Form 10-Q
October 26, 2012
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended September 30, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number: 0-49677

WEST BANCORPORATION, INC.
(Exact Name of Registrant as Specified in its Charter)

IOWA
(State of Incorporation)

42-1230603
(I.R.S. Employer Identification No.)

1601 22nd Street, West Des Moines, Iowa 50266

Telephone Number: (515) 222-2300

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Edgar Filing: WEST BANCORPORATION INC - Form 10-Q

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of October 25, 2012, there were 17,403,882 shares of common stock, no par value, outstanding.

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by West Bancorporation, Inc. (the Company) pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to such rules and regulations. Although management believes that the disclosures are adequate to make the information presented understandable, it is suggested that these interim consolidated financial statements be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2011. In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary to present fairly the financial position as of September 30, 2012, and December 31, 2011, the net income and comprehensive income for the three and nine months ended September 30, 2012 and 2011, and cash flows for the nine months ended September 30, 2012 and 2011. The results for these interim periods may not be indicative of results for the entire year or for any other period.

The consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB). References to GAAP issued by the FASB in these footnotes are to the FASB Accounting Standards Codification™, sometimes referred to as the Codification or ASC. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses for the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term are the fair value of financial instruments and other than temporary impairment (OTTI), the valuation of other real estate owned, and the allowance for loan losses.

The accompanying unaudited consolidated financial statements include the accounts of the Company, West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in a partnership), and West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity). All significant intercompany transactions and balances have been eliminated in consolidation. In accordance with GAAP, West Bancorporation Capital Trust I is recorded on the books of the Company using the equity method of accounting and is not consolidated.

Certain items in the financial statements as of September 30, 2011, were reclassified to be consistent with the classifications used in the September 30, 2012, financial statements. The reclassification had no effect on net income or stockholders' equity.

Current accounting developments: In April 2011, the FASB issued guidance to improve the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. This guidance removes from the assessment of effective control in the accounting for repurchase agreements (a) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (b) the collateral maintenance implementation guidance related to that criterion. The guidance was effective for the first interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In May 2011, the FASB issued amended guidance to improve the comparability of fair value measurements presented and disclosed in financial statements made in accordance with GAAP and International Financial Reporting Standards. The guidance does not extend the use of fair value accounting, but provides guidance on how it should be applied in situations where it is already required or permitted. The guidance is included in the Codification as part of ASC 820. The guidance was effective for public companies during interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

Table of Contents

2. Critical Accounting Policies

Management has identified its most critical accounting policies to be those related to asset impairment judgments, including fair value and OTTI of available for sale investment securities, the valuation of other real estate owned, and the allowance for loan losses.

Securities available for sale are reported at fair value, with unrealized gains and losses reported as a separate component of accumulated other comprehensive income, net of deferred income taxes. The Company evaluates each of its investment securities whose value has declined below amortized cost to determine whether the decline in fair value is OTTI. The investment portfolio is evaluated for OTTI by segregating the portfolio into two segments and applying the appropriate OTTI model. Investment securities classified as available for sale are generally evaluated for OTTI under FASB ASC 320, Investments - Debt and Equity Securities. However, certain purchased beneficial interests in securitized financial assets, including asset-backed securities and collateralized debt obligations that had credit ratings below AA at the time of purchase, are evaluated using the model outlined in FASB ASC 325, Beneficial Interests in Securitized Financial Assets.

In determining OTTI under the FASB ASC 320 model, the review takes into consideration the severity and duration of the decline in fair value, the length of time expected for recovery, the financial condition of the issuer, and other qualitative factors, as well as whether the Company intends to sell the security or whether it is more likely than not the Company will be required to sell the debt security before its anticipated recovery.

Under the FASB ASC 325 model for the second segment of the portfolio, the Company compares the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When OTTI occurs under either model, the amount of the OTTI recognized in earnings depends on whether the Company intends to sell the security or whether it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If the Company intends to sell or it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis, the OTTI is recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the entity will be required to sell before recovery of its amortized cost basis, the OTTI is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected, using the original yield as the discount rate, and is recognized in earnings. The amount of the total OTTI related to other factors is recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings becomes the new amortized cost basis of the investment. The assessment of whether an OTTI exists involves a high degree of subjectivity and judgment and is based on the information available to management at the time.

Other real estate owned includes real estate properties acquired through or in lieu of foreclosure. They are initially recorded at fair value less estimated selling costs. After foreclosure, valuations are performed by management at least annually by obtaining updated appraisals or other market information. Any subsequent write-downs are recorded as a charge to operations.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that collectibility of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio, including timely identification of potential problem loans. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses, incorporating a variety of risk considerations, both quantitative and

qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans, and other factors. Qualitative factors include the general economic environment in the Company's market areas and the expected trend of those economic conditions. While management uses the best information available to make its evaluations, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or less than future charge-offs.

Table of Contents

3. Securities Available for Sale

For securities available for sale, the following tables show the amortized cost, unrealized gains and losses (pre-tax) included in accumulated other comprehensive income, and estimated fair value by security type as of September 30, 2012, and December 31, 2011.

Mortgage-backed securities ⁽¹⁾	34,967	706	(37)) 35,636
Trust preferred securities	6,105	—	(4,094)) 2,011
Corporate notes and other investments	4,764	—	(284)) 4,480
	\$ 282,090	\$ 5,776	\$ (4,721)) \$ 283,145

All collateralized mortgage obligations and mortgage-backed securities consist of residential mortgage (1)pass-through securities guaranteed by GNMA or issued by FNMA, and real estate mortgage investment conduits guaranteed by FHLMC or GNMA.

Securities with an amortized cost of \$77,683 and \$96,062 as of September 30, 2012, and December 31, 2011, respectively, were pledged as collateral on securities sold under agreements to repurchase, and for other purposes as required or permitted by law or regulation. Securities sold under agreements to repurchase are held in safekeeping at a correspondent bank on behalf of the Company.

The amortized cost and fair value of securities available for sale as of September 30, 2012, by contractual maturity are shown in the following table. Certain securities have call features that allow the issuer to call the securities prior to maturity. Expected maturities may differ from contractual maturities in collateralized mortgage obligations and mortgage-backed securities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, collateralized mortgage obligations and mortgage-backed securities are not included in the maturity categories within the summary.

	September 30, 2012	
	Amortized Cost	Fair Value
Due in one year or less	\$ 936	\$ 941
Due after one year through five years	22,859	23,184

See Note 2 for a discussion of financial reporting for securities with unrealized losses. As of September 30, 2012, the available for sale investment portfolio included one municipal security and two trust preferred securities (TPS) with unrealized losses that have existed for longer than one year.

The Company believes the unrealized losses on investments in municipal obligations and collateralized mortgage obligations as of September 30, 2012, are due to market conditions, not reduced estimated cash flows. The Company does not have the intent to sell these securities, does not anticipate that these securities will be required to be sold before anticipated recovery, and expects full principal and interest to be collected. Therefore, the Company does not consider these investments to have OTTI at September 30, 2012.

The Company believes the unrealized loss of \$985 on an investment in one single-issuer TPS issued by Heartland Financial, USA, Inc. as of September 30, 2012, is due to market conditions, not reduced estimated cash flows. The Company does not have the intent to sell this security, does not anticipate that this security will be required to be sold before anticipated recovery, and expects full principal and interest will be collected. Therefore, the Company does not consider this investment to have OTTI at September 30, 2012.

Table of Contents

As of September 30, 2012, the Company had one pooled TPS, ALESCO Preferred Funding X, Ltd., it considered to have OTTI. The Company engaged an independent consulting firm to assist in the valuation of this security. Based on that valuation, management determined the security had an estimated fair value of \$1,276 at September 30, 2012. The consulting firm first evaluated the credit quality of each of the 77 underlying issuers within the pool by reviewing a comprehensive database of financial information and/or publicly-filed financial statements. On the basis of this information and a review of historical industry default data and current and near-term operating conditions, default and recovery probabilities for each underlying issuer within the asset were estimated. For issuers who had already defaulted, no recovery was assumed. For deferring issuers, an assumption was made that the majority of deferring issuers will continue to defer and will eventually default. Each deferring issuer is reviewed on a case-by-case basis and, in some instances, a probability is assigned that the deferral will ultimately be cured. The issuer-specific assumptions are then aggregated into cumulative weighted-average default, recovery, and prepayment probabilities. The collateral prepayment assumptions were affected by the view that the terms and pricing of TPS and subordinated debt issued by banks and insurance companies were so aggressive that it is unlikely that such financing will become available in the foreseeable future. However, the forthcoming phase-out of TPS from Tier 1 Capital of financial institutions whose consolidated assets exceed \$15 billion may affect potential prepayments. An assumption was made that those institutions will have a 30 percent prepayment rate in years two and three of the projections and an annual prepayment rate of two percent thereafter. The remaining institutions are not likely to prepay as the issuance rates are less than current market debt yield thus making refinancing prohibitively expensive. In light of generally weak collateral credit performance and a challenging U.S. credit and real estate environment, the assumptions generally imply more issuer defaults during the next two to three years than those that had been experienced historically and a gradual leveling off of defaults thereafter.

