FBL FINANCIAL GROUP INC
Form 10-Q
August 04, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D. C. 20549

FORM 10-Q

(Mark one)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-11917
(Exact name of registrant as specified in its charter)

Iowa 42-1411715
(State or other jurisdiction of incorporation or (I.R.S. Employer Identification No.)
organization)

5400 University Avenue, West Des Moines, Iowa 50266-5997
(Address of principal executive offices) (Zip Code)

(515) 225-5400
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). ☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Edgar Filing: FBL FINANCIAL GROUP INC - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). ☐ Yes ☒ No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Title of each class	Outstanding at July 31, 2015
Class A Common Stock, without par value	24,766,993
Class B Common Stock, without par value	11,413

(This page has been intentionally left blank.)

FBL FINANCIAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

June 30, 2015

1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements of FBL Financial Group, Inc. (we or the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Our financial statements include all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of our financial position and results of operations.

Operating results for the six-month period ended June 30, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015. We encourage you to refer to our consolidated financial statements and notes for the year ended December 31, 2014 included in our Annual Report on Form 10-K for a complete description of our material accounting policies. Also included in the Form 10-K is a description of areas of judgments and estimates and other information necessary to understand our financial position and results of operations.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued guidance that outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers, which supersedes most current revenue recognition guidance, including industry-specific guidance. Although insurance contracts are specifically excluded from the scope of this guidance, almost all entities will be affected to some extent by the significant increase in required disclosures. The new guidance is based on the principle that an entity should recognize revenue to reflect the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of the new standard, which becomes effective for fiscal years beginning after December 15, 2017; early adoption is not permitted. We are currently evaluating the impact of this new guidance on our consolidated financial statements.

In February 2015, the FASB issued guidance that amends existing consolidation guidance. The new guidance modifies the consolidation framework for certain investment entities and all limited partnerships. It also eliminates certain criteria used to determine whether fees paid to a decision maker are a variable interest. The amendment allows for either a full retrospective or modified approach at adoption of the new standard, which becomes effective for fiscal years beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. We are currently evaluating the impact of this new guidance on our consolidated financial statements.

Total equity securities	\$107,410	\$5,873	\$(660)) \$112,623	

Non-credit losses, subsequent to the initial impairment measurement date, on other-than-temporary impairment (OTTI) losses are included in the gross unrealized gains and gross unrealized losses columns above. The non-credit (1) loss component of OTTI losses for corporate and other asset-backed securities were in an unrealized gain position at June 30, 2015 and December 31, 2014 due to increases in estimated fair value subsequent to initial recognition of non-credit losses on such securities.

Corporate securities include hybrid preferred securities with a carrying value of \$53.8 million at June 30, 2015 and (2) \$80.9 million at December 31, 2014. Corporate securities also include redeemable preferred stock with a carrying value of \$29.8 million at June 30, 2015 and \$29.9 million at December 31, 2014.

Table of Contents

Available-For-Sale Fixed Maturities by Maturity Date

	June 30, 2015	
	Amortized	Estimated
	Cost	Fair Value
	(Dollars in thousands)	
Due in one year or less	\$66,547	\$67,499
Due after one year through five years	731,130	804,778
Due after five years through ten years	851,690	912,488
Due after ten years	3,079,960	3,256,001
	4,729,327	5,040,766
Mortgage-backed and other asset-backed	1,506,173	1,585,062
Total fixed maturities	\$6,235,500	\$6,625,828

Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Fixed maturities not due at a single maturity date have been included in the above table in the year of final contractual maturity.

Net Unrealized Gains (Losses) on Investments in Accumulated Other Comprehensive Income

	June 30, 2015	December 31, 2014
	(Dollars in thousands)	
Net unrealized appreciation on:		
Fixed maturities - available for sale	\$390,328	\$589,265
Equity securities - available for sale	4,078	5,213
	394,406	594,478
Adjustments for assumed changes in amortization pattern of:		
Deferred acquisition costs	(111,878)	(179,544)
Value of insurance in force acquired	(3,720)	(3,939)
Unearned revenue reserve	5,398	11,461
Adjustments for assumed changes in policyholder liabilities	(6,295)	(11,182)
Provision for deferred income taxes	(97,255)	(143,932)
Net unrealized investment gains	\$180,656	\$267,342

Net unrealized investment gains and losses are recorded net of deferred income taxes and other adjustments for assumed changes in deferred acquisition costs, value of insurance in force acquired, unearned revenue reserve and policyholder liabilities. Subsequent changes in the fair value of securities for which a previous non-credit OTTI loss was recognized in accumulated other comprehensive income, are reported along with changes in fair value for which no OTTI losses were previously recognized.

Fixed maturities in the above tables include 416 securities from 342 issuers at June 30, 2015 and 185 securities from 160 issuers at December 31, 2014. We do not intend to sell or believe we will be required to sell any of our temporarily-impaired fixed maturities before recovery of their amortized cost basis. The following summarizes the more significant unrealized losses of fixed maturities and equity securities by investment category as of June 30, 2015.

Corporate securities: The largest unrealized losses were in the utilities sector (\$252.0 million carrying value and \$13.1 million unrealized loss) and the energy sector (\$124.2 million carrying value and \$12.6 million unrealized loss). The largest unrealized losses in the utilities sector were in the gas pipeline (\$73.2 million carrying value and \$6.5 million unrealized loss) and the electric (\$158.0 million carrying value and \$6.1 million unrealized loss) sub-sectors. The largest unrealized losses in the energy sector were in the oil field services (\$37.5 million carrying value and \$5.6 million unrealized loss) and the energy independent (\$46.3 million carrying value and \$4.9 million unrealized loss) sub-sectors. The majority of losses were primarily attributable to the general increase in Treasury yields and credit spread widening across the utility and energy sectors.

Table of Contents

Residential mortgage-backed securities: The unrealized losses on residential mortgage-backed securities were primarily due to continued uncertainty regarding mortgage defaults on Alt-A loans. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on mortgages and other assets backing the securities.

Other asset-backed securities: The unrealized losses on other asset-backed securities were primarily due to market concerns regarding defaults on subprime mortgages and home equity loans. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on mortgages and other assets backing the securities.

State, municipal and other governments: The unrealized losses on state, municipal and other governments were primarily due to general spread widening relative to spreads at which we acquired the bonds.

Excluding mortgage- and asset-backed securities, no securities from the same issuer had an aggregate unrealized loss in excess of \$2.2 million at June 30, 2015, with the largest unrealized loss from an energy service provider. With respect to mortgage- and asset-backed securities not backed by the United States Government, our largest aggregate unrealized loss from the same issuer at June 30, 2015 was \$3.6 million, consisting of two different securities that are backed by different pools of Alt-A residential mortgage loans. Both securities are rated non-investment grade and the largest unrealized loss totaled \$2.2 million.

The carrying values of all our investments are reviewed on an ongoing basis for credit deterioration. When our review indicates a decline in fair value for a fixed maturity security is an OTTI and we do not intend to sell or believe we will be required to sell the security before recovery of our amortized cost, a specific write down is charged to earnings for the credit loss and a specific charge is recognized in accumulated other comprehensive income for the non-credit loss component. If we intend to sell or believe we will be required to sell a fixed maturity security before its recovery, the full amount of the impairment write down to fair value is charged to earnings. For all equity securities, the full amount of an OTTI write down is recognized as a realized loss on investments in the consolidated statements of operations and the new cost basis for the security is equal to its fair value.

We monitor the financial condition and operations of the issuers of fixed maturities and equity securities that could potentially have a credit impairment that is an OTTI. In determining whether or not an unrealized loss is an OTTI, we review factors such as:

- historical operating trends;
- business prospects;
- status of the industry in which the company operates;
- analyst ratings on the issuer and sector;
- quality of management;
- size of unrealized loss;
- level of current market interest rates compared to market interest rates when the security was purchased; and
- length of time the security has been in an unrealized loss position.

