GENERAL MILLS, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

**(1) Background**

The accompanying Consolidated Financial Statements of General Mills, Inc. (we, us, our, General Mills, or the Company) have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not include certain information and disclosures required for comprehensive financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature. Operating results for the quarterly and nine-month periods ended February 27, 2011 are not necessarily indicative of the results that may be expected for the fiscal year ending May 29, 2011.

These statements should be read in conjunction with the Consolidated Financial Statements and footnotes included in our Annual Report on Form 10-K for the fiscal year ended May 30, 2010. The accounting policies used in preparing these Consolidated Financial Statements are the same as those described in Note 2 to the Consolidated Financial Statements in that Form 10-K, except as discussed in Notes 2, 17, and 18 to these Consolidated Financial Statements.

**(2) Basis of Presentation and Reclassification**

At the beginning of fiscal 2011, we revised the classification of certain revenues and expenses to better align our income statement line items with how we manage our business. We revised the classification of amounts previously reported in our Consolidated Statements of Earnings to conform to the current year presentation. These revised classifications had no effect on previously reported net earnings attributable to General Mills or earnings per share. The changes include:

Revising the classification of certain customer logistics allowances as a reduction of net sales (previously recorded as cost of sales). The impact of this change was a decrease in net sales of \$39.8 million for the quarter ended and \$119.7 million for the nine-month period ended February 28, 2010 with a corresponding decrease to cost of sales.

Revising the classification of certain promotion-related costs, customer allowances, and supply chain costs as cost of sales or selling, general, and administrative (SG&A) expenses (previously recorded as a reduction of net sales or SG&A expenses). The impact of these changes was a net increase to cost of sales of \$17.7 million for the quarter ended and \$53.4 million for the nine-month period ended February 28, 2010 with a corresponding decrease to SG&A expenses.

Shifting allocation of certain SG&A expenses, primarily stock-based compensation, between segment operating profit and unallocated corporate items. The impact of this change was an increase to segment operating profit of \$1.7 million and a corresponding increase in unallocated corporate items for the quarter ended February 28, 2010. For the nine-month period ended February 28, 2010, the impact of this change was a decrease to segment operating profit of \$7.0 million and a corresponding decrease in unallocated corporate items.

Shifting sales responsibility for a customer from our Bakeries and Foodservice segment to our U.S. Retail segment. For the quarter ended February 28, 2010, net sales of \$2.7 million and segment operating profit of \$1.2 million previously recorded in our Bakeries and Foodservice segment have now been reported in the U.S. Retail segment. For the nine-month period ended February 28, 2010, net sales of \$7.9 million and segment operating profit of \$3.4 million previously recorded in our Bakeries and Foodservice segment have now been reported in the U.S. Retail segment.

**Table of Contents**

In May 2010, our Board of Directors approved a two-for-one stock split to be effected in the form of a 100 percent stock dividend to stockholders of record on May 28, 2010. The Company's stockholders received one additional share of common stock for each share of common stock in their possession on that date. The additional shares were distributed on June 8, 2010. This did not change the proportionate interest that a stockholder maintained in the Company. All shares and per share amounts have been adjusted for the two-for-one stock split throughout this report.

**(3) Acquisitions and Divestitures**

During the third quarter of fiscal 2011, we acquired the Mountain High yoghurt business for \$84.8 million. We recorded the purchase price less the fair value of tangible and intangible net assets acquired as goodwill of \$44.6 million. The pro forma effect of this acquisition was not material.

During the third quarter of fiscal 2011, we reached a definitive agreement to acquire Pasta Master Pty Ltd., an Australian producer of chilled Italian meals, pasta and sauces, for \$36.6 million in cash subject to certain purchase price adjustments. We expect the transaction to be completed in the fourth quarter of fiscal 2011.

During the third quarter of fiscal 2011, we sold a foodservice frozen baked goods product line in our International segment for \$24.9 million in cash. We recorded a pre-tax gain of \$14.3 million.

**(4) Restructuring, Impairment, and Other Exit Costs**

Restructuring, impairment, and other exit costs (income) were as follows:

<b>In Millions</b>	<b>Quarter Ended</b>		<b>Nine-Month Period Ended</b>	
	<b>Feb. 27, 2011</b>	<b>Feb. 28, 2010</b>	<b>Feb. 27, 2011</b>	<b>Feb. 28, 2010</b>
Discontinuation of kids refrigerated yogurt beverage and microwave soup product lines	\$ 0.1	\$	\$ 1.9	\$ 24.1
Sale of Contagem, Brazil bread and pasta plant		0.2		(0.6)
Discontinuation of the breadcrumbs product line at Federalsburg, Maryland plant		6.1		6.1
Charges associated with restructuring actions previously announced			0.2	0.8
<b>Total</b>	<b>\$ 0.1</b>	<b>\$ 6.3</b>	<b>\$ 2.1</b>	<b>\$ 30.4</b>

During the nine-month period ended February 27, 2011, we did not undertake any new restructuring actions. During the third quarter of fiscal 2010, we decided to exit our breadcrumbs product line at our Federalsburg, Maryland plant in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products were insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6.1 million primarily related to the impairment of these long-lived assets. No employees were affected by this action.

During the nine-month period ended February 28, 2010, we took restructuring actions in addition to the item described above. We decided to exit our kids refrigerated yogurt beverage product line at our Murfreesboro, Tennessee plant and our microwave soup product line at our Vineland, New Jersey plant to rationalize capacity for more profitable items. Our decisions to exit these products resulted in a \$24.1 million non-cash charge against the related long-lived assets. No employees were affected by these actions. During the nine-month period ended February 28, 2010, we also recorded a net gain of \$0.6 million related to the closure and sale of our Contagem, Brazil bread and pasta plant.

**(7) Financial Instruments, Risk Management Activities, and Fair Values**

**Financial Instruments.** The carrying values of cash and cash equivalents, receivables, accounts payable, other current liabilities, and notes payable approximate fair value. Marketable securities are carried at fair value. As of February 27, 2011, and May 30, 2010, a comparison of cost and market values of our marketable debt and equity securities is as follows:

In Millions	Cost		Market Value		Gross Gains		Gross Losses

Total	\$ 11.0	\$ 17.9	\$ 15.1	\$ 27.4	\$ 4.1	\$ 9.5	\$	\$	

**Table of Contents**

Earnings include \$3.7 million of realized gains from sales of available-for-sale marketable securities. Gains and losses are determined by specific identification. Classification of marketable securities as current or noncurrent is dependent upon our intended holding period, the security's maturity date, or both. The aggregate unrealized gains and losses on available-for-sale securities, net of tax effects, are classified in accumulated other comprehensive income (loss) (AOCI) within stockholders' equity. Scheduled maturities of our marketable securities are as follows:

In Millions	Available for Sale	
	Cost	Market Value
Under 1 year (current)	\$ 2.7	\$ 2.7
From 1 to 3 years	0.7	0.8
From 4 to 7 years	4.5	4.5
Over 7 years	1.1	1.1
Equity securities	2.0	6.0
Total	\$ 11.0	\$ 15.1

Marketable securities with a market value of \$2.3 million as of February 27, 2011, were pledged as collateral for certain derivative contracts.

The fair values and carrying amounts of long-term debt, including the current portion, were \$6,386.7 million and \$5,874.3 million, respectively, as of February 27, 2011. The fair value of long-term debt was estimated using market quotations and discounted cash flows based on our current incremental borrowing rates for similar types of instruments.

