SPS TECHNOLOGIES, INC. AND SUBSIDIARIES

PART I

Item 1. BUSINESS

SPS Technologies, Inc. and subsidiaries (the "Company") was incorporated in Pennsylvania in 1903. The Company is engaged in the design, manufacture and marketing of fasteners, specialty metals, magnetic products, aerospace structures and precision tools. The Company is multinational in operation. In addition to 23 manufacturing facilities in the United States, it operates 17 manufacturing facilities in eight different countries: England, Ireland, Canada, Brazil, Australia, China, Italy and France. Marketing operations are carried on by subsidiaries in three other countries.

The Company's operating earnings decreased in 2002 compared to 2001, primarily due to lower revenues in three of the Company's four segments compared to last year, particularly in those businesses that serve the aerospace, industrial gas turbine and electronics markets. The Company initiated plans in 2002 and 2001 to eliminate, consolidate and restructure certain of its operations. These plans were implemented to provide a meaningful reduction in the cost structure of the Company in response to declining market demand in many of the markets served by the Company. Additional information regarding the general development of business operations in 2002 is provided in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations".

The Company is organized into four reportable segments for financial reporting purposes. The four reportable segments are: Aerospace Fasteners and Components, Engineered Fasteners and Components, Specialty Materials and Alloys, and Magnetic Products. The Aerospace Fasteners and Components segment produces fasteners, fastening systems and structural assemblies for the aerospace market. Principal aerospace products are SPS(R) aerospace fasteners, MULTIPHASE(R) alloy fasteners, latches, struts, rods, self locking components, FLEXLOC(R) all-metal locknuts and GREER STOP NUT locknuts. Principal structural assemblies products are precision machined components, sheet metal fabrications and avionics assemblies. The Engineered Fasteners and Components segment produces fasteners for the automotive and industrial machinery markets and precision consumable tools used for metal forming and cutting. Principal engineered fastener products are fasteners and precision components for gasoline and diesel engines, other critical and non-critical automotive applications and off-highway equipment, UNBRAKO(R) brand socket screws, hex keys and dowel pins. Principal tooling products are HI-LIFE(R) thread roll dies and other metalworking tools. The Specialty Materials and Alloys (SM&A) segment produces specialty metals, superalloys and waxes and provides melting services for the manufacture of components for aerospace, industrial gas turbine, medical and general engineering applications. Principal SM&A products are air and vacuum-melted iron, cobalt, and nickel-based superalloys, including CMSX(R) single-crystal alloys. The Magnetic Products segment produces magnetic materials and products for the automotive, aerospace, reprographic, computer, security and advertising specialty markets. Principal

Edgar Filing: SPS TECHNOLOGIES INC - Form 10-K

magnetic products are metallic permanent magnets, pressed powder magnetic components, bonded magnets, magnetic components and assemblies and magnetic ultra-thin foil and strip products.

The Company sells directly to original equipment manufacturers and industrial, commercial and governmental users, and also sells through independent stocking distributors and dealers. There were no changes in the methods of distribution during 2002.

The principal sources of raw materials include major and specialty steel producers, and non-ferrous metal producers, converters and distributors. The Company anticipates it will have no significant problems with respect to sources or availability of the raw materials essential to the conduct of its business.

The Company owns and licenses certain trademarks and patents that it considers to be of importance to its four segments. The principal trademarks of the Company include ARNOLD(R), AVIBANK(R), CANNON-MUSKEGON(R), CMSX(R), FLEXLOC(R), FLEXMAG(R), GREER STOP NUT(R), HI-LIFE(R), HOWELL PENNCRAFT(R), MP35N(R), MP159(R), MULTIPHASE(R), NSS(R), PLASTIFORM(R), SPS(R), SPS TECHNOLOGIES(R), U130(R), and UNBRAKO(R). The trademarks have been registered in the United States and certain foreign countries. Generally, trademark registrations are valid so long as the trademarks registered are used and renewal of the registration is timely made. United States and foreign patents of the Company expire at various times. Patents covering the CMSX-4(R), CMSX-10K(R), CMSX-10N(R), CM 186 LC(R) and CM 247 LC(R) superalloys are of particular importance in protecting the proprietary superalloy technology of the Company's subsidiary, Cannon-Muskegon Corporation. However, the Company does not believe that its business as a whole is dependent on any one or more patents or trademarks or on patent or trademark protection generally.

2

No material portion of the Company's business in any segment is seasonal.

No material part of the Company's business is dependent upon a single customer. In 2002, the five largest customers accounted for 16% of the Company's reported consolidated sales.

The backlog of orders by segment at December 31, which represents firm orders with scheduled delivery within the next twelve months, was as follows (in thousands of dollars):

	2002	2001
	-----	-----
Aerospace Fasteners and Components	\$172,354	\$189,320
Engineered Fasteners and Components	72,371	71,650
Specialty Materials and Alloys	9,161	15,512
Magnetic Products	25,329	22,654
	-----	-----
Total	\$279,215	\$299,136
	=====	=====

The Company's business is highly competitive. Competition is based primarily on technology, price, service, product quality and performance. The Company

Edgar Filing: SPS TECHNOLOGIES INC - Form 10-K

believes that its favorable competitive position is based upon its high-quality product performance and service to its customers, supported by its commitment to research and development.

Total expenditures during 2002, 2001 and 2000 for Company-sponsored research and development were \$6.1 million, \$8.4 million and \$7.3 million, respectively. In 2002, approximately 65% of the expenditures were for the Company's Aerospace Fasteners and Components segment.

Capital expenditures for property, plant and equipment are planned at \$30.5 million in 2003, excluding capital spending for any businesses that may be acquired in 2003.

There were approximately 2,826 persons employed in the Aerospace Fasteners and Components segment, 1,853 persons employed in the Engineered Fasteners and Components segment, 363 persons employed in the Specialty Materials and Alloys segment, and 818 persons employed in the Magnetic Products segment at December 31, 2002.

Additional narrative information and the financial information concerning industry segments and the foreign and domestic operations are included in Note 23 to the Company's Consolidated Financial Statements on pages 41 through 43 in the 2002 Annual Report to Shareholders. Exhibit 13.1 contains the information and is incorporated herein by reference.

The Company's Internet Web Site is at www.spstech.com. Investors can obtain copies of the Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act as soon as reasonably practicable after the Company has filed such materials with, or furnished them to, the Securities and Exchange Commission. The Company will also furnish a paper copy of such filings free of charge upon request.

I, John S. Thompson, certify that:

Edgar Filing: SPS TECHNOLOGIES INC - Form 10-K

1. I have reviewed this annual report on Form 10-K of SPS Technologies, Inc.;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and
 - c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize, and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

REPORT OF INDEPENDENT ACCOUNTANTS ON
FINANCIAL STATEMENT SCHEDULE

To the Board of Directors of
SPS Technologies, Inc.:

Our audits of the consolidated financial statements referred to in our report dated February 12, 2003 appearing in the 2002 Annual Report to Shareholders of SPS Technologies, Inc. (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.
