ALLIANCE GAMING CORPORATION AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Six Months Ended December 31, 2001 and 2002

1. BASIS OF PRESENTATION

Principles of consolidation

The accompanying unaudited interim condensed consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, which management believes are necessary to present fairly the financial position, results of operations and cash flows of Alliance Gaming Corporation (Alliance or the Company) for the respective periods presented. The results of operations for an interim period are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole. The accompanying unaudited interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes in the Company s annual report on Form 10-K for the year ended June 30, 2002. All intercompany accounts and transactions have been eliminated in consolidation.

The accompanying consolidated financial statements include the accounts of Alliance Gaming Corporation, and its wholly owned and partially owned, controlled subsidiaries. In the case of Video Services, Inc. (VSI), the Company owns 100% of the voting stock. The Company is entitled to receive 71% of dividends declared by VSI, if any, at such time that dividends are declared. All significant intercompany accounts and transactions have been eliminated. Certain reclassifications have been made to prior year financial statements to conform to the current year presentation.

The Company, through a wholly-owned subsidiary, is the general partner of Rainbow Casino Vicksburg Partnership, L.P. (RCVP) the limited partnership that operates the Rainbow Casino. The limited partner, Rainbow Corporation, an independent third party, is entitled to receive 10% of the net available cash flows after debt service and other items, as defined (which amount increases to 20% of such amount for the proportional revenues above \$35.0 million) each year through December 31, 2010. The Company holds the remaining economic interest in the partnership and consolidates the partnership with minority interest being reflected for the portion not owned.

On November 13, 2002, the Company announced the acquisition of Casino Management System Software Company (CMS), a leading supplier of software solutions focusing on player database management, player tracking and casino promotions. The \$6.5 million purchase, consisting of cash and a two-year note, was accounted for pursuant to the provisions of Statement of Financial Accounting Standards No.141 Business Combinations (SFAS No. 141). Certain pro forma disclosure for the CMS acquisition normally required under SFAS No. 141 have been omitted as this acquisition did not exceed the materiality provisions contained therein. The allocation of the purchase price to the assets and liabilities acquired will be completed prior to June 30, 2003.

Revenue recognition

Revenue from sales of gaming machines and amusement games is generally recognized at the time products are shipped and title has passed to the customer. The Company sells gaming equipment on normal credit terms (generally 2%, net 30) and also offers financing to qualified customers for periods generally between 6 and 48 months.

Revenue from sales of computerized monitoring systems is recognized in accordance with the AICPA s Statement of Position 97-2 (SOP 97-2) Software Revenue Recognition. In accordance with the provisions of SOP 97-2, the contracts for the sales of computerized monitoring units are considered to have multiple elements because they include hardware, software, installation supervision, training, and post-contract customer support. Accordingly, revenues from the sale of systems are deferred and begin to be recognized at the point when the system is deemed to be functionally operational, and the residual method is used to recognize revenue for the remaining elements as they are delivered, each having vendor specific objective evidence of relative sales values. Post-contract customer support revenues are recognized over the period of the support agreement (generally one year).

Table of Contents**ALLIANCE GAMING CORPORATION AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****Six Months Ended December 31, 2001 and 2002**

Our Bally Gaming and Systems business unit earns revenues from recurring revenue sources which consist of the operations of the wide-area progressive jackpot systems and revenues from gaming machines placed in a casino on a daily lease or rental basis. Revenue from these sources is recognized based on the contractual terms of the participation or rental agreements and is generally based on a share of money wagered, a share of the net winnings, or on a fixed daily rental rate basis.

In accordance with industry practice, we recognize gaming revenues in our route and casino operations as the net win from gaming machine operations, which is the difference between coins and currency deposited into the machines and payments to customers and, for other games, the difference between gaming wins and losses. We recognize total net win from gaming machines as revenues for route operations which we operate pursuant to revenue-sharing arrangements and revenue-sharing payments (either fixed or variable) as a cost of route operations.

The Company constantly monitors its exposure for credit losses and maintains allowances for anticipated losses.

2. INVENTORIES

Inventories are stated at the lower of cost, determined on a first-in, first-out basis, or market. Cost elements included for work-in-process and finished goods include raw materials, freight, direct labor and manufacturing overhead.

