C. Resolutions

- I. The 2007 Business Report and Financial Statements were submitted at the meeting for acceptance. (Proposed by the Board of Directors)

Explanatory Notes: 1. TSMC's 2007 Financial Statements, including Balance Sheet, Income Statement, Statement of Changes in Shareholders' Equity, and Cash Flow Statement were audited by independent auditors,

Messrs. Jackson Huang and Michael Chang, of Deloitte & Touche.

2. The 2007 Business Report, independent auditors' audit report, and the above-mentioned Financial Statements were attached hereto as Attachments I, IV and V.

3. Please accept the above-mentioned Business Report and Financial Statements.

Upon solicitation of comments by the Chairman, there was no objection voiced and the resolution was adopted unanimously by the shareholders present:

RESOLVED, that the 2007 Business Report and Financial Statements be and hereby were accepted as submitted.

II. A proposal to approve the distribution of 2007 profits was submitted at the meeting for discussion and approval. (Proposed by the Board of Directors)

Explanatory Notes: 1. The proposed profit distribution was allocated from 2007 Retained Earnings Available for Distribution. Each common share holder would be entitled to receive a cash dividend of NT\$3 per share, and a stock dividend of 2 shares for each 1,000 shares held by such shareholders. In addition, each common share holder would be entitled to receive, for each 1,000 shares held, 3 shares from the proposed capitalization of capital surplus to be discussed in the next resolution; and, together with the 2 shares of stock dividend as mentioned above, 5 shares in total for each 1,000 shares held by such shareholder. If the above-mentioned distributions included any fractional shares which were less than one full share, the shareholders concerned may arrange for pooling together their fractional shares to form one full

share and register the same within 5 days after the record date. For the fractional shares which could not be pooled, the distribution would be made in the form of cash rounded to the nearest dollar amount calculated at par value. Such fractional shares would be purchased by persons arranged by the Chairman as authorized by the Board of Directors of TSMC.

The total amount of outstanding common shares might change and the ultimate cash and stock to be distributed to each common share might need to be adjusted accordingly should TSMC subsequently repurchase its common shares or issue new common shares to its employees as a result of their exercising of stock options. It was proposed that the Chairman of the Board of Directors of TSMC be authorized to adjust the cash and stock to be distributed to each common share based on the total amount of profits resolved to be distributed and capital surplus resolved to be capitalized, and the number of actual outstanding common shares on the record date for distribution.

2. The 2007 Profit Allocation Proposal was attached hereto as Attachment VI.

(Questions raised by the shareholders and the management's responses were omitted)

Upon solicitation of comments by the Chairman, there was no objection voiced and the resolution was adopted unanimously by the shareholders present:

RESOLVED, that the above proposals be and hereby were approved as proposed.

III. A proposal to approve the capitalization of 2007 dividends, 2007 employee

profit sharing, and capital surplus was submitted at the meeting for discussion and approval. (Proposed by the Board of Directors)

- Explanatory Notes:
1. For purposes of machine purchase and production capacity expansion, it was proposed that TSMC's capital stock be increased by capitalizing (i) capital surplus generated from the excess of the issue price over the par value of capital stock in the amount of NT\$ 768,813,120; and (ii) the stock dividends to shareholders of NT\$512,542,080 and employee profit sharing (in stock) of NT\$3,939,883,080, allocated from 2007 Retained Earnings Available for Distribution.
 2. The total amount of capital stock increase should be NT\$5,221,238,280 and 522,123,828 common shares, at par value of NT\$10 per share, should be issued for such capital increase.
 3. The shareholder's rights and obligations of the new shares were the same as those of the existing shares. After being approved by the governmental authority in charge, the new shares would be distributed on a record date to be determined by the Board of Directors or its designee(s).
 4. As of April 15, 2008 (the first day of book-close period for registration of share transfer before the Annual General Shareholders' Meeting), the number of exercisable shares of employees' stock options that TSMC granted was approximately 38,835,000 shares. In accordance with TSMC's Employee Stock Option Plans, TSMC had to adjust upwards the number of outstanding employees' stock options in proportion to the proposed capital increase. It was estimated that the number of such additional employees' stock options was approximately 791,000 shares.
 5. Since the additional employees' stock options were
-

issued in proportion to the increase of capital stock, it should not cause any material impact to the shareholders' interest. There were sufficient common shares reserved in the Articles of Incorporation for granting the aforesaid additional employees' stock options.

Upon solicitation of comments by the Chairman, there was no objection voiced and the resolution was adopted unanimously by the shareholders present:

RESOLVED, that the capitalization of 2007 dividends, 2007 employee profit sharing, and capital surplus be and hereby were approved as proposed.

D. Special Motion

There being no other business and special motion, upon a motion duly made and seconded, the meeting was adjourned.

Business Report

In 2007, TSMC delivered its 6th consecutive annual growth in revenue since 2001. Although we saw weakened demand in the first quarter as customers worked down inventories, our revenue recovered in the following quarters with rising utilization rates and improving profitability quarter over quarter.

