VISTEON CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Basis of Presentation

Description of Business: Visteon Corporation (the "Company" or "Visteon") is a global supplier of automotive systems, modules and components to global automotive original equipment manufacturers ("OEMs"). Headquartered in Van Buren Township, Michigan, Visteon has a workforce of approximately 29,000 employees and a network of manufacturing operations, technical centers and joint ventures in every major geographic region of the world with its operations organized by global product lines including Climate, Electronics and Interiors.

During the three-month period ended September 30, 2014, the Company continued to progress its Shareholder Value Creation Plan initially announced in September 2012. On July 1, 2014, Visteon completed the acquisition of the automotive electronics business of Johnson Controls Inc. This acquisition is expected to enhance Visteon's competitive position in the fast-growing vehicle cockpit electronics segment by strengthening its global scale, manufacturing and engineering footprint, product portfolio and customer penetration. Net sales for the acquired business were approximately \$1.3 billion for the annual period ended September 30, 2013. On a combined basis the Company's Electronics business is expected to have approximately \$3 billion in annual revenue. Additional details are provided in Note 2 "Business Acquisitions." On November 1, 2014 the Company closed on the sale of a majority of its Interiors business subject to a May 1, 2014 master purchase agreement as amended and as more fully described in Note 3 "Interiors Divestiture".

Interim Financial Statements: The unaudited consolidated financial statements of the Company have been prepared in accordance with the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") have been condensed or omitted pursuant to such rules and regulations. These interim consolidated financial statements include all adjustments (consisting of normal recurring adjustments, except as otherwise disclosed) that management believes are necessary for a fair presentation of the results of operations, financial position and cash flows of the Company for the interim periods presented. Interim results are not necessarily indicative of full-year results.

Use of Estimates: The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates, judgments and assumptions that affect amounts reported herein. Management believes that such estimates, judgments and assumptions are reasonable and appropriate. However, due to the inherent uncertainty involved, actual results may differ from those provided in the Company's consolidated financial statements.

Reclassifications: Certain prior period amounts have been reclassified to conform to the current period presentation.

Principles of Consolidation: The consolidated financial statements include the accounts of the Company and all subsidiaries that are more than 50% owned and over which the Company exercises control. Investments in affiliates of greater than 20% and for which the Company exercises significant influence but does not exercise control are accounted for using the equity method. All other investments in affiliates are accounted for using the cost method.

Restricted Cash: Restricted cash represents amounts designated for uses other than current operations and includes \$10 million of collateral for the Letter of Credit Facility with US Bank National Association, and \$2 million related to cash collateral for other corporate purposes at September 30, 2014.

Recent Accounting Pronouncements: In April 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-8, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity". This ASU changes the requirements for reporting discontinued operations to disposals

of components of an entity that represent strategic shifts that have a major effect on an entity's operations and financial results. The standard also expands the disclosures for discontinued operations and requires new disclosures related to individually material disposals that do not qualify for discontinued operations reporting. The guidance is effective for interim and annual periods beginning after December 15, 2014, and should be applied prospectively. Early adoption is permitted. The Company is currently evaluating the impact of adoption of this ASU on its consolidated financial statements and did not early adopt this standard for purposes of the discontinued operations disclosed in Note 3 "Interiors Divestiture".

In May 2014, the FASB issued ASU No. 2014-9, "Revenue from Contracts with Customers", which stipulates that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This new guidance

Table of Contents

is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early adoption is not permitted. The Company is currently evaluating the impact of the adoption of this ASU on its consolidated financial statements.

NOTE 2. Business Acquisitions

Electronics Acquisition

On July 1, 2014, the Company completed the acquisition of substantially all of the global automotive electronics business of Johnson Controls Inc. (the "Electronics Acquisition") for an aggregate purchase price of \$295 million, including \$31 million of cash and equivalents at the acquired business. The purchase price was funded with cash on hand and remains subject to adjustments as provided in the Purchase Agreement. The operating results for the business acquired have been included in the Electronics segment from the date of acquisition. Through the three and nine months ended September 30, 2014, the Company incurred acquisition-related costs of approximately \$4 million and \$9 million, respectively. These amounts were recorded as incurred and have been classified as Other expenses within the Consolidated Statements of Comprehensive (Loss) Income.

The Electronics Acquisition was accounted for as a business combination, with the purchase price allocated on a preliminary basis as of July 2014. The preliminary purchase price and related allocation are shown below.

Purchase price	\$295	
Cash acquired	(31)
Purchase price net of cash acquired	\$264	
Assets Acquired:		
Accounts receivable	\$212	
Inventories	101	
Property and equipment	125	
Contractually reimbursable engineering costs	77	
Intangible assets	16	
Other assets acquired	28	
Total assets acquired	\$559	
Liabilities Assumed:		
Accounts payable	\$176	
Other liabilities assumed	80	
Total liabilities assumed	\$256	
Non-controlling interests	39	
Total purchase price allocation	\$264	

Assets acquired and liabilities assumed were recorded at estimated fair values based on management's estimates, available information, and reasonable and supportable assumptions. Additionally, the Company utilized a third-party to assist with certain estimates of fair values.

Fair value estimates for property and equipment were based on appraised values utilizing cost and market approaches.

Fair value estimates for contractually reimbursable engineering costs were based on discounted cash flows, which is an income model.

Fair values for intangible assets were based on a combination of market and income approaches, including the relief from royalty method.

These fair value measurements are classified within level 3 of the fair value hierarchy. The preliminary purchase price allocations may be subsequently adjusted to reflect final valuation results and purchase price adjustments.

Table of Contents

Included in the Company's results of operation for three months ended September 30, 2014 are sales of \$329 million and gross margin of \$47 million related to the Electronics Acquisition. Additionally, pro forma financial information is presented in the following table for the three months ended September 30, 2013 and nine month periods ended September 30, 2014 and 2013 as if the Electronics Acquisition had occurred on January 1, 2013. The pro forma financial information is unaudited and is provided for informational purposes only and does not purport to be indicative of the results which would have actually been attained had the acquisition occurred on January 1, 2013 or that may be attained in the future.

	Three Months Ended September 30 2013 (Dollars in Millions, Unaudited)	Nine Months Ended September 30 2014	2013
Sales	\$ 1,793	\$6,167	\$5,632
Gross margin	\$ 170	\$633	\$548

Climate Acquisitions

In August 2014, Halla Visteon Climate Control Corporation ("HVCC") acquired the automotive thermal and emissions business of Cooper-Standard Automotive Inc., a subsidiary of Cooper-Standard Holdings Inc. (the "Thermal Acquisition"), for cash of \$46 million. The Thermal Acquisition is expected to expand the thermal energy management product portfolio of HVCC and further diversify its customer base.

Net sales for the acquired business were approximately \$66 million for the annual period ended December 31, 2013. The operating results for the business acquired have been included in the Climate segment from the date of acquisition. Through both three and nine months ended September 30, 2014, the Company incurred acquisition-related costs of approximately \$1 million. These amounts were recorded as incurred and have been classified as Other expenses within the Consolidated Statements of Comprehensive (Loss) Income.

The Thermal Acquisition was accounted for as a business combination, with the purchase price allocated on a preliminary basis as of August 2014.

Purchase price	\$46
Property and equipment	\$30
Intangible assets	8
Goodwill	8
Total purchase price allocation	\$46

Assets acquired and liabilities assumed were recorded at estimated fair values based on management's estimates, available information, and reasonable and supportable assumptions. Additionally, the Company utilized a third-party to assist with the estimation of fair values. Fair value estimates for property and equipment were based on appraised values utilizing cost and market approaches. Fair values for intangible assets were based on a combination of market and income approaches. These fair value measurements are classified within level 3 of the fair value hierarchy. The preliminary purchase price allocations may be subsequently adjusted to reflect final valuation results.

On September 1, 2014, HVCC completed the acquisition of a controlling 51% equity interest in Japan Climate Systems - Nanjing ("JCS-Nanjing") for \$7 million. The Company commenced consolidation of JCS-Nanjing from the September 1, 2014 acquisition date. This acquisition was accounted for as a business combination, with the purchase price allocated on a preliminary basis as of September 2014. In connection with the preliminary purchase price allocation, HVCC recorded goodwill of \$2 million. The preliminary purchase price allocations may be subsequently adjusted to reflect final valuation results.

The pro forma effects of these Climate acquisitions would not materially impact the Company's reported results for any period presented, and as a result no pro forma financial statements are presented.

Table of Contents

NOTE 3. Interiors Divestiture

On May 1, 2014, the Company entered into a Master Purchase Agreement as amended (the "Purchase Agreement") pursuant to which, Visteon will reorganize substantially all of its global Interiors business under a newly-formed holding company (the "Reorganization") and will sell all of the equity of that holding company (the "Interiors Divestiture") in exchange for the assumption of certain liabilities related to the Company's Interiors business and the payment of nominal cash consideration. Visteon agreed to contribute up to \$95 million (the "Cash Contribution") to the Interiors business and the Purchase Agreement includes net working capital adjustments whereby the Cash Contribution will be effectively adjusted based on the actual net working capital levels as of the closing date. Visteon also agreed to support the buyer in establishing external credit facilities. To the extent that \$90 million of external credit facilities are not available to the Interiors business by the date of closing, Visteon is required to provide a seller-backed revolving credit facility in the amount of any shortfall. Draws under any such seller-backed facility will only be available if certain of the external credit facilities are fully drawn, and any draws on the seller-backed facility generally must be repaid prior to the repayment of the external credit facilities. The seller-backed facility will have a maturity of three years and will have a default rate of interest for any interest and/or principal payment defaults.

On November 1, 2014, the Company closed on the majority of the Interiors Divestiture (the "Master Closing") and completed the largest phase of the Interiors Divestiture to Reydel Automotive Holdings B.V., an affiliate of Cerberus Capital Management, L.P. In connection with the Master Closing, the Company made a cash payment of approximately \$120 million, which included the \$95 million Cash Contribution and adjustments primarily for working capital subject to further adjustments. The Company also agreed to provide a \$56 million revolving credit facility in connection with the Master Closing, which is the shortfall to the agreed \$90 million target in external financing arrangements. As transaction related customer purchase order changes are effected over the next several months, increasing the backing of the buyer implemented factoring facility, the seller backed facility is expected to be substantially reduced. The seller-backed facility obligation can also be reduced if the buyer adds working capital facilities in Russia and Thailand. Draws under this seller-backed facility will only be available if certain of the external credit facilities are fully drawn, and any draws on the seller-backed facility generally must be repaid prior to the repayment of the external credit facilities. The seller-backed facility has a maturity of three years and will have an interest rate of Libor plus 5%.

Additionally, as part of the Reorganization, Visteon will separate the portion of its Interiors business conducted through its facilities in Chennai and Pune, India into a new legal entity, which will be transferred to the holding company and sold to the buyer as part of the Interiors Divestiture. Due to the time required to effect such separation under Indian law, the consummation of the Indian portion of the Interiors Divestiture will occur subsequent to the Master Closing but is expected before December 31, 2014. The Thailand, Argentina and Brazil portions of the Interiors Divestiture will also occur subsequent to the Master Closing and are expected to close during the first quarter of 2015. The remaining transactions are subject to various conditions, including regulatory and antitrust approvals, receipt of other third party consents and approvals and other customary closing conditions, and may be subject to further cash impacts based on purchase price adjustments at the time of closing. The Company expects to record additional losses in connection with the Interiors Divestiture in future periods upon closing. The losses are estimated to range from \$150 million to \$200 million, of which the majority is likely to be recorded during the three months ending December 31, 2014 associated with the Master Closing.

The Company determined that assets and liabilities subject to the Interiors Divestiture met the "held for sale" criteria during the quarterly period ended June 30, 2014. As the fair value of the assets and liabilities subject to the Interiors Divestiture was less than the carrying value, the long-lived assets were written down in their entirety, which resulted in an impairment loss of \$15 million and \$188 million in the three and nine month periods ended September 30, 2014, respectively. Additionally, the held for sale Interiors assets and liabilities were reclassified in the Consolidated Balance Sheets to Assets held for sale or Liabilities held for sale, respectively, as the sale of such assets and liabilities

is expected to close within one year. Assets and liabilities held for sale are summarized as follows:

Assets Held for Sale	September 30 2014 (Dollars in Millions)	Liabilities Held for Sale	September 30 2014 (Dollars in Millions)
Cash and equivalents	\$99	Short-term debt	\$12
Restricted cash	13	Accounts payable	182
Accounts receivable, net	156	Accrued employee liabilities	39
Inventories, net	27	Employee benefits	16
Other assets	55	Other liabilities	36
Total assets held for sale	\$350	Total liabilities held for sale	\$285

Table of Contents

The short-term debt held for sale includes an arrangement through a subsidiary in France to sell accounts receivable with recourse on an uncommitted basis. The Company is required to fund any amounts outstanding under this facility as of the transaction close date. On November 1, 2014, in connection with the Master Closing, the Company funded the outstanding balance under this facility which was approximately \$1 million.

Interiors Discontinued Operations

The operations subject to the Interiors Divestiture met conditions required to qualify for discontinued operations reporting as of June 30, 2014. Accordingly, the results of operations for Interiors business subject to the Interiors Divestiture have been reclassified to (Loss) income from discontinued operations, net of tax in the Consolidated Statements of Comprehensive (Loss) Income for the three and nine-month periods ended September 30, 2014 and September 30, 2013. While the Interiors Divestiture represents the substantial majority of the Company's Interiors operations, other operations previously reported within the Company's Interiors reporting segment were excluded from the scope of the Interiors Divestiture. These other operations have been classified within the Other reporting segment. Due to certain liabilities and capital requirements of the remaining business, Visteon may be required to contribute cash to such business in connection with any disposition and such amounts could be material.

Discontinued operations are summarized as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2014	2013	2014	2013
	(Dollars in Millions)			
Sales	\$208	\$249	\$730	\$801
Cost of sales	201	241	678	767
Gross margin	7	8	52	34
Selling, general and administrative expenses	13	14	40	41
Long-lived asset impairment	15	—	188	—
Other expenses	8	(1)	22	9
Loss from discontinued operations before income taxes	(29)	(5)	(198)	(16)
(Benefit from) provision for income taxes	—	(3)	2	(18)
(Loss) income from discontinued operations, net of tax	(29)	(2)	(200)	2
Net (loss) income attributable to non-controlling interests	—	—	(11)	2
Net loss from discontinued operations attributable to Visteon	\$(29)	\$(2)	\$(189)	\$—

NOTE 4. Yanfeng Transactions

On August 12, 2013, Visteon entered into a Master Agreement (the “Master Agreement”) with Huayu Automotive Systems Company Limited (“HASCO”), Yanfeng Visteon Automotive Trim Systems Co., Ltd. (“Yanfeng”) and Yanfeng Visteon Automotive Electronics Co., Ltd. (“YFVE”), pursuant to which, among other things, Visteon and HASCO agreed to modify their existing interests in automobile interiors and electronics joint ventures in the People’s Republic of China, including Yanfeng and YFVE.

On December 17, 2013, Visteon completed the sale of its 50% ownership interest in Yanfeng for cash proceeds of \$928 million (before applicable taxes). On November 7, 2013, Visteon made a cash payment of \$58 million to subscribe to an additional 11% ownership interest in YFVE, increasing Visteon's direct ownership interest in YFVE from a non-controlling 40% direct ownership interest to a controlling 51% direct ownership interest. From that date, the financial position, results of operations and cash flows of YFVE have been consolidated into the Company's financial statements as part of the Electronics business unit.

As of September 30, 2014, and in accordance with the Master Agreement, YFVE completed the sale of its ownership interests in certain joint ventures to Yanfeng Visteon Electronics (China) Investment Co., Ltd. ("YFVIC") for cash proceeds of \$37 million. No gains or losses were recorded on these transactions by YFVE due to the Company's 50% ownership interest in YFVIC. Differences between carrying value and proceeds on these investments, if any, have been deferred as a basis adjustment to the Company's investment in YFVIC.

In October 2014, YFVIC completed the purchase of Yanfeng's 49% direct ownership in YFVE pursuant to the Master Agreement. The purchase by YFVIC was financed through a shareholder loan from Yanfeng and external borrowings of approximately \$40 million which were guaranteed by Visteon. The guarantee contains standard non-payment provisions to cover the borrowers in event of non-payment of principal, accrued interest, and other fees for its five year tenor.

Table of Contents

NOTE 5. Investments in Affiliates

The Company recorded equity in the net income of affiliates of \$2 million and \$48 million for the three-month periods ended September 30, 2014 and 2013, and \$15 million and \$134 million for the nine-month periods ended September 30, 2014 and 2013, respectively. Investments in affiliates were \$167 million and \$228 million at September 30, 2014 and December 31, 2013, respectively. At September 30, 2014, affiliates accounted for under the equity method totaled \$123 million and affiliates accounted for under the cost method totaled \$44 million. Effective December 17, 2013, and in accordance with the Master Agreement, the Company, among other things, completed the sale of its 50% ownership interest in Yanfeng and changed from the equity method to the cost method of accounting for certain Yanfeng related Interiors joint ventures, including Yanfeng Visteon Jinqiao Automotive Trim Systems Co., Ltd.

The Company monitors its investments in affiliates for indicators of other-than-temporary declines in value on an ongoing basis. If the Company determines that such a decline has occurred, an impairment loss is recorded, which is measured as the difference between carrying value and fair value. In April 2014, Visteon completed the sale of its 50% ownership stake in Duckyang, a Korean automotive interiors joint venture for total cash of \$31 million.

NOTE 6. Restructuring

During the three and nine-months ended September 30, 2014, the Company recorded restructuring expenses of \$9 million and \$23 million, respectively. Given the economically-sensitive and highly competitive nature of the automotive industry, the Company continues to closely monitor current market factors and industry trends taking action as necessary, including but not limited to, additional restructuring actions. However, there can be no assurance that any such actions will be sufficient to fully offset the impact of adverse factors on the Company or its results of operations, financial position and cash flows.

