Stock-Based Compensation

The preceding pro forma results were calculated with the use of the Black-Scholes option pricing model. The following assumptions were used for the period ended March 31, 2004 (1) risk-free interest rate of 2.80%, (2) no dividend yield (3) expected lives of between 3.0 and 5.0 years (4) volatility of 85%. Results may vary depending on the assumptions applied within the model. Compensation expense recognized in providing pro forma disclosures may not be representative of the effects on net income for future years.

Use of Estimates

The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. These principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company reviews its estimates, including but not limited to, recoverability of long-lived assets, recoverability of prepaid expenses, valuation of investments and allowance for doubtful accounts, on a regular basis and makes adjustments based on historical experiences and existing and expected future conditions. These evaluations are performed and adjustments are made as information is available. Management believes that these estimates are reasonable; however, actual results could differ from these estimates.

1. Significant Accounting Principles -continued

Income Taxes

Taxes on income are provided in accordance with SFAS No. 109, *Accounting for Income Taxes*. Deferred income tax assets and liabilities are recognized for the expected future tax consequences of events that have been reflected in the consolidated financial statements. Deferred tax assets and liabilities are determined based on the differences between the book values and the tax bases of particular assets and liabilities and the tax effects of net operating loss and capital loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized as income or expense in the period that included the enactment date. A valuation allowance is provided to offset the net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. There is no allowance recorded as of March 31, 2004 on any deferred tax assets.

Earnings Per Share

Earnings per common share are computed in accordance with SFAS No. 128, *Earnings Per Share*, which requires companies to present basic earnings per share and diluted earnings per share. Basic earnings per share are computed by dividing net income by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per common share are computed by dividing net income by the weighted average number of shares of common stock outstanding and dilutive options outstanding during the year.

Common stock equivalents in the three-month period ended March 31, 2004 was anti-dilutive due to the net losses sustained by the Company during this period. Therefore, the diluted weighted average common shares outstanding in this period is the same as the basic weighted average common shares outstanding.

Segmentz objective is to build a company that supports segments of customer's supply chain initiatives. The Company sustains a competitive advantage by providing flexible, customized, end-to-end solutions, which utilize experienced personnel and technology to exceed the customer's expectations.

The Segmentz acquisition strategy focuses on integrating logistics businesses that will enhance service offerings within our current market areas as well as extend our network to targeted locations in the Midwestern and Southeastern United States. The Company selects acquisition targets based upon their ability to demonstrate: (1) consistent profitability; (2) history of service level delivery and brand identity; (3) regional or service niche and position that is accretive to our current footprint and overlaps or enhances our current service offerings; and (4) creates maximum capacity and equipment utilization to stabilize a platform that will support continued enterprise revenue growth that drives profitability. Through March 31, 2004, Segmentz has completed the acquisition of three strategically located logistics and transportation providers. The acquisition companies are as follow: Dasher Express, Inc., ("Dasher") on December 31, 2003, certain assets of Frontline Freight ("Frontline") on January 8, 2004, and Bullet Freight Systems ("Bullet") on October 1, 2003.

Results of Operations

Revenues increased approximately \$3,733,000, or 129%, to approximately \$6,621,000 for the period ended March 31, 2004, as compared to approximately \$2,888,000 for the period ended March 31, 2003. The increases in revenue primarily relate to (i) the three recent acquisitions (ii) expansion of the Chicago terminal location, (iii) a dedicated delivery services (DDS) contract to provide staging, processing, delivery and report integration from a regional cross-dock hub facility in Evansville, IN., (iv) cross-selling of expanded company services and points of service throughout the Company's client base, (v) increased ability to provide expedited service through increases in scheduled services within the Company's freight network and, (vi) general increases resulting from marketing efforts and brand awareness.

Costs of services provided, which consist primarily of payment for trucking services, fuel, insurance, cross dock facilities, equipment costs and payroll expenses increased by approximately \$3,281,000, or 150%, to approximately \$5,471,000 for the period ended March 31, 2004, as compared to approximately \$2,190,000 for the period ended March 31, 2003. As a percentage of revenues cost of services amounted to approximately 83% of related revenues for the period ended March 31, 2004, as compared with approximately 76% for the period ended March 31, 2003. Increased costs of service for the first quarter result primarily from (i) lower freight volume in accordance with historical results and expectations, (ii) rental equipment costs and repair costs, related to the short term needs to integrate our time scheduled operations and expedited operating requirements, and (iii) a significant increase in depreciation and amortization related to the recent acquisitions, which should reduce as we integrate equipment plans with operational consolidation. The Company anticipates costs returning to historical levels during the second, third and fourth quarters as we complete the integration of acquired companies, in addition to additional freight volume in our current network.

Table of Contents

General and administrative expense increased by approximately \$1,200,000 or 239% to approximately \$1,703,000 as compared to approximately \$503,000 for the period ended March 31, 2003. The increase of general and administrative expenses resulted primarily to (i) expansion of technology, equipment, personnel and infrastructure for increased sales and anticipated increases in the second and third quarter, (ii) expansion of facilities in several cities to allow us to meet significant opportunities, (iii) expenses directly related to integration of acquisitions, (iv) additional sales, marketing and branding efforts to introduce our expanded locations, service offerings and brands to our new and expanding client base and (v) expenses related to prospective acquisitions. The Company had anticipated these increases in general and administrative costs in connection with acquisitions and internally generated growth and believes it will be able to reduce expenses to historical percentage levels as acquisitions are completed, integrated and synergies are capitalized upon.

The Company realized a loss from continuing operations before provisions for income taxes of approximately \$624,000 for the period ended March 31, 2004, compared with income from continuing operations before provisions for income taxes of approximately \$184,000 for the period ended March 31, 2003.

The income tax benefit was approximately \$220,000 for the three months ended March 31, 2004 compared to a provision of \$53,500 for the three months ended March 31, 2003. Differences between the effective tax rate used for 2004 and 2003, as compared to the U.S. federal statutory rate, are primarily due to permanent differences and adjustments to the deferred tax asset valuation allowance.

Basic loss per share from continuing operations for the period ended March 31, 2004 was \$.02, compared with basic earnings of \$.02 for the period ended March 31, 2003. Diluted loss per share from continuing operations for the period ended March 31, 2004 was \$.02, compared with diluted earnings per share of \$.02 for the period ended March 31, 2003.
