Table of Contents

1. GENERAL

Basis of presentation and consolidation

The consolidated financial statements (the financial statements) of Berkshire Hills Bancorp, Inc. (the Company or Berkshire) have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q adopted by the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for a fair presentation are reflected in the interim financial statements and consist of normal recurring entries. These financial statements include the accounts of the Company and its wholly-owned subsidiaries, Berkshire Insurance Group (BIG) and Berkshire Bank (the Bank), together with the Bank's consolidated subsidiaries. One of the Bank's consolidated subsidiaries is Berkshire Bank Municipal Bank, a New York chartered limited-purpose commercial bank. All significant inter-company transactions have been eliminated in consolidation. The results of operations for the three months ended March 31, 2010 are not necessarily indicative of the results which may be expected for the year. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Business

Through its wholly-owned subsidiaries, the Company provides a variety of financial services to individuals, businesses, not-for-profit organizations, and municipalities in and around western Massachusetts, southern Vermont and northeastern New York. Its primary deposit products are checking, NOW, money market, savings, and time deposit accounts. Its primary lending products are residential mortgages, commercial mortgages, construction loans, commercial business loans and consumer loans. The Company offers electronic banking, cash management, and other transaction and reporting services; it also offers interest rate swap contracts to commercial customers. The Company offers wealth management services including trust, financial planning, and investment services. The Company is an agent for complete lines of property and casualty, life, disability, and health insurance.

Business segments

An operating segment is a component of a business for which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and evaluate performance. The Company has two reportable operating segments, Banking and Insurance, which are delineated by the consolidated subsidiaries of Berkshire Hills Bancorp, Inc. Banking includes the activities of Berkshire Bank and its subsidiaries, which provide commercial and consumer banking services. Insurance includes the activities of Berkshire Insurance Group, which provides commercial and consumer insurance services. The only other consolidated financial activity of the Company consists of the transactions of Berkshire Hills Bancorp, Inc.

Use of estimates

In preparing the financial statements in conformity with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated balance sheets and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses; the valuation of deferred tax assets; the estimates related to the initial measurement of goodwill and other intangible assets and subsequent impairment analyses; the determination of other-than-temporary impairment of investment securities; and the determination of the fair value of assets and liabilities.

Table of Contents***Earnings Per Common Share***

Earnings per common share have been computed based on the following (average diluted shares outstanding are calculated using the treasury stock method):

<i>(In thousands, except per share data)</i>		Three Months Ended March 31,	
		2010	2009
Net income		\$ 3,336	\$ 3,883
Less: Cumulative preferred stock dividends and accretion			637
Net income available to common stockholders		\$ 3,336	\$ 3,246
Average number of common shares outstanding		13,989	12,293
Less: average number of unvested stock award shares		(160)	(129)
Average number of basic shares outstanding		13,829	12,164
Plus: average number of dilutive unvested stock award shares		16	21
Plus: average number of dilutive stock options		13	62
Average number of diluted shares outstanding		13,858	12,247
Basic earnings per common share		\$ 0.24	\$ 0.27
Diluted earnings per common share		\$ 0.24	\$ 0.27

For the quarter ended March 31, 2010, 144 thousand shares of restricted stock and 257 thousand options were anti-dilutive and therefore excluded from the earnings per share calculations. For the quarter ended March 31, 2009, 108 thousand shares of restricted stock and 380 thousand options were anti-dilutive and therefore excluded from the earnings per share calculations.

Recent accounting pronouncements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 810, Consolidation . New authoritative accounting guidance under ASC Topic 810 amends prior guidance to provide more relevant and reliable information to users of financial statements by enterprises involved with variable interest entities. This accounting guidance became effective for the Company on January 1, 2010 and did not have a significant impact on the Company's financial statements.

FASB ASC Topic 860, Transfers and Servicing . New authoritative accounting guidance under ASC Topic 860 amends prior accounting guidance to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. The new authoritative accounting guidance eliminates the concept of a qualifying special-purpose entity and changes the requirements for derecognizing financial assets. The new authoritative accounting guidance also requires additional disclosures about all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. This accounting guidance became effective for the Company on January 1, 2010 and did not have a significant impact on the Company's financial statements.

FASB Accounting Standards Update (ASU) No. 2010-06. New authoritative accounting guidance under ASU No. 2010-06 provides guidance that requires more robust disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value

measurements, and (4) the transfers between Levels 1, 2, and 3. This guidance became effective for the Company on January 1, 2010 and did not have a material impact on the Company's financial statements.

2. TRADING ACCOUNT SECURITY

The Company holds a tax advantaged economic development bond that is being accounted for at fair value. The security had an amortized cost of \$14.9 million and \$15.0 million and a fair value of \$15.8 million and \$15.9 million at March 31, 2010 and December 31, 2009, respectively. As discussed further in Note 10-Derivative Financial Instruments and Hedging Activities, the Company has entered into a swap contract to swap-out the fixed rate of the security in exchange for a variable rate. The Company does not purchase securities with the intent of selling them in the near term, and there are no other securities in the trading portfolio at March 31, 2010.

Table of Contents

Debt Securities

The Company expects to recover its amortized cost basis on all debt securities in its AFS and HTM portfolios. Furthermore, the Company does not intend to sell nor does it anticipate that it will be required to sell any of its securities in an unrealized loss position as of March 31, 2010, prior to this recovery. The Company's ability and intent to hold these securities until recovery is supported by the Company's strong capital and liquidity positions as well as its historical low portfolio turnover. The following summarizes, by investment security type, the basis for the conclusion that the debt securities in an unrealized loss position within the Company's AFS and HTM portfolios were not other-than-temporarily impaired at March 31, 2010:

AFS municipal bonds and obligations

At March 31, 2010, 15 out of a total of 133 securities in the Company's portfolio of AFS municipal bonds and obligations were in unrealized loss positions. Aggregate unrealized losses represented 3% of the amortized cost of securities in unrealized loss positions. The securities are insured, investment grade rated, general obligation bonds. There were no material underlying credit downgrades during the first quarter of 2010. All securities are considered performing.

AFS and HTM residential mortgage-backed securities

At March 31, 2010, 9 out of a total of 109 securities and 2 out of a total of 4 securities in the Company's portfolios of AFS residential mortgage-backed securities and HTM residential mortgage-backed securities, respectively, were in unrealized loss positions. Aggregate unrealized losses represented less than 1% of the amortized cost of securities in unrealized loss positions within both portfolios. The Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC) and Government National Mortgage Association (GNMA) guarantees the contractual cash flows of the Company's AFS and HTM residential mortgage-backed securities. These entities are government-sponsored and are backed by the full faith and credit of the U.S. government. The securities are investment grade rated and there were no material underlying credit downgrades during the first quarter of 2010. All securities are considered performing.

AFS corporate bonds

At March 31, 2010, 1 out of a total of 17 securities in the Company's portfolio of AFS corporate bonds was in an unrealized loss position. The aggregate unrealized loss represented 8% of the amortized cost of the security. The security has a short-term maturity (within 5 years), is investment grade rated, and there was no material underlying credit downgrade during the first quarter of 2010. The security is considered performing.

AFS trust preferred securities

At March 31, 2010, 6 out of a total of 7 securities in the Company's portfolio of AFS trust preferred securities were in unrealized loss positions. Aggregate unrealized losses represented 18% of the amortized cost of securities in unrealized loss positions. The Company's evaluation of the present value of expected cash flows on these securities supports its conclusions about the recoverability of the securities' amortized cost bases.

At March 31, 2010, \$1.5 million of the total unrealized losses was attributable to a \$2.6 million investment in a Mezzanine Class B tranche of a \$360 million pooled trust preferred security issued by banking and insurance entities. The Company evaluated the security, with a Level 3 fair value of \$1.1 million, for potential other-than-temporary-impairment (OTTI) at March 31, 2010 and determined that OTTI was not evident based on both the Company's more likely than not ability to hold the security until the recovery of its remaining amortized cost and the protection from credit loss afforded by \$30 million in excess subordination above current and projected losses. The security is considered performing.

