RADIOLOGIX, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. GENERAL:

Radiologix, Inc. (together with its subsidiaries, "Radiologix" or the "Company"), a Delaware corporation, is a leading provider of radiology services in the United States through its ownership and operation of technologically advanced, multi-modality outpatient diagnostic imaging centers. The Company's full-service imaging centers typically offer a broad array of diagnostic imaging modalities such as x-ray, magnetic resonance imaging ("MRI"), computed tomography ("CT"), mammography, dual energy x-ray absorptiometry ("DEXA"), ultrasound, nuclear medicine and positron emission tomography ("PET"), as well as general radiography and fluoroscopy. Physicians use the diagnostic images, which result from these procedures, and the radiology reports based on the images to diagnose and manage diseases and injuries of their patients. Ordering physicians rely extensively on this type of diagnostic information in making

Edgar Filing: RADIOLOGIX INC - Form 10-Q

health care treatment decisions.

As of June 30, 2001, the Company owns, operates or maintains an ownership interest in imaging equipment at 122 locations and provides management services to ten contracted radiology practices. The Company's imaging centers are located in 18 states and the District of Columbia, with concentrated geographic coverage in markets located in California, Florida, Illinois, Kansas, Maryland, New York, Pennsylvania, Texas, Virginia and Washington, D.C.

Physician services are provided at all of the Company's imaging centers associated with its ten contracted radiology practices under the terms of service agreements, seven of which expire in November 2037, with the other three expiring in 2038. Under the terms of the service agreements, the Company provides management, administrative, technical and non-medical services to contracted radiology practices in return for service fees. The service agreements cannot be terminated by either party without cause, consisting primarily of bankruptcy or material default. However, under certain conditions, the Company can terminate the service agreement if the number of physicians in a practice falls below a certain percentage.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States and include the accounts of the Company and its wholly-owned and majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Recent Accounting Pronouncements

Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets," ("SFAS No. 142") becomes effective for the Company on January 1, 2002. SFAS No. 142 requires that goodwill and other intangible assets with an indefinite useful life no longer be amortized as expenses of operations, but rather carried on the balance sheet as permanent assets. These intangible assets are to be subject to at least annual assessments for impairment by applying a fair-value-based test. Amortization of goodwill and other indefinite-lived intangible assets amounted to \$624,900 (\$374,900 on an after-tax basis) for the first six months of 2001 and is projected to amount to \$1,249,800 (\$749,900 on an after-tax basis) for the full year of 2001. These expense amounts, under SFAS 142, will not be recorded in years after 2001. The Company is developing plans to determine fair values of its operations in which goodwill and other indefinite-lived intangibles have been recorded and will assess whether an impairment charge is warranted as of January 1, 2002 or at any other assessment dates. The Company's service agreements, included in the consolidated balance sheets as intangible assets, net, are not considered to have an indefinite useful life and will continue to be amortized over a useful life of 25 years.

Service Fee Revenues

Service fee revenues represent contracted radiology practices revenue less amounts retained by contracted radiology practices. The amounts retained by contracted radiology practices represent amounts paid to the contracted radiology practices pursuant to the service agreements between the Company and the contracted radiology practices. Under the service agreements, the Company provides each physician group with the facilities and equipment used in its medical practice, assumes responsibility for the

Edgar Filing: RADIOLOGIX INC - Form 10-Q

7

management of the operations of the practice, and employs substantially all of the non-physician personnel utilized by the group. The Company assists in negotiating managed care contracts for the contracted radiology practices.