**Risk Management Activities.** As a part of our ongoing operations, we are exposed to market risks such as changes in interest rates, foreign currency exchange rates, and commodity prices. To manage these risks, we may enter into various derivative transactions (e.g., futures, options, and swaps) pursuant to our established policies.

**Commodity Price Risk.** Many commodities we use in the production and distribution of our products are exposed to market price risks. We utilize derivatives to manage price risk for our principal ingredients and energy costs, including grains (oats, wheat, and corn), oils (principally soybean), non-fat dry milk, natural gas, and diesel fuel. Our primary objective when entering into these derivative contracts is to achieve certainty with regard to the future price of commodities purchased for use in our supply chain. We manage our exposures through a combination of purchase orders, long-term contracts with suppliers, exchange-traded futures and options, and over-the-counter options and swaps. We offset our exposures based on current and projected market conditions and generally seek to acquire the inputs at as close to our planned cost as possible.

We use derivatives to manage our exposure to changes in commodity prices. We do not perform the assessments required to achieve hedge accounting for commodity derivative positions. Accordingly, the changes in the values of these derivatives are recorded currently in cost of sales in our Consolidated Statements of Earnings.

Although we do not meet the criteria for cash flow hedge accounting, we nonetheless believe that these instruments are effective in achieving our objective of providing certainty in the future price of commodities purchased for use in our supply chain. Accordingly, for purposes of measuring segment operating performance these gains and losses are reported in unallocated corporate items outside of segment operating results until such time that the exposure we are managing affects earnings. At that time we reclassify the gain or loss from unallocated corporate items to segment operating profit, allowing our operating segments to realize the economic effects of the derivative without experiencing any resulting mark-to-market volatility, which remains in unallocated corporate items.

**Table of Contents**

Unallocated corporate items for the quarterly and nine-month periods ended February 27, 2011, and February 28, 2010, included:

Net mark-to-market valuation of certain commodity positions recognized in unallocated corporate items	\$ 33.4	\$ (5.0)	\$ 133.3	\$ 47.6

As of February 27, 2011, the net notional value of commodity derivatives was \$229.3 million, of which \$106.6 million related to agricultural inputs and \$122.7 million related to energy inputs. These contracts relate to inputs that generally will be utilized within the next 12 months.

**Interest Rate Risk.** We are exposed to interest rate volatility with regard to future issuances of fixed-rate debt, and existing and future issuances of floating-rate debt. Primary exposures include U.S. Treasury rates, LIBOR, and commercial paper rates in the United States and Europe. We use interest rate swaps and forward-starting interest rate swaps to hedge our exposure to interest rate changes, to reduce the volatility of our financing costs, and to achieve a desired proportion of fixed versus floating-rate debt, based on current and projected market conditions. Generally under these swaps, we agree with a counterparty to exchange the difference between fixed-rate and floating-rate interest amounts based on an agreed upon notional principal amount.

**Floating Interest Rate Exposures** Except as discussed below, floating-to-fixed interest rate swaps are accounted for as cash flow hedges, as are all hedges of forecasted issuances of debt. Effectiveness is assessed based on either the perfectly effective hypothetical derivative method or changes in the present value of interest payments on the underlying debt. Effective gains and losses deferred to AOCI are reclassified into earnings over the life of the associated debt. Ineffective gains and losses are recorded as net interest. The amount of hedge ineffectiveness was zero as of February 27, 2011.

**Fixed Interest Rate Exposures** Fixed-to-floating interest rate swaps are accounted for as fair value hedges with effectiveness assessed based on changes in the fair value of the underlying debt and derivatives, using incremental borrowing rates currently available on loans with similar terms and maturities. Ineffective gains and losses on these derivatives and the underlying hedged items are recorded as net interest. The amount of hedge ineffectiveness was less than \$1 million as of February 27, 2011.

During the fourth quarter of fiscal 2010, in advance of a planned debt financing, we entered into \$500 million of treasury lock derivatives with an average fixed rate of 4.3 percent. All of these treasury locks were cash settled for \$17.1 million during the first quarter of fiscal 2011, coincident with the issuance of our \$500 million 30-year fixed-rate notes. As of February 27, 2011, a \$16.4 million pre-tax loss remained in AOCI, which will be reclassified to earnings over the term of the underlying debt.

During the second quarter of fiscal 2010, we entered into \$700 million of interest rate swaps to convert \$700 million of 5.65 percent fixed-rate notes to floating rates. In May 2010, we repurchased \$179.2 million of our 5.65 percent notes, and as a result, we received \$2.7 million to settle a portion of these swaps that related to the repurchased debt.

**Table of Contents**

In anticipation of our acquisition of The Pillsbury Company (Pillsbury) and other financing needs, we entered into pay-fixed interest rate swap contracts during fiscal 2001 and 2002 totaling \$7.1 billion to lock in our interest payments on the associated debt. The remaining \$1.6 billion of these pay-fixed swap contracts along with \$1.6 billion of offsetting pay-floating swaps were cash settled for \$22.3 million during the third quarter of fiscal 2011. As of February 27, 2011, a \$3.1 million pre-tax loss remained in AOCI, which will be reclassified to earnings over the remaining term of the underlying debt.

In advance of a planned debt financing in fiscal 2007, we entered into \$700.0 million pay-fixed, forward-starting interest rate swaps with an average fixed rate of 5.7 percent. All of these forward-starting interest rate swaps were cash settled for \$22.5 million coincident with our \$1.0 billion 10-year fixed-rate note offering on January 24, 2007. As of February 27, 2011, a \$13.3 million pre-tax loss remained in AOCI, which will be reclassified to earnings over the term of the underlying debt.

The following table summarizes the notional amounts and weighted-average interest rates of our interest rate swaps. Average floating rates are based on rates as of the end of the reporting period.

<b>In Millions</b>	<b>Feb. 27, 2011</b>	<b>May 30, 2010</b>
Pay-floating swaps - notional amount	\$ 546.6	\$ 2,155.6
Average receive rate	2.1%	4.8%
Average pay rate	0.3%	0.3%
Pay-fixed swaps - notional amount	\$	\$ 1,600.0
Average receive rate	%	0.3%
Average pay rate	%	7.3%

The swap contracts mature at various dates from fiscal 2011 to 2013 as follows:

<b>In Millions</b>	<b>Pay Floating</b>
2011	\$ 8.7
2012	3.3
2013	534.6
Total	\$ 546.6

**Foreign Exchange Risk.** Foreign currency fluctuations affect our net investments in foreign subsidiaries and foreign currency cash flows related to foreign-dominated commercial paper, third party purchases, intercompany loans, and product shipments. We are also exposed to the translation of foreign currency earnings to the U.S. dollar. Our principal exposures are to the Australian dollar, British pound sterling, Canadian dollar, Chinese renminbi, euro, Japanese yen, and Mexican peso. We mainly use foreign currency forward contracts to selectively hedge our foreign currency cash flow exposures. We also generally swap our foreign-dominated commercial paper borrowings and nonfunctional currency intercompany loans back to U.S. dollars or the functional currency; the gains or losses on these derivatives offset the foreign currency revaluation gains or losses recorded in earnings on the associated borrowings. We generally do not hedge more than 18 months forward.

The amount of hedge ineffectiveness was less than \$1 million as of February 27, 2011.

We also have many net investments in foreign subsidiaries that are denominated in euros. We hedged a portion of these net investments by issuing euro-denominated commercial paper and foreign exchange forward contracts. As of February 27, 2011, we had deferred net foreign currency transaction losses of \$95.7 million in AOCI associated with hedging activity.