AFS other bonds and obligations

At March 31, 2010, 5 out of a total of 8 securities in the Company's portfolio of other bonds and obligations were in unrealized loss positions. Aggregate unrealized losses represented 1% of the book value of the securities in unrealized loss positions. The securities are investment grade rated and there were no material underlying credit downgrades during the first quarter of 2010. All securities are considered performing.

Table of Contents***Marketable Equity Securities***

In evaluating its marketable equity securities portfolio for OTTI, the Company considers its more likely than not ability to hold an equity security to recovery of its cost basis in addition to various other factors, including the length of time and the extent to which the fair value has been less than cost and the financial condition and near term prospects of the issuer. Any OTTI is recognized immediately through earnings.

At March 31, 2010, 2 out of a total of 4 securities in the Company's portfolio of marketable equity securities were in an unrealized loss position. The unrealized loss represented 4% of the book value of the impaired securities. The Company has the intent and ability to hold the securities until a recovery of their cost bases and does not consider the securities other-than-temporarily impaired at March 31, 2010. As new information becomes available in future periods, changes to the Company's assumptions may be warranted and could lead to a different conclusion regarding the OTTI of these securities.

4. LOANS

Loans consist of the following:

<i>(In thousands)</i>	March 31, 2010	December 31, 2009
Residential mortgages	\$ 635,614	\$ 609,007
Commercial mortgages:		
Construction	105,315	110,703
Single and multifamily	79,748	80,624
Commercial real estate	677,146	660,501
Total commercial mortgages	862,209	851,828
Commercial business loans	177,532	186,044
Consumer:		
Auto	63,061	76,861
Home equity and other	242,925	237,918
Total consumer loans	305,987	314,779
Total loans	\$ 1,981,341	\$ 1,961,658

5. LOAN LOSS ALLOWANCE

Activity in the allowance for loan losses is as follows:

<i>(In thousands)</i>	Three Months Ended March 31, 2010	2009
Balance at beginning of period	\$ 31,816	\$ 22,908
Charged-off loans	(3,846)	(2,643)
Recoveries on charged-off loans	1,533	138
Net loans charged-off	(2,313)	(2,505)

Provision for loan losses	2,326	2,500
Balance at end of period	\$ 31,829	\$ 22,903

Impaired loans totaled \$22.5 million and \$56.9 million at March 31, 2010 and December 31, 2009, respectively. Based on collateral values or discounted cash flow analyses, impaired loans with a carrying value of \$13.9 million and \$29.9 million were determined to require a valuation allowance of \$4.4 million and \$6.4 million at March 31, 2010 and December 31, 2009, respectively.

Table of Contents**6. DEPOSITS**

A summary of time deposits is as follows:

<i>(In thousands)</i>	March 31, 2010	December 31, 2009
Time less than \$100,000	\$ 379,987	\$ 381,141
Time \$100,000 or more	369,589	390,421
Total time deposits	\$ 749,576	\$ 771,562

7. STOCKHOLDERS' EQUITY

The Bank's actual and required capital ratios were as follows:

	March 31, 2010	December 31, 2009	FDIC Minimum to be Well Capitalized
Total capital to risk weighted assets	10.7%	10.7%	10.0%
Tier 1 capital to risk weighted assets	9.5	9.5	6.0
Tier 1 capital to average assets	8.1	7.9	5.0

At each date shown, Berkshire Bank met the conditions to be classified as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table above.

8. STOCK-BASED COMPENSATION PLANS

A combined summary of activity in the Company's stock award and stock option plans for the three months ended March 31, 2010 is presented in the following table:

	Non-vested Stock Awards Outstanding		Stock Options Outstanding	
<i>(Shares in thousands)</i>	Number of Shares	Weighted- Average Grant Date Fair Value	Number of Shares	Weighted- Average Exercise Price
Balance as of December 31, 2009	99	\$ 24.49	430	\$ 23.35
Granted	123	16.55		
Stock awards vested	(42)	24.70		
Balance as of March 31, 2010	180	\$ 19.03	430	\$ 23.35

There were no stock options exercised during the three months ended March 31, 2010. During the three months ended March 31, 2009, proceeds from stock option exercises totaled \$198 thousand. During the three months ended March 31, 2010, there were 42 thousand shares issued in connection with vested stock awards. All of these shares were issued from available treasury stock. Stock-based compensation expense totaled \$410 thousand and \$397 thousand during the three months ended March 31, 2010 and 2009, respectively. Stock-based compensation expense is recognized ratably over the requisite service period for all awards.

9. OPERATING SEGMENTS

The Company has two reportable operating segments, Banking and Insurance, which are delineated by the consolidated subsidiaries of Berkshire Hills Bancorp, Inc. Banking includes the activities of Berkshire Bank and its subsidiaries, which provide commercial and consumer banking services. Insurance includes the activities of Berkshire Insurance Group, which provides commercial and consumer insurance services. The only other consolidated financial activity of the Company is the Parent, which consists of the transactions of Berkshire Hills Bancorp, Inc. Management fees for corporate services provided by the Bank to Berkshire Insurance Group and the Parent are eliminated.

Table of Contents

The accounting policies of each reportable segment are the same as those of the Company. The Insurance segment and the Parent reimburse the Bank for administrative services provided to them. Income tax expense for the individual segments is calculated based on the activity of the segments, and the Parent records the tax expense or benefit necessary to reconcile to the consolidated total. The Parent does not allocate capital costs. Average assets include securities available-for-sale based on amortized cost.

A summary of the Company's operating segments was as follows:

<i>(In thousands)</i>	Banking	Insurance	Parent	Eliminations	Total Consolidated
Three months ended March 31, 2010					
Net interest income (expense)	\$ 18,510	\$	\$ (213)	\$	\$ 18,297
Provision for loan losses	2,326				2,326
Non-interest income	5,013	3,485	3,649	(3,649)	8,498
Non-interest expense	17,570	2,309	314	(1)	20,192
Income (loss) before income taxes	3,627	1,176	3,122	(3,648)	4,277
Income tax expense (benefit)	673	483	(215)		941
Net income	\$ 2,954	\$ 693	\$ 3,337	\$ (3,648)	\$ 3,336
Average assets (in millions)	\$ 2,632	\$ 31	\$ 364	\$ (350)	\$ 2,677
Three months ended March 31, 2009					
Net interest income (expense)	\$ 18,008	\$	\$ (197)	\$ (100)	\$ 17,711
Provision for loan losses	2,500				2,500
Non-interest income	4,093	4,578	4,179	(4,178)	8,672
Non-interest expense	15,788	2,459	112	94	18,453
Income (loss) before income taxes	3,813	2,119	3,870	(4,372)	5,430
Income tax expense (benefit)	884	870	(126)	(81)	1,547
Net income (loss)	\$ 2,929	\$ 1,249	\$ 3,996	\$ (4,291)	\$ 3,883
Average assets (in millions)	\$ 2,638	\$ 32	\$ 400	\$ (396)	\$ 2,674

10. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

As of March 31, 2010, the Company held derivatives with a total notional amount of \$463 million. Of this total, interest rate swaps with a combined notional amount of \$160 million were designated as cash flow hedges and \$278 million have been designated as economic hedges. The remaining \$26 million notional amount represents commitments to originate residential mortgage loans for sale and commitments to sell residential mortgage loans, which are also accounted for as derivative financial instruments. At March 31, 2010, no derivatives were designated as hedges of net investments in foreign operations. Additionally, the Company does not use derivatives for trading or speculative purposes.