Inventories, net of reserves, consist of the following (in 000 s):

	June 30, 2002	Dec. 31, 2002
Raw materials	\$ 17,158	\$ 17,960
Work-in-process	936	2,764
Finished goods	24,903	20,355
	<u> </u>	<u> </u>
Total inventories	\$ 42,997	\$ 41,079
	<u> </u>	<u> </u>

3. DEBT

Long-term debt consists of the following (in 000 s):

	June 30, 2002	Dec. 31, 2002
Term loan facility	\$ 189,525	\$ 188,575
10% Senior Subordinated Notes due 2007, net of unamortized discount of \$416 and \$376	149,584	149,624
Other subordinated debt	2,495	1,495

	<u> </u>	<u> </u>
Long-term debt, less current maturities	\$ 338,148	\$ 338,169
	<u> </u>	<u> </u>

The Company's debt structure consists primarily of a \$190 million term loan facility and a \$25 million revolving credit facility (which can be increased by \$15 million at the Company's discretion) (collectively referred to herein as the bank facility) and \$150 million Senior

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

Subordinated Notes. The term loan has an interest rate of LIBOR plus 3.25% (or 4.7% as of December 31, 2002), has a 1% per year mandatory principal amortization, and matures on December 31, 2006. The revolving credit facility commitment decreases ratably over its 5 year commitment, which ends on June 30, 2005. As of December 31, 2002, there were no borrowings outstanding on the revolving credit facility. The bank facility loan contains certain customary financial and operational covenants.

The bank facility is collateralized by substantially all domestic property and is guaranteed by each domestic subsidiary of the U.S. Borrower and German Subsidiaries (both as defined in the credit agreement), other than the entity that holds the Company's interest in its Louisiana and Mississippi operations, and is secured by both a U.S. and German Pledge Agreement (both as defined). The bank facility contains a number of maintenance covenants and other significant covenants that, among other things, restrict the ability of the Company and the ability of certain of its subsidiaries to dispose of assets, incur additional indebtedness, pay dividends or make other distributions, enter into certain acquisitions, repurchase equity interests or subordinated indebtedness, issue or sell equity interests of the Company's subsidiaries, engage in mergers or acquisitions, or engage in certain transactions with subsidiaries and affiliates, and that otherwise restrict corporate activities. As of December 31, 2002, we are in compliance with these covenants.

The Senior Subordinated Notes bear interest at 10%, are due in 2007, and are general unsecured obligations of the Company, ranking subordinate in right of payment to all Senior Debt (as defined) of the Company, including indebtedness under the bank facility. The Senior Subordinated Notes are fully and unconditionally guaranteed on a joint and several senior subordinated basis by all existing and future domestic Restricted Subsidiaries of the Company, subject to certain exceptions including the partially-owned entities through which its Mississippi casino and Louisiana route operations are conducted. The Subsidiary Guarantees are general unsecured obligations of the Guarantors, ranking subordinate in right of payment to all Senior Debt of the Guarantors. The Company will be able to designate other current or future subsidiaries as Unrestricted Subsidiaries under certain circumstances. Unrestricted Subsidiaries will not be required to issue a Subsidiary Guarantee and will not be subject to many of the restrictive covenants set forth in the Indenture pursuant to which the Senior Subordinated Notes were issued. The Indenture for the Company's Senior Subordinated Notes contains various covenants, including limitations on incurrence of additional indebtedness, on restricted payments and on dividend and payment restrictions on subsidiaries. The Senior Subordinated Notes may be redeemed beginning in August 2002 at 105%, which decreases ratably over the remaining term. Upon the occurrence of a Change of Control (as defined), the holders of the Senior Subordinated Notes will have the right to require the Company to purchase their notes at a price equal to 101% of the aggregate principal amount thereof, plus accrued and unpaid interest to the date of purchase. As of December 31, 2002, we are also in compliance with the covenants contained in the Indenture for the Senior Subordinated Notes.

