Cautionary Statement Regarding Forward Looking Information

This Form 10-Q includes statements relating to anticipated financial performance, business prospects, new products, and similar matters. These statements and others, which include words such as expect , anticipate , believe , intend , a other similar expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. A variety of factors could cause our actual results and experiences to differ materially from the anticipated results or other expectations expressed in our forward-looking statements. The risks and uncertainties that may affect the operations, performance, development and results of our business include but are not limited to the following:

If we are unable to attract and retain agents and develop new distribution sources, sales of our products and services may be reduced.

Changing interest rates and market volatility, and general economic conditions, affect the risks and the returns on both our products and our investment portfolio.

Our investment portfolio is subject to credit quality risks which may diminish the value of our invested assets and affect our sales, profitability and reported book value per share.

As a holding company, we depend on our subsidiaries for funds to meet our obligations, but our subsidiaries ability to make distributions to us is limited by law, and could be affected by risk based capital computations.

A significant ratings downgrade may have a material adverse effect on our business.

Our earnings are influenced by our claims experience, which is difficult to estimate. If our future claims experience does not match our pricing assumptions or past results, our earnings could be materially adversely affected.

Inaccuracies in assumptions regarding future persistency, mortality and interest rates used in calculating reserve and deferred policy acquisition expense and deferred sales inducement amounts could have a material adverse impact on our net income.

Changes in federal tax laws may affect sales of our products and profitability.

All segments of our business are highly regulated and these regulations or changes in them could affect our profitability.

We face competition from companies having greater financial resources, broader arrays of products, higher ratings and stronger financial performance, which may impair our ability to retain existing customers, attract new customers and maintain our profitability and financial strength.

Our business is highly dependent on our relationships with Farm Bureau organizations and would be adversely affected if those relationships became impaired.

We assumed a significant amount of closed block business through coinsurance agreements and have only a limited ability to manage this business.

Our reinsurance program involves risks because we remain liable with respect to the liabilities ceded to reinsurers if the reinsurers fail to meet the obligations assumed by them.

We may experience volatility in net income due to accounting standards for derivatives.

We face risks relating to litigation, including the costs of such litigation, management distraction and the potential for damage awards, which may adversely impact our business.

See Part 1A, Risk Factors, of our annual report on Form 10-K for additional information.

FBL FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) March 31, 2006

1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements of FBL Financial Group, Inc. (we or the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Our financial statements include all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of our financial position and results of operations. Operating results for the three-month period ended March 31, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006. We encourage you to refer to our consolidated financial statements and notes for the year ended December 31, 2005 included in our annual report on Form 10-K for a complete description of our material accounting policies. Also included in the Form 10-K is a description of areas of judgments and estimates and other information necessary to understand our financial position and results of operations.

Accounting Change and Stock Based Compensation

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards (Statement) No. 123(R), Share-Based Payment, using the modified-prospective-transition method. Statement No. 123(R) is a revision of Statement No. 123, Accounting for Stock-Based Compensation. Using the modified-prospective-transition method, we have recognized compensation expense in the first quarter of 2006 for all share-based payments granted, modified or settled after the date of adoption, as well as for any awards that were granted prior to the adoption date for which the requisite service had not been provided as of the adoption date. The stock option expense is recognized over the shorter of our five-year vesting schedule or the period ending when the employee becomes eligible for retirement using the straight-line method. In addition, the impact of forfeitures is estimated and compensation expense is recognized only for those options expected to vest. Also, under Statement No. 123(R) we have reported stock option-related tax deductions in excess of recognized compensation expense as a financing cash flow. As a result of adopting Statement No. 123(R), net income for the full year 2006 is expected to be \$0.2 million lower (less than \$0.01 per basic and diluted common share) for 2006, than if we had continued to account for share-based compensation under Statement No. 123. This includes a cumulative effect adjustment of \$0.1 million (less than \$0.01 per basic and diluted common share) relating to the change in accounting for forfeitures which is recorded as a reduction to compensation expense in our 2006 consolidated income statement. For the first quarter of 2006, the impact of adopting Statement No. 123(R), including the cumulative effect adjustment, was to decrease net income by \$0.1 million. Also, for the first quarter of 2006, \$1.0 million of excess tax deductions are classified as financing cash inflows instead of operating cash inflows as they would have been under Statement No. 123. Results for prior periods have not been restated.

Prior to January 1, 2006, we followed the prospective method under Statement No. 123, which we adopted effective January 1, 2003. Under the prospective method, expense was recognized for those options granted, modified or settled after the date of adoption. The expense was generally recognized ratably over our five-year vesting period without regard to when an employee became eligible for retirement and immediate vesting. In addition, the impact of forfeitures was recognized when they occurred.

The following table illustrates the effect on net income and earnings per share if the fair value based method under Statement No. 123 had been applied to all outstanding and unvested awards.

	М	ee months ended arch 31, 2005 (Dollars in thousands, cept per share data)
Net income, as reported: Add: Stock-based employee and director compensation expense included in reported net income, net of related tax effects	\$	17,205 432
Less: Total stock-based employee and director compensation expense determined under fair value based methods for all awards, net of related tax effects		(528)
Net income, pro forma	\$	17,109
Earnings per common share, as reported	\$	0.60
Earnings per common share, pro forma	\$	0.59
Earnings per common share assuming dilution, as reported	\$	0.59
Earnings per common share assuming dilution, pro forma	\$	0.58

We have two share-based payment arrangements under our Class A Common Stock Compensation Plan (the Plan), which are described below. Compensation expense for these arrangements totaled \$0.9 million for the three months ended March 31, 2006 and \$0.5 million for the three months ended March 31, 2005. The income tax benefit recognized in the income statement for these arrangements totaled \$0.1 million for the three months ended March 31, 2005.

Stock Option Awards

We grant incentive stock options for Class A common stock to directors, officers and employees. For officers and employees, the options have a contractual term of 10 years and generally vest over a period up to five years, contingent upon continued employment with us. Options to directors are fully vested upon grant and have a contractual term that varies with the length of time the director remains on the Board, up to ten years. The fair value of each option award is estimated on the date of grant using a Black-Scholes-Merton option valuation model. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. We use the historical realized volatility of our stock for expected volatilities within the valuation model. For the 2006 period, the weighted-average expected term for the majority of our options is presumed to be the mid-point between the vesting date and the end of the contractual term, also known as the shortcut method. We assume the contractual term approximates the expected life for the remaining options. For the 2005 period, we used historical data to estimate option exercises and employee terminations to determine the expected term assumption. We believe the shortcut method provides a reasonable basis for our estimation of expected term due to limited historical share option exercise experience. The change in this assumption did not have a material impact on the expected term of the stock options. Assumptions used in our valuation model for the 2005 periods are as follows:

March 31, 2006

	Three Months 31	
	2006	2005
Weighted average risk-free interest rate	4.32 %	4.01 %
Dividend yield	1.40 %	1.50 %
Weighted average volatility factor of the expected market price	0.24	0.32
Weighted average expected term	5.6 years	6.4 years
10		-

March 31, 2006

A summary of stock option activity as of March 31, 2006, and changes during the period then ended is as follows:

	Number of Shares	A Ez Price	eighted- verage kercise per Share	Weighted- Average Remaining Contractual Term (in Years)	Int	Aggregate rinsic Value
	(Dol	llars in tl	housands, ex	ccept per share o	data)	
Shares under option at January 1, 2006 Granted Exercised Forfeited or expired	2,068,576 447,307 (249,751) (12,424)	\$	21.00 32.57 17.13 27.40			
Shares under option at March 31, 2006	2,253,708	\$	23.69	7.35	\$	24,252
Vested at March 31, 2006 or expected to vest in the future	2,221,126	\$	23.62	7.33	\$	24,052
Exercisable options at March 31, 2006	1,160,606	\$	20.58	6.24	\$	16,097

The weighted average grant-date fair value of options granted per common share was \$8.62 for the three months ended March 31, 2006 and \$8.86 for the three months ended March 31, 2005. The intrinsic value of options exercised during the periods totaled \$4.0 million for the three months ended March 31, 2006 and \$1.2 million for the three months ended March 31, 2005.

Unrecognized compensation expense related to nonvested share-based compensation granted under the stock option arrangement totaled \$4.4 million as of March 31, 2006. This expense is expected to be recognized over a weighted-average period of 2.0 years.

