October 20, 2004

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

For the month of OCTOBER, 2004.

Commission File Number: 0-30464

IMA EXPLORATION INC.

(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports
under cover of Form 20-F or Form 40-F: FORM 20-F FORM 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as
permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information
contained in this Form, is also thereby furnishing the information to the
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.
YES NO

If "Yes" is marked, indicate below the file number assigned to the registrant in
connection with Rule 12g3-2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the
registrant has duly caused this report to be signed on its behalf of the
undersigned, thereunto duly authorized.

NEWS RELEASE

OCTOBER 13, 2004

IMA INTERSECTS 28 METRES OF 1,115 G/T (32.6 OZ/T) SILVER AT NAVIDAD HILL

IMA EXPLORATION INC. (IMR - TSX.V, IMXPF - OTC.BB) is pleased to announce the final results of the Phase II drill program at its 100% owned Navidad Project in Patagonia, Argentina. Highlights of these results include 28.15M OF 1,115 G/T SILVER (32.6 OZ/T) INCLUDING 5.97M OF 4,579 G/T (133.7 OZ/T) IN HOLE 117 AND 58.68M OF 208 G/T SILVER (6.1 OZ/T) IN HOLE 112. In addition to expanding the limits of known alteration and mineralization through ongoing surface work, the Company has contracted Snowden Mining Industry Consultants to perform an independent resource estimation at the Navidad Hill and Connector zones. Results from this new resource estimation will be from zones outside of, and in addition to the previously reported Galena Hill Indicated Resource of 63.6 million tonnes grading 101 g/t silver, 1.76% lead, 0.03% copper and 0.24% zinc at a cut-off grade of 50 g/t silver equivalent (see release dated May 25, 2004).

The twelve reported drill holes were all drilled at the Navidad Hill zone (see attached map). Targets included structurally controlled, near vertical mineralized bodies (e.g. HOLE NV04-110: 61.50M OF 128 G/T SILVER INCLUDING 5.34M OF 1,006 G/T SILVER) on the top of Navidad Hill and gently-dipping, stratigraphically-controlled mineralization in the area of hole 90 (e.g. HOLE NV04-117: 28.15M OF 1,115 G/T SILVER). Drill holes 116 and 117 confirm and extend the stratigraphically controlled, bonanza-grade mineralization on the southwest flank of Navidad Hill first discovered with hole 90 (35.8M OF 2,850 G/T SILVER).

All data resulting from the Phase II program are now being verified and interpreted prior to being handed over to Snowden. This will include a careful review of all QA/QC analytical data. Phase II drilling comprised 9,596 metres of diamond core drilling in 67 holes and 5,210 core sample analyses, including quality control samples, bringing the life of the project totals to 18,456m in 120 holes and 10,548 core sample analyses in less than one year since the first hole was drilled.

Dr. Paul Lhotka is IMA's Qualified Person at the Navidad Project, and has overseen all aspects of the current program. An updated summary of Phase II results is available at IMA's website (www.imaexploration.com) as are updated maps showing the locations of all drilling completed to date on the project.

IMA Exploration Inc. has over 10 years experience in Argentina and is focused on the exploration and development of its 100% owned Navidad silver discovery and its property portfolio in the region.

ON BEHALF OF THE BOARD

/s/ Joseph Grosso

Mr. Joseph Grosso, President & CEO

including	4.50	10.50	6.00	109	0.87
NV04-114	5.56	39.28	33.72	57	0.09

Edgar Filing: IMA EXPLORATION INC - Form 6-K

	including	6.50	12.75	6.25	83	0.16
NV04-115		8.00	18.05	10.05	151	0.04
NV04-116		15.00	45.40	30.40	243	0.32
	including	15.00	36.42	21.42	322	0.39
NV04-117		25.50	53.65	28.15	1,115	0.45
	including	42.04	48.01	5.97	4,579	1.82
NV04-118		44.00	51.62	7.62	155	0.09
NV04-119		44.10	55.30	11.20	92	0.03
NV04-120		7.12	65.65	58.53	47	0.07
	including	26.00	31.24	5.24	85	0.04
	including	62.80	65.65	2.85	243	0.23

Notes:

1. All length weighted averages (LWA) are "uncut".
2. True thicknesses have yet to be interpreted for these holes. True thickness in the case of sub-vertical structures and -45(Degree) drill holes are likely to be approximately 70% of the intercept length; true thickness in the case of shallowly dipping stratigraphically-controlled mineralization is likely to be between 70 and 100% of the intercept length.