In accordance with ASC 325, a discounted cash flow model was used to determine the estimated fair value of this security. The methodology for determining the appropriate discount rate for a TPS for purposes of determining fair value combines an evaluation of current market yields for comparable corporate and structured credit products with an evaluation of the risks associated with the TPS cash flows. As a result of this analysis and due to the fixed rate nature of the instrument's contractual interest cash flows, a discount rate of three-month LIBOR plus 14 percent (a lifetime average all-in discount rate of approximately 17 percent) was used for determination of fair value as of September 30, 2012. A discount rate of three-month LIBOR plus 15 percent (a lifetime average all-in discount rate of approximately 18 percent) was used as of December 31, 2011. For purposes of determining any credit loss, projected cash flows were discounted using a rate of three-month LIBOR plus 1.25 percent. Future fair value estimates for this security may vary due to changes in market interest rates and credit performance of the underlying collateral. Any additional deferrals or defaults of the underlying issuers will have a negative impact on the value of the pooled TPS because there is no excess collateral to absorb any future defaults.

Based on the valuation work performed, an additional credit loss of \$6 was recognized in third quarter 2012 earnings, bringing the year-to-date impairment to \$179. A credit loss of \$22 was recognized during the first nine months of 2011. The remaining unrealized loss of \$2,919 is reflected in accumulated other comprehensive income, net of taxes of \$1,109. The Company will continue to periodically estimate the present value of cash flows expected to be collected over the life of the security.

The following table provides a roll forward of the cumulative amount of credit-related losses recognized in earnings for the three and nine months ended September 30, 2012 and 2011.

	Three Months Ended September 30,		Nine Months Ended September 30,

Table of Contents

4. Loans and Allowance for Loan Losses

Loans consist of the following segments as of September 30, 2012, and December 31, 2011.

	September 30, 2012	December 31, 2011
Commercial	\$257,857	\$255,702
Real estate:		
Construction, land, and land development	117,467	101,607
1-4 family residential first mortgages	51,920	63,218
Home equity	25,613	26,423
Commercial	395,208	386,137
Consumer and other loans	6,351	6,155
	854,416	839,242
Net unamortized fees and costs	211	283
	\$854,205	\$838,959

Real estate loans of approximately \$345,000 and \$337,000 were pledged as security for Federal Home Loan Bank (FHLB) advances as of September 30, 2012, and December 31, 2011, respectively.

Loans are stated at the principal amounts outstanding, net of unamortized loan fees and costs, with interest income recognized on the interest method based upon those outstanding loan balances. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method. Loans are reported by the segments identified above and are analyzed by management on this basis and are not further broken down by class. All loan policies identified below apply to all segments of the loan portfolio.

Delinquencies are determined based on the payment terms of the individual loan agreements. The accrual of interest on past due and other impaired loans is generally discontinued at 90 days or when, in the opinion of management, the borrower may be unable to make all contractual payments pursuant to contractual terms. Unless considered collectible, all interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income, if accrued in the current year, or charged to the allowance for loan losses, if accrued in the prior year. Generally, all payments received while a loan is on nonaccrual status are applied to the principal balance of the loan. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

A loan is classified as a troubled debt restructured (TDR) loan when the Company concludes that a borrower is experiencing financial difficulties and a concession was granted that would not otherwise be considered. Concessions may include a restructuring of the terms of a loan to alleviate the burden on the borrower's cash requirements, such as an extension of the payment terms beyond the original maturity date or a change in the interest rate charged. TDR loans with extended payment terms are accounted for as impaired until performance is established. A change to the interest rate would change the classification of a loan to a TDR loan if the restructured loan yields a rate which is below a market rate for that of a new loan with comparable risk. TDR loans with below market rates are considered impaired until fully collected. TDR loans may be reported as nonaccrual or past due 90 days, rather than as a TDR loan, if they are not performing per the restructured terms.

Based upon its ongoing assessment of credit quality within the loan portfolio, the Company maintains a Watch List, which includes Classified loans. These loans involve anticipated potential payment defaults or collateral inadequacies. A loan on the Watch List is considered impaired when management believes it is probable the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. The amount of impairment, if any, and any subsequent changes are

included in the allowance for loan losses.

Table of Contents

The following table sets forth the recorded investment in nonperforming loans, disaggregated by segment, held by the Company as of September 30, 2012, and December 31, 2011. The recorded investment represents principal balances net of any partial charge-offs. Related accrued interest and net unamortized fees and costs are immaterial and are excluded from the table.

	September 30, 2012	December 31, 2011
Nonaccrual loans:		
Commercial	\$547	\$800
Real estate:		
Construction, land, and land development	3,356	4,220
1-4 family residential first mortgages	711	923
Home equity	310	—
Commercial	3,501	2,629
Consumer and other loans	—	—
Total nonaccrual loans	8,425	8,572
Loans past due 90 days and still accruing interest:		
Commercial	—	—
Real estate:		
Construction, land, and land development	—	—
1-4 family residential first mortgages	—	—
Home equity	—	—
Commercial	—	—
Consumer and other loans	—	—
Total loans past due 90 days and still accruing interest	—	—
Troubled debt restructured loans ⁽¹⁾ :		
Commercial	21	—
Real estate:		
Construction, land, and land development	480	1,094
1-4 family residential first mortgages	168	171
Home equity	—	—
Commercial	—	856
Consumer and other loans	—	—
Total troubled debt restructured loans	669	2,121
Total nonperforming loans	\$9,094	\$10,693

While TDR loans are commonly reported by the industry as nonperforming, those not classified in the nonaccrual category are accruing interest due to payment performance. TDR loans on nonaccrual status are included in the nonaccrual category. As of September 30, 2012, there were two TDR loans totaling \$894 that were in the nonaccrual category.

Table of Contents

The following table shows the pre- and post-modification recorded investment in TDR loans by type of modification and loan segment that have occurred during the three and nine months ended September 30, 2012.

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2012			
	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment

Commercial	—	—	—	—	—	—
Consumer and other loans	—	—	—	—	—	—
	—	\$—	\$—	2	\$102	\$102

During the three and nine months ended September 30, 2012, the financial impact of a charge-off for the modified loans included in the previous table was \$4.

The following table shows the recorded investment in TDR loans by segment that have been modified within the previous twelve months and have subsequently had a payment default during the three and nine months ended September 30, 2012. A TDR loan is considered to have a payment default when it is past due 30 days or more.

	Three months ended September 30, 2012		Nine months ended September 30, 2012	
	Number of Loans	Recorded Investment	Number of Loans	Recorded Investment

All loans are subject to the assessment of a credit quality indicator. Risk ratings are assigned for each loan at the time of approval; and they change as circumstances dictate during the term of the loan. The Company utilizes a 9-point risk rating scale as shown below, with ratings 1 - 5 included in the Pass column, rating 6 included in the Watch column, ratings 7 - 8 included in the Substandard column, and rating 9 included in the Doubtful column. The Substandard column includes all loans classified as impaired as well as loans with ratings 7 and 8, which are included in the general evaluation of the allowance for loan losses.

Risk rating 1: The loan is secured by cash equivalent collateral.

Risk rating 2: The loan is secured by properly margined marketable securities, bonds, or cash surrender value of life insurance.

Risk rating 3: The borrower is in strong financial condition and has strong debt service capacity. The loan is performing as agreed and the financial characteristics and trends of the borrower exceed industry statistics.

Risk rating 4: The borrower is in satisfactory financial condition and has satisfactory debt service capacity. The loan is performing as agreed and the financial characteristics and trends of the borrower fall in line with industry statistics.

Risk rating 5: The borrower's financial condition is less than satisfactory. The loan is still generally paying as agreed, but strained cash flow may cause some slowness in payments. Collateral values adequately preclude loss. Financial characteristics and trends lag industry statistics. There may be noncompliance with loan covenants.