In order to determine the credit and non-credit impairment loss for fixed maturities, every quarter we estimate the future cash flows we expect to receive over the remaining life of the instrument as well as review our plans to hold or sell the instrument. Significant assumptions regarding the present value of expected cash flows for each security are used when an OTTI occurs and there is a non-credit portion of the unrealized loss that won't be recognized in earnings. Our assumptions for residential mortgage-backed securities, commercial mortgage-backed securities and other asset-backed securities include collateral pledged, guarantees, vintage, anticipated principal and interest payments, prepayments, default levels, severity assumptions, delinquency rates and the level of nonperforming assets

for the remainder of the investments' expected term. We use a single best estimate of cash flows approach and use the effective yield prior to the date of impairment to calculate the present value of cash flows. Our assumptions for corporate and other fixed maturities include anticipated principal and interest payments and an estimated recovery value, generally based on a percentage return of the current fair value.

After an OTTI write down of all equity securities and any fixed maturities with a credit-only impairment, the cost basis is not adjusted for subsequent recoveries in fair value. For fixed maturities for which we can reasonably estimate future cash flows after a write down, the discount or reduced premium recorded, based on the new cost basis, is amortized over the remaining life of the security. Amortization in this instance is computed using the prospective method and the current estimate of the amount and timing of future cash flows.

Table of Contents

Credit Loss Component of Other-Than-Temporary Impairments on Fixed Maturities

	Six months ended June 30,	
	2015	2014
	(Dollars in thousands)	
Balance at beginning of period	\$ (16,772) \$ (21,592
Reductions due to investments sold	496	4,362
Balance at end of period	\$ (16,276) \$ (17,230

The table above sets forth the amount of credit loss impairments on fixed maturities held by the Company as of the dates indicated for which a portion of the OTTI was recognized in other comprehensive income (loss) and corresponding changes in such amounts.

Realized Gains (Losses) - Recorded in Income

	Three months ended June 30,		Six months ended June 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Realized gains (losses) on sales of investments				
Fixed maturities:				
Gross gains	\$2,528	\$2,811	\$2,748	\$2,908
Gross losses	(1,017) (5) (1,603) (642
Securities and indebtedness of related parties	6,457	—	6,457	—
Net realized gains on investments recorded in income	\$7,968	\$2,806	7,602	2,266
Impairment losses recognized in earnings:				
Other credit-related (1)	(160) —	(160) —
Net realized gains on investments recorded in income	\$7,808	\$2,806	\$7,442	\$2,266

(1) Amount represents the credit-related losses recognized for real estate written down to fair value.

Proceeds from sales of fixed maturities totaled \$69.2 million during the six months ended June 30, 2015 and \$30.9 million during the six months ended June 30, 2014.

The realized gain on securities and indebtedness of related parties relates to a partnership investment's underlying asset sold at a gain and the dissolution of the partnership during the second quarter of 2015.

Realized gains and losses on sales of investments are determined on the basis of specific identification.

Mortgage Loans

Our mortgage loan portfolio consists principally of commercial mortgage loans that we have originated. Our lending policies require that the loans be collateralized by the value of the related property, establish limits on the amount that can be loaned to one borrower and require diversification by geographic location and collateral type. We originate loans with an initial loan-to-value ratio that provides sufficient excess collateral to absorb losses should we be required to foreclose and take possession of the collateral. In order to identify impairment losses, management maintains and regularly reviews a watch list of mortgage loans that have heightened risk. These loans may include those with borrowers delinquent on contractual payments, borrowers experiencing financial difficulty, increases in rental real estate vacancies and significant declines in collateral value. We evaluate each of our mortgage loans individually and establish an estimated loss, if needed, for each impaired loan identified. An estimated loss is needed for loans for which we do not believe we will collect all amounts due according to the contractual terms of the

respective loan agreements.

Any loan delinquent on contractual payments is considered non-performing. At June 30, 2015 and December 31, 2014, there were no non-performing loans over 90 days past due on contractual payments. Interest income is accrued on impaired loans to the extent it is deemed collectible (delinquent less than 90 days) and the loan continues to perform under its original or restructured contractual terms. Interest income on non-performing loans is generally recognized on a cash basis. Once mortgage

Table of Contents

loans are classified as nonaccrual loans, the resumption of the interest accrual would commence only after all past-due interest has been collected or the mortgage loan has been restructured such that the collection of interest is considered likely.

Mortgage Loans by Collateral Type

Mortgage Loan Modifications

Our commercial mortgage loan portfolio includes loans that have been modified. We assess loan modifications on a loan-by-loan basis to evaluate whether a troubled debt restructuring has occurred. Generally, the types of concessions include: reduction of the contractual interest rate to a below-market rate, extension of the maturity date and/or a reduction of accrued interest. The amount, timing and extent of the concession granted is considered in determining if an impairment loss is needed for the restructuring.

There were no loan modifications during the first two quarters of 2015 or of 2014.

Variable Interest Entities

We evaluate our variable interest entity (VIE) investees to determine whether the level of our direct ownership interest, our rights to manage operations or our obligation to provide ongoing financial support are such that we are the primary beneficiary of the entity, and would therefore be required to consolidate it for financial reporting purposes. None of our VIE investees were required to be consolidated for any reporting periods presented in this Form 10-Q. Our VIE investments are as follows:

	June 30, 2015		December 31, 2014	
	Carrying Value	Maximum Exposure to Loss	Carrying Value	Maximum Exposure to Loss
	(Dollars in thousands)			
Real estate limited partnerships	\$16,422	\$16,422	\$17,046	\$17,046

Table of Contents

We make commitments to fund partnership investments in the normal course of business. We did not have any commitments to investees designated as VIEs as of June 30, 2015 or December 31, 2014.

Other

At June 30, 2015, we had committed to provide \$44.3 million of additional funds for limited partnerships and limited liability companies in which we invest.

Derivative Instruments

We are not significantly involved in hedging activities and have limited exposure to derivatives. We do not apply hedge accounting to any of our derivative positions. Derivative assets, which are primarily reported in reinsurance recoverable and other investments, totaled \$6.5 million at June 30, 2015 and \$7.1 million at December 31, 2014. Securities collateral received of \$2.1 million at June 30, 2015 is held in a separate custodial account and not recorded on the balance sheet. Our derivative assets consist of derivatives embedded within our modified coinsurance agreements and call options which provide an economic hedge for our index annuity contracts. Derivative liabilities totaled \$8.7 million at June 30, 2015 and \$8.7 million at December 31, 2014 and include derivatives embedded within our index annuity contracts and derivatives embedded within our modified coinsurance agreements. The net gain recognized on these derivatives is included in net investment income and interest sensitive benefits.

Net gain (loss) recognized on these derivatives totaled \$(0.4) million for the quarter ended June 30, 2015 and \$1.3 million for the same period in 2014 and totaled \$(0.1) million for the six-months ended June 30, 2015 and \$1.8 million for the same period in 2014.

3. Fair Values

The carrying and estimated fair values of our financial instruments are as follows:

Fair Values and Carrying Values

	June 30, 2015		December 31, 2014

Liabilities related to separate accounts	676,045	670,691	683,033	677,040

Fair value is based on an exit price, which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As not all financial instruments are actively traded,

Table of Contents

various valuation methods may be used to estimate fair value. These methods rely on observable market data and where observable market data is not available, the best information available. Significant judgment may be required to interpret the data and select the assumptions used in the valuation estimates, particularly when observable market data is not available.

In the discussion that follows, we have ranked our financial instruments by the level of judgment used in the determination of the fair values presented above. The levels are defined as follows:

Level 1 - Fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Fair values are based on inputs, other than quoted prices from active markets, that are observable for the asset or liability, either directly or indirectly.

Level 3 - Fair values are based on significant unobservable inputs for the asset or liability.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. From time to time there may be movements between levels as inputs become more or less observable, which may depend on several factors including the activity of the market for the specific security, the activity of the market for similar securities, the level of risk spreads and the source from which we obtain the information. Transfers into or out of any level are measured as of the beginning of the period.

The following methods and assumptions were used in estimating the fair value of our financial instruments:

Fixed maturities:

Level 1 fixed maturities consist of U.S. Treasury issues that are actively traded, allowing us to use current market prices as an estimate of their fair value.

Level 2 fixed maturities consist of corporate, mortgage- and asset-backed, United States Government agencies, state and municipal and private placement securities with observable market data, and in some circumstances recent trade activity. When quoted prices of identical assets in active markets are not available, our first priority is to obtain prices from third party pricing vendors. We have regular interaction with these vendors to ensure we understand their pricing methodologies and to confirm they are utilizing observable market information. Their methodologies vary by asset class and include inputs such as estimated cash flows, benchmark yields, reported trades, credit quality, industry events and economic events. Fixed maturities with validated prices from pricing services, which includes the majority of our public fixed maturities in all asset classes, are generally reflected in Level 2.