As part of the Company's risk management strategy, the Company enters into interest rate swap agreements to mitigate the interest rate risk inherent in certain of the Company's assets and liabilities. Interest rate swap agreements involve the risk of dealing with both Bank customers and institutional derivative counterparties and their ability to meet contractual terms. The agreements are entered into with counterparties that meet established credit standards and contain master netting and collateral provisions protecting the at-risk party. The derivatives program is overseen by

the Risk Management Committee of the Company's Board of Directors. Based on adherence to the Company's credit standards and the presence of the netting and collateral provisions, the Company believes that the credit risk inherent in these contracts was not significant at March 31, 2010.

The Company pledged collateral to derivative counterparties in the form of cash totaling \$2.6 million and securities with an amortized cost of \$17.1 million and a fair value of \$17.8 million as of March 31, 2010. No collateral was posted from counterparties to the Company as of March 31, 2010. The Company may need to post additional collateral in the future in proportion to potential increases in unrealized loss positions.

Table of Contents

Information about interest rate swap agreements and non-hedging derivative asset and liabilities at March 31, 2010, follows:

	Notional	Weighted Average	Weighted Average Rate		Estimated Fair Value Asset (Liability)
	Amount (In thousands)	Maturity (In years)	Received	Paid	(In thousands)
Cash flow hedges:					
Interest rate swaps on FHLBB borrowings	\$ 145,000	4.5	0.26%	4.15%	\$ (10,235)
Interest rate swaps on junior subordinated debentures	15,000	4.2	2.10	5.54	(816)
Total cash flow hedges	160,000				(11,051)
Economic hedges:					
Interest rate swap on industrial revenue bond	14,889	19.7	0.60	5.09	(1,177)
Interest rate swaps on loans with commercial loan customers	131,342	7.1	2.88	6.10	(4,492)
Reverse interest rate swaps on loans with commercial loan customers	131,342	7.1	6.10	2.88	4,837
Total economic hedges	277,574				(832)
Non-hedging derivatives:					
Commitments to originate residential mortgage loans to be sold	12,883	0.2			(32)
Commitments to sell residential mortgage loans	12,883	0.2			48
Total non-hedging derivatives	25,767				16
Total	\$ 463,340				\$ (11,867)

Cash flow hedges

The effective portion of unrealized changes in the fair value of derivatives accounted for as cash flow hedges are reported in other comprehensive income and subsequently reclassified to earnings when gains or losses are realized. Each quarter, the Company assesses the effectiveness of each hedging relationship by comparing the changes in cash flows of the derivative hedging instrument with the changes in cash flows of the designated hedged item or transaction. The ineffective portion of changes in the fair value of the derivatives is recognized directly in earnings. The Company has entered into several interest rate swaps with an aggregate notional amount of \$145 million to convert the LIBOR based floating interest rates on a \$145 million portfolio of FHLBB advances to fixed rates, with

the objective of fixing the Company's monthly interest expense on these borrowings.

The Company has also entered into an interest rate swap with a notional value of \$15 million to convert the floating rate interest on its junior subordinated debentures to a fixed rate of interest. The purpose of the hedge was to protect the Company from the risk of variability arising from the floating rate interest on the debentures.

Table of Contents

Amounts included in the Consolidated Statements of Income and in the other comprehensive income section of the Consolidated Statements of Changes in Stockholders' Equity related to interest rate derivatives designated as hedges of cash flows, were as follows:

<i>(In thousands)</i>	Three Months Ended March 31,	
	2010	2009
Interest rate swaps on FHLBB borrowings:		
Unrealized (loss) gain recognized in accumulated other comprehensive loss	\$ (1,361)	\$ 1,828
Reclassification of realized gain from accumulated other comprehensive loss to other non-interest income for termination of swaps		(741)
Reclassification of unrealized loss from accumulated other comprehensive loss to other non-interest income for hedge ineffectiveness		255
Net tax benefit (expense) on items recognized in accumulated other comprehensive loss	615	(470)
Interest rate swaps on junior subordinated debentures:		
Unrealized (loss) gain recognized in accumulated other comprehensive loss	(148)	101
Net tax benefit (expense) on items recognized in accumulated other comprehensive loss	67	(35)
Other comprehensive (loss) income recorded in accumulated other comprehensive loss, net of reclassification adjustments and tax effects	\$ (827)	\$ 938
Net interest expense recognized in interest expense on hedged FHLBB borrowings	\$ (491)	\$ (917)
Net interest expense recognized in interest expense on junior subordinated debentures	\$ (44)	\$ (71)

The Company's accumulated other comprehensive loss totaled \$3.5 million at March 31, 2010. Of this loss, \$6.0 million was attributable to accumulated losses on cash flow hedges, net of deferred tax benefits of \$5.0 million, and \$2.5 million was attributable to accumulated gains on available-for-sale securities, net of deferred tax expenses of \$2.1 million.

The Company's accumulated other comprehensive loss totaled \$3.0 million at December 31, 2009. Of this loss, \$5.2 million was attributable to accumulated losses on cash flow hedges, net of deferred tax benefits of \$4.3 million, and \$2.2 million was attributable to accumulated gains on available-for-sale securities, net of deferred tax expenses of \$1.8 million.

Hedge ineffectiveness on interest rate swaps designated as cash flow hedges was immaterial to the Company's financial statements during the three months ended March 31, 2010 and 2009.

Economic hedges and non-hedging derivatives

The Company has an interest rate swap with a \$15.0 million notional amount to swap out the fixed rate of interest on an economic development bond bearing a fixed rate of 5.09%, currently within the Company's trading portfolio, in exchange for a LIBOR-based floating rate. The intent of the economic hedge is to improve the Company's asset sensitivity to changing interest rates in anticipation of favorable average floating rates of interest over the 21-year life

of the bond. The fair value changes of the economic development bond are mostly offset by fair value changes of the related interest rate swap.

The Company also offers certain derivative products directly to qualified commercial borrowers. The Company economically hedges derivative transactions executed with commercial borrowers by entering into mirror-image, offsetting derivatives with third-party financial institutions. The transaction allows the Company's customer to convert a variable-rate loan to a fixed rate loan. Because the Company acts as an intermediary for its customer, changes in the fair value of the underlying derivative contracts mostly offset each other in earnings. Credit valuation adjustments arising from the difference in credit worthiness of the commercial loan and financial institution counterparties totaled \$345 thousand as of March 31, 2010 and were not material to the financial statements. The interest income and expense on these mirror image swaps exactly offset each other.

The Company enters into commitments with certain of its retail customers to originate fixed rate mortgage loans and simultaneously enters into an agreement to sell these fixed rate mortgage loans to the Federal National Mortgage Association. These commitments are considered derivative financial instruments and are recorded at fair value with any changes in fair value recorded through earnings.

Table of Contents

Amounts included in the Consolidated Statements of Income related to economic hedges and non-hedging derivatives were as follows:

<i>(In thousands)</i>	Three Months Ended March 31,	
	2010	2009
Economic hedges		
<i>Interest rate swap on industrial revenue bond:</i>		
Net interest expense recognized in interest and dividend income on securities	\$ (168)	\$ (160)
Unrealized loss recognized in other non-interest income	(159)	(868)
<i>Interest rate swaps on loans with commercial loan customers:</i>		
Unrealized gain recognized in other non-interest income	1,605	908
<i>Reverse interest rate swaps on loans with commercial loan customers:</i>		
Unrealized loss recognized in other non-interest income	(1,605)	(908)
Favorable change in credit valuation adjustment recognized in other non-interest income	\$ 270	\$ 8
Non-hedging derivatives		
<i>Commitments to originate residential mortgage loans to be sold:</i>		
Unrealized loss recognized in other non-interest income	\$ (32)	\$
<i>Commitments to sell residential mortgage loans:</i>		
Unrealized gain recognized in other non-interest income	\$ 48	\$

11. FAIR VALUE MEASUREMENTS

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities that are carried at fair value.