4. INCOME TAXES

The Company has significant deferred tax assets, which consist primarily of net operating loss carry forwards and other timing differences. Management conducts periodic recoverability assessments of these deferred tax assets, which includes evaluating both positive and negative evidential matter to determine if it is more likely than not that the deferred tax assets will be realizable. On June 30, 2002, management conducted a recoverability assessment and determined that \$37 million in previously reserved deferred tax assets were realizable due to the Company's profitable operating results in 2001 and 2002 and projected future taxable income. Until the fourth quarter of fiscal year 2002, management did not believe sufficient evidence existed that it was more likely than not that such profitable operating results would allow such deferred tax assets to be realized.

Beginning July 1, 2002, the Company began recognizing Federal income tax expense based on 35% of pre-tax domestic income and state income taxes at a rate of approximately 2% of domestic income. For the prior year quarter ended December 31, 2001, substantially all of the Company's taxable income was offset against Federal net operating loss carry forwards, which reduced the Company's tax expense for the quarter ended December 31, 2001 from approximately \$4.6 million to approximately \$83,000.

Diluted earnings per share	\$ 0.27	\$ 0.24	\$ 0.44	\$ 0.37
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

Stock options outstanding that were potentially convertible into approximately 600,000 common shares as of December 31, 2002, were not included in the computation of diluted EPS because the exercise price was greater than the average market price of the common shares during the period.

6. SEGMENT AND GEOGRAPHICAL INFORMATION

The Company operates in four business segments: (i) Gaming Equipment and Systems designs, manufactures and distributes gaming machines and computerized monitoring systems for gaming machines; (ii) Wall Machines and Amusement Games designs, manufactures and distributes wall-mounted gaming machines and distributes third party manufactured amusement games; (iii) Route Operations owns and manages a significant installed base of gaming machines; and (iv) Casino Operations owns and operates two regional casinos. The accounting policies of these segments are consistent with Company's policies for the Consolidated Financial Statements.

The tables below present information as to the Company's revenues, intersegment revenues and operating income (in 000 s):

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources

As of December 31, 2002, the Company had \$54.9 million in cash and cash equivalents, and \$40.0 million in unborrowed availability on its revolving credit facility. In addition we had net working capital of approximately \$173.0 million at December 31, 2002, virtually unchanged compared to the balance at June 30, 2002. The changes within working capital are more fully described in the cash flow section below. Consolidated cash and cash equivalents at December 31, 2002, includes approximately \$21.7 million of cash which is utilized in Casino and Route Operations held in vaults, cages or change banks, as well as \$8.8 million held in jackpot reserve accounts which we maintain to ensure availability of funds to pay wide-area progressive jackpot awards. We also maintain restricted investments to pay the annual installments for the long-term jackpots previously awarded, which totaled \$0.8 million at December 30, 2002.

Management believes that cash flows from operating activities, cash and cash equivalents held and the up to \$40.0 million revolving credit facility commitment will provide the Company with sufficient capital resources and liquidity. At December 31, 2002, we had no material commitments for capital expenditures.

Cash Flow

During the six months ended December 31, 2002, we generated \$18.3 million of cash flows from operating activities, which was down compared to \$19.9 million in the prior period. The current period operating cash flow included cash used by increases in both accounts and notes receivable of \$32.0 million and inventories of \$2.6 million, offset by increases in accrued liabilities and accounts payable of \$6.5 million. The increase in accounts and notes receivable resulted from the increase in sales at the Bally Gaming and Systems business unit and the financing of two significant product sales to Native American casinos during the quarter ended December 31, 2002.

During the six months ended December 31, 2002, we used \$26.1 million of cash in investing activities resulting from capital expenditures totaling \$8.8 million, costs incurred to produce participation games totaling \$10.0 million, and payments for gaming rights totaling \$2.8 million.

During the six months ended December 31, 2002, cash flow from financing activities included \$1.8 million of cash provided from the exercise of stock options, offset by principal payments on other long term debt totaling \$2.2 million.

We believe that the analysis of EBITDA is a useful adjunct to operating income, net income, cash flow and other GAAP measurement. However, this information should not be construed as an alternative to net income (loss) or any other GAAP measure of performance as an indicator of our performance or to GAAP-defined cash flows generated by (or used in) operating, investing and financing activities as an indicator of cash flows or a measure of liquidity. EBITDA may not be comparable to similarly titled measures reported by other companies.