Also included in Level 2 are private placement corporate bonds where quoted market prices are not available, for which an internal model using substantially all observable inputs or a matrix pricing valuation approach is used. In the matrix approach, securities are grouped into pricing categories that vary by sector, rating and average life. Each pricing category is assigned a risk spread based on studies of observable public market data. The expected cash flows of the security are then discounted back at the current Treasury curve plus the appropriate risk spread.

Level 3 fixed maturities include corporate, mortgage- and asset-backed, United States Government agencies and private placement securities for which there is little or no current market data available. We use external pricing sources, or if prices are not available we will estimate fair value internally. Fair values of private investments in Level

3 are determined by reference to the public market, private transactions or valuations for comparable companies or assets in the relevant asset class when such amounts are available. For other securities where an exit price based on relevant observable inputs is not obtained, the fair value is determined using a matrix calculation. Fair values estimated through the use of matrix pricing methods rely on an estimate of credit spreads to a risk-free U.S. Treasury yield. Selecting the credit spread requires judgment based on an understanding of the security and may include a market liquidity premium. Our selection of comparable companies as well as the level of spread requires significant judgment. Increases in spreads used in our matrix models, or those used to value comparable companies, will result in a decrease in discounted cash flows used, and accordingly in the estimated fair value of the security.

We obtain fixed maturity fair values from a variety of external independent pricing services, including brokers, with access to observable data including recent trade information, if available. In certain circumstances in which an external price is not

Table of Contents

available for a Level 3 security, we will internally estimate its fair value. Our process for evaluation and selection of the fair values includes:

We follow a “pricing waterfall” policy, which establishes the pricing source preference for a particular security or security type. The order of preference is based on our evaluation of the valuation methods used, the source's knowledge of the instrument and the reliability of the prices we have received from the source in the past. Our valuation policy dictates that fair values are initially sought from third party pricing services. If our review of the prices received from our preferred source indicates an inaccurate price, we will use an alternative source within the waterfall and document the decision. In the event that fair values are not available from one of our external pricing services or upon review of the fair values provided it is determined that they may not be reflective of market conditions, those securities are submitted to brokers familiar with the security to obtain non-binding price quotes. Broker quotes tend to be used in limited circumstances such as for newly issued, private placement and other instruments that are not widely traded. For those securities for which an externally provided fair value is not available, we use cash flow modeling techniques to estimate fair value.

• We evaluate third party pricing source estimation methodologies to assess whether they will provide a fair value which approximates a market exit price.

• We perform an overall analysis of portfolio fair value movement against general movements in interest rates and spreads.

• We compare period-to-period price trends to detect unexpected price fluctuation based on our knowledge of the market and the particular instrument. As fluctuations are noted, we will perform further research which may include discussions with the original pricing source or other external sources to ensure we are in agreement with the valuation.

• We compare prices between different pricing sources for unusual disparity.

• We meet at least quarterly with our Investment Committee, the group that oversees our valuation process, to discuss valuation practices and observations during the pricing process.

Equity securities:

Level 1 equity securities consist of listed common stocks and mutual funds that are actively traded, allowing us to use current market prices as an estimate of their fair value.

Level 2 equity securities consist of common stock issued by the Federal Home Loan Bank of Des Moines (FHLB), with estimated fair value based on the current redemption value of the shares and non-redeemable preferred stock. Estimated fair value is obtained from external pricing sources using a matrix pricing approach.

Level 3 equity securities consist of non-redeemable preferred stock for which no active market exists, and fair value estimates for these securities is based on the values of comparable securities which are actively traded. Increases in spreads used in our matrix models, or those used to value comparable companies, will result in a decrease in discounted cash flows used, and accordingly in the estimated fair value of the security.

In the case where external pricing services are used for certain Level 1 and Level 2 equity securities, our review process is consistent with the process used to determine the fair value of fixed maturities discussed above.

Mortgage loans:

Mortgage loans are not measured at fair value on a recurring basis. Mortgage loans are a Level 3 measurement as there is no current market for the loans. The fair value of our mortgage loans is estimated internally using a matrix pricing approach. Along with specific loan terms, two key management assumptions are required including the risk rating of the loan (our current rating system is A-highest quality, B-moderate quality, C-low quality, W-watch or F-foreclosure) and estimated spreads for new loans over the U.S. Treasury yield curve. Spreads are updated quarterly and loans are reviewed and rated annually with quarterly adjustments should significant changes occur. Our determination of each loan's risk rating as well as selection of the credit spread requires significant judgment. A higher risk rating, as well as an increase in spreads, would result in a decrease in discounted cash flows used, and accordingly the fair value of the loan.

Table of Contents

Policy loans:

Policy loans are not measured at fair value on a recurring basis. Policy loans are a Level 3 measurement as there is no current market since they are specifically tied to the underlying insurance policy. The loans are relatively risk free as they cannot exceed the cash surrender value of the insurance policy. Fair values are estimated by discounting expected cash flows using a risk-free interest rate based on the U.S. Treasury curve. An increase in the risk-free interest rate would result in a decrease in discounted cash flows used, and accordingly the fair value of the loan.

Other investments:

Level 2 other investments include call options with fair values based on counterparty market prices adjusted for a credit component of the counterparty.

Cash, cash equivalents and short-term investments:

Level 1 cash, cash equivalents and short-term investments are highly liquid instruments for which historical cost approximates fair value.

Reinsurance recoverable:

Level 2 reinsurance recoverable includes embedded derivatives in our modified coinsurance contracts under which we cede or assume business. Fair values of these embedded derivatives are based on the difference between the fair value and the cost basis of the underlying fixed maturities, which are valued consistent with the discussion of fixed maturities above.

Assets held in separate accounts:

Level 1 assets held in separate accounts consist of mutual funds that are actively traded, allowing us to use current market prices as an estimate of their fair value.

Future policy benefits, supplemental contracts without life contingencies and advance premiums and other deposits:

Level 3 policy-related financial instruments of investment-type contracts are those not involving significant mortality or morbidity risks. No active market exists for these contracts and they are not measured at fair value on a recurring basis. Fair values for our insurance contracts, other than investment-type contracts, are not required to be disclosed. Fair values for our investment-type contracts with expected maturities, including deferred annuities, funding agreements and supplementary contracts, are determined using discounted cash flow valuation techniques based on current interest rates adjusted to reflect our credit risk and an additional provision for adverse deviation. For certain deposit liabilities with no defined maturities and no surrender charges, including pension-related deposit administration funds, advance premiums and other deposits, fair value is the account value or amount payable on demand. Significant judgment is required in selecting the assumptions used to estimate the fair values of these financial instruments. For contracts with known maturities, increases in current rates will result in a decrease in discounted cash flows and a decrease in the estimated fair value of the policy obligation.

Certain annuity contracts include embedded derivatives and are measured at fair value on a recurring basis. These embedded derivatives are a Level 3 measurement. The fair value of the embedded derivatives is based on the discounted excess of projected account values (including a risk margin) over projected guaranteed account values. The key unobservable inputs required in the projection of future values which require management judgment include the risk margin as well as the credit risk of our company. Should the risk margin increase or the credit risk decrease, the

discounted cash flows and the estimated fair value of the obligation will increase.

Long-term debt:

Long-term debt is not measured at fair value on a recurring basis. Long-term debt is a Level 3 measurement. The fair value of our outstanding debt is estimated using a discounted cash flow method based on the market's assessment or our current incremental borrowing rate for similar types of borrowing arrangements adjusted, as needed, to reflect our credit risk. Our selection of the credit spread requires significant judgment. A decrease in the spread will increase the estimated fair value of the outstanding debt.

Table of Contents

Other liabilities:

Level 2 other liabilities include the embedded derivatives in our modified coinsurance contracts under which we cede business. Fair values for the embedded derivatives are based on the difference between the fair value and the cost basis of the underlying fixed maturities.

Liabilities related to separate accounts:

Separate account liabilities are not measured at fair value on a recurring basis. Level 3 separate account liabilities' fair value is based on the cash surrender value of the underlying contract, which is the cost we would incur to extinguish the liability.