Recurring fair value measurements of financial instruments

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2010 and 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value. There were no transfers between levels during the three months ended March 31, 2010.

Table of Contents

(In thousands)	March 31, 2010			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Trading account security	\$	\$	\$ 15,816	\$ 15,816

Derivative assets		3,267		3,267
Derivative liabilities		13,447	273	13,720

Trading Security at Fair Value. The Company holds one security designated as a trading security. It is a tax advantaged economic development bond issued by the Company to a local nonprofit organization which provides wellness and health programs. The determination of the fair value for this security is determined based on a discounted cash flow methodology. Certain inputs to the fair value calculation are unobservable and there is little to no market activity in the security, therefore, the security meets the definition of a level 3 security and has been classified as such.

Securities Available for Sale (AFS). AFS securities classified as Level 1 consist of publicly-traded equity securities for which the fair values can be obtained through quoted market prices in active exchange markets. AFS securities classified as Level 2 include certain agency mortgage-backed securities and investment grade-rated municipal bonds and corporate bonds. The pricing on Level 2 was primarily sourced from third party pricing services and is based on models that consider standard input factors such as dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and condition, among other things. The Company holds one trust preferred security

and two limited partnership securities in its AFS portfolio which are classified as Level 3. The securities' fair values are based on unobservable issuer-provided financial information and discounted cash flow models derived from the underlying structured pool.

Derivative Assets and Liabilities. The valuation of the Company's interest rate swaps is obtained from a third-party pricing service and is determined using a discounted cash flow analysis on the expected cash flows of each derivative. The pricing analysis is based on observable inputs for the contractual terms of the derivatives, including the period to maturity and interest rate curves.

Table of Contents

The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings.

Although the Company has determined that the majority of the inputs used to value its interest rate derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2010, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

The Company enters into various commitments to originate residential mortgage loans for sale and commitments to sell residential mortgage loans. Such commitments are considered to be derivative financial instruments and are carried at estimated fair value on the consolidated balance sheets.

The estimated fair value of commitments to originate residential mortgage loans for sale is adjusted to reflect estimates for fall-out rates, associated servicing and origination costs. These assumptions are considered significant unobservable inputs resulting in a Level 3 classification. As of March 31, 2010, liabilities derived from commitments to originate residential mortgage loans for sale totaled \$32 thousand. The estimated fair values of commitments to sell residential mortgage loans were calculated by reference to prices quoted by the Federal National Mortgage Association in secondary markets. These valuations result in a Level 2 classification. As of March 31, 2010, assets derived from commitments to sell residential mortgage loans totaled \$48 thousand.

The table below presents the changes in Level 3 assets that were measured at fair value on a recurring basis at March 31, 2010 and 2009.

	Assets		Liabilities
	Trading Account Security	Securities Available for Sale	Derivative Liabilities
<i>(In thousands)</i>			
Balance as of December 31, 2009	\$ 15,880	\$ 2,016	\$ (273)
Unrealized gain recognized in other non-interest income	46		241
Unrealized loss included in accumulated other comprehensive loss		(267)	
Balance as of March 31, 2010	\$ 15,816	\$ 2,283	\$ (32)
Unrealized gains (losses) relating to instruments still held at March 31, 2010	\$ 926	\$ (1,634)	\$

	Assets		
	Trading Account Security	Securities Available for Sale	
<i>(In thousands)</i>			
Balance as of December 31, 2008	\$ 18,144	\$ 1,446

Unrealized loss included in accumulated other comprehensive loss			(385)

Balance as of March 31, 2009	\$	17,565	\$	1,061
Unrealized losses relating to instruments still held at March 31, 2009	\$	(579)	\$	(385)

Non-recurring fair value measurements of financial instruments

The Company is required, on a non-recurring basis, to adjust the carrying value or provide valuation allowances for certain financial assets using fair value measurements in accordance with GAAP. The following is a summary of applicable non-recurring fair value measurements.

Table of Contents

Securities held to maturity. Held to maturity securities are recorded at amortized cost and are evaluated periodically for impairment. No impairments were recorded on securities held to maturity for the quarters ended March 31, 2010 and 2009. Held to maturity securities are fair valued using the same methodologies applied to the available for sales securities portfolio. Most securities in the held for maturity portfolio consist of economic development bonds and issues to local municipalities that are not actively traded and are priced using a discounted cash flows model. The Bank views these as Level 3 pricing.

Restricted equity securities. The Company's restricted equity securities balance is primarily composed of Federal Home Loan Bank of Boston (FHLBB) stock having a carrying value of \$21.0 million as of March 31, 2010. FHLBB stock is recorded at par and periodically evaluated for impairment. The FHLBB is a cooperative that provides services to its member banking institutions. The primary reason for joining the FHLBB was to obtain funding from the FHLBB and the purchase of stock in the FHLBB is a requirement for a member to gain access to funding. The Company purchases FHLBB stock proportional to the volume of funding received and views the purchases as a necessary long-term investment for the purposes of balance sheet liquidity and not for investment return.

In February 2009 the FHLBB announced that it has indefinitely suspended its dividend payment beginning in the first quarter of 2009, and will continue the moratorium, put into effect during the fourth quarter of 2008, on all excess stock repurchases in an effort to help preserve capital. In addition, the FHLBB reported a net loss for the years ended December 31, 2008 and 2009. However, the FHLBB has reported positive net income for the fourth quarter of 2009 and the first quarter of 2010. These factors were considered by the Company's management when determining if an other-than-temporary impairment exists with respect to the Company's investment in FHLBB. The Company also reviewed recent public filings, rating agency's analysis which showed investment-grade ratings, capital position which exceeds all required capital levels, and other factors. As a result of the Company's review for OTTI, management deemed the investment in the FHLBB stock not to be OTTI as of March 31, 2010 and it will continue to be monitored closely. There can be no assurance as to the outcome of management's future evaluation of the Company's investment in the FHLBB.

Loans. Loans are generally not recorded at fair value on a recurring basis. Periodically, the Company records non-recurring adjustments to the carrying value of loans based on fair value measurements for partial charge-offs of the uncollectible portions of those loans. Non-recurring adjustments can also include certain impairment amounts for collateral-dependent loans calculated when establishing the allowance for credit losses. Such amounts are generally based on the fair value of the underlying collateral supporting the loan and, as a result, the carrying value of the loan less the calculated valuation amount does not necessarily represent the fair value of the loan. Real estate collateral is typically valued using appraisals or other indications of value based on recent comparable sales of similar properties or assumptions generally observable in the marketplace. However, the choice of observable data is subject to significant judgment, and there are often adjustments based on judgment in order to make observable data comparable and to consider the impact of time, the condition of properties, interest rates, and other market factors on current values. Additionally, commercial real estate appraisals frequently involve discounting of projected cash flows, which relies inherently on unobservable data. Therefore, real estate collateral related nonrecurring fair value measurement adjustments have generally been classified as Level 3. Estimates of fair value used for other collateral supporting commercial loans generally are based on assumptions not observable in the marketplace and therefore such valuations have been classified as Level 3. Impaired loans totaling \$22.5 million were subject to nonrecurring fair value measurement at March 31, 2010. These loans were primarily commercial loans and these measurements were classified as Level 3. Impaired loans with a carrying value of \$13.9 million were determined to require a valuation allowance, which was recorded at \$4.4 million at March 31, 2010 based on estimated fair value. As of December 31, 2009 impaired loans with a carrying value of \$29.9 million were determined to require a valuation allowance, which was recorded at \$6.4 million based on estimated fair value. For the three month periods ended March 31, 2010 and 2009, losses relating to period-end impaired loans totaled \$1 million and \$2 million, respectively.