**Table of Contents****Fair Value Measurements and Financial Statement Presentation**

We categorize assets and liabilities into one of three levels based on the assumptions (inputs) used in valuing the asset or liability. Level 1 provides the most reliable measure of fair value, while Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.

Level 3: Unobservable inputs reflecting management's assumptions about the inputs used in pricing the asset or liability.

The fair values of our assets, liabilities, and derivative positions recorded at fair value as of February 27, 2011, were as follows:

- (b) Loss reclassified from AOCI into earnings is reported in interest, net for interest rate swaps and in cost of sales and SG&A expenses for foreign exchange contracts.
- (c) All gain (loss) recognized in earnings is related to the ineffective portion of the hedging relationship. No amounts were reported as a result of being excluded from the assessment of hedge effectiveness.
- (d) Gain (loss) recognized in earnings is reported in SG&A expenses for foreign exchange contracts.
- (e) Gain (loss) recognized in earnings is reported in interest, net for interest rate contracts, in cost of sales for commodity contracts, and in SG&A expenses for equity contracts and foreign exchange contracts.

**Amounts Recorded in Accumulated Other Comprehensive Loss.** Unrealized losses from interest rate cash flow hedges recorded in AOCI as of February 27, 2011, totaled \$19.0 million after tax. These deferred losses are primarily related to interest rate swaps we entered into in contemplation of future borrowings and other financing requirements and are being reclassified into net interest over the lives of the hedged forecasted transactions. Unrealized losses from foreign currency cash flow hedges recorded in AOCI as of February 27, 2011, were \$11.0 million after-tax. The net amount of pre-tax gains and losses in AOCI as of February 27, 2011, that we expect to be reclassified into net earnings within the next 12 months is \$18.9 million of expense.

**Credit-Risk-Related Contingent Features.** Certain of our derivative instruments contain provisions that require us to maintain an investment grade credit rating on our debt from each of the major credit rating agencies. If our debt were to fall below investment grade, the counterparties to the derivative instruments could request full collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on February 27, 2011, was \$4.2 million. We would be required to post this amount of collateral to the counterparties if the contingent features were triggered.

**Counterparty Credit Risk.** We enter into interest rate, foreign exchange, and certain commodity and equity derivatives, primarily with a diversified group of highly rated counterparties. We continually monitor our positions and the credit ratings of the counterparties involved and, by policy, limit the amount of credit exposure to any one party. These transactions may expose us to potential losses due to the risk of nonperformance by these counterparties; however, we have not incurred a material loss. We also enter into commodity futures transactions through various regulated exchanges.

The amount of loss due to the credit risk of the counterparties, should the counterparties fail to perform according to the terms of the contracts, is \$65.3 million against which we do not hold any collateral. Under the terms of master swap agreements, some of our transactions require collateral or other security to support financial instruments subject to threshold levels of exposure and counterparty credit risk. Collateral assets are either cash or U.S. Treasury instruments and are held in a trust account that we may access if the counterparty defaults.

**(8) Debt**

The components of notes payable were as follows:

<b>In Millions</b>	<b>Feb. 27, 2011</b>	<b>May 30, 2010</b>
U.S. commercial paper	\$ 862.0	\$ 973.0
Financial institutions	112.5	77.1
Total	\$ 974.5	\$ 1,050.1

To ensure availability of funds, we maintain bank credit lines sufficient to cover our outstanding short-term borrowings. Commercial paper is a continuing source of short-term financing. We issue commercial paper in the United States and Europe. Our commercial paper borrowings are supported by \$2.9 billion of fee-paid committed credit lines, consisting of a \$1.8 billion facility expiring in October 2012 and a \$1.1 billion facility expiring in

October 2013. As of February 27, 2011, we did not have any outstanding borrowings under these credit lines. We also have \$304.9 million in uncommitted credit lines that support our foreign operations.

**Table of Contents**

In June 2010, we issued \$500.0 million aggregate principal amount of 5.4 percent notes due 2040. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision. In May 2010, we paid \$437.0 million to repurchase in a cash tender offer \$400.0 million of our previously issued debt. We repurchased \$220.8 million of our 6.0 percent notes due 2012 and \$179.2 million of our 5.65 percent notes due 2012. We issued commercial paper to fund the repurchase. Our credit facilities and certain of our long-term debt and noncontrolling interests agreements contain restrictive covenants. As of February 27, 2011, we were in compliance with all of these covenants.

**(10) Stock Plans**

All shares and per share amounts have been adjusted for the two-for-one stock split on May 28, 2010.

We have various stock-based compensation programs under which awards, including stock options, restricted stock, and restricted stock units, may be granted to employees and non-employee directors. These programs and related accounting are described on pages 78 to 81 of our Annual Report on Form 10-K for the fiscal year ended May 30, 2010.

**Table of Contents**

Compensation expense related to stock-based payments recognized in the Consolidated Statements of Earnings was as follows:

In Millions	Quarter Ended		Nine-Month Period Ended	
	Feb. 27, 2011	Feb. 28, 2010	Feb. 27, 2011	Feb. 28, 2010
Compensation expense related to stock-based payments	\$ 38.2	\$ 35.1	\$ 124.8	\$ 132.5

As of February 27, 2011, unrecognized compensation expense related to non-vested stock options and restricted stock units was \$212.2 million. This expense will be recognized over 21 months, on average.

Net cash proceeds from the exercise of stock options less shares used for withholding taxes and the intrinsic value of options exercised were as follows:

In Millions	Nine-Month Period Ended	
	Feb. 27, 2011	Feb. 28, 2010
Net cash proceeds	\$ 256.3	\$ 321.0
Intrinsic value of options exercised	\$ 181.9	\$ 219.1

We estimate the fair value of each option on the grant date using the Black-Scholes option-pricing model, which requires us to make predictive assumptions regarding future stock price volatility, employee exercise behavior, and dividend yield. We estimate our future stock price volatility using the historical volatility over the expected term of the option, excluding time periods of volatility we believe a marketplace participant would exclude in estimating our stock price volatility. We also have considered, but did not use, implied volatility in our estimate because trading activity in options on our stock, especially those with tenors of greater than 6 months, is insufficient to provide a reliable measure of expected volatility. Our method of selecting the other valuation assumptions is explained on page 79 in our Annual Report on Form 10-K for the fiscal year ended May 30, 2010.

The estimated fair values of stock options granted and the assumptions used for the Black-Scholes option-pricing model were as follows:

	Nine-Month Period Ended	
	Feb. 27, 2011	Feb. 28, 2010
Estimated fair values of stock options granted	\$ 4.12	\$ 3.20

**(12) Share Repurchases**

On June 28, 2010, our Board of Directors approved an authorization for the repurchase of up to 100 million shares of our common stock.

During the third quarter of fiscal 2011, we repurchased 5.6 million shares of common stock for an aggregate purchase price of \$199.9 million. During the nine-month period ended February 27, 2011, we repurchased 31.8 million shares of common stock for an aggregate purchase price of \$1,163.5 million.

During the third quarter of fiscal 2010, we repurchased 2.5 million shares of common stock for an aggregate purchase price of \$88.9 million. During the nine-month period ended February 28, 2010, we repurchased 11.1 million shares of common stock for an aggregate purchase price of \$324.3 million.