Restructuring reserve balances of \$15 million and \$29 million at September 30, 2014 and December 31, 2013, respectively, are classified as Other current liabilities on the consolidated balance sheets. The Company anticipates that the activities associated with these reserves will be substantially completed by the end of 2014. The Company's restructuring reserves and related activity, including amounts attributable to discontinued operations, are as follows.

	Climate (Dollars in Millions)	Electronics	Corporate	Other	Total
Balance at December 31, 2013	\$1	\$—	\$3	25	\$29

Balance at September 30, 2014	\$1	\$4	\$—	\$10	\$15

Restructuring Activities - Three and Nine Months Ended September 30, 2014

In connection with the Electronics Acquisition, the Company commenced a restructuring program designed to achieve cost savings through transaction synergies. The Company expects to incur approximately \$40 million to \$60 million of restructuring costs during the program. During the three-months ended September 30, 2014, the Company recorded \$5 million of severance and termination benefits under this program associated with approximately 115 employees.

The Company anticipates recording additional restructuring charges related to this program in future periods as underlying plans are finalized. Approximately \$4 million remains accrued at September 30, 2014.

The Company previously announced a \$100 million restructuring program designed to reduce fixed costs and to improve operational efficiency by addressing certain under-performing operations. In connection with that program, the Company announced plans to restructure three European Interiors facilities, to consolidate its Climate operations and to realign its corporate and administrative functions directly to their corresponding operational beneficiary. As of September 30, 2014, this \$100 million restructuring program

Table of Contents

has been substantially completed. During the three-months ended September 30, 2014, the Company recorded \$10 million of restructuring expenses, including amounts associated with discontinued operations, primarily related to the following activities:

The previously announced closure of the Climate facility located in Quilmes, Argentina. In connection with the closure, the Company recorded an additional \$3 million of restructuring expenses, related to severance and termination benefits.

The Company recorded \$6 million of severance and termination benefits associated with approximately 100 employees at two European Interiors facilities. This amount has been classified within discontinued operations on the Consolidated Statements of Comprehensive (Loss) Income for the three-month period ended September 30, 2014. Approximately \$3 million remains accrued as of September 30, 2014.

During the second quarter of 2014, the Company recorded \$17 million of restructuring expenses, including amounts associated with discontinued operations, among which \$10 million and \$2 million were primarily related to severance and termination benefits in connection with the previously announced closure of the Climate facilities in Quilmes, Argentina and Port Elizabeth, South Africa, respectively, and \$5 million was in connection with the previously announced restructuring of three Interiors facilities in France.

Utilization represents payments for severance and other employee termination benefits and special termination benefits reclassified to pension and other postretirement employee benefit liabilities, where such payments are made from the Company's benefit plans.

Restructuring Activities - Three and Nine Months Ended September 30, 2013

During the third quarter of 2013, the Company recorded \$10 million of restructuring expenses, net of reversals, primarily related to severance and termination benefits associated with approximately 250 employees, including \$7 million related to the reorganization of the operations at a facility in Brazil and \$2 million in connection with the reorganization of the Company's Climate operations.

During the first quarter of 2013, the Company recorded \$20 million of restructuring expenses, net of reversal, primarily related to severance and termination benefits associated with approximately 140 employees, including \$14 million in connection with the reorganization of the Company's Climate operations in France and \$6 million related to the transformation of its corporate and administrative functions. The Company recorded \$2 million of additional restructuring expenses associated with these programs during the first quarter of 2014.

NOTE 7. Other Expenses

Other expenses consist of the following:

	Three Months Ended September 30		Nine Months Ended September 30	
	2014	2013	2014	2013
	(Dollars in Millions)			
Transformation costs	\$13	\$8	\$20	\$21
Integration costs	4	—	11	—
Provision for losses on recoverable taxes	—	—	8	—
Loss on asset contribution	3	—	3	—
Gain on sale of equity interest	—	—	(2)	(5)
UK Administration recovery	—	(2)	—	(2)
	\$20	\$6	\$40	\$14

Transformation Costs

Business transformation costs of \$13 million and \$20 million were incurred during the three-month and nine-month periods ended September 30, 2014, respectively, related to financial and advisory services associated with continued execution of the Company's comprehensive value creation plan, including fees associated with the Electronics Acquisition.

Table of Contents**Integration Costs**

During the three and nine -month periods ended September 30, 2014, the Company recorded \$4 million and \$11 million, respectively, of costs to integrate the businesses associated with Electronics Acquisition. Integration costs incurred were related to re-branding, facility modification, information technology readiness and related professional services.

Provision for Losses on Recoverable Taxes

The Company recorded \$8 million during the three months ended June 30, 2014 to adjust recoverable value-added taxes to net realizable value attributable to business exit activities.

Loss on Asset Contribution

During the three months ended September 30, 2014, the Company contributed land and building with a net book value of \$3 million to the local municipality in Quilmes, Argentina for the benefit of former employees.

Gain on Sale of Equity Interest

In April 2014, the Company completed the sale of its 50% ownership interest in Duckyang Industry Co., Ltd. ("Duckyang"), a Korean automotive interiors supplier. In connection with the transaction, the Company received total cash of approximately \$31 million, including \$6 million of dividends. The Company recorded a pre-tax gain of approximately \$2 million on this transaction during the nine months ended September 30, 2014. In June 2013, the Company completed the sale of its 20% equity interest in Dongfeng Visteon Automotive Trim Systems Co., Ltd. ("Dongfeng") for proceeds of approximately \$20 million and recognized a gain of \$5 million during the nine months ended September 30, 2013.

NOTE 8. Inventories

Inventories are stated at the lower of cost, determined on a first-in, first-out basis, or market. A summary is provided below:

	September 30 2014	December 31 2013
	(Dollars in Millions)	
Raw materials	\$282	\$204
Work-in-process	163	191
Finished products	139	104
Valuation reserves	(22)	(27)
	\$562	\$472

Effective July 1, 2014, the Company recorded \$101 million of inventory at fair value in connection with the Electronics Acquisition. The fair value of inventory was based on management's estimate, available information, and reasonable and supportable assumptions, resulting in an increase of \$2 million over the acquiree's historical cost. This amount was subsequently expensed in Cost of sales on the Company's Consolidated Statements of Comprehensive (Loss) Income during the three-month period ended September 30, 2014.

Table of Contents

NOTE 9. Other Assets

Other current assets are comprised of the following components:

	September 30 2014	December 31 2013
	(Dollars in Millions)	
Recoverable taxes	\$ 148	\$ 140
Joint venture receivables	61	63
Pledged accounts receivable	—	52
Prepaid assets and deposits	49	45
Deferred tax assets	35	36
Contractually reimbursable engineering costs	30	—
Other	22	16
	\$345	\$352

Pledged accounts receivable are related to an arrangement, through a subsidiary in France, to sell accounts receivable with recourse on an uncommitted basis. At September 30, 2014 these pledged receivables totaling \$30 million were reclassified as assets held for sale in connection with the Interiors Divestiture.

Other non-current assets are comprised of the following components:

	September 30 2014	December 31 2013
	(Dollars in Millions)	
Deferred tax assets	\$90	\$69
Recoverable taxes	49	63
Contractually reimbursable engineering costs	42	13
Other	36	40
	\$217	\$185

Current and non-current contractually reimbursable engineering costs of \$30 million and \$42 million, respectively, at September 30, 2014, are related to pre-production design and development costs incurred pursuant to long-term supply arrangements that are contractually guaranteed for reimbursement by customers. The Company expects to receive reimbursements of approximately \$10 million, \$34 million, \$21 million, \$6 million and \$1 million in the annual periods of 2014, 2015, 2016, 2017 and 2018 and after, respectively.

NOTE 10. Property and Equipment

Property and equipment, net consists of the following:

	September 30 2014	December 31 2013
	(Dollars in Millions)	
Land	\$ 147	\$ 162
Buildings and improvements	294	301
Machinery, equipment and other	1,326	1,309
Construction in progress	159	145
Total property and equipment	1,926	1,917
Accumulated depreciation	(598)	(580)
	1,328	1,337
Product tooling, net of amortization	75	77
Property and equipment, net	\$ 1,403	\$ 1,414

Table of Contents

Property and equipment is depreciated principally using the straight-line method of depreciation over the related asset's estimated useful life. Generally, buildings and improvements are depreciated over a 40-year estimated useful life, leasehold improvements are depreciated on a straight-line basis over the initial lease term period, and machinery, equipment and other are depreciated over estimated useful lives ranging from 3 to 15 years. Product tooling is amortized using the straight-line method over the estimated life of the tool, generally not exceeding six years. Depreciation and amortization expense for property and equipment, inclusive of amounts attributable to discontinued operations, is as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2014	2013	2014	2013
	(Dollars in Millions)			
Depreciation	\$58	\$54	\$157	\$160
Amortization	3	3	8	8
	\$61	\$57	\$165	\$168

NOTE 11. Intangible Assets

Intangible assets, net are summarized as follows:

	Estimated Weighted Average Useful Life (years)	September 30, 2014			December 31, 2013		
		Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
		(Dollars in Millions)					
Definite-Lived							
Developed technology	8	\$229	\$106	\$123	\$219	\$88	\$131
Customer related	10	213	59	154	214	45	169
Other	39	30	10	20	32	9	23
Subtotal		\$472	\$175	\$297	\$465	\$142	\$323
Indefinite-Lived							
Goodwill				\$107			\$97
Trade names				27			27
Subtotal				134			124
Total				\$431			\$447

Effective July 1, 2014, and in connection with the Electronics Acquisition, the Company recorded approximately \$16 million of identifiable intangible assets, predominantly related to developed technology. These definite lived intangible assets are being amortized over their estimated useful lives of 6 years, using the straight-line method.

In connection with the Thermal Acquisition, the Company recorded intangible assets including developed technology of \$6 million and customer related assets of \$2 million. These definite lived intangible assets are being amortized using the straight-line method over their estimated useful lives of 9 years for developed technology and 12-14 years for customer related assets. Additionally, the Company recorded goodwill of approximately \$8 million for the excess of the purchase price over the net of the fair values of the identifiable assets and liabilities acquired.

During the three-month period ended June 30, 2014, the Company determined that assets and liabilities subject to the Interiors Divestiture met the "held for sale" criteria. As the fair value of the assets and liabilities subject to the Interiors Divestiture was less than the carrying value, the long-lived assets were written down in their entirety, which

included definite lived intangible assets of \$7 million as of June 30, 2014. The Company recorded approximately \$14 million and \$40 million of amortization expense related to definite-lived intangible assets for the three-month and nine-month periods ended September 30, 2014, respectively. The Company currently estimates annual amortization expense to be \$52 million for 2014, \$54 million for 2015, \$53 million for 2016, \$51 million for 2017 and \$45 million for 2018. Indefinite-lived intangible assets, including goodwill and trade names are not amortized but are tested for impairment at least annually, or earlier when events and circumstances indicate that it is more likely than not that such assets have been impaired.

Table of Contents

A roll-forward of the gross carrying amounts of intangible assets, by product group is presented below.

Other	61	33
Total long-term debt	\$840	\$624

Table of Contents

On April 9, 2014, the Company entered into a new credit agreement (the “Credit Agreement”), by and among the Company as borrower, each lender from time to time party thereto, each letter of credit issuer from time to time party thereto and Citibank, N.A. as administrative agent (the “Administrative Agent”), which provides for (i) delayed draw term loans in an aggregate principal of \$600 million (the “Term Facility”) and (ii) a \$200 million revolving credit facility (the “Revolving Facility”). The Company and certain of its subsidiaries have granted a security interest in substantially all of their respective property, subject to certain limitations.

At the Company’s option, loans under the Term Facility and Revolving Facility may be maintained from time to time at an interest rate equal to the applicable rate (“Applicable Rate”) plus the applicable domestic rate (“Base Rate”) or the LIBOR-based rate (“Eurodollar Rate”). The Base Rate shall be a fluctuating rate per annum equal to the highest of (i) the rate equal to the weighted average of the rates on overnight federal funds transactions with members of the Federal Reserve System arranged by federal funds brokers, as published by the Federal Reserve Bank of New York on the following Business Day, plus 0.50%; (ii) the rate established by the Administrative Agent as its “prime rate” at its principal U.S. office and (iii) the Eurodollar Rate (which, for the purposes of establishing the Base Rate, shall not be less than 0.75%) plus 1%. The Eurodollar Rate shall be equal to the quotient obtained by dividing (a) the ICE Benchmark Administration Limited LIBOR Rate by (b) the difference between 1.00 and the reserve percentage under regulations issued from time to time by the Board of Governors of the Federal Reserve System of the United States for determining the maximum reserve requirement with respect to Eurocurrency funding. The Applicable Rate varies based on certain corporate credit ratings at the time of borrowing, and ranges from 1.00% to 1.75% for Base Rate loans and 2.00% to 2.75% for Eurodollar Rate loans.

Up to \$75 million of the Revolving Facility is available for the issuance of letters of credit, and any such issuance of letters of credit will reduce the amount available for loans under the Revolving Facility. Up to \$20 million of the Revolving Facility is available for swing line advances, and any such swing line advances will reduce the amount available for loans under the Revolving Facility. The Company may request increases in the limits under the Term Facility and the Revolving Facility and may request the addition of one or more term loan facilities under the Credit Agreement.

The Term Facility shall mature on April 9, 2021 (the “Term Facility Maturity Date”), and the Revolving Facility shall mature on April 9, 2019 (the “Revolving Facility Maturity Date”). Loans made under the Term Facility are due and payable in full on the Term Facility Maturity Date. Loans made under the Revolving Facility are due and payable in full on the Revolving Facility Maturity Date. Outstanding borrowings may be prepaid without penalty (other than borrowings made for the purpose of reducing the effective interest rate margin or weighted average yield of the loans) in \$100,000 increments over \$500,000 for loans maintained under the Base Rate and in \$250,000 increments over \$1,000,000 for loans maintained under the Eurodollar Rate. In the event the Company makes a prepayment of the term loans in connection with a repricing transaction at any time prior to the six month anniversary of the closing date, the Company must pay a prepayment premium equal to 1.0% of the principal amount of term loans prepaid or repaid to the applicable lenders under the Term Facility. There are mandatory prepayments of principal in connection with: (i) excess cash flow sweeps (in the amount of 50%, with step downs to 25% and 0% of the excess cash flow, depending on the then-applicable leverage), (ii) certain asset sales or other dispositions (including as a result of casualty or condemnation), (iii) certain refinancings of indebtedness and (iv) over-advances under the Revolving Facility. The Company is also required to repay quarterly 0.25% of the initial term loan drawn.

The Credit Agreement requires the Company and its subsidiaries to comply with customary affirmative and negative covenants, including financial covenants and contains customary events of default. The Term Facility and the Revolving Facility require that, as of the last day of any four consecutive fiscal quarters of the Company last ended (commencing as of June 30, 2014), the Company maintain a total net leverage ratio no greater than 3.00:1.00 (the “Financial Maintenance Covenant”). During any period when the Company’s corporate and family ratings meet certain specified ratings, certain of the negative covenants shall be suspended and the Financial Maintenance Covenant shall

only be tested with respect to the Revolving Facility. As of September 30, 2014, the Company was in compliance with the Financial Maintenance Covenant.

All obligations under the Credit Agreement and obligations in respect of certain cash management services and swap agreements with the lenders and their affiliates are unconditionally guaranteed by certain of the Company's subsidiaries. In connection with the Credit Agreement, on April 9, 2014, (i) the Company, certain of its subsidiaries and the Administrative Agent entered into a Security Agreement (the "Security Agreement"), (ii) certain subsidiaries of the Company and the Administrative Agent entered into a Guaranty Agreement (the "Guaranty Agreement") and (iii) the Company, certain of its subsidiaries and the Administrative Agent entered into an Intellectual Property Security Agreement (the "Intellectual Property Security Agreement" and, together with the Security Agreement and the Guaranty Agreement, the "Security Documents"). Pursuant to the Security Documents, all obligations under the Credit Agreement are secured by a first-priority perfected lien (subject to certain exceptions) in substantially all of the property of the Company and the subsidiaries party to the Security Agreement, subject to certain limitations.

Table of Contents

In connection with signing of the Credit Agreement, on April 9, 2014, the Company terminated its \$130 million revolving loan credit agreement dated October 1, 2010. On June 23, 2014, the Company drew the \$600 million term loan, net of an original issue discount of \$9 million. On September 30, 2014, the company made its first mandatory repayment of 0.25% of the initial term loan or \$1.5 million. As of September 30, 2014, \$598.5 million face value was outstanding under the Term Facility, and there were no outstanding borrowings under the Revolving Facility.

6.75% Senior Notes Due April 15, 2019

The Company's 6.75% senior notes due April 15, 2019 (the "Senior Notes"), were issued under an Indenture (the "Indenture") among the Company, the subsidiary guarantors named therein, and The Bank of New York Mellon Trust Company, N.A., as trustee. The Indenture and the form of Senior Notes provide, among other things, that prior to April 15, 2014, the Company had the option to redeem up to 10% of the Senior Notes during any 12-month period from the issue date until April 15, 2014, for a 103% redemption price, plus accrued and unpaid interest to the redemption date. On April 10, 2014, the Company exercised this right and redeemed \$50 million, or 10%, of its Senior Notes. Additionally, the Company had the option to redeem a portion or all of the Senior Notes beginning on April 15, 2014, for a 105.063% redemption price, plus accrued and unpaid interest to the redemption date. On April 9, 2014, the Company exercised this right and issued a call notice and redeemed the remaining \$350 million of its Senior Notes on May 9, 2014. The Company recorded a \$23 million loss on extinguishment of debt in the nine months ended September 30, 2014, related to the premium paid on the debt redemption and unamortized original issue discount, debt fees and other debt issue costs associated with the Senior Notes.