Risk rating 6: The borrower's financial condition is deficient. Payment delinquencies may be more common. Collateral values still protect from loss, but margins are narrow. Loan may be reliant on secondary sources of repayment, including liquidation of collateral and guarantor support.

Risk rating 7: The loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Well-defined weaknesses exist that jeopardize the liquidation of the debt. The Company is inadequately protected by the valuation or paying capacity of the collateral pledged. If deficiencies are not corrected, there is a distinct possibility that a loss will be sustained.

Risk rating 8: All the characteristics of rating 7 exist with the added condition that the loan is past due more than 90 days or there is reason to believe the Company will not receive its principal and interest according to the terms of the loan agreement.

Risk rating 9: All of the weaknesses inherent in risk ratings 7 and 8 exist with the added condition that collection or liquidation, on the basis of currently known facts, conditions, and values is highly questionable and improbable. A loan reaching this category would most likely be charged off.

Credit quality indicators for all loans and the Company's risk rating process are dynamic and updated on a continuous basis. Risk ratings are updated as circumstances that could affect the repayment of an individual loan are brought to management's attention through an established monitoring process. Individual lenders initiate changes as appropriate for ratings 1 through 5 and changes for ratings 6 through 9 are initiated via communications with management. The likelihood of loss increases as the risk rating increases and is generally preceded by a loan appearing on the Watch List, which consists of all loans with a risk rating of 6 or higher.

Table of Contents

In all portfolio segments, the primary risks are that a borrower's income stream diminishes to the point that they are not able to make scheduled principal and interest payments and any collateral securing the loan has declined in value. For commercial loans, including construction and commercial real estate loans, that income stream consists of the operations of the business. For consumer loans, including 1-4 family residential and home equity loans, that income stream typically consists of wages. The risk of declining collateral values is present for most types of loans. For commercial loans, the collateral is generally comprised of accounts receivable, fixed assets, and inventory. Accounts receivable can diminish in value if collections are not timely. Fixed assets tend to depreciate over time and inventory can become obsolete. For all types of loans secured by real estate, it is possible for the value of the real estate to decline.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans in each of the Company's segments are charged against the allowance for loan losses when management believes that collectibility of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb probable losses on existing loans, based on an evaluation of the collectibility of loans and prior loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, the review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon.

The allowance for loan losses consists of specific and general components. The specific component relates to loans that meet the definition of impaired. The general component covers the remaining loans and is based on historical loss experience adjusted for qualitative factors such as delinquency trends, loan growth, economic elements, and local market conditions. These same policies are applied to all segments of loans. In addition, regulatory agencies, as an integral part of their examination processes, periodically review West Bank's allowance for loan losses, and may require West Bank to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The following tables detail changes in the allowance for loan losses by segment for the three and nine months ended September 30, 2012 and 2011.

5. Fair Value Measurements

Accounting guidance on fair value measurements and disclosures defines fair value, establishes a framework for measuring the fair value of assets and liabilities using a hierarchy system, and defines required disclosures. It clarifies that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts business.

The Company's balance sheet contains securities available for sale that are recorded at fair value on a recurring basis. The three-level valuation hierarchy for disclosure of fair value is as follows:

Level 1 uses quoted market prices in active markets for identical assets or liabilities.

Level 2 uses observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3 uses unobservable inputs that are not corroborated by market data.

When available, quoted market prices are used to determine the fair value of investment securities and such items are classified within Level 1 of the fair value hierarchy. Examples include U.S. Treasury securities, certain corporate bonds, and preferred stocks. For other securities, the Company determines fair value based on various sources and may apply matrix pricing with observable prices for similar bonds where a price for the identical bond is not observable. Securities measured at fair value by such methods are classified as Level 2. The fair values of Level 2 securities are determined by pricing models that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers, and live trading systems. Certain securities are not valued based on observable inputs and are, therefore, classified as Level 3. The fair value of these securities is based on management's best estimates. The Company's policy is to recognize transfers between levels at the end of each reporting period, if applicable.

Generally, management obtains the fair value of investment securities at the end of each reporting period via a third party pricing service. Management, with the assistance of an independent investment advisory firm, reviewed the valuation process used by the third party and believes that process is valid. On a quarterly basis management corroborates the fair values of investment securities by obtaining pricing from the independent investment advisory firm and compares the two sets of fair values. Any significant variances are reviewed and investigated. In addition, the Company has instituted a practice of further testing the fair values of a sample of securities. For that sample, the prices are further validated by management, with assistance from the independent investment advisory firm, by obtaining details of the inputs used by the pricing service. Those inputs were independently tested, and we concluded the fair values were consistent with GAAP requirements and securities were properly classified in the fair value hierarchy.

Table of Contents

The following tables present the balances of assets measured at fair value on a recurring basis by level as of September 30, 2012, and December 31, 2011.

Description	September 30, 2012			
	Total	Level 1	Level 2	Level 3
Assets:				
U.S. government agencies and corporations	\$18,124	\$—	\$18,124	\$—
State and political subdivisions	57,434	—	57,434	—
Collateralized mortgage obligations	187,126	—	187,126	—
Mortgage-backed securities	41,019	—	41,019	—
Trust preferred securities	2,030	—	754	1,276
Corporate notes and other investments	5,350	4,688	662	—

Trust preferred securities	2,011	—	766	1,245
Corporate notes and other investments	4,480	3,708	772	—
Total	\$283,145	\$3,708	\$278,192	\$1,245

There were no transfers between Levels of the fair value hierarchy during the nine months ended September 30, 2012.

The following table presents changes in securities available for sale with significant unobservable inputs (Level 3) for the three and nine months ended September 30, 2012 and 2011.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Beginning balance	\$1,137	\$1,582	\$1,245	\$1,339
Transfer into level 3	—	—	—	—
Total gains or (losses):				
Included in earnings	(6) (22) (179) (22
Included in other comprehensive income	145	(203) 210	40
Sale of security	—	—	—	—
Principal payments	—	—	—	—
Ending balance	\$1,276	\$1,357	\$1,276	\$1,357

The ending balances in the previous table consisted of one pooled TPS.

Table of Contents

Certain assets are measured at fair value on a nonrecurring basis. That is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following tables present those assets carried on the balance sheet by caption and by level within the valuation hierarchy as of September 30, 2012, and December 31, 2011.

Description	September 30, 2012			
	Total	Level 1	Level 2	Level 3
Assets:				
Loans	\$ 10,157	\$—	\$—	\$ 10,157
Other real estate owned	8,894	—	—	8,894
Total	\$ 19,051	\$—	\$—	\$ 19,051

Description	December 31, 2011			
	Total	Level 1	Level 2	Level 3
Assets:				
Loans	\$ 20,513	\$—	\$—	\$ 20,513
Other real estate owned	10,967	—	—	10,967
Total	\$ 31,480	\$—	\$—	\$ 31,480

Loans in the tables above consist of impaired loans for which a fair value adjustment has been recorded. Impaired loans are evaluated and valued at the lower of cost or fair value when the loan is identified as impaired. Fair value is measured based on the value of the collateral securing these loans and is classified as Level 3 in the fair value hierarchy. Collateral may be real estate or business assets such as equipment, inventory, or accounts receivable. Fair value is determined by appraisals. Appraised or reported values may be discounted based on management's opinions concerning market developments or the client's business. Other real estate owned in the tables above consist of property acquired through foreclosures and settlements of loans. Property acquired is carried at fair value of the property, less estimated disposal costs, and is classified as Level 3 in the fair value hierarchy.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Cash and due from banks: The carrying amount approximates fair value.

Federal funds sold and other short-term investments: The carrying amount approximates fair value.

FHLB stock: The fair value of this restricted stock is estimated at its carrying value and redemption price of \$100 per share.

Loans held for sale: The fair values of loans held for sale are based on estimated selling prices.

Loans: The fair values of loans are estimated using discounted cash flow analysis based on observable market interest rates currently being offered for loans with similar terms to borrowers with similar credit quality.

Deposits: The carrying amounts for demand and savings deposits, which represent the amounts payable on demand, approximate their fair values. The fair values for fixed-rate and variable-rate certificates of deposit are estimated using discounted cash flow analysis, based on observable market interest rates currently being offered on certificates with similar terms.

Accrued interest receivable and payable: The fair values of both accrued interest receivable and payable approximate their carrying amounts.

