FOR IMMEDIATE RELEASE

VIMPELCOM ANNOUNCES SECOND QUARTER AND SIX MONTH 2007

FINANCIAL AND OPERATING RESULTS

Moscow and New York (August 30, 2007) - Open Joint Stock Company Vimpel-Communications (VimpelCom or the Company) (NYSE: VIP), a leading provider of wireless telecommunications services in Russia and the Commonwealth of Independent States (CIS) today announced its financial and operating results for the quarter and six months ended June 30, 2007.

Financial and Operating Highlights

Net operating revenues reached a record high \$1,717.2 million in the second quarter, a year-on-year increase of 53.1% and a quarter-on-quarter increase of 15.4%.

OIBDA reached a record high \$896.8 million, a year-on-year increase of 59.7% and a quarter-on-quarter increase of 17.0%.

OIBDA margin reached 52.2%, including 53.4% in Russia and 53.7% in Kazakhstan.

Net income totaled a record high \$359.3 million, a year-on-year increase of 84.3%.

Operating cash flow reached a record high \$695.6 million, a year-on-year increase of 61.7%.

MOU and ARPU grew sequentially in all markets, including 12.8% ARPU growth in Russia. Commenting on today's announcement, Alexander Izosimov, Chief Executive Officer of VimpelCom, said, "It was another very strong quarter for VimpelCom. The Company achieved all-time records in key financial parameters: revenue, OIBDA, net income and operating cash flow. The strength of our business was further supported by growth of operating parameters, including ARPU and MOU simultaneously in all the markets where we operate. This further validates our belief in the high growth potential of the CIS which is becoming an increasingly important part of our business."

We are also pleased to note that our OIBDA grew at a remarkable pace of almost 60% year-on-year. Moreover, the fact that our OIBDA grew faster than revenues illustrates that we continue to gain efficiency.

Changes in definitions and reported data

Beginning with this press-release the Company will use independent research to the extent it is available when reporting market share information. We believe using independent and consistent data is the preferable way to reflect our market share performance.

VimpelCom Announces Second Quarter And Six Month 2007 Financial And Operating Results**Page 2 of 9**

Beginning with the Company's 1Q2007 earnings press release, the number of subscribers, ARPU and MOU are reported on the basis of active subscribers. For convenience, we continue to report the registered subscriber base and the related figures for comparable periods (see Attachment A for relevant definitions and refer to Attachment D for relevant data).

All the above-mentioned definitions refer to mobile subscribers. With the acquisition of Armentel, the Company also has fixed-line subscribers which are treated separately.

Attachments A, B, C and D present respectively

- definitions for certain terms used in this press release,
- the condensed consolidated financial statements of VimpelCom,
- tables with relevant reconciliations of non-U.S. GAAP financial measures to their most directly comparable U.S. GAAP financial measures, and
- certain additional reference data relating to the registered subscriber base.

Key Consolidated Financial and Operating Results

			Three months Change,		Change,

*) Net operating revenues here and in the following country tables exclude inter-company transactions.

**) Subscriber market share data presented here and in the following country tables are published by AC&M-Consulting and are generally based on registered subscribers.

In Russia our continued efforts to deliver growth through active marketing led to 43.0% year-on-year revenue growth, which is a remarkable achievement for a company of our size operating in a saturated market. This trend was further amplified by a favorable business environment and seasonal factors, resulting in a 14.1% increase in revenue in the second quarter of 2007 versus the first quarter of 2007.

Selling, general and administrative expenses (SG&A) as a percentage of net operating revenues were 28.7%, showing improvement on both a quarter-on-quarter and a year-on-year basis, from 29.3% and 31.1%, respectively.

The above-mentioned factors resulted in substantial improvement in OIBDA margin in the second quarter of 2007 as compared with the second quarter of 2006. The net income improvement was also helped by a slowdown in capital expenditures in the first half of 2007, and a corresponding deceleration in growth of depreciation charges.