Transfers into Level 3 represent assets previously priced using an external pricing service with access to observable inputs no longer available and therefore, were priced using non-binding broker quotes. Transfers out of Level 3 include those assets that we are now able to obtain pricing from a third party pricing vendor that uses observable (1) inputs. The fair values of newly issued securities often require additional estimation until a market is created, generally within a few months after issuance. Once a market is created, as was the case for the majority of the security transfers out of the Level 3 category above, Level 2 valuation sources become available. There were no transfers between Level 1 and Level 2 during the periods presented above.

Level 3 Financial Instruments Measured at Fair Value on a Nonrecurring Basis

Certain assets are measured at fair value on a nonrecurring basis, generally mortgage loans or real estate which have been deemed to be impaired during the reporting period. On May 22, 2015, one real estate property was impaired to fair value totaling \$1.0 million which resulted in an impairment charge of \$0.2 million. There were no mortgage loans or real estate impaired to fair value during the six months ended June 30, 2014.

4. Defined Benefit Plan

We participate with several affiliates and an unaffiliated organization in various defined benefit plans, including a multiemployer plan. Our share of net periodic pension cost for the plans is recorded as expense in our consolidated statements of operations.

5. Commitments and Contingencies

Legal Proceedings

In the normal course of business, we may be involved in litigation in which damages are alleged that are substantially in excess of contractual policy benefits or certain other agreements. In recent years, companies in the life insurance and annuity business have faced litigation, including class action lawsuits, alleging improper product design, improper sales practices and similar claims. We are not aware of any such matters threatened or pending against FBL Financial Group, Inc. or any of its subsidiaries.

6. Stockholders' Equity

Share Repurchases

During 2012 and 2014, our Board of Directors approved plans to repurchase our Class A common stock. These repurchase plans authorize us to make repurchases in the open market or through privately negotiated transactions, with the timing and terms of the purchases to be determined by management based on market conditions. Under these programs, we made no repurchases during the six months ended June 30, 2015. We repurchased 333,426 shares for \$14.2 million during the six months ended June 30, 2014. At June 30, 2015, \$42.7 million remains available for repurchase under the 2014 plan. Completion of the program is dependent on market conditions and other factors. There is no guarantee as to the exact timing of any repurchases or the number of shares that we will repurchase. The share repurchase program may be modified or terminated at any time without prior notice.

Special Dividend

On March 6, 2015, the Board of Directors approved a special \$2.00 per share cash dividend to Class A and Class B common shareholders of record as of March 16, 2015. The aggregate dividend totaling \$49.5 million was paid on March 26, 2015.

No antidilutive stock options were excluded from diluted earnings per share in either period presented.

8. Segment Information

We analyze operations by reviewing financial information regarding our primary products that are aggregated into the Annuity and Life Insurance product segments. In addition, our Corporate and Other segment includes various support operations, corporate capital and other product lines that are not currently underwritten by the Company.

We analyze our segment results based on pre-tax operating income. Accordingly, income taxes are not allocated to the segments. In addition, operating results are reported net of transactions between the segments. Operating income represents net income excluding the impact of realized gains and losses on investments and changes in net unrealized gains and losses on derivatives.

We use operating income, in addition to net income, to measure our performance since realized gains and losses on investments and the change in net unrealized gains and losses on derivatives can fluctuate greatly from quarter to quarter. A view of our operating performance without the impact of these items enhances the analysis of our results. We use operating income for goal setting, determining short-term incentive compensation and evaluating performance on a basis comparable to that used by many in the investment community.

Table of Contents

Financial Information Concerning our Operating Segments

Change in net unrealized gains/losses on derivatives (1)	(408)) 758	(385)) 994
Consolidated net income attributable to FBL Financial Group, Inc.	\$32,372	\$28,642	\$55,963	\$51,634

(1) Amounts are net of adjustments, as applicable, to amortization of unearned revenue reserves, deferred acquisition costs, value of insurance in force acquired and income taxes attributable to these items.

Our investment in equity method investees, the related equity income and interest expense are attributable to the Corporate and Other segment. Expenditures for long-lived assets were not significant during the periods presented above. Goodwill at June 30, 2015 and December 31, 2014 was allocated among the segments as follows: Annuity (\$3.9 million) and Life Insurance (\$6.1 million).

Premiums collected, which is not a measure used in financial statements prepared according to GAAP, includes premiums received on life insurance policies and deposits on annuities and universal life-type products. Net premiums collected totaled \$158.1 million for the quarter ended June 30, 2015 and \$176.3 million for the same period in 2014. Net premiums collected totaled \$324.4 million for the six months ended June 30, 2015 and \$355.1 million for the same period in 2014.

Under GAAP, premiums on whole life and term life policies are recognized as revenues over the premium-paying period and reported in the Life Insurance segment. The following chart provides a reconciliation of life insurance premiums collected to those reported in the GAAP financial statements.

Table of Contents

Reconciliation of Traditional Life Insurance Premiums, Net of Reinsurance

	Three months ended June 30,		Six months ended June 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Traditional and universal life insurance premiums collected	\$71,087	\$73,586	\$142,302	\$146,424
Premiums collected on interest sensitive products	(23,335)	(27,034)	(47,026)	(53,422)
Traditional life insurance premiums collected	47,752	46,552	95,276	93,002
Change in due premiums and other	1,139	892	763	(66)
Traditional life insurance premiums	\$48,891	\$47,444	\$96,039	\$92,936

There is no comparable GAAP financial measure for premiums collected on annuities and universal life-type products. GAAP revenues for those interest sensitive and variable products consist of various policy charges and fees assessed on those contracts, as summarized in the chart below.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section includes a summary of FBL Financial Group, Inc.'s consolidated results of operations, financial condition and where appropriate, factors that management believes may affect future performance. Unless noted otherwise, all references to FBL Financial Group, Inc. (we or the Company) include all of its direct and indirect subsidiaries, including its life insurance subsidiary, Farm Bureau Life Insurance Company (Farm Bureau Life). Please read this discussion in conjunction with the accompanying consolidated financial statements and related notes. In addition, we encourage you to refer to our Form 10-K for the fiscal year ended December 31, 2014 for a complete description of our significant accounting policies and estimates. Familiarity with this information is important in understanding our financial position and results of operations.

This Form 10-Q includes statements relating to anticipated financial performance, business prospects, new products, and similar matters. These statements and others, which include words such as "expect," "anticipate," "believe," "intend" and other similar expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. A variety of factors could cause our actual results and experiences to differ materially from the anticipated results or other expectations expressed in our forward-looking statements. See Part 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 for additional information on the risks and uncertainties that may affect the operations, performance, development and results of our business.

Overview

We operate predominantly in the life insurance industry through our principal subsidiary, Farm Bureau Life. Farm Bureau Life markets individual life insurance policies and annuity contracts to Farm Bureau members and other individuals and businesses in the Midwestern and Western sections of the United States through an exclusive agency force. Several subsidiaries support various functional areas of Farm Bureau Life and other affiliates by providing investment advisory, marketing and distribution, and leasing services. In addition, we manage two Farm Bureau-affiliated property-casualty companies.

We analyze operations by reviewing financial information regarding our primary products that are aggregated in Annuity and Life Insurance product segments. In addition, our Corporate and Other segment includes various support operations, corporate capital and other product lines that are not currently underwritten by the Company. We analyze our segment results based on pre-tax operating income, which excludes the impact of certain items that are included in net income. See Note 8 to our consolidated financial statements for further information regarding how we define our segments and operating income.

We also include within our analysis "premiums collected," which is not a measure used in financial statements prepared in accordance with GAAP, but is a common industry measure of agent productivity. See Note 8 to our consolidated financial statements for further information regarding this measure and its relationship to GAAP revenues.

Impact of Recent Business Environment

Our business generally benefits from moderate to strong economic expansion. Conversely, a lackluster economy characterized by higher unemployment, lower family income, lower consumer spending, muted corporate earnings growth and lower business investment could adversely impact the demand for our products in the future. We also may experience a higher incidence of claims, lapses or surrenders of policies during such times. We cannot predict whether or when such actions may occur, or what impact, if any, such actions could have on our business, results of operations, cash flows or financial condition.

Economic environmental factors which may impact our business include, but are not limited to, the following:

• Gross Domestic Product increased at an annual rate of 2.3% during the second quarter 2015 based on recent estimates.

