GSE SYSTEMS INC
Form 424B4
September 26, 2005

[GRAPHIC OMITTED] [GRAPHIC OMITTED]

September 30, 2005

Dear GP Strategies Stockholder:

I am pleased to send you the attached prospectus concerning GSE Systems, Inc. and notify you of the special distribution of shares of GSE Systems common stock to the holders of GP Strategies common stock and Class B Capital Stock. On June 21, 2005, the Board of Directors of GP Strategies Corporation approved the spin-off of GP Strategies' approximately 57% interest in GSE Systems through a special distribution of the shares of GSE Systems held by GP Strategies to GP Strategies stockholders. As a result, GP Strategies stockholders will receive in the spin-off .283075 shares of GSE Systems common stock for each share of GP Strategies common stock or Class B Capital Stock held.

GSE Systems provides simulation solutions and services to the nuclear and fossil electric utility industry, the chemical and petrochemical industries and to the US Military Complex. It also provides plant monitoring and signal analysis monitoring and optimization software primarily to the power industry. Shares of GSE Systems common stock are listed on the American Stock Exchange under the symbol "GVP."

The enclosed Prospectus describes the distribution of shares of GSE Systems common stock and contains important information about GSE Systems and its business. I suggest that you read it carefully.

No action is required on your part to receive your GSE Systems shares. You will not be required either to pay anything for the new shares or to surrender any certificates representing shares of GP Strategies stock. However, the distribution may be taxable to you as a dividend. Please read the information set forth under the caption "Material Federal Income Tax Consequences of the Spin-Off" in the attached Prospectus and consult your tax advisor with respect to the income tax consequences of the distribution to you.

If you have any questions regarding the distribution, please contact Lydia M. DeSantis at (914) 249-9700, or GSE Systems' stock transfer agent and registrar, Continental Stock Transfer & Trust Company, Research Department, 17 Battery Place, 8th Floor, New York, NY 10004 Telephone: 212-509-4000.

Very truly yours,

Scott N. Greenberg
Chief Executive Officer

Edgar Filing: GSE SYSTEMS INC - Form 424B4

PROSPECTUS

GSE SYSTEMS, INC.

5,154,052 Shares of Common Stock

GP Strategies Corporation owns an approximately 57% interest in GSE Systems, Inc. In this spin-off, GP Strategies will distribute all of its shares of GSE Systems common stock to GP Strategies stockholders on a pro rata basis. Each of you, as a holder of GP Strategies' common stock or Class B capital stock, will receive .283075 shares of GSE Systems common stock for each share of GP Strategies common stock or Class B capital stock you owned on the close of business on September 19, 2005, the record date for the spin-off. If as a result of the foregoing ratio you would be entitled to a fraction of a share of GSE Systems common stock, you will receive cash in lieu of a fractional share interest.

We are sending you this Prospectus to describe the spin-off. We expect the spin-off to occur on or about September 30, 2005. You will receive your proportionate number of shares of GSE Systems common stock through our transfer agent's book-entry registration system. These shares will not be in certificated form. Following the spin-off, recipient stockholders may request to receive their shares of our common stock in certificated form. Immediately after the spin-off is completed, GP Strategies will not own any shares of GSE Systems common stock. We refer to ourselves in this Prospectus as "GSE Systems," "GSE," the "Company," or "we" or "us."

No stockholder action is necessary to receive your shares of GSE Systems common stock. This means that you do not need to pay anything to GP Strategies or to GSE Systems, and you do not need to surrender any shares of GP Strategies' common stock or Class B capital stock to receive your shares of GSE Systems common stock. In addition, a stockholder vote is not required for the spin-off to occur. GP Strategies is not asking you for a proxy, and GP Strategies requests that you do not send a proxy.

As you review this Prospectus, you should carefully consider the matters described in "Risk Factors" beginning on page 3. Our common stock is listed on the American Stock Exchange under the symbol "GVP." On September 19, 2005, the closing sale price of the common stock on the American Stock Exchange was \$1.53.