Loans held for sale. Loans originated and held for sale are carried at the lower of aggregate cost or market value. No fair value adjustments were recorded on loans held for sale during the three month periods ended March 31, 2010 and 2009. The Company holds loans in the held for sale category for a period generally less than 3 months and as a result fair value approximates carrying value.

Table of Contents

Capitalized mortgage loan servicing rights. A loan servicing right asset represents the amount by which the present value of the estimated future net cash flows to be received from servicing loans are expected to more than adequately compensate the Company for performing the servicing. The fair value of servicing rights is estimated using a present value cash flow model. The most important assumptions used in the valuation model are the anticipated rate of the loan prepayments and discount rates. Adjustments are only recorded when the discounted cash flows derived from the valuation model are less than the carrying value of the asset. Although some assumptions in determining fair value are based on standards used by market participants, some are based on unobservable inputs and therefore are classified in Level 3 of the valuation hierarchy. Write-downs on capitalized mortgage loan servicing rights totaled \$178 thousand and \$144 thousand for the three month periods ended March 31, 2010 and 2009, respectively.

Non-financial assets and non-financial liabilities

Other real estate owned (OREO). OREO results from the foreclosure process on residential or commercial loans issued by the Bank. Upon assuming the real estate, the Company records the property at the fair value of the asset less the estimated sales costs. Thereafter, OREO properties are recorded at the lower of cost or fair value. OREO fair values are primarily determined based on Level 3 data including sales comparables and appraisals. OREO properties totaled \$3.25 million and \$30 thousand at March 31, 2010 and December 31, 2009, respectively. OREO loan sales totaled \$30 thousand for the three month period ended March 31, 2010. Write-downs on OREO properties totaled \$750 thousand and \$127 thousand for the three month periods ended March 31, 2010 and 2009, respectively.

Intangibles and Goodwill. The Company's other intangible balance totaled \$13.6 million and \$14.4 million as of March 31, 2010 and 2009, respectively. Other intangibles include core deposit intangibles, insurance customer relationships, and non-compete agreements assumed by the Company as part of historical acquisitions. Other intangibles are initially recorded at fair value based on Level 3 data, such as internal appraisals and customized discounted criteria, and are amortized over their estimated lives on a straight-line or accelerated basis ranging from five to ten years. No impairment was recorded on other intangible assets during the three month periods ended March 31, 2010 and 2009.

The Company's Goodwill balance as of March 31, 2010 was \$161.7 million. The Company tests goodwill impairment annually in the fourth quarter or more frequently if events or changes in circumstances indicate that impairment is possible.

Summary of estimated fair values of financial instruments

The estimated fair values, and related carrying amounts, of the Company's financial instruments follow. Accordingly, the aggregate fair value amounts presented herein may not necessarily represent the underlying fair value of the Company.

Accrued interest receivable	9,011	9,011	8,498	8,498
Cash surrender value of bank-owned life insurance policies	34,973	34,973	36,904	36,904
Derivative assets	4,885	4,885	3,267	3,267

Financial Liabilities

Total deposits	\$ 2,037,293	\$ 2,048,778	\$ 1,986,762	\$ 2,007,774
Short-term debt	44,130	44,130	83,860	83,860
Long-term Federal Home Loan Bank advances	197,447	201,508	207,344	208,831
Junior subordinated debentures	15,464	10,218	15,464	9,462
Derivative liabilities	16,752	16,752	13,720	13,720

Other than as discussed above, the following methods and assumptions were used by management to estimate the fair value of significant classes of financial instruments for which it is practicable to estimate that value.

Cash and cash equivalents. Carrying value is assumed to represent fair value for cash and cash equivalents that have original maturities of ninety days or less.

Restricted equity securities. Carrying value approximates fair value based on the redemption provisions of the issuers.

Cash surrender value of life insurance policies. Carrying value approximates fair value.

Loans, net. The carrying value of the loans in the loan portfolio is based on the cash flows of the loans discounted over their respective loan rates. The rates are adjusted for substandard and special mention loans to factor the impact of declines in the loans' credit standing. The fair value of the loans is estimated by discounting future cash flows using the current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality.

Accrued interest receivable. Carrying value approximates fair value.

Deposits. The fair value of demand, non-interest bearing checking, savings and certain money market deposits is determined as the amount payable on demand at the reporting date. The fair value of time deposits is estimated by discounting the estimated future cash flows using market rates offered for deposits of similar remaining maturities.

Borrowed funds. The fair value of borrowed funds is estimated by discounting the future cash flows using market rates for similar borrowings. Such funds include all categories of debt and debentures in the table above.

Junior subordinated debentures. The Company utilizes a pricing service along with internal models to estimate the valuation of its junior subordinated debentures. The junior subordinated debentures re-price every ninety days.

Off-balance-sheet financial instruments. Off-balance-sheet financial instruments include standby letters of credit and other financial guarantees and commitments considered immaterial to the Company's financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Management's discussion and analysis of financial condition and results of operations is intended to assist in understanding the financial condition and results of operations of the Company. The following discussion and analysis should be read in conjunction with the Company's consolidated financial statements and the notes thereto appearing in Part I, Item 1 of this document and with Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2009 Annual Report on Form 10-K. In the following discussion, income statement comparisons are against the same period of the previous year and balance sheet comparisons are against the previous fiscal year-end, unless otherwise noted. Operating results discussed herein are not necessarily indicative of the results for the year 2010 or any future period. In management's discussion and analysis of financial condition and results of operations, certain reclassifications have been made to make prior periods comparable. Tax-equivalent adjustments are the result of increasing income from tax-advantaged securities by an amount equal to the taxes that would be paid if the income were fully taxable based on a 35% federal income tax rate.

Berkshire Hills Bancorp (the Company or Berkshire) is headquartered in Pittsfield, Massachusetts. It has \$2.7 billion in assets at March 31, 2010 and is the parent of Berkshire Bank America's Most Exciting Bank (the Bank). The Company provides personal and business banking, insurance, investment, and wealth management services through 45 financial centers in western Massachusetts, northeastern New York, and southern Vermont. Berkshire Bank provides 100% deposit insurance protection, regardless of amount, based on a combination of FDIC insurance and membership in the Depositors Insurance Fund (DIF). For more information, visit www.berkshirebank.com or call 800-773-5601.

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of Berkshire Hills Bancorp, Inc., Berkshire Bank and Berkshire Insurance Group. This document may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations of the Company, are generally identified by use of the words anticipate, believe, estimate, expect, intend, plan, project, seek, strive, try, or verbs such as will, would, should, could, may, or similar expressions. Our ability to predict results or the actual of our plans and strategies is inherently uncertain. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained in this Form 10-Q. Important factors that could cause actual results to differ materially from our forward-looking statements are set forth under Item 1A. Risk Factors in our annual report on Form 10-K for the year ended December 31, 2009 and in this report and in other reports filed with the Securities and Exchange Commission. You should not place undue reliance on these forward-looking statements, which reflect our expectations only as of the date of this report. We do not assume any obligation to revise forward-looking statements except as may be required by law.

Table of Contents

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES, AND NEW ACCOUNTING PRONOUNCEMENTS

The Company's significant accounting policies are described in Note 1 to the consolidated financial statements in the 2009 Form 10-K. Please see those policies in conjunction with this discussion. The accounting and reporting policies followed by the Company conform, in all material respects, to accounting principles generally accepted in the United States and to general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. While the Company bases estimates on historical experience, current information and other factors deemed to be relevant, actual results could differ from those estimates. The Company considers accounting estimates to be critical to reported financial results if (i) the accounting estimate requires management to make assumptions about matters that are highly uncertain and (ii) different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, could have a material impact on the Company's financial statements. Accounting policies related to the allowance for loan losses, the valuation of deferred tax assets, the estimates related to the initial measurement of goodwill and intangible assets and subsequent impairment analyses, the determination of other-than-temporary impairment of investment securities, and the determination of fair value of financial instruments are considered to be critical. For additional information regarding critical accounting policies, refer to Note 1 – Summary of Significant Accounting Policies in the notes to consolidated financial statements and the sections captioned "Critical Accounting Policies" and "Loan Loss Allowance" in Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2009 Form 10-K. There have been no significant changes in the Company's application of critical accounting policies since year-end 2009. Please refer to the note on Recent Accounting Pronouncements in Note 1 to the consolidated financial statements of this report for a detailed discussion of new accounting pronouncements. The Company performs an annual impairment test of goodwill or more frequently if events or changes in circumstances indicate that impairment is possible. There have been no such events or changes in circumstance since the Company's most recent report on Form 10-K.