We issue new shares to satisfy stock option exercises. We do not have a policy of repurchasing shares on the open market to satisfy share-based payment arrangements. Cash received from stock options exercised totaled \$4.2 million for the period ended March 31, 2006 and \$1.6 million for the period ended March 31, 2005. The actual tax benefit realized from stock options exercised totaled \$1.3 million for the period ended March 31, 2006 and \$0.3 million for the period ended March 31, 2005.

Restricted Stock Compensation Plan

We also grant restricted Class A common shares to certain executives. The restrictions on this stock lapse and the stock vests if the Company meets or exceeds operating goals, such as earnings per share and return on equity targets within or during a three year period. Depending on performance, the actual amount of shares issued could range from zero to 100% of the granted amount. The value of the awards is based on the grant date fair value of the restricted stock adjusted for expected forfeitures and an estimate of the number of shares expected to vest. The estimate for the number of shares to vest is reviewed each period and the impact of any changes in the estimate on expense is recorded in the current period. These awards are charged to expense using the straight-line method over the required service period.

A summary of restricted stock activity as of March 31, 2006, and changes during the period then ended is as follows:

Weighted-

		G Da	verage Frant- te Fair Value
	Number of		
	Shares	pe	er Share
Restricted stock at January 1, 2006	86,256	\$	26.02
Granted	132,786		33.82
Forfeited	(800)		33.00
Restricted stock at March 31, 2006	218,242		30.22
11			

There has been no restricted stock vested and released to employees as of March 31, 2006. Unrecognized compensation expense related to unvested share-based compensation granted under the restricted stock arrangement totaled \$1.5 million as of March 31, 2006. This expense is expected to be recognized over a weighted-average period of 2.3 years.

Pending Accounting Change

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants issued Statement of Position (SOP) 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts. The SOP provides guidance on the accounting for internal replacements of one insurance contract for another insurance contract. Under the SOP, an internal replacement that is determined to result in a replacement contract that is substantially changed from the replaced contract is accounted for as an extinguishment of the replaced contract. As an extinguishment, the unamortized deferred policy acquisition costs, deferred sales inducements, value of insurance in force acquired and unearned revenue reserves from the replaced contract are written off at the time of the extinguishment. An internal replacement that is determined to result in a replacement contract. The SOP is effective for internal replacements occurring in fiscal years beginning after December 15, 2006, with earlier application encouraged. The impact of adoption is not expected to be material as our current accounting policy for internal replacements substantially conforms to the guidance outlined in the SOP. We plan to adopt SOP 05-1 in 2007.

Reclassifications

Certain amounts in the 2005 consolidated statement of cash flows have been reclassified to conform to the 2006 financial statement presentation.

2. Defined Benefit Plans

We participate with several affiliates in various multiemployer defined benefit plans. Our share of net periodic pension cost for the plans recorded in our consolidated income statements totaled \$1.6 million for the three months ended March 31, 2006 and \$1.5 million for the three months ended March 31, 2005. Components of net periodic pension cost for all employers in the multiemployer plans are as follows:

	Three months ended March 31,					
		2006		2005		
	(Dollars in thousands					
Service cost	\$	2,396	\$	2,162		
Interest cost		3,428		3,409		
Expected return on assets		(2,746)		(2,712)		
Amortization of prior service cost		201		396		
Amortization of actuarial loss		1,398		1,046		
Net periodic pension cost all employers	\$	4,677	\$	4,301		

3. Commitments and Contingencies

In the normal course of business, we may be involved in litigation where amounts are alleged that are substantially more than contractual policy benefits or those contained in certain other agreements. At March 31, 2006, management is not aware of any claims for which a material loss is reasonably possible.

We seek to limit our exposure to loss on any single insured or event and to recover a portion of benefits paid by ceding a portion of our exposure to other insurance enterprises or reinsurers. Reinsurance contracts do not relieve us of our obligations to policyholders. To the extent that reinsuring companies are later unable to meet obligations under reinsurance agreements, our insurance subsidiaries would be liable for these obligations, and payment of these

March 31, 2006

obligations could result in losses. To limit the possibility of such losses, we evaluate the financial condition of our reinsurers and monitor concentrations of credit risk. No allowance for uncollectible amounts has been established against our asset for reinsurance recoverable since none of our receivables are deemed to be uncollectible. We participate in a reinsurance pool with various unaffiliated life insurance companies to mitigate the impact of a catastrophic event on our financial position and results of operations. Members of the pool share in the eligible catastrophic losses based on their size and contribution to the pool. Under the pool arrangement, we will be able to cede approximately 60% of catastrophic losses after other reinsurance and a deductible of \$0.8 million. Pool losses and the maximum loss we could incur as a result of losses assumed from other pool members are capped at dollar amounts per event. In 2005, the total pool loss cap was \$7.6 million and our cap was \$2.7 million. As of January 1, 2006, the pool s capacity was increased 50%, and the caps will be recalculated. The 2006 caps will be approximately 50% higher than those in 2005, or approximately \$11.0 million for the total pool loss cap and \$4.0 million for our cap. We self-insure our employee health and dental claims. However, claims in excess of self-insurance levels are fully insured. We fund insurance claims through a self-insurance trust. Deposits to the trust are made at an amount equal to our best estimate of claims incurred during the period. Accordingly, no accruals are recorded on our financial statements for unpaid claims and claims incurred but not reported. Adjustments, if any, resulting in changes in the estimate of claims incurred will be reflected in operations in the periods in which such adjustments are known.

4. Earnings Per Share

The following table sets forth the computation of earnings per common share and earnings per common share assuming dilution.

	(Doll	2006	ls, excej	ded March 31, 2005 , except per share			
Numerator: Net income Dividends on Series B preferred stock	\$	27,734 (38)	\$	17,205 (38)			
Numerator for earnings per common share income available to common stockholders	\$	27,696	\$	17,167			
Denominator: Weighted average shares Deferred common stock units relating to deferred compensation plans	:	29,187,319 41,135		28,732,266 26,934			
Denominator for earnings per common share weighted-average shares Effect of dilutive securities stock based compensation	:	29,228,454 537,020		28,759,200 514,208			
Denominator for diluted earnings per common share adjusted weighted-average shares		29,765,474		29,273,408			
Earnings per common share	\$	0.95	\$	0.60			

Earnings per common share assuming dilution \$ 0.93 \$ 0.59

Based upon the provisions of the underlying agreement and the application of the two class method to our capital structure, we have not allocated undistributed net income to the unvested Class A restricted stock as those instruments possess certain characteristics, such as vesting, that differ from instruments defined as participating securities under current accounting guidance. Also, for the three months ended March 31, 2005, we did not allocate any undistributed net income to the Series C preferred stock since the Series C preferred stockholder s participation in dividends with the common stockholders was limited to the amount of the quarterly regular dividend.

13

5. Segment Information

We analyze operations by reviewing financial information regarding products that are aggregated into four product segments. The product segments are: (1) Traditional Annuity Exclusive Distribution (Exclusive Annuity), (2) Traditional Annuity Independent Distribution (Independent Annuity), (3) Traditional and Universal Life Insurance and (4) Variable. We also have various support operations and corporate capital that are aggregated into a Corporate and Other segment.

We analyze our segment results based on pre-tax operating income (loss). Accordingly, income taxes are not allocated to the segments. In addition, operating results are generally reported net of any transactions between the segments. Operating income (loss) represents net income excluding the impact of realized and unrealized gains and losses on investments and changes in net unrealized gains and losses on derivatives.

We use operating income, in addition to net income, to measure our performance since realized and unrealized gains and losses on investments and the change in net unrealized gains and losses on derivatives can fluctuate greatly from quarter to quarter. These fluctuations make it difficult to analyze core operating trends. In addition, for derivatives not designated as hedges, there is a mismatch between the valuation of the asset and liability when deriving net income. Specifically, call options relating to our index business are one or two-year assets while the embedded derivative in the index contracts represents the rights of the contract holder to receive index credits over the entire period the index annuities are expected to be in force. For our other embedded derivatives in the product segments, the embedded derivatives are marked to market, but the associated insurance liabilities are not marked to market. A view of our operating performance without the impact of these mismatches enhances the analysis of our results. We use operating income for goal setting, determining company-wide bonuses and evaluating performance on a basis comparable to that used by many in the investment community.