• U.S. unemployment was estimated to be 5.3% during June 2015.

• U.S. net farm income is forecast to decrease 31.8% and farm real estate value is forecast to decrease 0.8% during 2015.

• The U.S. 10-year Treasury yield increased during the second quarter of 2015 to 2.35% at June 30, 2015.

• Continued uncertainty as to actions the United States Congress will take to address the national debt, including potential actions to change the tax advantages of life insurance.

•

Table of Contents

The low market interest rate environment continues to impact our investment yields as well as the interest we credit on our interest sensitive products. The benchmark 10-year U.S. Treasury yield increased during the quarter and credit spreads rose moderately, but available investment yields remain relatively low. Our average investment portfolio yield declined during the quarter as yields on new acquisitions were generally lower than the average portfolio yield. As a result we proactively reduced customer crediting rates on certain annuity and universal life products. Low crediting rates pose challenges to maintaining attractive annuity and universal life products, although our rates are comparable to other insurance companies, allowing us to maintain our competitive position within the market. We continue to reassess the future profitability of our interest sensitive products as future profit expectations impact the valuation of deferred policy acquisition costs. During 2014 we unlocked assumptions used to amortize deferred policy acquisition costs to reflect the expectation of lower earned spread rates, primarily driven by the expected continuation of low market interest rates. We experienced a decrease in the fair value of our fixed maturity security portfolio during the quarter due to increasing market yields. See the segment discussion and “Financial Condition” section that follows for additional information regarding the impact of low market interest rates on our business.

The Department of Labor's recent proposal to expand an insurance company's fiduciary responsibilities for sales of insurance products to be used in retirement plans could negatively impact our annuity sales. See Part 2, Item 1A for further discussion of this proposal.

Impact on operating income of
unlocking deferred acquisition costs,
value of insurance in force acquired
and unearned revenue reserve, net of
tax

(1) Amounts are net of adjustments, as applicable, to amortization of unearned revenue reserves, deferred acquisition costs, value of insurance in force acquired and income taxes attributable to these items.

Table of Contents

Our operating and net income increased in the second quarter of 2015 and the six months ended June 30, 2015, compared to the prior year period, primarily due to increases in the volume of business in force and investment fee income, partially offset by increases in death benefits and amortization of deferred acquisition costs. In addition to the increases in operating income, net income was positively impacted by increases in net realized gains, partially offset by a decrease in net unrealized gains/losses on derivatives. See the discussion that follows for details regarding operating income by segment.

Earnings per share and operating income per common share benefited from repurchases of Class A common shares in 2014. Details regarding the share repurchases are included in Note 6 to the consolidated financial statements.

We periodically revise key assumptions used in the calculation of the amortization of deferred acquisition costs, value of insurance in force acquired and unearned revenue reserve for participating life insurance, variable and interest sensitive products, as applicable, through an “unlocking” process. These assumptions typically consist of withdrawal and lapse rates, earned spreads and mortality with revisions based on historical results and our best estimate of future experience. The impact of unlocking is recorded in the current period as an increase or decrease to amortization of the respective balances. While the unlocking process can take place at any time, as needs dictate, the process typically takes place annually. See the discussion that follows for further details of the unlocking impact to our operating segments.

Individual annuity withdrawal rate				4.3 %	5.2 %		
Impact on pre-tax income of unlocking deferred acquisition costs and value of insurance in force acquired	—	(207)	N/A	\$—	\$(207)	N/A	

(1) Includes prepayment fee income and amortization of any related premium or discount.

Pre-tax operating income for the Annuity segment increased in the second quarter of 2015 and the six months ended June 30, 2015, compared to the prior year periods, primarily due to higher investment fee income.

The average aggregate account value for individual annuity contracts in force increased in 2015, compared to the prior year period, due to continued sales and the crediting of interest. Continued growth in our business in force contributes to increases in net investment income and interest sensitive benefits. Premiums collected were lower in the 2015 periods due to decreases in sales of fixed rate deferred annuities. The amount of premiums collected is highly dependent upon the relationship between the current crediting rates of our products compared to those of competing products.

The Annuity segment also includes advances on our funding agreements with the Federal Home Loan Bank of Des Moines (FHLB). Outstanding funding agreements totaled \$424.1 million at June 30, 2015 and \$318.4 million at June 30, 2014.

The weighted average yield on cash and invested assets for individual annuities increased for the six months ended June 30, 2015, compared to the prior year period, primarily due to higher investment fee income, partially offset by lower yields on new investment acquisitions from premium receipts and reinvestment of the proceeds from maturing investments, compared with the average existing portfolio yield. See the "Financial Condition" section which follows

for additional information regarding the yields obtained on investment acquisitions. Weighted average interest crediting rates on our individual annuity products decreased due to crediting rate actions taken in 2014 in response to the declining portfolio yield and a change in the underlying product mix.

Impact on pre-tax income of unlocking deferred acquisition costs, value of insurance in force acquired and unearned revenue reserve	—	391	N/A	—	391	N/A		

(1) Includes prepayment fee income and amortization of any related premium or discount.

Pre-tax operating income for the Life Insurance segment increased in the second quarter of 2015 and the six months ended June 30, 2015, compared to the prior year periods, primarily due to increases in the volume of business in force and investment fee income; partially offset by an increase in death benefits and the amortization of deferred acquisition costs.

Premiums collected were lower during the 2015 periods, compared to the prior year periods, primarily due to changes in universal life sales. Continued growth in our business in force contributes to the increase in revenues and expenses.

Amortization of deferred acquisition costs and value of insurance in force was higher in the second quarter of 2015 and the six months ended June 30, 2015, compared to the prior year periods primarily due to changes in actual profits on the underlying business and the impact of unlocking in 2014.

Death benefits, net of reinsurance and reserves released, increased in the second quarter of 2015 and the six months ended June 30, 2015 compared to the prior year periods. The increase for the three month period was primarily due to an increase in the average size of claims while the increase for the six month period was due primarily to an increase in the number of claims.

The weighted average yield on cash and invested assets for interest sensitive life insurance products increased in the first six months of 2015, compared to the prior year period, due to an increase in investment fee income from prepayment fees, partially offset by lower yields on new investment acquisitions from premium receipts and reinvestment of the proceeds from maturing investments, compared with the average existing portfolio yield. See the "Financial Condition" section which follows for additional information regarding the yields obtained on investment acquisitions. Weighted average interest crediting rates on our interest sensitive life insurance products were impacted by crediting rate decreases taken in 2015 and 2014 in response to the declining portfolio yield, partially offset by sales of products with higher crediting rates.

Estimated impact on pre-tax income from separate account performance on amortization of deferred acquisition costs	(350) 255	237	%	(398) 110	(462)%

(1) Includes prepayment fee income and amortization of any related premium or discount.

Pre-tax operating income decreased for the Corporate and Other segment in the second quarter of 2015 and the six months ended June 30, 2015, compared to the prior year periods, primarily due to an increase in pre-tax equity loss, a decrease in investment fee income, and an increase in the amortization of deferred acquisition costs from the impact of unlocking and market performance and profits on our variable business.

Net investment income decreased during the 2015 periods compared to 2014 primarily due to a decrease in investment fee income.

Table of Contents

Amortization of deferred acquisition costs and unearned revenue reserves changed over the prior periods primarily due to the impact of unlocking in 2014 and market performance in the separate accounts.

Other income and other expenses includes fees and expenses from sales of brokered products and operating results of our non-insurance subsidiaries, which include management, advisory, marketing and distribution services and leasing activities. The increase in other income during the 2015 periods, compared to 2014, was due to general increases in brokered products and non-insurance subsidiaries, including increases in management fee income of \$0.7 million for the quarter and \$0.9 million for the six month period ended June 30, 2015.