HVCC Term Loans

During the first quarter of 2013, HVCC entered into and fully drew on two unsecured bilateral term loan credit agreements with aggregate available borrowings of approximately \$195 million. As of September 30, 2014, the U.S. dollar ("USD") equivalent of these agreements was \$195 million. Both credit agreements mature in May 2016, and are subject to financial covenants requiring total debt to EBITDA of not greater than 3.2x and a total interest coverage test of more than 3x. The Company was in compliance with such covenants at September 30, 2014.

Short-Term Debt

Short-term borrowings are primarily related to the Company's non-U.S. operations and are payable in various currencies. As of September 30, 2014, the Company had international affiliate short-term borrowings of \$134 million, approximately \$115 million of which is related to HVCC. As of December 31, 2013, the Company had international affiliate short-term borrowings of \$104 million, approximately \$68 million of which is related to HVCC. These borrowings are payable in both USD and non-USD currencies including, but not limited to, the Euro, Korean Won, Turkish Lira, and Chinese Yuan.

Short-term borrowings at December 31, 2013, include an arrangement, through a subsidiary in France, to sell accounts receivable with recourse on an uncommitted basis. The amount of financing available is dependent on the amount of receivables less customary reserves. The Company pays a 25 basis points servicing fee on all receivables sold, as well as a financing fee of three-month Euribor plus 95 basis points on the advanced portion. Outstanding borrowings under the facility at September 30, 2014 were \$12 million with \$30 million of receivables pledged as security, both of which were classified as held for sale. At December 31, 2013, there were \$31 million outstanding borrowings under the facility with \$52 million of receivables pledged as security. Pursuant to the Purchase Agreement the Company is required to fund any amounts outstanding under this facility as Master Closing of the Interiors Divestiture. On November 1, 2014, in connection with the Master Closing, the Company funded the outstanding balance under this facility which was approximately \$1 million.

Fair Value of Debt

The Company's fair value of debt excluding debt included in Liabilities held for sale was approximately \$978 million and \$755 million at September 30, 2014 and December 31, 2013, respectively. Fair value estimates were based on quoted market prices or current rates for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. Accordingly, the Company's debt fair value disclosures are classified as Level 1, "Market Prices" and Level 2, "Other Observable Inputs" in the fair value hierarchy, respectively.

Table of Contents

NOTE 13. Employee Benefit Plans

Defined Benefit Plans

The Company's net periodic benefit costs for the three-month periods ended September 30, 2014 and 2013 were as follows:

	U.S. Plans		Non-U.S. Plans	
	2014	2013	2014	2013
	(Dollars in Millions)			
Service cost	\$—	\$—	\$6	\$5
Interest cost	9	12	6	7
Expected return on plan assets	(12) (16) (4) (4
Settlements	(25) —	—	—
Special termination benefits	—	1	—	—
Amortization of actuarial losses	—	—	1	—
Net pension (benefit) expense	\$(28) \$(3) \$9	\$8

The Company's net periodic benefit costs for the nine-month periods ended September 30, 2014 and 2013 were as follows:

	U.S. Plans		Non-U.S. Plans	
	2014	2013	2014	2013
	(Dollars in Millions)			
Service cost	\$—	\$—	\$18	\$17
Interest cost	34	36	18	21
Expected return on plan assets	(43) (47) (12) (14
Settlements	(25) —	—	—
Special termination benefits	—	1	—	—
Amortization of actuarial losses	—	—	2	1
Net pension (benefit) expense	\$(34) \$(10) \$26	\$25

During the nine-month period ended September 30, 2014, the Company made cash contributions to non-U.S. defined benefit pension plans and U.S. retirement plans of \$17 million and \$2 million, respectively. During 2014, the Company expects to make additional cash contributions to its non-U.S. defined benefit pension plans of \$26 million. The Company's expected 2014 contributions may be revised.

Defined Contribution Plans

Most U.S. salaried employees and certain non-U.S. employees are eligible to participate in defined contribution plans by contributing a portion of their compensation, which is partially matched by the Company. The expense related to matching contributions was approximately \$3 million for both the three-month periods ended September 30, 2014 and 2013. The expense related to matching contributions was approximately \$11 million and \$9 million for the nine-month periods ended September 30, 2014 and 2013, respectively.

Annuity Purchase

On July 22, 2014, the Company purchased a non-participating annuity contract from Prudential Insurance Company of America ("Prudential") for certain participants under the U.S. defined benefit pension plan (the "Plan"). The annuity purchase covered approximately 3,900 participants and resulted in the settlement of approximately \$350 million of the outstanding pension benefit obligation ("PBO") under the Plan and recognized a settlement gain of \$25 million during

the three months ended September 30, 2014. This gain is the pro-rata portion of the existing unamortized gain in accumulated other comprehensive (loss) income ("AOCI") and was calculated based on the percentage of the Plan's PBO that was settled as part of the annuity purchase. Prudential has unconditionally and irrevocably guaranteed the full payment of benefits to plan participants associated with the annuity purchase and benefits payment will be in the same form that was in effect under the Plan. Prudential has also assumed all investment risk associated with the assets that were delivered as annuity contract premiums.

Table of Contents

NOTE 14. Income Taxes

During the three and nine-month periods ended September 30, 2014, the Company recorded income tax provisions of \$22 million and \$94 million, respectively, which includes income tax expense in countries where the Company is profitable, withholding taxes, changes in uncertain tax benefits, and the inability to record a tax benefit for pre-tax losses in the U.S. and certain other jurisdictions due to valuation allowances. Pre-tax losses from continuing operations in jurisdictions where valuation allowances are maintained and no income tax benefits are recognized totaled \$51 million and \$44 million, for the three months ended September 30, 2014 and 2013, respectively, resulting in an increase in the Company's effective tax rate in those years.

The Company provides for U.S. and non-U.S. income taxes and non-U.S. withholding taxes on the projected future repatriations of the earnings from its non-U.S. operations that are not considered permanently reinvested at each tier of the legal entity structure. During the three-month periods ended September 30, 2014 and 2013, the Company recognized expense of \$3 million and \$4 million, respectively, reflecting the Company's forecasts which contemplate numerous financial and operational considerations that impact future repatriations.

The Company's provision for income taxes in interim periods is computed by applying an estimated annual effective tax rate against income before income taxes, excluding equity in net income of non-consolidated affiliates for the period. Effective tax rates vary from period to period as separate calculations are performed for those countries where the Company's operations are profitable and whose results continue to be tax-effected and for those countries where full deferred tax valuation allowances exist and are maintained. The Company is also required to record the tax impact of certain other non-recurring tax items, including changes in judgments about valuation allowances and uncertain tax positions, and changes in tax laws or rates, in the interim period in which they occur.

The need to maintain valuation allowances against deferred tax assets in the U.S. and other affected countries will continue to cause variability in the Company's quarterly and annual effective tax rates. Full valuation allowances against deferred tax assets in the U.S. and applicable foreign countries will be maintained until sufficient positive evidence exists to reduce or eliminate them. The factors considered by management in its determination of the probability of the realization of the deferred tax assets include, but are not limited to, recent adjusted historical financial results, historical taxable income, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. If, based upon the weight of available evidence, it is more likely than not the deferred tax assets will not be realized, a valuation allowance is recorded. As part of the Electronics Acquisition, an existing Visteon legal entity in Mexico with substantial net operating loss carryforward attributes for which a valuation allowance was previously recorded acquired a portion of the operations in Mexico. Management projects the combined results from the acquired business should result in the partial utilization of the existing net operating loss carryforward attributes prior to their expiration, and consequently, the Company recognized a tax benefit through continuing operations of \$5 million related to the partial elimination of the valuation allowance during the third quarter of 2014.

Unrecognized Tax Benefits

Gross unrecognized tax benefits were \$83 million at September 30, 2014, and \$73 million at December 31, 2013, of which approximately \$38 million and \$30 million, respectively, represent the amount of unrecognized tax benefits that, if recognized, would impact the effective tax rate. The gross unrecognized tax benefit differs from that which would impact the effective tax rate due to uncertain tax positions embedded in other deferred tax attributes carrying a full valuation allowance. Since the uncertainty is expected to be resolved while a full valuation allowance is maintained, these uncertain tax positions should not impact the effective tax rate in current or future periods. The Company records interest and penalties on uncertain tax positions in income tax expense and related amounts accrued at September 30, 2014 and December 31, 2013 were \$27 million and \$23 million, respectively.

With few exceptions, the Company is no longer subject to U.S. federal tax examinations for years before 2009 or state and local, or non-U.S. income tax examinations for years before 2003. Although it is not possible to predict the timing of the resolution of all ongoing tax audits with accuracy, it is reasonably possible that certain tax proceedings in the U.S. and Asia (including Korea) could conclude within the next twelve months and result in a significant increase or decrease in the balance of gross unrecognized tax benefits. Given the number of years, jurisdictions and positions subject to examination, the Company is unable to estimate the full range of possible adjustments to the balance of unrecognized tax benefits.

Table of Contents

A reconciliation of unrecognized tax benefits, including amounts attributable to discontinued operations, is as follows:

	Nine Months Ended September 30, 2014 (Dollars in Millions)
Beginning balance	\$73
Additions to tax positions related to current period	6
Additions to tax positions related to prior periods	7
Settlements with tax authorities	(1)
Lapses in statute of limitations	(1)
Effect of exchange rate changes	(1)
Ending balance	\$83

During 2012, South Korean tax authorities commenced a review of the Company's South Korean affiliates (including Halla) for tax years 2007 through 2012, and issued formal notice of assessments, including penalties, of approximately \$25 million for alleged underpayment of withholding tax on dividends paid and other items, including certain management service fees charged by Visteon. The Company's South Korean affiliates have paid approximately \$25 million to the tax authorities in 2013 and 2012, as required under South Korean tax regulations, to pursue the appeals process. During the third quarter of 2014, the tax authorities refunded approximately \$11 million to the Company's South Korean affiliates, comprised of \$5 million representing substantially all of the tax associated with the management service fees charged by Visteon and \$6 million representing a partial refund related to withholding tax on dividends paid. The Company continues to evaluate all available settlement opportunities, including litigation related to the outstanding items and believes that it is more likely than not that it will receive a favorable outcome.

During 2012, Brazilian tax authorities issued tax assessment notices to Visteon Sistemas Automotivos ("Sistemas") of approximately \$15 million related to the sale of its chassis business to a third party. During 2013, after attempts to reopen an appeal of the administrative decision failed, Sistemas opened a judicial proceeding against the government to address the notice which required a deposit in the amount of the assessment in order to suspend the debt and allow Sistemas to operate regularly before the tax authorities. The Company believes that the risk of a negative outcome is remote once the matter is fully litigated at the highest judicial level. These appeal payments in South Korea and Brazil, as well as contingent income tax refund claims associated with other jurisdictions, including applicable accrued interest income, totaled \$34 million as of September 30, 2014, and were included in Other non-current assets on the consolidated balance sheet.

NOTE 15. Stockholders' Equity and Non-controlling Interests

Changes in equity for the three months ended September 30, 2014 and 2013 are as follows:

	2014			2013		
	Visteon	NCI	Total	Visteon	NCI	Total
	(Dollars in Millions)					
Stockholders' equity beginning balance	\$1,311	\$910	\$2,221	\$1,352	\$745	\$2,097

Dividends to non-controlling interests	—	(80)	(80)	—	(28)	(28)
Stockholders' equity ending balance	\$1,207	\$970	\$2,177	\$1,313	\$772	\$2,085
Stock Options						

During the three and nine-month periods ended September 30, 2014, the Company received payments of \$2 million and \$12 million related to the exercise of 29,847 and 151,789 stock options, respectively.

Share Repurchase Program

Since July 2012, the Company's board of directors has authorized a total of \$1.175 billion in share repurchases. On May 8, 2014, the Company announced an accelerated stock buyback ("ASB") program with a third-party financial institution to purchase shares of common stock for an aggregate purchase price of \$500 million. Under the program, the Company paid the financial institution \$500 million and received an initial delivery of 3,394,157 shares of common stock using a reference price of \$92.07, and an additional delivery of 1,129,001 shares of common stock following the conclusion of the hedge period which determined a certain minimum amount of shares guaranteed under a portion of the program that had a maximum per share price of \$100.54. The final settlement will be generally based on the volume-weighted average price of the Company's common stock over a period of up to approximately 12 months, less a negotiated discount, 50 percent of which will be subject to a maximum per share price. On October 15, 2014, the capped portion of the program concluded, and the Company received an additional 112,269 shares. As of September 30, 2014, \$375 million remained authorized and available for repurchase through December 31, 2015. The Company anticipates that additional repurchases of common stock, if any, would occur from time to time in open market or privately negotiated transactions depending on market and economic conditions, share price, trading volume, alternative uses of capital and other.

Non-controlling Interests

Non-controlling interests in the Visteon Corporation economic entity are as follows:

	September 30 2014	December 31 2013
	(Dollars in Millions)	
HVCC	\$785	\$777
YFVE	114	139
SVAE	40	—

Edgar Filing: VISTEON CORP - Form 10-Q

Visteon Interiors Korea, Ltd.	15	22
Other	16	15
Total non-controlling interests	\$970	\$953

In connection with the Electronics Acquisition, the Company acquired a controlling 60% interest in Shanghai Visteon Automotive Electronics Co., Ltd. ("SVAE"). In connection with the preliminary purchase price allocation, the non-controlling interest in SVAE was recorded at estimated fair value based on management's estimates, available information, and reasonable and supportable assumptions as the July 1, 2014, transaction closing date. Additionally, the Company utilized a third-party to assist with the estimation of fair value. The estimated fair value of the non-controlling interest in SVAE of \$38 million was based on the discounted cash flows method, which is an income approach. This fair value measurement is classified within level 3 of the fair value hierarchy.

Accumulated Other Comprehensive Income (loss)

Changes in AOCI and reclassifications out of AOCI by component includes:

	Three Months Ended September 30 2014		2013		Nine Months Ended September 30 2014		2013		
	(Dollars in Millions)								
Changes in AOCI:									
Beginning balance	\$—			\$(145)	\$(12)	\$(90)

(a) Amount included in Other expenses in Consolidated Statements of Comprehensive (Loss) Income.

(b) Net tax expense of \$3 million is related to benefit plans for the nine months ended September 30, 2013.

(c) Amount included in the computation of net periodic pension cost. See Note 13 "Employee Benefit Plans" for additional details.

(d) Net tax expense (benefit) of \$(1) million and \$3 million are related to unrealized hedging gains (loss) for the three months ended September 30, 2014 and 2013, respectively. Net tax expense (benefit) of \$1 million and \$(2) million are related to unrealized hedging gains (loss) for the nine months ended September 30, 2014 and 2013, respectively.

(e) Amount is included in Cost of sales in Consolidated Statements of Comprehensive (Loss) Income.

Table of Contents

NOTE 16. Earnings Per Share

The Company uses the two-class method in computing basic and diluted earnings per share. Basic earnings per share is calculated by dividing net income attributable to Visteon, after deducting undistributed income allocated to participating securities, by the weighted average number of shares of common stock outstanding. Diluted earnings per share is computed by dividing net income by the weighted average number of common and potential dilutive common shares outstanding after deducting undistributed income allocated to participating securities. Performance based share units are considered contingently issuable shares, and are included in the computation of diluted earnings per share based on the number of shares that would be issuable if the reporting date were the end of the contingency period and if the result would be dilutive. The table below provides details underlying the calculations of basic and diluted (loss) earnings per share:

	Three Months Ended September 30		Nine Months Ended September 30	
	2014	2013	2014	2013
	(In Millions, Except Per Share Amounts)			
Numerator:				
Income from continuing operations	\$8	\$45	\$32	\$177
Loss from discontinued operations	(29) (2) (189) —
Net (loss) income attributable to Visteon Corporation	\$(21) \$43	\$(157) \$177
Denominator:				
Average common stock outstanding - basic	44.0	49.4	46.2	50.4
Dilutive effect of warrants and performance stock units	1.4	1.0	1.3	1.1
Diluted shares	45.4	50.4	47.5	51.5

Basic and Diluted (Loss) Earnings Per Share Data:

Basic (loss) earnings per share attributable to Visteon:

Continuing operations	\$0.18	\$0.91	\$0.69	\$3.51
Discontinued operations	(0.66) (0.04) (4.09) —
Basic (loss) earnings per share attributable to Visteon	\$(0.48) \$0.87	\$(3.40) \$3.51

Diluted (loss) earnings per share attributable to Visteon:

Continuing operations	\$0.18	\$0.89	\$0.67	\$3.44
Discontinued operations	(0.64) (0.04) (3.98) —
Diluted (loss) earnings per share attributable to Visteon	\$(0.46) \$0.85	\$(3.31) \$3.44

The effect of certain common stock equivalents including warrants, performance-based share units, and stock options were excluded from the computation of weighted average diluted shares outstanding as inclusion of such items would be anti-dilutive, summarized

below. All common stock equivalents were dilutive in the three and nine months ended September 30, 2014.