Financial information concerning our operating segments is as follows:

	T	hree months 2006	ended	March 31, 2005
Operating revenues:		2000		2003
Traditional Annuity Exclusive Distribution	\$	36,093	\$	35,891
Traditional Annuity Independent Distribution	Ŧ	45,263	т	33,033
Traditional and Universal Life Insurance		80,162		79,470
Variable		14,262		13,795
Corporate and Other		6,876		7,661
		182,656		169,850
Realized/unrealized gains on investments (A)		11,605		411
Change in net unrealized gains/losses on derivatives (A)		21,806		(6,053)
Consolidated revenues	\$	216,067	\$	164,208
Pre-tax operating income (loss):				
Traditional Annuity Exclusive Distribution	\$	8,773	\$	8,774
Traditional Annuity Independent Distribution		5,932		5,141
Traditional and Universal Life Insurance		10,950		12,813
Variable		2,816		535
Corporate and Other		(1,871)		(1,377)
		26,600		25,886

Edgar Filing: FBL	FINANCIAL	GROUP	INC - F	Form 10-Q

Income taxes on operating income Realized/unrealized gains on investments (A) Change in net unrealized gains/losses on derivatives (A)		(9,014) 7,693 2,455	(9,041) 527 (167)
Consolidated net income		\$ 27,734	\$ 17,205
	14		

March 31, 2006

(A) Amounts are net of adjustments, as applicable, to amortization of unearned revenue reserves, deferred policy acquisition costs, deferred sales inducements, value of insurance in force acquired and income taxes attributable to gains and losses on investments and derivatives.

Our investment in equity method investees, the related equity income and interest expense are attributable to the Corporate and Other segment. Goodwill at March 31, 2006 and December 31, 2005 is allocated among the segments as follows: Exclusive Annuity (\$3.9 million), Traditional and Universal Life Insurance (\$6.1 million) and Variable (\$1.2 million).

March 31, 2006

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section includes a summary of FBL Financial Group, Inc. s consolidated results of operations, financial condition and where appropriate, factors that management believes may affect future performance. Unless noted otherwise, all references to FBL Financial Group, Inc. (we or the Company) include all of its direct and indirect subsidiaries, including its primary life insurance subsidiaries, Farm Bureau Life Insurance Company (Farm Bureau Life) and EquiTrust Life Insurance Company (EquiTrust Life) (collectively, the Life Companies). Please read this discussion in conjunction with the accompanying consolidated financial statements and related notes. In addition, we encourage you to refer to our 2005 Form 10-K for a complete description of our significant accounting policies and estimates. Familiarity with this information is important in understanding our financial position and results of operations.

Results of Operations for the Three Months Ended March 31, 2006 Compared to Three Months Ended March 31, 2005

	T	hree months end 2006 (Dollars in the except per sha	ous	2005 usands,	
Revenues	\$	216,067	\$	164,208	
Benefits and expenses		174,077		137,272	
		41,990		26,936	
Income taxes		(14,381)		(9,374)

Net income applicable to common stock	\$	27,696	\$	17,167	
Earnings per common share	\$	0.95	\$	0.60	
Earnings per common share assuming dilution	\$	0.93	\$	0.59	
Other data Direct premiums collected, net of reinsurance ceded: Traditional Annuity Exclusive Distribution Traditional Annuity Independent Distribution Traditional and Universal Life Insurance Variable Annuity and Variable Universal Life (1) Reinsurance assumed and other	\$	41,880 277,203 44,300 41,836 4,489	\$	48,323 185,339 43,435 39,650 5,887	
Total	\$	409,708	\$	322,634	

Direct life insurance in force, end of quarter (in millions)	\$ 36,451	\$ 34,285
Life insurance lapse rates	6.9 %	7.6 %
Withdrawal rates individual traditional annuity:		
Exclusive Distribution	4.5 %	3.2 %
Independent Distribution	4.9 %	5.2 %

(1) Amounts are net of portion ceded to and include amounts assumed from alliance partners.

Premiums collected is not a measure used in financial statements prepared according to U.S. generally accepted accounting principles (GAAP). There is no comparable GAAP financial measure. We use premiums collected to measure the productivity of our exclusive and independent agents. Direct Traditional Annuity Independent Distribution premiums collected increased significantly in the first quarter of 2006 compared to the first quarter of

2005 due to continued growth of our EquiTrust Life independent distribution channel. This is driven largely by an increase in the number of licensed independent agents to 11,825 at March 31, 2006, from 6,060 at March 31, 2005. **Net income applicable to common stock** increased 61.3% in the first quarter of 2006 to \$27.7 million. As discussed in detail below, net income applicable to common stock for the 2006 period was positively impacted by growth in the volume of business in force, the change in unrealized gains/losses on derivatives and realized gains on investments. These increases were partially offset by an increase in death benefits. The first quarter of 2006 also benefited from an increase in equity income.

The spreads earned on our universal life and individual traditional annuity products are as follows:

	Three months e 31,	
	2006	2005
Weighted average yield on cash and invested assets	6.11 %	6.34 %
Weighted average interest crediting rate/index cost	3.54	3.79
Spread	2.57 %	2.55 %

The weighted average yield on cash and invested assets represents the yield on cash and investments backing the universal life and individual traditional annuity products net of investment expenses. With respect to our index annuities, index costs represent the expenses we incur to fund the annual income credits through the purchase of options and minimum guaranteed interest credited on the index business. The weighted average crediting rate/index cost and spread are computed excluding the impact of the amortization of deferred sales inducements. See the Segment Information section that follows for a discussion of our spreads.

Premiums and product charges are as follows:

]	Fhree month	s ende 31,	d March
		2006 (Dollars in	thousa	2005 nds)
Premiums and product charges: Interest sensitive and index product charges Traditional life insurance premiums Accident and health premiums	\$	25,314 34,388 70	\$	23,768 33,333 20
Total	\$	59,772	\$	57,121

Premiums and product charges increased 4.6% in the 2006 period to \$59.8 million. The increase in interest sensitive and index product charges are driven principally by surrender charges on annuity and universal life products, cost of insurance charges on variable universal life and universal life products and mortality and expense fees on variable products.

Surrender charges totaled \$4.3 million in the 2006 period compared to \$3.3 million in the 2005 period. Surrender charges increased due primarily to an increase in surrenders relating to growth in the volume and aging of business in force. The average account value for annuity and universal life insurance in force, which increased due to an increase in premiums collected as summarized in the Other data table above, totaled \$6,133.7 million at March 31, 2006 and \$5,146.0 million at March 31, 2005. We believe aging of the business in force is driving a portion of the increase in surrender charges relating to the annuity business assumed under the coinsurance agreement with American Equity

Investment Life Insurance Company (the coinsurance agreement) and business written directly through the EquiTrust Life independent agents as the surrender charge rate decreases with the passage of time (at a rate generally equal to 1.0% per year). This makes a surrender later in the contract period less onerous on the contract holder. We started assuming business under the coinsurance agreement in 2001 and started selling annuities directly through EquiTrust Life independent agents in the fourth quarter of 2003. In total, surrender charges on this business totaled \$3.6 million for the first quarter of 2006 and \$2.7 million for the first quarter of 2005.

March 31, 2006

Cost of insurance charges totaled \$15.8 million in the 2006 period and \$15.3 million in the 2005 period. Cost of insurance charges increased due primarily to aging of the business in force as the cost of insurance charge rate per each \$1,000 in force increases with the age of the insured. The average age of our universal life and variable universal life policyholders was 44.9 years at March 31, 2006 and 44.4 years at March 31, 2005.

Mortality and expense fees totaled \$1.9 million in the 2006 period and \$1.6 million in the 2005 period. Mortality and expense fees increased due to an increase in the separate account balances on which fees are based. The average separate account balance increased to \$661.3 million at March 31, 2006, from \$553.2 million at March 31, 2005 due to the impact of new sales and favorable investment results. Transfers of premiums to the separate accounts totaled \$33.0 million for the 2006 period and \$28.8 million for the 2005 period. Net investment income and net realized and unrealized gains (losses) on separate account assets totaled \$28.3 million in the first quarter of 2006 compared to (\$7.3) million in the first quarter of 2005.

Traditional premiums increased due to an increase in the volume of business in force. The increase in the business in force is attributable primarily to sales of traditional life products by our Farm Bureau Life agency force exceeding the loss of in force amounts through deaths, lapses and surrenders. Our average traditional life insurance in force, net of reinsurance ceded, totaled \$17,710 million at March 31, 2006 and \$16,684 million at March 31, 2005.

