Shares may also decline.

In addition, the Trusts may from time to time leverage their assets through the use of tender option bond ( TOB ) programs. In a typical TOB program, the Trust transfers one or more municipal bonds to a TOB trust, which issues short-term variable rate securities to third-party investors and a residual interest to the Trust. The cash received by the TOB trust from the issuance of the short-term securities (less transaction expenses) is paid to the Trust, which invests the cash in additional portfolio securities. The distribution rate on the short-term securities is reset periodically (typically every seven days) through a remarketing of the short-term securities. Any income earned on the bonds in the TOB trust, net of expenses incurred by the TOB trust, that is not paid to the holders of the short-term securities is paid to the Trust. In connection with managing the Trusts assets, the Trusts investment advisor may at any time retrieve the bonds out of the TOB trust typically within seven days. TOB investments generally will provide the Trust with economic benefits in periods of declining short-term interest rates, but expose the Trust to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trust, as described above. Additionally, fluctuations in the market value of municipal securities deposited into the TOB trust may adversely affect the Funds NAVs per share. (See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOB trusts.).

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount up to 50% of their total managed assets at the time of issuance. Each Trust also anticipates that its total economic leverage from Preferred Shares and TOBs will not exceed 50% of its total managed assets. As of June 30, 2008, the Trusts had leverage from Preferred Shares and

#### TOBs as a percentage of managed assets as follows:

	Percent of Leverage
Insured Municipal Term Trust	16%
Municipal 2018 Term Trust	38%
Municipal 2020 Term Trust	39%
Strategic Municipal Trust	39%
California Municipal 2018 Term Trust	38%
Florida Municipal 2020 Term Trust	38%
New York Municipal 2018 Term Trust	36%
Pennsylvania Strategic Municipal Trust	39%

#### **Swap Agreements**

16

The Trusts may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Trust has entered into a swap will default on its obligation to pay the Trust and the risk that the Trust will not be able to meet its obligation to pay the other party to the agreement.