SUMMARY

First quarter net income was \$3.3 million in 2010, compared to \$3.9 million in 2009. First quarter net income available to common shareholders increased to \$3.3 million in 2010 from \$3.2 million in 2009. Results in 2009 included the impact of dividends on preferred stock which was repaid in full near the end of the second quarter. First quarter earnings per share decreased to \$0.24 from \$0.27 in 2009 due to additional shares issued in the second quarter last year. The first quarter dividend paid was \$0.16 per share in both years.

First quarter results demonstrated positive momentum in building earnings available to common shareholders and in strengthening asset quality. Results in the most recent quarter included strong growth in targeted loans and deposits and significant linked quarter revenue growth in most business lines. Careful attention to loan and deposit pricing contributed to an increase in the net interest margin. The decrease in net income was primarily due to higher expenses related to the costs of business expansion and investment in new business lines.

Nonperforming assets were elevated at the start of 2010 as the Company pursued workout strategies initiated near year-end 2009 to resolve potential risks in the loan portfolio. Nonperforming assets decreased to below 1% of total assets as the Company completed the resolution of several credits. Net loan charge-offs averaged 0.47% annualized in the first quarter, and the Company ended the quarter with the lowest level of accruing delinquent loans in several years, compared to total loans.

Berkshire is the largest locally headquartered regional bank, and is well positioned to meet the needs of its markets. The Company's double digit annualized deposit growth in the first quarter provides a solid base for current and planned organic loan growth. Berkshire Bank is well capitalized and the Company's dividend to shareholders provided a yield exceeding 3% at quarter-end.

First quarter highlights included:

- 10% annualized deposit growth
- 3% increase in first quarter income available to common shareholders compared to the prior year
- 3.24% net interest margin, increased from 3.05% in the prior quarter
- 30% growth in banking fees for deposits, loans, and interest rate swaps compared to prior year
- 36% decrease in nonperforming assets to \$25 million, or 0.92% of total assets
- \$15 million reduction to \$3 million in performing restructured loans
- 0.47% annualized net charge-offs/average total loans
- 0.31% ratio of accruing delinquent loans/loans – lowest since 2006
- 147% ratio of the loan loss allowance to non-accruing loans

COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2010 AND DECEMBER 31, 2009

Summary. Total assets remained steady at \$2.7 billion in the most recent quarter. A \$20 million increase in loans was mostly offset by decreases in various other assets. A \$51 million increase in deposits funded a \$50 million reduction in short term borrowings. Nonperforming assets decreased by 36% to 0.92% of total assets.

Securities. Total securities decreased by \$5 million in the first quarter due primarily to a decrease in municipal bonds. A decrease in mortgage backed securities was offset by an increase in adjustable rate, locally originated revenue bonds and an increase in fixed rate investment grade trust preferred securities issued by national banks. The annualized securities yield increased to 4.06% in the first quarter of 2010 compared to 4.01% in the prior quarter. The net unrealized gain on securities available for sale increased by slightly to \$5 million during the quarter. The Company had one \$3 million pooled trust preferred security with a 58% unrealized loss at quarter-end. The Company has been monitoring this security closely for a number of quarters. It is described more fully in the notes to the financial statements, and the impairment is viewed as temporary.

Table of Contents

Loans. Total loans increased by \$20 million as a result of the purchase of \$32 million in prime, seasoned thirty year fixed rate Massachusetts residential mortgages from another institution in the state. Also, during the quarter, Berkshire's new asset based lending unit originated \$13 million in new commercial loans. This unit was still being assembled in the first quarter and is expected to originate \$100 million in loans outstanding by the end of the year. Home equity and other consumer balances increased at a 5% annualized rate during the quarter. Loan growth noted above was partially offset by planned runoff of indirect auto loans and runoff of other loans in the continuing low rate environment. As a result, the annualized yield on the loan portfolio decreased to 4.91% in the first quarter of 2010 compared to 4.95% in the prior quarter. The average balance of loans decreased from the prior quarter primarily as a result of writedowns recorded at the end of the prior quarter. Additionally, the mortgage purchase and asset based loan bookings happened later in the most recent quarter. Commercial loan originations also included a \$10 million obligation which was classified as a revenue bond in the securities portfolio. The commercial loan pipeline of committed new loan originations also increased during the quarter.

Nonperforming assets decreased by \$14 million from \$39 million to \$25 million due to the completion of resolutions that were in process at the beginning of the quarter. This included a \$7 million commercial loan that was modified at a market rate and was returned to accrual status, together with two commercial loans that were collected for cash totaling \$3 million due to sale or refinancing. A \$5 million commercial loan was written down by \$2 million, foreclosed, and was held as other real estate owned at quarter-end. The remaining \$22 million balance of nonperforming loans included one \$6 million commercial loan that was restructured and which was current in payments and expected to be returned to accrual later this year. There were no other nonperforming loans in excess of \$2 million at quarter-end. Accruing delinquent loans decreased to a comparatively low 0.31% of total loans, with improvements in most major categories. Accruing loans designated as troubled debt restructurings decreased to \$3 million from \$18 million in the first quarter based on payment histories and market level risk adjusted loan interest rates. Most of the loans that were reclassified were loans restructured as part of the Company's loan initiative in the prior quarter.

Potential problem loans are loans which are currently performing, but where known information about possible credit problems of borrowers causes management to have serious doubts as to the ability of such borrowers to comply with the present loan repayment terms and which may result in disclosure of such in the future as problem loans. Potential problem loans are typically commercial loans that are performing but are classified by the Company's loan rating system as substandard. The Company had \$72 million in potential problem loans at March 31, 2010 compared to \$61 million at the beginning of the quarter. This increase included the \$7 million loan noted above which became accruing, and a \$7 million lodging relationship which was restructured in the prior quarter and which was performing in the first quarter but was downgraded from a special mention classification. This loan was not deemed impaired at quarter-end. Loans deemed impaired totaled \$22 million at quarter-end, which was down from \$57 million at the start of the quarter following the resolutions discussed above.

Loan Loss Allowance. The loan loss allowance was 1.61% of total loans at quarter-end, compared to 1.62% at the start of the quarter. The allowance was 147% of nonperforming loans at quarter-end, compared to 82% at the beginning of the quarter. The specific allowance assigned to impaired loans decreased to \$4 million from \$6 million, while pool reserves increased by a similar amount due to reclassification of certain loans into a higher risk pool and higher construction reserves.

Deposits and Borrowings. Total deposits increased by \$51 million (10% annualized) during the first quarter, primarily due to growth in money market and savings accounts. Deposits increased in most of the Bank's regions, and included the benefit of the new private banking business unit. The average cost of deposits continued to decrease, falling to 1.39% in the most recent quarter, compared to 1.48% in the prior quarter. Funds from deposit growth were used to reduce borrowings by \$50 million. The average cost of borrowings decreased to 3.27% from 4.30% in the prior quarter primarily due to the prepayment of higher cost borrowings at the end of last year. The loan to deposit ratio continued to improve to 97%, demonstrating the Bank's strong liquidity.