These securities have not been approved or disapproved by the Securities and Exchange Commission or any state securities commission nor has the Securities and Exchange Commission or any state securities commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

This Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any securities. Changes may occur after the date

Edgar Filing: GSE SYSTEMS INC - Form 424B4

of this Prospectus and neither GSE Systems nor GP Strategies will update the information contained herein except in the normal course of their respective public disclosures.

Stockholders of GP Strategies with inquiries related to the spin-off should contact Lydia M. DeSantis at (914) 249-9700, or GSE Systems' stock transfer agent and registrar, Continental Stock Transfer & Trust Company, Research Department, 17 Battery Place, 8th Floor, New York, NY 10004, Telephone: 212-509-4000.

The date of this Prospectus is September 30, 2005.

Special Note Regarding Forward-Looking Statements

This prospectus contains "forward-looking" statements that have been made pursuant to the Private Securities Litigation Reform Act of 1995 which reflect our expectations regarding our future growth, results of operations, performance and business prospects and opportunities. Wherever possible, words such as "anticipate," "believe," "plan," "expect" and similar expressions have been used to identify these forward-looking statements. These statements reflect our current beliefs and are based on information currently available to us. Accordingly, these statements are subject to risks and uncertainties, including those listed under "Risk Factors," which could cause our actual growth, results, performance and business prospects and opportunities to differ from those expressed in, or implied by, these statements. Except as otherwise required by federal securities law, we are not obligated to update or revise these forward-looking statements to reflect new events or circumstances.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and special reports, proxy statements and

Edgar Filing: GSE SYSTEMS INC - Form 424B4

other information with the Securities and Exchange Commission ("SEC"). You may read and copy any document we file at the public reference facilities of the SEC located at Station Place, 100 F Street, N.E., Washington D.C. 20549. You may obtain information on the operation of the SEC's public reference facilities by calling the SEC at 1-800-SEC-0330. You can also access copies of this material electronically on the SEC's home page on the World Wide Web at <http://www.sec.gov>.

This prospectus is part of a registration statement (Registration No. 333-126472) we filed with the SEC. The SEC permits us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. However, any information contained herein shall modify or supersede information contained in documents we filed with the SEC before the date of this prospectus. We incorporate by reference our Annual Report on Form 10-K for the year ended December 31, 2004, filed on March 17, 2005, our Annual Report on Form 10-K/A for the year ended December 31, 2004, filed on May 2, 2005, our Annual Report on Form 10-K/A for the year ended December 31, 2004, filed on August 15, 2005, our Quarterly Report on Form 10-Q for the quarter ended March 31, 2005, filed on May 16, 2005, our Quarterly Report on Form 10-Q/A for the quarter ended March 31, 2005, filed on August 16, 2005, our Quarterly Report on Form 10-Q for the quarter ended June 30, 2005, filed on August 15, 2005, our Current Reports

2

on Form 8-K, filed on March 18, 2005, May 11, 2005, May 27, 2005, and August 11, 2005, our Current Report on Form 8-K/A, filed on August 16, 2005, and the description of our common stock contained in our registration statement pursuant to Section 12 of the Exchange Act, and any amendment or report filed for the purpose of updating such description, filed by us with the SEC.

A copy of our Annual Report on Form 10-K for the year ended December 31, 2004, as amended, and our Quarterly Report on Form 10-Q for the quarter ended June 30, 2005, are being delivered with this prospectus. You may write or telephone us to obtain at no cost a copy of any or all of the documents incorporated by reference. You should direct written requests to 9189 Red Branch Road, Columbia, Maryland 21045, Attn: Secretary. Our telephone number is (410) 772-3500. However, we will not send you exhibits to a document, unless the exhibits are specifically incorporated by reference in the document.