In April 2007, we received an operating 3G license for the entire territory of Russia. This had no material impact on our results for the second quarter of 2007.

In the second quarter of 2007, VimpelCom invested \$188.9 million for the purchase of long-lived assets in Russia.

Churn	6.3%	8.2%		5.5%	
Subscriber market share	49.3%	44.1%		50.2%	

^{*)} After minority interest.

In the second quarter of 2007, the Company continued the successful development of its Kazakhstan operations. Substantial subscriber growth was accompanied by growth in MOU and ARPU. These factors led to impressive year-on-year and quarter-on-quarter growth in net operating revenues, OIBDA and net income.

OIBDA margin grew to 53.7% the highest level ever recorded by the Company in Kazakhstan. This exceptionally high margin was supported by growth of promotion-driven on-net traffic. We believe that the results demonstrate the underlying strength of the Kazakhstan market.

Churn	7.0%	27.4%		5.7%	
Subscriber market share	5.2%	1.6%		4.5%	

Our Ukrainian operations continue to show encouraging trends. Revenues almost quadrupled on a year-on-year basis and we managed to achieve impressive 44.6% quarter-on-quarter revenue growth despite a persistently aggressive pricing environment. A balanced tariff policy combined with seasonal growth in usage and guest roaming allowed us to increase our ARPU by 40.0% on a quarter-on-quarter basis. OIBDA, though still negative, demonstrated a clear positive trend in the second quarter of 2007, and SG&A expenses were practically unchanged compared to the previous quarter.

We have also almost quadrupled the number of active subscribers in Ukraine in the past twelve months. Our subscriber market continues to grow reaching 5.2% in the second quarter of 2007. During the last quarter, we rebalanced our tariffs and tightened our churn policy, which led to a significant improvement in the quality of our subscriber base but at the same time decreased the number of active subscribers on a quarter-on-quarter basis.

Our focus in Ukraine remains on increasing our subscriber base, simultaneously paying attention to its quality, and striving towards positive OIBDA.

Subscriber market share	32.7%	25.8%		33.1%	

In Uzbekistan mobile penetration is still only 15%, so our focus remains on growing our subscriber base. Accordingly, our active subscriber base grew 174.5% year-on-year. Subscriber growth, coupled with an increase in ARPU, led to healthy 28.3% revenue growth in the second quarter of 2007 as compared to the first quarter of 2007.

Our strategy is to continue investing in the development of the market. Key priorities in Uzbekistan are subscriber growth, network build-out, opening of new offices and development of our sales and distribution network.

Tajikistan continued to demonstrate excellent growth in the second quarter. On a quarter-on-quarter basis the Company reported 81.1% growth in net operating revenues backed by 41.0% growth in the number of active subscribers, an increase in usage and 16.1% growth in ARPU. The Company continued to grow market share in the second quarter.

In order to accelerate growth we increased our sales and marketing investments, which resulted in an increase in SAC. Despite this, OIBDA turned positive in the second quarter.

The rapid development of our Tajikistan operations is due in part to a successful marketing policy, network roll-out, improving service quality and brand promotion activities.

^{*)} After minority interest.

Armenian business showed very robust financial performance. We have started to implement changes in tariffs, and changes in customer service and network development across the country aimed at enhancing Armentel's position in the mobile market. At the same time we are operating the fixed-line network and exploring fixed-to-mobile convergence opportunities. We have initiated a process of large-scale network modernization with the aim of building a next generation converged fixed/mobile network.

While the Company is concerned with the reported erosion of our subscriber market share, we believe that it is largely driven by changing the source of our market share data from internal estimations to AC&M-Consulting. Nonetheless, we are dissatisfied with the absolute level of our market share in Armenia and building it will be our main near-term priority. To address this issue we have developed actions which we believe will strengthen our commercial operations and build market presence starting from the second half of this year.