	Three Months Ended September 30		Nine Months Ended September 30	
	2013		2013	
	(In Millions, Except Per Share Amounts)			
Number of stock options	0.2		0.2	
Exercise price	\$44.55	- \$74.08	\$44.55	- \$74.08

Table of Contents

NOTE 17. Fair Value Measurements and Financial Instruments

Financial assets and liabilities are categorized, based on the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to the quoted prices in active markets for identical assets and liabilities and lowest priority to unobservable inputs. The three-levels of the fair value hierarchy are as follows:

- Level 1 – Financial assets and liabilities whose values are based on unadjusted quoted market prices for identical assets and liabilities in an active market that the Company has the ability to access.
- Level 2 – Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable for substantially the full term of the asset or liability.
- Level 3 – Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

Financial Instruments

The Company's net cash inflows and outflows exposed to the risk of changes in foreign currency exchange rates arise from the sale of products in countries other than the manufacturing source, foreign currency denominated supplier payments, debt and other payables, subsidiary dividends and investments in subsidiaries. Where possible, the Company utilizes derivative financial instruments, including forward and option contracts, to protect the Company's cash flow from changes in exchange rates. Foreign currency exposures are reviewed monthly and any natural offsets are considered prior to entering into a derivative financial instrument. The Company's primary hedged foreign currency exposures include the Euro, Korean Won, Czech Koruna, Hungarian Forint, Indian Rupee and Mexican Peso. Where possible, the Company utilizes a strategy of partial coverage for transactions in these currencies.

As of September 30, 2014 and December 31, 2013, the Company had forward contracts to hedge changes in foreign currency exchange rates with notional amounts of approximately \$662 million and \$625 million, respectively. Fair value estimates of these contracts are based on quoted market prices and other observable inputs. A portion of these instruments have been designated as cash flow hedges with the effective portion of the gain or loss reported in the AOCI component of Stockholders' equity in the Company's consolidated balance sheets. The ineffective portion of these instruments is recorded as Cost of sales in the Company's consolidated statements of comprehensive (loss) income.

Foreign currency hedge instruments are measured at fair value on a recurring basis under an income approach using industry-standard models that consider various assumptions, including time value, volatility factors, current market and contractual prices for the underlying and non-performance risk. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace. Accordingly, the Company's foreign currency instruments are classified as Level 2, "Other Observable Inputs" in the fair value hierarchy.

Financial Statement Presentation

The Company presents its derivative positions and any related material collateral under master netting agreements on a net basis. Derivative financial instruments are included in the Company's consolidated balance sheets, as follows:

Risk Hedged	Classification	Assets		Liabilities	
		September 30 2014	December 31 2013	September 30 2014	December 31 2013
	(Dollars in Millions)				
Designated					
Foreign currency	Other current assets	\$10	\$4	\$2	\$—
Foreign currency	Other current liabilities	—	2	2	4

Non-designated					
Foreign currency	Other current assets	5	3	1	1
		\$15	\$9	\$5	\$5

Table of Contents

	Gross Amount Recognized		Gross Amount Offset in the Statement of Financial Position		Net Amount Presented in the Statement of Financial Position	
	September 30 2014	December 31 2013	September 30 2014	December 31 2013	September 30 2014	December 31 2013

Non-designated cash flow hedges	—	—	—	—	(1) 1
	\$(2) \$5	\$8	\$3	\$(1) \$1
Nine Months Ended September 30:						
Cash flow hedges	\$3	\$(6) \$19	\$7	\$—	\$—
Non-designated cash flow hedges	—	—	—	—	(2) 2
	\$3	\$(6) \$19	\$7	\$(2) \$2

Concentrations of Credit Risk

Financial instruments including cash equivalents, marketable securities, derivative contracts, and accounts receivable, expose the Company to counter-party credit risk for non-performance. The Company's counterparties for cash equivalents, marketable securities and derivative contracts are banks and financial institutions that meet the Company's requirement of high credit standing. The Company's counterparties for derivative contracts are investment and commercial banks with significant experience using such derivatives. The Company manages its credit risk through policies requiring minimum credit standing and limiting credit exposure to any one counter-party and through monitoring counter-party credit risks. The Company's concentration of credit risk related to derivative contracts at September 30, 2014 and December 31, 2013, is not material. With the exceptions below, the Company's credit risk with any individual customer does not exceed ten percent of total accounts receivable at September 30, 2014 and December 31, 2013, respectively.

	September 30 2014	December 31 2013
Ford and its affiliates	25%	20%
Hyundai Mobis Company	16%	15%
Hyundai Motor Company	8%	9%

Management periodically performs credit evaluations of its customers and generally does not require collateral.

Items Measured at Fair Value on a Non-recurring Basis

In addition to items that are measured at fair value on a recurring basis, the Company measures certain assets and liabilities at fair value on a non-recurring basis. As further described in Note 2, "Business Acquisitions", the Company utilized a third party to assist in the fair value determination of the preliminary purchase price allocations for the Electronics Acquisition, the Thermal

Table of Contents

Acquisition and the JCS-Nanjing controlling interest acquisition. Management's allocation of fair values to asset and liabilities was completed through a combination of cost, market and income approaches. These fair value measurements are classified within Level 3 of the fair value hierarchy. As further described in Note 3, "Interiors Divestiture", the fair value of the assets and liabilities subject to the Interiors Divestiture was less than the carrying value. As a result, the long-lived assets were reduced to zero and impairment loss of \$15 million and \$188 million were recorded in the three and nine month periods ended September 30, 2014, respectively. As the impairment was determined using other observable inputs, the fair value measurements are classified within Level 2 of the fair value hierarchy.

NOTE 18. Commitments and Contingencies

Litigation and Claims

In 2003, the Local Development Finance Authority of the Charter Township of Van Buren, Michigan (the "Township") issued approximately \$28 million in bonds maturing in 2032, the proceeds of which were used at least in part to assist in the development of the Company's U.S. headquarters located in the Township. During January 2010, the Company and the Township entered into a settlement agreement (the "Settlement Agreement") that, among other things, reduced the taxable value of the headquarters property to current market value and facilitated certain claims of the Township in the Company's chapter 11 proceedings. The Settlement Agreement also provided that the Company would continue to negotiate in good faith with the Township in the event that property tax payments were inadequate to permit the Township to meet its payment obligations with respect to the bonds. In September 2013, the Township notified the Company in writing that it is estimating a shortfall in tax revenues of between \$25 million and \$36 million, which could render it unable to satisfy its payment obligations under the bonds, but made no specific monetary demand of the Company. The Company disputes the factual and legal assertions made by the Township and intends to vigorously defend the matter should the Township seek to commence a legal proceeding against the Company. The Company is not able to estimate the possible loss or range of loss in connection with this matter.

On March 29, 2012, the Korean Supreme Court ruled that regular bonuses should be included for purposes of calculating the ordinary wage of applicable employees, which was contrary to previous legal precedent and the position of the Korean Ministry of Employment and Labor. On December 18, 2013, the Korean Supreme Court issued an en banc decision clarifying that (i) regular bonuses should be included for purposes of calculating such ordinary wage, and (ii) certain incentive pay and family allowances may also be included for purposes of calculating such ordinary wage if they were paid to employees as consideration for the labor actually provided by them. The court also indicated that employers could be excused from liability for excluding such regular bonuses from ordinary wages where an express or implied management-labor agreement or practice to exclude such amounts existed and to require such payment would cause "serious managerial difficulty." The Company is evaluating the potential financial impact of these new court rulings, and is not able to determine at this time whether it will have a material impact on the results of operations and cash flows of its South Korean subsidiaries. In addition, on May 24, 2013, Halla Visteon Climate Control Union in Korea, representing 891 hourly employees of HVCC, filed a legal petition with Seoul Southern District Court, claiming unpaid statutory benefits for the past three years based on the initial Supreme Court ruling. At a hearing held on September 26, 2014, the plaintiffs submitted a final revised claim amount of approximately 44 billion Korean won (approximately \$42 million). The Company is in the process of evaluating these claims, but at this time is not able to estimate the possible loss or range of loss in connection with this matter.

In November 2013, the Company and HVCC, jointly filed an Initial Notice of Voluntary Self-Disclosure statement with the U.S. Treasury Department's Office of Foreign Assets Control ("OFAC") regarding certain sales of automotive HVAC components by a minority-owned, Chinese joint venture of HVCC into Iran. The Company updated that notice in December 2013, and subsequently filed a voluntary self-disclosure regarding these sales with OFAC in March 2014. In May 2014, the Company voluntarily filed a supplementary self-disclosure identifying additional sales of

automotive HVAC components by the Chinese joint venture, as well as similar sales involving an HVCC subsidiary in China, totaling approximately \$12 million, and filed a final voluntary-self disclosure with OFAC on October 17, 2014. OFAC is currently reviewing the results of the Company's investigation. Following that review, OFAC may conclude that the disclosed sales resulted in violations of U.S. economic sanctions laws and warrant the imposition of civil penalties, such as fines, limitations on the Company's ability to export products from the United States, and/or referral for further investigation by the U.S. Department of Justice. Any such fines or restrictions may be material to the Company's financial results in the period in which they are imposed, but at this time is not able to estimate the possible loss or range of loss in connection with this matter. Additionally, disclosure of this conduct and any fines or other action relating to this conduct could harm the Company's reputation and have a material adverse effect on our business, operating results and financial condition. The Company cannot predict when OFAC will conclude its own review of our voluntary self-disclosures or whether it may impose any of the potential penalties described above.

Table of Contents

Toyota Industries Corporation ("TICO") filed a patent infringement claim with the Seoul Central District Court on March 18, 2014, requesting HVCC to discontinue production of its RS compressors and dispose of inventories and manufacturing facilities. HVCC received the original of TICO's claim submission on March 31, 2014, and is planning to file for a patent invalidation trial before the Korean Intellectual Property Tribunal in response. The Company is in the process of evaluating these claims, but at this time is not able to estimate the possible loss or range of loss in connection with this matter.

The Company's operations in Brazil are subject to highly complex labor, tax, customs and other laws. While the Company believes that it is in compliance with such laws, it is periodically engaged in litigation regarding the application of these laws. As of September 30, 2014, the Company maintained accruals of approximately \$10 million for claims aggregating approximately \$143 million. The amounts accrued represent claims that are deemed probable of loss and are reasonably estimable based on the Company's assessment of the claims and prior experience with similar matters.

Several current and former employees of Visteon Deutschland GmbH ("Visteon Germany") filed civil actions against Visteon Germany in various German courts beginning in August 2007, seeking damages for the alleged violation of German pension laws that prohibit the use of pension benefit formulas that differ for salaried and hourly employees without adequate justification. Several of these actions have been joined as pilot cases. In a written decision issued in April 2010, the Federal Labor Court issued a declaratory judgment in favor of the plaintiffs in the pilot cases. To date, more than 750 current and former employees have filed similar actions or have inquired as to or been granted additional benefits, and an additional 600 current and former employees are similarly situated. The Company's remaining reserve for unsettled cases is approximately \$8 million and is based on the Company's best estimate as to the number and value of the claims that will be made in connection with the pension plan. However, the Company's estimate is subject to many uncertainties which could result in Visteon Germany incurring amounts in excess of the reserved amount up to approximately \$9 million.

On May 28, 2009, the Company filed voluntary petitions in the Court seeking reorganization relief under the provisions of chapter 11 of the Bankruptcy Code and continued to operate as debtors-in-possession until emergence on October 1, 2010. Substantially all pre-petition liabilities and claims relating to rejected executory contracts and unexpired leases have been settled under the plan of reorganization, however, the ultimate amounts to be paid in settlement of each those claims will continue to be subject to the uncertain outcome of litigation, negotiations and Bankruptcy Court decisions for a period of time after the emergence date.

In December of 2009, the Court granted the Debtors' motion in part authorizing them to terminate or amend certain other postretirement employee benefits, including health care and life insurance. On December 29, 2009, the IUE-CWA, the Industrial Division of the Communications Workers of America, AFL-CIO, CLC, filed a notice of appeal of the Court's order with the District Court. By order dated March 31, 2010, the District Court affirmed the Court's order in all respects. On April 1, 2010, the IUE filed a notice of appeal. On July 13, 2010, the Circuit Court reversed the order of the District Court as to the IUE-CWA and directed the District Court to, among other things, direct the Court to order the Company to take whatever action is necessary to immediately restore terminated or modified benefits to their pre-termination/modification levels. On July 27, 2010, the Company filed a Petition for Rehearing or Rehearing En Banc requesting that the Circuit Court review the panel's decision, which was denied. By orders dated August 30, 2010, the Court ruled that the Company should restore certain other postretirement employee benefits to the appellant-retirees and also to salaried retirees and certain retirees of the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America ("UAW").

On September 1, 2010, the Company filed a Notice of Appeal to the District Court of the Court's decision to include non-appealing retirees, and on September 15, 2010, the UAW filed a Notice of Cross-Appeal. On July 25, 2012, the District Court ruled in favor of the Company on both appeals, and the UAW appealed this ruling to the Circuit Court.

On August 28, 2014, the Circuit Court affirmed the District Court's rulings. The UAW filed a petition for rehearing, which the Circuit Court denied on October 2, 2014. The Company reached an agreement with the original appellants in late-September 2010, which resulted in the Company not restoring other postretirement employee benefits of such retirees. On September 30, 2010, the UAW filed a complaint, which it amended on October 1, 2010, in the United States District Court for the Eastern District of Michigan seeking, among other things, a declaratory judgment to prohibit the Company from terminating certain other postretirement employee benefits for UAW retirees after October 1, 2010. The parties reached a preliminary settlement agreement in January 2013, but it was later terminated by the plaintiffs. On October 22, 2013, the U.S. District Court for the Eastern District of Michigan issued an order denying the Company's motion to dismiss the UAW's complaint and granted its motion to transfer the case to the U.S. District Court for the District of Delaware. The UAW filed a petition for a writ of mandamus with the U.S. Court of Appeals for the Sixth Circuit, requesting the court vacate the transfer of the case. In May 2014, the U.S. Court of Appeals for the Sixth Circuit denied the UAW's petition. The UAW requested a panel rehearing or rehearing en banc, which was denied by the Sixth Circuit Court of Appeals on August 13, 2014. On October 1, 2014, the Company filed a motion for judgment on the pleadings before the Delaware District Court. As of September 30, 2014, the Company maintains an accrual for claims that are deemed probable of loss and are reasonably estimable.

Table of Contents

While the Company believes its accruals for litigation and claims are adequate, the final amounts required to resolve such matters could differ materially from recorded estimates and the Company's results of operations and cash flows could be materially affected.

Product Warranty and Recall

Amounts accrued for product warranty and recall claims are based on management's best estimates of the amounts that will ultimately be required to settle such items. The Company's estimates for product warranty and recall obligations are developed with support from its sales, engineering, quality and legal functions and include due consideration of contractual arrangements, past experience, current claims and related information, production changes, industry and regulatory developments and various other considerations. The Company can provide no assurances that it will not experience material claims in the future or that it will not incur significant costs to defend or settle such claims beyond the amounts accrued or beyond what the Company may recover from its suppliers. The following table provides a reconciliation of changes in the product warranty and recall claims liability for the selected periods:

	Nine Months Ended September 30	
	2014	2013
	(Dollars in Millions)	
Beginning balance	\$49	\$57
Accruals for products shipped	14	12
Changes in estimates	1	(4
Currency	(2) (1
Settlements	(16) (12
Reclassified to held for sale	(2) —
Ending balance	\$44	\$52

Environmental Matters

The Company is subject to the requirements of federal, state, local and foreign environmental and occupational safety and health laws and regulations and ordinances. These include laws regulating air emissions, water discharge and waste management. The Company is also subject to environmental laws requiring the investigation and cleanup of environmental contamination at properties it presently owns or operates and at third-party disposal or treatment facilities to which these sites send or arranged to send hazardous waste. The Company is aware of contamination at some of its properties. These sites are in various stages of investigation and cleanup. The Company currently is, has been, and in the future may become the subject of formal or informal enforcement actions or procedures.

Costs related to environmental assessments and remediation efforts at operating facilities, previously owned or operated facilities, or other waste site locations are accrued when it is probable that a liability has been incurred and the amount of that liability can be reasonably estimated. Estimated costs are recorded at undiscounted amounts, based on experience and assessments, and are regularly evaluated. The liabilities are recorded in Other current liabilities and Other non-current liabilities in the consolidated balance sheets. At September 30, 2014, the Company has recorded a reserve of approximately \$1 million for environmental matters. However, estimating liabilities for environmental investigation and cleanup is complex and dependent upon a number of factors beyond the Company's control and which may change dramatically. Accordingly, although the Company believes its reserve is adequate based on current information, the Company cannot provide any assurance that its ultimate environmental investigation and cleanup costs and liabilities will not exceed the amount of its current reserve.

Other Contingent Matters

Various legal actions, governmental investigations and proceedings and claims are pending or may be instituted or asserted in the future against the Company, including those arising out of alleged defects in the Company's products; governmental regulations relating to safety; employment-related matters; customer, supplier and other contractual relationships; intellectual property rights; product warranties; product recalls; and environmental matters. Some of the foregoing matters may involve compensatory, punitive or antitrust or other treble damage claims in very large amounts, or demands for recall campaigns, environmental remediation programs, sanctions, or other relief which, if granted, would require very large expenditures. The Company enters into agreements that contain indemnification provisions in the normal course of business for which the risks are considered nominal and impracticable to estimate.

Table of Contents

Contingencies are subject to many uncertainties, and the outcome of individual litigated matters is not predictable with assurance. Reserves have been established by the Company for matters discussed in the immediately foregoing paragraph where losses are deemed probable and reasonably estimable. It is possible, however, that some of the matters discussed in the foregoing paragraph could be decided unfavorably to the Company and could require the Company to pay damages or make other expenditures in amounts, or a range of amounts, that cannot be estimated at September 30, 2014, and that are in excess of established reserves. The Company does not reasonably expect, except as otherwise described herein, based on its analysis, that any adverse outcome from such matters would have a material effect on the Company's financial condition, results of operations or cash flows, although such an outcome is possible.

NOTE 19. Segment Information

The Company's reportable segments are as follows:

• **Climate** - The Company's Climate product line includes climate air handling modules, powertrain cooling modules, heat exchangers, compressors, fluid transport and engine induction systems.

