The Trust invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at February 28, 2010, 31.9% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.1% to 14.6% of total investments.

(1) Security represents the underlying municipal bond of an inverse floater.

Table of Contents

A summary of financial instruments outstanding at February 28, 2010 is as follows:

Interest Rate Swaps

| | Notional | Annual Fixed Rate Paid By | Floating Rate | Effective Date/ Termination | _ | Net prealized preciation |
|-------------------|------------|---------------------------------|----------------------|--------------------------------|------|--------------------------------|
| Counterparty | Amount | Trust | Paid To Trust | Date | (Dep | preciation) |

| Inc. | | | LIBOR-BBA | May 24, 2040 | | (40,419) |
| | | | | | \$ | 3,484 |

The effective date represents the date on which the Trust and the counterparty to the interest rate swap contract begin interest payment accruals.

At February 28, 2010, the Trust had sufficient cash and/or securities to cover commitments under these contracts.

The Trust is subject to interest rate risk in the normal course of pursuing its investment objectives. Because the Trust holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To hedge against this risk, the Trust may enter into interest rate swap contracts.

At February 28, 2010, the aggregate fair value of derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is interest rate risk was \$43,903 and \$40,419, respectively.

The cost and unrealized appreciation (depreciation) of investments of the Trust at February 28, 2010, as determined on a federal income tax basis, were as follows:

| Aggregate cost | \$ 58,442,806 |
|---|--------------------------------|
| Gross unrealized appreciation Gross unrealized depreciation | \$ 1,879,417 (2,079,282) |
| Net unrealized depreciation | \$ (199,865) |

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

|--------------------------|---|--|---------------------------------------|------------------|
| Asset Description | (Level 1) | (Level 2) | (Level 3) | Total |
| Tax-Exempt Investments | \$ | \$ 62,122,941 | \$ | \$ 62,122,941 |

| Interest Rate Swaps | \$ | \$ (40,419) | \$ | \$ (40,419) |
| Total | \$ | \$ (40,419) | \$ | \$ (40,419) |

The Trust held no investments or other financial instruments as of November 30, 2009 whose fair value was determined using Level 3 inputs.

For information on the Trust s policy regarding the valuation of investments and other significant accounting policies, please refer to the Trust s most recent financial statements included in its semiannual or annual report to shareholders.