During the second quarter of fiscal 2011, we reached a settlement with the Internal Revenue Service (IRS) concerning corporate income tax adjustments for fiscal years 2002 to 2008. The adjustments primarily relate to the amount of capital loss, depreciation, and amortization we reported as a result of the sale of noncontrolling interests in our General Mills Cereals, LLC subsidiary. As a result, we recorded a \$108.1 million reduction in our total liabilities for uncertain tax positions in the second quarter of fiscal 2011. We expect to make a payment of approximately \$400 million in fiscal 2011 related to this settlement, of which \$31.2 million has already been paid through the third quarter.

During the second quarter of fiscal 2011, the Superior Court of the State of California issued an adverse decision concerning our state income tax apportionment calculations. As a result, we recorded an \$11.5 million increase in our total liabilities for uncertain tax positions. We believe our positions are supported by substantial technical authority and intend to appeal this opinion. We will not make a payment related to this matter until the final resolution is reached.

We recorded an \$88.9 million net reduction in income tax expense in the second quarter of fiscal 2011 related to the two matters discussed above. This amount differs from the net reduction to total liabilities noted above primarily due to federal tax benefits associated with the deduction of state taxes and changes in accrued interest and deferred tax liabilities.

**(17) Business Segment Information**

We operate in the consumer foods industry. We have three operating segments by type of customer and geographic region as follows: U.S. Retail; International; and Bakeries and Foodservice.

Our U.S. Retail segment reflects business with a wide variety of grocery stores, mass merchandisers, membership stores, natural food chains, and drug, dollar and discount chains operating throughout the United States. Our major product categories in this business segment are ready-to-eat cereals, refrigerated yogurt, ready-to-serve soup, dry dinners, shelf stable and frozen vegetables, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza and pizza snacks, grain, fruit and savory snacks, and a wide variety of organic products including soup, granola bars, and cereal.

In Canada, our major product categories are ready-to-eat cereals, shelf stable and frozen vegetables, dry dinners, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza snacks, and grain and fruit snacks. In markets outside North America, our product categories include super-premium ice cream, grain snacks, shelf stable and frozen vegetables, dough products, and dry dinners. Our International segment also includes products manufactured in the United States for export, mainly to Caribbean and Latin American markets, as well as products

**Table of Contents**

we manufacture for sale to our international joint ventures. Revenues from export activities are reported in the region or country where the end customer is located.

In our Bakeries and Foodservice segment our major product categories are cereals, snacks, yogurt, unbaked and fully baked frozen dough products, baking mixes, and flour. Many products we sell are branded to the consumer and nearly all are branded to our customers. We sell to distributors and operators in many customer channels including foodservice, convenience stores, vending, and supermarket bakeries. Substantially all of this segment's operations are located in the United States.

Operating profit for these segments excludes unallocated corporate expense, restructuring, impairment, and other exit costs, and divestiture gains and losses. Unallocated corporate expense includes variances to planned corporate overhead expenses, variances to planned domestic employee benefits and incentives, annual contributions to the General Mills Foundation, and other items that are not part of our measurement of segment operating performance. These include gains and losses arising from the revaluation of certain grain inventories and gains and losses from mark-to-market valuation of certain commodity positions until passed back to our operating segments. These items affecting operating profit are centrally managed at the corporate level and are excluded from the measure of segment profitability reviewed by executive management. Under our supply chain organization, our manufacturing, warehouse, and distribution activities are substantially integrated across our operations in order to maximize efficiency and productivity. As a result, fixed assets and depreciation and amortization expenses are neither maintained nor available by operating segment.

As discussed in Note 2, at the beginning of fiscal 2011 we revised certain SG&A expense classifications between segment operating profit and corporate items and shifted selling responsibility for a customer from our Bakeries and Foodservice segment to the U.S. Retail segment. All prior period amounts have been restated to conform to the current period presentation.

Our operating segment results were as follows:

(18) New Accounting Pronouncements

In the first quarter of fiscal 2011 we adopted new accounting guidance on the consolidation model for variable interest entities (VIEs). The guidance requires companies to qualitatively assess the determination of the primary beneficiary of a VIE based on whether the company (1) has the power to direct matters that most significantly impact the VIE's economic performance, and (2) has the obligation to absorb losses or the right to receive benefits

**Table of Contents**

of the VIE that could potentially be significant to the VIE. The adoption of the guidance did not have any impact on our results of operations or financial condition.

**(19) Subsequent Event**

Subsequent to the close of the third quarter of fiscal 2011, we entered into exclusive negotiations with PAI Partners and Sodiaal to purchase a 51 percent controlling interest in Yoplait S.A.S., which operates yogurt businesses in several countries including France and the United Kingdom and oversees franchise relationships and agreements worldwide, and a 50 percent interest in Yoplait Marques S.A.S., which holds the worldwide rights to *Yoplait* and related brands. We have made a binding offer to purchase the interests for approximately 810 million. Completion of the transaction is subject to final approval by the sellers, consultation with the respective workers' councils and regulatory approval.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

**INTRODUCTION**

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with the MD&A included in our Annual Report on Form 10-K for the fiscal year ended May 30, 2010, for important background regarding, among other things, our key business drivers. Significant trademarks and service marks used in our business are set forth in *italics* herein. Certain terms used throughout this report are defined in a glossary on pages 35-36 of this report.

**CONSOLIDATED RESULTS OF OPERATIONS****Third Quarter Results**

For the third quarter of fiscal 2011, net sales grew 2 percent to \$3,646 million and total segment operating profit of \$668 million was 10 percent higher than the third quarter of fiscal 2010. Diluted earnings per share (EPS) was up 23 percent and diluted EPS excluding certain items affecting comparability increased 14 percent compared to the third quarter of fiscal 2010. (See pages 34-35 for a discussion of measures not defined by GAAP).

**Net sales** growth of 2 percent for the third quarter of fiscal 2011 was the result of 2 percentage points of contributions from volume growth. Net price realization and mix and foreign currency exchange were flat for the third quarter of fiscal 2011 versus the same period a year ago. We have not yet realized the full impact of pricing actions taken in the third quarter of fiscal 2011 and expect to more fully reflect the effect of those actions in the fourth quarter of fiscal 2011.

**Components of net sales growth**

(a) Measured in tons based on the stated weight of our product shipments.

**Cost of sales** decreased \$14 million from the third quarter of fiscal 2010 to \$2,215 million. In the third quarter of fiscal 2011, we recorded a \$33 million net decrease in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories compared to a net increase of \$5 million in the third quarter of fiscal 2010.

This decrease was partially offset by a \$38 million increase attributable to higher volume and a \$34 million increase from higher input costs and product mix in the third quarter of fiscal 2011. In the third quarter of fiscal 2010, we recorded a charge of \$48 million resulting from a change in the capitalization threshold for certain equipment parts.

**Selling, general, and administrative (SG&A) expenses** of \$790 million were essentially flat in the third quarter of fiscal 2011 versus the same period in fiscal 2010. SG&A expenses as a percent of net sales in the third quarter of fiscal 2011 were down 40 basis points compared with fiscal 2010. Advertising and media expense declined 10 percent, offset by an \$11 million charge to increase an environmental liability related to an active cleanup site in Moonachie, New Jersey in the third quarter of fiscal 2011 and an increase in pension expense. In the third quarter of fiscal 2010, the Venezuelan government devalued the Bolivar exchange rate against the U.S. dollar. The \$14 million foreign exchange loss resulting from the devaluation was substantially offset by a \$13 million recovery against a corporate investment in the third quarter of fiscal 2010.