Short-term and other borrowings: The carrying amounts of federal funds purchased and securities sold under agreements to repurchase approximates fair values. The fair values of FHLB advances and subordinated notes are estimated using a discounted cash flow analysis, based on observable market interest rates currently being offered with similar terms.

Commitments to extend credit and standby letters of credit: The approximate fair values of commitments and standby letters of credit are based on the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and creditworthiness of the counterparties.

Table of Contents

The following table includes the carrying amounts and approximate fair values of financial assets and liabilities as of September 30, 2012, and December 31, 2011.

	Fair Value Hierarchy Level	September 30, 2012 Carrying Amount	September 30, 2012 Approximate Fair Value	December 31, 2011 Carrying Amount	December 31, 2011 Approximate Fair Value
Financial assets:

Off-balance-sheet financial instruments:					
Commitments to extend credit	Level 3	—	—	—	—
Standby letters of credit	Level 3	—	—	—	—

6. Stock Compensation Plans

At the Company's annual meeting of shareholders on April 26, 2012, the West Bancorporation, Inc. 2012 Equity Incentive Plan (the 2012 Plan) was approved by the shareholders, replacing the West Bancorporation, Inc. Restricted Stock Compensation Plan, which had never been used and therefore had no awards outstanding. The 2012 Plan is administered by the Compensation Committee of the Board of Directors. All employees and directors of and service providers to the Company and its subsidiary are eligible to become participants in the 2012 Plan, except that nonemployees may not be granted incentive stock options. Under the terms of the 2012 Plan, the Company may grant a total of 800,000 shares of the Company's common stock as nonqualified and incentive stock options, stock appreciation rights (SARS), stock awards, and cash incentive awards. The Compensation Committee will determine the specific individuals who will be granted awards under the 2012 Plan and the type and amount of any such awards.

Under the 2012 Plan, the Company may grant restricted stock unit (RSU) awards, as determined by the Compensation Committee, that vest upon the completion of future service requirements or specified performance criteria. On May 17, 2012, there were 21,706 RSUs granted to certain executive officers and other employees that entirely vest on the second anniversary of the grant. On August 1, 2012, an additional 25,663 RSUs with a five-year vesting period were granted to certain executive officers. The five-year RSUs vest 20 percent annually on the anniversary of the grant date. On September 5, 2012, 19,424 RSUs were granted to certain directors and employees. The 6,174 RSUs granted to directors on this date will vest on April 25, 2013, while the 13,250 RSUs granted to certain employees vest 20 percent annually on the anniversary of the grant date. All RSUs were granted at no cost to the participants and the participants will not be entitled to dividends until the RSUs have vested. Each RSU entitles the participant to receive one share of common stock on the vesting date or upon the participant's termination due to death or disability or upon a change in control of the Company if the RSUs are not fully assumed or if the RSUs are assumed and the participant's

employment is terminated without cause for good reason. If a participant terminates employment prior to the end of the continuous service period other than due to death, disability, or retirement, the award is forfeited. If a participant terminates service due to retirement, the RSUs will continue to vest, subject to provisions of the 2012 Plan.

Table of Contents

The following is a summary of nonvested RSU activity for the three and nine months ended September 30, 2012:

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2012	
	Shares	Weighted-Average Grant-Date Fair Value Per Share	Shares	Weighted-Average Grant-Date Fair Value Per Share
Nonvested shares, beginning of period	21,706	—	—	—
Granted	45,087	\$10.04	66,793	\$9.74
Vested	—	—	—	—
Forfeited	—	—	—	—
Nonvested shares, end of period	66,793	—	66,793	—

The Company recognizes compensation expense for stock-based awards based on the fair value of the award at the grant date and based upon the number of awards ultimately expected to vest. The fair value of nonvested RSUs granted is equal to the fair market value of the underlying common stock at the grant date. Compensation expense is recognized on the straight-line method over the vesting period. The Company currently assumes no projected forfeitures on its stock-based compensation, since all RSUs are expected to vest.

Total compensation costs recorded for the RSUs were \$40 and \$55, respectively, for the three and nine months ended September 30, 2012. As of September 30, 2012, there was \$529 of unrecognized compensation costs related to nonvested RSUs, and the weighted average period over which these remaining costs are expected to be recognized is approximately 3.4 years.

7. Earnings per Common Share

Basic earnings per common share are computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Net income available to common stockholders is net income less preferred stock dividends and accretion of discount on preferred stock, which is treated as preferred stock dividends. The remaining unaccreted discount on preferred stock was recognized at June 29, 2011, when all of the Company's outstanding preferred stock was redeemed. The Company has 50,000,000 authorized shares of \$0.01 par value preferred stock, with no shares issued or outstanding as of September 30, 2012, and December 31, 2011. The related outstanding common stock warrant was repurchased on August 31, 2011, for \$700. Diluted earnings per common share for the three and nine months ended September 30, 2011, reflect the potential dilution that could occur if the Company's previously outstanding stock warrant was exercised and converted into common stock. Diluted earnings per common share for the three and nine months ended September 30, 2012 reflect the potential dilution that could occur if the Company's outstanding RSUs were vested. The dilutive effect was computed using the treasury stock method, which assumes all outstanding warrants were exercised for 2011 and assumes all stock-based awards are exercised and the hypothetical proceeds from exercise are used by the Company to purchase common stock at the average market price during the period. The incremental shares, to the extent they would have been dilutive, are included in the denominator of the diluted earnings per common share calculation. The calculation of earnings per common share and diluted earnings per common share for the three and nine months ended September 30, 2012 and 2011, is presented in the following table.

(in thousands, except per share information)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Net income	\$3,752	\$3,083	\$12,112	\$11,536
Preferred stock dividends	—	—	—	(895)
Preferred stock discount accretion	—	—	—	(1,492)
Net income available to common stockholders	\$3,752	\$3,083	\$12,112	\$9,149

Edgar Filing: WEST BANCORPORATION INC - Form 10-Q

Weighted average common shares outstanding	17,404	17,404	17,404	17,404
Restricted stock units	29	—	48	—
Common stock warrant ⁽¹⁾	—	—	—	—
Diluted weighted average common shares outstanding	17,433	17,404	17,452	17,404
Basic earnings per common share	\$0.22	\$0.18	\$0.70	\$0.53
Diluted earnings per common share	\$0.22	\$0.18	\$0.69	\$0.53

The average closing price of the Company's common stock for the three and nine months ended September 30, 2011, was \$8.83 and \$6.37, respectively. These average closing prices were less than the \$11.39 exercise price of the common stock warrant to purchase 474,100 shares of common stock; therefore, the warrant was not dilutive during the period it was outstanding.

Table of Contents

8. Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income consists of the net change in unrealized gains and losses on the Company's securities available for sale, including the noncredit-related portion of unrealized losses of any OTTI securities.

The following tables summarize the changes in the balances of each component of accumulated other comprehensive income (loss) for the nine months ended September 30, 2012 and 2011.

	Noncredit-related		
	Unrealized (Losses) on Securities with OTTI	Unrealized Gains (Losses) on Securities without OTTI	Accumulated Other Comprehensive Income (Loss)
Balance, December 31, 2011	\$(1,940) \$2,594	\$654
Current period other comprehensive income	130	1,420	1,550
Balance, September 30, 2012	\$(1,810) \$4,014	\$2,204
Balance, December 31, 2010	\$(1,943) \$(704) \$(2,647
Current period other comprehensive income	25	3,474	3,499
Balance, September 30, 2011	\$(1,918) \$2,770	\$852

The following tables show the tax effects allocated to each component of other comprehensive income for the three and nine months ended September 30, 2012 and 2011.

	Three Months Ended September 30, 2012			Nine Months Ended September 30, 2012		
	Before Tax Amount	Tax (Expense) Benefit	Net of Tax Amount	Before Tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Unrealized noncredit-related gains (losses) on securities with OTTI:						
Unrealized holding gains arising during period	\$139	\$(53) \$86	\$31	\$(12) \$19
Less: reclassification adjustment for net losses realized in net income	6	(2) 4	179	(68) 111

9. Deferred Income Taxes

Tax effects of temporary differences that give rise to net deferred tax assets consist of the following as of September 30, 2012, and December 31, 2011.