GEORGIA

The Company launched commercial operations in Georgia on March 15, 2007. Currently we continue to build the network and develop our sales and distribution channels. At the end of the second quarter we had approximately 14,000 active subscribers and revenues of US\$ 0.15 million, so our operations in this country are still in the early phases.

VimpelCom Announces Second Quarter And Six Month 2007 Financial And Operating Results

Page 9 of 9

The Company's management will discuss its second quarter results during a conference call and slide presentation on August 30, 2007 at 6:30 pm Moscow time (10:30 am ET in New York). The call and slide presentation may be accessed via webcast at the following URL address <http://www.vimpelcom.com>. The conference call replay and the slide presentation webcast will be available through September 06, 2007 and September 27, 2007, respectively. The slide presentation will also be available for download on VimpelCom's website <http://www.vimpelcom.com>.

The VimpelCom Group includes companies operating in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia. The VimpelCom Group's GSM and 3G license portfolio covers a territory with a population of about 250 million. This includes the entire territories of Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia. VimpelCom was the first Russian company to list its shares on the New York Stock Exchange (NYSE). VimpelCom's ADSs are listed on the NYSE under the symbol "VIP".

The second quarter 2007 U.S. GAAP financial statements were approved unanimously by our board of directors.

This press release contains forward-looking statements, as the phrase is defined in Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements relate to the Company's strategic and development plans, including network development plans, and developments in the telecommunications markets in which the Company operates. These and other forward-looking statements are based on management's best assessment of the Company's strategic and financial position and of future market conditions and trends. These discussions involve risks and uncertainties. The actual outcome may differ materially from these statements as a result of unforeseen developments from competition, governmental regulation of the telecommunications industries in Russia and the CIS, general political uncertainties in Russia and the CIS and general economic developments in Russia and the CIS, challenges to 3G and Far East tenders and/or litigation with third parties or our shareholders (including Telenor), the Company's ability to continue to grow its overall revenues and its subscriber base, continued volatility in the world economy and other factors. As a result of such risks and uncertainties, there can be no assurance that the effects of competition or current or future changes in the political, economic and social environment or current or future regulation of the Russian and CIS telecommunications industries will not have a material adverse effect on the VimpelCom Group. Certain factors that could cause actual results to differ materially from those discussed in any forward-looking statements include the risks described in the Company's Annual Report on Form 20-F for the year ended December 31, 2006 and other public filings made by the Company with the United States Securities and Exchange Commission, which risk factors are incorporated herein by reference. VimpelCom disclaims any obligation to update developments of these risk factors or to announce publicly any revision to any of the forward-looking statements contained in this release, or to make corrections to reflect future events or developments.

Attachment A: Definitions

Registered subscriber is an authorized user of cellular services, using one SIM card (GSM/3G) with one or several selective numbers or one handset (DAMPS/CDMA) with one selective number. The number of subscribers includes employees using cellular services and excludes guest roamers and users of test SIM cards or handsets.

Churn rate is defined as the total number of registered subscribers disconnected from our network within a given period of time expressed as a percentage of the midpoint of subscribers in our network at the beginning and end of that period. Contract subscribers are disconnected if they have not paid their bills for 2 months and prepaid subscribers are disconnected 6 months after their services have been blocked. We typically block a prepaid subscriber's service in two cases: (1) their balance drops to \$0 or below, and (2) an account shows no chargeable activity within 6 months. The Company retains the right to change its disconnect policy to reflect changes in business or regulatory environment.

Active subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months and remain in the base at the end of the reported period. Such activities include all incoming and outgoing calls, subscriber fee accruals, debits related to service, outgoing SMS, MMS, data transmission and receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.

Prepaid subscribers are those subscribers who pay for their services in advance.

Fixed-line subscriber is an authorized user of fixed-line communications services.