The following table sets forth the amounts of revenue for the contracted radiology practices and diagnostic imaging centers that would have been presented in the consolidated statements of income had Radiologix met the provisions of the Financial Accounting Standards Board's Emerging Issues Task Force's abstract, Issue 97-2, "Application of FASB Statement No. 94 and Accounting Principles Board ("APB") Opinion No. 16 to Physician Practice Management Entities and Certain Other Entities with Contractual Arrangements" (in thousands):

	For the Three Months Ended June 30,		For th
	2001	2000	2001
	-----	-----	-----
Revenue for contracted radiology practices and diagnostic imaging centers, net of contractual allowances.....	\$ 97,153	\$ 86,262	\$ 189,4
Less: amounts retained by contracted radiology practices.....	(28,917)	(24,479)	(55,2
	-----	-----	-----
Service fee revenue, as reported.....	\$ 68,236	\$ 61,783	\$ 134,1
	=====	=====	=====

The Company's service fee revenue is dependent upon the operating results of the contracted radiology practices. Where state law allows, service fees due under the service agreements are derived from two distinct revenue streams: (1) a negotiated percentage (typically 20% to 30%) of the adjusted professional revenues as defined in the service agreement; and (2) 100% of the adjusted technical revenues as defined in the service agreements. In states where the law requires a flat fee structure, the Company has negotiated a base service fee, which is equal to the fair market value of the services provided under the service agreement and which is renegotiated each year to equal the fair market value of the services provided under the service agreement. The fixed fee structure results in the Company receiving substantially the same amount of service fee as it would have received under its negotiated percentage fee structure. Adjusted professional revenues and adjusted technical revenues are determined by deducting certain contractually agreed-upon expenses (non-physician salaries and benefits, rent, depreciation, insurance, interest and other physician costs) from the contracted radiology practices' revenue. Service fee revenues of the Company's subsidiary, Questar Imaging, Inc. ("Questar") are primarily derived from technical revenues generated from those imaging centers.

Service fee revenues consists of the following (in thousands):

	For the Three Months Ended June 30,		For th

	=====	=====	=====

3. LONG TERM DEBT

On March 30, 2001, the Company and the existing bank group amended the bank credit facility. Under the terms of the amended credit facility, the \$160,000,000 of borrowings consist of a \$100,000,000 Term Loan and a \$60,000,000 revolving credit facility, including a \$5,000,000 Swing Line Facility. Under the amendment, on June 29, 2001, the Company made a \$4,000,000 scheduled principal installment. Scheduled principal installments for the fiscal year ended 2001 have been reduced from \$47,100,000 under the prior amended agreement to \$12,000,000 under the new amendment. Scheduled principal installments through June 30, 2002 consist of four quarterly installments as follows: 1) \$4,000,000 on September 30, 2001, 2) \$4,000,000 on December 31, 2001, 3) \$6,000,000 on March 31, 2002 and 4) \$9,000,000 on June 30, 2002. Each of the facilities will terminate on November 26, 2003. The interest rate is (i) an adjusted LIBOR rate, plus an applicable margin which can vary from 3.00% to 4.00% dependent on certain financial ratios or (ii) the prime rate, plus an applicable margin which can vary from 2.00% to 3.00%. In each case, the applicable margin varies based on financial ratios maintained by the Company. The credit facility includes certain restrictive covenants including prohibitions on the payment of dividends, limitations on capital expenditures

5

8

and the maintenance of certain financial ratios (including maximum fixed charge coverage ratio and maximum leverage ratio, as defined). At June 30, 2001, the Company was in compliance with the covenants under the credit facility's restrictive covenants. Borrowings under the credit facility are secured by all service agreements, which the Company is, or becomes a party to, a pledge of the stock of the Company's subsidiaries, and all of the Company's and its wholly-owned subsidiaries' assets.

The Company has a \$20,000,000 convertible junior subordinated note, which matures July 31, 2009, and bears interest, payable quarterly in cash or payment in kind securities, at an annual rate of 8.0%. At August 1, 2001, the convertible junior subordinated note was convertible into Radiologix's common stock at the price of \$7.52 per share. If by August 1, 2002 or August 1, 2003 the closing price of Radiologix's common stock has not averaged \$8.625 for 45 of the 60 days of the determination period, the interest rate will be increased to 8.25% and 8.5%, respectively.