	September 30, 2012	December 31, 2011
Allowance for loan losses	\$5,942	\$6,376
Intangibles	1,773	2,004
Investment security impairment	97	35
Other real estate owned	1,479	1,472
Accrued expenses	515	526
State net operating loss carryforward	509	442
Capital loss carryforward	4,065	4,125
Net deferred loan fees and costs	(258)	(252)
Net unrealized gains on securities available for sale	(1,351)	(401)
Premises and equipment	(541)	(590)
Loans	(838)	(718)
Other	(96)	(8)
Net deferred tax assets before valuation allowance	11,296	13,011
Valuation allowance	(4,671)	(4,602)
Net deferred tax assets	\$6,625	\$8,409

The Company has recorded a valuation allowance against the tax effect of the state net operating loss carryforwards, federal and state capital loss carryforwards, and investment security impairment as management believes it is more likely than not that such carryforwards will expire without being utilized.

Table of Contents

10. Commitments and Contingencies

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations that it uses for on-balance-sheet instruments. The Company's commitments as of September 30, 2012, and December 31, 2011, consisted of the following approximate amounts.

	September 30, 2012	December 31, 2011
Commitments to extend credit	\$337,077	\$255,167
Standby letters of credit	10,443	9,923
	\$347,520	\$265,090

West Bank has executed Mortgage Partnership Finance (MPF) Master Commitments (the Commitments) with the FHLB of Des Moines to deliver mortgage loans and to guarantee the payment of any realized losses that exceed the FHLB's first loss account for mortgages delivered under the Commitments. West Bank receives credit enhancement fees from the FHLB for providing this guarantee and continuing to assist with managing the credit risk of the MPF Program mortgage loans. The term of the current Commitment is through February 28, 2013. At September 30, 2012, the liability represented by the present value of the credit enhancement fees less any expected losses in the mortgages delivered under the Commitments was approximately \$393.

On September 29, 2010, West Bank was sued in a purported class action lawsuit that, as amended, contains allegations that nonsufficient funds fees charged by West Bank to Iowa resident noncommercial customers on bank card transactions were impermissible finance charges under the Iowa Consumer Credit Code, rather than allowable fees, and that the sequence in which West Bank formerly posted items for payment violated its duties of good faith under the Iowa Uniform Commercial Code and Consumer Credit Code. West Bank believes the allegations in the lawsuit are factually and legally inaccurate. West Bank is vigorously defending this litigation. The amount of potential loss, if any, cannot be reasonably estimated now because there are substantial and different defenses concerning the various claims of potential liability and class certification. Even if legal liability is established under some theory, which West Bank believes would be improper under existing Iowa law, the amount of each plaintiff's damage claim would likely require individual determination due to the potential applicability of different offsets or credits.

In the normal course of business, the Company and West Bank are involved in various other legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

"SAFE HARBOR" STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT

Certain statements in this report, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives, and expected operating results, and the assumptions upon which those statements are based, are "forward-looking statements" within the meanings of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may appear throughout this report. These forward-looking statements are generally identified by the words "believes," "expects," "intends," "should," "anticipates," "projects," "future," "may," "should," "will," "plan," "opportunity," "will be," "will likely result," "will continue," or similar references, or references to estimates,

predictions, or future events. Such forward-looking statements are based upon certain underlying assumptions, risks, and uncertainties. Because of the possibility that the underlying assumptions are incorrect or do not materialize as expected in the future, actual results could differ materially from these forward-looking statements. Risks and uncertainties that may affect future results include: interest rate risk; competitive pressures; pricing pressures on loans and deposits; changes in credit and other risks posed by the Company's loan and investment portfolios, including declines in commercial or residential real estate values or changes in the allowance for loan losses dictated by new market conditions or regulatory requirements, actions of bank and non-bank competitors; changes in local and national economic conditions; changes in regulatory requirements including rules recently jointly proposed by the Federal bank regulatory agencies to implement Basel III, limitations, and costs; changes in customers' acceptance of the Company's products and services; and any other risks described in the "Risk Factors" sections of this and other reports made by the Company. The Company undertakes no obligation to revise or update such forward-looking statements to reflect current or future events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Table of Contents

THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2012

(in thousands, except per share amounts)

OVERVIEW

The following discussion describes the consolidated operations of the Company, including West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in SmartyPig, LLC), West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity), and the Company's consolidated financial condition as of the end of the third quarter 2012. Results of operations for the three and nine months ended September 30, 2012, are compared to the results for the same periods in 2011, and the consolidated financial condition of the Company as of September 30, 2012, is compared to balances as of December 31, 2011.

Net income available to common stockholders for the third quarter of 2012 was \$3,752 compared to \$3,083 for the third quarter of 2011. The most significant differences from third quarter 2011 were higher gains and fees on sales of residential mortgages and lower write-downs on other real estate owned properties. Offsetting these improvements was a provision for loan losses of \$300 in the third quarter of 2012, while none was recorded in the same quarter last year.

Total basic and diluted earnings per common share were \$0.22 and \$0.18 for the third quarters of 2012 and 2011, respectively. The Company's annualized returns on average equity and average assets for the quarter ended September 30, 2012, were 11.36 and 1.14 percent, respectively, compared to 10.12 and 0.97 percent, respectively, for the quarter ended September 30, 2011.

Net interest income for the third quarter declined slightly when compared to the same time period in 2011, due to continued downward pressure on interest rates. Noninterest income increased compared to the third quarter of 2011 primarily due to an increase of \$458 on gains and fees on sales of residential mortgages as a result of the historically low interest rate environment. Noninterest expense was \$1,214 lower in the third quarter of 2012 than in 2011 primarily due to the combination of a \$1,523 reduction in write-downs for other real estate owned properties, which was partially offset by a \$313 increase in salaries and employee benefit costs.

Net income available to common stockholders for the nine months ended September 30, 2012, was \$12,112 compared to \$9,149 for the nine months ended September 30, 2011. The most significant difference from the prior year was the payment of preferred stock dividends and accretion of discount totaling \$2,387 in 2011. The Company's outstanding preferred stock was redeemed on June 29, 2011, so there were no such dividends and accretion of discount in 2012 or the third quarter of 2011. Net income for the first nine months of 2012 increased \$576 to \$12,112 from the same period in 2011. Total diluted earnings per common share were \$0.69 and \$0.53 for the first nine months of 2012 and 2011, respectively. The Company's annualized return on average equity and return on average assets for the nine months ended September 30, 2012, were 12.61 and 1.23 percent, respectively, compared to 11.03 and 1.19 percent, respectively, for the nine months ended September 30, 2011.

For the nine months ended September 30, 2012, net interest income declined \$389 from the prior year, primarily due to continued downward pressure on interest rates. On a year-to-date basis the provision for loan losses was \$300 compared to \$950 in the nine months ended September 30, 2011. The decline was a result of continued overall credit quality improvement in 2012. Nonperforming loans did increase \$569 in the third quarter of 2012 compared to the total as of June 30, 2012. Other significant changes between the first nine months of 2012 and the same time period in 2011 were the \$1,330 increase in gains and fees on sales of residential mortgages, realized net investment securities gains of \$246, a \$595 reduction in FDIC insurance expense, and a \$702 decline in other real estate owned expenses. Offsetting these improvements was a \$1,295 increase in the cost of salaries and employee benefits.

During the first nine months of 2012, total loans outstanding increased \$15,246, which was muted by a decline of \$4,209 since June 30, 2012. Management believes the loan portfolio will continue to grow, although at a rather subdued rate. While management would like to see stronger loan growth, the uncertainty surrounding various aspects of the economy is causing many financially stable customers to wait for more clarity before borrowing additional funds to expand their businesses or purchase assets. As of September 30, 2012, the allowance for loan losses was 1.83 percent of loans outstanding and was deemed by management to be adequate to absorb any losses inherent in the loan portfolio.

The Board of Directors declared a quarterly dividend of \$0.10 per common share at its meeting on October 24, 2012. The dividend is payable on November 27, 2012, to shareholders of record as of November 7, 2012.

Table of Contents

RESULTS OF OPERATIONS

The following table shows selected financial results and measures for the three and nine months ended September 30, 2012, compared with the same periods in 2011.