OIBDA is a non-U.S. GAAP financial measure. OIBDA, previously referred to as EBITDA by the Company, is defined as operating income before depreciation and amortization. The Company believes that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our business operations, including our ability to finance capital expenditures, acquisitions and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under U.S. GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculations are commonly used as bases for some investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA should not be considered in isolation as an alternative to net income, operating income or any other measure of performance under U.S. GAAP. OIBDA does not include our need to replace our capital equipment over time. Reconciliation of OIBDA to operating income, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

OIBDA margin is OIBDA expressed as a percentage of total net operating revenues. Reconciliation of OIBDA margin to operating income as a percentage of total net operating revenues, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

Gross margin is defined as total operating revenues less service costs and cost of handsets and accessories sold.

Gross margin percentage is gross margin expressed as a percentage of total net operating revenues.

Each ADS represents 0.05 of one share of common stock. This ratio was established effective August 21, 2007.

ARPU (Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated by dividing the Company's service revenue during the relevant period, including roaming revenue and interconnect revenue, but excluding revenue from connection fees, sales of handsets and accessories and other non-service revenue, by the average number of the Company's active subscribers during the period and dividing by the number of months in that period. Reconciliation of ARPU to service revenues and connection fees, the most directly comparable U.S. GAAP financial measure, is presented below in the tables section. The Company believes that ARPU provides useful information to investors because it is an indicator of the performance of the Company's business operations and assists management in budgeting. The Company also believes that ARPU provides management with useful information concerning usage and acceptance of the Company's services. ARPU should not be viewed in isolation or an alternative to other figures reported under U.S. GAAP.

ARPU_{REG} is ARPU calculated with regard to the registered subscriber base.

MOU (Monthly Average Minutes of Use per User) is calculated by dividing the total number of minutes of usage for incoming and outgoing calls during the relevant period (excluding guest roamers) by the average number of active subscribers during the period and dividing by the number of months in that period.

MOU_{REG} is MOU calculated with regard to the registered subscriber base.

SAC (Average Acquisition Cost Per User), a non-U.S. GAAP financial measure, is calculated as dealers' commissions (for sales and bonus for exclusivity*), advertising expenses and handset subsidies for the relevant period divided by the number of new subscribers added during the relevant period. Reconciliation of SAC to selling, general and administrative expenses, the most directly comparable U.S. GAAP financial measure, is presented below in the tables section. The Company believes that SAC in growing markets provides useful information to investors because it is an indicator of the performance of the Company's business operations and assists management in budgeting. The Company also believes that SAC assists management in quantifying the incremental costs to acquire a new subscriber. SAC should not be viewed in isolation or as an alternative to other figures reported under U.S. GAAP.

Market share of subscribers for each relevant area is calculated by dividing the estimated number of our subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively, by the total estimated number of subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively.

*) *Dealers' bonus for exclusivity which we counted prior to the fourth quarter of 2006 as a part of general and administrative expenses is now included in the dealers' commission expense. Historical numbers including SAC were recalculated accordingly.*

VimpelCom
Presentation of 2Q 2007
Financial
and
Operating Results
August 30, 2007

2

Disclaimer

This presentation contains "forward-looking statements", as the phrase is defined in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements relate, in part, to the Company's strategy and development plans in Russia and the CIS, development of the Company's 3G

network

in
Russia
and
the
outcome
of
2G
license
tenders
in
the
Far
East
Region
of
Russia.

The
forward-

looking statements are based on management's best assessment of the Company's strategic and financial position, and future market conditions and trends. These discussions involve risks and uncertainties. The actual outcome may differ materially from these statements as a result of risks and uncertainties relating to developments from competition, governmental regulations of the wireless telecommunications industry, general political uncertainties in Russia and the CIS, general economic developments in Russia and the CIS, challenges to 3G and Far East tenders, and/or litigation with third parties or our shareholders (including Telenor).

The
actual
outcome
may
also
differ
materially
if
the
Company
is
unable
to
obtain
all
necessary
corporate
approvals
relating
to
its
business
(including
approval
of

funding,
specific
transactions
and
payment
of dividends),
and
other
factors.

