Fair Value Measurements

Under Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The following is a summary of the inputs used as of March 31, 2009, in valuing the Fund's investments carried at value:

| Valuation Inputs | Investments in Securities |
|---|--------------------------------------|
| Level 1 Quoted prices | \$ 2,814,955 |
| Level 2 Other significant observable inputs | 478,887 |
| Level 3 Significant unobservable inputs | |
| Total | \$ 3,293,842 |

There were no investments in securities characterized as Level 3 on December 31, 2008, or March 31, 2009.