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2012	2011	Change	Change %	2012	2011	Change	Change %	
Net income	\$3,752	\$3,083	\$669	21.7	% \$12,112	\$11,536	\$576	5.0	%
Net income available to common shareholders	3,752	3,083	669	21.7	% 12,112	9,149	2,963	32.4	%
Average assets	1,305,262	1,262,856	42,406	3.4	% 1,313,861	1,295,869	17,992	1.4	%
Average stockholders' equity	131,450	120,812	10,638	8.8	% 128,347	139,874	(11,527)	(8.2)	%
Return on average assets	1.14	% 0.97	% 0.17	%	1.23	% 1.19	% 0.04	%	
Return on average equity	11.36	% 10.12	% 1.24	%	12.61	% 11.03	% 1.58	%	
Efficiency ratio	51.92	% 51.17	% 0.75	%	50.98	% 48.51	% 2.47	%	
Dividend payout ratio	46.40	% 28.22	% 18.18	%	37.36	% 19.02	% 18.34	%	
Average equity to average assets ratio	10.07	% 9.57	% 0.50	%	9.77	% 10.79	% (1.02)	%	

	As of September 30,			
	2012	2011	Change	
Texas ratio	12.99	% 15.47	% (2.48)	%
Equity to assets ratio	10.46	% 9.88	% 0.58	%
Tangible common equity ratio	10.46	% 9.87	% 0.59	%

Definitions of ratios:

Return on average assets - annualized net income divided by average assets.

Return on average equity - annualized net income divided by average stockholders' equity.

Efficiency ratio - noninterest expense (excluding other real estate owned expense) divided by noninterest income (excluding net securities gains and net impairment losses) plus tax-equivalent net interest income.

Dividend payout ratio - dividends paid to common stockholders divided by net income available to common stockholders.

Texas ratio - total nonperforming assets divided by tangible common equity plus the allowance for loan losses.

Equity to assets ratio - equity divided by assets.

Tangible common equity ratio - common equity less intangible assets divided by tangible assets.

Net interest
margin

3.46% 3.61% (0.15)%

Fluctuations in net interest income can result from the combination of changes in the balances of asset and liability categories and changes in interest rates. Interest rates earned and paid are affected by general economic conditions, particularly changes in market interest rates, and by competitive factors, government policies, and the actions of regulatory authorities. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized tax-equivalent net interest income by the average of total interest-earning assets for the period. The net interest margin for the three months ended September 30, 2012, declined 19 basis points to 3.45 percent compared to the three months ended September 30, 2011, and increased 1 basis point compared to the second quarter of 2012. The reduction from the prior year was primarily due to continued downward pressure on market rates.

For the nine months ended September 30, 2012, the net interest margin declined 15 basis points to 3.46 percent compared to the nine months ended September 30, 2011. Tax-equivalent net interest income for the nine months ended September 30, 2012, declined \$553 as interest income on interest-earning assets declined more than interest expense on interest-bearing liabilities, despite an increase in average earning assets. Management believes the net interest margin may continue to decline slightly through the remainder of 2012 if market interest rates remain at these historically low levels. By the end of September 30, 2012, management had purposely reduced federal funds sold and short-term investments in an effort to minimize further deterioration of the net interest margin.

The average yield on loans declined by 31 basis points, while the average volume for the nine months ended September 30, 2012, increased slightly, as West Bank lenders focused on expanding existing customer relationships and developing new relationships. The net effect caused year-to-date interest income to fall by \$1,834. The yield on the Company's loan portfolio is affected by the mix of the loans in the portfolio, the interest rate environment, the effects of competition, the level of nonaccrual loans, and reversals of previously accrued interest on charged-off loans. The political and interest rate environments can influence the volume of new loan originations and the mix of variable-rate versus fixed-rate loans.

Table of Contents

For the first nine months of 2012, the average balance of investment securities was \$49,507 higher than in the first nine months of 2011, while the yield declined 62 basis points. The decline was caused by lower available yields in the market for purchases and to a lesser extent the calls of higher yielding municipal securities as municipalities refinanced debt to lower their interest expense.

The average rate paid on deposits for the first nine months of 2012 declined to 0.68 percent from 1.00 percent for the same period last year. The combination of lower market rates and a decline in average time deposit balances caused interest expense to decline by \$1,739. West Bank reduced interest rates on certain deposit products during the three months ended September 30, 2012, in response to the continued low interest rate environment. The average balance of time deposits declined \$80,980 compared to the first nine months of 2011 as the Company allowed wholesale deposits to mature without renewal and fewer retail customers have been willing to lock in low interest rates for an extended period of time.

The average rate paid on other borrowings declined by 9 basis points compared to the first nine months of 2011 due primarily to a rate reduction on securities sold under agreements to repurchase. The rate on the Company's subordinated notes is variable with the rate tied to LIBOR. The average rate during the first nine months of 2012 was 3.68 percent compared to 3.45 percent for the first nine months of 2011.

Provision for Loan Losses and the Related Allowance for Loan Losses

The provision for loan losses represents charges made to earnings to maintain an adequate allowance for loan losses. The allowance for loan losses is management's best estimate of probable losses inherent in the loan portfolio as of the balance sheet date. Factors considered in establishing an appropriate allowance include: an assessment of the financial condition of the borrower; the value and adequacy of loan collateral; the condition of the local economy; the condition of the specific industry of the borrower; the levels and trends of loans by segment; and a review of delinquent and classified loans.

The adequacy of the allowance for loan losses is evaluated quarterly by management and reviewed by the Board of Directors. This evaluation focuses on factors such as specific loan reviews, loan growth, changes in the components of the loan portfolio given the current and forecasted economic conditions, and historical loss experience. Any one of the following conditions may result in the review of a specific loan: concern about whether the borrower's cash flow or net worth is sufficient to repay the loan; delinquency status; criticism of the loan in a regulatory examination; or other factors, including whether the loan has other unusual characteristics that suggest special monitoring is warranted. The Company's concentration risks include geographic concentration in Central Iowa. The local economy is comprised primarily of service industries and state and county governments.

While management uses available information to recognize potential losses on loans, further reduction in the carrying amounts of loans may be necessary based on changes in circumstances or later acquired information. Furthermore, changes in future economic activity are always uncertain. Identifiable sectors within the general economy are subject to additional volatility, which at any time may have a substantial impact on the loan portfolio. In addition, regulatory agencies, as an integral part of their examination processes, periodically review the estimated losses on loans. Those agencies may require West Bank to recognize additional losses based on their judgment about information available to them at the time of their examinations.

Table of Contents

The Company's policy is to charge off loans when, in management's opinion, the loan or a portion of a loan is deemed uncollectible although concerted efforts are made to maximize future recoveries. The following table summarizes the activity in the Company's allowance for loan losses for the three and nine months ended September 30, 2012 and 2011, and related ratios.

	Analysis of the Allowance for Loan Losses for the			Analysis of the Allowance for Loan Losses for the		
	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	Change	2012	2011	Change

Average loans outstanding, excluding loans held for sale	\$847,902	\$845,923		\$850,346	\$848,956	
Ratio of annualized net charge-offs during the period to average loans outstanding	0.02	% 0.15	%	0.23	% 0.40	%
Ratio of allowance for loan losses to average loans outstanding	1.84	% 2.07	%	1.84	% 2.06	%

The allowance for loan losses represented 171.95 percent of nonperforming loans at September 30, 2012, compared to 156.91 percent at December 31, 2011. The 2012 year-to-date provision was \$300, compared to \$950 for the same period in 2011, due to the continued improvement in credit quality of the loan portfolio. There were no significant charge-offs in the third quarter. The most significant charge-offs on a year-to-date basis were two construction and land loans totaling \$1,466, of which \$1,102 had been specifically reserved in prior periods. However, specific allocations of the allowance for impaired loans were increased by \$1,000 during the third quarter of 2012 due to a deterioration of appraised values of certain pieces of collateral.

The Company has a significant portion of its loan portfolio in commercial real estate loans, commercial lines of credit, commercial term loans, and construction or land development loans. The Company's typical commercial borrower is a small or medium-sized, privately-owned Iowa business person or entity. The Company's commercial loans typically have greater credit risks than residential mortgage or consumer loans, because they often have larger balances and repayment usually depends on the borrowers' successful business operations. Commercial loans also involve additional risks because they generally are not fully repaid over the loan period and, thus, usually require refinancing or a large payoff at maturity. When the economy turns downward, commercial borrowers may not be able to repay their loans due to reduced cash flows and the value of their assets, which are usually pledged as collateral, may decrease rapidly and significantly.

Table of Contents

Noninterest Income

The following tables show the variance from the prior year in the noninterest income categories shown in the Consolidated Income Statements. In addition, accounts within the “Other income” category that represent a significant portion of the total or a significant variance are shown.

