MFS(R) PRIVACY POLICY

At MFS(R), we are committed to protecting your privacy.

On behalf of the MFS Family of Funds(R), the MFS(R) Institutional Trusts, the Vertex(SM) Funds, Massachusetts Financial Services Company, and certain affiliates(1) (collectively, "MFS," "we," "us" or "our"), this privacy policy outlines certain of our policies designed to maintain the privacy of your nonpublic personal information.

Nonpublic personal information includes much of the information you provide to us and the related information about you and your transactions involving your MFS investment product or service. Examples of nonpublic personal information include the information you provide on new account applications for MFS investment products or services, your share balance or transactional history, and the fact that you are a customer of MFS.

We may collect nonpublic personal information about you from the following sources:

- o information we receive from you on applications or other forms
- o information about your transactions with us, our affiliates, or others, and
- o information we receive from a consumer reporting agency

We do not disclose any nonpublic personal information about our customers or former customers to anyone except as permitted by law. We may disclose all of the information we collect, as described above, to companies that perform marketing services on our behalf or to other financial institutions with whom we have joint marketing arrangements.

We restrict access to nonpublic personal information about you to personnel who are necessary or appropriate to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

federal regulations to guard your nonpublic personal information.

Our privacy policy applies only to individual MFS investors who have a direct relationship with us. If you own MFS products or receive MFS investment services in the name of a third-party broker-dealer, bank, investment adviser or other financial service provider, that third-party's privacy policies may apply to you and our privacy policy may not.

If you have any questions with respect to MFS' privacy policy, please call 1-800-225-2606 any business day between 8 a.m. and 8 p.m. Eastern time.

LETTER FROM THE CHAIRMAN

[Photo of Jeffrey L. Shames]
Jeffrey L. Shames

Dear Shareholders,

As I write this in mid-November, the Dow Jones Industrial Average has just recorded its second-best October ever(1) -- a hopeful sign in what has been a bad year for investors in stocks and corporate bonds. Other types of bonds that have had a great run so far in 2002 have demonstrated the value of diversification. In our view, signals on the future direction of the economy and the market remain decidedly mixed.

A RELAY RACE

In mid-November, we could describe the state of the U.S. economy as a relay race against time involving two runners: the consumer, whose spending has fueled the beginning of a recovery, and corporate spending, which has yet to contribute much to the recovery. The hope is that corporate spending kicks in so that the consumer can pass the baton before running out of steam. But at this point, the near-term direction of consumer spending or corporate spending and profits is difficult to predict. The result is that the economy seems to us to be in a holding pattern as we wait for clear signs that things are improving.

REASONS FOR OPTIMISM

Optimists would point out that wages, according to the U.S. Labor Department, have been rising over the past year. This, in combination with historically low interest rates and inflation, may enable the consumer to keep spending. Perhaps the next good signal of consumer sentiment will be the level of retail sales over the holiday season -- which should become clear about the time this letter reaches your mailbox.

In the corporate arena, our research indicates that business spending overall has at least stopped falling and that corporate earnings and spending could trend upward in 2003. A hopeful sign is that business spending in the third quarter of 2002 eked out its first increase in two years, according to a preliminary report from the U.S. Commerce Department.

Pessimists, however, would counter that the outlook for corporate profits remains very murky, that corporations could resort to further layoffs if

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

profits languish, and that the situation with Iraq adds to market uncertainty. They would also point out that consumer confidence dropped to a nine-year low in October, according to the Conference Board. (Optimists, however, would question the value of confidence readings that have dropped while consumer spending has remained strong.)

STAYING THE COURSE

With the economy in a holding pattern and markets extremely volatile, we think it's important to remember the familiar investment strategies that we believe apply in any market: Think long term. Be diversified. See crises as opportunities. That's how we'd describe our approach to this volatile environment -- which we think plays to our strength as research-based, bottom-up, long-term investors. We would also point out that history has shown that the market and the economy have been cyclical; downturns have usually been followed by upturns.