• **Electronics** - The Company's Electronics product line includes audio systems, infotainment systems, driver information systems, connectivity and telematics solutions, climate controls, and electronic control modules.

• **Other** - The Company's Other product line includes certain South America programs and European operations previously associated with the Interiors business but not subject to discontinued operations classification.

Financial results for the Company's reportable segments have been prepared using a management approach, which is consistent with the basis and manner in which financial information is evaluated by the Company's chief operating decision-making group in allocating resources and in assessing performance. The Company's chief operating decision making group, comprised of the Chief Executive Officer and Chief Financial Officer, evaluates the performance of the Company's segments primarily based on net sales, before elimination of inter-company shipments, Adjusted EBITDA (non-GAAP financial measure) and operating assets.

On July 1, 2014, the Company completed the acquisition of substantially all of the global automotive electronics business of Johnson Controls Inc., whose operating results are included in the Electronics segment from the date of acquisition. In August 2014, HVCC completed its purchase of the automotive thermal and emissions product line of Cooper-Standard Automotive Inc. and the operating results of the business acquired are included in the Climate segment from the date of acquisition.

Segment Sales

	2014	2013	2014	2013
	(Dollars in Millions)			
Climate	\$1,211	\$1,131	\$3,811	\$3,606
Electronics	760	340	1,642	1,059
Other	24	44	95	143
Eliminations	(25)	(31)	(78)	(128)
Total consolidated sales	\$1,970	\$1,484	\$5,470	\$4,680

Segment Adjusted EBITDA

The Company defines Adjusted EBITDA as net income attributable to the Company, plus net interest expense, provision for income taxes and depreciation and amortization, as further adjusted to eliminate the impact of equity in

net income of non-consolidated affiliates, net income attributable to non-controlling interests, asset impairments, gains or losses on divestitures, net restructuring expenses and other reimbursable costs, non-cash stock-based compensation expense, certain employee charges and benefits, reorganization items and other non-operating gains and losses. The Company's definition of Adjusted EBITDA includes the impacts of discontinued operations for all periods presented.

Through December 31, 2013, the Company's definition of Adjusted EBITDA was inclusive of net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates. Following the December 17, 2013, disposition of its 50% ownership interest in Yanfeng, the Company modified its definition of Adjusted EBITDA to exclude net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates as management believes this measure is most

Table of Contents

reflective of the operational performance of the Company's operating segments. Accordingly, Adjusted EBITDA for historical periods has been recast on basis consistent with the current definition.

Adjusted EBITDA is presented as a supplemental measure of the Company's financial performance that management believes is useful to investors because the excluded items may vary significantly in timing or amounts and/or may obscure trends useful in evaluating and comparing the Company's operating activities across reporting periods. Not all companies use identical calculations and, accordingly, the Company's presentation of Adjusted EBITDA may not be comparable to other similarly titled measures of other companies. Adjusted EBITDA is not a recognized term under U.S. GAAP and does not purport to be a substitute for net income as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. Adjusted EBITDA has limitations as an analytical tool and is not intended to be a measure of cash flow available for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. In addition, the Company uses Adjusted EBITDA (i) as a factor in incentive compensation decisions, (ii) to evaluate the effectiveness of the Company's business strategies and (iii) because the Company's credit agreements use measures similar to Adjusted EBITDA to measure compliance with certain covenants.

Segment Adjusted EBITDA is summarized below:

	Three Months Ended September 30		Nine Months Ended September 30

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis ("MD&A") is intended to help the reader understand the results of operations, financial condition and cash flows of Visteon Corporation ("Visteon" or the "Company"). MD&A is provided as a supplement to, and should be read in conjunction with, the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013, filed with the Securities and Exchange Commission on February 25, 2014, and the financial statements and accompanying notes to the financial statements included elsewhere herein.

Executive Summary

Overview

Visteon is a global supplier of climate, electronics and interiors systems, modules and components to automotive original equipment manufacturers ("OEMs") including BMW, Chrysler, Daimler, Ford, General Motors, Honda, Hyundai, Kia, Nissan, PSA Peugeot Citroën, Renault, Toyota and Volkswagen. The Company has an international network of manufacturing operations, technical centers and joint venture operations, supported by approximately 29,000 employees dedicated to the design, development, manufacture and support of its product offerings and its global customers.

Shareholder Value Creation Plan

The Company continued to execute its Shareholder Value Creation Plan during the three month period ended September 30, 2014.

Electronics Optimization - Visteon closed the acquisition of substantially all of the global automotive electronics business of Johnson Controls Inc. (the "Electronics Acquisition") effective July 1, 2014. The Electronics Acquisition was completed for the aggregate purchase price of \$295 million, including \$31 million of cash and equivalents at the acquired business. The purchase price was funded with cash on hand and remains subject to adjustments as provided in the Purchase Agreement.

The Electronics Acquisition is expected to enhance Visteon's competitive position in the fast-growing vehicle cockpit electronics segment by strengthening its global scale, manufacturing and engineering footprint, product portfolio and customer penetration. Net sales for the acquired business were approximately \$1.3 billion for the annual period ended September 30, 2013. On a combined basis the Company's Electronics business is expected to have approximately \$3 billion in annual revenue with a No. 2 global position in driver information and above-average growth rates for the cockpit electronics segment, supplying nine of the world's ten largest vehicle manufacturers.

In connection with the Electronics Acquisition, the Company expects to achieve \$40 million to \$70 million in annual cost synergies by the end of 2017. In order to achieve these cost synergies, the Company announced a restructuring program designed to reduce fixed costs and to improve operational efficiencies across the Electronics product group including administrative, engineering and manufacturing functions. The Company expects to incur approximately \$40 million to \$60 million in restructuring costs through the duration of the program and anticipates recording additional restructuring charges related to this program in future periods as underlying plans are finalized.

Interiors Exit Strategy - The Company continued its efforts to complete the divestiture of substantially all of its global Interiors business (the "Interiors Divestiture") pursuant to a Master Purchase Agreement initially executed in May 2014 and subsequently amended (the "Purchase Agreement"). On November 1, 2014, the Company closed on the majority of the Interiors Divestiture (the "Master Closing") completing the largest phase of the Interiors Divestiture to Reydel Automotive Holdings B.V., an affiliate of Cerberus Capital Management, L.P. In connection with the Master Closing, the Company made a cash payment of approximately \$120 million, which included the \$95 million Cash Contribution and adjustments primarily for working capital subject to further adjustments. The Company also agreed

to provide a \$56 million revolving credit facility in connection with the Master Closing, which is the shortfall to the agreed \$90 million target in external financing arrangements. As transaction related customer purchase order changes are effected over the next several months, increasing the backing of the buyer implemented factoring facility, the seller backed facility is expected to be substantially reduced. The seller-backed facility obligation can also be reduced if the buyer adds working capital facilities in Russia and Thailand. Draws under this seller-backed facility will only be available if certain of the external credit facilities are fully drawn, and any draws on the seller-backed facility generally must be repaid prior to the repayment of the external credit facilities. The seller-backed facility has a maturity of three years and will have an interest rate of Libor plus 5%.

Additionally, Visteon will separate the portion of its Interiors business conducted through its facilities in Chennai and Pune, India into a new legal entity, which will be sold to the buyer as part of the Interiors Divestiture. Due to the time required to effect such separation under Indian law, the consummation of the Indian portion of the Interiors Divestiture will occur subsequent to the Master Closing but is expected before December 31, 2014. The Thailand, Argentina and Brazil portions of

Table of Contents

the Interiors Divestiture will also occur subsequent to the Master Closing and are expected to close during the first quarter of 2015. The remaining transactions are subject to various conditions, including regulatory and antitrust approvals, receipt of other third party consents and approvals and other customary closing conditions, and may be subject to further cash impacts based on purchase price adjustments at the time of closing.

The Company expects to record additional losses in connection with the Interiors Divestiture in future periods upon closing. The losses are estimated to range from \$150 million to \$200 million, of which the majority is likely to be recorded during the three months ending December 31, 2014 associated with the Master Closing.

Strengthen Balance Sheet - On July 16, 2014, the Company entered into an agreement to transfer certain U.S. pension assets to Prudential Insurance Company of America, to settle approximately \$350 million of its U.S. outstanding pension obligation. As a result, the Company recorded a settlement gain of \$25 million during the three months ended September 30, 2014.

Enhance Shareholder Returns - On May 8, 2014, the Company announced an accelerated stock buyback ("ASB") program with a third-party financial institution to purchase shares of common stock for an aggregate purchase price of \$500 million. Under the program, the Company paid the financial institution \$500 million and, through September 30, 2014, had received delivery of 4,523,158 shares of common stock under the program. On October 15, 2014, the capped portion of the program concluded, and the Company received an additional 112,269 shares. As of September 30, 2014, \$375 million remained authorized and available for repurchase through December 31, 2015. The Company anticipates that additional repurchases of common stock, if any, would occur from time to time in open market transactions or in privately negotiated transactions depending on market and economic conditions, share price, trading volume, alternative uses of capital and other factors.

Financial Results Summary

Visteon recorded net sales of \$1,970 million for the third quarter of 2014, an increase of \$486 million from the same period in 2013. For the nine months ended September 30, 2014, the Company recorded sales of \$5,470 million, an increase of \$790 million from the same period in 2013. The increase in sales for the three and nine month periods ended September 30, 2014, was primarily due to the Electronics Acquisition, the November 2013 acquisition of a controlling ownership interest in Yanfeng Visteon Electronics Co., Ltd. ("YFVE"), higher production volumes and favorable product mix. The Company's sales for the three and nine months ended September 30, 2014, were distributed by product group, geographic region, and customer as follows:

Three Months Ended September 30, 2014

Nine Months Ended September 30, 2014

Table of Contents

The Company's sales are significantly impacted by global light vehicle production volumes. A summary of global light vehicle production levels for the three and nine months ended September 30, 2014 and 2013, are presented below by geographic region.

	Three Months Ended September 30				Nine Month Ended September 30			
	2014	2013	Change		2014	2013	Change	
	(Units in Millions)							
Global	20.9	20.3	3.3	%	65.3	62.7	4.1	%

Source: IHS Automotive

Gross margin was \$192 million, or 9.8% of sales, for the three months ended September 30, 2014, compared to \$135 million, or 9.1% of sales, for the same period of 2013. The increase was attributable to favorable volume and mix, the Electronics Acquisition, the acquisition of a controlling ownership interest in YFVE, and a pension settlement gain of \$25 million.

Net loss attributable to Visteon was \$21 million for the three months ended September 30, 2014 representing a decrease of \$64 million when compared to Net income attributable to Visteon of \$43 million for same period in 2013. The decrease was largely due to the Interiors asset impairment of \$15 million, a decrease in equity in net income of affiliates of \$46 million related to the disposition of the Company's 50% ownership interest in Yanfeng.

Including discontinued operations, the Company generated \$180 million of cash from operating activities during the nine months ended September 30, 2014, an increase of \$1 million when compared to the same period of 2013. As of September 30, 2014, the Company had total cash balances of \$1,060 million, including \$12 million of restricted cash, \$99 million of cash held for sale and \$13 million of restricted cash held for sale. The Company had total debt balances of \$994 million, including \$13 million of debt held for sale. As of September 30, 2014, the Company had \$66 million of cash in excess of total debt.

* Adjusted EBITDA is a Non-GAAP financial measure, as further discussed below.

Sales

Sales for the three-month period ended September 30, 2014, totaled \$1,970 million, which represents an increase of \$486 million compared with the same period of 2013. The largest drivers of the sales increase included the Electronics Acquisition effective July 1, 2014 and the acquisition of a controlling ownership interest in Yanfeng Visteon Automotive Electronics Co., Ltd ("YFVE") effective November 7, 2013, which increased sales by \$329 million and \$91 million, respectively. Additionally, favorable customer volumes and product mix, largely related to the Company's Climate and Electronics product groups, increased sales \$59 million, while favorable currency increased sales by \$29 million. The change in currency was primarily attributable to the strengthening Euro, Korean Won, and Indian Rupee, partially offset by the weakening Thai Baht and Chinese Yuan. Other reductions of \$22 million were associated with customer pricing, net of design savings, and commercial agreements.

Cost of Sales

Cost of sales increased \$429 million for the three-month period ended September 30, 2014, when compared with the same period in 2013. The increase includes \$414 million attributable to increased production volumes including the Electronics Acquisition and YFVE impacts, and changes in product mix, representing the variable nature of material and labor costs. Foreign currency increased cost of sales by \$48 million including year-over-year impacts of the mix of receivables and payables denominated in currencies other than functional currencies. These increases were partially offset by a \$25 million pension settlement gain and \$8 million of net efficiencies including material, design, and usage economics and other costs.

Gross Margin

The Company's gross margin was \$192 million for the three-month period ended September 30, 2014, compared to \$135 million for the same period of 2013, an increase of \$57 million. The increase in gross margin included \$65 million from favorable volumes and mix, including Electronics Acquisition and YFVE impacts. Gross margin also included \$25 million related to the pension settlement gain. These increases were partially offset by \$19 million of unfavorable currency and unfavorable cost performance of \$14 million, largely reflecting increased engineering to support future growth.

Table of Contents

Selling, General and Administrative Expenses

Selling, general, and administrative expenses were \$107 million and \$73 million during the three-month period ended September 30, 2014 and 2013, respectively. The increase of \$34 million is primarily driven by Electronics Acquisition and YFVE impacts. Additional increases included \$2 million of unfavorable currency and \$1 million from the non-recurrence of cost recoveries associated with divested businesses.

Restructuring Expenses

The Company's restructuring reserves and activity, including amounts attributable to discontinued operations, are summarized below for the three-month period ended September 30, 2014.

	Climate	Electronics	Corporate	Other	Total
	(Dollars in Millions)				
Restructuring reserve - June 30, 2014	\$13	\$—	\$—	\$13	\$26
Expenses	4	5	—	6	15
Utilization	(16)	(1)	—	(8)	(25)
Foreign currency	—	—	—	(1)	(1)
Restructuring reserve - September 30, 2014	\$1	\$4	\$—	\$10	\$15

In connection with the Electronics Acquisition, the Company commenced a restructuring program designed to achieve annual cost savings ranging from \$40 million to \$70 million through transaction synergies by the end of 2017. The Company expects to incur approximately \$40 million to \$60 million of restructuring costs during the program to achieve the targeted annual savings. During the three-months ended September 30, 2014, the Company recorded \$5 million of severance and termination benefits under this program associated with approximately 115 employees. The Company anticipates recording additional restructuring charges related to this program in future periods as underlying plans are finalized.

The Company previously announced a \$100 million restructuring program designed to reduce fixed costs and to improve operational efficiency by addressing certain under-performing operations. In connection with that program, the Company announced plans to restructure three European Interiors facilities, to consolidate its Climate operations and to realign its corporate and administrative functions directly to their corresponding operational beneficiary. As of September 30, 2014, this \$100 million restructuring program has been substantially completed. During the three-months ended September 30, 2014, the Company recorded \$10 million of restructuring expenses, including amounts associated with discontinued operations, primarily related to the following activities:

The previously announced closure of the Climate facility located in Quilmes, Argentina. In connection with the closure, the Company recorded an additional \$3 million of restructuring expenses, related to severance and termination benefits.

The Company recorded \$6 million of severance and termination benefits associated with approximately 100 employees at two European Interiors facilities. This amount has been classified within discontinued operations on the Consolidated Statements of Comprehensive (Loss) Income for the three-month period ended September 30, 2014. Approximately \$3 million remains accrued as of September 30, 2014.

During the third quarter of 2013, the Company recorded \$10 million of restructuring expenses, net of reversals, including amounts associated with discontinued operations, primarily related to severance and termination benefits associated with approximately 250 employees under a previously announced \$100 million program designed to reduce fixed costs and to improve operational efficiency.

Utilization represents payments for severance and other employee termination benefits and special termination benefits reclassified to pension and other postretirement employee benefit liabilities, where such payments are made from the Company's benefit plans.

Interest Expense, Net

Interest expense for the three-month period ended September 30, 2014, of \$9 million included \$6 million associated with the Term Facility and \$3 million associated with affiliate debt. During the three-month period ended September 30, 2013, interest expense was \$12 million, including \$7 million on the 6.75% Senior Notes due April 15, 2019, \$3 million associated with affiliate debt, and \$2 million for commitment fees and amortization of debt issuance costs. Interest income was \$3 million for both the three-month period ended September 30, 2014 and September 30, 2013.

Table of Contents

Equity in Net Income of Affiliates

Equity in net income of affiliates decreased \$46 million between the three-month periods ended September 30, 2014 and 2013. The decrease was primarily attributable to the sale of the Company's 50% ownership interest in Yanfeng Visteon Automotive Trim Systems Co., Ltd. ("Yanfeng") during the fourth quarter of 2013.

Other Expenses

Other expenses consist of the following:

	Three Months Ended September 30	
	2014	2013
	(Dollars in Millions)	
Transformation costs	\$13	\$8
Integration costs	4	—
Loss on asset contribution	3	—
UK Administration recovery	—	(2)
	\$20	\$6

The Company recorded transformation costs of \$13 million and \$8 million for the three months ended September 30, 2014 and 2013, respectively, related to financial and advisory services associated with continued execution of its comprehensive shareholder value creation plan, including fees associated with the Electronics Acquisition.

The Company recorded \$4 million of costs associated with business integration activities including re-branding, facility modification, information technology readiness and related professional services associated with the Electronics Acquisition during the three months ended September 30, 2014. The Company expects to incur additional integration costs of approximately \$20 million, primarily related to information technology, through the second quarter of 2015.

During the three months ended September 30, 2014, the Company contributed land and building with net book value of \$3 million to the local municipality in Quilmes, Argentina for the benefit of former employees.