We disclose EBITDA primarily because it is a common metric utilized by analysts for our industry and also because it is utilized in both our bank credit agreement and the Indenture of our Senior Subordinated Notes for purposes of computing various covenants.

Our Bally Gaming and Systems business unit reported an overall increase in revenues of 67% for the quarter and 55% for the year-to-date period. Bally game sales division reported an increase in revenues of 87% for the quarter and 76% for the year-to-date period. New units sold increased 66% during the quarter and 64% for the year-to-date period. The average new unit selling price (excluding OEM games) increased 26% for the quarter and 21% for the year-to-date period. Bally Systems reported an increase in revenues of 93% for the quarter and 54% for the year-to-date period. Bally Systems reported a 6% increase in sales of game monitoring units for the quarter, but a 14% decrease for the year-to-date period. For the current quarter and year-to-date period, Bally Systems experienced significantly higher average selling price per unit driven by the larger proportion of player tracking and promotion software revenues, as well as an increase in recurring hardware and software support revenues to \$4.2 million, resulting from the larger base of installed units, which now stands at approximately 225,000. Gaming Operations reported an increase of 2% in revenues for the quarter and 14% for the year-to-date period, driven by the 9% increase in the average installed base of wide-area and daily-fee games units outstanding.

For the quarter ended December 31, 2002, the overall gross margin percentage for Bally Gaming and Systems decreased to 54% compared to 56% in the prior year quarter, resulting from the higher mix of game sales revenue which have lower margins compared to system and gaming operations. The year-to-date gross margin percentage remained constant at 56%.

The overall selling, general and administrative expenses increased 21% for the quarter and 29% for the year-to-date period, resulting from the additional headcount added with the acquisition of Casino Marketplace in October 2001 and Advanced Casino Systems Corporation in March 2002. revenue declined to 21% in the current year-to-date period compared to 25% for the prior year-to-date period. Research and development costs increased 64% for the quarter and 47% for the year-to-date period, resulting from the increase in hardware and software engineers added during the current year. Total depreciation expense increased 58% for the quarter and 62% for the year-to-date period, driven by the increase in the installed base of wide-area progressive and daily fee games.

Wall Machines and Amusement Games reported a decrease in revenues of 34% for the quarter and 28% for the year-to-date period. For the quarter, the decrease in revenues was a result of a 55% decrease in new units sold, offset by a 34% increase in the average selling price and a 17% increase in revenues from leased games. For the year-to-date period, the decrease in revenues is a result of a 58% decrease in new units sold, offset by a 21% increase in the average selling price and a 19% increase in revenues from leased games. The prior year's quarterly and year-to-date results reflect the positive impact of units that were sold to meet the deadline for the full implementation of the Euro currency. In general, the Wall Machine industry in Germany is currently experiencing a significant slowdown that is tied to the overall slowness in the German economy. The current quarter's revenues included approximately 1,000 Sky games which were delivered in the September 2002 quarter but which had certain right of return privileges that did not expire until the December 2002 quarter, at which time revenue was recognized.

For the quarter ended December 31, 2002, the gross margin percentage for Wall Machines and Amusement Games decreased to 42% compared to 49% in the prior year quarter, resulting primarily from fixed manufacturing overhead costs being allocated over fewer units produced. The year-to-date gross margin percentage decreased to 42% from 46% for the same reason.

The selling, general and administrative expenses decreased 10% for the quarter, which reflects the reduction in both permanent and temporary staff as a result of the workforce reductions put in place in light of the lower sales levels. Research and development costs increased 13% for the quarter and 20% for the year-to-date period as a result of the increase in new product development efforts. Total depreciation expense decreased 62% for the quarter and 75% for the year-to-date period, which reflects the fact that almost all of the long-lived assets were fully written off in June 2002.