As always, we appreciate your confidence in MFS and welcome any questions or comments you may have.

Respectfully,

/s/ Jeffrey L. Shames

MANAGEMENT REVIEW AND OUTLOOK

[Photo of John F. Addeo]
John F. Addeo

Dear Shareholders,

For the 12 months ended October 31, 2002, the trust provided a total return of -43.54% based on its beginning and ending stock market prices and assuming the reinvestment of any dividend and capital gain distributions paid during the period. The trust's total return based on its net asset value (NAV) was -3.02%. During the same period, the trust's benchmark, the Lehman Brothers High Yield Bond Index (the Lehman Index), returned -5.49%. The Lehman Index includes all fixed-income securities having a maximum quality rating from Moody's Investors Service of "Ba1", a minimum amount outstanding of \$150 million, and at least one year to maturity. Defaulted bonds are excluded from the index.

The aftermath of September 11, 2001 negatively influenced markets last fall. Deteriorating economic conditions, accounting scandals, a record number of high-yield bonds that missed making interest and principal payments, and a possible war with Iraq contributed to the market's continued decline in 2002. Announcements of lower-than-expected corporate earnings were punished severely by steep stock price declines and affected not only the stock of the reporting company, but often its entire industry. Although these factors certainly

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

influenced the fund's market price performance, it was the announcement of a change in the fund's dividend that had the greatest impact on the fund's stock market price. In January 2002, the trust changed its annual distribution rate from 11%, based on its initial offering price of \$15 per share, to 10%, based on its average daily net asset value. That announcement caused the market price to decline and has continued to affect the fund's stock market price.

Despite market conditions and the change in dividend rate, the fund's net asset value return, which reflects the value of the fund's underlying securities, was better than that of its benchmark.

STRENGTH FROM BROADCASTING, ENERGY, AND MEXICAN AND RUSSIAN DEBT

The fund's NAV performance benefited from its fixed-income holdings in the broadcasting and energy industries, exceptionally strong performance from our holdings in Mexican and Russian debt, and our avoidance of utilities. Broadcasting firms benefited from a rise in advertising revenues. Energy prices increased as concerns about a possible conflict with Iraq mounted. Economic and political reforms in Mexico and Russia have had a positive impact on their debt. In fact, Mexican bonds, which are considered to be emerging market quality, have been priced more in line with bonds issued by developed countries such as the United States. Russia has become more politically stable and privatization has appeared to be working, especially in the oil industry.

Selected stocks added to the fund's performance, including Nextel, Chesapeake Energy, and Cooper Cameron. Nextel preferred stock was one of our most successful holdings. Nextel experienced good cash flows and saw revenues rise. The company has a large and loyal base of business subscribers who enjoy the cost savings provided by its popular two-way messaging service. Chesapeake, a natural gas producer, turned in strong results for the fund as did Cooper Cameron, a manufacturer of oil and gas pressure control equipment.

WEAKNESS FROM EMERGING MARKET DEBT, HIGH YIELD, AND SELECTED STOCKS

Our positions in emerging market debt (except Mexico and Russia), our high-yield bond holdings in the telecommunications and cable industries, and mixed performance in the equity market caused the fund's NAV performance to suffer. Despite good results earlier in the period, emerging market bonds have underperformed at the end of the period. Even though the fund had very little direct exposure to Brazil, the economic and political uncertainty in that country hurt our holdings throughout Latin America. Charter Communications and Adelphia were the worst performers among our corporate bond holdings because of accounting problems at both cable companies.

The stock portion of the fund's portfolio reflected weak stock returns in general; however, the fund's focus on value stocks (those that sell well below what their financial statements may indicate is their real worth) helped to prop up performance somewhat during the broad market declines the past year. Specific issues hurt fund performance. Examples include Owens Illinois, whose pending asbestos claims worry investors (even though those claims are covered for the most part by the firm's insurance), and Calpine, an energy producer with too much generating capacity for the current level of demand. Atlantis Plastics, a plastic products manufacturer, also performed poorly as a result of industry overcapacity, raw material price increases, and overall economic weakness.