4. EARNINGS PER SHARE:

Basic EPS is calculated by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period (including shares to be issued). Options, warrants, and other potentially dilutive securities are excluded from the calculation of basic EPS. Diluted EPS includes the options, warrants, and other potentially dilutive securities that are excluded from basic EPS using the treasury stock method to the extent that these securities are not anti-dilutive. Diluted EPS also includes the effect of the convertible notes using the "if converted" method to the extent the securities are not anti-dilutive.

Edgar Filing: RADIOLOGIX INC - Form 10-Q

For the three months ended June 30, 2001 and 2000, under the "if converted" method, approximately \$277,000 and \$256,000, respectively, of tax effected interest savings and 2,318,841 weighted average shares were included in the calculation of diluted EPS as an addition to net income and weighted average shares outstanding, respectively. For the three months ended June 30, 2001 and 2000, 221,099 and 246,618 shares, respectively, related to stock options were included in the calculation of diluted EPS.

For the six months ended June 30, 2001 and 2000, under the "if converted" method, approximately \$546,000 and \$507,000, respectively, of tax effected interest savings and 2,318,841 weighted average shares were included in the calculation of diluted EPS as an addition to net income and weighted average shares outstanding, respectively. For the six months ended June 30, 2001 and 2000, 268,412 and 274,447 shares, respectively, related to stock options were included in the calculation of diluted EPS.

5. SEGMENT REPORTING:

The Company has five reportable segments: Mid-Atlantic Region, Northeastern Region, Central Region, Western Region and Questar. The Company's reportable segments are strategic business units defined by management's division of responsibilities. Each segment owns and operates imaging centers and (except for Questar) provides management services to the imaging centers within their respective segments.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies except that the Company does not allocate taxes associated with income to any of the regions. They are managed separately because each segment operates under different contractual arrangements, providing service to a diverse mix of patients and payors.

6

9

11

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the results of operations and financial condition of the Company should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Annual Report on Form 10-K (as amended pursuant to Form 10-KA) for the year ended December 31, 2000, and with the consolidated financial statements included in this Form 10-Q.

OVERVIEW

The Company is a leading provider of radiology services in the United States through its (i) ownership and operation of technologically advanced, multi-modality diagnostic imaging centers and (ii) provision of administrative, management and information services to certain radiology business partners. The Company derives the majority of its service fee revenues from providing the technical component of radiology services performed at the Company's freestanding imaging facilities and pursuant to the Company's out-sourced hospital relationships. In addition, the Company also derives service fee revenues from providing management services to contracted radiology practices pursuant to long-term service agreements.

As of June 30, 2001, Radiologix's 122 owned or operated imaging centers are located in 18 states and the District of Columbia, with concentrated geographic coverage in markets located in California, Florida, Illinois, Kansas, Maryland, New York, Pennsylvania, Texas, Virginia and Washington D.C.

RESULTS OF OPERATIONS

The Company focuses on the results of operations through the division of its contracted radiology practices into four designated regions of the United States: Mid - Atlantic, Northeastern, Central, and Western regions. In addition, the Company focuses on the operations of the imaging centers of its subsidiary, Questar Imaging, Inc. ("Questar"). The Company's operations in the each of the

Edgar Filing: RADIOLOGIX INC - Form 10-Q

four designated regions, as well as Questar, provide administrative, management and information services through its ownership and operation of technologically advanced, multi-modality diagnostic imaging centers. The Company has divided the operations into the four regions and Questar only for purposes of the division of internal management responsibilities, but does not focus on each of these regions as a separate product line or make financial decisions as if they are separate product lines. The Questar operations are looked at as a separate group only from the perspective that the imaging centers of Questar do not have the same type of management service agreement with physicians as the Company has with each of the contracted radiology practices. In addition, any imaging centers, which are in the same market as the operations of the contracted radiology practices are not included in the service agreements of such contracted radiology practices.