Revenues from the Nevada route operations decreased 5% for the quarter and 2% for year-to-date period. This decrease was attributable to a decrease in the average net win per gaming machine per day of 2% to \$65.85 from \$67.25 and a 3% decrease in the weighted average number of gaming machines for the quarter. The revenue decrease for the year-to-date period is a result of a 2% decrease in the average net win per gaming machine per day to \$65.50 from \$66.80 and the weighted average number of games remained relatively flat. The Nevada route operations were adversely impacted during the quarter by the closure of the Raley's supermarkets locations in Southern Nevada. Certain of these locations later re-opened as Food-4-Less stores, where we retained the gaming rights. Gamblers Bonus, a cardless players club and player tracking system continued to have a favorable impact on the net win per day. As of December 31, 2002, the Gamblers Bonus product was installed in over 4,140 gaming machines at approximately 415 locations statewide or 52% of the installed base of gaming machines. Revenues from route operations in Louisiana reported a slight increase of 3% for the quarter and 4% for year-to-date period. For the quarter the increase was primarily the result of a 5% increase in the number of gaming units deployed, offset by a slight decline in the net win per gaming machine per day of 2% to \$54.65 from \$55.50. For the year-to-date period the revenue increase resulted from a 7% increase in the number of gaming units deployed, offset by a 3% decline in the net win per gaming machine per day.

For the quarter and year-to-date ended December 31, 2002, the overall gross margin percentage for the Route Operations decreased slightly to 16% compared to 17% in the prior year. This decrease was a result of the decrease in revenues, with incremental increases in certain operating costs.

The overall selling, general and administrative expenses decreased 8% for the quarter and increased 2% for the year-to-date period. Selling, general and administrative costs as a percentage of revenue remained constant at 5% for the year-to-date period. Total depreciation expense increased 29% for the quarter and 9% for the year-to-date period, driven by the increase in gaming rights fees amortization and depreciation on a higher capital invested in the installed base of gaming devices.

Rainbow Casino reported a decrease in revenues of 8% for the quarter and 6% for the year-to-date period. The Rainbow Casino revenue decrease for the quarter was attributable to a 7% decrease in the average number of gaming machines, offset by a 1% increase in the slot machines net win per day to \$135. The Vicksburg gaming market grew approximately 3% in the December 31, 2002, quarter compared to the prior year quarter. During the quarter Rainbow completed a number of significant remodeling projects including the addition of a deli and an entertainment lounge. The internal remodeling projects caused a significant amount of disruption to the casino operations in the current quarter. The external remodeling project, which began late in January and is expected to be completed early in the June quarter, is expected to be less disruptive to the casino operations. Rail City Casino reported an increase in revenues of 4% for the quarter and 3% for the year-to-date period. The revenue improvement at the Rail City Casino was attributable to a 2% increase in the average number of gaming machines and an increase in the average gaming machine net win per day of 2% to \$83 for the quarter.

The cost of revenues for Casino Operations as a percentage of revenues, increased to 48% for the quarter and 47% for the year-to-date period. This increase was a result of the decrease in revenues, with incremental increases in certain operating costs. Cost of casino revenues includes gaming taxes, rental costs and direct labor including payroll taxes and benefits.

The overall selling, general and administrative expenses increased 3% for the quarter and 6% for the year-to-date period, as result of an increase in advertising and promotional expenses. Selling, general and administrative costs as a percentage of revenue increased to 23% compared to 21% for the year-to-date-period. Total depreciation expense increased 67% for the quarter and 64% for the year-to-date period as a result of the additional capital improvements made to the Rainbow Casino in the current year.

The general and administrative expenses decreased 7% for the quarter and 3% for the year-to-date period. Compared to the prior year periods, in the current year periods we are incurring higher director and officer and general liability insurance premiums, offset by lower accruals for certain elements of our incentive based compensations plan. Total depreciation expense decreased 7% for the quarter and 2% for the year-to-date period.

Interest expense (net of interest income) decreased 8% for the quarter and 10% for the year-to-date-period. The decrease is a result of a lower interest rate on our LIBOR-based bank credit facility.

The Company has significant deferred tax assets, which consist primarily of net operating loss carry forwards and other timing differences. Management conducts periodic recoverability assessments of these deferred tax assets, which includes evaluating both positive and negative evidential matter to determine if it is more likely than not that the deferred tax assets will be realizable. On June 30, 2002, management conducted a recoverability assessment and determined that \$37 million in previously reserved deferred tax assets were realizable due to the Company's profitable operating results in 2001 and 2002 and projected future taxable income. Until the fourth quarter of fiscal year 2002, management did not believe sufficient evidence existed that it was more likely than not that such profitable operating results would allow such deferred tax assets to be realized.