THE COMPANY

GSE Systems, Inc. is a leader in real-time, high fidelity simulation. The Company provides simulation solutions and services to the nuclear and fossil electric utility industry, the chemical and petrochemical industries and to the US Military Complex. In addition, the Company provides plant monitoring and signal analysis monitoring and optimization software primarily to the power industry. Our executive offices are located at 9189 Red Branch Road, Columbia, Maryland 21045. Our telephone number is (410) 772-3500. We maintain a Web site at <http://www.gses.com>. Nothing contained in such Web site should be deemed a part of this prospectus.

RISK FACTORS

You should carefully consider the risks described below before making an investment decision. The risks and uncertainties described below may not be the only ones we will face. Additional risks and uncertainties not presently known to us or that we currently deem not material may also impair our business operations. If any of the following risks actually occur, our business,

Edgar Filing: GSE SYSTEMS INC - Form 424B4

financial condition or results of operations could be materially adversely affected. In such case, the trading price of our common stock could decline, and you may lose all or part of your investment.

The Company has limited cash resources. If the Company is unable to generate adequate cash flow from operations, it will need additional capital to fund its operations.

For the years ended December 31, 2003 and 2002, the Company experienced net losses from continuing operations of \$1.9 million and \$4.3 million, respectively, and had only \$82,000 of income from continuing operations for the year ended December 31, 2004. The Company also had a net loss of \$1.6 million for the first six months of fiscal 2005. The Company's backlog has decreased from \$30.4 million at December 31, 2003 to \$19.6 million at December 31, 2004 and \$14.7 million at June 30, 2005. The Company has cash available through a credit facility of \$1.5 million, of which \$725,000 had been utilized at June 30, 2005. In addition, the Company recently issued and sold to an investor a senior subordinated secured convertible note of the Company and a warrant to purchase shares of our common stock for an aggregate purchase price of \$2,000,000. However, if the Company's income from continuing operations does not improve, it may need additional capital to fund its operations. If adequate funds are not available, GSE may be required to curtail its operations.

The Company will continue to rely on GP Strategies for certain services.

The Company's business has historically relied on GP Strategies for various services.

On January 1, 2004, the Company entered into a Management Services Agreement with GP Strategies Corporation in which GP Strategies agreed to provide corporate support services to GSE, including accounting, finance, human resources, legal, network support and tax. In addition, GSE uses General Physics' financial system. In 2004, GSE was charged \$685,000 for General

3

Physics' services. The agreement has been extended through December 31, 2005 without an increase in the fee. The agreement can be renewed for successive one-year terms.

In addition, the Company does not have an independent credit facility; instead, \$1.5 million of General Physics' available credit facility has been carved out for use by the Company.

Although GP Strategies will no longer have any ownership interest in the Company following the spin-off, the Company will continue to rely on these services for the foreseeable future. However, there can be no assurance that GP Strategies will continue to be willing to provide such services to the Company after the spin-off.

The Company's expense levels are based upon its expectations as to future revenues, so it may be unable to adjust spending to compensate for a revenue shortfall. Accordingly, any revenue shortfall would likely have a disproportionate effect on the Company's operating results.

The Company's revenues were \$29.5 million and \$25.0 million in 2004 and 2003, respectively, and \$13.0 million for the six months ended June 30, 2005. The Company's operating results have fluctuated in the past and may fluctuate significantly in the future as a result of a variety of factors, including

Edgar Filing: GSE SYSTEMS INC - Form 424B4

purchasing patterns, timing of new products and enhancements by the Company and its competitors, and fluctuating foreign economic conditions. Since the Company's expense levels are based in part on its expectations as to future revenues and includes certain fixed costs, the Company may be unable to adjust spending in a timely manner to compensate for any revenue shortfall and such revenue shortfalls would likely have a disproportionate adverse effect on operating results. The Company believes that these factors may cause the market price for its common stock to fluctuate, perhaps significantly. In addition, in recent years the stock market in general, and the shares of technology companies in particular, have experienced extreme price fluctuations. The Company's common stock has also experienced a relatively low trading volume, making it further susceptible to extreme price fluctuations.