During the third quarter of fiscal 2011, we recorded a **divestiture gain** of \$14 million related to the sale of our foodservice frozen baked goods product line in Australia.

**Table of Contents**

**Restructuring, impairment, and other exit costs** were less than \$1 million in the third quarter of fiscal 2011, a \$6 million decrease from the same period of fiscal 2010. During the third quarter of fiscal 2010, we decided to exit our breadcrumbs product line at our Federalsburg, Maryland plant in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products were insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6 million primarily related to the impairment of these long-lived assets.

**Interest, net** for the third quarter of fiscal 2011 totaled \$85 million, a \$9 million decrease from the same period of fiscal 2010. Average interest rates decreased 140 basis points, due to a shift to short-term debt from long-term debt versus the same period last year, generating a \$22 million decrease in net interest. Average interest bearing instruments increased \$767 million due to an increase in share repurchases during fiscal 2011 versus fiscal 2010, leading to a \$13 million increase in net interest.

The **effective tax rate** for the third quarter of fiscal 2011 was 31.9 percent compared to 33.8 percent for the third quarter of fiscal 2010. The 1.9 percentage point decrease was primarily due to federal legislation passed during the quarter which extended the credit for research and development expenditures.

**After-tax earnings from joint ventures** decreased \$19 million to \$5 million compared to \$24 million in the same quarter last fiscal year, as higher advertising and media spending, a tax restructuring charge, and increased service cost allocations offset volume gains. In the third quarter of fiscal 2011, net sales for Cereal Partners Worldwide (CPW) increased 3 percent due to 2 percentage points of volume growth and 2 percentage points attributable to price realization and mix, offset by 1 percentage point of unfavorable foreign exchange. Net sales for our Häagen-Dazs joint venture in Japan (HDJ) increased 5 percent driven by 9 percentage points of favorable foreign exchange and a 5 percentage point increase in volume, partially offset by a 9 percentage point decrease from net price realization and mix.

**Average diluted shares outstanding** decreased by 29 million in the third quarter of fiscal 2011 from the same period a year ago due primarily to share repurchases, offset by the issuance of common stock from stock option exercises.

**Net earnings attributable to General Mills** were \$392 million in the third quarter of fiscal 2011, up 18 percent from \$332 million last year. **Diluted EPS** was \$0.59 in the third quarter of fiscal 2011, up 23 percent from \$0.48 last year. These results include the effects from the mark-to-market valuation of certain commodity positions and grain inventories. Diluted EPS excluding this item affecting comparability, a non-GAAP measure used for management reporting and incentive compensation purposes, was \$0.56 in the third quarter of fiscal 2011, up 14 percent compared to \$0.49 in the third quarter of fiscal 2010 (see the **Non-GAAP Measures** section below for our use of this measure and our discussion of the items affecting comparability).

**Nine-month Results**

For the nine-month period ended February 27, 2011, net sales grew 1 percent to \$11,246 million and total segment operating profit of \$2,271 million was 1 percent higher than \$2,248 million in the nine-month period ended February 28, 2010. Diluted EPS of \$2.22 was up 14 percent and diluted EPS excluding certain items affecting comparability of \$1.96 was up 4 percent compared to the nine-month period ended February 28, 2010. (See pages 34-35 for a discussion of measures not defined by GAAP).

**Net sales** grew 1 percent for the nine-month period ended February 27, 2011. Volume contributed 2 percentage points of growth, partially offset by 1 percentage point of decline from net price realization and mix. Foreign currency exchange was flat for the nine-month period ended February 27, 2011, versus the same period a year ago.

**Cost of sales** increased \$79 million from the nine-month period ended February 28, 2010, to \$6,657 million. The increase in cost of sales was primarily driven by a \$140 million increase attributable to higher volume and a \$72 million increase related to higher input costs and product mix. In the nine-month period ended February 27, 2011, we recorded a \$133 million net decrease in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories compared to a net decrease of \$48 million in the nine-month period ended February 28, 2010. In the third quarter of fiscal 2010, we recorded a charge of \$48 million resulting from a change in the capitalization threshold for certain equipment parts.

**SG&A expenses** of \$2,363 million were essentially flat in the nine-month period ended February 27, 2011, versus the same period in fiscal 2010. SG&A expenses as a percent of net sales in the nine-month period ended February 27, 2011 decreased by 30 basis points compared to the same period last year. A 7 percent decline in advertising and media expense was offset by an increase in pension expense. In addition, we recorded an \$11 million charge to increase an environmental liability related to an active cleanup site in Moonachie, New Jersey in the nine-month period ended February 27, 2011. In the third quarter of fiscal 2010, the Venezuelan government devalued the Bolivar exchange rate against the U.S. dollar. The \$14 million foreign exchange loss resulting from the devaluation was substantially offset by a \$13 million recovery against a corporate investment in the third quarter of fiscal 2010.

During the nine-month period ended February 27, 2011, we recorded a **divestiture gain** of \$14 million related to the sale of our foodservice frozen baked goods product line in Australia.

**Restructuring, impairment, and other exit costs** were \$2 million for the nine-month period ended February 27, 2011, and \$30 million for the same period of fiscal 2010. In the nine-month period ended February 27, 2011, we did not undertake any new restructuring actions. During the nine-month period ended February 28, 2010, we decided to exit our breadcrumbs product line at our Federalsburg, Maryland plant in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products were insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6 million primarily related to the impairment of these long-lived assets. We also decided to exit our kids refrigerated yogurt beverage product line at our Murfreesboro, Tennessee plant and our microwave soup product line at our Vineland, New Jersey plant to rationalize capacity for more profitable items. Our decisions to exit these products resulted in a \$24 million non-cash charge against the related long-lived assets. No employees were affected by these actions. In addition, we recorded a net gain of \$1 million related to the closure and sale of our Contagem, Brazil bread and pasta plant.

**Interest, net** for the nine-month period ended February 27, 2011, totaled \$257 million, an \$18 million decrease from the same period of fiscal 2010. Average interest rates decreased 70 basis points generating a \$32 million decrease in net interest due to a shift to short-term debt from long-term debt versus the same period last year. Average interest bearing instruments increased \$298 million due to more share repurchases than the same period last year, leading to a \$14 million increase in net interest.

**Table of Contents**

The **effective tax rate** for the nine-month period ended February 27, 2011, was 28.5 percent compared to 33.5 percent for the nine-month period ended February 28, 2010. The 5.0 percentage point decrease was primarily due to a \$100 million reduction to tax expense recorded in the second quarter of fiscal 2011 related to a settlement with the Internal Revenue Service (IRS) concerning corporate income tax adjustments for fiscal years 2002 to 2008. The adjustments primarily relate to the amount of capital loss, depreciation, and amortization we reported as a result of the sale of noncontrolling interests in our General Mills Cereals, LLC subsidiary.

**After-tax earnings from joint ventures** for the nine-month period ended February 27, 2011, decreased to \$67 million compared to \$86 million in the same period in fiscal 2010 due to higher advertising and media spending, increased service cost allocations and a tax restructuring charge all pertaining to CPW. In the nine-months ended February 27, 2011, net sales for CPW increased 1 percentage point resulting from 2 percentage points of volume growth, partially offset by 1 percentage point of unfavorable foreign exchange. Net sales for HDJ increased 5 percent driven by 9 percentage points of favorable foreign exchange and a 1 percentage point increase in volume, partially offset by a 5 percentage point decrease from net price realization and mix.