Income Taxes

The Company's provision for income taxes of \$22 million for the three-month period ended September 30, 2014, represents a decrease of \$1 million when compared with an income tax provision of \$23 million in the same period of 2013. The decrease in tax expense reflects the year-over-year impact of changes in the mix of earnings and differing tax rates between jurisdictions and other items, partially offset a year-over-year \$7 million increase resulting from the elimination of valuation allowances, comprised of a \$5 million benefit recognized in the third quarter of 2014 related to the partial elimination of valuation allowances against net operating loss carryforward attributes in Mexico as compared to the \$12 million benefit recognized in the third quarter of 2013 related to the elimination of valuation allowances against Korean foreign tax credits.

Discontinued Operations

On May 1, 2014, the Company reached an agreement for the sale of substantially all of its global Interiors operations for de minimis proceeds. Accordingly, the results of operations of the Interiors business subject to the Interiors Divestiture have been reclassified to Loss from discontinued operations, net of tax in the Consolidated Statements of Comprehensive (Loss) Income for the three-month period ended September 30, 2014.

Table of Contents

The results of operations for the discontinued Interiors business for the three months ended September 30, 2014 and 2013 are as follows:

	Three Months Ended September 30	
	2014	2013
	(Dollars in Millions)	
Sales	\$208	\$249
Cost of sales	201	241
Gross margin	7	8
Selling, general and administrative expenses	13	14
Long-lived asset impairment	15	—
Other expenses	8	(1)
Loss from discontinued operations before income taxes	(29)	(5)
(Benefit from) provision for income taxes	—	(3)
Loss from discontinued operations, net of tax	\$(29)	\$(2)

Net (Loss) Income

Net loss attributable to Visteon was \$21 million for the three-month period ended September 30, 2014, compared to net income attributable to Visteon of \$43 million for the same period of 2013, for a decrease of \$64 million. The decrease was largely due to lower equity in net income of non-consolidated affiliates of \$46 million related to the disposition of the Company's 50% ownership interest in Yanfeng and the long-lived asset impairment charge of \$15 million recognized in loss from discontinued operations in relation to the sale of the majority of the Company's Interiors operations.

Adjusted EBITDA (a non-GAAP financial measure, as defined below) was \$136 million and \$128 million, for the three-month periods ended September 30, 2014 and 2013, respectively. The Company defines Adjusted EBITDA as net income attributable to the Company, plus net interest expense, provision for income taxes and depreciation and amortization, as further adjusted to eliminate the impact of equity in net income of non-consolidated affiliates, net income attributable to non-controlling interests, assets impairment, gains or losses on divestitures, net restructuring expenses and other reimbursable costs, non-cash stock-based compensation expense, certain employee charges and benefits, reorganization items and other non-operating gains and losses. The Company's definition of Adjusted EBITDA includes the impacts of discontinued operations for all periods presented.

Through December 31, 2013, the Company's definition of Adjusted EBITDA was inclusive of net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates. Following the December 17, 2013 disposition of its 50% ownership interest in Yanfeng, the Company modified its definition of Adjusted EBITDA to exclude net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates as management believes this measure is most reflective of its operational performance. Accordingly, Adjusted EBITDA for historical periods has been recast on basis consistent with the current definition.

Adjusted EBITDA is not a recognized term under accounting principles generally accepted in the United States and does not purport to be a substitute for net income as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. Adjusted EBITDA has limitations as an analytical tool and is not intended to be a measure of cash flow available for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. In addition, the Company uses Adjusted EBITDA (i) as a factor in incentive compensation decisions, (ii) to evaluate the effectiveness of the Company's business strategies and (iii) because the Company's credit agreements use measures similar to Adjusted EBITDA to measure compliance with certain covenants. Adjusted EBITDA, as determined and measured by the

Company should not be compared to similarly titled measures reported by other companies.

Table of Contents

The reconciliation of Adjusted EBITDA to net income attributable to Visteon for the three-month periods ended September 30, 2014 and 2013 is as follows:

	Three Months Ended September 30

Other	(16)	(6)	—	—	(22)
Three months ended September 30, 2014	\$1,211	\$760	\$24	\$(25)	\$1,970

Climate sales increased by \$80 million during the three months ended September 30, 2014. Higher production volumes, including new business wins with Hyundai / Kia and Ford, increased sales by \$67 million. Favorable currency resulted in an increase of \$29 million, primarily related to the Korean Won, Euro, and India Rupee, partially offset by the Chinese Yuan and Argentinian Peso. Other reductions of \$16 million were associated with customer pricing, net of design changes.

Electronics sales increased during the three months ended September 30, 2014, by \$420 million. The largest drivers of the sales increase were attributable to the Electronics Acquisition and the acquisition of a controlling interest in YFVE, which increased sales by \$329 million and \$91 million, respectively. Higher production volumes, including net new business in Asia, increased sales by \$6 million. Currency reflected a stronger Euro and Indian Rupee, partially offset by a weaker Thai Baht. Other reductions, totaling \$6 million, primarily reflected customer pricing, net of design changes.

Other segment sales decreased during the three months ended September 30, 2014, by \$20 million, primarily reflecting the wind down of certain programs in South America.

Table of Contents

Cost of Sales by Segment

	Climate	Electronics	Other	Eliminations	Total
	(Dollars in Millions)				
Three months ended September 30, 2013	\$1,033	\$303	\$44	\$(31)	\$1,349

Three months ended September 30, 2014	\$1,106	\$674	\$23	\$(25)	\$1,778

Climate material costs increased by \$75 million, including \$101 million related to higher production volumes, partially offset by \$26 million of manufacturing efficiencies and purchasing improvements. Labor and overhead decreased by \$3 million, related to production volumes and currency. Engineering increased \$12 million, in order to support future growth. Other decreases of \$15 million primarily related to pension settlement gains.

Electronics cost of sales increased \$371 million attributable to the Electronics Acquisition effective July 1, 2014 and the acquisition of a controlling interest in YFVE with effect from November 2013.

Other segment material costs decreased by \$13 million, related to production wind down for certain programs in South America and currency. Labor costs and freight and duty costs decreased by \$3 million in connection with lower production volumes. Other decreases of \$5 million primarily related to pension settlement gains.

Adjusted EBITDA by Segment

Adjusted EBITDA by segment for the three months ended September 30, 2014 and 2013 is presented in the table below:

	Three Months Ended September 30		
	2014	2013	Change
	(Dollars in Millions)

Three months ended September 30, 2014	\$ 112	\$ 50	\$(7) 155	
Reconciling Items:					
Discontinued Operations				(6)
Corporate				(13)
Total				\$ 136	

Adjusted EBITDA for the Climate segment for the three months ended September 30, 2014, decreased by \$2 million compared to the same period of 2013. Volume and mix increased Climate Adjusted EBITDA by \$7 million, largely related to net new business wins including Hyundai / Kia in Asia and Ford in North America. Currency had a \$9 million negative impact on Climate Adjusted EBITDA, largely related to the strengthening Korean Won and weakening Chinese Yuan and Argentinian Peso, which more than offset the positive impact of a stronger Euro. Other changes reflected material, design and other cost efficiencies, partially offset by customer pricing and higher engineering costs to support future growth.

Electronics Adjusted EBITDA for the three months ended September 30, 2014, increased by \$23 million compared to the same period of 2013. Higher volumes, including the impacts of the Electronics Acquisition and the acquisition of a controlling interest in YFVE, as well as favorable product mix, increased Adjusted EBITDA by \$45 million. Currency, largely reflecting impacts of the mix of receivables and payables denominated in the Brazilian Real and Japanese Yen, decreased Adjusted EBITDA by \$10 million. Other reductions of \$12 million reflected other material, design and other cost efficiencies offset by customer pricing, net of design changes, and higher engineering costs to support future growth.

Other Adjusted EBITDA decreased during the three months ended September 30, 2014, by \$6 million, due to lower production volumes and the impact of a weaker Brazilian Real.

Table of Contents

Consolidated Results of Operations - Nine Months Ended September 30, 2014 and 2013

The Company's consolidated results of operations for the nine months ended September 30, 2014 and 2013 were as follows:

	Nine Months Ended September 30		
	2014	2013	Change
	(Dollars in Millions)		
Sales	\$5,470	\$4,680	\$790

* Adjusted EBITDA is a Non-GAAP financial measure, as further discussed below.

Sales

Sales for the nine-month period ended September 30, 2014, totaled \$5,470 million, which represents an increase of \$790 million compared with the same period of 2013. The primary drivers of the sales increase included the Electronics Acquisition effective July 1, 2014 and the acquisition of a controlling ownership interest in YFVE effective November 7, 2013, which increased sales by \$329 million and \$257 million, respectively. Additionally, favorable customer volumes and product mix, largely related to the Company's Climate and Electronics product groups, increased sales \$217 million, while favorable currency increased sales by \$60 million. The change in currency was primarily attributable to the strengthening Korean Won, Euro and Indian Rupee, partially offset by the weakening of the Thai Baht and Argentinian Peso. Other reductions of \$73 million were associated with customer pricing, net of design savings, commercial agreements and other customer settlements.

Cost of Sales

Cost of sales increased \$673 million for the nine-month period ended September 30, 2014, when compared with the same period in 2013. The increase includes \$679 million attributable to increased production volumes including the Electronics Acquisition and the acquisition of a controlling ownership interest in YFVE, as well as changes in product mix, representing the variable nature of material and labor costs. Foreign currency increased cost of sales by \$99 million including year-over-year impacts of the mix of receivables and payables denominated in currencies other than functional currencies. These increases were partially offset by \$80 million of net efficiencies including material, design, and usage economics and other costs and a \$25 million pension settlement gain.

Gross Margin

The Company's gross margin was \$565 million for the nine-month period ended September 30, 2014, compared to \$448 million for the same period of 2013, an increase of \$117 million. The increase in gross margin included \$124 million from favorable volumes and mix, including the impacts of the Electronics Acquisition and the acquisition of a controlling ownership interest in YFVE. Gross margin also included \$25 million related to the pension settlement gain and \$7 million of favorable cost performance. These increases were partially offset by \$39 million of unfavorable currency.

Table of Contents

Selling, General and Administrative Expenses

Selling, general, and administrative expenses were \$272 million and \$223 million during the nine-month period ended September 30, 2014 and 2013, respectively. The increase of \$49 million is primarily driven by the Electronics Acquisition and the acquisition of a controlling ownership interest in YFVE. Additional increases included \$9 million from the non-recurrence of cost recoveries associated with divested businesses and \$4 million of unfavorable currency.

Restructuring Expenses

The Company's restructuring reserves and related activity, including discontinued operations, is summarized below for the nine-month period ended September 30, 2014.

	Climate	Electronics	Corporate	Other	Total
	(Dollars in Millions)				
Restructuring reserve - December 31, 2013	\$1	\$—	\$3	\$25	\$29
Expenses	17	5	1	11	34
Utilization	(17)) (1) (4) (25) (47)
Foreign currency	—	—	—	(1) (1)
Restructuring reserve - September 30, 2014	\$1	\$4	\$—	\$10	\$15

During the nine months ended September 30, 2014, the Company recorded \$34 million of restructuring expenses primarily related to employee and severance termination benefits, including amounts associated with discontinued operations.

In connection with the Electronics Acquisition, the Company commenced a restructuring program designed to achieve annual cost savings ranging from \$40 million to \$70 million through transaction synergies by the end of 2017. The Company expects to incur approximately \$40 million to \$60 million of restructuring costs during the program to achieve the targeted annual savings. During the three-months ended September 30, 2014, the Company recorded \$5 million of severance and termination benefits under this program associated with approximately 115 employees. The Company anticipates recording additional restructuring charges related to this program in future periods as underlying plans are finalized.

The Company previously announced a \$100 million restructuring program designed to reduce fixed costs and to improve operational efficiency by addressing certain under-performing operations. In connection with that program, the Company announced plans to restructure three European Interiors facilities, to consolidate its Climate operations and to realign its corporate and administrative functions directly to their corresponding operational beneficiary. As of September 30, 2014, this \$100 million restructuring program has been substantially completed. During the three-months ended September 30, 2014, the Company recorded \$10 million of restructuring expenses, including amounts associated with discontinued operations, primarily related to the following activities:

The previously announced closure of the Climate facility located in Quilmes, Argentina. In connection with the closure, the Company recorded an additional \$3 million of restructuring expenses, related to severance and termination benefits.

The Company recorded \$6 million of severance and termination benefits associated with approximately 100 employees at two European Interiors facilities. This amount has been classified within discontinued operations on the Consolidated Statements of Comprehensive (Loss) Income for the three-month period ended September 30, 2014. Approximately \$3 million remains accrued as of September 30, 2014.

During the second quarter of 2014, the Company recorded \$17 million of restructuring expenses, including amounts associated with discontinued operations, among which \$10 million and \$2 million were primarily related to severance and termination benefits in connection with the previously announced closure of the Climate facilities in Quilmes, Argentina and Port Elizabeth, South Africa, respectively, and \$5 million was in connection with the previously announced restructuring of three Interiors facilities in France.

During the nine months ended September 30, 2013, the Company recorded \$33 million of restructuring expenses, net of reversals, related to severance and termination benefits, including amounts associated with discontinued operations, for approximately 430 employees under a previously announced \$100 million program designed to reduce fixed costs and to improve operational efficiency.

Utilization represents payments for severance and other employee termination benefits and special termination benefits reclassified to pension and other postretirement employee benefit liabilities, where such payments are made from the Company's benefit plans.

Table of Contents

Interest Expense, Net

Interest expense for the nine-month period ended September 30, 2014, of \$27 million included \$10 million associated with the Company's 6.75% Senior Notes due April 15, 2019, \$9 million associated with affiliate debt, \$7 million associated with the Term Facility, and \$1 million associated with commitment fees and amortization of debt issuance costs. During the nine-month period ended September 30, 2013, interest expense including amounts attributable to discontinued operations was \$36 million, including \$23 million on the 6.75% Senior Notes due April 15, 2019, \$8 million associated with affiliate debt, and \$5 million for commitment fees and amortization of debt issuance costs. Interest expense associated with the 6.75% senior notes due April 2019 decreased by \$13 million as compared to the nine months ended September 30, 2013 due to lower interest owed as a result of the redemption of \$50 million of notes in December 2013, \$50 million of notes in April 2014, and the remaining \$350 million of notes in May 2014. Interest income of \$7 million for the nine-month period ended September 30, 2014, decreased by \$1 million when compared to \$8 million for the same period of 2013 primarily due to lower interest rates partially offset by higher cash balances.

Equity in Net Income of Affiliates

Equity in net income of affiliates decreased \$119 million comparing the nine-month periods ended September 30, 2014 and 2013. The decrease was primarily attributable to the sale of the Company's 50% ownership interest in Yanfeng during the fourth quarter of 2013.

Loss on Debt Extinguishment

Loss on debt extinguishment of \$23 million during the nine months ended September 30, 2014 reflected the redemption premium and unamortized original issue discount, debt fees and other debt issue costs associated with the redemption of the all of the remaining \$400 million 6.75% Senior Notes due April 2019. \$50 million of the 6.75% senior notes was redeemed at a 103% premium on April 10, 2014, and \$350 million was redeemed at a 105.063% premium on May 9, 2014.

Other Expenses

Other expenses consist of the following:

	Nine Months Ended September 30	
	2014	2013
	(Dollars in Millions)	
Transformation costs	\$20	\$21
Integration costs	11	—
Provision for losses on recoverable taxes	8	—
Loss on asset contribution	3	—
Gain on sale of equity interest	(2	(5
UK Administration recovery	—	(2
	\$40	\$14

The Company recorded transformation costs of \$20 million and \$21 million for the nine months ended September 30, 2014 and 2013, respectively, related to financial and advisory services associated with continued execution of its comprehensive shareholder value creation plan, including fees associated with the Electronics Acquisition.

The Company recorded \$11 million of costs associated with business integration activities including re-branding, facility modification, information technology readiness and related professional services associated with the Electronics Acquisition during the nine months ended September 30, 2014, respectively. The Company expects to

incur additional integration costs of approximately \$20 million, primarily related to information technology, through the second quarter of 2015.

The Company recorded \$8 million during the nine months ended September 30, 2014 to adjust recoverable value-added taxes to net realizable value attributable to business exit activities.

During the nine months ended September 30, 2014, the Company contributed land and building with net book value of \$3 million to the local municipality in Quilmes, Argentina for the benefit of former employees.

Table of Contents

In April 2014, the Company completed the sale of its 50% ownership interest in Duckyang Industry Co., Ltd. ("Duckyang"), a Korean automotive interiors supplier. In connection with the transaction, the Company received total cash of approximately \$31 million, including \$6 million of dividends. The Company recorded a pre-tax gain of approximately \$2 million on this transaction during the nine months ended September 30, 2014.

In February 2013, the Company entered into an agreement to sell its 20% equity interest in Dongfeng Visteon Automotive Trim Systems Co. Ltd, for cash proceeds of approximately \$20 million. The Company recognized a gain of approximately \$5 million upon completion of the sale in the second quarter of 2013.

Income Taxes

The Company's provision for income taxes of \$94 million for the nine-month period ended September 30, 2014, represents an increase of \$35 million when compared with an income tax provision of \$59 million in the same period of 2013. The increase in income tax expense reflects a year-over-year \$45 million increase in expenses related to uncertain tax benefits, which includes the non-recurrence of a \$35 million benefit, including interest and penalties, primarily attributable to reevaluating transfer pricing-related exposures in Europe and the United States due to audit closures in the first quarter of 2013, and uncertainty surrounding the incentives associated with the Company's research and development activities in Asia recorded during the nine-month period ended September 30. The increase also reflects a year-over-year \$7 million increase resulting from the elimination of valuation allowances, comprised of a \$5 million benefit recognized in the third quarter of 2014 related to the partial elimination of valuation allowances against net operating loss carryforward attributes in Mexico as compared to the \$12 million benefit recognized in the third quarter of 2013 related to the elimination of valuation allowances against Korean foreign tax credits. These increases were partially offset by the year-over-year reduction in withholding taxes due to the elimination of Yanfeng equity earnings in December 2013 and other items.