The operating margin for the Mid-Atlantic was 30.5% and 34% for the six months ended June 30, 2001 and 2000, respectively. This decrease in the operating margin was primarily a result of the Company acquiring more of its new radiology equipment through leases during the third and fourth quarters of 2000 as an alternative to purchasing such equipment. The operating margin of the Northeastern region was 26.2% and 29% for the six months ended June 30, 2001 and 2000, respectively, and declined between periods as a result of a decrease in the fixed fee recognized at one of the New York practices. The operating margin of the Central region was 34.7% and 37% for the six months ended June 30, 2001 and 2000, respectively. This decrease in the operating margin between periods was partially due to the higher cost of certain radiology supplies related to specialty procedures, which increased in volume during 2001. The operating margin for the Western region was 22.3% and 28% for the six months ended June 30, 2001 and 2000, respectively. This decrease in the operating margin between periods was primarily a result of continued managed care pressures and the impact of economic changes related to increased salary costs. The operating margin for Questar was 16.9% and 23% for the six months ended June 30, 2001 and 2000, respectively. This decrease was a result of additional costs, such as maintenance agreements, associated with operating the facilities.

9

12

THREE MONTHS ENDED JUNE 30, 2001 COMPARED TO THREE MONTHS ENDED JUNE 30, 2000

Service Fee Revenues

Service fee revenues increased \$6,453,000 or 10.4% for the three months ended June 30, 2001 to \$68,236,000 from \$61,783,000 for the three months ended June 30, 2000. The increase is primarily attributable to an increase in volume. In addition, the increase in service fee revenues is attributable to the additional imaging centers of Questar, which were acquired or developed during the latter part of, or subsequent to, the first or second quarter of 2000.

Field Salaries and Benefits

Salaries and benefits increased \$2,668,000 or 16.7% for the three months ended June 30, 2001 to \$18,679,000 from \$16,011,000 for the three months ended June 30, 2000. As a percentage of service fee revenues, these costs were 27.4% and 25.9% in 2001 and 2000, respectively. The increase is partially due to the additional imaging centers of Questar, which were acquired or developed during the latter part of, or subsequent to, the first quarter or second quarter of 2000. In addition, increased benefit costs, as well as some effect of increased wage costs experienced in certain markets, contributed to the higher salaries and benefits.

Field Supplies

Edgar Filing: RADIOLOGIX INC - Form 10-Q

Supplies increased \$647,000 or 18.9% for the three months ended June 30, 2001 to \$4,065,000 from \$3,418,000 for the three months ended June 30, 2000. As a percentage of service fee revenues, these costs were 6.0% and 5.5% in 2001 and 2000, respectively. The increase in supplies as a percentage of service fee revenues is partially attributable to an increase in volume of specialty procedures, which have a higher cost of supplies.

Field Rent and Lease Expense

Rent and lease expense increased \$942,000 or 12.4% for the three months ended June 30, 2001 to \$8,538,000 from \$7,596,000 for the three months ended June 30, 2000. As a percentage of service fee revenues, these costs were 12.5% and 12.3% in 2001 and 2000, respectively. The increase is primarily the result of additional equipment operating leases entered into during the third and fourth quarters of 2000, as well as the additional expense incurred from the Questar imaging centers as noted above.

Other Field Expenses

Other field expenses, which include repairs and maintenance, equipment service contracts, utilities and communication costs, increased \$1,172,000 or 11.4% in the three months ended June 30, 2001 to \$11,493,000 from \$10,321,000 for the three months ended June 30, 2000. As a percentage of service fee revenues, these costs were 16.8% and 16.7% in 2001 and 2000, respectively. The increase is a result of costs associated with the increased service fee revenues from existing facilities as well as the additional expense incurred from the Questar imaging centers as noted above.

Bad Debt Expense

Bad debt expense increased \$1,073,000 or 20.4% for the three months ended June 30, 2001 to \$6,326,000 from \$5,253,000 for the three months ended June 30, 2000. This increase is primarily attributable to the increase in revenue from contracted radiology practices and diagnostic imaging centers. As a percentage of such revenues, bad debt expense was 6.5% and 6.1% in 2001 and 2002, respectively. As a percentage of service fee revenues, these costs were 9.3% and 8.5% in 2001 and 2000, respectively.