**Average diluted shares outstanding** decreased by 16 million shares for the nine-month period ended February 27, 2011, from the same period a year ago, due primarily to the repurchase of 42 million shares since February 28, 2010, partially offset by the issuance of common stock from stock option exercises.

**Net earnings attributable to General Mills** were \$1,478 million in the nine-month period ended February 27, 2011, up 12 percent from \$1,319 million in the same period last year. **Diluted EPS** was \$2.22 in the nine-month period ended February 27, 2011, up 14 percent from \$1.94 last year. These results include the effects from the mark-to-market valuation of certain commodity positions and grain inventories, and the net benefit from decisions affecting uncertain tax matters in fiscal 2011. Diluted EPS excluding these items affecting comparability, a non-GAAP measure used for management reporting and incentive compensation purposes, was \$1.96 for the nine-month period ended February 27, 2011, up 4 percent, compared to \$1.89 in the same period of fiscal 2010 (see the Non-GAAP Measures section below for our use of this measure and our discussion of the items affecting comparability).

**SEGMENT OPERATING RESULTS****U.S. Retail Segment Results**

Net sales for our U.S. Retail operations of \$2,514 million in the third quarter of fiscal 2011 decreased 1 percentage point compared to the third quarter of fiscal 2010, driven by unfavorable net price realization and mix.

Net sales for our U.S. Retail operations for the nine-month period ended February 27, 2011 were \$7,810 million, flat compared to the same period in fiscal 2010. Pound volume contributed 1 percentage point of growth, which was offset by 1 percentage point of unfavorable net price realization and mix.

During the third quarter of fiscal 2011, net sales for Big G cereals declined 6 percent from last year which included *Chocolate Cheerios* and *Wheaties Fuel* introductory volume. Meals division net sales decreased 5 percent driven by unfavorable net price realization, as lower volume for shelf-stable dinner mixes offset growth by *Progresso* soup, *Green Giant* frozen vegetables, and *Wanchai Ferry* and *Macaroni Grill* frozen entrees. Pillsbury net sales declined 2 percent due to sales declines in *Totino's* pizza. Net sales for Yoplait grew 1 percent. Snacks net sales grew 14 percent, driven by *Nature Valley* and *Fiber One* snack bars products. Net sales for Baking Products declined 7 percent due to volume declines in *Betty Crocker* dessert mixes. Small Planet Foods net sales increased 14 percent, led by *Cascadian Farm* cereals and *Lärabar* fruit and nut energy bars.

Segment operating profit decreased 1 percent to \$533 million in the third quarter of fiscal 2011 versus the same period a year ago driven by \$31 million of unfavorable net price realization and mix, partially offset by a 9 percent reduction in advertising and media expense and \$12 million of lower supply chain costs.

Segment operating profit decreased 3 percent to \$1.8 billion in the nine-month period ended February 27, 2011, versus the same period a year ago, primarily driven by unfavorable net price realization and mix of \$101 million and higher supply chain costs of \$46 million, partially offset by an 8 percent reduction in advertising and media expense and \$50 million of volume growth.

International Segment Results

Net sales for our International segment of \$688 million increased 8 percent in the third quarter of fiscal 2011 compared to fiscal 2010. Volume contributed 6 percentage points of growth. Foreign currency exchange and net price realization each contributed 1 percentage point of growth.

Net sales for our International segment were up 4 percent in the nine-month period ended February 27, 2011, to \$2,097 million. Volume contributed 6 percentage points of growth, partially offset by 2 percentage points of unfavorable foreign currency exchange.

For the third quarter of fiscal 2011, net sales in Europe grew 3 percent driven by growth in *Häagen-Dazs* and *Nature Valley* in the United Kingdom and *Old El Paso* in France and Spain, partially offset by unfavorable foreign exchange. Net sales in Canada increased 6 percent due to strong cereal performance and favorable foreign exchange. In the Asia/Pacific region, net sales grew 18 percent driven by growth in *Häagen-Dazs* and *Wanchai Ferry* brands in China and atta flour in India. Latin America net sales were flat versus the same period a year ago, as the growth driven by *Diablitos* in Venezuela and *La Salteña* in Argentina was offset by unfavorable foreign exchange largely related to the 2010 devaluation of the Venezuelan currency.

During the third quarter of fiscal 2010, the Venezuelan government devalued the Bolivar by resetting the official exchange rate. We continue to use the official exchange rate to remeasure the financial statements of our Venezuelan operations, as we intend to remit dividends solely through the government-operated Foreign Exchange Administration Board (CADIVI). The devaluation of the Bolivar also reduced the U.S. dollar equivalent of our Venezuelan operating profit, but this did not have a material impact on our results.

Segment operating profit of \$69 million in the third quarter of fiscal 2011 was more than triple the third quarter of fiscal 2010, primarily driven by volume growth and favorable foreign currency effects. In fiscal 2010, we incurred a \$14 million foreign exchange loss, primarily on the revaluation of non-Bolivar monetary balances in Venezuela. Segment operating profit grew 44 percent to \$220 million in the nine-month period ended February 27, 2011 versus the same period a year ago, driven by volume growth and favorable foreign currency effects. In fiscal 2010, we incurred a \$14 million foreign exchange loss, primarily on the revaluation of non-Bolivar monetary balances in Venezuela.

**Bakeries and Foodservice Segment Results**

Net sales for our Bakeries and Foodservice segment increased 9 percent to \$444 million in the third quarter of fiscal 2011 compared to fiscal 2010. Net price realization and mix contributed 7 percentage points of net sales growth, reflecting higher prices indexed to commodity markets. Volume contributed 2 percentage points of growth, including a 1 percentage point reduction from a divested product line.

Net sales for our Bakeries and Foodservice segment increased 4 percent to \$1,338 million in the nine-month period ended February 27, 2011. Volume contributed 2 percentage points, of growth, including a 2 percentage point reduction from a divested product line. Net price realization and mix contributed 2 percentage points of growth, driven by higher prices indexed to commodity markets.

**Table of Contents****Bakeries and Foodservice Net Sales Percentage Change by Customer Channel**

	<b>Quarter Ended Feb. 27, 2011</b>	<b>Nine-Month Period Ended Feb. 27, 2011</b>
Foodservice Distributors	2%	1%
Convenience Stores	10	12
Bakeries and National Restaurant Accounts	13	4
Total	9%	4%

Segment operating profit increased 34 percent to \$67 million in the third quarter of fiscal 2011 and 6 percent to \$216 million for the nine-month period ended February 27, 2011, versus the same periods a year ago. These increases were driven by higher grain merchandising earnings, volume growth and pricing, partially offset by higher input costs.

**UNALLOCATED CORPORATE ITEMS**

Unallocated corporate expense totaled \$28 million in the third quarter of fiscal 2011 compared to \$41 million in the same period in fiscal 2010. In the third quarter of fiscal 2011, we recorded a \$33 million net decrease in expense related to the mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$5 million net increase in expense in the third quarter of fiscal 2010. This was partially offset by increased pension expense of \$16 million in the third quarter of fiscal 2011 compared to the same period a year ago. We also recorded an \$11 million charge to increase an environmental liability related to an active cleanup site in Moonachie, New Jersey in the third quarter of fiscal 2011.