Equity income (loss) includes our proportionate share of gains and losses attributable to our ownership interest in partnerships, joint ventures and certain companies where we exhibit some control but have a minority ownership interest. Given the timing of availability of financial information from our equity investees, we will consistently use information that is as much as three months in arrears for certain of these entities. Several of these entities are investment companies whose operating results are derived primarily from unrealized and realized gains and losses generated by their investment portfolios. As is normal with these types of entities, the level of these gains and losses is subject to fluctuation from period to period depending on the prevailing economic environment, changes in prices of bond and equity securities held by the investment partnerships, the timing and success of initial public offerings or exit strategies, and the timing of the sale of investments held by the partnerships and joint ventures. We have increased our investments in low income housing tax credit partnerships which generate pre-tax losses, but after-tax gains, as the related tax credits are realized. The timing of the realization of tax credits is subject to fluctuation from period to period due to the timing of housing project completions and the approval of tax credits. Equity income, net of related income taxes, was as follows:

Equity Income, Net of Related Income Taxes

	Three months ended June 30,		Six months ended June 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Equity income (loss):				
Low income housing tax credit partnerships	\$(1,997)) \$(1,669) \$(3,842) \$(3,430
Other equity method investments	326	550	(10) 731
	(1,671) (1,119) (3,852) (2,699
Income taxes:				
Taxes on equity income (loss)	585	379	1,348	945
Investment tax credits	3,488	3,271	6,675	5,933
Equity income, net of related income taxes	\$2,402	\$2,531	\$4,171	\$4,179

Income Taxes on Operating Income

The effective tax rate on operating income was 21.5% for the second quarter of 2015 and 21.5% for the six months ended June 30, 2015, compared with 21.9% for the second quarter of 2014, and 22.6% for the six months ended June 30, 2014. The effective tax rates differ from the federal statutory rate of 35% primarily due to the impact of low-income housing tax credits and tax-exempt interest and dividend income. The 2015 effective tax rate decreased, compared to the prior year period, primarily due to an increase in tax credits from low income housing tax credit partnerships.

	2015	2014	2015	2014
	(Dollars in thousands)			
Real estate	160	—	160	—

Total other-than-temporary impairment losses reported in net income	\$ 160	\$—	\$ 160	\$—
---	--------	-----	--------	-----

Table of Contents

Other-than-temporary credit impairment losses for the three and six months ended June 30, 2015 were incurred in real estate due to an appraisal at a value below our prior carrying value. There were no impairment losses for the three and six months ended June 30, 2014.

Financial Condition

Investments

Our investment portfolio decreased 0.3% to \$7,656.2 million at June 30, 2015 compared to \$7,681.0 million at December 31, 2014. The portfolio decreased due to a reduction of \$198.9 million of net unrealized appreciation of fixed maturities during 2015, offset by positive cash flows from operating and financing activities. Additional details regarding securities in an unrealized loss position at June 30, 2015 are included in the discussion that follows and in Note 2 to our consolidated financial statements. Details regarding investment impairments are discussed above in the "Realized Gains (Losses) on Investments" section under "Results of Operations."

We manage the investment portfolio to optimize risk-adjusted yield within the context of prudent asset-liability management. We evaluate multiple cash flow testing scenarios as part of this process. The Company's investment policy calls for investing primarily in high quality fixed maturities and commercial mortgage loans.

Fixed Maturity Acquisitions Selected Information

	Six months ended June 30,		
	2015	2014	
	(Dollars in thousands)		
Cost of acquisitions:			
Corporate	\$216,849	\$167,151	
Mortgage- and asset-backed	161,747	198,243	
United States Government and agencies	1,500	499	
Tax-exempt municipals	29,134	8,000	
Taxable municipals	32,998	20,955	
Total	\$442,228	\$394,848	
Effective annual yield	4.22	% 4.60	%
Credit quality			
NAIC 1 designation	58.5	% 73.8	%
NAIC 2 designation	40.4	% 26.2	%
Non-investment grade	1.1	% —	%
Weighted-average life in years	16.0	16.0	

The table above summarizes selected information for fixed maturity purchases. The effective annual yield shown is the yield calculated to the "worst-call date." For noncallable bonds, the worst-call date is always the maturity date. For callable bonds, the worst-call date is the call or maturity date that produces the lowest yield. The weighted-average maturity is calculated using scheduled pay-downs and expected prepayments for amortizing securities. For non-amortizing securities, the weighted-average maturity is equal to the stated maturity date.

A portion of the securities acquired during the six months ended June 30, 2015 and June 30, 2014, were acquired with the proceeds from advances on our funding agreements with the FHLB. The securities acquired to support these funding agreements often carry a lower average yield than securities acquired to support our other insurance products, due to the shorter maturity and relatively low interest rate paid on those advances. In addition, certain municipal securities acquired are exempt from federal income taxes, and accordingly have a higher actual return than reflected in

the yields stated above. The average yield of the securities acquired, excluding the securities supporting the funding agreements and using a tax-adjusted yield for the municipal securities, was 4.61% during the six-month period ended June 30, 2015 and 4.76% during the six-month period ended June 30, 2014.

Investment Portfolio Summary

	June 30, 2015			December 31, 2014		
	Carrying Value	Percent		Carrying Value	Percent	
	(Dollars in thousands)					
Fixed maturities - available for sale:						
Public	\$5,048,042	65.9	%	\$5,151,922	67.1	%
144A private placement	1,293,928	16.9		1,245,474	16.2	
Private placement	283,858	3.7		303,302	4.0	
Total fixed maturities - available for sale	6,625,828	86.5		6,700,698	87.3	
Equity securities	121,759	1.6		112,623	1.5	
Mortgage loans	689,048	9.0		629,296	8.2	
Real estate	3,444	—		3,622	—	
Policy loans	183,656	2.5		182,502	2.4	
Short-term investments	29,276	0.4		48,585	0.6	
Other investments	3,189	—		3,644	—	
Total investments	\$7,656,200	100.0	%	\$7,680,970	100.0	%

As of June 30, 2015, 95.9% (based on carrying value) of the available-for-sale fixed maturities were investment grade debt securities, defined as being in the highest two National Association of Insurance Commissioners (NAIC) designations. Non-investment grade debt securities generally provide higher yields and involve greater risks than investment grade debt securities because their issuers typically are more highly leveraged and more vulnerable to adverse economic conditions than investment grade issuers. In addition, the trading market for these securities is usually more limited than for investment grade debt securities. We regularly review the percentage of our portfolio that is invested in non-investment grade debt securities (NAIC designations 3 through 6). As of June 30, 2015, no single non-investment grade holding exceeded 0.2% of total investments.

Credit Quality by NAIC Designation and Equivalent Rating

NAIC Designation	Equivalent Rating (1)	June 30, 2015			December 31, 2014		
		Carrying Value	Percent		Carrying Value	Percent	
		(Dollars in thousands)					
1	AAA, AA, A	\$4,193,622	63.3	%	\$4,252,851	63.5	%
2	BBB	2,159,861	32.6		2,204,791	32.9	
	Total investment grade	6,353,483	95.9		6,457,642	96.4	
3	BB	188,874	2.9		166,757	2.5	
4	B	47,704	0.7		37,887	0.5	
5	CCC	15,620	0.2		18,771	0.3	
6	In or near default	20,147	0.3		19,641	0.3	
	Total below investment grade	272,345	4.1		243,056	3.6	
	Total fixed maturities - available for sale	\$6,625,828	100.0	%	\$6,700,698	100.0	%

Equivalent ratings are based on those provided by nationally recognized rating agencies with some exceptions for (1)certain residential mortgage, commercial mortgage- and asset-backed securities where they are based on the expected loss of the security rather than the probability of default.

See Note 2 to our consolidated financial statements for a summary of fixed maturities by contractual maturity date.

Mortgage- and Asset-Backed Securities

Mortgage-backed and other asset-backed securities are purchased when we believe these types of investments provide superior risk-adjusted returns compared to returns of more conventional investments such as corporate bonds and mortgage loans. These securities are diversified as to collateral types, cash flow characteristics and maturity.

The residential mortgage-backed portfolio includes government agency pass-through and collateralized mortgage obligation (CMO) securities. With a government agency pass-through security, we receive a pro rata share of principal payments as payments are made on the underlying mortgage loans. CMOs consist of pools of mortgages divided into sections or "tranches" which provide sequential retirement of the bonds.

The commercial mortgage-backed securities are primarily sequential securities. Commercial mortgage-backed securities typically have cash flows that are less subject to refinance risk than residential mortgage-backed securities principally due to prepayment restrictions on many of the underlying commercial mortgage loans.

The other asset-backed securities are backed by both residential and non-residential collateral. The collateral for residential asset-backed securities primarily consists of second lien fixed-rate home equity loans. The cash flows of these securities are less subject to prepayment risk than residential mortgage-backed securities as the borrowers are less likely to refinance than those with only a first lien mortgage. The collateral for non-residential asset-backed securities primarily includes securities backed by credit card receivables, auto dealer receivables, auto installment loans, aircraft leases, middle market and syndicated business loans, timeshare receivables and trade and account receivables. These securities are high quality, short-duration assets with limited cash flow variability.