Corporate General and Administrative

Corporate general and administrative expenses increased \$596,000 or 20.2% for the three months ended June 30, 2001 to \$3,540,000 from \$2,944,000 for the three months ended June 30, 2000. As a percentage of service fee revenues, these costs were 5.2% and 4.8% in 2001 and 2000, respectively.

10

13

Depreciation and Amortization

Depreciation and amortization increased \$319,000 or 5.8% for the three months ended June 30, 2001 to \$5,863,000 from \$5,544,000 for the three months ended June 30, 2000. The increase is primarily due to higher amortization costs.

Interest Expense, net

Interest expense, net decreased \$173,000 or 4.0% for the three months ended June 30, 2001 to \$4,102,000 from \$4,275,000 for the three months ended June 30, 2000. The slight decrease is a result of the declining level of debt outstanding and the lower interest rates.

Income Taxes

Edgar Filing: RADIOLOGIX INC - Form 10-Q

The Company's effective tax rate for the three months ended June 30, 2001 and 2000 was 40%.

Net Income

As a result of the foregoing factors, the Company generated net income of \$3,952,000 for the three months ended June 30, 2001, or diluted income per share of \$0.19 on 22,047,000 shares outstanding, compared to net income of \$4,385,000 for the three months ended June 30, 2000, or diluted income per share of \$0.21 on 22,067,000 shares outstanding.

SIX MONTHS ENDED JUNE 30, 2001 COMPARED TO SIX MONTHS ENDED JUNE 30, 2000

Service Fee Revenues

Service fee revenues increased \$13,117,000 or 10.8% for the six months ended June 30, 2001 to \$134,147,000 from \$121,030,000 for the six months ended June 30, 2000. The increase is primarily attributable to an increase in volume. In addition, the increase in service fee revenues is attributable to the additional imaging centers of Questar, which were acquired or developed during the latter part of, or subsequent to, the first quarter or second quarter of 2000.

Field Salaries and Benefits

Salaries and benefits increased \$5,679,000 or 18.1% for the six months ended June 30, 2001 to \$37,108,000 from \$31,429,000 for the six months ended June 30, 2000. As a percentage of service fee revenues, these costs were 27.7% and 26.0% in 2001 and 2000, respectively. The increase is partially due to the additional imaging centers of Questar, which were acquired or developed during the latter part of, or subsequent to, the first quarter or second quarter of 2000. In addition, increased benefit costs, as well as some effect of increased wage costs experienced in certain markets, contributed to the higher salaries and benefits.

Field Supplies

Supplies increased \$1,329,000 or 20.2% for the six months ended June 30, 2001 to \$7,907,000 from \$6,578,000 for the six months ended June 30, 2000. As a percentage of service fee revenues, these costs were 5.9% and 5.4% in 2001 and 2000, respectively. The increase in supplies is partially attributable to an increase in volume of specialty procedures, which have a higher cost of supplies.

Field Rent and Lease Expense

Rent and lease expense increased \$2,099,000 or 14.3% for the six months ended June 30, 2001 to \$16,766,000 from \$14,667,000 for the six months ended June 30, 2000. As a percentage of service fee revenues, these costs were 12.5% and 12.1% in 2001 and 2000, respectively. The increase is primarily the result of the additional equipment operating leases entered into during the third and fourth quarters of 2000, as well as the additional expense incurred from the Questar imaging centers as noted above.

11

14

Other Field Expenses

Other field expenses, which include repairs and maintenance, equipment service contracts, utilities and communication costs, increased \$2,766,000 or 13.7% in the six months ended June 30, 2001 to \$22,924,000 from \$20,158,000 for

Edgar Filing: RADIOLOGIX INC - Form 10-Q

the six months ended June 30, 2000. As a percentage of service fee revenues, these costs were 17.1% and 16.7% in 2001 and 2000, respectively. The increase is a result of costs associated with the increased service fee revenues from existing imaging centers as well as the additional expense incurred from the Questar imaging centers as noted above.

