**Media release**

29 October 2004

**HDUF successfully completes bookbuild;**

**IPO price set at top of range**

Hastings Funds Management and Westpac today announced that underwriting agreements had been executed with respect to the Initial Public Offering of the Hastings Diversified Utilities Fund (HDUF). They also announced that the Product Disclosure Statement for the initial public offering (Offer) of HDUF had been lodged with the Australian Securities and Investments Commission.

Following the successful completion of a bookbuild the issue price has been set at \$2.56 per security representing a forecast distribution yield of 9.5 percent.

Director of Infrastructure at Hastings Funds Management and Chief Operating Officer of HDUF Mr Jim Hallam welcomed the strong pricing result and confirmed that the pricing of \$2.56 per security was the top of the bookbuild price range of \$2.44-\$2.56.

At the request of the joint Lead Managers, UBS and Citigroup, Westpac agreed to reduce its proposed investment in the Fund to nil in order to satisfy strong demand from institutions and the broker firm offer.

The institutional and broker firm components of the Offer were oversubscribed and we look forward to the same positive response when the Offer opens on Monday 8 November 2004.

Given HDUF's forecast yield, its stable and predictable distribution profile and potential growth opportunities in this sector we believe that HDUF offers an attractive investment proposition, Mr Hallam said.

The investment highlights of HDUF include:

Attractive yields

Estimated market capitalisation of \$379 million

Stable and predictable distributions

Substantial level of tax deferral on distributions

Diversification of assets by geography and regulatory regime

Significant growth opportunities in the sector

Experienced boards and management

Lowest gearing among its peers

Mr Hallam said Hastings would manage the Fund and as one of the largest infrastructure sector focussed investment managers in Australia, Hastings would be evaluating growth opportunities in Australia, New Zealand and other OECD countries.

He said HDUF's objective was to target investments including gas transmission and distribution, electricity generation, transmission and distribution, and hydro and wind power generation assets.

New investments will maintain an appropriate balance between a regular cash yield to security holders and prospects for long term capital growth.

Given the investment opportunities, coupled with the strength of the management team and board of HDUF and the financial expertise of Hastings and Westpac we are confident that we can further grow and diversify our portfolio and maximise returns to investors, Mr Hallam said.

HDUF's initial assets are the Epic Energy gas transmission pipeline business comprising:

Moomba to Adelaide Pipeline System in South Australia

The South West Queensland Pipeline System in Queensland

Pilbara Pipeline System in Western Australia

Chief Executive Officer of Epic Energy, Mr Alan Freer, said the pipelines were strategically located servicing key players in the Australian gas and energy sectors.

The Offer is expected to result in the issue of 148 million securities of HDUF to institutions and members of the general public to raise approximately \$379 million. Securities in HDUF are scheduled to commence normal trading on the Australian Stock Exchange on Tuesday 21 December 2004.

The Offer is scheduled to open on Monday 8 November and close at 5pm on Wednesday 8 December.

Westpac owns 51 percent of Hastings Funds Management.