Net investment income, which excludes investment income on separate account assets relating to variable products, increased 7.3% in the 2006 period to \$122.4 million due primarily to an increase in average invested assets, partially offset by a decrease in the annualized yield earned on those assets. Average invested assets in the 2006 period increased 12.4% to \$8,209.6 million (based on securities at amortized cost) from \$7,304.0 million in the 2005 period, due principally to net premium inflows from the Life Companies. The annualized yield earned on average invested assets decreased to 6.10% in the first quarter of 2006 from 6.40% in the respective 2005 period due primarily to market investment rates being lower than our portfolio yield. Market conditions in the first quarter of 2006 and the full year of 2005 impacted our investment portfolio yield as market investment rates were, in general, lower than our portfolio yield or yield on investments maturing or being paid down. The average yields on fixed maturities purchased in the first quarter were 5.68% in 2006 and 5.37% in 2005. The average yields on fixed maturity securities maturing or being paid down in the first quarter were 6.60% in 2006 and 5.54% in 2005. In addition, for the first quarter, net investment income includes (\$0.9) million in 2006 and (\$0.3) million in 2005, representing the reversal of net discount accretion on mortgage and asset-backed securities resulting from changing prepayment speed assumptions as of the end of each respective period. See the Financial Condition Investments section that follows for a description of how changes in prepayment speeds impact net investment income. Fee income from bond calls, tender offers and mortgage loan prepayments totaled \$1.1 million in the 2006 period compared to \$0.8 million in the respective 2005 period. In addition, we recorded \$0.9 million in net investment income during the first quarter of 2005, representing past due interest that had not been accrued, relating to the redemption of a fixed maturity security that had been impaired in a prior period.

Derivative income (loss) is as follows:

	Three months ended March 31,			
		2006		2005
		(Dollars in	thousa	nds)
Derivative income (loss):				
Components of derivative income (loss) from call options:				
Gains received at expiration	\$	9,962	\$	2,875
Change in the difference between fair value and remaining option cost at				
beginning and end of period		21,889		(5,911)
Cost of money for call options		(14,940)		(9,237)
		16,911		(12,273)

Edgar Filing: FBL FINANCIAL GROUP INC - Form 10-Q						
Other		(79)		(127)		
Total	\$	16,832	\$	(12,400)		
The increase in gains received at expiration in the 2006 period is primarily attributable to the impact of growth in the volume of index annuities in force and appreciation in the market indices on which our options are based. The						

average account value of index annuities in force, which has increased due to new sales, totaled \$2,830.7 million for the 2006 period compared to \$1,995.9 million for the 2005 period. The changes in the difference between the fair value of the call options and the remaining option costs for 2006 are caused primarily by the general change in the S&P 500 Index (upon which the majority of our options are based). For the first quarter of 2006, the S&P 500 Index increased on a point-to-point basis by 3.7%, compared to a point-to-point decrease of 2.6% for the 2005 period. While the difference between the fair value of the call options and the remaining option costs generally corresponds to the point-to-point change in the S&P 500 Index, the change in fair value is also impacted by options based on daily or monthly S&P 500 Index averages and options which are based on other underlying indices. Furthermore, the timing of option settlements also impacts the change in fair value. The cost of money for call options increased due primarily to the impact of growth in the volume of index annuities in force. Other derivative income (loss) is comprised of changes in the value of the conversion feature embedded in convertible fixed maturity securities and the embedded derivative included in our modified coinsurance contracts. Derivative income (loss) will fluctuate based on market conditions. **Realized/unrealized gains (losses) on investments** are as follows:

	Three months ended March 31,			
		2006		2005
		(Dollars in thousands)		
Realized/unrealized gains (losses) on investments:				
Gains on sales	\$	13,989	\$	2,275
Losses on sales		(3)		(1,863)
Losses due to impairments		(2,340)		
Unrealized losses on trading securities		(42)		
Total	\$	11,604	\$	412

The level of realized/unrealized gains (losses) is subject to fluctuation from period to period depending on the prevailing interest rate and economic environment and the timing of the sale of investments. See Financial Condition Investments for details regarding our unrealized gains and losses on available-for-sale securities at March 31, 2006 and December 31, 2005. Gains on sales in the 2006 period include \$13.5 million related to the sale of 2,500,000 shares of our investment in American Equity Investment Life Holding Company (AEL) common stock. We monitor the financial condition and operations of the issuers of securities rated below investment grade and of the issuers of certain investment grade securities on which we have concerns regarding credit quality. In determining whether or not an unrealized loss is other than temporary, we review factors such as:

historical operating trends;

business prospects;

status of the industry in which the company operates;

analyst ratings on the issuer and sector;

quality of management;

size of the unrealized loss;

length of time the security has been in an unrealized loss position; and

March 31, 2006

our intent and ability to hold the security.

If we determine that an unrealized loss is other than temporary, the security is written down to its fair value with the difference between amortized cost and fair value recognized as a realized loss. We did not have any investment impairments during the first quarter of 2005. Details regarding our significant investment impairments for the three months ended March 31, 2006, including the circumstances requiring the write downs, are summarized in the following table:

March 31, 2006

General Description	L (Dol	irment oss lars in sands)	Circumstance
Major United States credit company	\$	986	Valuation of this security is tied to the strength of its parent. During the first quarter, continued rating declines and other adverse details regarding the financial status of the parent company became available. (A)
Major United States automaker	\$	648	During the first quarter, continued rating declines and other adverse details regarding the financial status of the company became available. In addition, the company faces labor strikes and restated its financial statements during the quarter. (A)
Major United States automaker	\$	643	During the first quarter, continued rating declines and other adverse details regarding the financial status of the company became available. (A)

(A) Negative trends in this segment of the industry were considered in our analysis, which is done on an issue-by-issue basis. We concluded that there is no impact on other material investments in addition to amounts already written down.

Other income and **other expenses** include revenues and expenses, respectively, relating primarily to our non-insurance operations. These operations include management, advisory, marketing and distribution services and leasing activities. Fluctuations in these financial statement line items are generally attributable to fluctuations in the level of these services provided during the periods.

Interest sensitive and index product benefits are as follows:

	Three months ended March 31,			
		2006		2005
	(Dollars in thousands)			
Interest sensitive and index product benefits:				
Interest credited	\$	48,041	\$	47,463
Index credits		9,869		3,144
Change in value of embedded derivative		11,942		(6,700)
Amortization of deferred sales inducements		6,463		2,356
Interest sensitive death benefits		10,387		9,295
Total	\$	86,702	\$	55,558

Interest sensitive and index product benefits increased 56.1% in the first quarter of 2006 to \$86.7 million due primarily to the impact of an increase in the volume of annuity business in force and market appreciation on the indices backing the index annuities. Interest sensitive and index product benefits tend to fluctuate from period to period primarily as a result of changes in mortality experience and the impact of changes in the equity markets on index credits and the value of the embedded derivatives in our index annuities.

The average account value of annuity contracts in force, which increased due to an increase in premiums collected as summarized in the Other data table above, totaled \$5,243.5 million for the 2006 period and \$4,262.9 million for the 2005 period. These account values include values relating to index contracts in the first quarter totaling \$2,830.7 million for 2006 and \$1,995.9 million for 2005.

The weighted average interest crediting rate/index cost for universal life and individual traditional annuity products, excluding the impact of the amortization of deferred sales inducements, was 3.54% for the 2006 period and 3.79% for the 2005 period.

March 31, 2006

The change in the amount of index credits are impacted by growth in the volume of index annuities in force and the level of appreciation in the underlying equity market indices on which our options are based as discussed above under

Derivative income (loss). The change in the value of the embedded derivative is impacted by the change in expected index credits on the next policy anniversary dates, which is related to the change in the fair value of the options acquired to fund these index credits as discussed above under Derivative income (loss). The value of the embedded derivative is also impacted by the timing of the posting of index credits and changes in reserve discount rates and assumptions used in estimating future call option costs.

The increase in amortization of deferred sales inducements is due to additional capitalization of costs incurred with new sales and profitability in the underlying business. Deferred sales inducements on interest sensitive and index products totaled \$162.4 million at March 31, 2006 and \$93.3 million at March 31, 2005.