Risk of International Sales and Operations.

Sales of products and the provision of services to end users outside the United States accounted for approximately 65.1% of the Company's consolidated revenue in 2004. The Company anticipates that international sales and services will continue to account for a significant portion of its revenue in the foreseeable future. As a result, the Company may be subject to certain risks, including risks associated with the application and imposition of protective legislation and regulations relating to import or export (including export of high technology products) or otherwise resulting from trade or foreign policy and risks associated with exchange rate fluctuations. Additional risks include potentially adverse tax consequences, tariffs, quotas and other barriers, potential difficulties involving the Company's strategic alliances and managing foreign sales agents or representatives and potential difficulties in accounts receivable collection. The Company currently sells products and provides services to customers in emerging market economies such as Russia, Ukraine, Bulgaria, and the Czech Republic. Although end users in the Ukraine accounted for 20.7%, 28.7%, and 22.8% of the Company's consolidated revenue in 2004, 2003, and 2002, respectively, GSE's customer for these projects was Battelle's Pacific Northwest National Laboratory, which is the purchasing agent for the U.S. Department of Energy ("DOE"). The DOE provides funding for various projects in Eastern and Central Europe. Accordingly, the Company is not subject to the political and financial risks that are normally faced when doing business in the Ukraine. The Company has taken steps designed to reduce the additional risks associated with doing business in these countries, but the Company believes that such risks may still exist and include, among others, general political and economic instability, lack of currency convertibility, as well as uncertainty with respect to the efficacy of applicable legal systems. There can be no assurance that these and other factors will not have a material adverse effect on the Company's business, financial condition or results of operations.

4

The Company relies on one customer for a substantial portion of its revenue. The loss of this customer would have a material adverse effect upon the Company's revenues and results of operations.

For the years ended December 31, 2004, 2003, and 2002, one customer (Battelle's Pacific Northwest National Laboratory) accounted for approximately 24.0%, 28.7%, and 22.8%, respectively, of the Company's consolidated revenue. The Pacific Northwest National Laboratory is the purchasing agent for the DOE and the numerous projects the Company performs in Eastern and Central Europe. If the Company lost this customer, the Company's revenue and results of operations would be materially and adversely affected.

The Company's business is substantially dependent on sales to the

Edgar Filing: GSE SYSTEMS INC - Form 424B4

nuclear power industry. Any disruption in this industry would have a material adverse effect upon the Company's revenue.

In 2004, 85% of our revenue was from customers in the nuclear power industry. The Company will continue to derive a significant portion of its revenue from customers in the nuclear power industry for the foreseeable future. The Company's ability to supply nuclear power plant simulators and related products and services is dependent on the continued operation of nuclear power plants and, to a lesser extent, on the construction of new nuclear power plants. A wide range of factors affect the continued operation and construction of nuclear power plants, including the political and regulatory environment, the availability and cost of alternative means of power generation, the occurrence of future nuclear incidents, and general economic conditions.

The Company's available credit facility imposes significant operating and financial restrictions, which may prevent it from capitalizing on business opportunities.

GSE's available credit facility, which has been carved out of General Physics' credit facility, imposes significant operating and financial restrictions. These restrictions affect, and in certain cases limit, among other things, the Company's ability to:

- o incur additional indebtedness and liens;
- o make capital expenditures;
- o make investments and acquisitions and sell assets; and
- o consolidate, merge or sell all or substantially all of its assets.

At June 30, 2005, the Company was not in compliance with its debt service coverage ratio. The Company obtained a letter dated August 4, 2005 in which the lender has agreed to forebear from exercising its rights under the credit agreement against the Company and other borrowers with respect to this event of default until the Company has delivered to the lender the Company's financial statements for the year ending December 31, 2005. Borrowings outstanding under this arrangement are guaranteed by GP Strategies.

There can be no assurance that these restrictions will not adversely affect the Company's ability to finance its future operations or capital needs or to engage in other business activities that may be in the interest of stockholders.