Discontinued Operations

On May 1, 2014, the Company reached an agreement for the sale of substantially all of its global Interiors operations for de minimis proceeds. Accordingly, the results of operations of the Interiors business subject to the Interiors Divestiture have been reclassified to Loss from discontinued operations, net of tax in the Consolidated Statements of Comprehensive (Loss) Income for the nine-month period ended September 30, 2014. The results of operations for the discontinued Interiors business for the nine months ended September 30, 2014 and 2013 are as follows:

	Nine Months Ended September 30	
	2014	2013
	(Dollars in Millions)	
Sales	\$730	\$801
Cost of sales	678	767
Gross margin	52	34
Selling, general and administrative expenses	40	41
Long-lived asset impairment	188	—
Other expenses	22	9
Loss from discontinued operations before income taxes	(198)	(16)
Provision for (benefit from) income taxes	2	(18)
(Loss) income from discontinued operations, net of tax	\$(200)	\$2

Net (Loss) Income

Net loss attributable to Visteon was \$157 million for the nine-month period ended September 30, 2014, compared to net income attributable to Visteon of \$177 million for the same period of 2013, for a decrease of \$334 million. The

decrease was largely due to the long-lived asset impairment charge of \$188 million recognized in the loss from discontinued operations in relation to the agreement to sell the majority of the Company's Interiors operations in the second quarter of 2014, lower equity in net income of non-consolidated affiliates of \$119 million related to the disposition of the Company's 50% ownership interest in Yanfeng, and the non-recurrence of an income tax benefit, including interest and penalties, attributable to reevaluating transfer pricing-related exposures in Europe and the United States in connection with audit closures in the first quarter of 2013.

Table of Contents

Adjusted EBITDA (a non-GAAP financial measure, as defined below) was \$499 million and \$432 million, for the nine-month periods ended September 30, 2014 and 2013, respectively. The Company defines Adjusted EBITDA as net income attributable to the Company, plus net interest expense, provision for income taxes and depreciation and amortization, as further adjusted to eliminate the impact of equity in net income of non-consolidated affiliates, net income attributable to non-controlling interests, assets impairment, gains or losses on divestitures, net restructuring expenses and other reimbursable costs, non-cash stock-based compensation expense, certain employee charges and benefits, reorganization items and other non-operating gains and losses. The Company's definition of Adjusted EBITDA includes the impacts of discontinued operations for all periods presented.

Through December 31, 2013, the Company's definition of Adjusted EBITDA was inclusive of net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates. Following the December 17, 2013, disposition of its 50% ownership interest in Yanfeng, the Company modified its definition of Adjusted EBITDA to exclude net income attributable to non-controlling interests and equity in net income of non-consolidated affiliates as management believes this measure is most reflective of its operational performance. Accordingly, Adjusted EBITDA for historical periods has been recast on basis consistent with the current definition.

Adjusted EBITDA is not a recognized term under accounting principles generally accepted in the United States and does not purport to be a substitute for net income as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. Adjusted EBITDA has limitations as an analytical tool and is not intended to be a measure of cash flow available for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. In addition, the Company uses Adjusted EBITDA (i) as a factor in incentive compensation decisions, (ii) to evaluate the effectiveness of the Company's business strategies and (iii) because the Company's credit agreements use measures similar to Adjusted EBITDA to measure compliance with certain covenants. Adjusted EBITDA, as determined and measured by the Company should not be compared to similarly titled measures reported by other companies.

The reconciliation of Adjusted EBITDA to net income attributable to Visteon for the nine-month periods ended September 30, 2014 and 2013 is as follows:

	Nine Months Ended September 30		
	2014	2013	Change
	(Dollars in Millions)		
Adjusted EBITDA	\$499	\$432	\$67
Interest expense, net	20	27	(7)

Other	(52)) (21)) —	—	(73)
Nine months ended September 30, 2014	\$3,811	\$1,642	\$95	\$(78)) \$5,470

Climate sales increased during the nine months ended September 30, 2014, by \$205 million. Higher production volumes, including incremental new business in Asia and Europe, increased sales by \$198 million. Favorable currency resulted in an increase of \$59 million, primarily related to the Euro, and Korean Won, partially offset by the Indian Rupee, Argentinian Peso and Thai Baht. Other reductions of \$52 million were associated with customer pricing, net of design changes, partially offset by higher commercial settlements of \$14 million.

Electronics sales increased during the nine months ended September 30, 2014, by \$583 million. The largest drivers of the sales increase were attributable to the Electronics Acquisition and the acquisition of a controlling interest in YFVE, which increased sales by \$329 million and \$257 million, respectively. Higher production volumes, including net new business in Asia and Europe, increased sales by \$20 million. Unfavorable currency, primarily related to the Indian Rupee, Japanese Yen, and Brazilian Real, partially offset by the Euro, decreased product sales by \$2 million. Other changes, totaling \$21 million, reflected customer pricing net of design changes.

Other sales decreased during the nine months ended September 30, 2014, by \$48 million, including unfavorable volume and product mix of \$51 million primarily reflecting the wind down of certain South America business. Currency increased sales by \$3 million, largely related to the Euro.

Cost of Sales by Segment

	Climate	Electronics	Other	Eliminations	Total
	(Dollars in Millions)				
Nine months ended September 30, 2013	\$3,275	\$944	\$141	\$(128)) \$4,232

Other	13	(6)) (9)) —	(2)
Nine months ended September 30, 2014	\$3,467	\$1,419	\$97	\$(78)) \$4,905

Climate material costs increased by \$173 million, including \$252 million related to higher production volumes, partially offset by \$79 million of manufacturing efficiencies and purchasing improvements. Freight and duty decreased \$7 million primarily related to the non-recurrence of premium freight charges in Europe and China. Engineering increased \$14 million, in order to support future growth. Other increases of \$13 million include currency impacts of the mix of receivables and payables denominated in currencies other than functional currencies, partially offset by pension settlement gains.

Electronics cost of sales increased \$475 million attributable to the Electronics Acquisition effective July 1, 2014 and the acquisition of a controlling interest in YFVE with effect from November 2013.

Table of Contents

Other segment material, freight and duty and labor and overhead costs decreased by \$35 million, preliminary related to lower material costs, reflecting lower production volumes related to the wind down for certain programs in South America. Other costs decreased primarily related to pension settlement gains.

Adjusted EBITDA by Segment

Adjusted EBITDA by segment for the nine months ended September 30, 2014 and 2013 is presented in the table below:

	Nine Months Ended September 30		
	2014	2013	Change
	(Dollars in Millions)		
Climate	\$376	\$375	\$1
Electronics	157	83	74
Other	(11) (6) (5

Nine months ended September 30, 2014	\$376	\$157	\$(11) 522
Reconciling Items:				
Discontinued Operations				21
Corporate				(44
Total				\$499

Adjusted EBITDA for the Climate segment for the nine months ended September 30, 2014, increased by \$1 million compared to the same period of 2013. The increase in Climate Adjusted EBITDA reflected increased volume of \$19 million associated with net new business including Hyundai / Kia in Asia and Europe. Currency had a \$37 million negative impact on Climate Adjusted EBITDA, largely related to the strengthening Korean Won and Euro and weakening Indian Rupee, Argentinian Peso and Thai Baht, as well as currency impacts of the mix of receivables and payables denominated in currencies other than functional currencies. Other changes of \$19 million reflect higher year-over-year commercial settlements of \$14 million as well as material, design and other cost efficiencies, partially offset by customer price productivity.

Electronics Adjusted EBITDA for the nine months ended September 30, 2014, increased by \$74 million compared to the same period of 2013. Higher volumes, including the Electronics Acquisition, the acquisition of a controlling interest in YFVE, and favorable product mix increased Adjusted EBITDA by \$92 million. Currency, largely related to the Japanese Yen and Brazilian Real, had an unfavorable impact of \$4 million. Other reductions of \$14 million reflected customer pricing and higher engineering costs to support future growth, partially offset by material, design and other cost efficiencies.

Other Adjusted EBITDA, decreased during the nine months ended September 30, 2014, by \$5 million, due to lower production volumes and a weaker Brazilian Real.

Table of Contents

Liquidity

The Company's primary liquidity needs are related to the funding of general business requirements, including working capital, capital expenditures, debt service, employee retirement benefits and restructuring actions. The Company's primary sources of liquidity are cash flows from operations, existing cash balances, asset sales, and borrowings under available credit facilities, if necessary. To the extent the Company generates discretionary cash flow, it will be evaluated for and may be used for optional prepayments of existing indebtedness, strategic acquisitions, additional share repurchases, and/or general corporate purposes.

Credit Facilities

On April 9, 2014, the Company entered into a new credit agreement, which provides for (i) delayed draw term loans in an aggregate principal amount of \$600 million that mature on April 9, 2021, and (ii) a \$200 million revolving credit facility that matures on April 9, 2019. Up to \$75 million of the Revolving Facility is available for the issuance of letters of credit, and any such issuance of letters of credit will reduce the amount available for loans under the Revolving Facility. Up to \$20 million of the Revolving Facility is available for swing line advances, and any such swing line advances will reduce the amount available for loans under the Revolving Facility. The Company may request increases in the limits under the Term Facility and the Revolving Facility and may request the addition of one or more term loan facilities under the Credit Agreement. The facilities were rated as BB- and B1 by S&P and Moody's, respectively. On June 23, 2014, the Company drew the \$600 million term loan. On September 30, 2014, the company made its first mandatory repayment of 0.25% of the initial term loan or \$1.5 million. As of September 30, 2014, \$598.5 million was outstanding under the Term Facility, and there were no outstanding borrowings under the Revolving Facility.

Availability under outstanding affiliate credit facilities, excluding the Interiors discontinued operations, as of September 30, 2014 is approximately \$397 million and certain of these facilities have pledged receivables, inventory or equipment as security. Access to additional capital through the debt or equity markets is influenced by the Company's credit ratings. At September 30, 2014, the Company's corporate credit ratings were B1 by Moody's with a stable outlook and B+ by S&P with a positive outlook.

The Interiors business has an arrangement, through a subsidiary in France, to sell accounts receivable on an uncommitted basis. The amount of financing available is contingent upon the amount of receivables less certain reserves. As of September 30, 2014, there was \$12 million of outstanding borrowings under this facility which were recorded as Liabilities held for sale on the consolidated balance sheet with \$30 million of receivables pledged as security which were recorded as Assets held for sale on the consolidated balance sheet. Pursuant to the Purchase Agreement the Company is required to fund any amounts outstanding under this facility as Master Closing of the Interiors Divestiture. On November 1, 2014, in connection with the Master Closing, the Company funded the outstanding balance under this facility which was approximately \$1 million.

Cash Balances

As of September 30, 2014, the Company had total cash balances of \$1,060 million, including \$12 million of restricted cash, \$99 million of cash held for sale and \$13 million of restricted cash held for sale. Cash balances totaling \$651 million were located in jurisdictions outside of the United States, of which approximately \$340 million is considered permanently reinvested for funding ongoing operations outside of the U.S. If such permanently reinvested funds are needed for operations in the U.S., the Company would be required to accrue additional tax expense, primarily related to foreign withholding taxes.

Interiors Divestiture

On May 1, 2014, the Company entered into a Master Purchase Agreement as amended (the "Purchase Agreement") pursuant to which, Visteon will reorganize substantially all of its global Interiors business under a newly-formed holding company (the "Reorganization") and will sell all of the equity of that holding company (the "Interiors Divestiture") in exchange for the assumption of certain liabilities related to the Company's Interiors business and the payment of nominal cash consideration. Visteon agreed to contribute up to \$95 million (the "Cash Contribution") to the Interiors business and the Purchase Agreement includes net working capital adjustments whereby the Cash Contribution will be effectively adjusted based on the actual net working capital levels as of the closing date. Visteon also agreed to support the buyer in establishing external credit facilities. To the extent that \$90 million of external credit facilities are not available to the Interiors business by the date of closing, Visteon is required to provide a seller-backed revolving credit facility in the amount of any shortfall. Draws under any such seller-backed facility will only be available if certain of the external credit facilities are fully drawn, and any draws on the seller-backed facility generally must be repaid prior to the repayment of the external credit facilities. The seller-backed facility will have a maturity of three years and will have a default rate of interest for any interest and/or principal payment defaults.

On November 1, 2014, the Company closed on the majority of the Interiors Divestiture (the "Master Closing") and completed the largest phase of the Interiors Divestiture to Reydel Automotive Holdings B.V., an affiliate of Cerberus Capital Management, L.P.

Table of Contents

In connection with the Master Closing, the Company made a cash payment of approximately \$120 million, which included the \$95 million Cash Contribution and adjustments primarily for working capital subject to further adjustments. The Company also agreed to provide a \$56 million revolving credit facility in connection with the Master Closing, which is the shortfall to the agreed \$90 million target in external financing arrangements. As transaction related customer purchase order changes are effected over the next several months, increasing the backing of the buyer implemented factoring facility, the seller backed facility is expected to be substantially reduced. The seller-backed facility obligation can also be reduced if the buyer adds working capital facilities in Russia and Thailand. Draws under this seller-backed facility will only be available if certain of the external credit facilities are fully drawn, and any draws on the seller-backed facility generally must be repaid prior to the repayment of the external credit facilities. The seller-backed facility has a maturity of three years and will have an interest rate of Libor plus 5%.

Additionally, as part of the Reorganization, Visteon will separate the portion of its Interiors business conducted through its facilities in Chennai and Pune, India into a new legal entity, which will be transferred to the holding company and sold to the buyer as part of the Interiors Divestiture. Due to the time required to effect such separation under Indian law, the consummation of the Indian portion of the Interiors Divestiture will occur subsequent to the Master Closing but is expected before December 31, 2014. The Thailand, Argentina and Brazil portions of the Interiors Divestiture will also occur subsequent to the Master Closing and are expected to close during the first quarter of 2015. The remaining transactions are subject to various conditions, including regulatory and antitrust approvals, receipt of other third party consents and approvals and other customary closing conditions, and may be subject to further cash impacts based on purchase price adjustments at the time of closing.

The Company's goal is to complete the disposal of its remaining Interiors business that is not subject to the Interiors Divestiture during the next year. Due to certain liabilities and capital requirements of the remaining business, Visteon may be required to contribute cash to such business in connection with any disposition, which amounts could be material.

Share Repurchase Program

On May 8, 2014, the Company announced an accelerated share buy-back ("ASB") program with a third-party financial institution to repurchase shares of common stock for an aggregate purchase price of \$500 million. Under the program, the Company paid the financial institution \$500 million and received an initial delivery of 3,394,157 shares of common stock using a reference price of \$92.07, and an additional delivery of 1,129,001 shares of common stock following the conclusion of the hedge period which determined a certain minimum amount of shares guaranteed under a portion of the program that had a maximum per share price of \$100.54. The final settlement will be generally based on the volume-weighted average price of the Company's common stock over a period of up to approximately 12 months, less a negotiated discount, 50 percent of which will be subject to a maximum per share price. On October 15, 2014, the capped portion of the program concluded, and the Company received an additional 112,269 shares. As of September 30, 2014, \$375 million remained authorized and available for repurchase through December 31, 2015. The Company anticipates that additional repurchases of common stock, if any, would occur from time to time in open market transactions or in privately negotiated transactions depending on market and economic conditions, share price, trading volume, alternative uses of capital and other factors.

Restructuring

At September 30, 2014, the Company had restructuring accruals totaling \$15 million which are expected to be settled in cash during 2014. Additionally, the Company commenced a restructuring program during the three-month period ended September 30, 2014 designed to achieve annual cost savings ranging from \$40 million to \$70 million by the end of 2017 through synergies associated with the Electronics Acquisition. The Company expects to incur

approximately \$40 million to \$60 million of restructuring costs during the program to achieve the targeted annual savings. The Company anticipates recording additional restructuring charges related to this program in future periods as underlying plans are finalized.

Other

In connection with the Electronics Acquisition, the Company expects to incur integration costs of approximately \$30 million, including costs incurred to date, through the second quarter of 2015. The remaining integration costs are primarily related to the migration of information systems.

The Company expects to make cash contributions to its U.S. retirement plans of \$2 million in 2014. Contributions to non-U.S. retirement plans are expected to be \$43 million during 2014. Estimated cash contributions for 2015 through 2017, under current regulations and market assumptions and including amounts associated to plans within the Interiors business, are approximately \$113 million.

Table of Contents

During 2012, South Korean tax authorities commenced a review of the Company's South Korean affiliates (including Halla) for tax years 2007 through 2012, and issued formal notice of assessments, including penalties, of approximately \$25 million for alleged underpayment of withholding tax on dividends paid and other items, including certain management service fees charged by Visteon. The Company's South Korean affiliates have paid approximately \$25 million to the tax authorities in 2013 and 2012, as required under South Korean tax regulations, to pursue the appeals process. During the third quarter of 2014, the tax authorities refunded approximately \$11 million to the Company's South Korean affiliates, comprised of \$5 million representing substantially all of the tax associated with the management service fees charged by Visteon and \$6 million representing a partial refund related to withholding tax on dividends paid. The Company continues to evaluate all available settlement opportunities, including litigation related to the outstanding items and believes that it is more likely than not that it will receive a favorable outcome. Also, during 2012, Brazilian tax authorities issued tax assessment notices to Visteon Sistemas Automotivos ("Sistemas") of approximately \$15 million related to the sale of its chassis business to a third party. During 2013, after attempts to reopen an appeal of the administrative decision failed, Sistemas opened a judicial proceeding against the government to address the notice which required a deposit in the amount of the assessment in order to suspend the debt and allow Sistemas to operate regularly before the tax authorities. The Company believes that the risk of a negative outcome is remote once the matter is fully litigated at the highest judicial level. These appeal payments in South Korea and Brazil, as well as contingent income tax refund claims associated with other jurisdictions, including applicable accrued interest income, totaled \$34 million as of September 30, 2014, and were included in Other non-current assets on the consolidated balance sheet.