Traditional life insurance and accident and health policy benefits are as follows:

	Three months ended Ma 2006 2			March 31 2005	•
	(Dollars in thousands)				
Traditional life insurance and accident and health policy benefits:					
Traditional life insurance and accident and health benefits	\$	22,661	\$	20,771	
Increase in traditional life and accident and health future policy benefits		8,753		8,250	
Distributions to participating policyholders		5,697		6,164	
Total	\$	37,111	\$	35,185	

Traditional life insurance and accident and health policy benefits increased 5.5% in the 2006 period to \$37.1 million, primarily attributable to an increase in traditional life insurance death benefits and the impact of an increase in the volume of traditional life business in force. In the first quarter of 2006, traditional life insurance death benefits increased 15.0% to \$13.9 million. Distributions to participating policyholders decreased due to reductions in our dividend crediting rates in response to the impact of declining market interest rates on our investment portfolio yield as discussed in the Net investment income section above. Traditional life insurance and accident and health policy benefits can fluctuate from period to period primarily as a result of changes in mortality experience. **Underwriting, acquisition and insurance expenses** are as follows:

	Three months ended M 2006 (Dollars in thousan			2005	
Underwriting, acquisition and insurance expenses:				,	
Commission expense, net of deferrals	\$	3,518	\$	3,663	
Amortization of deferred policy acquisition costs		18,769		14,131	
Amortization of value of insurance in force acquired		403		753	
Other underwriting, acquisition and insurance expenses, net of deferrals		19,116		19,921	
Total	\$	41,806	\$	38,468	

Underwriting, acquisition and insurance expenses increased 8.7% in the 2006 period to \$41.8 million. Amortization of deferred policy acquisition costs increased in the first quarter of 2006 due primarily to an increase in the volume and profitability of business in force in our Independent Annuity segment, resulting from new sales. Amortization of deferred policy acquisition costs on this business totaled \$12.5 million for the 2006 period compared to \$7.2 million for the 2005 period. Amortization of value of insurance in force acquired decreased \$0.4 million in the 2006 period

due to the impact of increased death benefits on the underlying business. Other underwriting, acquisition and insurance expenses decreased \$0.8 million from the 2005 period due primarily to efficiencies gained with the closure of a life processing unit during the third quarter of 2005.

March 31, 2006

Interest expense totaled \$3.0 million in the first quarter of 2006 compared to \$3.3 million in the 2005 period due primarily to a \$0.6 million decrease in interest expense as a result of the redemption of our Series C preferred stock in December 2005. This decrease was partially offset by an increase in the effective interest rate on our \$46.0 million line of credit to an average of 5.75% in the 2006 period from 3.72% in the 2005 period.

Income taxes increased 53.4% in the 2006 period to \$14.4 million. The effective tax rate for the first quarter of 2006 was 34.2% in 2006 compared to 34.8% in 2005. The decrease in the effective tax rate for the quarter is primarily due to a decrease in nondeductible dividends as a result of the redemption of our Series C preferred stock in the fourth quarter of 2005.

Equity income (loss), net of related income taxes, totaled \$0.2 million for the first quarter of 2006 compared to (\$0.3) million for the first quarter of 2005. Equity income (loss) includes our proportionate share of gains and losses attributable to our ownership interest in partnerships, joint ventures and certain companies where we exhibit some control but have a minority ownership interest. Given the timing of availability of financial information from our equity investees, we will consistently use information that is as much as three months in arrears for certain of these entities. Several of these entities are investment companies whose operating results are derived primarily from unrealized and realized gains and losses generated by their investment portfolios. As is normal with these types of entities, the level of these gains and losses is subject to fluctuation from period to period depending on the prevailing economic environment, changes in prices of equity securities held by the investment partnerships, timing and success of initial public offerings and other exit strategies, and the timing of the sale of investments held by the partnerships and joint ventures.

Segment Information

We analyze operations by reviewing financial information regarding products that are aggregated into four product segments. The product segments are: (1) Traditional Annuity Exclusive Distribution (Exclusive Annuity), (2) Traditional Annuity Independent Distribution (Independent Annuity), (3) Traditional and Universal Life Insurance and (4) Variable. We also have various support operations and corporate capital that are aggregated into a Corporate and Other segment.

We analyze our segment results based on pre-tax operating income (loss). Accordingly, income taxes are not allocated to the segments. In addition, operating results are generally reported net of any transactions between the segments. Operating income (loss) represents net income excluding the impact of realized and unrealized gains and losses on investments and changes in net unrealized gains and losses on derivatives. The impact of realized and unrealized gains and losses on derivatives includes adjustments for income taxes and that portion of amortization of deferred policy acquisition costs, deferred sales inducements, unearned revenue reserve and value of insurance in force acquired attributable to such gains or losses. Our rationale for using operating income, in addition to net income, to measure our performance is summarized in Note 5, Segment Information , to the consolidated financial statements.

A reconciliation of net income to pre-tax operating income and a summary of pre-tax operating income (loss) by segment follow:

	T	hree months e 2006 (Dollars in t	2005	
Net income	\$	27,734	\$	17,205

March 31, 2006

A discussion of our operating results, by segment, follows: Traditional Annuity Exclusive Distribution Segment

	Three months ended March 3 2006 2005 (Dollars in thousands)			2005
Pre-tax operating income				
Operating revenues:				
Interest sensitive and index product charges	\$	283	\$	184
Net investment income		35,844		35,707
Derivative loss		(34)		
		36,093		35,891
Benefits and expenses		27,320		27,117
Pre-tax operating income	\$	8,773	\$	8,774
Other data				
Annuity premiums collected, direct	\$	41,880	\$	48,323
Policy liabilities and accruals, end of period	2	2,221,069	2	2,159,656
Individual deferred annuity spread:				
Weighted average yield on cash and invested assets		6.30 %		6.53 %
Weighted average interest crediting rate		3.99		4.21
Spread		2.31 %		2.32 %

Individual traditional annuity withdrawal rate 4.5 % Pre-tax operating income for the Exclusive Annuity segment totaled \$8.8 million in the first quarter of 2006 and 2005. The average account value for annuity contracts in force in the Exclusive Annuity segment totaled \$1,478.1 million for the 2006 period compared to \$1,396.3 million for the 2005 period. The impact of the increase in the volume of business in force was offset during the period by a slight increase in underwriting, acquisition and insurance expenses. Premiums collected decreased 13.3% in the first quarter of 2006 to \$41.9 million. The amount of traditional annuity premiums collected is highly dependent upon the relationship between the current crediting rates on our products and the crediting rates available on competing products, including bank-offered certificates of deposit. We believe the decrease in annuity premiums in 2006 is due to a rise in short-term market interest rates during 2006 and 2005,

making certificates of deposit and other short-term investments more attractive in relation to these traditional annuities. We also believe this competitive environment resulted in increased surrenders, therefore increasing the withdrawal rate for the first quarter of 2006.

The decrease in the weighted average yield on cash and invested assets is primarily attributable to market investment rates being lower than our portfolio yield as discussed in the Net investment income section above. We utilize interest rate swaps to hedge a portion of our annuity portfolio. The decrease in the weighted average crediting rate for 2006 is attributable to the change in the gain (loss) on our interest rate swaps. Income (loss) from these swaps, which is netted against interest credited, totaled \$0.7 million in the 2006 period compared to (\$0.1) million in the 2005 period.

3.2 %

Traditional Annuity Independent Distribution Segment

	Three months ended March 31 2006 2005 (Dollars in thousands)			2005
Pre-tax operating income				
Operating revenues:				
Interest sensitive and index product charges	\$	3,562	\$	2,668
Net investment income		46,641		36,712
Derivative loss		(4,940)		(6,347)
		45,263		33,033
Benefits and expenses		39,331		27,892
Pre-tax operating income	\$	5,932	\$	5,141
Other data				
Annuity premiums collected, independent channel	\$	277,203	\$	185,339
Annuity premiums collected, assumed		1,280		2,358
Policy liabilities and accruals, end of period		3,842,845		2,875,353
Individual deferred annuity spread:				
Weighted average yield on cash and invested assets.		5.83 %		6.07 %
Weighted average interest crediting rate/index cost		3.17		3.37
Spread		2.66 %		2.70 %
Individual traditional annuity withdrawal rate		4.9 %		5.2 %

Pre-tax operating income for the Independent Annuity segment increased 15.4% in the 2006 period to \$5.9 million. The increase is due principally to growth in the volume of business in force, partially offset by a decrease in spreads earned on individual deferred annuities. Revenues, benefits, expenses and volume of business in force increased primarily due to the growth of our EquiTrust Life distribution channel. The average account value for annuity contracts in force in the Independent Annuity segment totaled \$3,671.9 million in the 2006 period and \$2,772.4 million in the 2005 period.