Unallocated corporate expense totaled \$45 million in the nine-month period ended February 27, 2011, compared to \$84 million in the same period last year. In the nine-month period ended February 27, 2011, we recorded a \$133 million net decrease in expense related to the mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$48 million net decrease in expense in the same period a year ago. This was partially offset by increased pension expense of \$48 million in the nine-month period ended February 27, 2011, compared to the same period a year ago. We also recorded an \$11 million charge to increase an environmental liability related to an active cleanup site in Moonachie, New Jersey in the third quarter of fiscal 2011.

**LIQUIDITY**

During the nine-month period ended February 27, 2011, our operations generated \$1,248 million of cash, primarily driven by net earnings, adjusted for depreciation and amortization, offset by an increase in net current assets and liabilities. This cash generation was \$310 million less than the amount generated in the same period last year, mainly reflecting the impact of changes in current assets and liabilities. Inventories increased in the nine-month periods in both years, but increased more in the nine-month period ended February 27, 2011, primarily reflecting increased input costs. Other current liabilities accounted for a \$411 million decrease in cash generated from operations for the nine-month period ended February 27, 2011, compared to the same nine-month period last year, primarily reflecting changes in the timing of marketing activities and related accruals and changes in accrued income taxes as a result of audit settlements and court decisions.

Cash used by investing activities during the nine-month period ended February 27, 2011, was \$467 million, an \$18 million decrease over the same period in fiscal 2010. The decreased use of cash primarily reflects the \$25 million of proceeds from the divestiture of our foodservice frozen baked goods product line in our International segment in the third quarter of fiscal 2011. In fiscal 2011, we paid \$85 million for the acquisition of the Mountain High yoghurt business. We also invested \$423 million in land, buildings, and equipment in the nine-month period ended February 27, 2011, an increase of \$4 million over the nine-month period last year. In fiscal 2010, we invested \$122 million in affiliates, mainly CPW.

**Table of Contents**

Cash used by financing activities was \$972 million in the nine-month period ended February 27, 2011, a decrease of \$162 million from the same period a year ago. We had net issuances of \$416 million of notes payable and long-term debt in the nine-month period ended February 27, 2011, versus a \$739 million net repayment in fiscal 2010. We used \$839 million more cash to repurchase shares in the nine-month period ended February 27, 2011, than the same period last year. In addition, we paid \$548 million of dividends in the nine-month period ended February 27, 2011, \$69 million more than the prior year.

**CAPITAL RESOURCES**

Our capital structure was as follows:

<b>In Millions</b>	<b>Feb. 27, 2011</b>	<b>May 30, 2010</b>
Notes payable	\$ 974.5	\$ 1,050.1
Current portion of long-term debt	1,031.2	107.3
Long-term debt	4,843.1	5,268.5
 Total debt	 6,848.8	 6,425.9
Noncontrolling interests	246.0	245.1
Stockholders' equity	5,866.2	5,402.9
 Total capital	 \$ 12,961.0	 \$ 12,073.9

To ensure availability of funds, we maintain bank credit lines sufficient to cover our outstanding short-term borrowings. Commercial paper is a continuing source of short-term financing. We issue commercial paper in the United States and Europe. Our commercial paper borrowings are supported by \$2.9 billion of fee-paid committed credit lines, consisting of a \$1.8 billion facility expiring in October 2012 and a \$1.1 billion facility expiring in October 2013. As of February 27, 2011, we did not have any outstanding borrowings under these credit lines. We also have \$304.9 million in uncommitted credit lines that support our foreign operations.

In June 2010, we issued \$500.0 million aggregate principal amount of 5.4 percent notes due 2040. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time for a specified make whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision. In May 2010, we paid \$437.0 million to repurchase in a cash tender offer \$400.0 million of our previously issued debt. We repurchased \$220.8 million of our 6.0 percent notes due 2012 and \$179.2 million of our 5.65 percent notes due 2012. We issued commercial paper to fund the repurchase.

Our credit facilities and certain of our long-term debt and noncontrolling interests agreements contain restrictive covenants. As of February 27, 2011, we were in compliance with all of these covenants.

We have \$1,031.2 million of long-term debt maturing in the next 12 months that is classified as current, primarily \$1,019.5 million of 6 percent notes which mature on February 15, 2012. We expect to make a payment of approximately \$400 million in fiscal 2011 related to our IRS settlement, of which \$31 million has already been paid through the third quarter as described in Note 16 of the Consolidated Financial Statements. We believe that cash flows from operations, together with available short- and long-term debt financing, will be adequate to meet our liquidity and capital needs for at least the next 12 months.

We have an effective shelf registration statement on file with the Securities and Exchange Commission (SEC) covering the sale of debt securities. The shelf registration statement will expire in December 2011.

**Table of Contents**

**OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS**

There were no material changes outside the ordinary course of our business in our contractual obligations or off-balance sheet arrangements during the third quarter of fiscal 2011. During the nine-month period ended February 27, 2011, we provided \$27 million of guarantees on behalf of CPW primarily to support capital expenditures.

**SIGNIFICANT ACCOUNTING ESTIMATES**

Our significant accounting policies are described in Note 2 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 30, 2010. The accounting policies used in preparing our interim fiscal 2011 Consolidated Financial Statements are the same as those described in our Form 10-K, except as discussed in Notes 2, 17 and 18 to our Consolidated Financial Statements included in this Form 10-Q. We tested our goodwill and brand intangibles for impairment on our annual assessment date in the third quarter of fiscal 2011. As of our annual impairment assessment date, there was no impairment of any of our intangibles as their related fair values were substantially in excess of the carrying values.

Our significant accounting estimates are those that have meaningful impact on the reporting of our financial condition and results of operations. These estimates include our accounting for promotional expenditures, intangible assets, stock compensation, income taxes, and defined benefit pension, other postretirement, and postemployment benefits. The assumptions and methodologies used in the determination of those estimates as of February 27, 2011, are the same as those described in our Annual Report on Form 10-K for the fiscal year ended May 30, 2010.

**RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

There have been no accounting pronouncements recently issued that will affect our Consolidated Financial Statements.

**NON-GAAP MEASURES**

We have included in this report measures of financial performance that are not defined by GAAP. Each of the measures is used in reporting to our executive management and as a component of the Board of Directors' measurement of our performance for incentive compensation purposes. Management and the Board of Directors believe that these measures provide useful information to investors, and include these measures in other communications to investors.

For each of these non-GAAP financial measures, we are providing below a reconciliation of the differences between the non-GAAP measure and the most directly comparable GAAP measure, an explanation of why our management or the Board of Directors believes the non-GAAP measure provides useful information to investors, and any additional purposes for which our management or Board of Directors uses the non-GAAP measure. These non-GAAP measures should be viewed in addition to, and not in lieu of, the comparable GAAP measure.

**Total Segment Operating Profit**

Management and the Board of Directors believe that this measure provides useful information to investors because it is the profitability measure we use to evaluate segment performance. A reconciliation of this measure to operating profit, the relevant GAAP measure, is included in Note 17 to the Consolidated Financial Statements in this report.

***Diluted EPS Excluding Certain Items Affecting Comparability***

Management and the Board of Directors believe that this measure provides useful information to investors because it is the profitability measure we use to evaluate earnings performance on a comparable year-over-year basis. The adjustments are either items resulting from infrequently occurring events or items that, in management's judgment, significantly affect the year-over-year assessment of operating results.