The Company is dependent on product innovation and research and development, which costs are incurred prior to revenues for new products and improvements.

The Company believes that its success will depend in large part on its ability to maintain and enhance its current product line, develop new products,

maintain technological competitiveness and meet an expanding range of customer needs. The Company's product development activities are aimed at the development and expansion of its library of software modeling tools, the improvement of its display systems and workstation technologies, and the advancement and upgrading of its simulation technology. The life cycles for software modeling tools, graphical user interfaces, and simulation technology are variable and largely determined by competitive pressures. Consequently, the Company will need to

Edgar Filing: GSE SYSTEMS INC - Form 424B4

continue to make significant investments in research and development to enhance and expand its capabilities in these areas and to maintain its competitive advantage. There can be no assurance that the Company will have the financial resources to support such investments.

The Company relies upon its intellectual property rights for the success of its business; however, the steps it has taken to protect its intellectual property may be inadequate.

Although the Company believes that factors such as the technological and creative skills of its personnel, new product developments, frequent product enhancements and reliable product maintenance are important to establishing and maintaining a technological leadership position, the Company's business depends, in part, on its intellectual property rights in its proprietary technology and information. The Company relies upon a combination of trade secret, copyright, patent and trademark law, contractual arrangements and technical means to protect its intellectual property rights. The Company enters into confidentiality agreements with its employees, consultants, joint venture and alliance partners, customers and other third parties that are granted access to its proprietary information, and limits access to and distribution of its proprietary information. There can be no assurance, however, that the Company has protected or will be able to protect its proprietary technology and information adequately, that the unauthorized disclosure or use of the Company's proprietary information will be prevented, that others have not or will not develop similar technology or information independently, or, to the extent the Company owns patents, that others have not or will not be able to design around those patents. Furthermore, the laws of certain countries in which the Company's products are sold do not protect the Company's products and intellectual property rights to the same extent as the laws of the United States.

The industries in which GSE operates are highly competitive. This competition may prevent the Company from raising prices at the same pace as its costs increase.

The Company's businesses operate in highly competitive environments with both domestic and foreign competitors, many of whom have substantially greater financial, marketing and other resources than the Company. The principal factors affecting competition include price, technological proficiency, ease of system configuration, product reliability, applications expertise, engineering support, local presence and financial stability. The Company believes that competition in the simulation fields may further intensify in the future as a result of advances in technology, consolidations and/or strategic alliances among competitors, increased costs required to develop new technology and the increasing importance of software content in systems and products. As the Company's business has a significant international component, changes in the value of the dollar could adversely affect the Company's ability to compete internationally.

GSE will continue to pursue new acquisitions and joint ventures, and any of these transactions could adversely affect its operating results or result in increased costs or other problems.

The Company intends to continue to pursue new acquisitions and joint ventures, a pursuit which could consume substantial time and resources. Identifying appropriate acquisition candidates and negotiating and consummating acquisitions can be a lengthy and costly process. The Company may also encounter substantial unanticipated costs or other problems associated with the acquired businesses. The risks inherent in this strategy could have an adverse impact on the Company's results of operation or financial condition. There can be no assurance that the Company will have the financial resources to fulfill its strategy.

The nuclear power industry, the Company's largest customer group, is associated with a number of hazards which could create significant liabilities for the Company.

The Company's business could expose it to third party claims with respect to product, environmental and other similar liabilities. Although the Company has sought to protect itself from these potential liabilities through a variety of legal and contractual provisions as well as through liability insurance, the effectiveness of such protections has not been fully tested. Certain of the Company's products and services are used by the nuclear power industry primarily in operator training. Although the Company's contracts for such products and services typically contain provisions designed to protect the Company from potential liabilities associated with such use, there can be no assurance that the Company would not be materially adversely affected by claims or actions which may potentially arise.

The terms of our recent financing may require us to issue an indeterminate number of shares of our common stock which may be dilutive and restrict us from taking certain actions.