The increase in interest sensitive and index product charges is due to an increase in surrender charges. Surrender charges increased due to an increase in surrenders relating to growth in the volume and aging of business in force. The increase in net investment income is attributable to growth in invested assets due principally to net premium inflows, partially offset by the impact of a decline in our investment yield. The decrease in the derivative loss is due to a \$7.1 million increase in proceeds from option settlements due to appreciation in the indices supporting the index annuity business, partially offset by a \$5.7 million increase in the cost of money for call options due primarily to the impact of growth in the volume of index annuities in force, as discussed under Derivative income (loss) above. Benefits and expenses for the 2006 period increased due to growth in the volume of business in force. In addition, index credits increased \$6.7 million due primarily to increases in the equity markets during the 2006 period. Operating expenses for the quarter include \$1.2 million for 2006 and \$0.8 million for 2005 relating to the expansion of our EquiTrust Life distribution.

The weighted average yield on cash and invested assets decreased primarily to market investment rates being lower than our portfolio yield as discussed in the Net investment income section above. The weighted average crediting rate decreased for the 2006 period due to decreases in crediting rates and option costs made as a result of the decrease in portfolio yield.

		-)		,
Other data				
Life premiums collected, net of reinsurance	\$	47,439	\$	46,893
Policy liabilities and accruals, end of period		2,107,702	2	2,070,242
Direct life insurance in force, end of period (in millions)		28,936		26,944
		-)		-)-
Interest sensitive life insurance spread:				
Weighted average yield on cash and invested assets		6.77 %		6.87 %
Weighted average interest crediting rate		4.44		4.52
Spread		2.33 %		2.35 %
		2.00 /0		2.00 /0

Pre-tax operating income for the Traditional and Universal Life Insurance segment decreased 14.5% in the 2006 period to \$11.0 million due primarily to an increase in death benefits, partially offset by the impact of an increase in business in force and a decrease in other underwriting expenses. Traditional life insurance premiums increased due primarily to an increase in sales of term products by our exclusive agency force. Net investment income decreased due to the impact of lower market interest rates on our portfolio and a reduction in fee income from bond calls, tender offers and mortgage loan prepayments and the acceleration of net discount accretion on mortgage and asset-backed securities, which totaled \$0.3 million in the first quarter of 2006 compared to \$0.6 million in the first quarter of 2005. Benefits and expenses increased primarily due to an increase in death benefits, partially offset by a decrease in other underwriting expenses. Interest sensitive death benefits increased 25.3% to \$8.0 million and traditional death benefits increased 15.0% to \$13.9 million during the 2006 period. Other underwriting expenses decreased 11.1% to \$8.2 million in the first quarter of 2006 primarily due to a reduction in expenses related to the closing of a life processing unit as discussed in the Underwriting, acquisition and insurance expenses section above. The decrease in the weighted average yield on cash and invested assets is primarily due to the impact of the decline in market interest rates and changes in fee income. The decrease in our weighted average interest crediting rate is due primarily to a decrease in credited rates on assumed business.

Operating revenues:				
Accident and health insurance premiums	\$	70	\$	20
Net investment income	1	,592		2,908
Other income	5	,214		4,733
	6	,876		7,661
Interest expense	2	,961		3,295
Benefits and other expenses	6	,008		5,247

Minority interest Equity income (loss), before tax	(2,093) (55) 277	(881) (98) (398)
Pre-tax operating loss	\$ (1,871)	\$ (1,377)

Pre-tax operating loss increased 35.9% to \$1.9 million, primarily due to a decrease in net investment income, partially offset by an increase in equity income. Net investment income declined partially due to a decrease in investments resulting from the redemption of the Series C preferred stock in December 2005. In addition, net investment income in the first quarter of 2005 includes \$0.9 million representing past due interest that had not been accrued, relating to the redemption of a fixed maturity security that had been impaired in a prior period. Interest

expense decreased in the 2006 period due to the redemption of our Series C preferred stock, partially offset by an increase in the variable rate on our line of credit as discussed in the Interest expense section above. Accounting Changes

During the first quarter of 2006, we adopted Statement of Financial Accounting Standards (Statement) No. 123(R), Share-Based Payment, using the modified-prospective-transition method. Statement No. 123(R) is a revision of Statement No. 123, Accounting for Stock-Based Compensation. As a result of adopting Statement No. 123(R), net income for the full year 2006 is expected to be \$0.2 million lower (less than \$0.01 per basic and diluted common share) for 2006, than if we had continued to account for share-based compensation under Statement No. 123. This includes a cumulative effect adjustment of \$0.1 million (less than \$0.01 per basic and diluted common share) relating to a change in accounting for forfeitures which is recorded as a reduction to compensation expense in our 2006 consolidated income statement. For the first quarter of 2006, the impact of adopting Statement No. 123(R), including the cumulative effect adjustment, was to decrease net income by \$0.1 million. Also, for the first quarter of 2006, \$1.0 million of excess tax deductions are classified as financing cash inflows instead of operating cash inflows as they would have been under Statement No. 123. Results for prior periods have not been restated. See Note 1 to the consolidated financial statements for additional details regarding our stock-based compensation expense and implementation of Statement No. 123(R).

In September 2005, the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants issued Statement of Position (SOP) 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts. The SOP provides guidance on the accounting for internal replacements of one insurance contract for another insurance contract. The impact of adoption is not expected to be material as our current accounting policy for internal replacements substantially conforms to the guidance outlined in the SOP. We plan to adopt SOP 05-1 in 2007. See Note 1 to the consolidated financial statement for additional details regarding SOP 05-1.

Financial Condition

Investments

Our total investment portfolio increased 0.5% to \$8,343.7 million at March 31, 2006 compared to \$8,299.2 million at December 31, 2005. This increase is primarily the result of net cash received from interest sensitive and index products partially offset by the impact of a decrease in net unrealized appreciation on fixed maturity securities classified as available for sale. Net unrealized appreciation of fixed maturity securities decreased \$185.7 million during the first quarter of 2006 to a net unrealized loss of \$76.8 million at March 31, 2006 due principally to the impact of an increase in market interest rates.

Internal investment professionals manage our investment portfolio. The investment strategy is designed to achieve superior risk-adjusted returns consistent with the investment philosophy of maintaining a largely investment grade portfolio and providing adequate liquidity for obligations to policyholders and other requirements. We continually review the returns on invested assets and change the mix of invested assets as deemed prudent under the current market environment to help maximize current income.

Our investment portfolio is summarized in the table below:

	March 3 Carrying	1, 2006	December Carrying	31, 2005
	Value	Percent (Dollars in t	Value	Percent
Fixed maturities available for sale:			iiousuiius)	
Public	\$ 5,777,778	69.2 %	\$ 5,650,008	68.0 %

Total investments	\$ 8,343,669	100.0 %	\$ 8,299,208	100.0 %

As of March 31, 2006, 94.9% (based on carrying value) of the available-for-sale fixed maturity securities were investment grade debt securities, defined as being in the highest two National Association of Insurance Commissioners (NAIC) designations. Non-investment grade debt securities generally provide higher yields and involve greater risks than investment grade debt securities because their issuers typically are more highly leveraged and more vulnerable to adverse economic conditions than investment grade debt securities. We regularly review the percentage of our portfolio that is invested in non-investment grade debt securities (NAIC designations 3 through 6). As of March 31, 2006, the investment in non-investment grade debt was 5.1% of available-for-sale fixed maturity securities. At that time, no single non-investment grade holding exceeded 0.2% of total investments.

equivalents, of available-for-sale fixed maturity securities.

Total	\$4,721,619	\$ (185,210)	\$ 3,147,728	\$ (70,916)		

Included in the above table are 797 securities from 508 issuers at March 31, 2006 and 515 securities from 328 issuers at December 31, 2005. These increases are primarily due to the impact of increases in market interest rates between December 31, 2005 and March 31, 2006.

The following summarizes the details describing the more significant unrealized losses by investment category as of March 31, 2006.

Corporate securities: The unrealized losses on corporate securities totaled \$81.7 million, or 44.1% of our total unrealized losses. The largest losses were in the financial services sector (\$785.5 million carrying value and \$31.2 million unrealized loss) and in the manufacturing sector (\$459.6 million carrying value and \$27.2 million unrealized loss). The largest unrealized losses in the manufacturing sector were in the paper and allied products sector (\$89.2 million carrying value and \$6.7 million unrealized loss) and the food and related products sector (\$69.6 million carrying value and \$4.2 million unrealized loss). The unrealized loss in paper and allied products sector is due to spread widening that is the result of weaker operating results. In addition, we believe there are concerns that the sector may experience increased equity enhancing activity by management, such as common stock buybacks, which could be detrimental to credit quality. The unrealized loss in the food and related products sector, the financial services sector and the remaining corporate sectors was caused primarily by a rise in market interest rates. Because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at March 31, 2006.