Stockholders' Equity. Total stockholders' equity increased slightly during the quarter, totaling \$385 million at quarter-end. Tangible equity/assets remained unchanged at 8.3%, and total equity to assets remained unchanged at 14.2%. At quarter-end, tangible book value per share measured \$14.97, while total book value per share was \$27.47.

Measures related to tangible equity and assets exclude the balance of goodwill and other intangible assets from both equity and assets and are often utilized by the investment community. The Bank's risk-based capital ratio was unchanged at 10.7% at quarter-end.

Table of Contents**COMPARISON OF OPERATING RESULTS FOR THE THREE MONTHS ENDED MARCH 31, 2010 AND 2009**

Summary. First quarter net income of \$3.3 million in 2010 was down from \$3.9 million in 2009 due to higher expenses associated with the Company's expansion. First quarter total net revenue increased by \$0.4 million (2%) in 2010 compared to 2009. The Company has maintained an asset sensitive net interest income profile, as management has chosen to sacrifice current yield to protect earnings in the event of future rate increases. Additionally, the Company has accepted the impact of actions to improve liquidity and capitalization during the current distressed economic environment, despite the negative impact of these actions on short-term earnings and stockholder return. Additionally, the Company is absorbing the current period costs of expansion activities which are viewed as investments in the franchise. These include the new business lines in asset based lending and private banking, which are expected to reach breakeven within the current calendar year. Additionally, the Company's cost of regional expansion in Albany and Springfield was included in first quarter 2010 results, but not in the results for the same quarter of 2009. As a result of these factors, the first quarter return on assets decreased to 0.50% in 2010 compared to 0.59% in 2009. The return on common equity decreased to 3.44% from 3.52% in the same periods, respectively and included the benefit of the repayment in full of outstanding preferred stock in the second quarter of 2009.

First quarter revenues were higher in most major areas except for insurance, which decreased by \$1.1 million primarily due to lower contingency income, reflecting conditions with the Company's carriers. Berkshire continues to rank high in terms of total compensation from a number of the carriers that it works with. The Company has completed a reorganization of its insurance group which is designed to lower its annual cost structure by more than \$1 million and to also improve the scalability of its service model. As part of this reorganization, a new consolidated insurance center was opened in Pittsfield in the 1st quarter, significantly improving service to customers. As a result the Company expects that in the future it will benefit from higher earnings when cyclical insurance industry conditions improve.

Net Interest Income. Net interest income increased by \$0.6 million (3%) due to an improvement in the net interest margin to 3.24% from 3.11%. Net interest income also improved from the fourth quarter of 2009, reflecting an improvement in the net interest margin from 3.05%. This linked quarter improvement was primarily due to lower funding costs for both deposits and borrowings. Average earning assets were lower in the most recent quarter than in the prior quarter and the prior year first quarter, primarily due to the impact of loan charges near the end of 2009. Net interest income grew at a 7% annualized rate when compared to the prior quarter. This was the third consecutive quarter in which the margin improved. The Company is continually focused on maximizing the spread between loans and deposits, and it has also benefited from the restructuring of its borrowings at the end of 2009.

Non-Interest Income. First quarter non-interest income decreased by \$0.2 million (2%) from the prior year due to a \$1.1 million (24%) decrease in insurance revenue. Insurance revenue includes seasonal contingency income which declined due to lower payouts from major carriers, which are viewed as cyclical. Additionally, regular commission income decreased by \$0.2 million (11%) due primarily to ongoing unfavorable pricing conditions in the property and casualty industry. Banking fees for deposits, loans, and interest rate swaps increased by \$0.8 million (30%) over the first quarter of 2009, and by 15% over the prior quarter, including the benefit of higher business volumes and selective price increases. Included in this growth was a \$0.4 million increase in interest rate swap fee income related to commercial loan originations. First quarter wealth management fees were down slightly compared to the prior year but were up at a 12% annualized rate compared to the prior quarter as a result of an 11% annualized increase in assets under management, which totaled \$686 million at quarter-end.

Loan Loss Provision. The first quarter loan loss provision totaled \$2.3 million in 2010, decreasing by \$0.2 million from the prior year period. Net loan charge-offs also totaled \$2.3 million and decreased by a similar amount, measuring 0.47% of average loans in 2010 compared to 0.51% in the first quarter of 2009. In the most recent quarter, gross charge-offs totaled \$3.8 million, including the \$2.2 million write-down on the commercial property transferred to other real estate owned. Recoveries totaling \$1.5 million were mostly related to commercial loans that had been charged-down in the prior quarter as a result of higher than anticipated liquidation values.

Table of Contents

Non-Interest Expense and Income Tax Expense. First quarter non-interest expense increased by \$1.7 million (9%) from the prior year, including the impact of business expansion on compensation related expense. All other first quarter non-compensation related expense increased by 1% from year-to-year. The \$1.6 million increase in compensation related expense included \$0.3 million (5%) in salaries and wages. Incentive expense increased by \$0.6 million, as no incentives were accrued in 2009. Compensation expense deferrals for loan originations declined by \$0.3 million from the unusually high levels in the refinancing wave in 2009. Total full-time equivalent staff measured 607 employees at quarter-end, compared to 622 at the end of 2009 and 610 at the end of 2008. First quarter net income benefited from a year-to-year reduction in the effective income tax rate to 22% from 28% reflecting the expected effective rate for the current year. The Company has also increased its investment in securities and loans with tax-advantaged interest income.

Results of Segment Operations. The Company has designated two operating segments for financial statement disclosure: banking and insurance. Additional information about the Company's accounting for segment operations is contained in the notes to the financial statements. The Bank's first quarter net income increased 1% in 2010 compared to 2009. Its pre-tax income decreased by 5%, but this was offset by a lower tax rate in 2010 reflecting the anticipated tax rate for the full year 2010. Insurance income decreased from \$1.2 million to \$0.7 million as a result of lower revenue.

Comprehensive Income. Accumulated other comprehensive income is a component of total stockholders' equity on the balance sheet. Comprehensive income includes net income and changes in accumulated other comprehensive income, which consists principally of changes (after-tax) in the unrealized market gains and losses of investment securities available for sale and interest rate swaps designated as cash flow hedges. The Company recorded a \$0.6 million increase in the accumulated other comprehensive loss in the first quarter of 2010 due primarily to a decrease in the fair value of its interest rate swaps. Total first quarter comprehensive income was \$2.8 million in 2010. In the first quarter of 2009, the Company recorded a \$2.3 million reduction in the accumulated other comprehensive loss as financial markets began to normalize following turbulence in the fourth quarter of 2008. Due to these impacts, the Company recorded \$6.2 million in total comprehensive income in the first quarter of 2009.

Liquidity and Cash Flows. The Company's primary source of funds was deposit growth in the first quarter of 2010, and the primary use of funds was the repayment of short term borrowings. Additionally, reductions in liquid assets and investment securities funded loan growth, which was principally due to the purchase of residential mortgages. Net deposit growth and borrowings are expected to be significant sources of funds during the remainder of the year, and loan and securities growth are expected to be significant uses of funds. Borrowings from the Federal Home Loan Bank are a significant source of liquidity for daily operations and for borrowings targeted for specific asset/liability purposes. The Company also uses interest rate swaps in managing its funds sources and uses. Since the fourth quarter of 2008, the Company has participated in the optional FDIC program providing unlimited insurance on transaction deposit accounts. The FDIC recently offered participating banks a one-time opportunity to continue to participate in this program through at least year-end 2010. The Company has opted to discontinue its participation, which will be effective as of July 1, 2010. The Company does not expect that this change will have a material impact on its liquidity and cash flows. The Company has traditionally offered 100% insurance on all deposit balances as a result of the combination of insurance from the FDIC and the Massachusetts Depositors Insurance Fund. The Company will continue to offer this 100% deposit insurance on all deposit balances.