Due to customers' inventory correction that took place in early part of 2007, growth of the pure-play foundry segment of the semiconductor industry for the year was essentially flat, lagging the global semiconductor industry's estimated 4% growth. Nevertheless, in our 20th year as a public company, TSMC continued to enjoy a market share of about 50% in the pure-play foundry segment it created, and announced several major operational and technological developments. More importantly, better capital discipline in 2008 along with increasing capital productivity and operating efficiencies should put us in a stronger position for continued growth and higher profitability in future years.

Financial Results

Revenue for 2007 totaled NT\$322.63 billion, a 1.6 percent increase compared with NT\$317.41 billion in 2006. Net income was NT\$109.18 billion, a decrease of 14 percent compared with net income of NT\$127.01 billion earned in 2006. Diluted earnings per share decreased 15.8% to NT\$4.14, compared with NT\$4.92 for 2006. In US dollars, TSMC revenue for 2007 increased 0.7% to US\$9.83 billion, while net income declined 15% to US\$3.23 billion. Although TSMC registered another revenue record in 2007, a lower average utilization rate and a larger decline in average selling price than in 2006 contributed to the decrease in earnings.

Among other highlights in 2007, TSMC achieved:

- Total average billing utilization of 93%

- Average gross profit margin of 44.1%

- Average operating profit margin of 34.6%

During the year, TSMC shipped more than 8 million eight-inch equivalent wafers, representing about 7.5% of global IC wafer shipments.

Technology Innovations

TSMC continues to lead the semiconductor industry by pushing the boundaries of advanced technology. Our investment and long-term commitment in advanced technology

development helps enable our customers to bring their leading-edge products first to market. In early 2007, TSMC delivered the foundry segment's first functional 65-nanometer embedded DRAM for customer product. In September of the same year, TSMC completed 45-nanometer technology qualification and entered production. In December, we announced, at the IEEE International Electron Devices Meeting in Washington DC, our development of the first 32-nanometer technology and the proven functionality of the test chip. Customers continue to move toward our more powerful and efficient 65nm and 45nm technologies. In 2007, we have increased our market share at the 65nm node and further solidified our leadership in advanced technologies. Meanwhile, the number of customers we have engaged in discussions for TSMC's 45nm technology is higher at this stage than we experienced for 65nm at the same ramp point.

Awards

In 2007, TSMC continued to receive recognition and awards from around the world as a corporate role model. Among the numerous media surveys conducted in 2007, *FinanceAsia*, *Corporate Governance Asia*, *The Asset Magazine*, and the *IR Magazine* all have awarded TSMC as the Best Corporate Governance, while *FinanceAsia* has also chosen TSMC as the Best Managed Company with the Best CFO and the Best Investor Relations in the Taiwan region. *IR Magazine* also awarded TSMC with the Grand Prix for Best Overall Investor Relations, Best Investment Meetings, Best IR by a CEO, and Best IR Officer. *CommonWealth Magazine* voted us the Most Admired Company for the 11th consecutive time and also awarded us with Excellence in Corporate Social Responsibility.

Corporate Development

The Company and Royal Philips Electronics announced in March 2007 a four-phased plan to facilitate an orderly exit by Philips from its TSMC shareholding. In the third phase of the program completed on December 31, 2007, the Company had repurchased a total of 800 million of its common shares over the open market from the Taiwan Stock Exchange, accounting for approximately 3.03% of its total outstanding shares, at an average price of NT\$60.58 per share. The repurchased shares will be cancelled.

TSMC increased to 37 percent its ownership of outstanding shares of Vanguard International Semiconductor Corporation. We expect the investment will strengthen the Company's business alliance with Vanguard and advance our eight-inch wafer strategy.

Starting in 2008, Taiwan accounting rules require the expensing of employee profit sharing in the Company's financial statements. TSMC took an early leadership position by announcing in November 2006 a change in its profit sharing mechanism in order to better

balance the interests of TSMC's employees and its shareholders. As we informed the market as well as our employees at that time, employee profit sharing for the year 2008 will be at 15% of 2008's net income, and the Company will start accruing such an amount in each quarter beginning the first quarter of 2008.

Outlook

As we begin our 21st year, management anticipates the global semiconductor market should grow by a mid- single digit rate in 2008, and that the foundry segment in general, and TSMC in particular, should grow by more than that. While much depends on macro-economic developments globally, our 2008 results will benefit from the capacity that we have already built over the years along with improvements in capital productivity and operating efficiency. We are focused on balancing capacity installation with anticipated demand to maintain high utilization rates, which will have a positive impact on return on investment. Given TSMC's 2008 capacity plan, which represents an annual capacity increase of 12.7%, we expect the capital intensity ratio, defined as capital expenditure as a percentage of sales, will be lower this year. We are also focusing on pricing so that it will reflect the true value proposition that TSMC's products and services represent to our customers.

The semiconductor competitive landscape will continue to transform itself as the costs associated with designing and producing advanced technology continues to grow. Customers and suppliers are today dealing with new processes and new materials as complex and costly as they are powerful. All of us at TSMC will continue to commit ourselves to enabling our customers' success and increasing our shareholders' value throughout 2008 and beyond.