INCOME AND APPRECIATION POTENTIAL FROM 2002'S DECLINES

We have made a number of shifts in portfolio holdings to maintain both the fund's 10% income objective and its capital appreciation potential. Although past performance is no guarantee of future results, we believe the high-yield market may be attractive long term because there is a historically high difference in yield between high-yield bonds and U.S. Treasuries (the principal value and interest on Treasury securities are guaranteed by the U.S. government if held to maturity). In our view, that potential income may help

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

cushion potential near-term volatility. In addition, we have seen signs that the rate at which companies fail to make interest or principal payments appears to have stabilized.

We are searching for value among fallen technology and telecommunications securities, two of the hardest hit industries in the past year. We believe that many good companies that don't have accounting problems were taken down by a few of their more aggressive competitors. We also feel that many BB-rated collateralized mortgage-backed securities are stronger than their credit ratings or prices indicate. In addition to offering attractive yields, these bonds offer good capital appreciation potential, in our view.

We are generally optimistic about the future of the high-yield sector and the stock market, although we expect continued volatility over the near term. We will continue to seek out opportunities that offer compelling yields supported by strong business fundamentals.

Respectfully,

/s/ John F. Addeo

John F. Addeo
Portfolio Manager

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as state on the cover. These views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The portfolio is actively managed, and current holdings may be different.

It is not possible to invest directly in an index.

PORTFOLIO MANAGER'S PROFILE

JOHN F. ADDEO, CFA, IS VICE PRESIDENT OF MFS INVESTMENT MANAGEMENT(R) (MFS(R)) AND PORTFOLIO MANAGER OF THE HIGH-YIELD BOND PORTFOLIOS OF OUR MUTUAL FUNDS AND CLOSED-END FUNDS.

JOHN JOINED MFS AS A RESEARCH ANALYST IN 1998. HE BECAME VICE PRESIDENT IN 1999, ASSOCIATE PORTFOLIO MANAGER IN 2000, AND PORTFOLIO MANAGER IN 2001. PREVIOUSLY, HE WAS A QUANTITATIVE ANALYST AND A VICE PRESIDENT IN THE HIGH-YIELD GROUPS OF SEVERAL MAJOR INVESTMENT COMPANIES.

HE RECEIVED A BACHELOR OF SCIENCE DEGREE FROM SIENA COLLEGE IN 1984. HE HOLDS THE CHARTERED FINANCIAL ANALYST (CFA) DESIGNATION.

ALL PORTFOLIO MANAGERS AT MFS ARE SUPPORTED BY AN INVESTMENT STAFF OF OVER 160 PROFESSIONALS UTILIZING MFS ORIGINAL RESEARCH(R), A GLOBAL, ISSUER-ORIENTED, BOTTOM-UP PROCESS OF SELECTING SECURITIES.

ADDRESS CHANGE

Please use our new mailing address, effective immediately:

State Street Bank and Trust Company

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

P.O. Box 55024
Boston, MA 02205-5024

OBJECTIVE: To maintain an annual distribution rate of 10% based on its average daily net asset value (NAV), while seeking opportunities for capital appreciation.

NEW YORK STOCK EXCHANGE SYMBOL: MFV

PERFORMANCE SUMMARY

(For the year ended October 31, 2002)

NET ASSET VALUE PER SHARE

October 31, 2001	\$ 8.63
October 31, 2002	\$ 7.50

NEW YORK STOCK EXCHANGE PRICE

October 31, 2001	\$14.30
November 26, 2001 (high)*	\$15.80
October 10, 2002 (low)*	\$ 6.74
October 31, 2002	\$ 7.25

*For the period November 1, 2001, through October 31, 2002.

In accordance with Section 23(c) of the Investment Company Act of 1940, the trust hereby gives notice that it may from time to time repurchase shares of the trust in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.