There
can
be
no
assurance
that
these
risks
and
uncertainties
will
not
have
a
material
adverse
effect

on
the
Company,
that
the
Company
will
be
able
to
grow
or
that
it
will
be
successful
in

executing its strategy and development plans. Certain factors that could cause actual results to differ materially from those discussed in any forward-looking statements include the risks described in the Company's Annual Report on Form 20-F for the year ended December 31, 2006 and other public filings made by the Company with the United States Securities and Exchange Commission, which risk factors are incorporated herein by reference. The Company disclaims any obligation to update developments of these risk factors or to announce publicly any revision to any of the forward-looking statements contained in this

release, or to make corrections to reflect future events or developments.

2G Licensing Developments in Russian Far East

Tenders were recently conducted for licenses in
several of the Far East regions

VimpelCom

challenged the results and the terms of
all of the tenders as unfair and discriminatory. The

Russian Federal Anti-monopoly Service (FAS)
supported our position and asked the courts to annul
the results of the tenders

A newly created regulator suspended further tenders
for the Far East licenses while reviewing their terms
and conditions. New tenders are expected to take
place in mid-October

17

Operating and Financial Highlights:

Georgia and Tajikistan

Georgia

Operations launched at the end of Q1 and are still in a start-up phase

Focus on roll-out and distribution network development
Tajikistan

Sequential rapid growth continues:
81% revenue growth
41% increase in active subscribers

OIBDA turned positive in Q2

Market share increased from 11.2% to 15.2%

18

Summary

Strong quarter-on-quarter and year-on-year growth
of financial and operating results in all markets

Overall business in Russia is continuing to grow

and gain efficiency

CIS becoming an increasingly important source of new subscribers, demonstrating impressive revenue growth and improvements in OIBDA margins

Definitions
Registered
subscriber
is
an
authorized

user
of
cellular
services,
using
one
SIM
card
(GSM/3G)
with
one
or
several
selective numbers or one handset (DAMPS/CDMA) with one selective
number. The number of subscribers includes
employees using cellular services and excludes guest roamers and
users of test SIM cards or handsets.

Active
subscribers
are
those
subscribers
in
the
registered
subscriber
base
who
were
a
party
to
a
revenue
generating

activity in the past three months and remain in the base at the end of the reported period. Such activities include all
incoming and outgoing calls, subscriber fee accruals, debits related to service, outgoing SMS, MMS, data transmission
and receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.

ARPU

(Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated by dividing the
Company's service revenue during the relevant period, including roaming revenue and interconnect revenue, but
excluding revenue from connection fees, sales of handsets and accessories and other non-service revenue, by the average
number of the Company's active subscribers during the period and dividing by the number of months in that period.
Reconciliation of ARPU to service revenues and connection fees, the most directly comparable U.S. GAAP financial
measure, is presented above in the tables section. The Company believes that ARPU provides useful information to
investors because it is an indicator of the performance of the Company's business operations and assists management in
budgeting. The Company also believes that ARPU provides management with useful information concerning usage and
acceptance of the Company's services. ARPU should not be viewed in isolation or an alternative to other figures
reported under U.S. GAAP.

MOU

(Monthly Average Minutes of Use per User) is calculated by dividing the total number of minutes of usage for incoming and outgoing calls during the relevant period (excluding guest roamers) by the average number of active subscribers during the period and dividing by the number of months in that period.

Market share

of subscribers for each country is calculated by dividing the estimated number of the subscribers of a particular company by the total estimated number of subscribers in that country. Market share data is published by consulting agencies specializing in the telecommunications industry in Russia and the CIS and generally based on registered subscribers.

Net debt

is calculated as a total interest-bearing debt minus cash and cash equivalents

Free

cash

flow

is

calculated

as

operating

cash

flow

minus

capital