We have recently issued and sold to an investor a senior subordinated secured convertible note of the Company and a warrant to purchase shares of our common stock. The note is convertible, in part or in whole, into shares of our common stock based on a conversion price of \$1.925. However, the conversion price, and thus the number of shares into which the note may be converted, is subject to adjustment if we issue or sell certain shares of common stock or convertible securities for a consideration per share less than the then effective conversion price, in which case the conversion price will be reduced to an amount equal to the consideration per share in such new issuance. The exercise price of the warrant, but not the number of shares for which it is exercisable, is similarly subject to adjustment.

In addition, under the terms of the financing, while the note is outstanding, the Company may not, among other things, (i) acquire, sell or otherwise transfer any material assets or rights of the Company or a subsidiary, or enter into any contract or agreement relating to the sale of assets, which is not consummated pursuant to an arms length transaction, (ii) enter into any contract, agreement or transaction with any officer, director, stockholder or affiliate of the Company or a subsidiary other than ordinary course transactions that are consistent with past practice and pursuant to arms length terms, (iii) pay or declare any dividend or make any distribution upon, redeem, retire or repurchase or otherwise acquire, any shares of capital stock or other securities of the Company or a subsidiary, other than certain dividends currently owed to ManTech International, (iv) materially change the Company's or any subsidiary's line of business as currently conducted, or (v) incur any additional indebtedness senior to the note. Furthermore, the note and the warrant each prevent the Company from engaging in any fundamental transaction (such as a merger, consolidation, or sale of the Company) while it is outstanding, unless the successor assumes in writing all of the obligations of the Company under it and the successor is a publicly traded company with common stock traded on the Amex, Nasdaq, or the New York Stock Exchange.

THE SPIN-OFF

Background

Edgar Filing: GSE SYSTEMS INC - Form 424B4

GP Strategies, owns 5,154,052 shares of GSE Systems common stock, or an approximately 57% interest in GSE Systems. The board of directors of GP Strategies has determined to separate its interest in GSE Systems from its other businesses by means of a spin-off. To accomplish the spin-off, GP Strategies will distribute all of its shares of GSE Systems common stock on a pro rata basis. A stockholder vote is not required or being sought for the spin-off to occur.

7

Reasons for the Spin-Off

The GP Strategies Board of Directors has determined that the distribution of all of its interest in GSE Systems to owners of GP Strategies common stock and Class B capital stock will enable the management of each of GP Strategies and GSE Systems to operate and develop those businesses more effectively. The GP Strategies Board of Directors has concluded that the spin-off is in the best interests of GP Strategies and GP Strategies' stockholders because it believes that the spin-off will allow GP Strategies' management to focus solely on its core business, General Physics, and will simplify the financial presentation of GP Strategies thereby improving the ability of investors to understand GP Strategies' financial position.

The GP Strategies Board of Directors explored various alternatives to the spin-off, including a sale of its shares of GSE stock, but determined that the spin-off would be in the best interests of GP Strategies' stockholders.

Manner of Effecting the Spin-Off

GP Strategies will effect the spin-off as of the close of business on September 30, 2005. Prior to that time, General Physics has distributed to GP Strategies all of the shares of GSE Systems common stock it held. GP Strategies will distribute all of its shares of GSE Systems stock to the holders of GP Strategies common stock and Class B capital stock on a pro-rata basis. As of September 19, 2005, the record date for the distribution, there were 17,007,368 shares of GP Strategies common stock outstanding and 1,200,000 shares of GP Strategies Class B capital stock outstanding. Accordingly, each holder of GP Strategies stock on the record date will receive .283075 shares of GSE Systems common stock for each share of GP Strategies common stock or Class B capital stock held as of the close of business on September 19, 2005.