Bad Debt Expense

Bad debt expense increased \$2,095,000 or 19.7% for the six months ended June 30, 2001 to \$12,732,000 from \$10,637,000 for the six months ended June 30, 2000. This increase is primarily attributable to the increase in revenue from contracted radiology practices and diagnostic imaging centers. As a percentage of such revenues bad debt expense was 6.7% and 6.3% in 2001 and 2002, respectively. As a percentage of service fee revenues, these costs were 9.5% and 8.8% in 2001 and 2000, respectively.

Corporate General and Administrative

Corporate general and administrative expenses increased \$960,000 or 17.3% for the six months ended June 30, 2001 to \$6,510,000 from \$5,550,000 for the six months ended June 30, 2000. As a percentage of service fee revenues, these costs were relatively constant at 4.9% and 4.6% in 2001 and 2000, respectively.

Depreciation and Amortization

Depreciation and amortization increased \$558,000 or 5.1% for the six months ended June 30, 2001 to \$11,466,000 from \$10,908,000 for the six months ended June 30, 2000. The increase is primarily due to higher amortization costs.

Interest Expense, net

Interest expense, net decreased \$16,000 for the six months ended June 30, 2001 to \$8,502,000 from \$8,518,000 for the six months ended June 30, 2000. The slight decrease is a result of the declining level of debt outstanding and the lower interest rates.

Income Taxes

The Company's effective tax rate for the six months ended June 30, 2001 and 2000 was 40%.

Net Income

As a result of the foregoing factors, the Company generated net income of \$7,450,000 for the six months ended June 30, 2001, or diluted income per share of \$0.36 on 22,095,000 shares outstanding, compared to net income of \$8,456,000 for the six months ended June 30, 2000, or diluted income per share of \$0.41 on 22,076,000 shares outstanding.

LIQUIDITY AND CAPITAL RESOURCES

Net cash provided by operations for the six months ended June 30, 2001 and 2000 was \$21,995,000 and \$9,436,000, respectively. The increase in the cash provided by operations for the six months ended June 30, 2001 compared to the six months ended June 30, 2000 was primarily due to a significant change in operating assets and liabilities, including improved cash collections.

Net cash used in investing activities was \$2,520,000 for the six months ended June 30, 2001. Net cash used in investing activities for the six months ended June 30, 2000 was \$15,956,000. Purchases of property and equipment during the six months ended June 30, 2001 and 2000 were \$3,584,000 and \$7,678,000,

Edgar Filing: RADIOLOGIX INC - Form 10-Q

respectively. During the six months ended June 30, 2000, the Company invested \$8,910,000 for acquisitions.

Net cash flows used in financing activities were \$22,632,000 for the six months ended June 30, 2001. Payments of \$16,453,117 were made on the credit facility during the six months ended June 30, 2001. At June 30, 2001, the Company had

12

15

outstanding borrowings of \$140,546,833 under the credit facility and an additional \$35,593,000 outstanding under other credit arrangements. Financing costs of \$2,936,000 were incurred during the six months ended June 30, 2001 associated with the new amendment to the bank credit facility. Net cash flows from financing activities for the six months ended June 30, 2000 were \$7,551,000. Borrowings under the credit facility for the six months ended June 30, 2000 were used for the development of centers within Questar, purchases of equipment and capital improvements, as well as, working capital needs.