RISK CONSIDERATIONS

The portfolio may invest in derivative securities which may include futures and options. These types of instruments can increase price fluctuation.

Investments in lower-rated securities may provide greater returns but may have greater-than-average risk.

As a nondiversified portfolio, the portfolio invests in a limited number of companies and may have more risk because a change in one security's value may have a more significant effect on the portfolio's net asset value. An investment in the portfolio is not a complete investment program.

Government guarantees apply to the underlying securities only and not to the prices and yields of the portfolio.

The trust's shares may trade at a discount to net asset value. Shareholders do not have the right to cause the trust to repurchase their shares at net asset value. The trust's shares also may trade at a premium to their net asset value. When trust shares trade at a premium, buyers pay more than the asset value underlying trust shares, and shares purchased at a premium would receive less than the amount paid for them in the event of the trust's liquidation.

The trust's monthly distributions may include a return of capital to shareholders. Distributions that are treated for federal income tax purposes as a return of capital will reduce each shareholder's basis in his or her shares and, to the extent the distribution exceeds such basis, will be treated

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

as gain to the shareholder from a sale of shares. Returns of shareholder capital have the effect of reducing the trust's assets and increasing the trust's expense ratio.

The trust's target annual distribution rate is calculated based on the trust's average daily net asset value, not a fixed share price, and the trust's dividend amount will fluctuate with changes in the trust's average daily net asset value.

These risks may increase share price volatility. Please see the prospectus for details.

NUMBER OF SHAREHOLDERS

As of October 31, 2002, our records indicate that there are 747 registered shareholders and approximately 5,500 shareholders owning trust shares in "street" name, such as through brokers, banks, and other financial intermediaries.

If you are a "street" name shareholder and wish to directly receive our reports, which contain important information about the Trust, please write or call:

State Street Bank and Trust Company
P.O. Box 8200
Boston, MA 02266-8200
1-800-637-2304

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

MFS offers a Dividend Reinvestment and Cash Purchase Plan that allows you to reinvest either all of the distributions paid by the trust or only the long-term capital gains. Purchases are made at the market price unless that price exceeds the net asset value (the shares are trading at a premium). If the shares are trading at a premium, purchases will be made at a discounted price of either the net asset value or 95% of the market price, whichever is greater. Twice each year you can also buy shares. Investments of \$100 or more can be made in January and July on the 15th of the month or shortly thereafter.

If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the plan on your behalf. If the nominee does not offer the plan, you may wish to request that your shares be re-registered in your own name so that you can participate.

There is no service charge to reinvest distributions, nor are there brokerage charges for shares issued directly by the trust. However, when shares are bought on the New York Stock Exchange or otherwise on the open market, each participant pays a pro rata share of the commissions. The automatic reinvestment of distributions does not relieve you of any income tax that may be payable (or required to be withheld) on the distributions.

To enroll in or withdraw from the plan, or if you have any questions call 1-800-637-2304 any business day from 8 a.m. to 8 p.m. Eastern time. Please have available the name of the trust and your account and Social Security numbers. For certain types of registrations, such as corporate accounts, instructions must be submitted in writing. Please call for additional details. When you withdraw, you can receive the value of the reinvested shares in one of two ways: a check for the value of the full and fractional shares, or a certificate for the full shares and a check for the fractional shares.

RESULTS OF SHAREHOLDER MEETINGS (Unaudited)

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

At the annual meeting of shareholders of MFS Special Value Trust, which was held on October 1, 2002, the following actions were taken:

ITEM 1. Trustees of the trust were elected as follows:

NOMINEE	NUMBER OF SHARES	
	FOR	WITHHOLD AUTHORITY
William R. Gutow	5,905,773.675	245,349.175
J. Atwood Ives	5,899,664.675	251,458.175
Abby M. O'Neill	5,889,361.675	261,761.175
Jeffrey L. Shames	5,904,368.675	246,754.175

ITEM 2. The ratification of the election of Ernst & Young LLP as the independent public accountants to be employed by the trust for the fiscal year ending October 31, 2002.