GSE Systems stock will be issued as uncertificated shares registered in book-entry form through the direct registration system. No certificates representing GSE Systems common stock will be mailed to registered holders of GP Strategies common stock in the ordinary course. If you are a stockholder of record of GP Strategies stock on the record date, GSE Systems' transfer agent, Continental Stock Transfer & Trust Co., will hold your book-entry shares. On or about September 30, 2005, Continental Stock Transfer will mail you a direct registration transaction advice reflecting your ownership interest in shares of GSE Systems common stock. When you receive this advice, you will receive information explaining the direct registration system and telling you how to obtain physical certificates if you desire to do so. You may also retain, transfer or sell the shares, or transfer the shares to a brokerage account.

No owner of GP Strategies stock will be required to pay any cash or other consideration for shares of GSE Systems received in the spin-off or to surrender or exchange any shares of GP Strategies stock to receive shares of GSE Systems.

Edgar Filing: GSE SYSTEMS INC - Form 424B4

GP Strategies and General Physics are "underwriters" within the meaning of Section 2(a)(11) of the Securities Act as a result of the distribution by General Physics of GSE Systems stock to GP Strategies and the distribution by GP Strategies of GSE Systems stock to GP Strategies stockholders.

Treatment of Fractional Shares

Fractional shares of GSE Systems common stock will not be issued to holders of GP Strategies stock as part of the distribution nor credited to book-entry accounts. Instead, the distribution agent will aggregate fractional shares into whole shares and sell them in the open market at then-prevailing prices on behalf of holders who otherwise would be entitled to receive fractional share interests, and such persons will receive a cash payment in the amount of their pro rata share of the net sale proceeds. The distribution agent, in its sole discretion, without any influence from GP Strategies or GSE Systems, will determine when, how, through which broker-dealer and at what price to sell such whole shares. Any broker-dealer used by the distribution agent will not be an affiliate of either GP Strategies or GSE Systems. Sales of fractional shares of our common stock are expected to be made as soon as practicable after the distribution date, and checks representing proceeds of these sales will be mailed thereafter. GP Strategies will bear the cost of brokerage commissions incurred in connection with such sales. None of GP Strategies, the distribution agent nor we guarantee that you will receive any minimum sale price for your fractional shares of GSE Systems common stock. You will not be paid any interest on the proceeds of the sale.

8

Results of Spin-Off

As of the close of business on September 19, 2005, GP Strategies had approximately 1,283 stockholders of record. Except for holders of GP Strategies stock who would be entitled to fractional shares only, each of these GP Strategies stockholders will become stockholders of GSE Systems once the spin-off is effected. Immediately after the spin-off is completed, GP Strategies will not directly or indirectly own any shares of GSE Systems common stock. The spin-off will not affect the number of outstanding shares of GP Strategies stock or the rights of GP Strategies stockholders.

Shares of GP Strategies common stock are currently listed on the New York Stock Exchange under the symbol "GPX." Prior to the record date for the spin-off, GP Strategies stock will trade on a regular basis reflecting the value of GP Strategies that includes its interest in GSE Systems. GP Strategies common stock will continue to trade on the New York Stock Exchange following the spin-off.

After the spin-off, shares of GSE Systems common stock will continue to be listed on the American Stock Exchange under the symbol "GVP." The prices at which the GSE Systems common stock will trade following the spin-off will be determined by the marketplace and may be influenced by the spin-off.

GSE Systems common stock distributed in the spin-off generally will be freely transferable under the Securities Act except for securities received by persons who may be deemed to be affiliates of GSE Systems pursuant to Rule 405 under the Securities Act. Persons who may be deemed to be affiliates of GSE Systems after the spin-off generally include individuals or entities that

Edgar Filing: GSE SYSTEMS INC - Form 424B4

control, are controlled by, or are under common control with GSE Systems, including directors of GSE Systems. Persons who are affiliates of GSE Systems will be permitted to sell their shares of GSE Systems common stock received in the spin-off only pursuant to an effective registration statement under the Securities Act or pursuant to an exemption from the registration requirements of the Securities Act, such as the exemption provided by Rule 144 under the Securities Act (subject to the conditions set forth in Rule 144, other than its holding period requirements).

