NEWS RELEASE

FOR IMMEDIATE RELEASE

**CREDO PETROLEUM REPORTS 17% INCREASE
IN FISCAL 2006 EARNINGS TO \$0.62 PER SHARE**

Fiscal 2006 Earnings Rise to All Time High on 18% Increase in Production

DENVER, COLORADO, January 11, 2007 CREDO Petroleum Corporation (NASDAQ: CRED) today reported record financial results for the year ended October 31, 2006. Per share data has been adjusted to reflect the 3-for-2 stock split that occurred on October 12, 2005.

Record production propelled fiscal 2006 net income to an all time high. For the year, net income rose 17% to \$5,880,000 compared to net income of \$5,022,000 last year. On a per diluted share basis, net income was \$.62 compared to \$.54 last year. Revenue rose 24% to a record \$16,491,000 compared to \$13,289,000 last year. Cash flow from operating activities jumped 47% to \$12,973,000.

Fourth quarter production increased 23% over last year. However, a 28% decline in natural gas prices together with substantial costs related to first year implementation of Sarbanes-Oxley regulations offset the production increase and caused fourth quarter 2006 net income to decline 10% compared to last year. For the quarter, net income was \$1,507,000 compared to \$1,677,000 last year. On a per diluted share basis, net income was \$.16 compared to \$.18 last year. Fourth quarter revenue fell 2% to \$4,236,000 compared to \$4,303,000 last year. Cash flow from operating activities rose 4% to \$3,624,000.

James T. Huffman, President, said, "For the sixth consecutive year, we have established new records in virtually every operational and financial category, highlighted by a 22% return on equity in 2006 without using leverage. This year marks the sixth consecutive year of record production and the thirteenth consecutive year for record reserve quantities. Huffman further stated, "CREDO's performance in 2006 extends a long record of exceptional achievement. This year, *Forbes* magazine again ranked CREDO as one of its 200 Best Small Companies and *Fortune Small Business* magazine again ranked the company as one of America's 100 fastest growing small companies."

PRODUCTION VOLUMES SET SIXTH CONSECUTIVE ANNUAL RECORD

Successful drilling in 2006 boosted production 18% to a new record. Fiscal 2006 production was 2.42 Bcfe (billion cubic feet of gas equivalent) compared to 2.05 Bcfe last year. Natural gas production rose 19% to a record 2.18 Bcf compared to 1.83 Bcf last year. Oil production rose 11% to 41,000 barrels compared to 37,000 barrels last year. Natural gas accounted for 90% of the company's total 2006 production.

Fourth quarter production rose 23%, also a new record. Production was 706 MMcfe (million cubic feet of gas equivalent) compared to 575 MMcfe last year. Natural gas production rose 25% to 648 MMcf and oil production increased to 9,600 barrels compared to 9,300 barrels last year.

CAPITAL SPENDING INCREASED TO A NEW RECORD

RESERVES SET THIRTEENTH CONSECUTIVE ANNUAL RECORD

Capital spending for fiscal 2006 increased 70% to a record \$11,076,000. This level of capital spending enabled the company to increase its production to take advantage of excellent product prices, while simultaneously setting the stage for significant production and reserve growth through new projects. Capital spending included \$2,598,000 on new projects in Texas and Kansas which are in their initial stages.

For fiscal 2006, the company added 3.13 Bcfe of new reserves, replacing 129% of its 2006 production. Reserves rose 4% to 18.54 Bcfe, the thirteenth consecutive annual record. Approximately 87% of the company's total proved reserves are classified as proved developed. The company includes proved undeveloped reserves for a limited number of its offset drilling locations. Natural gas accounted for 86% of reserve volume.

The undiscounted value of reserves was \$84,861,000 at year end, and the discounted value (at 10%) was \$52,328,000. Average fiscal year end wellhead prices used to calculate reserves were \$6.32 per Mcf (thousand cubic feet of gas) and \$53.69 per barrel.

PRODUCT PRICES STABLE COMPARED TO LAST YEAR

Net wellhead natural gas prices for fiscal 2006 fell 5% to \$6.23 per Mcf compared to \$6.55 last year. Hedging transactions reduced wellhead prices \$.12 per Mcf compared to \$.39 per Mcf last year. As a result, total natural gas price realizations fell slightly to \$6.11 per Mcf compared to \$6.16 last year. Wellhead oil prices rose 20% to \$61.14 per barrel compared to \$50.90 last year. There were no oil hedging transactions.

For the fourth quarter, net wellhead natural gas prices fell 35% to \$5.29 per Mcf compared to \$8.14 last year. There were no hedging transactions in the fourth quarter of 2006, but such transactions reduced wellhead prices by \$.84 per Mcf last year. As a result, total natural gas price realizations fell 28% to \$5.29 per Mcf compared to \$7.30 last year. Wellhead oil prices fell 4% to \$59.27 per barrel compared to \$61.48 last year. The following table sets forth the company's current open hedge positions.