NUMBER OF SHARES	
Affirmative	5,997,000.214
Against	69,901.932
Abstain	84,220.704

NOTES TO FINANCIAL STATEMENTS

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

(1) Business and Organization

MFS Special Value Trust (the trust) is organized as a Massachusetts business trust and is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company.

(2) Significant Accounting Policies

General - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The trust can invest in high-yield securities rated below investment grade. Investments in high-yield securities involve greater degrees of credit and market risk than investments in higher-rated securities and tend to be more sensitive to economic conditions. The trust can invest in foreign securities. Investments in foreign securities are vulnerable to the effects of changes in the relative values of the local currency and the U.S. dollar and to the effects of changes in each country's legal, political, and economic environment.

Investment Valuations - Debt securities (other than short-term obligations which mature in 60 days or less), including listed issues and forward foreign currency exchange contracts, are valued on the basis of valuations furnished by dealers or by a pricing service with consideration to factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics, and other market data, without exclusive reliance upon exchange or over-the-counter prices. Equity securities listed on securities exchanges or reported through the NASDAQ system are reported at market value using last sale prices. Unlisted equity securities or listed equity securities for which last sale prices are not available are reported at market value using last quoted bid prices. Short-term obligations, which mature in 60 days or less, are valued at amortized cost, which approximates market value. Options listed on commodities exchanges are reported at market value using closing settlement prices. Over-the-counter options on securities are valued by brokers. Over-the-counter currency options are valued through the use of a pricing model which takes into account foreign currency exchange spot and forward rates, implied volatility, and short-term repurchase rates. Securities for which there are no such quotations or valuations are valued in good faith at the direction of the Trustees.

Repurchase Agreements - The trust may enter into repurchase agreements with institutions that the trust's investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. The trust requires that the securities collateral in a repurchase transaction be transferred to the custodian in a manner sufficient to enable the trust to obtain those securities in the event of a default under the repurchase agreement. The trust monitors, on a daily basis, the value of the collateral to ensure that its value, including accrued interest, is greater than amounts owed to the trust under each such repurchase agreement. The trust, along with other affiliated entities of Massachusetts Financial Services Company (MFS), may utilize a joint trading account for the purpose of entering into one or more repurchase agreements.

Foreign Currency Translation - Investment valuations, other assets, and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates. Purchases and sales of foreign investments, income, and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions. Gains and losses attributable to foreign currency exchange rates on sales of securities are recorded for financial statement

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

purposes as net realized gains and losses on investments. Gains and losses attributable to foreign exchange rate movements on income and expenses are recorded for financial statement purposes as foreign currency transaction gains and losses. That portion of both realized and unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed.

Deferred Trustee Compensation - Under a Deferred Compensation Plan (the Plan) independent Trustees may elect to defer receipt of all or a portion of their annual compensation. Deferred amounts are treated as though equivalent dollar amounts had been invested in shares of the trust or other MFS trusts selected by the Trustee. Deferred amounts represent an unsecured obligation of the trust until distributed in accordance with the Plan.

Written Options - The trust may write call or put options in exchange for a premium. The premium is initially recorded as a liability, which is subsequently adjusted to the current value of the option contract. When a written option expires, the trust realizes a gain equal to the amount of the premium received. When a written call option is exercised or closed, the premium received is offset against the proceeds to determine the realized gain or loss. When a written put option is exercised, the premium reduces the cost basis of the security purchased by the trust. The trust, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option. In general, written call options may serve as a partial hedge against decreases in value in the underlying securities to the extent of the premium received. Written options may also be used as part of an income producing strategy reflecting the view of the trust's management on the direction of interest rates.

Security Loans - State Street Bank and Trust Company ("State Street"), as lending agent, may loan the securities of the trust to certain qualified institutions (the "Borrowers") approved by the trust. The loans are collateralized at all times by cash in an amount at least equal to the market value of the securities loaned. State Street provides the trust with indemnification against Borrower default. The trust bears the risk of loss with respect to the investment of cash collateral.