	Three Months Ended September 30,			
	2012	2011	Change	Change %
Noninterest income:

Gain from bank-owned life insurance	841	637	204	32.03%
Investment securities impairment losses	(179)	(22)	(157)	(713.64)%
Realized investment securities gains, net	246	—	246	N/A
Other income:				
Credit card fees	147	143	4	2.80%
Wire transfer fees	102	121	(19)	(15.70)%
Safe deposit box fees	113	114	(1)	(0.88)%
Gain from sales of other assets	—	112	(112)	(100.00)%
All other	286	299	(13)	(4.35)%
Total other	648	789	(141)	(17.87)%
Total noninterest income	\$8,295	\$6,998	\$1,297	18.53%

The decline in service charges on deposit accounts for both time periods was primarily caused by lower overdraft and return item charges.

Debit card usage fees improved at approximately the same rate in the third quarter of 2012 as it did in the first and second quarters. Customers continue to move away from traditional check writing. We believe these fees may decline in the future due to the Dodd-Frank Wall Street Reform and Consumer Protection Act and the Federal Reserve final rule which sets a cap on interchange fees at a rate below the market-driven levels. While financial institutions such as West Bank, with less than ten billion dollars in assets, are exempt from the cap, industry groups believe the price controls may have a negative impact on community banks over time.

Table of Contents

The volume of originations of residential mortgages sold into the secondary market during the first nine months of 2012 increased significantly to \$88,953 from \$37,937 for the same time period in 2011, resulting in a 163 percent growth in revenue. The volume in the third quarter of 2012 was approximately 27 percent higher than in the second quarter of 2012. The low interest rate environment continues to fuel the growth along with an improved level of home sales in the Company's market areas. Also contributing to the growth in volume was the addition of origination staff in the Des Moines market during the second and third quarter. The Company plans to continue to expand its mortgage origination staff to capitalize on the opportunities in its local markets. Approximately 60 percent of originations in the first nine months of 2012 involved homeowners refinancing current mortgages in an effort to lock in low market rates. This income source is expected to remain strong throughout 2012 and into 2013 due to the historically low interest rates.

The lower increase in cash value of bank-owned life insurance is due to lower crediting rates within the policies due to the low interest rate environment. Gain from bank-owned life insurance occurred due to the deaths of a bank officer in each year.

As of September 30, 2012, the Company held one pooled trust preferred security (TPS) it considered to have other than temporary impairment (OTTI). As a result of the quarterly valuations of this security, a credit loss of \$6 was recognized in the third quarter of 2012, bringing total impairment for the first nine months of 2012 to \$179. The Company took advantage of an opportunity to sell two collateralized mortgage obligations in the second quarter of 2012 at a gain and was able to replace them with similar bonds with comparable yields, thus resulting in net gains of \$246 on a year-to-date basis.

Gains from sales of other assets included a gain on sale of a foreclosed asset in the first quarter of 2011 and the sale of an interest in a partnership in the third quarter of 2011.

Noninterest Expense

The following tables show the variance from the prior year in the noninterest expense categories shown in the Consolidated Income Statements. In addition, accounts within the "Other expenses" category that represent a significant portion of the total or a significant variance are shown.

	Three Months Ended September 30,

All other	983	1,083	(100)	(9.23))%
Total other	3,598	3,669	(71)	(1.94))%
Total noninterest expense	\$21,782	\$21,170	\$612	2.89	%

The increase in salaries and employee benefits for the first nine months of 2012 consisted of normal salary increases plus salaries for employees added in the past year (\$619), higher bonus accruals (\$234), higher secondary market real estate originator commissions (\$309), and higher benefit costs (\$224). The benefit cost increases were primarily for payroll taxes, health insurance, and 401(k) plan expenses. The 401(k) increase was partially due to an increase in the Company matching contribution which became effective January 1, 2012.

Occupancy expense increased for both time periods due to higher depreciation expense and rental expense as additional space was leased. Data processing expense increased in the first nine months of 2012 compared to 2011 due to fees related to a new commercial loan management software program and enhancements to deposit systems.

There were two reasons for the decline in FDIC insurance expense compared to 2011. The first was the April 1, 2011, change in the assessment base from total average deposits to total average assets less tangible capital. The second was an upgrade in West Bank's regulatory risk classification on June 3, 2011. The level of expense in the first nine months of 2012 is expected to hold steady for the remainder of the year.

Other real estate owned expense in the third quarter and first nine months of 2012 included \$195 and \$1,203, respectively, of property valuation write-downs due to updated appraisals and estimated disposal costs for several properties. The same time periods of 2011 included \$1,718 and \$2,211, respectively, of valuation write-downs. The Company's practice is to obtain updated appraisals at least annually. While there has been increased interest from potential buyers, there has not been stabilization in real estate values.

Professional fees increased primarily due to higher legal fees related to corporate governance matters and implementation of the shareholder-approved equity incentive plan. Consulting fees increased year-over-year because the Company hired a compensation consultant to assist the Board of Directors, outsourced the loan review function,

hired a consultant to implement and test a new commercial loan management software program, hired a human resources consultant to improve the salary administration process, and hired a consultant to review and assist with negotiation of the renewal of the data processing contract with our core systems processor. Consulting fees are expected to be somewhat lower in the fourth quarter of 2012 as some of the projects mentioned have been completed.

Business development costs increased as a result of efforts to acquire new customers. Deposit operation expense declined as a result of changes made to demand deposit account products. Loss on disposal of fixed assets included the write-off of design costs in the second quarter of 2012 related to the construction of a new leased replacement office that were not used in the final plans.

Table of Contents

Income Tax Expense

The Company recorded income tax expense of \$1,649 (30.5 percent of pre-tax income) and \$4,927 (28.9 percent of pre-tax income), respectively, for the three and nine months ended September 30, 2012, compared with \$1,135 (26.9 percent of pre-tax income) and \$4,557 (28.3 percent of pre-tax income), respectively, for the three and nine months ended September 30, 2011. The Company's consolidated income tax rate varies from the statutory rate primarily due to tax-exempt income, including interest on municipal securities, increase in the cash value of bank-owned life insurance, and gain on life insurance proceeds. The tax rate for both years was also impacted by West Bank's 2007 investment in a qualified community development entity, which generated a \$2,730 federal new markets tax credit over a seven-year period. The credit recognized for each of the years ended December 31, 2012 and 2011 is \$420.

FINANCIAL CONDITION

Total assets as of September 30, 2012, changed minimally compared to total assets as of December 31, 2011, while certain components had positive growth. A summary of changes in the components of the balance sheet are described in the following paragraphs.

Investment Securities

Investment securities available for sale increased \$27,938 to \$311,083 at September 30, 2012, compared to December 31, 2011. The increase was caused by investing a portion of low-rate federal funds sold in an effort to enhance net interest income.

As of September 30, 2012, approximately 73 percent of the available for sale investment securities portfolio consisted of government agency guaranteed collateralized mortgage obligations and mortgage-backed securities. In the current low interest rate environment, both provide relatively good yields, have little to no credit risk, and provide fairly consistent cash flows. Approximately two-thirds of all year-to-date 2012 security purchases have been for these categories of securities. During the third quarter of 2012 approximately \$4,700 of high quality corporate notes and preferred stocks of publicly traded companies were purchased to also enhance the yield of the portfolio. Management is planning to purchase up to \$5,000 of additional corporate notes and preferred stock in the fourth quarter of 2012 for the same purpose.

At September 30, 2012, the most significant risk of a future impairment charge relates to the Company's investment in a pooled TPS, ALESCO Preferred Funding X, Ltd. As of September 30, 2012, this TPS, with a cost basis of \$4,195, was valued at \$1,276. Management has concluded that this pooled TPS is considered to have OTTI. Any potential future loss that would be considered a credit loss would negatively impact net income and regulatory capital; however, the fair value adjustment at September 30, 2012, has already been recorded against equity.

Loans and Nonperforming Assets

Loans outstanding increased \$15,246 from December 31, 2011, to \$854,205 as of September 30, 2012. Total loans outstanding did decline slightly from June 30, 2012. Management believes the loan portfolio will continue to grow slowly as the economy continues to improve and the Company's customer base expands. The volume of loans in the pipeline continues to show improvement. Credit quality of the Company's loan portfolio has improved in the first nine months of the year as shown in the table below, however, total nonperforming loans increased \$569 from June 30, 2012. Management continues to devote significant resources to monitoring and reducing nonperforming assets.

Table of Contents

The following table sets forth the amount of nonperforming loans and other nonperforming assets held by the Company and common ratio measurements of those items as of the dates shown.