Berkshire Hills Bancorp had a cash balance totaling \$23 million at quarter-end, and this cash was expected to fund all routine uses of cash for dividends, debt service, and operating costs. The primary long run routine sources of funds for the holding company are expected to be dividends from Berkshire Bank and Berkshire Insurance Group, as well as cash from the exercise of stock options. For 2010, there are no dividends expected to be paid by these subsidiaries. As a result of the loss recorded in 2009, Berkshire Bank is not currently eligible to pay dividends to its parent under Massachusetts state banking statutes. The Company expects that, as a result of retained earnings in 2010, the Bank will again become eligible to pay dividends according to these statutes in 2011. As noted above, the Company expects to meet all of its routine cash needs in 2010 from existing cash balances on hand, including anticipated shareowner cash dividends. Additional discussion about the Company's liquidity and cash flows is contained in the Company's 2009 Form 10-K in Item 7.

Table of Contents

Capital Resources. Please see the Equity section of the Comparison of Financial Condition for a discussion of stockholders' equity. At March 31, 2010, Berkshire Bank continued to be classified as well capitalized. Additional information about regulatory capital is contained in the notes to the consolidated financial statements and in the 2009 Form 10-K. As discussed in Part II, Item 1A of this report, there are financial system reform proposals before Congress which would constitute the most significant regulatory and systemic reform since the 1930s. It cannot be determined at this time whether reforms will be enacted or what the final nature of any reforms would be. Some proposed reforms would increase required capital levels in the banking system.

Off-Balance Sheet Arrangements and Contractual Obligations. In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the Company's financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments and lines of credit. A further presentation of the Company's off-balance sheet arrangements is presented in the Company's 2009 Form 10-K. For the three months ended March 31, 2010, the Company did not engage in any off-balance sheet transactions reasonably likely to have a material effect on the Company's financial statements. Information relating to payments due under contractual obligations is presented in the 2009 Form 10-K. There were no material changes in the Company's payments due under contractual obligations during the first three months of 2010, except for derivatives transactions. The Company entered into \$35 million in net additional interest rate swaps on commercial loans, with an equal net increase in back-to-back swaps with institutional third parties. See note 10 on Derivative Financial Instruments and Hedging Activities for additional information related to interest rate swaps.

Fair Value Measurements. The company records fair value measurements of certain assets and liabilities, as described in the related note in the financial statements. There were no material changes in most instances in the fair value measurements in the financial statements, compared to book value, at March 31, 2010 compared to December 31, 2009. The fair value of loans improved to a discount of \$75 million from a discount of \$96 million on these dates, respectively. The fair value of deposits exceeded book value by \$11 million compared to \$21 million on these dates, respectively. Both of these changes indicate an improvement in the economic value of the Company's equity.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the way that the Company measures market risk or in the Company's market risk position during the first three months of 2010. For further discussion about the Company's Quantitative and Qualitative Aspects of Market Risk, please review Item 7A of the Report 10-K filed for the fiscal year ended December 31, 2009.

As discussed in Item 2, a significant contributor to lower earnings in recent quarters has been Berkshire's targeted position to maintain a moderately asset sensitive interest rate profile. Federal interventions to avoid a financial crisis unexpectedly drove short-term interest rates to near zero where they have remained since the fourth quarter of 2008. Berkshire maintains a discipline to avoid undue risks to the market value of equity which would result from taking on excessive fixed rate assets in the current environment. As of March 31, 2010, the Company's model indicated that at current rates and volumes, net interest income would decrease by a total of about 3% at the end of a two year period, compared to current levels, and assuming no growth or change in mix. If rates were to gradually rise 200 basis points in this no growth scenario, then net interest income would increase by about 7% at the end of a two year period, compared to current levels. The Company believes that rates will rise over the next two years, and that net interest income will increase in the future both due to higher rates, and to increases in volume and to favorable changes in mix. Additionally, the Company is evaluating the retention of more fixed rate assets, as shown by the purchase of fixed rate mortgages and trust preferred securities in the most recent quarter. Most of the loan originations that the Company has retained have been adjustable rate, which has modestly increased asset sensitivity. As a result, the Company may achieve a better balance of adjustable and fixed rate originations in the coming months, while still maintaining an overall asset sensitive position. Any such shift would be targeted towards supporting the net interest margin in 2010 and 2011.

Management also believes that net interest income might increase by more than the modeled amount in the expected scenarios of rising interest rates. Management might decide to retain more, longer duration assets, after interest rates

increase, and this would contribute additional income in the case of a parallel shift in the yield curve. Also, the Company has experienced certain market floors on deposit pricing in the current near zero short-term interest rate environment. In the case of rising rates, deposits might not increase in rate as quickly as they are modeled since they are presently above other comparable market rates in some cases.

Table of Contents

Of further note, the Company's fee income has been reduced by the economic and financial market conditions which prompted federal interest rate reductions, and higher future rates would in some cases be related to a normalization of economic and market conditions, with the potential result that non-interest income could also increase in addition to the interest income changes which are modeled.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was carried out by the Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. No change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the last fiscal quarter that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

The Company is not involved in any legal proceedings other than routine legal proceedings occurring in the normal course of business. Such routine proceedings, in the aggregate, are believed by management to be immaterial to the Company's financial condition or results of operations.

ITEM 1A. RISK FACTORS

The following risk factor represents a material update and addition to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 ("Form 10-K"). In addition to the other information set forth in this report, the matters discussed below should be read in conjunction with the risk factors and other information disclosed in our Form 10-K. These risk factors could materially affect our business, financial condition or future results. Additional risks not presently known to us, or that we currently deem immaterial, may also adversely affect our business, financial condition or results of operations.

Legislative and Regulatory Initiatives

The risk factors discussion in the 2009 Form 10-K describes the situation with numerous pending proposals in Congress and in the federal agencies for reform of bank regulation. More information is also provided in *Regulation and Supervision* in Item 1 of that report. As of the date of this report on Form 10-Q, a major reform package is being debated in the U.S. Senate, following passage of a reform bill in the U.S. House several months ago. The final form and outcome of this reform effort is uncertain, but there is a significant possibility that major reforms will become law in the current year. The impacts on the financial system and on the Company are currently unknown, but they may increase the overall burden of regulation and also may result in higher overall capital requirements for the system. Additionally, federal agencies are moving forward in considering proposals for regulatory reform. A document issued by the Basel Committee on Banking Supervision in December 2009 has generated significant concerns, including the potential for a higher required capital in the banking system, a reduction of industry profitability, the creation of balance sheet and earnings volatility and an undermining of capital formation for the industry. On April 7th, the Federal Reserve Board held a meeting in Washington to solicit feedback from industry participants on elements of its 2009 proposals. Any future outcomes of these initiatives cannot be predicted at this time.

International Financial System

In recent months, concerns have increased about the potential for defaults among sovereign debt issuers in the European debt markets. The Company has no significant direct exposure to these markets, but these risks have caused increased volatility in the world's financial markets and there are increased risks of financial turmoil or systemic dysfunction that could affect the world's financial markets. Such events could affect U.S. financial markets and potentially could cause future federal interventions in the U.S. or abroad, and could affect the debt ratings of other public and private debt issuers in addition to those in Europe.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

- (a) No Company unregistered securities were sold by the Company during the quarter ended March 31, 2010.
- (b) Not applicable.
- (c) The following table provides certain information with regard to shares repurchased by the Company in the first quarter of 2010.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
January 1-31, 2010		\$		97,993
February 1-28, 2010				97,993
March 1-31, 2010				97,993
Total		\$		97,993

On December 14, 2007, the Company authorized the purchase of up to 300,000 additional shares, from time to time, subject to market conditions. The repurchase plan will continue until it is completed or terminated by the Board of Directors. The Company has no plans that it has elected to terminate prior to expiration or under which it does not intend to make further purchases.
