On September 4, 2013, the Company issued a press release announcing the award of a Small Business Innovation Research (SBIR) grant from the National Institute on Aging (NIA) of the National Institutes of Health (NIH), in connection with the development of the Company's NAV4694 beta-amyloid imaging agent. This grant, which follows the recent SBIR award for the Company’s Phase 3 study with NAV4694, will partially support the Phase 2b clinical study which is evaluating NAV4694 as a diagnostic imaging agent that may aid physicians in identifying those individuals with mild cognitive impairment who are at greatest risk of progressing to Alzheimer’s disease. The SBIR grant has the potential to provide up to \$2.3 million in support, if fully funded, through the conclusion of the clinical study. Funding for the approved first stage of the grant (\$152,000) is intended to provide support for initiation activities of the clinical trial program. Funding of the second stage of the grant is contingent upon meeting specific aims related to the first stage of the grant such as clinical site contracting, investigator training and institutional review board approvals. The Company announced the initiation of the Phase 2b trial in March 2013.

A copy of the complete text of the Company’s September 4, 2013, press release is attached as Exhibit 99.1 to this Current Report on Form 8-K and each is incorporated herein by reference.