Cash collateral is invested in short-term securities. A portion of the income generated upon investment of the collateral is remitted to the Borrowers, and the remainder is allocated between the trust and the lending agent. Income from securities lending is included in interest income on the Statement of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income.

At October 31, 2002, the value of securities loaned was \$3,370,714. These loans were collateralized by cash of \$3,607,067 which was invested in the following short-term obligation:

	SHARES	IDENTIFIED COST AND VALUE
Navigator Securities Lending Prime Portfolio	3,607,067	\$3,607,067

Forward Foreign Currency Exchange Contracts - The trust may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The trust may enter into forward foreign currency exchange contracts for hedging purposes as well

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

as for non-hedging purposes. For hedging purposes, the trust may enter into contracts to deliver or receive foreign currency it will receive from or require for its normal investment activities. The trust may also use contracts in a manner intended to protect foreign currency-denominated securities from declines in value due to unfavorable exchange rate movements. For non-hedging purposes, the trust may enter into contracts with the intent of changing the relative exposure of the trust's portfolio of securities to different currencies to take advantage of anticipated changes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any gains or losses are recorded as unrealized until the contract settlement date. On contract settlement date, the gains or losses are recorded as realized gains or losses on foreign currency transactions.

Investment Transactions and Income - Investment transactions are recorded on the trade date. Interest income is recorded on the accrual basis. All premium and discount is amortized or accreted for financial statement purposes in accordance with generally accepted accounting principles. Dividends received in cash are recorded on the ex-dividend date. Dividend and interest payments received in additional securities are recorded on the ex-dividend or ex-interest date in an amount equal to the value of the security on such date. Legal fees and other related expenses incurred to preserve and protect the value of a security owned are added to the cost of the security; other legal fees are expensed. Capital infusions made directly to the security issuer, which are generally non-recurring, incurred to protect or enhance the value of high-yield debt securities, are reported as additions to the cost basis of the security. Costs that are incurred to negotiate the terms or conditions of capital infusions or that are expected to result in a plan of reorganization are reported as realized losses. Ongoing costs incurred to protect or enhance an investment, or costs incurred to pursue other claims or legal actions, are expensed.

Fees Paid Indirectly - The trust's custody fee is reduced according to an arrangement that measures the value of cash deposited with the custodian by the trust. During the period, the trust's custodian fees were reduced by \$22,043 under this arrangement. The trust has entered into a directed brokerage agreement, under which the broker will credit the trust a portion of the commissions generated, to offset certain expenses of the trust. For the period, the trust's custodian fees were reduced by \$3,078 under this agreement. These amounts are shown as a reduction of total expenses on the Statement of Operations.

Tax Matters and Distributions - The trust's policy is to comply with the provisions of the Internal Revenue Code (the Code) applicable to regulated investment companies and to distribute to shareholders all of its net taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is provided.

Distributions to shareholders are recorded on the ex-dividend date. The trust distinguishes between distributions on a tax basis and a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as distributions from paid-in capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits, which result in temporary over-distributions for financial statement purposes, are classified as distributions in excess of net investment income or net realized gains. Common types of book and tax differences that could occur include differences in accounting for currency transactions, derivatives, defaulted bonds, capital losses, and amortization and accretion on debt securities.

The tax character of distributions paid for the years ended October 31, 2002 and October 31, 2001 were as follows:

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

OCTOBER 31, 2002 OCTOBER 31, 2001

Distributions declared from:		
Ordinary income	\$6,461,758	\$ 5,427,231
Tax Return of capital	--	5,328,929
Total distributions declared	\$6,461,758	\$10,756,160
	=====	=====

During the year ended October 31, 2002, accumulated distributions in excess of net investment income decreased by \$1,285,419, accumulated net realized loss on investments and foreign currency transactions decreased by \$180,555, and paid-in capital decreased by \$1,465,974, primarily due to differences between book and tax accounting for foreign currency transactions, defaulted bonds and amortization and accretion on debt securities. At October 31, 2002, accumulated distributions in excess of net investment income and accumulated distributions in excess of net realized gain on investments and foreign currency transactions under book accounting were different from tax accounting due to temporary differences in accounting for foreign currency transactions, capital losses, defaulted bonds and amortization and accretion on debt securities. This change had no effect on the net assets or net asset value per share.