**Table of Contents**

The reconciliation of diluted EPS excluding certain items affecting comparability to diluted EPS, the relevant GAAP measure, follows:

	Quarter Ended		Nine-Month Period Ended	
	Feb. 27, 2011	Feb. 28, 2010	Feb. 27, 2011	Feb. 28, 2010
<b>Per Share Data</b>				
Diluted earnings per share, as reported	\$ 0.59	\$ 0.48	\$ 2.22	\$ 1.94
Mark-to-market effects (a)	(0.03)	0.01	(0.13)	(0.05)
Uncertain tax items (b)			(0.13)	
Diluted earnings per share, excluding certain items affecting comparability	\$ 0.56	\$ 0.49	\$ 1.96	\$ 1.89

(a) Net (gain) loss from mark-to-market valuation of certain commodity positions and grain inventories. See Note 7 to the Consolidated Financial Statements in this report.

(b) Reduction to income taxes related to an IRS settlement of an uncertain tax item, partially offset by an increase in income taxes related to an adverse court decision in the State of California. See Note 16 to the Consolidated Financial Statements in this report.

**GLOSSARY**

**AOCI.** Accumulated other comprehensive income (loss).

**Derivatives.** Financial instruments such as futures, swaps, options, and forward contracts that we use to manage our risk arising from changes in commodity prices, interest rates, foreign exchange rates, and stock prices.

**Generally Accepted Accounting Principles (GAAP).** Guidelines, procedures, and practices that we are required to use in recording and reporting accounting information in our financial statements.

**Goodwill.** The difference between the purchase price of acquired companies and the related fair values of net assets acquired.

**Hedge accounting.** Accounting for qualifying hedges that allows changes in a hedging instrument's fair value to offset corresponding changes in the hedged item in the same reporting period. Hedge accounting is permitted for certain hedging instruments and hedged items only if the hedging relationship is highly effective, and only prospectively from the date a hedging relationship is formally documented.

**Interest bearing instruments.** Notes payable, long-term debt, including current portion, cash and cash equivalents, and certain interest bearing investments classified within prepaid expenses and other current assets and other assets.

**LIBOR.** London Interbank Offered Rate.

**Mark-to-market.** The act of determining a value for financial instruments, commodity contracts, and related assets or liabilities based on the current market price for that item.

**Net mark-to-market valuation of certain commodity positions.** Realized and unrealized gains and losses on derivative contracts that will be allocated to segment operating profit when the exposure we are hedging affects earnings.

**Net price realization.** The impact of list and promoted price changes, net of trade and other price promotion costs.

**Noncontrolling interests.** Interests of subsidiaries held by third parties.

**Table of Contents**

**Notional principal amount.** The principal amount on which fixed-rate or floating-rate interest payments are calculated.

**OCI.** Other Comprehensive Income.

**Total debt.** Notes payable and long-term debt, including current portion.

**Translation adjustments.** The impact of the conversion of our foreign affiliates' financial statements to U.S. dollars for the purpose of consolidating our financial statements.

**Variable interest entities (VIEs).** A legal structure that is used for business purposes that either (1) does not have equity investors that have voting rights and share in all the entity's profits and losses or (2) has equity investors that do not provide sufficient financial resources to support the entity's activities.

**Working Capital.** Current assets and current liabilities, all as of the last day of our reporting period.

**CAUTIONARY STATEMENT RELEVANT TO FORWARD-LOOKING INFORMATION FOR THE PURPOSE OF SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

This report contains or incorporates by reference forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are based on our current expectations and assumptions. We also may make written or oral forward-looking statements, including statements contained in our filings with the SEC and in our reports to stockholders.

The words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "plan," "project" expressions identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results and those currently anticipated or projected. We wish to caution you not to place undue reliance on any such forward-looking statements.

In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we are identifying important factors that could affect our financial performance and could cause our actual results in future periods to differ materially from any current opinions or statements.

Our future results could be affected by a variety of factors, such as: competitive dynamics in the consumer foods industry and the markets for our products, including new product introductions, advertising activities, pricing actions, and promotional activities of our competitors; economic conditions, including changes in inflation rates, interest rates, tax rates, or the availability of capital; product development and innovation; consumer acceptance of new products and product improvements; consumer reaction to pricing actions and changes in promotion levels; acquisitions or dispositions of businesses or assets; changes in capital structure; changes in laws and regulations, including labeling and advertising regulations; impairments in the carrying value of goodwill, other intangible assets, or other long-lived assets, or changes in the useful lives of other intangible assets; changes in accounting standards and the impact of significant accounting estimates; product quality and safety issues, including recalls and product liability; changes in consumer demand for our products; effectiveness of advertising, marketing, and promotional programs; changes in consumer behavior, trends, and preferences, including weight loss trends; consumer perception of health-related issues, including obesity; consolidation in the retail environment; changes in purchasing and inventory levels of significant customers; fluctuations in the cost and availability of supply chain resources, including raw materials, packaging, and energy; disruptions or inefficiencies in the supply chain; volatility in the market value of derivatives used to manage price risk for certain commodities; benefit plan expenses due to changes in plan asset values and discount rates used to determine plan liabilities; failure of our information technology systems; resolution of uncertain income tax matters; foreign economic conditions, including currency rate fluctuations; and political unrest in foreign markets and economic uncertainty due to terrorism or war.

You should also consider the risk factors that we identify in Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended May 30, 2010, and in Item 1A of Part II of our Quarterly Report on Form 10-Q for the quarterly period ended August 29, 2010, which could also affect our future results.

**Table of Contents**

We undertake no obligation to publicly revise any forward-looking statements to reflect events or circumstances after the date of those statements or to reflect the occurrence of anticipated or unanticipated events.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

The estimated maximum potential value-at-risk arising from a one-day loss in fair value for our interest rate and commodity market-risk-sensitive instruments outstanding as of February 27, 2011, was \$27 million and \$6 million, respectively. The \$1 million decrease in interest rate value-at-risk during the nine-month period ended February 27, 2011, was due to decreased interest rate market volatility in fiscal 2011. The commodity value-at-risk increased by \$1 million compared to May 30, 2010 due to higher volatility in commodities markets. For additional information, see Item 7A of our Annual Report on Form 10-K for the fiscal year ended May 30, 2010.

**Item 4. Controls and Procedures.**

We, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of February 27, 2011, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is (1) recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and (2) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during our fiscal quarter ended February 27, 2011, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II. OTHER INFORMATION**

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

On May 3, 2010, our Board of Directors approved a two-for-one stock split to be effected in the form of a 100 percent stock dividend to stockholders of record on May 28, 2010. The Company's stockholders received one additional share of common stock for each share of common stock in their possession on that date. The additional shares were distributed on June 8, 2010. This did not change the proportionate interest that a stockholder maintained in the Company. All shares and per share amounts set forth in this report have been adjusted for the two-for-one stock split.

**Table of Contents**

The following table sets forth information with respect to shares of our common stock that we purchased during the fiscal quarter ended February 27, 2011:

<b>Period</b>	<b>Total Number of Shares Purchased (a)</b>	<b>Average Price Paid Per Share</b>	<b>Total Number of Shares Purchased as Part of a Publicly Announced Program (b)</b>	<b>Maximum Number of Shares that may yet be Purchased Under the Program (b)</b>

(a) These shares were purchased in the open market.

(b) On June 28, 2010, our Board of Directors approved and we announced an authorization for the repurchase of up to 100,000,000 shares of our common stock. Purchases can be made in the open market or in privately negotiated transactions, including the use of call options and other derivative instruments, Rule 10b5-1 trading plans, and accelerated repurchase programs. The Board did not specify an expiration date for the authorization.