Cash Flows

The Company has combined cash flows from discontinued operations with cash flows from continuing operations within the operating, investing and financing categories in the Consolidated Statements of Cash Flows of our consolidated financial statements in this Quarterly Report on Form 10-Q for all periods presented. As such, the discussion below includes both continuing and discontinued operations.

Operating Activities

The Company generated \$180 million of cash from operating activities during both of the nine months ended September 30, 2014, compared to \$179 million during the same period of 2013, for an increase of \$1 million. During the nine months ended September 30, 2014 the Company received net tax refunds from Korean tax authorities of approximately \$10 million compared to making tax payments to Korean and Brazilian tax authorities of \$38 million in the same period of 2013 resulting in an improvement in operating cash of \$48 million. The increase was more than offset by higher employee benefit related payments of \$21 million, increases in unbilled receivables of \$19 million primarily due to the timing of tooling development activity and customer payments, the non-recurrence of changes in receivable terms for certain customers in Asia of \$16 million, and higher professional fees primarily related to the Company's shareholder value creation plan.

Investing Activities

Cash used by investing activities during the nine months ended September 30, 2014 totaled \$461 million, compared to a use of \$125 million for the same period in 2013. Cash used by investing activities during the nine months ended September 30, 2014 included \$308 million for the acquisition of businesses, net of cash acquired which reflected \$264 million for the Electronics Acquisition, \$46 million for the Thermal Acquisition, net of a \$2 million inflow related to the Company's 51% acquisition of JCS-Nanjing. The nine months ended September 30, 2014 also included \$209 million of capital spending, partially offset by \$64 million of proceeds from asset sales which included proceeds from the sale of various interests owned by YFVE pursuant to the Master Agreement and the sale of the Company's 50% ownership interest in Duckyang Industries Co., Ltd. Cash used by investing activities during the nine months ended

September 30, 2013 included \$164 million of capital spending partially offset by \$39 million of proceeds from asset sales including the Company's 50% ownership interest in Visteon TYC Corporation and 20% equity interest in Dongfeng Visteon Automotive Trim Systems Co., Ltd.

Financing Activities

Cash used by financing activities during the nine months ended September 30, 2014 totaled \$344 million, compared to \$26 million for the same period in 2013. Cash used by financing activities during the nine months ended September 30, 2014 included \$500 in share repurchases under the ASB program, the redemption of \$350 million of outstanding 6.75% Senior Notes due 2019 at 105.063% and \$50 million at 103% of par, and \$84 million of dividends paid to non-controlling interests. This was partially offset by \$590 million of net proceeds from the draw on the Company's Term Facility and a net increase in other affiliate short-term debt of \$42 million primarily at HVCC to support the Thermal Acquisition. Financing activities during the nine months ended September 30, 2013 included \$250 million in stock repurchases and \$22 million of dividends paid to non-controlling interests, partially offset

Table of Contents

by \$195 million of proceeds related to the two HVCC unsecured bilateral term loan credit agreements completed in January 2013 and an increase in other affiliate debt primarily at HVCC.

Debt and Capital Structure

On April 9, 2014, the Company entered into a new credit agreement, by and among the Company as borrower, each lender from time to time party thereto, each letter of credit issuer from time to time party thereto and Citibank, N.A. as administrative agent, which provides for (i) delayed draw term loans in an aggregate principal of \$600 million and (ii) a \$200 million revolving credit facility. The Company and certain of its subsidiaries have granted a security interest in substantially all of their respective property, subject to certain limitations. On June 23, 2014, the Company drew the \$600 million term loan.

The Company's 6.75% senior notes due April 15, 2019 (the "Senior Notes") were issued under an Indenture (the "Indenture") among the Company, the subsidiary guarantors named therein, and The Bank of New York Mellon Trust Company, N.A., as trustee. The Indenture and the form of Senior Notes provide, among other things, that prior to April 15, 2014, the Company had the option to redeem up to 10% of the Senior Notes during any 12-month period from the issue date until April 15, 2014, for a 103% redemption price, plus accrued and unpaid interest to the redemption date. On April 10, 2014, the Company exercised this right and redeemed \$50 million, or 10%, of its Senior Notes. Additionally, the Company had the option to redeem a portion or all of the Senior Notes beginning on April 15, 2014, for a 105.063% redemption price, plus accrued and unpaid interest to the redemption date. On April 9, 2014, the Company exercised this right and issued a call notice and redeemed the remaining \$350 million of its Senior Notes on May 9, 2014.

Additional information related to the Company's debt is set forth in Note 12, "Debt" to the consolidated financial statements included herein under Item 1. For additional information, refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2013, for specific debt agreements and additional information related to covenants and restrictions.

Off-Balance Sheet Arrangements

The Company has a \$15 million Letter of Credit ("LOC") Facility with US Bank National Association, which expires on September 30, 2015. Under the terms of the LOC facility, the Company must maintain a collateral account with U.S. Bank equal to 103% of the aggregated stated amount of the issued LOCs (or 110% for non-U.S. currencies) with reimbursement for any draws. As of September 30, 2014, the Company had \$10 million of outstanding letters of credit issued under this facility and secured by restricted cash. In addition, the Company had \$23 million of locally issued letters of credit to support various customs arrangements and other obligations at its local affiliates, including amounts attributable to discontinued operations, of which \$14 million are secured by cash collateral.

Fair Value Measurements

The Company uses fair value measurements in the preparation of its financial statements, which utilize various inputs including those that can be readily observable, corroborated or generally unobservable. The Company utilizes market-based data and valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Additionally, the Company applies assumptions that market participants would use in pricing an asset or liability, including assumptions about risk. The primary financial instruments that are recorded at fair value in the Company's financial statements are derivative instruments.

The Company's use of derivative instruments creates exposure to credit loss in the event of nonperformance by the counterparty to the derivative financial instruments. The Company limits this exposure by entering into agreements

directly with a variety of major financial institutions with high credit standards and that are expected to fully satisfy their obligations under the contracts. Fair value measurements related to derivative assets take into account the non-performance risk of the respective counterparty, while derivative liabilities take into account the non-performance risk of Visteon and its foreign affiliates. The hypothetical gain or loss from a 100 basis point change in non-performance risk would be less than \$1 million for the fair value of foreign currency derivatives as of September 30, 2014.

Recent Accounting Pronouncements

See Note 1 "Basis of Presentation" to the accompanying consolidated financial statements under Item 1 "Financial Statements" of this Quarterly Report on Form 10-Q for a discussion of recent accounting pronouncements.

Forward-Looking Statements

Table of Contents

Certain statements contained or incorporated in this Quarterly Report on Form 10-Q which are not statements of historical fact constitute “Forward-Looking Statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (the “Reform Act”). Forward-looking statements give current expectations or forecasts of future events. Words such as “anticipate”, “expect”, “intend”, “plan”, “believe”, “seek”, “estimate” and other words and terms of similar meaning in connection with discussions of future operating or financial performance signify forward-looking statements. These statements reflect the Company’s current views with respect to future events and are based on assumptions and estimates, which are subject to risks and uncertainties including those discussed in Item 1A under the heading “Risk Factors” and elsewhere in this report. Accordingly, undue reliance should not be placed on these forward-looking statements. Also, these forward-looking statements represent the Company’s estimates and assumptions only as of the date of this report. The Company does not intend to update any of these forward-looking statements to reflect circumstances or events that occur after the statement is made and qualifies all of its forward-looking statements by these cautionary statements.

You should understand that various factors, in addition to those discussed elsewhere in this document, could affect the Company’s future results and could cause results to differ materially from those expressed in such forward-looking statements, including:

- Visteon’s ability to satisfy its future capital and liquidity requirements; Visteon’s ability to access the credit and capital markets at the times and in the amounts needed and on terms acceptable to Visteon; Visteon’s ability to comply with covenants applicable to it; and the continuation of acceptable supplier payment terms.

- Visteon’s ability to satisfy its pension and other postretirement employee benefit obligations, and to retire outstanding debt and satisfy other contractual commitments, all at the levels and times planned by management.

- Visteon’s ability to access funds generated by its foreign subsidiaries and joint ventures on a timely and cost effective basis.

- Changes in the operations (including products, product planning and part sourcing), financial condition, results of operations or market share of Visteon’s customers.

- Changes in vehicle production volume of Visteon’s customers in the markets where it operates, and in particular changes in Ford’s and Hyundai Kia’s vehicle production volumes and platform mix.

- Increases in commodity costs or disruptions in the supply of commodities, including steel, resins, aluminum, copper, fuel and natural gas.

Visteon’s ability to generate cost savings to offset or exceed agreed upon price reductions or price reductions to win additional business and, in general, improve its operating performance; to achieve the benefits of its restructuring actions; and to recover engineering and tooling costs and capital investments.

Visteon’s ability to compete favorably with automotive parts suppliers with lower cost structures and greater ability to rationalize operations; and to exit non-performing businesses on satisfactory terms, particularly due to limited flexibility under existing labor agreements.

Restrictions in labor contracts with unions that restrict Visteon’s ability to close plants, divest unprofitable, noncompetitive businesses, change local work rules and practices at a number of facilities and implement cost-saving measures.

The costs and timing of facility closures or dispositions, business or product realignments, or similar restructuring actions, including potential asset impairment or other charges related to the implementation of these actions or other adverse industry conditions and contingent liabilities.

- Significant changes in the competitive environment in the major markets where Visteon procures materials, components or supplies or where its products are manufactured, distributed or sold.

Legal and administrative proceedings, investigations and claims, including shareholder class actions, inquiries by regulatory agencies, product liability, warranty, employee-related, environmental and safety claims and any recalls of products manufactured or sold by Visteon.

- Changes in economic conditions, currency exchange rates, changes in foreign laws, regulations or trade policies or political stability in foreign countries where Visteon procures materials, components or supplies or where its products

are manufactured, distributed or sold.

Shortages of materials or interruptions in transportation systems, labor strikes, work stoppages or other interruptions to or difficulties in the employment of labor in the major markets where Visteon purchases materials, components or supplies to manufacture its products or where its products are manufactured, distributed or sold.

Changes in laws, regulations, policies or other activities of governments, agencies and similar organizations, domestic and foreign, that may tax or otherwise increase the cost of, or otherwise affect, the manufacture, licensing, distribution, sale, ownership or use of Visteon's products or assets.

- Possible terrorist attacks or acts of war, which could exacerbate other risks such as slowed vehicle production, interruptions in the transportation system or fuel prices and supply.

- The cyclical and seasonal nature of the automotive industry.

Table of Contents

- Visteon's ability to comply with environmental, safety and other regulations applicable to it and any increase in the requirements, responsibilities and associated expenses and expenditures of these regulations.
- Visteon's ability to protect its intellectual property rights, and to respond to changes in technology and technological risks and to claims by others that Visteon infringes their intellectual property rights.
- Visteon's ability to quickly and adequately remediate control deficiencies in its internal control over financial reporting.
- Other factors, risks and uncertainties detailed from time to time in Visteon's Securities and Exchange Commission filings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary market risks to which the Company is exposed include changes in foreign currency exchange rates, interest rates and certain commodity prices. The Company manages these risks through derivative instruments and various operating actions including fixed price contracts with suppliers and cost sourcing arrangements with customers. The Company's use of derivative instruments is limited to hedging activities and such instruments are not used for speculative or trading purposes, as per clearly defined risk management policies. Additionally, the Company's use of derivative instruments creates exposure to credit loss in the event of nonperformance by the counter-party to the derivative financial instruments. The Company limits this exposure by entering into agreements directly with a variety of major financial institutions with high credit standards and that are expected to fully satisfy their obligations under the contracts. Additionally, the Company's ability to utilize derivatives to manage market risk is dependent on credit conditions and market conditions given the current economic environment.

Foreign Currency Risk

The Company's net cash inflows and outflows exposed to the risk of changes in exchange rates arise from the sale of products in countries other than the manufacturing source, foreign currency denominated supplier payments, debt and other payables, subsidiary dividends and investments in subsidiaries. Where possible, the Company utilizes derivative financial instruments to manage foreign currency exchange rate risks. Forward and option contracts may be utilized to protect the Company's cash flow from adverse movements in exchange rates. Foreign currency exposures are reviewed periodically and any natural offsets are considered prior to entering into a derivative financial instrument. The Company's primary hedged operating exposures include the Euro, Korean Won, Czech Koruna, Hungarian Forint, Indian Rupee and Mexican Peso. Where possible, the Company utilizes a strategy of partial coverage for transactions in these currencies. As of September 30, 2014 and December 31, 2013, the net fair value of foreign currency forward contracts was an asset of \$10 million and \$4 million, respectively.

The hypothetical pre-tax gain or loss in fair value from a 10% favorable or adverse change in quoted currency exchange rates would be approximately \$66 million and \$63 million as of September 30, 2014 and December 31, 2013, respectively. These estimated changes assume a parallel shift in all currency exchange rates and include the gain or loss on financial instruments used to hedge loans to subsidiaries. Because exchange rates typically do not all move in the same direction, the estimate may overstate the impact of changing exchange rates on the net fair value of the Company's financial derivatives. It is also important to note that gains and losses indicated in the sensitivity analysis would generally be offset by gains and losses on the underlying exposures being hedged.

In addition to the transactional exposure described above, the Company's operating results are impacted by the translation of its foreign operating income into U.S. dollars. The Company does not enter into foreign exchange contracts to mitigate this exposure.

Interest Rate Risk

The Company is subject to interest rate risk, principally in relation to fixed rate debt. The Company may use derivative financial instruments to manage exposure to fluctuations in interest rates. However, as of September 30, 2014, the Company had no outstanding interest rate derivative instruments.

Approximately 4% and 58% of the Company's borrowings were effectively on a fixed rate basis as of September 30, 2014 and December 31, 2013, respectively. The Company continues to evaluate its interest rate exposure and may use swaps or other derivative instruments again in the future.

Commodity Risk

The Company's exposures to market risk from changes in the price of production material are managed primarily through negotiations with suppliers and customers, although there can be no assurance that the Company will recover all such costs. The Company continues to evaluate derivatives available in the marketplace and may decide to utilize derivatives in the future to manage select commodity risks if an acceptable hedging instrument is identified for the

Company's exposure level at that time, as well as the effectiveness of the financial hedge among other factors.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in periodic reports filed with the SEC under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As noted in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013, management excluded Yanfeng Visteon Automotive Electronics Co., Ltd. ("YFVE") from its assessment of the effectiveness of the Company's disclosure controls and procedures as the Company acquired an additional 11% ownership interest in YFVE resulting in a 51% controlling equity interest in November 2013.

As of September 30, 2014, an evaluation was performed under the supervision and with the participation of the Company's management, including its Chief Executive and Financial Officers, of the effectiveness of the design and operation of disclosure controls and procedures, excluding YFVE, JCS-Nanjing, and entities acquired in the Electronics Acquisition and Thermal Acquisition. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2014.

Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the quarterly period ended September 30, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. The Company is integrating YFVE into the Company's operations, compliance programs and internal control processes. Specifically, as permitted by SEC rules and regulations, the Company has excluded YFVE from management's evaluation of internal controls over financial reporting as of December 31, 2013.

Part II

Other Information

Item 1. Legal Proceedings

See the information above under Note 18, "Commitments and Contingencies," to the consolidated financial statements which is incorporated herein by reference.

Item 1A. Risk Factors

For information regarding factors that could affect the Company's results of operations, financial condition and liquidity, see the risk factors discussed in Part I, "Item 1A. Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. See also, "Forward-Looking Statements" included in Part I, Item 2 of this Quarterly Report on Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes information relating to purchases made by or on behalf of the Company, or an affiliated purchaser, of shares of the Company's common stock during the third quarter of 2014:

Edgar Filing: VISTEON CORP - Form 10-Q

Period	Total Number of Shares (or Units) Purchased (1)	Average Price Paid per Share (or Unit)	Total Number of Shares (or units) Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (2) (in millions)
July 1, 2014 to July 31, 2014	568	\$97.76	—	\$375
August 1, 2014 to August 31, 2014	13,130	\$96.93	—	\$375
September 1, 2014 to September 30, 2014	—	\$0.00	—	\$375
Total	13,698	\$96.96	—	\$375

57

Table of Contents

This column includes 13,698 shares surrendered to the Company by employees to satisfy tax withholding (1) obligations in connection with the vesting of restricted share and stock unit awards made pursuant to the Visteon Corporation 2010 Incentive Plan.

(2) On August 11, 2013, the board of directors increased its share repurchase program authorization by \$875 million to a total authorization to repurchase up to \$1 billion of the Company's common stock thereafter until December 31, 2015. In May 2014, the Company entered into an accelerated stock buyback ("ASB") program with a third-party financial institution to repurchase shares of common stock for an aggregate purchase price of \$500 million. Under the ASB program, the Company paid the financial institution \$500 million and received an initial delivery of 3,394,157 shares of common stock using a reference price of \$92.07, and an additional delivery of 1,129,001 shares of common stock following the conclusion of the hedge period which determined a certain minimum amount of shares guaranteed under a portion of the program that had a maximum per share price of \$100.54. The program is expected to be concluded between the fourth quarter of 2014 and the second quarter of 2015. On October 15, 2014, the capped portion of the program concluded, and the Company received an additional 112,269 shares. The Company anticipates that additional repurchases of common stock, if any, would occur from time to time in open market transactions, non-discretionary programs or in privately negotiated transactions depending on market and economic conditions, share price, trading volumes, alternative uses of capital and other factors.