On March 30, 2001, the Company and the existing bank group amended the bank credit facility. Under the terms of the amended credit facility, the \$160,000,000 of borrowings consist of a \$100,000,000 Term Loan and a \$60,000,000 revolving credit facility, including a \$5,000,000 Swing Line Facility. Under the new amendment, on June 29, 2001, the Company made a \$4,000,000 scheduled principal installment payment. Scheduled principal installments for the fiscal year ended 2001 have been reduced from \$47,100,000 under the prior amended agreement to \$12,000,000 under the new amendment. Scheduled principal installments through June 30, 2002 consist of four quarterly installments as follows: 1) \$4,000,000 on September 30, 2001, 2) \$4,000,000 on December 31, 2001, 3) \$6,000,000 on March 31, 2002 and 4) \$9,000,000 on June 30, 2002. Each of the facilities will terminate on November 26, 2003. The interest rate is (i) an adjusted LIBOR rate, plus an applicable margin which can vary from 3.00% to 4.00% dependent on certain financial ratios or (ii) the prime rate, plus an applicable margin which can vary from 2.00% to 3.00%. In each case, the applicable margin varies based on financial ratios maintained by the Company. The credit facility includes certain restrictive covenants including prohibitions on the payment of dividends, limitations on capital expenditures and the maintenance of certain financial ratios (including maximum fixed charge coverage ratio and maximum leverage ratio, as defined). At June 30, 2001, the Company was in compliance with the covenants under the credit facility's restrictive covenants. Borrowings under the credit facility are secured by all service agreements, which the Company is, or becomes a party to, a pledge of the stock of the Company's subsidiaries, and all of the Company's and its wholly-owned subsidiaries' assets.

The Company has a \$20,000,000 convertible junior subordinated note, which matures July 31, 2009, and bears interest, payable quarterly in cash or payment in kind securities, at an annual rate of 8.0%. At August 1, 2001 the convertible junior subordinated note was convertible into Radiologix's common stock at the price of \$7.52 per share. If by August 1, 2002 or August 1, 2003 the closing price of Radiologix's common stock has not averaged \$8.625 for 45 of the 60 days of the determination period, the interest rate will be increased to 8.25% and 8.5%, respectively.

The Company's ability to accomplish its goals and to execute its business strategy depends on the Company's continued ability to access capital on appropriate terms. The Company's growth could be limited and its existing operations impaired unless it is able to obtain additional capital through subsequent debt or equity financings. There can be no assurance that borrowing capacity under the credit facility will be available to the Company when needed or that the Company will be able to obtain additional financing or that, if

Edgar Filing: RADIOLOGIX INC - Form 10-Q

available, such financing will be on terms acceptable to the Company. As a result, there can be no assurance that the Company will be able to implement its business strategy successfully. However, management believes that cash flow from operations and other available sources of liquidity will be sufficient to fund the Company's operations in the foreseeable future over the next 12 to 18 months.

13

16

Forward-Looking Statements

This report contains or may contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 including statements of the Company's and management's expectations, intentions, plans and beliefs, including those contained in or implied by "Management's Discussion and Analysis of Financial Condition and Results of Operations." These forward-looking statements, as defined in Section 21E of the Securities Exchange Act of 1934, are dependent on certain events, risks and uncertainties that may be outside of the Company's control. These forward-looking statements may include statements of management's plans and objectives for the Company's future operations and statements of future economic performance; the Company's capital budget and future capital requirements, and the Company's meeting its future capital needs; and the assumptions described in this report underlying such forward-looking statements. Actual results and developments could differ materially from those expressed in or implied by such statements due to a number of factors, including, without limitation, those described in the context of such forward-looking statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's cash equivalents, Credit Facility, and its convertible notes.

14

17

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Radiologix is not currently subject to any material litigation nor, to Radiologix's knowledge, is any material litigation threatened against Radiologix other than routine litigation arising in the ordinary course of business, which litigation is expected to be covered by liability insurance or which is not expected to have a material adverse effect on Radiologix's business, financial condition or results of operations. There can be no assurance that Radiologix will not subsequently be named as a defendant in additional lawsuits.

There can be no assurance that Radiologix will not be named as a defendant in lawsuits for matters arising out of events that occurred prior to the acquisition of the related radiology practices. Each practice has retained responsibility for, and/or agreed to indemnify Radiologix in full against, the liabilities associated with these lawsuits. In the event Radiologix is named as a party in any of these lawsuits, or a monetary judgment is entered against Radiologix and indemnification is unavailable for any reason, Radiologix's business, financial condition and results of operations could be materially adversely affected.