Mortgage and asset-backed securities: The unrealized losses on mortgage and asset-backed securities were caused primarily by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on mortgages and other assets backing the securities. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at March 31, 2006.

United States Government and agencies: The unrealized losses on U.S. Governments and agencies were caused by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on direct guarantees from the U.S. Government and by agencies of the U.S. Government. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at March 31, 2006.

March 31, 2006

State municipal and other governments: The unrealized losses on state, municipal and other governments were caused by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on the taxing authority of a municipality or the revenues of a municipal project. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at March 31, 2006.

Public utilities: Unrealized losses on public utilities totaled \$11.1 million at March 31, 2006. These unrealized losses were caused primarily by an increase in market interest rates. We have the ability and intent to hold these investments until recovery of fair value, which may be maturity and we do not consider these investments to be other-than-temporarily impaired at March 31, 2006.

Excluding mortgage and asset-backed securities, no securities from the same issuer had an aggregate unrealized loss in excess of \$1.6 million at March 31, 2006. With respect to mortgage and asset-backed securities not backed by the United States government, no securities from the same issuer had an aggregate unrealized loss in excess of \$6.6 million at March 31, 2006. The \$6.6 million unrealized loss from one issuer relates to eight different securities that are backed by different pools of residential mortgage loans. All eight securities are rated investment grade and the largest unrealized loss on any one security totaled \$2.1 million at March 31, 2006.

Excluding mortgage and asset-backed securities, no securities from the same issuer had an aggregate unrealized loss in excess of \$1.6 million at December 31, 2005. With respect to mortgage and asset-backed securities not backed by the United States government, no securities from the same issuer had an aggregate unrealized loss in excess of \$2.6 million at December 31, 2005. The \$2.6 million unrealized loss from one issuer relates to six different securities that are backed by different pools of residential mortgage loans. All six securities are rated investment grade and the largest unrealized loss on any one security totaled \$1.2 million at December 31, 2005.

The carrying value and estimated market value of our portfolio of available-for-sale fixed maturity securities, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Mortgage and other asset-backed securities comprised 31.1% at March 31, 2006 and 31.8% at December 31, 2005 of our total available-for-sale fixed maturity securities. These securities are purchased when we believe these types of investments provide superior risk-adjusted returns compared to returns of corporate bonds and mortgage loans. The mortgage-backed securities are diversified as to collateral types, cash flow characteristics and maturity. The repayment pattern on mortgage and other asset-backed securities is more variable than that of more traditional fixed maturity securities because the repayment terms are tied to underlying debt obligations that are subject to prepayments. The prepayment speeds (e.g., the rate of individuals refinancing their home mortgages) can vary based on a number of economic factors that cannot be predicted with certainty. These factors include the prevailing interest rate environment and general status of the economy.

March 31, 2006

At each balance sheet date, we review and update our expectation of future prepayment speeds and the book value of the mortgage and other asset-backed securities purchased at a premium or discount is reset, if needed, to result in a constant effective yield over the life of the security. This effective yield is computed using historical principal payments and expected future principal payment patterns. Any adjustments to book value to derive the constant effective yield, which may include the reversal of premium or discount amounts previously amortized or accrued, are recorded in the current period as a component of net investment income. Accordingly, deviations in actual prepayment speeds from that originally expected or changes in expected prepayment speeds can cause a change in the yield earned on mortgage and asset-backed securities purchased at a premium or discount and may result in adjustments that have a material positive or negative impact on quarterly reported results. Increases in prepayment speeds, which typically occur in a decreasing interest rate environment, generally increase the rate at which discount is accrued and premium is amortized into income. Decreases in prepayment speeds, which typically occur in an increasing interest rate environment, generally slow down the rate these amounts are recorded into income.

The mortgage-backed portfolio includes pass-through and collateralized mortgage obligation (CMO) securities. With a pass-through security, we receive a pro rata share of principal payments as payments are made on the underlying mortgage loans. CMOs consist of pools of mortgages divided into sections or tranches which provide sequential retirement of the bonds. We invest in sequential tranches which provide cash flow stability in that principal payments do not occur until the previous tranches are paid off. In addition, to provide call protection and more stable average lives, we invest in CMOs such as planned amortization class (PAC) and targeted amortization class (TAC) securities. CMOs of these types provide more predictable cash flows within a range of prepayment speeds by shifting the prepayment risks to support tranches. We generally do not purchase certain types of CMOs that we believe would subject the investment portfolio to greater than average risk. These include, but are not limited to, principal only, floater, inverse floater, PAC II and support tranches.

March 31, 2006

The following tables set forth the amortized cost, par value and carrying value of our mortgage and asset-backed securities summarized by type of security.

Commercial mortgage-backed securities	276,691	273,724		280,543	4.0
Other asset-backed securities	124,302	124,296		123,426	1.8
Total mortgage and asset-backed securities	\$ 2,202,636	\$ 2,229,760	\$	2,207,885	31.8 %

The commercial and other asset-backed securities are primarily sequential securities. Commercial mortgage-backed securities typically have cash flows that are less sensitive to interest rate changes than residential securities of similar types due principally to prepayment restrictions on many of the underlying commercial mortgage loans. The asset-backed securities, whose collateral is primarily home-equity loans, generally exhibit more stable cash flows relative to mortgage-backed issues. During 2006 and 2005, we reduced our allocation of assets to mortgage-backed

securities to reduce our exposure to unwanted changes in the duration of our investment portfolio with changes in market interest rates.

Fixed maturity securities held for trading consist of U.S. Treasury securities totaling \$14.8 million at March 31, 2006 and December 31, 2005. These securities had an unrealized loss of \$0.2 million at March 31, 2006 and December 31, 2005.

Equity securities totaled \$53.9 million at March 31, 2006 and \$82.5 million at December 31, 2005. Gross unrealized gains totaled \$18.7 million and gross unrealized losses totaled \$0.2 million at March 31, 2006. At December 31, 2005, gross unrealized gains totaled \$28.1 million and gross unrealized losses totaled \$0.2 million on these securities. Included in equity securities is our investment in AEL which totaled \$43.3 million at March 31, 2006 and \$72.0 million at December 31, 2005. During the first quarter of 2006, we sold 2,500,000 shares of AEL and realized a

pre-tax gain of \$13.5 million.

Mortgage loans totaled \$889.9 million at March 31, 2006 and \$840.5 million at December 31, 2005. These mortgage loans are diversified as to property type, location and loan size, and are collateralized by the related properties. Mortgages more than 60 days delinquent accounted for less than 0.3% of the carrying value of the mortgage portfolio at March 31, 2006 and December 31, 2005. Our mortgage lending policies establish limits on

March 31, 2006

the amount that can be loaned to one borrower and require diversification by geographic location and collateral type. Information regarding the collateral type and related geographic location within the United States follows:

Our asset-liability management program includes (i) designing and developing products that encourage persistency and help ensure targeted spreads are earned and, as a result, create a stable liability structure, and (ii) structuring the investment portfolio with duration and cash flow characteristics consistent with the duration and cash flow characteristics of our insurance liabilities. The weighted average life of the fixed maturity and mortgage loan portfolio, based on market values and excluding convertible bonds, was approximately 9.6 years at March 31, 2006 and 8.9 years at December 31, 2005. Based on calculations utilizing our fixed income analytical system, including our mortgage backed prepayment assumptions, the effective duration of our fixed maturity and mortgage loan portfolios was 6.2 at March 31, 2006 and 5.8 at December 31, 2005.

Other Assets

Deferred policy acquisition costs increased 9.7% to \$762.2 million and deferred sales inducements increased 11.3% to \$163.6 million at March 31, 2006 due primarily to capitalization of costs incurred with new sales. In addition, deferred policy acquisition costs increased \$46.9 million and deferred sales inducements increased \$3.3 million due to the impact of the change in unrealized appreciation/depreciation on fixed maturity securities. Assets held in separate accounts increased 6.7% to \$682.7 million at March 31, 2006 due primarily to positive investment returns and the

transfer of net premiums to the separate accounts.