Our direct exposure to the Alt-A home equity and subprime first-lien sectors is limited to investments in structured securities collateralized by senior tranches of residential mortgage loans. We also have a partnership interest in two funds at June 30, 2015 and at December 31, 2014, that own securities backed by Alt-A home equity, subprime first-lien and adjustable rate mortgage collateral. The funds are reported as securities and indebtedness of related parties in our consolidated balance sheets with a fair value of \$10.9 million at June 30, 2015 and \$14.2 million at December 31, 2014.

The Government National Mortgage Association (GNMA) guarantees principal and interest on mortgage-backed securities. The guarantee is backed by the full faith and credit of the United States Government. The Federal National Mortgage Association (FNMA) is a government-sponsored enterprise (GSE) that was chartered by Congress to reduce borrowing costs for certain homeowners. GSEs carry an implicit backing of the U.S. Government but do not have explicit guarantees like GNMA.

The AAA, AA and A-rated commercial mortgage-backed securities are broken down into categories based on subordination levels. Rating agencies disclose subordination levels, which measure the amount of credit support that the bonds (or tranches) have from subordinated bonds (or tranches). Generic is a term used for securities issued prior to 2005. The super senior securities have subordination levels greater than 27%, the mezzanine securities have subordination levels in the 17% to 27% range and the junior securities have subordination levels in the 9% to 16% range. Also included in the commercial mortgage-backed securities are military housing bonds totaling \$123.2 million at June 30, 2015 and \$120.5 million at December 31, 2014.

Table of Contents

These bonds are used to fund the construction of multi-family homes on United States military bases. The bonds are backed by a first mortgage lien on residential military housing projects.

State, Municipal and Other Government Securities

State, municipal and other government securities totaled \$1,406.7 million, or 21.2% of total fixed maturities, at June 30, 2015, and include investments in general obligation, revenue and municipal housing bonds. Our investment strategy is to utilize municipal bonds in addition to corporate bonds, as we believe they provide additional diversification and have historically low default rates compared with similarly rated corporate bonds. We evaluate the credit strength of the underlying issues on both a quantitative and qualitative basis, excluding insurance, prior to acquisition. The majority of the municipal bonds we hold are investment grade credits without consideration of insurance. Our municipal bonds are well diversified by type and geography with the top exposure being water and sewer revenue bonds. We do not hold any Puerto Rico-related bonds, which has been in the news recently given its financial issues. Exposure to the state of Illinois and municipalities within the state accounted for 1.7% of our total fixed maturities at June 30, 2015. As of June 30, 2015, our Illinois-related portfolio holdings were rated

Table of Contents

investment grade, and were trading at 106.9% of amortized cost. Our municipal bond exposure had an average rating of AA and our holdings were trading at 108.4% of amortized cost at June 30, 2015.

Equity Securities

Equity securities totaled \$121.8 million at June 30, 2015 and \$112.6 million at December 31, 2014. Gross unrealized gains totaled \$5.3 million and gross unrealized losses totaled \$1.2 million at June 30, 2015. At December 31, 2014, gross unrealized gains totaled \$5.9 million and gross unrealized losses totaled \$0.7 million on these securities. The unrealized losses were primarily attributable to nonredeemable perpetual preferred securities from issuers in the financial sector. See Note 2 to our consolidated financial statements for further discussion regarding our analysis of unrealized losses related to these securities.

Mortgage Loans

Mortgage loans totaled \$689.0 million at June 30, 2015 and \$629.3 million at December 31, 2014. Our mortgage loans are diversified as to property type, location and loan size, and are collateralized by the related properties. The total number of commercial mortgage loans outstanding was 156 at June 30, 2015 and 146 at December 31, 2014. In the first six months of 2015, new loans ranged from \$1.9 million to \$10.2 million in size, with an average loan size of \$6.0 million, an average loan term of 15 years and an average yield of 4.21%. Our mortgage lending policies establish limits on the amount that can be loaned to one borrower and require diversification by geographic location and collateral type. The majority of our mortgage loans amortize principal, with 2.2% that are interest only loans at June 30, 2015. At June 30, 2015, the average loan-to-value of the current outstanding principal balance using the most recent appraised value was 56.2% and the weighted average debt service coverage ratio was 1.6 based on the results of our 2014 annual study. See Note 2 to our consolidated financial statements for further discussion regarding our mortgage loans.

Asset-Liability Management

Our asset-liability management program includes (i) designing and developing products that encourage persistency and help ensure targeted spreads are earned and, as a result, create a stable liability structure, and (ii) structuring the investment portfolio with duration and cash flow characteristics consistent with the duration and cash flow characteristics of our insurance liabilities. The weighted average life of the fixed maturity and mortgage loan portfolio based on fair values was approximately 10.8 years at June 30, 2015 and 10.6 years at December 31, 2014. The effective duration of the fixed maturity and mortgage loan portfolios backing our annuity products was 5.9 years at June 30, 2015 and at December 31, 2014. The effective duration of our annuity liabilities was approximately 6.2 years at June 30, 2015 and 6.4 years at December 31, 2014. While it can be difficult to maintain asset and liability durations that are closely matched in a dynamic environment, we have identified various strategies that can be implemented if duration mismatches exceed acceptable tolerances.

Other Assets

Deferred acquisition costs increased 32.4% to \$292.4 million at June 30, 2015, primarily due to a \$67.7 million decrease in the impact of the change in net unrealized appreciation on fixed maturity securities during the period. Cash and cash equivalents decreased 32.2% to \$52.0 million primarily due to payment of a special \$2.00 per share dividend on common stock in the first quarter of 2015 and normal fluctuations in timing of payments made and received.

Liabilities

Future policy benefits increased 2.7% to \$6,288.7 million at June 30, 2015, primarily due to an increase in the volume of annuity and life business in force. Deferred income taxes decreased 22.3% to \$159.7 million at June 30, 2015, primarily due to the tax impact of the change in unrealized appreciation/depreciation on investments.

Stockholders' Equity

As discussed in Note 6 to our consolidated financial statements, stockholders' equity was impacted by capital deployment actions during the first quarter of 2015. We paid a special cash dividend of \$2.00 per share on Class A and Class B common stock and increased our regular quarterly dividend by 14% to \$0.40 per share during March 2015.

Table of Contents

Our stockholders' equity decreased 7.7% to \$1,156.5 million at June 30, 2015, compared to \$1,252.8 million at December 31, 2014, primarily due to the change in unrealized appreciation of fixed maturity securities during the period and dividends paid, partially offset by net income.

At June 30, 2015, FBL's common stockholders' equity was \$1,153.5 million, or \$46.48 per share, compared to \$1,249.8 million, or \$50.57 per share, at December 31, 2014. Included in stockholders' equity per common share is \$6.94 at June 30, 2015 and \$10.46 at December 31, 2014 attributable to accumulated other comprehensive income.

Liquidity and Capital Resources

Cash Flows

During the first six months of 2015, our operating activities generated cash flows totaling \$89.0 million, consisting of net income of \$55.9 million adjusted for non-cash operating revenues and expenses netting to \$33.1 million. We used cash of \$171.5 million in our investing activities during the 2015 period. The primary uses were \$576.2 million of investment acquisitions, mostly in fixed maturity securities, partially offset by \$391.1 million in sales, maturities and repayments of investments. Our financing activities provided cash of \$57.8 million during the 2015 period. The primary financing source was \$363.4 million in receipts from interest sensitive products credited to policyholder account balances, which was partially offset by \$239.1 million for return of policyholder account balances on interest sensitive products and \$69.4 million for dividends paid to stockholders.

Sources and Uses of Capital Resources

Parent company cash inflows from operations consist primarily of fees that it charges various subsidiaries and affiliates for management of their operations, expense reimbursements and tax settlements from subsidiaries and affiliates, proceeds from the exercise of employee stock options, investment income and dividends from subsidiaries, if declared and paid. Revenue sources for the parent company during the six months ended June 30, 2015 included management fees from subsidiaries and affiliates totaling \$4.4 million and dividends of \$25.0 million. Cash outflows are principally for salaries, taxes and other expenses related to providing management services, dividends on outstanding stock, and interest on our parent company debt.