Other Consequences

The exercise price of outstanding GP Strategies options and warrants will be adjusted based on the relative fair market values of the GP Strategies stock before and after the spin-off.

Material Federal Income Tax Consequences of the Spin-Off

The following discussion is a summary description of the material U.S. federal income tax consequences of the spin-off applicable to GP Strategies stockholders. This discussion does not purport to consider all aspects of U.S. federal income taxation that may be relevant to a GP Strategies stockholder. This discussion is based upon the provisions of the Internal Revenue Code of 1986, as amended (the "Code"), existing regulations and administrative and judicial interpretations of the Code, all of which are as in effect as of the date of this Prospectus and are subject to change, possibly with retroactive effect. This discussion applies only to GP Strategies stockholders who hold their shares of GP Strategies stock as capital assets within the meaning of Section 1221 of the Code, and does not apply to the following:

- o stockholders who received their shares of GP Strategies stock as compensation;
 - o stockholders who hold their shares of GP Strategies common stock as part of a "straddle," "hedge," "conversion transaction," "synthetic security" or other integrated investment;
- 9
- o stockholders, including, without limitation, financial institutions, insurance companies, tax-exempt organizations, dealers or traders in securities and stockholders subject to the alternative minimum tax, who may be subject to special rules;
 - o stockholders whose functional currency is not the U.S. dollar; or
 - o stockholders who, for U.S. federal income tax purposes, are non-resident alien individuals, foreign corporations, foreign partnerships, foreign estates or foreign trusts.

This discussion also does not consider the effect of any foreign, state or local laws or any U.S. federal laws other than those pertaining to the income tax.

Accordingly, you should consult your tax advisor to determine the tax effect to you of the spin-off, including the application and effect of foreign or U.S. federal, state, local or other tax laws.

The distribution of the shares of GSE Systems common stock by GP

Edgar Filing: GSE SYSTEMS INC - Form 424B4

Strategies to its stockholders will be a taxable dividend to the stockholders to the extent that the distribution is made out of current or accumulated earnings and profits of GP Strategies. If the amount of the distribution exceeds current and accumulated earnings and profits, the excess amount will be a tax-free return of capital to the extent of the stockholder's tax basis in the GP Strategies stock and then any remaining amount will be taxable gain to the stockholder. No loss will be recognized. Any gain recognized by a stockholder will be capital gain. Capital gains are long term if the GP Strategies stock is held for more than twelve months at the time of the distribution. For individuals, the maximum federal income tax rate applicable to long-term capital gains and dividends is generally 15%.

Use of Proceeds

We will receive no proceeds from the distribution of GSE Systems common stock.

RELATIONSHIP BETWEEN GP STRATEGIES AND GSE SYSTEMS

On January 1, 2004, the Company entered into a Management Services Agreement with GP Strategies in which GP Strategies agreed to provide corporate support services to GSE, including accounting, finance, human resources, legal, network support and tax. In addition, GSE uses General Physics' financial system. In 2004, GSE was charged \$685,000 for General Physics' services. The agreement has been extended through December 31, 2005 without an increase in the fee. The agreement can be renewed for successive one-year terms.

In addition, the Company does not have an independent credit facility; instead, \$1.5 million of General Physics' available credit facility has been carved out for use by the Company. While GP Strategies has guaranteed the amount of such credit facility currently utilized by GSE Systems, there can be no assurance that the credit facility would continue to be made available after such amount was repaid.

GSE Systems and GP Strategies believe that these agreements are at fair market value and are on terms comparable to those that would have been reached in arm's-length negotiations had the parties been unaffiliated at the time of the negotiations.

There can be no assurance that GP Strategies will continue to be willing to provide such services to the Company after the spin-off.

LEGAL MATTERS

Certain legal matters with respect to the shares of common stock offered by this prospectus have been passed upon by Andrea D. Kantor, General Counsel of the Company.