Liabilities

Policy liabilities and accruals and other policyholders funds increased 3.5% to \$8,484.2 million at March 31, 2006 primarily due to increases in the volume of business in force. Other liabilities decreased 15.2% to \$128.7 million at December 31, 2006 due to a \$50.1 million decrease in negative cash balances, partially offset by a \$19.2 million increase in payables for securities purchased. The decrease in negative cash is primarily attributable to a \$46.3 million outstanding check at December 31, 2005 relating to our Series C preferred stock redemption. Deferred income taxes decreased 57.4% to \$37.5 million due primarily to the impact of the change in unrealized appreciation/depreciation on fixed maturity and equity securities.

Stockholders Equity

Stockholders equity decreased 7.1%, to \$784.1 million at March 31, 2006, compared to \$844.2 million at December 31, 2005. This decrease is attributable to a decrease in the change in the unrealized appreciation/depreciation on fixed maturity and equity securities and dividends, partially offset by net income and proceeds from stock option exercises.

At March 31, 2006, common stockholders equity was \$781.1 million, or \$26.47 per share, compared to \$841.2 million, or \$28.88 per share at December 31, 2005. Included in stockholders equity per common share is (\$0.31) at March 31, 2006 and \$2.83 at December 31, 2005 attributable to net unrealized investment gains resulting from marking to market value our fixed maturity and equity securities classified as available for sale and interest rate swaps. The change in net unrealized appreciation of these securities and derivatives decreased stockholders equity \$91.6 million during the three months ended March 31, 2006, after related adjustments to deferred policy acquisition costs, deferred sales inducements, value of insurance in force acquired, unearned revenue reserve and deferred income taxes.

Liquidity and Capital Resources

FBL Financial Group, Inc.

Parent company cash inflows from operations consist primarily of (i) dividends from subsidiaries, if declared and paid, (ii) fees that it charges the various subsidiaries and affiliates for management of their operations, (iii) expense reimbursements from subsidiaries and affiliates, (iv) proceeds from the exercise of employee stock options, (v) proceeds from borrowings and (vi) tax settlements between the parent company and its subsidiaries. Cash outflows are principally for salaries, taxes and other expenses related to providing these management services, dividends on outstanding stock and interest on our parent company debt.

We paid cash dividends on our common and preferred stock during the first quarter totaling \$3.4 million in 2006 and \$3.1 million in 2005. Interest payments on our debt totaled \$1.8 million for the 2006 and 2005 periods. It is anticipated quarterly cash dividend requirements for the remainder of 2006 will be \$0.115 per common and \$0.0075 per Series B redeemable preferred share or approximately \$10.4 million. In addition, interest payments on our debt are estimated to be \$10.0 million for the remainder of 2006.

The ability of the Life Companies to pay dividends to FBL Financial Group, Inc. is limited by law to earned profits (statutory unassigned surplus) as of the date the dividend is paid, as determined in accordance with accounting practices prescribed by insurance regulatory authorities of the State of Iowa. In addition, under the Iowa Insurance Holding Company Act, the Life Companies may not pay an extraordinary dividend without prior notice to and approval by the Iowa Insurance Commissioner. An extraordinary dividend is defined under the Iowa Insurance Holding Company Act as any dividend or distribution of cash or other property whose fair market value, together with that of other dividends or distributions made within the preceding 12 months, exceeds the greater of (i) 10% of policyholders surplus (total statutory capital stock and statutory surplus) as of December 31 of the preceding year, or (ii) the statutory net gain from operations of the insurer for the 12-month period ending December 31 of the preceding year. During the remainder of 2006, the maximum amount legally available for distribution to FBL Financial Group, Inc., without further regulatory approval, from Farm Bureau Life is \$44.9 million and from EquiTrust Life is \$21.6 million. With respect to the amount available from Farm Bureau Life, \$39.2 million is not available until December 2006 without prior approval from the Iowa Insurance Commissioner due to the timing and amount of dividend payments made during 2005.

FBL Financial Group, Inc. expects to rely on available cash resources and dividends from the Life Companies to make any dividend payments to its stockholders and interest payments on its debt for the remainder of 2006. We have obtained regulatory approval for Farm Bureau Life to pay a \$15.0 million dividend in the second quarter of 2006. In addition, we may seek an additional extraordinary dividend for the third quarter of 2006 depending on cash flow and capital needs of the parent company. Dividends to be paid by Farm Bureau Life in 2006 are not expected to exceed the \$44.9 million annual limitation.

We may from time to time review potential acquisition opportunities. It is anticipated that funding for any such acquisition would be provided from available cash resources, debt or equity financing. As of March 31, 2006, we had no material commitments for capital expenditures. The parent company had available cash and investments totaling \$11.5 million at March 31, 2006.

Insurance Operations

The Life Companies cash inflows consist primarily of premium income, deposits to policyholder account balances, income from investments, sales, maturities and calls of investments, repayments of investment principal and proceeds from call option exercises. The Life Companies cash outflows are primarily related to withdrawals of policyholder account balances, investment purchases, payment of policy acquisition costs, policyholder benefits, income taxes, dividends and current operating expenses. Life insurance companies generally produce a positive cash flow which may be measured by the degree to which cash inflows are adequate to meet benefit obligations to policyholders and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business. The Life Companies liquidity positions continued to be favorable in the first quarter of 2006, with cash inflows at levels sufficient to provide the funds necessary to meet their obligations.

For the life insurance operations, cash outflow requirements for operations are typically met from normal premium and deposit cash inflows. This has been the case for all reported periods as the Life Companies continuing operations and financing activities relating to interest sensitive and index products provided funds totaling \$243.5 million in the three months ended March 31, 2006 and \$192.1 million in the three months ended March 31, 2005. Positive cash flow from operations is generally used to increase the insurance companies fixed maturity securities and other investment portfolios. In developing their investment strategy, the Life Companies establish a level of cash and securities which, combined with expected net cash inflows from operations, maturities of fixed maturity investments and principal payments on mortgage and asset-backed securities and mortgage loans, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations.

We anticipate that funds to meet our short-term and long-term capital expenditures, cash dividends to stockholders and operating cash needs will come from existing capital and internally generated funds. We believe that the current level of cash, available-for-sale, trading and short-term securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage and asset-backed securities and mortgage loans and premiums and deposits on our insurance products, are adequate to meet our anticipated cash obligations for the foreseeable future. Our investment portfolio at March 31, 2006, included \$47.4 million of short-term investments, \$14.8 million of trading securities, \$12.9 million of cash and \$1,073.2 million in carrying value of U.S. Government and U.S. Government agency backed securities that could be readily converted to cash at or near carrying value.

Contractual Obligations

In the normal course of business, we enter into insurance contracts, financing transactions, lease agreements or other commitments which are necessary or beneficial to our operations. These commitments may obligate us to certain cash flows during future periods. As of December 31, 2005, we had contractual obligations totaling \$16,877.5 million with payments due as follows: less than one year \$731.9 million, one-to-three years \$1,446.4 million, four-to-five years \$1,456.6 million and after five years \$13,242.6 million. There have been no material changes to our total contractual obligations since December 31, 2005.

March 31, 2006

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the market risks of our financial instruments since December 31, 2005. **ITEM 4. CONTROLS AND PROCEDURES**

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective. Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms.

Our internal control over financial reporting changes from time-to-time as we modify and enhance our systems and processes to meet our dynamic needs. Changes are also made as we strive to be more efficient in how we conduct our business. Any significant changes in controls are evaluated prior to implementation to help ensure the continued effectiveness of our internal controls and internal control environment. While changes have taken place in our internal controls during the quarter ended March 31, 2006, there have been no changes that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) The following table sets forth issuer purchases of equity securities for the quarter ended March 31, 2006.

Period	(a) Total Number of Shares (or Units) Purchased (1)	Number of Shares (or Units)Price Paid per Share (or		(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
January 1, 2006 through				Not applicable	Not applicable
January 31, 2006	2,767	\$	32.63		
February 1, 2006 through				Not applicable	Not applicable
February 28, 2006	505		34.00		
March 1, 2006 through				Not applicable	Not applicable
March 31, 2006					
Total	3,272	\$	32.84		

(1) Our Amended and Restated 1996 Class A Common Stock Compensation Plan (the Plan) provides for the grant of incentive stock options, nonqualified stock options, bonus stock, restricted stock and stock appreciation rights to directors, officers and employees. Under the Plan, the purchase price for any shares purchased pursuant to the exercise of an option shall be paid in full upon such exercise in cash, by check or by transferring shares of Class A common stock to the Company. Activity in this table represents Class A common shares returned to the Company in connection with the exercise of employee stock options.