	September 30, 2012	December 31, 2011	Change	
Nonaccrual loans	\$8,425	\$8,572	\$(147)
Loans past due 90 days and still accruing interest	—	—	—	
Troubled debt restructured loans ⁽¹⁾	669	2,121	(1,452)
Total nonperforming loans	9,094	10,693	(1,599)
Other real estate owned	8,894	10,967	(2,073)
Nonaccrual investment securities	1,276	1,245	31	
Total nonperforming assets	\$19,264	\$22,905	\$(3,641)
Nonperforming loans to total loans	1.06	% 1.27	% (0.21)%
Nonperforming assets to total assets	1.52	% 1.80	% (0.28)%

While TDR loans are commonly reported by the industry as nonperforming, those not classified in the nonaccrual category are accruing interest due to payment performance. TDR loans on nonaccrual status are included in the nonaccrual category. As of September 30, 2012, there were two TDR loans totaling \$894 included in the nonaccrual category.

The following tables set forth the activity within each category of nonperforming loans and assets for the nine months ended September 30, 2012 and 2011, respectively.

Nine Months Ended September 30, 2012

Commercial properties	214	950
	\$8,894	\$10,967

The Company is actively marketing the assets referenced in the table above. As previously mentioned, there has been increased interest from potential buyers, but demand for commercial real estate and development land remains low. Valuations of other real estate owned are updated by management at least annually so that the properties are carried at current market value less estimated disposal costs. Market values are determined by obtaining updated appraisals or other market information. As of September 30, 2012, the construction and land development category included four properties in the Des Moines metropolitan area, one property in the Iowa City market, one property in Missouri, and one property in Arkansas. The 1-4 family residential category consisted of one home in the Iowa City area and three in the Des Moines area. The commercial properties consisted of two commercial facilities in the Des Moines area. Several sales are pending subject to due diligence of the respective buyers.

Reference is also made to the information and discussion earlier in this report under the heading "Provision for Loan Losses and the Related Allowance for Loan Losses," and Notes 4 and 5 to the financial statements.

Deposits

Total deposits as of September 30, 2012, totaled \$928,926, a decrease of 3.0 percent or \$28,447 compared to December 31, 2011. The majority of the decrease was in money market accounts within the savings category and in certificates of deposit. Money market deposits declined 9.7 percent, or \$28,455 compared to December 31, 2011. This is considered a normal fluctuation as corporate customers' liquidity needs vary at any given time. Certificates of deposit declined 9.7 percent, or \$18,221, compared to December 31, 2011. Management believes that certificates of deposit are not considered an attractive investment option for some segments of our customer base in the current low interest rate environment. Noninterest-bearing demand deposits increased \$22,610 during the same time period.

Table of Contents

Borrowings

The balance of federal funds purchased and securities sold under agreements to repurchase increased \$17,243 in the first nine months of 2012 to \$73,084, with the increase attributed to both categories. Federal funds purchased consist of funds sold to West Bank by three Iowa banks as part of the correspondent bank services provided by West Bank and funds purchased on an overnight basis from upstream correspondent banks. Securities sold under agreements to repurchase are also very fluid funds which fluctuate based on the needs of our customers. There were no changes in long-term borrowings in the first nine months of 2012.

Liquidity and Capital Resources

The objective of liquidity management is to ensure the availability of sufficient cash flows to meet all financial commitments and to capitalize on opportunities for profitable business expansion. The Company's principal source of funds is deposits. Other sources include loan principal repayments, proceeds from the maturity and sale of investment securities, principal payments on collateralized mortgage obligations and mortgage-backed securities, federal funds purchased, repurchase agreements, advances from the FHLB, and funds provided by operations. Liquidity management is conducted on both a daily and a long-term basis. Investments in liquid assets are adjusted based on expected loan demand, projected loan maturities and payments, expected deposit flows, and the objectives set by West Bank's asset-liability management policy. The Company had liquid assets (cash and cash equivalents) of \$41,827 as of September 30, 2012, compared with \$87,104 as of December 31, 2011. West Bank had additional borrowing capacity available from the FHLB of approximately \$37,000 at September 30, 2012. In addition, West Bank has \$53,000 in borrowing capacity available through unsecured federal funds lines of credit and \$10,000 available through secured federal funds lines of credit with correspondent banks. West Bank had borrowed \$20,000 on these lines of credit as of September 30, 2012. Net cash from operating activities contributed \$14,294 and \$20,615 to liquidity for the nine months ended September 30, 2012 and 2011, respectively. Management believes the Company was in a strong liquidity position as of September 30, 2012.

The Company's total stockholders' equity increased to \$132,643 at September 30, 2012, from \$123,451 at December 31, 2011. The increase was primarily due to year-to-date net income less common stock dividends and increased accumulated other comprehensive income due to higher unrealized gains on investment securities. At September 30, 2012, stockholders' equity was 10.46 percent of total assets compared to 9.72 percent as of December 31, 2011. No material capital expenditures or material changes in the capital resource mix are anticipated at this time.

The Company and West Bank are subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and West Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and West Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk-weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and West Bank to maintain minimum amounts and ratios (set forth in the following table) of Total and Tier I Capital to Risk-Weighted Assets and of Tier I Capital to Average Assets. Management believes the Company and West Bank met all capital adequacy requirements as of September 30, 2012. Prompt corrective action provisions are not applicable to the Company. As of September 30, 2012, West Bank was well-capitalized under the regulatory framework for prompt corrective action. The federal bank regulatory agencies recently issued joint proposed rules that would increase

minimum capital ratios, add a new minimum common equity ratio, add a new capital conservation buffer, and would change the risk-weightings of certain assets. The proposed changes, if implemented, would be phased in from 2013 through 2019. Management has completed a preliminary assessment of the impact of the proposed rules and believes the Company's and West Bank's ratios will continue to exceed the required minimums. Community bank associations are currently discussing their concerns with the regulatory agencies regarding the additional regulatory burdens the proposals would place on community banks and their holding companies.

Table of Contents

The Company's and West Bank's capital amounts and ratios are presented in the following table.

	Actual		For Capital Adequacy Purposes		To Be Well-Capitalized Under Prompt Corrective Action Provisions		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
As of September 30, 2012:							
Total Capital (to Risk-Weighted Assets)							
Consolidated	\$ 162,729	16.59	% \$ 78,491	8.0	% N/A	N/A	
West Bank	142,030	14.98	% 75,843	8.0	% \$ 94,804	10.0	%
Tier I Capital (to Risk-Weighted Assets)							
Consolidated	150,423	15.33	% 39,246	4.0	% N/A	N/A	
West Bank	130,133	13.73	% 37,921	4.0	% 56,882	6.0	%
Tier I Capital (to Average Assets)							
Consolidated	150,423	11.55	% 52,076	4.0	% N/A	N/A	
West Bank	130,133	10.12	% 51,461	4.0	% 64,326	5.0	%
As of December 31, 2011:							
Total Capital (to Risk-Weighted Assets)							
Consolidated	\$ 154,728	16.27	% \$ 76,075	8.0	% N/A	N/A	
West Bank	138,508	15.09	% 73,433	8.0	% \$ 91,791	10.0	%
Tier I Capital (to Risk-Weighted Assets)							
Consolidated	142,781	15.01	% 38,037	4.0	% N/A	N/A

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of earnings volatility that results from adverse changes in interest rates and market prices. The Company's market risk is primarily interest rate risk arising from its core banking activities of lending and deposit taking. Interest rate risk is the risk that changes in market interest rates may adversely affect the Company's net interest income. Management continually develops and implements strategies to mitigate this risk. The analysis of the Company's interest rate risk was presented in the Form 10-K filed with the Securities and Exchange Commission on March 7, 2012, and is incorporated herein by reference. The Company has not experienced any material changes to its market risk position since December 31, 2011. Management does not believe the Company's primary market risk exposures and how those exposures were managed in the first nine months of 2012 changed when compared to 2011.

Item 4. Controls and Procedures

a. Evaluation of disclosure controls and procedures. As of the end of the period covered by this report, an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 240.13a-15(f)) was performed under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

b. Changes in internal controls over financial reporting. There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings

There were no material developments during the third quarter of 2012 in the litigation described in previous reports and involving nonsufficient funds fees and posted item sequencing. For additional information on this litigation, see Note 10 to the financial statements. The Company and West Bank are not parties to any other pending legal proceedings, other than ordinary litigation incidental to West Bank's business, and no property of these entities is the subject of any such proceeding. The Company does not know of any proceeding contemplated by a governmental authority against the Company or West Bank or any of the companies' property.

Item 1A. Risk Factors

Management does not believe there have been any material changes in the risk factors that were disclosed in the Form 10-K filed with the Securities and Exchange Commission on March 7, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.
