Section 2 - Financial Information

Item 2.02 Results of Operations and Financial Condition.

On April 27, 2006, Bay National Corporation (the "Company") issued a press release announcing its earnings for the quarter ended March 31, 2006.

Among other figures, the press release presents a comparison of diluted net income per share before income taxes for the quarter ended March 31, 2006 compared to net income per diluted share for the quarter ended March 31, 2005. Because the Company had no income tax expense during the quarter ended March 31, 2005, a comparison of the Company's net income per diluted share, which would include the impact of taxes for the quarter ended March 31, 2006, could obscure the impact of changes in the Company's operations. Therefore, management believes that the comparison provides investors with a more accurate period-to-period comparison of the per-share impact of changes in the Company's operations.

The press release also reports that core deposits rose 25.3% year-over-year to \$152.6 million at March 31, 2006. Core deposits, which management categorizes as all deposits other than national market certificates of deposit and all but \$5.0 million in deposits from three accounts with highly variable balances, are closely monitored by management because they consider them not only a relatively stable source of funding but also reflective of the growth of commercial and consumer depository relationships.

The press release is furnished as Exhibit 99.1 hereto.