As discussed in Note 6 to our consolidated financial statements, we have periodically taken advantage of opportunities to repurchase our outstanding Class A common stock through Class A common stock repurchase plans approved by our Board of Directors. There was \$42.7 million remaining available for repurchases at June 30, 2015 under the current \$50 million Class A common stock repurchase plan. Completion of this program is dependent on market conditions and other factors. There is no guarantee as to the exact timing of any repurchases or the number of shares that we will repurchase. The share repurchase program may be modified or terminated at any time without prior notice. No repurchases of Class A common stock were made during the six months ended June 30, 2015.

Interest payments on our debt totaled \$2.4 million for the six months ended June 30, 2015 and June 30, 2014. Interest payments on our debt outstanding at June 30, 2015 are estimated to be \$2.4 million for the remainder of 2015.

Farm Bureau Life's cash inflows primarily consist of premiums; deposits to policyholder account balances; income from investments; sales, maturities and calls of investments; and repayments of investment principal. Farm Bureau Life's cash outflows are primarily related to withdrawals of policyholder account balances, investment purchases, payment of policy acquisition costs, policyholder benefits, income taxes, current operating expenses and dividends. Life insurance companies generally produce a positive cash flow which may be measured by the degree to which cash inflows are adequate to meet benefit obligations to policyholders and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future

policy benefit payments and for writing new business. Continuing operations and financing activities from Farm Bureau Life relating to interest sensitive products provided funds totaling \$215.0 million for the six months ended June 30, 2015 and \$203.6 million for the prior year period.

Farm Bureau Life's ability to pay dividends to the parent company is limited by law to earned profits (statutory unassigned surplus) as of the date the dividend is paid, as determined in accordance with accounting practices prescribed by insurance regulatory authorities of the State of Iowa. At December 31, 2014, Farm Bureau Life's statutory unassigned surplus was \$418.5 million. There are certain additional limits on the amount of dividends that may be paid within a year without approval of the Insurance Division, Department of Commerce of the State of Iowa (the Iowa Insurance Division) as discussed in Note 7 to our consolidated financial statements for the year ended December 31, 2014 included in our Annual Report on Form 10-K. During

Table of Contents

the remainder of 2015, the maximum amount legally available for distribution to the parent company without further regulatory approval is \$72.8 million. However, due to the timing of dividend payments during the prior 12 months, the maximum dividend available to be paid without further regulatory approval during the period from June 30, 2015 to December 19, 2015 is \$27.8 million.

We paid regular cash dividends on our common and preferred stock during the six-month period ended June 30 totaling \$19.9 million in 2015 and \$17.4 million in 2014. In addition, we paid a special \$2.00 per common share cash dividend on March 26, 2015 totaling \$49.5 million. It is anticipated that quarterly cash dividend requirements for 2015 will be \$0.0075 per Series B preferred share and \$0.40 per common share. The level of common stock dividends are analyzed quarterly and are dependent upon our capital and liquidity positions. In addition, alternative uses of excess capital may impact future dividend levels. Assuming these quarterly dividend rates, the common and preferred dividends would total approximately \$19.9 million for the remainder of 2015. The parent company expects to have sufficient resources and cash flows to meet its interest and dividend payments throughout 2015. The parent company had available cash and investments totaling \$65.7 million at June 30, 2015. FBL Financial Group, Inc. expects to rely on available cash resources, dividends from Farm Bureau Life and management fee income to make dividend payments to its stockholders and interest payments on its debt. We had no material commitments for capital expenditures as of June 30, 2015.

We manage the amount of capital held by our insurance subsidiaries to ensure we meet regulatory requirements. State laws specify regulatory actions if an insurer's risk-based capital (RBC) ratio, a measure of solvency, falls below certain levels. The NAIC has a standard formula for annually assessing RBC based on the various risk factors related to an insurance company's capital and surplus, including insurance, business, asset and interest rate risks. The insurance regulators monitor the level of RBC against a statutory "authorized control level" RBC at which point regulators have the option to assume control of the insurance company. The company action level RBC is 200% of the authorized control level and is the first point at which any action would be triggered. Our adjusted capital and RBC is reported to our insurance regulators annually based on formulas which may be revised throughout the year. We estimate our adjusted capital and RBC quarterly; however, these estimates may differ from annual results should the regulatory formulas change. As of June 30, 2015, our statutory total adjusted capital is estimated at \$637.1 million, resulting in a RBC ratio of 549%, based on company action level capital of \$116.0 million.

On a consolidated basis, we anticipate that funds to meet our short-term and long-term capital expenditures, cash dividends to stockholders and operating cash needs will come from existing capital and internally-generated funds. However, there can be no assurance that future experience regarding benefits and surrenders will be similar to historic experience since benefits and surrender levels are influenced by such factors as the interest rate environment, our financial strength ratings, the economy and other factors that impact policyholder behavior. Our investment portfolio at June 30, 2015 included \$29.3 million of short-term investments, \$52.0 million of cash and cash equivalents and \$589.7 million in carrying value of U.S. Government and U.S. Government agency-backed securities that could be readily converted to cash at or near carrying value. Farm Bureau Life is also a member of the FHLB, which provides a source for additional liquidity, if needed. This membership allows us to utilize fixed or floating rate advances offered by the FHLB and secured by qualifying collateral. Our total capacity to utilize such advances is impacted by multiple factors including the market value of eligible collateral, our level of statutory admitted assets and excess reserves and our willingness or capacity to hold activity-based FHLB common stock.

Contractual Obligations

In the normal course of business, we enter into insurance contracts, financing transactions, lease agreements or other commitments which are necessary or beneficial to our operations. These commitments may obligate us to certain cash flows during future periods. There have been no material changes to our total contractual obligations since December 31, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risks of Financial Instruments

There have been no material changes in the market risks from the information provided in “Item 7A. Quantitative and Qualitative Disclosures About Market Risk” in our Form 10-K for the fiscal year ended December 31, 2014.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective. Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities and Exchange Act of 1934 (the Act) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Our internal control over financial reporting changes from time-to-time as we modify and enhance our systems and processes to meet our dynamic needs. Changes are also made as we strive to be more efficient in how we conduct our business. While changes have taken place in our internal controls during the quarter ended June 30, 2015, there have been no changes that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

The performance of our company is subject to a variety of risks which you should review. Occurrence of these risks could materially affect our business, results of operations or financial condition, cause the trading price of our common stock to decline materially or cause our actual results to differ materially from those expected or those expressed in any forward looking statements made by or on behalf of the Company.

Please refer to Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014. We are updating the risk factor labeled "All segments of our business are highly regulated and these regulations or changes in them could affect our profitability" by adding the following to the existing language set forth under such risk factor:

During the second quarter of 2015, the U.S. Department of Labor (DOL) proposed regulations addressing when a person providing investment advice with respect to an employee benefit plan or individual retirement account (IRA) is considered a fiduciary under the Employee Retirement Income Security Act (ERISA) and the Internal Revenue Code. The proposed regulations offer a very broad definition of fiduciary investment advice which includes sales and services currently offered to our customers with such plans or IRAs. The DOL has also proposed a new set of prohibited transaction exemptions (PTEs) and amendments to existing PTEs to permit certain common fee and compensation practices to continue. Under the proposal the agents who sell our fixed annuities, variable annuities and investment products for use in employee benefit plans or IRAs, would subject themselves and the Company to additional disclosures, reporting, record keeping and other regulatory requirements. It is common for our customers to utilize products we offer in such plans and the proposals could have an adverse impact to our operations. It is uncertain if the proposals will be adopted in their current form. The impact of the proposed regulations on sales and operating expenses is uncertain at this time.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Issuer Purchases of Equity Securities

We had no issuer purchases of equity securities for the quarter ended June 30, 2015. We have \$42.7 million available under a stock repurchase plan announced February 20, 2014, which will expire on March 31, 2016. The plan authorizes us to make repurchases of Class A common stock in the open market or through privately negotiated transactions, with the timing and terms of the purchases to be determined by management based on market conditions. Completion of the program is dependent on market conditions and other factors. There is no guarantee as to the exact timing of any repurchases or the number of shares, if any, that we will repurchase. The share repurchase program may be modified or terminated at any time without prior notice.