As of October 31, 2002, the components of distributable earnings (accumulated losses) on a tax basis were as follows:

Capital loss carryforward	\$ (151,293)
Unrealized loss	(22,729,932)
Other temporary differences	(2,384,107)

For federal income tax purposes, the capital loss carryforward may be applied against any net taxable realized gains of each succeeding year until the earlier of its utilization or expiration on October 31, 2009.

(3) Transactions with Affiliates

Investment Adviser - The trust has an investment advisory agreement with Massachusetts Financial Services Company (MFS) to provide overall investment advisory and administrative services, and general office facilities.

The management fee is computed daily and paid monthly at an annual rate of 0.68% of the trust's average daily net assets and 3.40% of investment income.

The trust pays the compensation of the Independent Trustees in the form of both a retainer and attendance fees and pays no compensation directly to its Trustees who are officers of the investment adviser, or to officers of the trust, all of whom receive remuneration for their services to the trust from MFS. Certain officers and Trustees of the trust are officers or directors of MFS and MFS Service Center, Inc. (MFSC). On January 1, 2002, the Trustees terminated the Independent Trustee unfunded defined benefit plan for active Trustees and converted it to an unfunded retirement benefit deferral plan for active Trustees. Under the new plan, the unfunded pension liability was converted into an equivalent value of notional shares of the trust that will fluctuate with the performance of the trust. Included in Trustees' compensation is a net decrease of \$9,594 as a result of the change in the trust's pension liability under this plan and a pension expense of \$8,346 for inactive trustees, for the year ended October 31, 2002. Also included in Trustees' compensation is a one-time plan settlement expense of \$2,123 and a one-time plan transition expense of \$39,976.

Administrator - The trust has an administrative services agreement with MFS to provide the trust with certain financial, legal, shareholder communications, compliance, and other administrative services. As a partial reimbursement for

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

the cost of providing these services, the trust pays MFS an administrative fee at the following annual percentages of the trust's average daily net assets:

First \$2 billion	0.0175%
Next \$2.5 billion	0.0130%
Next \$2.5 billion	0.0005%
In excess of \$7 billion	0.0000%

Transfer Agent - MFSC acts as registrar and dividend disbursing agent for the Trust. The agreement provides that the Trust will pay MFSC an account maintenance fee of no more than \$9.00 and a dividend services fee of \$0.75 per reinvestment and will reimburse MFSC for reasonable out-of-pocket expenses.

(4) Portfolio Securities

Purchases and sales of investments, other than purchased option transactions and short-term obligations, were as follows:

	PURCHASES	SALES
U.S. government securities	\$ --	\$ 6,126,438
Investments (non-U.S. government securities)	\$71,247,158	\$69,599,619

The cost and unrealized appreciation and depreciation in the value of the investments owned by the trust, as computed on a federal income tax basis, are as follows:

Aggregate cost	\$ 71,992,971
Gross unrealized depreciation	\$ (24,950,031)
Gross unrealized appreciation	2,219,715
Net unrealized depreciation	\$ (22,730,316)

(5) Shares of Beneficial Interest The trust's Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest. The Trustees have authorized 6,620,146.062 full and fractional shares of beneficial interest. Transactions in trust shares were as follows:

	YEAR ENDED OCTOBER 31, 2002		YEAR ENDED OCTOBER 31, 2001	
	SHARES	AMOUNT	SHARES	AMOUNT
Shares issued to shareholders in reinvestment of distributions	63,689	\$632,359	82,629	\$1,148,652

(6) Line of Credit

The trust and other affiliated funds participate in an \$800 million unsecured line of credit provided by a syndication of banks under a line of credit agreement. Borrowings may be made for temporary financing needs. Interest is charged to each fund, based on its borrowings, at a rate equal to the bank's base rate. A commitment fee of \$482 which is based on the average daily unused portion of the line of credit is included in interest expense. The trust had no significant borrowings during the year.