Beginning July 1, 2002, the Company began recognizing Federal income tax expense based on 35% of pre-tax domestic income and state income taxes at a rate of approximately 2% of domestic income. For the prior year quarter ended December 31, 2001, substantially all of the Company's taxable income was offset against Federal net operating loss carry forwards, which reduced the Company's tax expense for the quarter ended December 31, 2001 from approximately \$4.6 million to approximately \$83,000.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Currency Rate Fluctuations

We derive revenues from our non-U.S. subsidiaries, all of which revenues are denominated in their local currencies, and their results are affected by changes in the relative values of non-U.S. currencies and the U.S. dollar. Most of the currencies in countries in which we have foreign operations strengthened versus the U.S. dollar in 2001 and 2002, which resulted in assets and liabilities denominated in local currencies being translated into more dollars. We do not currently utilize hedging instruments.

Market risks

During the normal course of our business, we are routinely subjected to a variety of market risks, examples of which include, but are not limited to, interest and currency rate movements, collectibility of accounts and notes receivable, and recoverability of residual values on leased assets. We continually assess these risks and have established policies and practices designed to protect against the adverse effects of these and other potential exposures. Although we do not anticipate any material losses in these risk areas, no assurances can be made that material losses will not be incurred in these areas in the future.

We have performed a sensitivity analysis of our financial instruments, which consist of our cash and cash equivalents and debt. We have no derivative financial instruments. In performing the sensitivity analysis, we define risk of loss as the hypothetical impact on earnings of changes in the market interest rates or currency exchange rates.

The results of the sensitivity analysis at December 31, 2002, are as follows:

Interest Rate Risk:

We had total debt as of December 31, 2002, of \$343.1 million, of which \$190.0 million are Term Loans with interest rates tied to LIBOR. These Term Loans are broken into individual loans with varying terms from one to six months. The interest rate for each loan is set on the borrowing date and is effective for the term outstanding. If the LIBOR rates were to increase or decrease by 100 basis points, with all other factors remaining constant, earnings would decrease or increase by approximately \$0.5 million on a pre-tax basis.

Foreign Currency Exchange Rate Risk:

Our German subsidiaries currently utilize the euro as our functional currency. Prior to January 2002, the German deutschemark was used. A 10% fluctuation in the exchange rate against the U.S. dollar would result in an immaterial corresponding change in earnings reported in the consolidated group. Such a change in the euro would result in a charge to accumulated other comprehensive income (loss), which is a component of stockholder's equity, of approximately \$3.9 million, all other factors remaining constant.

ITEM 4. DISCLOSURE CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. Within the 90 days prior to the date of this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer and the Company's Sr. Vice President, Chief Financial Officer and Treasurer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Company's President and Chief

Executive Officer and the Company's Sr. Vice President, Chief Financial Officer and Treasurer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.

(b) Changes in internal control. No significant changes were made in the Company's internal controls or in the other factors that could significantly affect these controls subsequent to the date of their evaluation.

PART II

ITEM 1. Legal Proceedings

There have been no material changes in any legal proceedings since filing of the Company's annual report on Form 10-K for the fiscal year ended June 30, 2002.

ITEM 4. Submission of Matters to a Vote of Security Holders

On December 3, 2002, the Company held its annual shareholders meeting at which the shareholders were asked to vote on the election of three directors and the approval of the Company's Amended 2001 Long Term Incentive Plan (the "2001 Plan"). Of the 49,162,770 shares of common stock outstanding, 36,932,014 shares were voted for and 4,918,105 withheld from Mr. Kevin Verner; 27,868,674 shares were voted for and 13,981,445 withheld from Mr. Joel Kirschbaum; and 29,448,618 shares were voted for and 12,401,501 withheld from Mr. Anthony DiCesare; and 39,501,694 shares were voted for and 2,068,046 shares against the approval of amendment to the 2001 Plan to increase the number of shares of the Common Stock issuable thereunder by 2,000,000 shares. Additionally, the shareholders ratified the Board of Director's appointment of Deloitte & Touche LLP to act as independent public accountants of the Company for the fiscal year ending June 30, 2003.