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

(7) Financial Instruments

The trust trades financial instruments with off-balance-sheet risk in the normal course of its investing activities in order to manage exposure to market risks such as interest rates and foreign currency exchange rates. These financial instruments include written options and forward foreign currency exchange contracts. The notional or contractual amounts of these instruments represent the investment the trust has in particular classes of financial instruments and does not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered.

Forward Foreign Currency Exchange Contracts - At October 31, 2002, forward foreign currency purchases and sales under master netting agreements amounted to a net payable of \$19,262 with DB Clearing Services.

At October 31, 2002, the trust had sufficient cash and/or securities to cover any commitments under these contracts.

(8) Restricted Securities

The trust may invest not more than 20% of its total assets in securities which are subject to legal or contractual restrictions on resale. At October 31, 2002, the trust owned the following restricted securities, excluding securities issued under Rule 144A, constituting 1.47% of net assets which may not be publicly sold without registration under the Securities Act of 1933. The trust does not have the right to demand that such securities be registered. The value of these securities is determined by valuations furnished by dealers or by a pricing service, or if not available, in good faith at the direction of the Trustees.

DESCRIPTION	ACQUISITION	AMOUNT	COST
Atlantic Gulf Communities Corp.	9/25/95	250	\$ --
DLJ Mortgage Acceptance Corp., 8s, 2003	4/6/01	803,000	484,738

9) Change in Accounting Principle

As required, effective November 1, 2001 the fund adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium and accreting discount on all debt securities. The cumulative effect of this accounting change had no impact on total net assets of the fund, but resulted in a \$99,487 increase in cost of securities and a corresponding \$99,487 increase in net unrealized depreciation, based on securities held by the fund on November 1, 2001.

The effect of this change for the year ended October 31, 2002, was to increase net investment income by \$142,315, increase net unrealized depreciation by \$143,850, and decrease net realized losses by \$1,535. The Statement of Changes in Net Assets and Financial Highlights for prior periods have not been restated to reflect this change in presentation.

REPORT OF ERNST & YOUNG LLP, INDEPENDENT AUDITORS

To the Trustees and Shareholders of MFS Special Value Trust:

We have audited the accompanying statement of assets and liabilities of MFS

Edgar Filing: MFS SPECIAL VALUE TRUST - Form N-30D

Special Value Trust (the Trust), including the portfolio of investments, as of October 31, 2002, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of securities owned as of October 31, 2002, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the MFS Special Value Trust at October 31, 2002, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and its financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States.

The Trust holds annual shareholder meetings for the purpose of electing Trustees, and Trustees are elected for fixed terms. The Board of Trustees currently is divided into three classes, each having a term of one year. Each year the term of one class expires. Each Trustee's term of office expires on the date of the meeting following the election to office of the Trustee's class. Each Trustee will serve until his or her earlier death, resignation, retirement or removal.

Messrs. Shames, Cohn, Gibbons, Sherratt and Smith, and Ms. O'Neil have served in their capacity as Trustees of the Trust continuously since originally elected or appointed. Messrs. Ballen, Gutow, Ives, Perera and Ms. Smith were elected by shareholders and have served as Trustees of the Trust since January 1, 2002. Parke has served as Trustee of the Trust since January 1, 2002.

Each of the Trust's Trustees and officers holds comparable positions with certain other funds of the Trust. A subsidiary is the investment adviser or distributor and, in the case of the officers, with certain other affiliates of MFS. Each Trustee serves as a board member of 117 funds within the MFS Family of Funds.

The Statement of Additional Information contains further information about the Trustees and is available without charge upon request, by calling 1-800-225-2606.
